

## D. School 151

Chapter 151 - Take me 1 line?

Lu Qiujian is wondering, which head of the basketball management center is now depressed; next year is the Olympics, but the national men's basketball team is still troubled by the problem of organizing guards. With the strength of Lu Qiujian, if he can compete with Yao Ming formed a partner, and the men's basketball team may not be able to complete a historic breakthrough at the Olympics. This is a political achievement for him!

But the interview of the Imperial Court broke his hope. Lu Qiujian declared that he did not have time to participate in the Olympic Games; how young people are like this now, one is more disobedient than the other, and has a little organization and discipline! He was so angry that he kept scolding in his heart, and of course he only dared to scold in his heart.

At the seven o'clock news program on the court platform, it was possible to cover the report meeting of Lu Qiujian. The elders and the deputy prime minister sat in the first row, even if the head did not understand the meaning of Poincaré's conjecture. The appearance of a national leader made him hold all his dissatisfaction with Lu Qiujian in his heart.

Hey, the team is getting harder and harder to bring! The head sighed, picked up the latest report and looked at it; it didn't take long for someone to knock on the door and came in.

"Director, are you troubled by that matter of Lv Qiujian?" Being an official will have this advantage. No matter what troubles, there will always be subordinates to help worry about it.

"Oh? What do you do?" The head asked quietly.

"I think even if we can't force him to join the national team, can we always use the power of the media!" Ignoring the intelligence quotient of officials is a big deal. Most of the time they do stupid things just because of \*\*\*\* problems.

"You didn't watch the news from Chao Ting Tai? The elders gave him a place to go! Do you still want to use the media to clean up him?" The head man looked at his cronies and scolded him, "You think I'm the one Is the position stable? "

"No, no! I don't mean to blame him with the media! Can we think of a way to hold him!" A close friend quickly expressed his attitude, "Let's give him momentum in the newspaper, and blow up his

strength, and then according to The situation came forward to express our department's desire for virtuosity, and finally pressed it with a big patriotic hat, so that if he did not join the national team, the fans would not agree! “

The head's eyes rolled, “Yes. Just kiddies! You have to do it yourself! If you're done well, I'll change a good position for you!” If you don't do well, resist yourself!

Celebrity also heard the half words that the head did not say, but what if he wanted to be promoted without risking? What I am afraid is not risk, I am afraid that the leadership does not give you a chance! He nodded again and again, “OK. I will do it!”

As soon as he went to work the next day, a new printed newspaper was placed on the desk of the head of the company. The data built by Lu Qiu was listed on the table. There were also newcomers such as Anthony, Wade and Bosh who are now in NBA The data from last year is for comparison.

The article blows Lu Qiu's strength to the sky, and sighs that Lu Qiu's failure to join nba is the loss of the entire basketball world. It is also the loss of the Chinese men's basketball team.

Well, we did not criticize him. We just expressed our affirmation of his skill. The head nodded satisfied and nodded the newspaper. It seems that this guy is quite reliable.

Jingle Bell! Just when he praised the efficiency of his staff, the phone rang! When he saw the familiar number, he stood up immediately and answered the phone respectfully. “Hello ... yes ... yes, I must let them do the review work .. ... Yes, I guarantee that no such mistakes will occur again. Rest assured ... “

It was easy to coax the other party over. After hanging up the phone, he collapsed on the chair as if he had lost all his strength. He only came to a halt for a long time.

“You call me.” Congxin nodded and walked in. When he saw the newspaper on the table, his eyes squinted into a line of joy, “Oh, this kid's article really has a hand! This is the first article. He still has a 30,000-word manuscript on his side, and it will explode as soon as you need it! “

“A fart broke out! Let him delete the manuscript quickly!” If you post it again, you won't be able to sit down.

“Ah? What's wrong with this?” Congxin still didn't understand.

The head of course will not say what he has been trained, but just say vaguely, “Some leaders said that this kind of article that will cause trouble to Lu Qiujiang is prohibited during this time. You also help to check it well. , If anyone unauthorized, do n’t want to interview the national team and the league in the future! “

A close friend opened his mouth suddenly. What is the background of Lu Qiujiang? How can there be such a big influence?

Lu Qiujiang didn’t know that he had unknowingly avoided a harassment unknowingly. If it is carried out according to the plan of a close friend, it will be enough to worry about him for a while!

Where will Professor Zhang come? After listening to Lu Qiujiang ’s question, he did n’t reveal the answer. He just chuckled, “Maybe it ’s a good thing, but I ’m still not sure. You do n’t have to worry about it, go back and prepare for it. You should do your graduation thesis after a while The question is open, you strive to come up with a weighty question! “

What good thing? How to keep it secret? Considering the current time, Lu Qiujiang seemed to think of something, but since Professor Zhang kept it secret, he was not good enough to ask promised, Lu Qiujiang rode back to the room on his bicycle.

Lying on the sofa in the living room, rubbing his temples, brushing papers every day in the recent period, and writing new papers based on his own speech. Some of them are overusing their brains, and their heads are faintly painful.

This is not a good sign. If you go on like this, you might be sick! No, today, let’s take a day off and go out for exercise!

Lu Qiujiang changed his clothes, put on his basketball shoes again, walked up to the school basketball court when he was packed properly; it has been a long time since he singled out with James, and he has n’t touched basketball for a while!

Came to the basketball court, several basketball courts were full, Lu Qiujiang made a round on the sidelines, and finally found a place that was not too much for a person. The court was playing three-on-three. There were two people watching below. .

Lu Qiujiang walked over and said hello, “Brother, take me one!”

“Yo, the equipment is good!” The other person’s eyes stopped for a while on Lu Qiu Jian’s Jordan shoes. “How long have you been playing? How is the level?”

“Well, I think about it, I started playing at about this time last year! Is it good, is it okay!” Lu Qiu Jian scratched his head.

“Okay, I’ll take you one! After a while they finished, we will go on three!” The man nodded and watched the game intently.

#### Chapter 152 - Better to play

Chatting while watching the ball off the court, Lu Qiu Jian quickly figured out the situation of these two people, the one who spoke was Zhao Zhe, and the one who came with him was Yu Yao.

“Okay, we should go!” The game ended soon, Zhao Zhe got up and made a few warm-ups, and then assigned the position on the field, “Yu Yao you are waiting for me to pass you, Lu Qiu Jian, you are standing tall in the basket! “Hey, this name seems familiar!

Unfortunately, the game was about to start. He did n’t think much about it. He took a basketball and went to the middle circle to prepare to serve. Lu Qiu Jian stood at the top of the arc to prepare to respond.

The game is a common three-on-three, five-point win and loss at halftime. If you miss a shot and grab a rebound, you can also make a second attack. These rules Zhao Zhe just made clear to Lu Qiu Jian; Qiu Jian didn’t know much yet. Zhao Zhe passed the ball to Yu Yao. After Yu Yao received the ball, he hauled it twice and then passed it back to Zhao Zhe. Zhao Zhe deleted a neutral and shot decisively.

Probably because he hadn’t found his hand feeling after playing, Lu Qiu Jian knew that the ball could not enter the ball as soon as he saw the arc of the hand. He immediately ran to the landing point and waited. He easily grabbed the rebound and flicked the hand to send the ball to the outside.

The opponent’s players were all ready to grab rebounds. Zhao Zhe was empty in front of him and rushed into the layup to easily get a layup. After that, they continued to serve. There was no suspense in the next game. Lu Qiu Jian took control of the rebound. The two of them were able to shoot from the outside. The other party basically had no chance to touch the ball and soon ended the game with 5: 0.

Won five games in a row, Zhao Zhe couldn't keep up with his physical strength, and took a breathless rest, Lu Qiujian didn't have much activity at this time; hey, the intensity of this game is not comparable! Isn't it relaxing at all!

"Dude, drink water!" On the court, ball skills are the most effective way to get closer. Lu Qiujian's superb rebounding skills quickly conquered his two friends. As soon as he came off the court, Zhao Zhe went to buy them diligently. Water comes.

"Thank you!" Lu Qiujian was not polite, and it was a big sip.

"The buddy ball is playing well, but why haven't I seen you before?" Zhao Zhe drew water while putting on his jacket. If he can partner with him every time he plays, what a beauty!

"I am here for the first time to play here." Would you like to go outside to catch the ball and hit three times later? It doesn't take much effort to just stay in the basket!

"I often run a few basketball courts at Peking University! Haven't you seen you anywhere else?" With Lu Qiujian's ball skills, Zhao Zhe will never forget if he has seen it.

"I went to the rice country as an exchange student last year! I just returned from the summer vacation!" Lu Qiujian explained.

"I said, I just wondered when our school came out with a master I didn't know!" Zhao Zhe suddenly relieved. "Eh, which school do you go to as an exchange student? I plan to go out next year and give some advice?"

"Princeton! What are you studying? Which schools are you aiming at?" Lu Qiujian screwed on the bottle cap and set the mineral water aside.

"Wangzitun is good, why don't you stay?" Zhao Zhe quipped. Suddenly turned his head suddenly, "Princeton ?! You are Lu Qiujian! The one you hit ?!"

++, this time will not be finished! Lu Qiujian looked at the basketball boys who followed Zhao Zhe's voice depressed; Zhao Zhe was also immersed in the surprise of seeing the idol, "It's really you! I didn't respond when you said your name just now Come here, now it looks exactly like the newspaper! "

“Who is this?”

“Lying trough, Lu Qiujiang!”

“Who is Lu Qiujiang?”

“Are you embarrassed to say that you are a senior fan? You don’t even know him! This year, he led Princeton to sling Anthony’s Syracuse University and Wade’s Marquette University! If he participates in the draft, the champion will not necessarily be James. That’s it! “The people on the court didn’t play anymore, so the noisy crowd came over here.

Zhao Zhe realized that he seemed to have done something inappropriate, and scratched his head embarrassedly and smiled. “I was so excited just now, I shouted out without control!”

Hey, Lu Qiujiang got up helplessly and greeted these enthusiastic fans.

“We are also the ones who have played with nba-level players!” The team that just lost the ball, the depression after the loss was swept away, desperately recalling every detail of playing with Lu Qiujiang.

“Let’s play again!” Someone next to me kept fighting. Next time I meet Lu Qiujiang, I don’t know when it will be. I have to seize the opportunity to fight him once, and bragging will also have capital in the future.

“Yes, yes!” Zhao Zhe and Yu Yao’s heads are even more like chicks pecking rice, expressing the same emotions as everyone else. We are also teammates with nba-level players!

Passion is difficult! Then go. When the three of them stood on the court again, even the people around the court put down the game and ran over as spectators. The rest of the basketball courts became empty, and the basketball boys all gathered in their half.

Zhao Zhe changed his previous strategy. Passing the ball directly to Lu Qiujiang, the opponent immediately sent two people to defend, and blocked him outside the three-point line; the next game became a place for Lu Qiujiang to show off his skills. Slam dunks, breakthroughs and other means. The opponent was quickly defeated.

“It’s time for us, time for us!” Three more people came up to be abused in excitement.

Hey, are you here to play or to copy? How do I feel so much like in the copy?

Five games in a row, Lu Qiu Jian waved his hand, threw away the basketball and walked down the court, “If you don’t fight, you won’t fight, you’re tired to eat!”

“Hey ~” Everyone sighed in unison, “Are you coming tomorrow?”

“Look at the situation! Not necessarily!” I went back to the sidelines and took a look. I just drank the remaining half of the bottle of water!

“Give, drink this bottle!”

“Drink me, drink me!”

Suddenly, seven or eight bottles of various drinks were handed over. There are mineral water, cola, ice tea, and even Gatorade; the only thing that is the same is that these handed over drinks come from all beautiful young girls! Staring at the stars and watching Lu Qiu Jian!

Didn’t you see these people just now? Lu Qiu Jian was sweating for a long time, and it was not appropriate to stay here for a long time. Thirty-six counted away as a measure. He greeted the crowd and ran away, and there was a laughter behind him.

On the way back, Lu Qiu Jian pondered that the one-and-a-third three hits just consumed a bit of physical energy and relieved some headaches, but it was not enough!

Lu Qiu Jian stopped when passing by the football field! Ok? Since basketball is not competitive enough, how about changing to playing football?

Chapter 153 - Winning

“Come, fill in these materials!” The next day, I was going to buy some equipment in the sports shop, and was called by Professor Zhang on a phone call. When I arrived at his office, I threw a bunch of forms without saying anything!

“What is this for?” Lu Qiujian asked while looking at the result table.

“What do you think I want you to send the information to the mathematics institute for?” Professor Zhang said with a smile pointing at the tables. “In addition to letting you show a face in front of them, it is convenient for you to do things in the future. This is the rest. Now! “

“Looks like a good thing?” These tables simply list Lu Qiujian’s personal information and the history of reading, as well as the publication of papers, but I can’t see anything.

“The school applied for this year’s Chen Shengsheng Award for you!” Professor Zhang’s face couldn’t help but bemused, and motioned to Lu Qiujian to sit on the sofa and talk, “This is something that has already been done, you just need to put these forms yourself. Just fill it out and let me do the rest! “

Think about worrying that Lu Qiujian did not understand and made a detailed explanation, “Actually, it is also a matter of time to win the Fields Award according to your results, but we can’t say it at all in China? The three major awards, the Wolf Prize and the Albert Prize, also have three major prizes awarded by the Chinese Mathematical Society in China, namely the Hua Luogeng Mathematics Prize, the Chen Shengshen Mathematics Prize and the Zhong Jiaqing Mathematics Prize! “

“Among them, the Hua Luogeng Mathematics Award is to commemorate Mr. Hua Luogeng. It is mainly awarded to those highly regarded Chinese mathematicians who have made outstanding contributions to the development of Chinese mathematics for a long time. The winners are required to be over 50 and under 70. , You definitely do n’t agree with this. “

“Zhong Jiaqing Mathematics Award was initiated by the relatives and friends of Mr. Zhong Jiaqing who died young, mainly to reward the best mathematics graduate students or doctoral students! Health. “He spread his hands in regret,” You are still undergraduate, and Princeton’s phd is not domestic, so it does not meet the requirements of this award. “

“But the Chen Shengshen Mathematics Award is no problem. This award mainly rewards young and middle-aged mathematicians who have made outstanding achievements in the field of mathematics! The requirements for the applicants are limited to mathematics workers who are engaged in mathematical research or teaching in China. The basic theory or applied research of mathematics has made important creative contributions. In principle, no more than fifty years old. “Professor Zhang couldn’t help laughing.” Although you are still an undergraduate, mathematicians can also count; No one can compare with you at all; if you talk about age, you are probably the youngest winner since the award was established! “

“Several of your seniors have also won this award. Mr. Zhang Gongqing was 49 years old when he won the award, Mr. Jiang Boju was 52 years old when he won the award, Mr. Wen Lan was 52 years old when he won the award, and Mr. Wang Shiyun was 47 years old when he won!” Think about it. “If you count other units, the youngest when you won the award is the director of the Mathematics Institute you saw yesterday, but he was also 37 years old at that time, almost double yours!”

“Haha, it seems that the name of the youngest Chen Shengshen Mathematics Prize winner is to stay at our Beijing Normal University forever!”

“I said why Director Zhou looked so strange in my eyes yesterday! It turned out to be the reason!” Lv Qiujian also laughed. These awards were awarded by the Chinese Mathematical Society, and the office of the Mathematical Society Just inside the Mathematics Institute, it is not surprising that Director Zhou got the news in advance.

“Don’t talk about this, Director Zhou is not such a stingy person! It is estimated that people are surprised to see that you have no reaction!” Professor Zhang quickly warned. Then talk about the evaluation rules of the Chen Shengshen Award. Any five professors in universities, research institutes, and academic groups can recommend it, and review the academic achievements of this person, and review his personal resume and published papers. The citations and evaluations of his works and scholars at home and abroad are attached and reported to the Mathematical Society. The Evaluation Committee of the Mathematical Society is responsible for the assessment work.

The award is awarded every two years, two at a time. In addition to the medals, the winners can also receive a prize of 25,000 HKD. the company.

“Thank you and the school for your support and love for me!” Lu Qiujian once again realized the benefits of organization, if you apply for it yourself. Five professors alone is a headache.

“Okay, you can fill it in here! This award is basically ten points and nine points stable!” After Professor Zhang returned to his desk to continue working, Lu Qiujian picked up the brush and filled it in.

Ten minutes, the form is completed. Take it back and hand it to Professor Zhang; he turned a few pages and saw the long list of “Mathematical Yearbook” and “” in the paper list, nodded with satisfaction, “Well, nothing else, just rely on this pile Ann. No one in our country can match it! You go back and prepare. This year’s annual meeting of the Mathematical Society will be held at Jiangcheng University. I will go to Jiangcheng with me at the end of the month. By the way, you

will be arranged to do Poincaré Guess the report, about forty minutes or so, go back and prepare it!  
“

Came out of the office building, and Lu Qiujian came to the teaching building again, although Professor Zhang said that he can skip classes; but now the curriculum is not only professional classes, some public class teachers still have to take care of their face! Anyway, I can read the physics book below, and I can't find someone for this little thing What article did I write recently? “As soon as I entered the classroom, I saw Xu Ye waving to him and walked to the empty seat next to him to sit down, and I couldn't help asking.

“It's still an article about the ten issues from the last meeting! In addition, I am also preparing to write some physical things to practice!” Lu Qiujian now does not go back to the dormitory, but the relationship between them has not been affected. .

“Now I think you are afraid of the situation that day. If you don't have Dashen Town, you might suffer!” Xu Ye said with concern. “Don't be so reckless in the future! Even if you have faith, you can do it. Is it an article after article, and where is the actual evidence? Sooner or later they will be convinced! Why not be in a hurry. “

“It's not time for me! Besides, how can they treat me? It's not the era of Bruno now!” At this moment the teacher came in, and Lu Qiujian closed his mouth.

After the class, I just planned to have a meal with Xu Ye to contact and connect with each other. Professor Zhang's phone call came back, “Xiao Lu, come and visit me! There is another form for you to fill in!”

Chapter 154 - Another prize?

Came out of Professor Zhang's office, and Lu Qiujian's mind was a little dizzy. If the Chen Shengshen Award was justified, the award was a little unexpected.

Although his achievements are indeed worthy of this award, but the winner before that award is not a highly respected generation? Even Lu Qiujian grew up listening to their stories. Although their achievements in science may be a bit weaker than those of Witten and others, Lu Qiujian respects them more. A few points, now suddenly found that his name will be tied to them, inevitably a little uncomfortable.

Forget it, I don't want to, anyway, it's just for registration now, and it has not been publicized and finalized. Please wait until later! Lu Qiujian temporarily left the matter behind, and quickly walked to the small restaurant that he had agreed with Xu Ye and Li Yincheng.

“Here!” As soon as he entered, he saw Xu Ye beckoning to him. There were already four or five dishes and a dozen beers on the table in front of him. When he sat down, everyone asked curiously, “Lao Zhang told you to do it. Why did you go?”

“Fill in a form and the school reported an award to me!” Lu Qiu Jian did not conceal.

“Awesome!” Xu Ye, Li Yincheng and Kong Yuan all gave thumbs up, and now they can’t eat anymore. Xu Ye stretched his neck and asked, “What’s the prize?”

“Chen Province Body Award!” Lu Qiu Jian didn’t say the name of another award. That was a little too exciting. He was afraid that the three animals could lift the table!

“Oh ~ in terms of your terms in these three awards, this is indeed the most suitable for you!” Li Yincheng nodded and said, as a person in the mathematics department, they are not unfamiliar with the three major awards in the Chinese mathematics industry. Some of them are given to them. The substitute professor will have to.

“Now I’m not old enough! When you pass 50, the Hua Luogeng Award will be presented to you! But Zhong Jiaqing Award, you are afraid that there is no hope!” Xu Ye followed the teasing, “You will go abroad next year.” When I read physics, what kind of results in the field of mathematics at that time did not meet the domestic option of reading a doctor!

“It’s enough to have these two. The weight of the Zhong Jiaqing Award is lower, don’t take it! Let’s talk about it. It’s their loss, not Qiu Jian’s, not to award the award to Qiu Jian!” Kong Yuan looked envious.

“Also! You get those two prizes! Give me the last one!” Xu Ye patted his chest, “At that time, even if our dormitory is the third prize of Baoyuan, it will be a legend!”

“It’s up to you to take it!” Li Yincheng was not happy, and his right hand rested on Kong Yuan’s shoulder. “I think Lao Kong and I have bigger hopes than you. It’s better to leave this important task to us!”

After a while, Xu Ye picked up the wine bottles and filled them one by one, and the wine glasses paused on the table. “Come. I wish the first student Lu Qiu Jian to receive the Chen Shengsheng Award!”

“Fuck!”

“Dry!”

There was a clatter, and the four cups met together. After drinking three cups in a row, they stopped to start eating. Even if they were eating, Xu Ye’s mouth was still busy, and he spoke loudly about the rumors of the award.

The hotel is not big, and there are many students from Beijing Normal University. They are not there either. When they heard there was big news, they immediately came over and asked, “Brother. What good thing is this?”

“The brothers in our dormitory won the grand prize! Do you know the Chen Shengshen Award? One of the highest awards in the national mathematics industry was won by this one!” Xu Ye has already regarded the Lv Qiujian prize as a foregone conclusion, but as long as the mathematics society is not mentally disabled It is certain that Lv Qiujian won the prize! Then again, even if the Mathematics Society needs to be mentally disabled, Beijing Normal University will not agree!

“Awesome!” Are students of Beijing Normal University. Xu Ye’s words gave them a sense of honour and honour. They asked Chen Shengshen the status of the prize and immediately returned to his table without a word. The bottle came over, and the puff filled two cups. “Come on, I respect you! I did what you wanted!”

Lv Qiujian took a look at the wine glass and then Xu Ye; Xu Ye lowered his high head, although the restaurant was small. There are also dozens of tables in the hall. Each table has three or four people, and the number of ten or more people is counted as the number one hundred. If no one comes here, do n’t think about these four people today. gone back.

what? You say no? Did n’t you see that all the young men were present? If you do n’t drink, you wo n’t give me face. Not giving me a face is to look down on me. Children with alcoholic brains are most afraid of being looked down on by others. If they are not careful, unpleasant things will happen.

Either drink and lie down and go back, or be beaten down and hang up with color; go back to think of these things are all caused by his loud voice, Xu Ye gritted his teeth and picked up the cup in front of Lu Qiujian, “Sorry , My brother ca n’t drink very much, I ’ll do it for you on his behalf! “Gudong went out and showed the bottom of the cup.

“Okay!” The crowd watching the crowd cheered, and then swarmed up.

“Brothers have a good drink, I will accompany you one!”

“You drank with him, you can’t help but drink me!”

“Come on, how hard is beer to drink! It should be white!”

“Drink so much white, then warm your stomach with another glass of red wine!”

Xu Ye was immediately submerged in the crowd, and the remaining three people who had escaped hurriedly bowed their heads to make a look like I didn’t know him, and ate the food silently.

Just finished dealing with a wave, the next wave of guests arrived again, seeing the people in the restaurant are crowded here and can’t help but ask Why is this? “

“Oh? One big brother is really good! He said that as long as he came here for dinner, one person would touch a glass, and he would never admit it!” I don’t know when the rumor became this look.

The man silently counted the number of people in the hotel, and suddenly felt admiration, “This buddy is amazing! Let’s go, let’s join in the fun!” Xu Ye, who had just vomited, ushered in a new batch. Challenger.

“Hey, did you say that Xiao Xu is still saved?” Li Yincheng folded his hands in prayer.

“May God bless!” Kong Yuan drew a cross on his chest.

“Let’s carry him back!” Lu Qiujian couldn’t bear it anymore.

It took a lot of effort for the three people to rescue Xu Ye. Li Yincheng and Kong Yuan dragged him out of the hotel on one shoulder; the crowd reluctantly watched them leave, and the people behind could not help but come to the door A sentence, “Dude, will you come tomorrow?”

Li Yincheng felt unconscious, Xu Ye, who was already drunk, shuddered obviously after hearing this sentence; went to the hospital to check his stomach, and then sent him back to the dormitory.

It was not until the noon of the next day that Xu Ye recovered a bit of energy; the man who was leaning on the bed and drinking water, the people in the dormitory next came in, “Brothers are here! Today I have a birthday, go out for a meal and drink two Cup to go? “

“Vomit ~” Xu Ye vomited on the bed now!

#### Chapter 155 - Bonus plan

“Simons, I suddenly had a new idea about the last consultation!” Lv Qiuqian dialed the phone of a Wall Street gangster again. The last time I called him, he wanted to pass the 10 million The US dollar was handed over to the foundation that I proposed on the last day of the report, but then I thought that these ten questions would not be answered in a short time. It seems a little waste to put it there, and it does not stimulate the mathematics community very well. “What do you think of this? I put this ten million dollars into your Renaissance company, which is operated by your company; the annual profit is deducted from the commission and charged to the foundation account, and then the daily operation expenses of the foundation are removed. The rest is given as a reward to scholars who have made great contributions to the research on these ten issues this year! “The Renaissance company’s average annual net rate of return is 35.6%, and an annual profit of 10 million is entirely sufficient to cover this cost.

“Haha! Give me a reason to agree! People who want to invest their money in the Renaissance can go from Princeton to Manhattan! I won’t easily agree with them! Either you have a huge influence in a certain area, or you can Bring me some policy convenience ... otherwise I can’t convince my shareholders. Of course, if you are willing to join Renaissance, then everything is not a problem! “Simmons replied with a laugh .

There are two main types of funds in his company. One is the Renaissance Capital Fund, which accepts external investment but the profit rate is average. The other is the medal fund that only internal employees can invest in. The profitability is extraordinary. If it is the first kind, Lu Qiuqian will not be satisfied with its rate of return, and also does not meet the Renaissance company’s screening rules; as for the second kind, Lu Qiuqian is not an internal employee, of course, there is no way to buy shares.

“I can’t do all this!” Lu Qiuqian had thought clearly before calling, but he knew what Simmons valued more than policy and energy, “but I can help you optimize your algorithm!”

“The perfect reason why you can’t refuse!” Simmons couldn’t help but clenched his fist. “But to optimize the algorithm, you need to first see the algorithm used by the Renaissance company. This is a tens of billions of secrets! “

“You can send someone you trust to come over, of course, it’s better if you can come by yourself! I can sign a confidentiality agreement and start working again!” Lu Qiuqian understands that the algorithm that can bring Simmons ten-digit income every year means what.

“Okay. I was just going to Huaguo recently.” Simmons’ voice became deeper. “You know, Chen’s body is getting worse now. I have to visit him! By the way, take a few Miguao. Doctor of the past. See if you can help him! “

Simmons is talking about Chen Shengshen, who is now settled in Jinmen. Lv Qiuqian just filled out the Mathematics Prize Application Form named after him two days ago. he!”

After an appointment, Lv Qiuqian hung up the phone and changed his clothes to walk to Professor Zhang’s office; the framework of the foundation proposed at the meeting last time has been set up. Professor Zhang and he have held important positions in it. Now that things have changed, we have to discuss with him!

“You mean putting this 10 million US dollars into the fund! And then take out the profitable part of each year to give out prizes?” Professor Zhang was a little worried after hearing this, “This investment is not easy to say, what if I lose?” Does the donor agree to do this? “

“The money came from James Simmons.” Lu Qiuqian said vaguely, “You should know him? His company’s profitability is still guaranteed!”

“Chen-Simmons Theorem is so persuasive!” Even if it is replaced by Professor Buffett Zhang, it may not have been heard, but Simmons has already made some achievements in the mathematics world, and is one of the most important donors of mathematical research in the world. He still trusted Professor Zhang very much, “I have seen him a few times before. But I didn’t say anything! If it’s him, I’m relieved!”

“You see, none of these ten problems can be solved in the short term. If you only solve one problem with one million prizes, it won’t play a big role in the short term!” Lu Qiuqian once again said his reasons, “but every year We all rewarded the mathematicians who initially made outstanding contributions to these ten questions this year. I have calculated a bonus of at least 100,000 US dollars! This is also a big stimulus, and at the same time it will expand our foundation and even The influence of the entire Peking University is good! “

Of course, you can also help yourself to gain a reputation in the mathematics community, hold an annual meeting, and exchange the latest progress with those mathematicians at the meeting is also conducive to mastering the latest progress of research. In order to adjust their own plans.

“Well, I think it’s okay!” Professor Zhang was ready to get up. “Go, go to the principal’s office with me. Tell me about your attention!” The foundation is still under the name of Peking University, The principal is the nominal person in charge, and in theory such a big change will have to go through him.

Outside the headmaster’s office When the secretary saw them, they brought them in directly; as soon as he got inside, the headmaster stood up with a smile. The mail in his hands. “Guess what I received?”

“Response from the members of the Fund Committee?” At the meeting, many invitations were sent to the authorities, and now it is almost time for them to reply.

“Yes!” The principal showed them an email, “This is Mr. Grothendieck, he has agreed; this is Professor Delinie, he also agreed; and Professor Witten; Professor John Thompson of Cambridge University; Professor Helmandell of Sweden; Professor Shafarevich of Moscow University; Professor Cedric Verany, Director of the Poincaré Institute in France; Professor Mori Chongwen of Kyoto University; Professor Schultz of Humboldt University ... Most of the people we contacted before agreed to the invitation and were willing to serve on the review committee. “

The United States, the United Kingdom, France, Sweden, Lucia, Germany, and Japan plus China are basically the most important forces in the mathematics community. With their support, the authority of the foundation is beyond doubt.

“We happened to come to you just for the foundation!” Professor Zhang said the matter again.

The headmaster thought for a while and said, “That’s fine. If no one has solved these problems for a long time, the foundation will become a decoration? Now every year, it’s just enough to maintain influence.” .

## Chapter 156 - Run a journal

When most mathematicians choose the research direction, they usually focus on the hot issues in this field of research, because hot issues are easier to be published by journals, easier to obtain the citations of peers in the industry, and easier to obtain honor ... Mathematicians also want to eat, and these are the fundamental factors that affect whether they eat nibble or eat a luxurious meal.

Lu Qiuqian did this in order to make his own questions become hot spots in research. This money is equivalent to making hot carrots, hanging in front of these mathematicians, let them go in the direction of their own guidance.

But for such a huge goal, this amount of money is not enough! One hundred thousand dollars is a lot for ordinary people, but it is not enough to attract scientists; although the prize of the Fields Prize is only 1,500 dollars, the long-term authority of the award is that the foundation does not currently have of.

So Lu Qiuqian thought of another channel, "Principal, I want to run another journal to publish papers related to these ten issues!" Studying Ramanujan's theory can make up a low impact factor "Ramanujan Journal", why can't you do this? Relative to money, a new channel for publishing papers may be what most mathematicians prefer. "We at Peking Normal University draw a group of mathematicians out for the first review, and then the authority of the review committee will do the final review! Of course, those in other Papers published in journals can also participate in awards! "

The journal number is not easy for the average person, but Jingshi University has its own publishing house. It is relatively easy to get a journal number; if there is a high-quality international academic journal under the name of Jingshi University This is also a very good thing for expanding the influence of Beijing Normal University. Lu Qiuqian is not afraid that the principal will not agree.

"The most important thing for journals is to have someone submit a paper! How to solve this problem?" The principal should be more cautious and directly asked the questions he was most worried about.

"Where did I save some manuscripts, and I can also make an appointment with the mathematicians who participated in the previous session!" Lu Qiu built up his heart with confidence. "And I saw on this time that there are already some scattered related Papers appear, such as Alexander Jevich of Moscow University. The quality of the papers is very good, we can ask them if they would like to submit the manuscript to our journal! So the manuscript that has started for a while has been fixed! Slowly follow The influence of the journal is expanding. Even if someone is asked to publish his article, instead of asking someone for an appointment! "

"Can academic Qiao make the things he made last time! This is the key information to prove the correctness of your questions!" Professor Zhang also helped.

With a clapping hand, the headmaster nodded, "OK. That's it!" Lu Qiuqian has become the biggest hotspot of the next Fields Award. It's worth taking the risk for him. The headmaster will soon I

made up my mind, “Now there are only five or six employees in the foundation, and now it seems that it is far away. I will redeploy the staff to put up the foundation’s shelf first, and then send the appointment emails, the promotion of journals, etc. Do it for them! “

“The salaries of these people can come from the donated funds!” According to the profitability of Simmons, the foundation can obtain a disposable profit of three million US dollars per year, except for one million bonuses, there are still two million. Used in daily operations, it is basically enough to pay employees, produce periodicals, and organize annual meetings!

“Well, can we still advertise in the four major journals,” “,” nature “and other magazines in the early stage!” The headmaster was excited at the annual meeting and waved his hand, “If the foundation has insufficient funds, Can Peking University also help raise some money! “

“It seems to be enough at the moment. If it is not enough, I will trouble you again!” Lu Qiujiang expressed his attitude. “Yes, what’s the name of the principal’s journal? Or would you help get one?”

“There is also the name of the award!” Professor Zhang added.

“Huh? Hehe, the funds of this fund were obtained by Xiao Lu, and the main direction was also directed by Xiao Lu. It is really inappropriate for me to name it without doing anything!” The principal quickly waved his hand with a smile. “As I mean, it’s still small Lu, give yourself a name! “

Pushed each other for a while, and seeing their firm attitude, Lv Qiujiang agreed to do so. “If I were named, how would you two watch” New Directions in Mathematics “?”

“Well, yes, I just figured out the theme of this journal!” The headmaster pondered his chin. After agreeing to the name, Professor Zhang also had no opinion there, so the name of the journal was fixed!

“What about the name of the award? At present, the scientific community generally names awards by their names, or should we do the same?” Professor Zhang quipped.

Amount, think about whether it is the Nobel Prize, Fields Prize or Lax Prize indeed it is named after the person! The donor of this fund is actually himself, is it called Lu Qiujiang Award?

The name really made him sweat. Wouldn't it be my life to name my awards at a young age? However, it seems that there are many awards named after Mr. Shao Yifu. His old man is a hundred years old.

Thinking about it for a while and finally deciding this way Donors do not want to disclose their identity, I think it is called the New Mathematics Discovery Award! Consistent with the name of the journal, the annual award is called the New Discovery Award, and the final award for cracking the problem is called the New Discovery Special Award! “

Hey, the name doesn't sound loud enough! The headmaster despised Lu Qiu Jian's naming level severely in his heart, but as said above, almost all the credit for this matter was Lu Qiu Jian. He wanted to call the Mathematics Award of Beijing Normal University. Sorry to say, just pinched his nose and responded.

“Okay, you go back and get ready, and go to Jiangcheng with me the day after tomorrow! The time for the mathematics conference this year is coming!” Professor Zhang ordered from the principal's office.

Is it going to claim the award? Lu Qiu Jian instantly thought of the form he filled out last time! Hey, this is not good for domestic awards, there is no surprise!

“What time will you come back?” After receiving Professor Zhang's reply, Lu Qiu Jian nodded and did not conflict with the time when Simmons arrived in the capital. “Okay, what do I need to prepare?”

“Nothing else, but you have to prepare a speech after winning the award?” Professor Zhang smiled and looked at Lu Qiu Jian, haha, this time you can go to the old friends of yours to show off!

## Chapter 157 - Jiangcheng

“Unfortunately, this year's annual meeting has set the time here! If the spring is good, just take a look at the cherry blossoms of Jiangcheng University!” On the plane, Professor Zhang introduced Lv Qiu Jian to Lu Qiu Jie with a smile Attractions and food, “Although you cannot see the cherry blossoms when you go now, you can still taste the food in Jiangcheng. You can go to Hubu Alley during the meeting to taste the old Tongcheng bean skin and the four seasons of beautiful soup. , Cai Linji specialty snacks such as hot dry noodles ... “

“Then I have to have a good insight!” Lu Qiu Jian also visited Jiangcheng several times in the past, but it was during the hottest time in Jiangcheng that the three stoves were well-deserved, leaving him completely unmindful to go out; now from the weather forecast Judging from the situation, the weather in Jiangcheng just happened to make up for the regrets of the next life.

“The plane is about to arrive at Tiancheng Airport in Jiangcheng, please seat belts .....” After more than two hours, the plane landed smoothly, and Lu Qiuqian helped Professor Zhang bring his salute to the plane as the crowd came down.

As soon as I walked to the exit, I saw someone holding a sign with the names of the two of them at the exit-“Connect with Professor Zhang Yongqian of Peking University, and receive Dr. Qiuqian Lu from Peking University”, the names of Peking University and Ph.D. It is still very appealing. Passengers passing through the exit can’t help but slow down when they see these two brands. I want to see how these two brands look like.

“Well, see? Not if you grow up. If you can get admitted to Peking University, you will be picked up no matter where you go. It’s much more comfortable than if we took a taxi by ourselves! Do you want to study hard when you go back?” A 30-year-old The young women on the left immediately took their daughters to start the on-site teaching.

Amount, doctor? Lu Qiuqian couldn’t help seeing the name on the brand, but his phd was from Princeton! But it’s clear when you think about it, you can’t write a letter to pick up the classmate Lu Qiuqian of Beijing Normal University, right? How can a doctor sound loud?

“Hello, I am Lu Qiuqian from Peking University! Are you here to pick us up?” While thinking about it, the two of them had reached the sign. Professor Zhang extended his right hand and shook each other, and reported to the door.

There was a hula over there, and several people came up to help with the bag, the water, and the water. The leader is a middle-aged man in his forties. He took Professor Zhang ’s hand and shook it. “Professor Zhang, hello. I ’m Xue Bige from the office of Jiangcheng University. Just call me Xiao Xue. ! “

After greeting Xue Bige’s eyes, he scanned Lu Qiuqian and then looked at the exit. After a minute of waiting, no one came and asked with some doubt, “Professor Zhang? Didn’t Dr. Lu fly with you?”

“Huh? You say Xiao Lu? Isn’t that what it is!” Professor Zhang patted Lu Qiuqian’s shoulder inexplicably. What’s wrong with this person? No one can recognize it in front of you!

“Hey! Look at my brain!” Xue Bige slapped his forehead on the forehead and hurriedly walked to Lu Qiuqian before bending down and pulling Lu Qiuqian’s hand. “When I saw you as a doctor, I thought you were at least thirty! I didn’t expect you to be so young! It’s so young!”

“Haha! Then you are wrong! Xiao Lu is only twenty now!” Professor Zhang was very happy to see others praise his proud pupils, “Xiao Lu, I remember you were your birthday on November 8th. ? It should not be twenty-one. “

“If you don’t say it, I can’t remember it!” Lu Qiujian burst into shame, but he didn’t know the date of Professor Zhang’s birthday.

“Twenty-year-old doctor!” Xue Bige and the people who came with him grew their mouths at the same time, and the passengers next to them also stopped and looked at this side.

“Xiao Li, I remember our country has four years of undergraduate and three years of postgraduate. The doctor has another three years, which adds up to ten years! Even if you go to university and study smoothly at the age of eighteen, even if you get a doctor, you will get at least 27 Eight, right? “Someone beside him whispered to his friend immediately.

Looking at Xue Bige’s puzzled eyes, Professor Zhang couldn’t help explaining, “Xiao Lu took the phd in Princeton to reward him for his outstanding contribution in academics, not to read it step by step, so it is better than others Less time! “

“No wonder!” Xue Bige suddenly realized, seeing more and more people around, then remembered his task. Quickly pulled them out, “You two have a hard journey, let’s go to Jiangcheng University to rest!”

Lu Qiujian followed them and waved his sleeves. Take away a surprise and leave a legend; the 20-year-old doctors have been spread to all directions by these travelers as a show.

Going to the parking lot outside, Xue Bige took them to an Audi car and took the initiative to pull the door for Professor Zhang to let them in. The people who followed him took Professor Zhang and Lu Qiu The built luggage got on the back of the commercial vehicle.

Xue Bige closed the door, trot to the front, opened the co-pilot and sat down, and the car started slowly. Xue Bige turned around and gave his business card with both hands. “This is my business card. If you have anything to do with me these days, please call me at any time; my task these days is to do the reception work for your two. Don’t be polite to me! “

“Thank you Director Xue!” Just now Professor Zhang heard the driver call Xue Bige as the director. thought it should be the office director or deputy director of Jiangcheng University, right?

“There’s Jiangcheng’s well-established Great China Restaurant over there. Wuchang Fish in it is awesome ... In front is Jinhu Restaurant. The Jiangcheng cuisine in it is the most authentic. Outsiders will come and eat his salt and pepper ribs when they come. .... “The director Xue never stopped talking along the way, constantly introducing them to Jiangcheng’s good places, and at the end there was a sentence,” The meetings have been very loose these days, you two No matter where you want to go, give me a call and I will arrange for the car to send you two in the past! “

Arrived in Jiangcheng University, Audi car slowly stopped at the door of the school hotel, this time Lu Qiujian did not wait for Director Xue to come and opened the door by himself.

“You two come here first to make a registration, and then I will take you two upstairs!” Director Xue led them to the check-in desk, and greeted the genius to check in.

When they signed and got the room card, another car stopped at the door, and a 50- to 60-year-old man got off Santana, followed by a young man in his twenties.

“Professor Wu, please check in here first!” The young man brought Professor Wu to the check-in place with his luggage.

Oh, maybe you came to the meeting too? Professor Zhang just wanted to go forward to say hello, but which Professor Wu looked at the Audi car parked below, then looked at his Santana, looked at the group of people behind Professor Zhang, and then looked at the young man next to him, He snorted directly and turned his head.

Chapter 158 - How is he?

Professor Zhang and Lv Qiujian either bought insurance or sponsored, and seeing him looks like he has no thoughts to greet each other now, “Director Xue, shall we go up?”

“Eh! Good! Xiao Liu Xiao Zhao, be careful not to drop things!” Director Xue was afraid of something unpleasant, and immediately took them into the elevator.

“Which one belongs to which unit?” Lu Qiujian also guessed the reason for the other party’s dissatisfaction. After receiving Professor Zhang and himself as a bunch of people with Audi, picking him is a Santana, there is obviously a difference in treatment!

“A research institute in the south.” Director Xue just started to spit out bitter words. “It’s not a blame for us! The school just leaves the car. A few hundred scholars from all over the country are coming to the meeting, and we finally transferred it. Yes! The cars are all made up together. Is this a little bit different? “

Of course, no matter how different he is, he will not send a Santana to pick up the representatives of Beijing Normal University, not to mention that this meeting is also responsible for the re-election of the Mathematical Society. Professor Zhang is a popular candidate for the deputy chairman.

Lv Qiujian looked at Professor Zhang and didn’t respond. If he wanted to come, he wouldn’t recognize that person? If Professor Zhang didn’t know, that person’s status in the mathematics world is estimated to be average, so Lu Qiujian quickly left this matter behind his head.

“This is your room!” On the floor, Director Xue handed over two room cards. “You two first look at what is missing? I will prepare it for you if you need anything!”

“Oh, it’s good! Director Xue and some boys come in for a rest too?” Professor Zhang opened the door and glanced.

“If you don’t have it!” Director Xue repeatedly waved his hand and refused Professor Zhang’s invitation. “Then you rest first, we won’t disturb you. If you need to call me!”

Sending them away, Professor Zhang said to Lu Qiujian, “You also go back to rest, remember to see if the dress is wrinkle-free. If it is wrinkled, let the hotel help you iron it. Tomorrow you will use it! Under review, don’t get wrong when you get it. “

“Well, I see.” Seeing Professor Zhang with a tired face, Lv Qiujian put away his plans to ask him for information about the meeting, went back to the room and checked and found out that there was nothing wrong with the suit and took out the computer. Jiangcheng University I was very well prepared for this meeting. The speed of the network signal in the room was not bad. Lu Qiujian turned on the computer and brushed it up.

Unconsciously two hours passed, look at the time in the lower right corner of the computer, it is time to eat dinner; Lu Qiujian stretched out a lazy waist. Putting on a coat and going out knocked on Professor Zhang’s door.

“I’m hungry?” Professor Zhang opened the door and asked with a smile, seeing that he was dressed properly, he was also preparing to go out! While walking outside, he said, “Come on, dine downstairs in the restaurant, and just show the invitation letter!”

“Yo! Isn’t this Lao Zhang? This hasn’t been seen for two years!” Upon reaching the floor of the restaurant, a man with a large body and a fat body came to Professor Zhang’s side in surprise and took his hand for a while. The child shook, “Xiao Fang and Lao Nie have arrived a long time ago and left. Our brother can have a good drink in two cups a few nights!”

“I’m talking about going to the lobby to see if I can find you for a while! I didn’t expect to meet you as soon as I got out of the elevator!” Professor Zhang was also overjoyed in his clothes, extending his left hand in the direction of Lu Qiu Jian while shaking hands with him, “Come, Let me introduce you. This is ... “

“Your student?” The man glanced at Lu Qiu Jian’s overly young face, and hugged Professor Zhang’s shoulder. “Ming Er will be introduced again! There will be good things for him in the future, but now you are still follow me!”

“This classmate. Your teacher, I slipped away! You will arrange it yourself tonight!” After that, there is a black wind ... Oh, it is not the strong result of the rapid movement of air caused by the rapid movement of large surface area objects in a narrow space. Convection, Master Lu Qiu Jian ... Oh no, it was the head of the department who took it away!

“Alas! Professor Zhang!” Lu Qiu Jian just shouted that the person went away ... forget it. Brother Two and Brother Three are not here. I can’t save myself, or go back to my Huaguo Mountain ... Oh no, go eat!

When I arrived at the door, I presented an invitation letter and went inside. I saw that the restaurant was full of people. All the tables in the hall were filled with scholars from all walks of life eating buffet dishes; I swept around and did not see Professor Zhang. See if there are a few private rooms next to them, probably where do they eat!

Jiangcheng University offers a buffet, but the food is not bad. Almost everything can be found in the sky, crawling on the ground, and swimming in the water. Lu Qiu Jian hit a large plate and found an empty seat to sit down and start eating.

Ok? Why is this so young? This is a common idea with the scholars at his table. Several people who knew each other began to whisper and began to whisper. After a while, Kyufu Lu Qiu Jian’s keen hearing found the participants’ disciples, Jiangcheng University volunteers said, hotel staff’s

disciples Speaking of waiting for several kinds of conjectures, don't you really say that although they are only speculations, their logical reasoning process is still very rigorous, it is worthy of doing mathematics.

"Professor Wu, there is a place here!" While listening to it with interest, someone sat down next to him and looked back. Isn't that Professor Wu who met at the check-in place?

Professor Wu also found him at this time, and wanted to leave with a tray at the moment, but now when there are many people, this vacancy is still easy to find, then there are other vacancies! So he snorted and sat down again, turning his eyes to his mouth and muttering to himself, "Hey, the current conference is really not as good as one! Anyone can get in!"

He also thought about Lu Qiujian's reply. He humiliated him so much that he was treated differently by taking the car. Who knew Lu Qiujian was eating slowly like he didn't hear it I don't know whose student it is! Is this a place where you can come alone? If you haven't made any achievements in mathematics, why would you be so good to eat and drink? "Seeing Lu Qiujian ignore him, he is even more energetic!"

"Oh, others dare not say, compared with Professor Wu, I think I still have some achievements!" Lu Qiujian sneered.

"What do you say? You have the ability to say it again!" Professor Wu was almost angry and rushed to the crown-if the Mediterranean can also rush.

"Okay, okay, old Wu, what's wrong with a student!" The one who came with him seemed to understand his temper and quickly pulled him aside.

Lu Qiujian had originally planned to ask him what he had accomplished so that he could be taken away ruthlessly. Seeing that he was pulled away, there was no interest in continuing his pursuit. The tableware was put away at the recycling place.

Professor Wu didn't stop there, and he was still nagging until the meeting the next day, and all the leaders said that they did not stop after the speech.

Took a sip of water and planned to continue to talk to his friends about the education problems of students today. The afterglow of his eyes swept to the stage, eh? What is he doing?

Chapter 159 - Youngest winner

“He’s about the age of Twenty Lang! Mao hasn’t grown up yet! Don’t tell the results, just put the paper in front of him, can he understand it? I said old Liu, I dare not say a book in my life Waiting, but there are still a few articles about the article ... “Professor Wu originally gushed not to vent his dissatisfaction to his friends, but seeing Lu Qiuqian standing on the stage, he couldn’t help but drum a little, so the voice became louder The lower it is, the more it gradually becomes inaudible.

“That’s what it is! Young people now! I don’t know how to respect teachers and teach. I still remember the article” Non-Commutative Geometry, Low-Dimensional Topology and Its Application in Physics “published by Wu Wu a few years ago. “Application”, the absolute first-class level in China! “Old Liu Hunran didn’t notice his strangeness, he said self-evidently,” Like the young man yesterday, he is afraid that he doesn’t even know what the low-dimensional topology is, right? Wu you said Isn’t it? ... Um? Old Wu? Why didn’t you speak? “

“How did he get to the stage?” Professor Wu couldn’t help asking.

“Who? Is n’t it time to give the Hualuogeng Award and the Chen Shengshen Award after finishing the speech in accordance with the leadership of the meeting? You see, the first two are not Professor Shi and Professor Lu. They both seem to have won the Hualuogeng Award! The student yesterday Is n’t the person next to Director Gong of the Institute of Applied Mathematics? He won the Zhong Jiaqing Award before, and this year is also a popular Chen Shengsheng Award! Huh, is n’t the Chen Shengsheng Award two winners? The other one ... “Old Liu finally seemed to realize something, and suddenly he was speechless. Since he stood with Director Gong, who is a popular award winner, does that mean that this student is also ...

“Here are the academicians Gu and Wang of the Chinese Academy of Sciences as the winners of the Chen Shengshen Award, Director Gong from the Institute of Applied Mathematics of the Academy of Mathematics and Systems Science, and Lu Qiuqian from the Beijing Normal University to present the 9th Chenshen Shengma Award “” The host’s voice even blew up the two of them, and Professor Wu’s face turned red.

When the two academicians came to power, the host said the reason for their award, “Director Gong has first proved the Poincaré inequality of weighted first-order Soberev space on the ring space, and solved the problem proposed by Gross in 1993. “Lui Qiuqian’s tone became heated when he said that” Lv Qiuqian successfully cracked the Poincaré conjecture that has plagued the mathematics community for nearly a hundred years last year! And it was widely recognized by the international mathematics community. This is Jianguo. Since the great glory of China’s mathematics ... “

Professor Wu was like a slap in the face. Ears buzzing, I just said that people can’t even understand their own papers, but now I found out that the other party has cracked this world problem!

Yesterday at dinner, many people saw that they despised Lv Qiujian. If this matter spreads, they will lose their face in the mathematical world! Professor Wu felt that his neck was shrunk, for fear of being seen by others.

“Oh, I don’t know who can read who’s paper now!” I don’t know from which corner I heard such a sentence, but I know that the other party is talking about myself, and Professor Wu, who has always been famous for his courage, does not dare to rebut Too.

He also studies low-dimensional topologies. How could he not understand the significance of Poincaré’s conjecture? To tell the truth, Lu Qiujian’s thesis was also read by him. As for the result ... hehe!

Is finished! This is all over! The math circle is so small, the gossip is spreading very fast. It is estimated that the news of Lu Qiujian will be spread to the institute without waiting to go back. How can it be mixed in the institute in the future! Some time ago, I just took Lu Qiujian’s thesis to motivate those graduate students to come! What will they think of themselves when they go back?

Not to mention the regret in Professor Wu’s heart, when Lu Qiujian received the certificate of Chen Shengsheng Award from Academician Wang, the applause from the audience sounded like thunder. This is a tribute to a great achievement in mathematics. It is also a pride for Chinese people, and it is an inspiration for a new generation of Chinese mathematicians.

“Thanks to the Chinese Mathematical Society! Thank you Academician Wang!” Lu Qiujian bowed to the predecessor in front of him.

“Oh, if it’s not old. I want to write a biography for you! It’s definitely more exciting than before!” Academician Wang said, slapping his shoulder.

Lv Qiujian knew that this was an affirmation of his achievements. In addition to his outstanding achievements in analysing number theory, Academician Wang also devoted himself to the popular analysis of mathematics so that the public could feel the charm of mathematics. “Hua Luo Geng Zhuan” is a work that he spent nine years to complete; now that he wants to write a biography for Lu Qiujian, he is also encouraging him to continue on the road of mathematics.

The awarding time was not long. After taking a group photo, Lu Qiujian returned to his seat, and Professor Zhang said with a smile. “This is the first one. There will be a lot of awards waiting for you to get it, don’t be proud!”

“With your supervision. How dare I relax!” Lv Qiujian joked casually and continued to cast his sights on the stage; after the award was given, the sponsor of the Hua Luo Geng Award came to the stage to speak, and then the chairman of the current term came to the stage to do Work summary.

Only then did Lu Qiujian understand the reason why the awards were awarded on the first day of the conference; under normal circumstances, the awards of each conference were regarded as the finale. But this time the situation is somewhat special, this year it just happens to be the new year of the Mathematical Society, and this afternoon there will be a general election.

In other words, tomorrow is the day for the new leader to come to power, and this period of the Hua Luogeng Award and Chen Shengshen Award were determined during this term, so they were put on the first day.

In the afternoon general election, Lu Qiujian followed behind Professor Zhang to make soy sauce; according to the practice of the Chinese Mathematical Society, at the beginning of the afternoon, all members were divided into four groups for group discussion and deliberation on the work report; because it was held in Beijing last year. Since the World Conference of Mathematicians, most people praised the results of the last class.

After reviewing the work summary, discussing the draft amendments to the constitution, pointing out some deficiencies in the work and putting forward some constructive comments, the general election officially began.

The election of Beijing Normal University was very rewarding. Not only did Professor Zhang successfully become the deputy chairman, but even the post of the chairman also went to Professor Wen of the Beijing Normal University, and even Lu Qiujian gave the name of executive director; Mr. Gong, who received the award at the same time as Lu Qiujian, became the secretary general.

The chairman of the Mathematical Society seems to be the department level. How can I say that this executive director is a division level? Although the current executive director does not have much effect at present, it is finally the first step for him to formally enter the scientific circle of China. In the future, this is all seniority! In the future, if you want to master a certain project independently, you can use it as a bonus!

## Chapter 160 - Faction

After the election, today's meeting process will come to an end. As for the selection of other members such as the Hua Luogeng Award and the Chen Shengshen Award Selection Committee, the selection of the head of the working committee, etc. will have to be discussed in the Standing Council next year; the next two days are Routine academic exchange work.  $n \in$

Lu Qiuqian's name appeared majestic on the list of executive directors, surrounded by a group of principals and vice-principals; deans and deputy deans; the director and deputy directors were very striking; but those who attended the meeting were not people Proudly raise a protest, because the mathematics community is ultimately a place where strength is concerned. If you are only a little taller than others, others may still be able to use the excuses of age and seniority to pull you down, but if you are much higher than others, they certainly do not Will ask for boring.

Lu Qiuqian was able to easily obtain this position. Another important reason is that he is now a student of Beijing Normal University. He is backed by the thickest tree in the mathematics circle in China. This tree protects him from the wind and rain. Others Don't dare to offend easily; if he is a student of an unknown college, even if he has made such a great achievement, even if he can still be elected in the end, there will be some trouble.

The mathematics community in Huaguo can be basically divided into three factions: the school of Beijing Normal University where Lu Qiuqian is located. In addition to the scholars working in the Beijing Normal University, this school also has several members of the Chinese Academy of Sciences who have deep connections with Beijing Normal University. , With a large number of people and the most powerful.

Which incubator school belongs to Academician Gu who gave the award to Director Gong, they also have allies working in the Academy of Sciences in addition to their academics, but their strength is weaker than that of Beijing Normal University.

The academic school to which Lu Qiuqian awarded the award belongs to the most academic school. At first glance, this school has the most people, but because they are from different colleges, and because of the contradictions that have arisen in the previous reforms of the academy of sciences, they are among each other. Lack of cohesion; so that in some major events, it is often used by Beijing Normal University and Incubator University.

The rest are members of some gangs. Maybe from time to time one or two talented people can emerge, but in the end they cannot be compared with the above three groups.

If we compare the mathematics to rivers and lakes. Then Beijing Normal University is Shaolin, firmly occupying the throne of the world's first school; the hatching egg is Wudang, no one can beat the Shaolin; the Academy of Sciences is like Mingjiao, although there are many masters, but no one can withstand the scene. The leader, there are many contradictions in the teaching, and there is no way to compete with the above two factions; as for the others, such as Huashan and Taishan, they are generally acceptable. If they encounter major events, they can only seek the help of the above three factions.

Today, the appearance of the mathematics community in China has historical reasons. Before the founding of the People's Republic of China, the mathematics community in China was divided between the Chen Su School and the Shuimu School.

Chen Su School is the Wu Yue University School founded by Wu Jian University and Chen Jiangong. They used the discussion class as an important form of mathematical research, and discussed function theory and differential geometry respectively. The students exchanged their latest research progress and international frontier issues with each other in the discussion class, which is quite similar to the afternoon tea party in Princeton. This novel teaching model greatly stimulated the creativity of students, and Wu Yue University has formed a three-legged momentum with the Chicago School of the United States and the Roman School of the Noodle Country in terms of differential geometry.

The Shuimu School, as its name implies, is the mathematics department of Shuimu University. Under the guidance of Xiong Qinglai and Yang Wuzhi, they actively introduced the international advanced mathematics teaching system and advocated academic research. In addition to inviting Chen Shengshen and Hua Luogeng to give lectures, Jacques Adama (French mathematician, prime number theorem has made outstanding contributions, and the important character of the Burbaki school, Wei Yi, who is his student), Norbert-Weiner (Mexican mathematician, The founder of cybernetics) and other world-class scholars are visiting professors; he has made a series of major achievements in academic and teaching.

In the third year after the founding of the People's Republic of China. The adjustment of colleges and universities across the country broke this pattern. The Department of Mathematics of Shuimu University was merged into the Department of Mathematics of Beijing Normal University; the backbone of mathematics of Wuyue University, such as Chen Jiangong and Su Buqing, went northward and merged into Incubation University, and the rest entered Wuyue Normal University. After they left, the original school set up the Advanced Mathematics Teaching and Research Office to take charge of the higher mathematics education in the school. No longer taking up scientific research tasks, the two schools have gradually dissipated since then.

The Jingshi University that annexed the Mizuki Department and the Incubator University with Chen Su joined in the mathematics world, coupled with the country's policy of building the Jingshi University and the Incubator University at that time, and the reasons for the small scale of the mathematics majors in other universities and the weak teachers. . As a result, these two factions are now in an absolute monopoly in China.

These two schools have trained a group of scholars who are well-known overseas, and they have also monopolized half of the candidates for the Academy of Mathematics of the Chinese Academy of Sciences, which has maintained their monopoly status. It also aroused the disgust of some Qing Gao scholars.

Of course, this kind of situation does not only happen in the mathematics circle in China. There are also other factions in Beijing's chemistry class, such as Beijing Normal University, Academy of Sciences, Ludao University, and Central University. Bulba has also appeared internationally. The Ji School, the Göttingen School and other forces are not all pure and innocent.

When everyone sees the news of a certain popular person in the news and has been elected as an academician, you can take out their resumes to check it out, maybe the faction problem is the real reason here.

In the short term, this kind of situation is advantageous to Lu Qiujian. Beijing Normal University needs him to maintain and improve his position in the mathematics world. Lu Qiujian also needs Beijing Normal University to resist unnecessary troubles for himself and use Beijing Normal University. 'S name is supported by policy, manpower, and funding to prepare for his plan.

However, the current pattern in the mathematics community will undoubtedly undermine the confidence of other mathematicians, which is not conducive to the growth of a new generation of mathematicians; even some young mathematicians who are still vigorous and tortured because of this problem have been tortured and some are discouraged. Yi Leng went to the retreat of the United States, and some teachers and students were defeated, and some of them did not get what they wanted.

This is also an important reason why the Chinese mathematics community has not made great progress in recent years, so this situation is unfavorable for Lu Qiujian in the long run!

Hey, there are still many annoying things! Lu Qiujian sighed slightly, although he still has a certain say in the circle, but it is still not enough to change this situation; maybe he said it when he received the Fields Award two years later. There will be some weight! Hope to find a good way to change this trend by then.
