Chapter 15 - Lotto Draft

Lu Qiujiang took the ball to the frontcourt, using the strength of strength to squeeze Ed's defense and hang the ball into Patrice's hand. Patrice immediately made a breakthrough to the left after catching the ball, attracting Gardson and Kyle. In defense, Patrice did not attack the ball to the open space left by Kyle, and Scott shot immediately after receiving the ball, a perfect Princeton tactical case.

It's a pity that Scott's shooting power is slightly stronger, and the basketball bomb flew out on the other side of the basket. At this time, Patrice and Spencer in the penalty area have been blocked by the defensive players, and Will will smile. Stretching out his arms, he wanted to bring the basketball into his arms; "Will! Be careful!" Gardson shouted when he saw Will's rapid jump behind him.

It's a pity that Lu Qiujiang jumped high and grabbed a rebound. He broke through two steps inwards and threw the ball towards the top of the basket. A dark shadow jumped to catch the basketball and smashed it down. Gardson was overwhelmed by great power. On the ground, Patrice hanged for a while before falling to the ground, "Pretty beautiful! Lu! Poor Gardson is about to cry!"

"Do you still think he is like Stockton?" Coach Thompson said to Blake while applauding, "He wouldn't rush to the offensive rebound as before!"

"So far he has rushed to grab five offensive rebounds four times and succeeded four times! The only time he failed because of floor slippage!" Black handed the statistics to Thompson. "He is more than Jason Kidd. Can rebound! "

"And the way he used his power to break through the opponent's defense reminded me of Barron Davis!", Thompson reported the name of a point guard who is now hot in the NBA.

If it was n't for fear of being too scary to control the power, Lu Qiujiang now learns Barkley's movement and is not a problem with backing Gardson. As for rebounds, as long as he sees Lu Qiujiang's mind Determine the strength and arc of this shot, so as to quickly simulate the trajectory of this shot, scoring or not, if not, where will the basketball finally fall? Which route is the fastest route from his position to the landing point, how to run the position to block other players behind, etc. The data will be analyzed in one hundredth of a second, so if you can't grab a rebound, Lu Qiu There is no need to mix it up.

Watching Lu Qiu Jian once again use Payton's steal to grab basketball from Ed, coach Thompson murmured to himself, "I bet that as long as he has this half of the performance in the NCAA, he will definitely Can enter the draft lottery! "

"Wow, will we also have a lottery rookie at Princeton? But I think he might be higher!", Blake wanted to be more confident.

Lotto rookies refer to the top 14 rookies selected in the NBA draft, they will get more attention. Longer playing time and richer money income. In the history of Princeton for more than 250 years, they have won the Nobel Prize, Fields Prize, Pritzker Prize, Pulitzer Prize winners, the President of the United States, countless elites such as well-known entrepreneurs and politicians, but No one has ever made it into the top 14 of the NBA Draft. The pride of the Princeton Tigers-Bill Bradley had this opportunity. Unfortunately, in 1965, he graduated and was the last year the NBA adopted a regional draft. New York Nick Si signed him with the regional draft. But Bradley did not sign a contract with the team quickly, because he won the world's most difficult scholarship-the Rhodes Scholarship and went to Oxford University for a year before returning to the New York Knicks to start his career and for the New York Nicks. Sri Lanka won two championships.

"This year is a big draft! I bet half of the league is willing to squander for LeBron James and Carmelo Anthony at Syracuse! Not to mention Bosh and Carman! You Do n't forget that point guards are usually not dominant in the draft. "Thompson is a bit conservative." And now it 's just an NCAA fish-meat team 's in-field practice game. I bet I can win two even if I play. Score in digits! "

"Come on! You didn't have double-digit playing time in every game!" Black broke Thompson's leather mercilessly. "I think it's not just Lu, if Patrice can keep it in the official game. In this state, there may be a team signing him at the end of the second round! "

"Then they need to stay in the NCAA game at the end of March!" The NCAA knockout starts in March every year. Coach Thompson means they want to be chosen by NBA coaches and managers. Strong.

The practice session between speeches has ended. Lu Qiu Jian scored a total of 21 points, 13 assists and 11 elder rebounds. He took part in team practice for the first time and easily achieved a good result in triple-doubles. Patrice also got a double-double of 23 points and 13 rebounds with his support! Gardson completely overpowered the main lineup.

"Lu! Crazy debut!" Coach Thompson gave a thumbs up. "But this is not enough. If you want to go further in the NCAA, you need to strengthen your defense!"

It seems that I have to look for the video recording of Peyton, Jordan, Kidd, and others! Before the time was too short, he only had time to watch the offensive highlights of some big-name guards.

“Okay, coach, I will do it!”

“Did you know? This game reminded me of the Finals three months ago! The great Patrice thought that O’Neal tortured Mutombo for tormenting poor Gardson.” Until I went back to the dorm, Patrice boasted all the way, and in his mouth he was as unstoppable as a big shark.

“Yes, you are a great boy, Patrice. The Cavaliers will be willing to give up James to sign you with the top pick next year!” Road.

“Will the Cavaliers get the top pick?” Patrice’s hand holding the key stopped. “How can you guess that it is the Cavaliers and not the Nuggets or Raptors?”

Earth, accidentally said the leak, Lu Qiuqian quickly fooled over; went back to the dormitory, from Patrice where to find a lot of game videos slowly looked up.

It wasn’t until late at night that he closed the video and picked up the notebook to conceive the paper! He only needs one or two hours of sleep every day to complete his rest, and quiet nights have become the best time for him to study.

After the second day of class, Lu Qiuqian came outside Professor Gals’ office and knocked on the door. “The door is not closed, please come in!” When he pushed open the door and entered, he saw another familiar face.
