

D. School 161

Chapter 161 - Domestic debut

“I still have a meeting in the evening. If you want to go out and go, just call Director Xue, but don’t be too late. Come back early to prepare the report for tomorrow!” Professor Zhang took him and the new executive at the end of the meeting. The directors finished eating and urged.

“Yes, I just walk around the school! Don’t go out!” The daytime plenary meeting is over, but there is the last standing council tonight. This is what Professor Zhang is going to attend; according to the meeting schedule, Tomorrow evening will be the standing council of this term, and I am expected to participate by then.

As a result, his plan to go shopping failed to be implemented after all. When someone came out of the restaurant, someone immediately came to talk about it. Lu Qiujian couldn’t get rid of it.

“Dr. Lu, I have read all the articles in the” Annual Mathematics “, and I have some doubts about the partial differential article!”

“Dr. Lu, tell us something about cracking Poincaré’s conjecture!”

“I have a newly written article here, please ask Dr. Lu to correct me!”

Lu Qiujian glanced around, most of them were “young scholars” who were around 30 or 40 years old. Those who were older may have had their own status and did not step forward.

“Yeah, guys are blocking the road to the restaurant, shall we change places?” Since there is no way to go out, simply find a quiet place to communicate in detail. Although backed by the big tree, but one more Good karma is always good.

“There is a small meeting room upstairs! The chairman, they went to the mountain village to go to a meeting, it is not necessary, I will talk to the hotel to use it!” Immediately, the school’s ground snake came to deal with it, and the key was obtained in a short time. The young scholars talked and laughed and walked up the stairs.

“Huh, a group of flamboyants!” Professor Wu came out of the restaurant to see this scene, but he couldn’t help but tilt his nose, reaching for the old Liu behind him, “Come on, let’s go back to the room and play chess!”

Lao Liu’s pace was a bit hesitant, seeming to justify and seemingly muttering, “We are both studying low-dimensional topology. It is not easy to have such an opportunity to communicate, or follow up and listen?”

Professor Wu Yan felt a move in his heart, but after all he failed to take steps, he did to Lu Qiuqian like that yesterday. Today, I can’t take my old face anyway; so I said slightly, “Why don’t you go! I have a headache and I won’t go!”

After speaking, he walked out quickly. Old Liu looked at his back and shook his head. After all, he didn’t catch up, and he followed the stairs to the small meeting room upstairs.

Arrived at the meeting room. As soon as the people sat down, some scholars from Jiangcheng University greeted people to bring tea and fruits. A group of people gave Lu Qiuqian the seat to sit at the head; when they started to communicate, there was still contact, but slowly they became everyone. Questions, Lu Qiuqian answered the pattern.

“Dr. Lu, I am studying Li Qun’s problem recently, and one of them has been entangled for a long time. Regarding the application of Li Qun theory in fluid mechanics ... I don’t know how you think about this problem?”

“Oh, I understand what you mean. You can use the Boltzmann equation to solve this problem. As long as you ... and then ... you can give the simplified Boltzmann equation on $s_3(1) \dots$ “

“Dr. Lu, I have an article about the use of group theory to solve integer programming problems. The approximate content is ...”

“On the basis of transforming and relaxing the integer programming problem, it is converted and decomposed into a group theory programming model. The two methods of solving the decomposition results are ...”

Question after question has been asked one after another, the scope of the question is getting more and more, and the depth is getting deeper and deeper. When starting to ask others, other people can listen carefully, or frown or think hard; but later, There are fewer and fewer people who can think

about it after the question has been raised, and most of them look at each other. Those problems are beyond the scope of my understanding. After all, there are too many branches of mathematics.

“Eleven!”

“Twelve!”

“Thirteen!”

A scholar next to Lao Liu will report a number after a while; huh? What are you doing? Old Liu couldn't help but asked curiously, “You are ...”

“I'm counting how many branches of mathematics are involved in the question answered by Dr. Lu, and how long has it been since I answered 18 questions. They belong to 13 different ...” Kung Fu, another scholar finished his question, and Lu Qiujian continued to answer, “Now is the nineteenth question, the fourteenth branch of mathematics!”

He could n't help but look back at the old Liu, “You say he is old? If you have a deep research in a certain field! Why do n't you seem to have the same field that he does n't? Learned?”

Old Liu was speechless. Continue to listen to Lu Qiujian's answer in silence.

It was almost twelve o'clock before he returned to the standard room where he shared with Professor Wu. When he opened the door, Professor Wu still turned on the light.

“You can't fall asleep when you are too old!” Professor Wu shook his head. “Why did you come back so late? What did you gain from the exchange just now?”

“It's a worthwhile trip! It's really a worthwhile trip!” As soon as he talked about this old Liu, he immediately became energetic. “This evening's exchange was very rewarding! Don't look at the young Dr. Lu ~ www.mtnovel.com ~ But his accomplishments in mathematics are truly extraordinary. “

“Oh? Tell me about it?” Professor Wu poured a cup of tea and passed it to the old Liu.

“At first, everyone like me thought Dr. Lu only had profound research on Poincaré’s conjecture, but I didn’t expect much more than that!” Lao Liu said with emotion after receiving the tea cup.

“How? He has research in other fields?” Professor Wu asked in a mixed mood.

Lao Liu extended his right hand, raised his index finger first, and then raised his thumb and index finger. “From the end of the meal to the present, he has answered a total of 18 different branches of mathematics! The answers given were not satisfactory to anyone who asked. Yes! It is said that his research in this area is deeper and more thorough than himself! “

“Problems with eighteen different branches ?!” Professor Wu was so amazed at the moment that he saw the Shaolin Temple monks who performed 18 kinds of seventy-two stunts. How did you learn all this!

This kind of emotion not only happened in the room of old Liu and Professor Wu, as long as the scholars who participated in the exchange tonight, were all impressed by Lu Qiuqian’s excessively young age and extensive knowledge of mathematics.

Those who have asked questions will write down the advice given by Lu Qiuqian as soon as they return to the room, and those who have n’t seized the opportunity will make up their minds. Tomorrow evening, they have to ask questions that have long puzzled them; Lu Qiu The first informal appearance built in front of domestic scholars was a great success.

Chapter 162 - The richest mathematician

It was originally a gathering for young scholars in the mathematics to communicate with each other, and it turned out to be Lu Qiuqian’s unilateral answer to the question. With the shocking performance that night, when he made a report on Poincaré’s conjecture the next day Everyone is relatively calm.

However, he obviously brought a lot of pressure to the scholars who came to the stage. There was Lu Qiuqian in the front. When they gave a report, they were obviously nervous. There was no such free-spirited posture in the past.

Today’s all-day arrangement is to give an academic report. The whole report ends in the morning, and it is replaced by a group report in the afternoon. The participating mathematicians are divided into several groups according to their respective research fields and exchange their latest research results.

At this time, how to arrange Lv Qiujian became another problem. Originally, according to his achievements in Poincaré conjecture, it was no longer appropriate to arrange for the group of topology, but he also demonstrated his profound accomplishments in other fields yesterday. The group sent him an invitation to participate in the discussion.

Finally, under the coordination of the organizing committee, Lu Qiujian selected a few topics that interest him and listened to them. The opinions he gave also benefited both the reporter and the audience.

When they planned to continue to encircle Lv Qiujian after dinner, they were told that Lv Qiujian went to the mountain village for a meeting. At this time, they remembered that Lv Qiujian had just been elected as a standing director yesterday; if he was elected yesterday Everyone was slightly dissatisfied because of his age, but now it is strange that he is not elected!

The three-day meeting ended soon. After the closing ceremony, mathematicians from all over the country dispersed, and Lu Qiujian gained a lot of business cards and invitations to exchange lectures.

On the plane that went back, Professor Zhang's face was full of unstoppable smiles, and this one in the Department of Mathematics of Beijing Normal University can be beautiful for decades!

"After going back, take a good rest, and then sort out the gains of these two days!" Back to the school, Professor Zhang has always asked the school to send his car to the building where Lu Qiu built to stop.

"Okay! By the way, Professor Zhang, I will ask for two days!" Calculating the time, Simmons is coming, and he has to pick him up and promise to do his thing!

"Well? What's the matter? Just ask the school for help!" Professor Zhang asked with concern.

"Mr. Simmons is coming to Beijing. I have some appointments with him!" Lu Qiujian answered truthfully.

"Mr. Simmons is here?" Professor Zhang's face was fascinated, and Simmons' reputation in the mathematics circle was strong. In addition, Lu Qiujian said that the foundation's donation came from him. Isn't he coming now? Say the funds will be available in no time? "Then we have to have a good reception!"

“Mr. Simmons has to deal with some private affairs first. Go to Jinmen to see his teacher, and then come to Beijing Normal University when things are done!” It was not appropriate to meet the school directly before the matter was discussed.

“Oh ~ I want to see Mr. Chen!” Now it is a little inappropriate for Peking University to come forward. There is a small contradiction between Peking University and Chen Xingshen. If the school hastily affected Simmons’ donation, it would be bad. “The reception of Mr. Simmons will be given to you in those two days, and I will find you a car!”

“Eh, then thank you!” Lu Qiuqian readily agreed to come down.

After a night of rest, Lu Qiuqian came to the airport according to the time notified by Simmons. Soon after, the flight arrived on time, and Simmons walked out with a group of followers.

“Mr. Simmons!” Lu Qiuqian quickly greeted him.

“Haha, Lv! Long time no see!” Simmons immediately gave a warm hug.

“Mr. Simmons, I am so happy to see that you are still healthy!” Lu Qiuqian said with a smile, at this time another group of people also greeted him. It seems that he came to pick Simmons.

This is not beyond the surprise of Lv Qiuqian. Simmons’s net worth is about 10 billion US dollars, and he can be ranked in the top 100 in the global rich list. Someone should pick him up, no one will pick it up. strange.

He is probably the richest man in the mathematics family, and the best mathematics among the rich! After the greeting, a group of people walked out to the parking lot. Simmons ignored the luxury car and went to Lv Qiuqian’s Audi.

So people curiously looked at this strange team along the way. Why are millions of luxury cars both in the front and in the back, but in the middle is an ordinary Audi?

Simons is a little older. Even if he came to Beijing by charter flight, the more than ten hours of flight made him feel tired. When I got into the car, I felt a little bit of energy without saying a few words.

Followed the car in front to a global luxury hotel chain. The hotel manager was already waiting outside. Simmons directly packaged the top two floors for his own rest. Such an arrogant approach really deserves the title of the richest mathematician!

After eating, seeing that Simons has not recovered, Lu Qiujian intends to quit and return to school. He will come to visit tomorrow, but he is left behind. “Lv, I have prepared the room for you long ago, and you will take a rest next to me at night! You can save and run back and forth. Tomorrow we will go to Jinmen first, and then discuss the business!”

“Okay!” Lu Qiujian is not hypocritical. This cooperation is something that is beneficial to each other. What can he count on for a few days?

After eating, Simons returned to the room to rest, but Lu Qiujian came to the gym to sweat a lot, and waited for the exercise to be almost done, then Shi Shiran returned to the room under the surprised look of the fitness coach. Apparently Lu Qiujian just The standard of exercise has exceeded the acceptable range of ordinary people; if the other party had just presented the room card of the presidential suite on the top floor, she could not help but go up and ask about his situation.

Woke up early the next morning and had breakfast with Simmons and others, and the group of people went on the road again. Simmons was still in Lu Qiujian’s car; today he is much better in spirit and keeps telling Lu Qiujian When I was studying under Chen Xing in the Berkeley Mathematics Department in California, I was full of nostalgia in my tone.

“When I first met Mr. Chen, I didn’t take it seriously, thinking about what good mathematicians can come from Hua Guo? But it didn’t take long for me to completely change my mind. I knew I could not catch up in my life. Mr. Chen’s achievement! “Simmons said proudly.” Sure enough, without too many teenagers, the center of the world’s geometric research was transferred from Europe to the United States. This is Mr. Chen’s credit. “

Beijing is not far from Jinmen. Not long after, the convoy drove into Jinmen and came to Nanjing University. Following the guidance of Simmons, a group of people came outside Mr. Chen ’s residence.

Is about to see the old man with the highest achievement among the Chinese numerologists. Lu Qiujian is faintly excited.

Chapter 163 - Chen Xingshen

Simmons left all his followers in the car, and led Lu Qiujian to ring the doorbell of Mr. Chen's house; after entering and meeting Mr. Chen, Lu Qiujian relaxed and relaxed, if not knowing in advance, I am afraid No one would think that this kind-hearted old man in front of him is the most accomplished Chinese in mathematics so far?

After listening to Simmons 'introduction to Lv Qiujian, Mr. Chen nodded gently," I heard Griffith talked about you and read your article! I also wanted to listen to it at the last report. I can't move! "

The Griffiths he referred to were Philip Griffiths who helped Lu Qiujian in the plagiarism with Yale. His academic career was deeply influenced by Chen Shengshen. Griffiths also served as Secretary General of the World Mathematical Union, I must have visited him when I came to the lecture a while ago!

"I think your body is still strong!" Lv Qiujian carefully observed his physical condition and sighed silently in his heart. The wise old man's body is not optimistic, but it is all older and subject to the laws of nature As a result of the influence, he was helpless and could only say two good words.

"Old man!" Mr. Chen waved his hand, no longer entangled the topic, but talked about other things. "Princeton is a good place. I spent a while there when I was young. You are my junior. ! "

In the 1940s, he was invited by Weibulun to work at the Institute for Advanced Studies in Princeton. It was indeed Lu Qiujian's predecessor. Of course, even without such a relationship, Lu Qiujian would not weaken his respect for him.

The two of them can't help but talk about some deeds of Princeton. Mr. Chen's language is simple and gentle, and his taste is subtle but profound, which reminds Lu Qiujian of a legend about him.

Someone asked why Chen Shengshen is so famous and can make such a big achievement; if the average person would say how hard they work, if they understand the policy, they would say how the country and unit care, and they would be proud because they are smart, and Mr. Chen 's The answer is unique.

He said, "I don't know why I am so famous. When I was studying, I had to write a thesis when I graduated. I couldn't do it without writing. If I didn't write it, I would write it. Then everyone said that my things are important, just Let me read on. I do n't know why they think my stuff is so good. Then I will study mathematics. The research always has to find out some results, and my colleagues are all studying. I ca n't be idle. I I published the results of my research. As a result, everyone still said that my things are very important. As a result, I am famous ... "

Didn't talk about advanced mathematics or exchange the latest developments in the mathematics world. The three people shared interesting stories that they would be familiar with like the elders and juniors. More than an hour passed. The nanny was afraid that Mr. Chen would be overworked and came up to interrupt their conversation.

Accompanied by Mr. Chen finished his lunch, the two then left, and when they came out, Simmons was a little sad. "There is nothing more ruthless than time in the world. I now find myself seemingly old too!"

"You can cross the Ozark Plateau alone!" Lu Qiu Jian remembered the encounter with him at the beginning, and said comfort, "This is something that many young people can't do, you can still work for at least 20 years! "

"I won't make myself so hard!" Simmons shook his head and seemed to be in a better mood. "I plan to retire in 10 years. If you are willing to join the Renaissance company, you can just take over my position!"

"I still think academic research seems more interesting!" Lu Qiu Jian once again rejected his invitation, "What are we doing now? Where do we go back to Beijing or where to go?"

"Come with me to walk around the school! When I came to China last year, I just accompanied him to take a look at the capital. I haven't seen much of the scenery here!" Simmons walked along the road, and those who followed him immediately After lagging behind, the driver slowly drove the car to follow him, and even the one built by Lu Qiu Jian was also responsible.

It seemed that he came to China the year before to unveil the Chen-Simons expert apartment building donated to Mizuki University. Mr. Chen was born at NTU and grew up at Mizuki University, and then went to Europe and the United States to study. Eventually, he gained great popularity in the United States and finally returned to China, making a lot of contributions to the development of mathematics in China.

Remember when he said that when he was studying with Jiadang, young people should go to the best people in this area for learning; they did it both at Beijing Normal University and Princeton. And now you can count yourself as the best group in mathematics today, so should you find some disciples to cultivate?

Today's scientific research is no longer an era more than a century ago that can be completed independently by a genius. If there are some suitable helpers, he can complete his plan faster. Lu Qiuqian secretly made up his mind in his heart. After thinking about it, you can mention it to Professor Zhang.

If you bring a graduate student, just forget it. I still have to go to Europe to study, I don't have that time; and the thinking mode of graduate students has basically taken shape. It is very troublesome to reverse their ideas. It is better to bring them from undergraduates. If you can find young people with good potential from freshmen. Better While thinking about this, he walked with Simmons and walked about three or four kilometers. Simmons beckoned and the team slowly came over, "Okay, let's go back!"

By the time he returned to the hotel, Simmons' sorrow had been wiped out, and he restored the smart temperament unique to the merchant. He drove all his men out of the room and took out his computer. "The algorithms are all here." , See what you can do for me? "

Lu Qiuqian took over the computer, glanced at the mouse, then closed his eyes and thought for a while, "No problem, according to my estimation, the algorithm you currently use can still be optimized, which will take about a week! "

"Oh? What's the effect of optimization?" Simmons was surprised for a while and asked quickly.

"Improve the efficiency of ten percent on the original basis!" Ten percent sounds like not much, and it may increase the profit of Simmons by three or four points.

But multiplying the huge amount of funds held by the Renaissance Company of Simmons, the newly increased profit every year will be an extremely huge number.

"What are you waiting for? Let's start now!" Simmons couldn't help being excited, rubbing his hands, "What else do you need? I'll call them to arrange!"

Lu Qiuqian didn't start working directly, but instead looked at him with a smile, "Mr. Simmons, there seems to be nothing to do before the work begins?"

Chapter 164 - Good seedling

"No problem at all! I can even waive the commission for your part of the funds!" Relative to the 10% increase, what did Lu Qiuqian calculate the funds? There are no even fractions of increased profits!

“Do you think this is worth so much?” Lu Qiujian asked jokingly.

“Oh, my God, I don’t think we need to care about that much because of our relationship!” Simmons finally regained his character as a businessman at this moment, and began to act silly.

“Why didn’t you say this when I asked you for help? Did our friendship grow rapidly after I just said that?” Lu Qiujian admired his face very much and made it himself. Change can bring him hundreds of millions of dollars in profits every year, but he wants to send him away with a good word.

“Okay, okay! If your optimization really improves the profit margin, I will pay a portion of the shares of the Renaissance company as compensation!” Simmons also said jokingly, of course, if Lu Qiujian did not protest, he would also be happy playing dumb.

The two quickly negotiated the price, and Lu Qiujian took his computer back to the room for optimization work; in fact, the actual completion time did not take as long as a week, but the matter on the side of Beijing Normal University has not been negotiated yet, he does not want to Let Simmons get results so quickly.

The next day, Lu Qiujian showed him the results of his phased work. Simmons’ outstanding attainments in mathematics soon revealed the uncommonness of them. He immediately felt relieved and followed Lu Qiujian to Beijing Normal University.

Met with Professor Zhang for a while, determined the operation mode of the fund, then transferred to the office of the foundation, and finally came to the principal’s office to sign a formal cooperation agreement.

When I saw this headmaster, the worries were finally put down. What he was most worried about was whether the funds were available on time. Now that the most wealthy mathematician has come forward, there is no problem at all. !

“The formalities have been almost completed! The decoration of the office has come to an end. The editorial board has begun the review of the manuscripts. Our first issue will be available soon! There are people responsible for advertising, printing, and mailing. The progress is fairly smooth!”
“The principal smiled every time he saw Lu Qiujian recently.

The contract is signed. Naturally, to celebrate, plus Lv Qiujian just received a Chen Shengsheng Award, so the principal immediately asked the propaganda department to cut the ribbon, take a group photo, and record the video.

After dinner, accompanied Simmons in a circle around the school, the two returned to the hotel to start work; see the matter has been resolved. Lv Qiujian speeded up the work, and gave the optimized algorithm to Simmons on the fifth day.

“Lu, it’s hard! I will go back to the country now! Once the verification is completed, I will come over and sign a share transfer contract with you!” Simmons can’t wait to see the effect of the optimized algorithm now!

“Well, see you then!” Lu Qiujian sent them to the airport. The sight of Simmons disappeared at the security checkpoint; then he drove back to school.

“Mr. Simmons is gone?” Professor Zhang asked when he saw him return the car key.

“Just boarded the plane!” After a few gossips, Lu Qiujian remembered the tangled things of the past few days, “Professor Zhang, I want to trouble you with such a thing, you can see”

“It stands to reason that this is indeed a good thing, but you are going to go abroad next year . . .” After listening to Lu Qiujian’s words, Professor Zhang was a little hesitant. If he really wanted to stay and bring the graduate student himself, he would be one hundred in favor. But since it seems a bit troublesome to leave!

“Is it possible to communicate by e-mail even when I go out! Besides, I am not taking graduate students, do they usually have teacher substitutes? I also act as a guide!” Lu Qiujian explained.

“Well, the requirements for students are so high!” When students choose their tutors during the postgraduate examination, they all want to find a famous instructor who has a great influence in the field as a tutor; the same teacher also picks students, and the undergraduates are in favor. Not only for the disciples, Professor Zhang passed through some of the top tips in the Mathematics Department in his mind. “All the good sophomores from the sophomore year have been picked up by people. It depends on whether these new students are suitable! How are you going to pick?”

“Shall we take the test?” There seems to be no easier test method than this. “I’ll go back and get the test paper, let everyone do it, and then find a few good interviews. What do you think?”

“It’s easy!” Professor Zhang suddenly remembered a few Miaozi who were not in Beijing Normal University. “Yes, do you remember the first two days of the meeting? Do you want to report on the awards this year? Do n’t check it out? If I ’m interested, let them come to Beijing? If it ’s appropriate, I ’ll make a special move! ”

Is the International Mathematical Olympiad. Tao Zhexuan, Elji, and Perelman were here for the first time to enter the career of mathematics. Six Chinese players participated in this session and won a total of five gold medals and one silver medal, ranking second in the team’s total score and first. Obtained by Bulgaria; purely mathematically, the probability of discovering good seedlings from this is indeed greater than that of freshmen from Beijing Normal University.

“Then let them take this exam together!” The freshman didn’t start long. This group of freshmen has not yet been exposed to much advanced mathematics, and it is no problem to use the same test paper.

Moreover, Lu Qiujian did not intend to come up with any profound questions. What he wanted to investigate more was the IQ and mathematical thinking ability of these children.

“Yes, I will send a letter to their school in the name of the Department of Mathematics of Beijing Normal University! Invite them to come to take the exam ... Say the exam seems to be a bit serious, let’s say it is a mathematical exchange!” Professor Zhang dialed Assistant Liu Phone number, arrange this matter Assistant Liu quickly found the information of these students and the contact information of the school they belonged to through the Mathematical Society, immediately prepared the contact letter, stamped the official seal and sent it by fax. Called one by one to confirm, and soon the news reached the school where the students were.

As soon as I heard it was invited by the Beijing Normal University, the school leaders immediately paid great attention to it and immediately notified their parents to come to the school. After some deliberation, the school teacher took them from Hunan, Hubei, Eastern Guangdong and Shu respectively, and the only one The home with 42 points is in Beijing, but it saves a lot of time.

Along the way, they guessed the purpose of Beijing Normal University inviting them to come. After the school visited Beijing Normal University under Assistant Liu ’s leadership, they rested for another night; when the test paper was in front of them the next day, they seemed to understand what.

Chapter 165 - Character problems

Get the test paper and do it! Whether it's a medal winner or a freshman in Beijing Normal University, that didn't come out of the question and the sea. At first, it didn't take this exam seriously.

But as the exam progressed, they frowned one by one, and the difficulty of the test paper was somewhat beyond their expectations. It seems that this time it is difficult to get a perfect score! Yes, in the eyes of these people, failure to get full marks in the exam is a big failure, and such failures are rare in their past experience.

This situation was as early as expected by Lu Qiujian. Both the medal master and the freshman of Beijing Normal University are talents of their respective schools. They are all characters who have left countless legends in their schools. Some arrogance in their hearts is inevitable. Thing; and this time he was about to beat their pride and test their limits.

The knowledge points involved in the test paper questions do not exceed the content of the high school curriculum, but the application method is more ingenious and the calculation amount required is more huge. As long as there is no such evil spirit as Tao Zhexuan in this group, it is probably impossible to get a full score. .

"Is the difficulty of the topic ... something beyond their ability?" Professor Zhang, who walked around the classroom, walked outside the door and whispered to Lu Qiujian.

"It doesn't matter, it's difficult to test their ability better!" Lu Qiujian replied calmly. This test paper can not only test their IQ level, but also test their personality traits according to the type of questions they give up.

"Oh, I am afraid that some children will be hit!" Professor Zhang shook his head with a smile. He saw that two freshmen this year had not written the first line on the test paper, crying from the expression on his face. It 's obviously not going to be hit.

"Hey, mathematics does not need to move bricks!" If the disciplines of physics and biology are designed with many experiments, and they need some IQ who are not outstanding, but the execution ability is very strong; then mathematics will be much cruel, If IQ can't keep up, it doesn't make sense if you work harder or work harder.

"They realize this earlier or understand that they are not doing mathematics research and they can find a way to suit themselves. With the mathematics foundation of Beijing Normal University, whether it is to make money in finance or transfer to other majors. The scientific research assistants are much more convenient. "Lv Qiujian made a consolation, and the intelligence level to be able to

enter Beijing Normal University will not be too low, even if it does not meet the requirements of mathematical research. It is also very popular to go to other places.

Finance, economics, physics, biology, and other fields also require members with a solid foundation in mathematics. Although they may not reach the level of tracking the frontier of mathematics, they are enough to enter these fields. Maybe they can break a path in these fields. It may come.

Chatted while watching them exam, two hours passed quickly. The invigilator teacher ruthlessly announced that he had stopped answering questions and started collecting papers, and a wailing sounded in the examination room; stand up.

“This test is really difficult!”

“Yunfu, did you make it all this time?”

“Yunfu, how did you solve the third question?”

Candidates who came out of the classroom complained about the difficulty of the test questions and got together to get a pair of answers, which made them feel sighed; they never participated in this kind of activity after the exam, usually standing with a reserved smile, Act as the final arbiter when disputes arise over answers, and gently spit out their answers after listening to the answers reported by ordinary students. Then accept the admiration of ordinary people; but today they are no different from ordinary students.

The students who came out were divided into two groups. On the side of Peking Normal University, who was surrounded by the top champion of science in a certain province this year, the group of people who surrounded the full score winner.

“I haven’t done the third question!” Which full score winner smiled bitterly, and the math paper didn’t finish this kind of thing. It seems that it has not happened for a long time in his vitality.

“No! Yunfu, you didn’t do it!” Everyone grew their mouths, and even the full score winners did not finish the answer. What the **** did Peking University do this time?

It was difficult for them to do the test paper, but it was very simple for Lu Qiujian to modify the test paper. Code a large stack of test paper, hold the red pen in the right hand, and take the test paper in

the left hand to quickly scan the front and back. In the blink of an eye, the final score of this test paper was written in the upper right corner.

Ok? Can you judge the score of each question at a glance? Professor Zhang took a censored test paper curiously, looked at each topic, and then added the scores together, which was exactly the same as Lu Qiujian gave!

Just after Professor Zhang finished reading the first test paper. Lv Qiujian has finished correcting all the test papers, and turned out three of them and handed them to Professor Zhang. “There are no good seedlings this time. These three are barely usable!”

“To what extent?” Professor Zhang took the test paper and looked at the names of three people, two gold medal winners, and a freshman this year.

“That’s the level of publishing articles in four major journals can’t make any pioneering achievements!” Lu Qiujian sighed slightly in their hearts, they completed a branch of a problem under their guidance It’s possible, but it’s a bit difficult for them to solve the problem independently! But with them, you can save yourself some time, after all, the evil spirit of Tao Zhexuan is not so easy to encounter.

Professor Zhang’s mouth unconsciously smoked, what is the level of the four major journals! I do n’t have one yet! Hey, forget it! It is not bad to have three students who can post articles in the four major journals! If someone said this to him, Professor Zhang would definitely think that the other person was satire and could teach him to be a new person in minutes.

But hearing this from Lu Qiujian’s mouth, he believed that the other party would not be aimed at himself; but even then it was inevitable to be embarrassed. By looking at the unsuccessful test paper to cover up the depression, he quickly discovered a problem, “Eh, Xiao Lu , How did this test paper fail? His score is the first! “

“Oh, you said it was Hao Yunfu!” Lv Qiujian saw that Prof. Zhang was taking the test paper of the winner of this perfect score. His IQ is indeed the highest of these people. Unfortunately, “his character If there is a problem, I am afraid it is not suitable for mathematical research! “

Professor Zhang turned the paper over and over and read it several times. Leng Qiujian did not find the basis for saying this, “How did you come to this conclusion?”

“Very simple, you can tell from the type of question he gave up!” Lu Qiu Jian took the test paper and clicked on a certain question.

Chapter 166 - See you again Simmons

Professor Zhang set his sights on that topic. It was a topic that was not difficult to find a solution to the problem, but it was very computationally intensive. Professor Zhang understood a little, “Oh, you mean that he lacks patience, I am afraid that Shen Do not concentrate on research? “

“Yeah!” Lu Qiu Jian nodded. “According to the questions he answered, he can see that he is fully capable of making this question, but he gave up because of the amount of calculation, so I think he is a bit inappropriate. [] “

“But there may be more points that want to save time! This may not be a correct strategy!” Professor Zhang was reluctant to find a reason for him, but the perfect score winner, it is a pity if you miss it.

“No, his choice won’t bring him more points!” Lu Qiu Jian pointed to two other questions. “He only finished half of these two questions and scored a total of nine points! And this The question of the Dao is very important, and the time to do these two questions can be used to calculate the question. His choice is not reasonable! “

“Isn’t there another interview! Give him another chance?” Even if Lu Qiu Jian said it right, Professor Zhang still wanted to give him the last chance.

“So good!” Lv Qiu Jian turned out another one from the unsuccessful test paper, “These two and the three people who started the selection will enter the interview! The others can go back!”

The interview process that followed did not meet Lu Qiu Jian’s expectations. Which full score winner was exposed by Lu Qiu Jian’s personality flaws, not only lacks patience, but also seems to be unable to calm down.

Seeing him stepping out of the interview room, Professor Zhang gave a slight sigh, deeply regretting him; “It doesn’t matter, not every full score winner will become Tao Zhexuan and Elji!” Lu Qiu Jian comforted, and the gold medal winner every year Yes, but there don’t seem to be so many people who can accomplish mathematics in the end.

This is like the future superstars such as Fabregas and Messi in the World Youth Soccer Championship, and there will also be short-lived meteors such as Chen Tao and Aliyev.

“How do you feel? What questions did you ask?” As soon as Hao Yunfu came out, Wang Wen, who had participated in the competition with him, came up and asked.

“It feels okay!” Hao Yunfu answered uncertainly. Lu Qiuqian’s questions were very skillful and did not arouse his awareness; he had already seen that this was a screening test. Even if you haven’t finished the test, you are better than them? It should be no problem to pass the screening? Until now he has not realized that he has been eliminated.

Hao Yunfu couldn’t believe his eyes when he found out that he was eliminated. The crowd of lost crowds glanced at the overjoyed Wang Wen, Xiang Zhen, and the freshman at Peking Normal University, clenched their fists, and made up their minds that they would have to go to the Mathematics Department of Peking University this year to see if they lost. where.

Wang Wenhe and Xiang Zhen were arranged by Professor Zhang to go through the special recruitment procedures. Which freshman freshman Huang Tiange was happily carrying a large amount of information sent to him by Lu Qiuqian went back to work hard. But he who attended the report meeting was very longing for Lu Qiuqian’s demeanor to swear Fang Qi in front of global mathematicians. Seeing that now he had a chance, he had made up his mind to say whatever he wanted.

Just as the candidates dispersed, Lu Qiuqian also received a call from Simmons. He had verified the algorithm provided by Lu Qiuqian and returned to Beijing by charter flight to send Lu Qiuqian a share transfer contract.

Was still in the last hotel, the only difference was that Simmons brought several expensive lawyers besides assistants this time.

“This is a contract! If you find a lawyer to see if there are no problems, let’s sign a contract!” Simmons’s face was full of smiles. He is now very happy that he chose the Ozark Plateau instead of other places during the holiday.

“I can see it myself!” Lu Qiuqian accepted the contract, and the lawyers couldn’t help but exchanged glances and relaxed their vigilance. Since the other party is so cautious, the next thing is easy to handle!

“I don’t think this word is appropriate.” Before they were happy for a long time, a scoop of cold water was poured on their faces. They thought about a trap that they had hidden for a few days and they were discovered by Lu Qiujian.

Then Lu Qiujian’s fingers kept pointing out various clever traps in the contract, making the hard work of the entire team of lawyers useless in irrefutable language.

“I am very grateful that you are a mathematician and not a lawyer!” Until Lu Qiujian entered into a contract, the head of the lawyers’ group who had participated in the signing process of countless contracts was finally relieved. “If you go to be a lawyer, I think we will all be unemployed! “

“Can I sign a contract now?” Seeing that they had finished processing, Simmons came over with a glass of red wine, and business was business. He used to be the usual method in the mall, so he didn’t blush.

The lawyer re-finished the contract with the hotel’s printer, and Lv Qiujian and Simmons signed their names respectively; looking at the rich man in front of him, he was quite emotional and was in the traditional propaganda of China. Scientists seem to be people who are obsessed with research and willing to be poor, which makes many people lose interest in scientific research.

If Simmons is used as a teaching material and tells them to learn math well, they will become billionaires; take Hawking as an example to tell them that as a scientist and there will be schools to send beautiful nurses; take Yang Zhenning as an example, Let them know that more than eighty years can also attract beautiful women in their twenties; then look at the title of Deligne for outstanding achievements ... so young people who are interested in scientific research will be more A lot?

The next day, Simmons was taken to the airport. Lv Qiujian asked the driver to put himself on the street, he had n’t played football for several days, and his brain started to hurt again. He planned to jog back to Beijing Normal University from here today; it was only more than ten kilometers anyway. Long time.

Now the mist of the capital is still within a tolerable range, keeping a fixed rhythm, Lv Qiujian quickly ran to the direction of the Beijing Normal University; I passed the map of the capital in my head and quickly found the best way to return to the school Good route.

Crossing a narrow alley, passing through a bustling business district, running from the front door to the back door of a well-known department store, and then waiting for the overpass with a complicated route to a subway exit.

If someone followed Lu Qiujian, they would be surprised to find that the route he chose was the nearest route from the place where he got off to Beijing Normal University. What was even more surprising was that the traffic lights at the intersection seemed to cooperate with his actions. When he comes to the intersection, the green light will light up accordingly! Did he take this into account?

“Sir, let’s draw a portrait!” When he passed a certain subway entrance, the loli sound with a slightly Xiangnan tone came from behind him and stopped him.

Chapter 167 - I just want to draw a comic

This voice is slow and soft. If it is not Lu Qiujian’s hearing that is different from ordinary people’s hearing, I’m afraid I can’t hear this cry. Perhaps this is a woman who prefers to stay at home, otherwise she will not be so shy when soliciting business; um, as it sounds, the owner of such a delicate voice is estimated to be a petite but exquisite woman.

With such a guess, Lu Qiujian turned to look at the direction from which the voice came, and saw a girl in a white dress sitting next to the subway entrance, which was as petite and delicate as he thought.

About one meter five or eight meters tall, with a loli face and long hair of Qi Liuhai, when her eyes look in the direction of the sun, she will always squint slightly unconsciously, it seems that it is because Excessive use of eyes and fear of intense sunlight.

Placed several sketched portraits beside her, with soft lines and vivid expressions; huh? It seems that the technique of these portraits is not just sketching! There are also traces of other painting methods.

Lu Qiujian walked to her side and squatted down, picked up a portrait and examined it carefully, um, that was true; he nodded and asked the portrait, “Are you still using comic techniques when drawing this picture? I seem to see the shadow of okama! “

Okama is a famous neon painter. He is well-known in comics, illustrations, animation, games and fandom, and participated in the creation of “Neon Genesis Evangelion” and “Selling a Screw”.

When she heard Lu Qiujian’s words, there was a flash of surprise in her eyes, and she nodded again and again, “Yes, I did draw cartoons much longer than sketches. Maybe I used them habitually when I was drawing. Technique! “

“The painting is very good!” It can be seen that the petite girl is indeed talented in comics. If it is just from the painting skills shown in these portraits, she already has the potential to become a cartoonist, “From Judging from your drawing skills, it seems that drawing cartoons is more suitable for you ... but why do you want to make portraits here? “

The brilliance of her derivation suddenly dimmed, and it seemed that she could not answer Lu Qiuqian’s question, but she was reluctant to refuse a person who could communicate with her comics. After a while, she answered quietly. [] “Because it’s too hard to be a cartoonist in China!”

Amount, it seems to be the case. Although Lu Qiuqian also saw many comics, those are all works of neon cartoonists. Huaguo’s comic industry is just getting started, and it’s really not easy to rely on comics to feed yourself.

Lu Qiuqian simply sat next to her, and Yu Guang looked at the plastic bag behind her chair with a bread besides the painting utensils. This is probably the lunch she prepared for herself? Looking at the cheapest piece of bread in the convenience store, Lu Qiuqian couldn’t help but feel pity. But instantly it became appreciation.

She can eat with her face completely, and still insists on her dream so hard, it is worth encouraging anyway, “How long have you been painting?”

“Starting from middle school? I started drawing comics when I was fourteen years old, and it’s been seven years now!” Maybe it’s because it’s rare to meet someone who can talk to dreams, or maybe Lu Qiuqian’s expression is easy to give. With a sense of security, the girl put down her guard and shyness, “The comics gradually changed from interest to habit, and became as important as eating and sleeping!”

“That must be very hard?” Lu Qiuqian looked at her a little too pale face, this should be a sequela of painting in the house for a long time and rarely exposed to sunlight.

“No! Because I just like to draw comics! How can I feel hard to do what I like! As long as you can draw comics! It doesn’t matter if you don’t go out because you are lying down and fighting hunger. Thin is because the digestive system is completely disordered. It does n’t matter. It does n’t matter if you have long hair because you do n’t have money to get a haircut ... ”Her lips curled up to show a stubborn smile. “As long as I go all out to dream, God will smile to myself. ”

It really is ... Lu Qiuqian didn’t know what to say for a while, but originally wanted to comfort her, but the other party was so strong. People who have dreams and struggle for it don’t need this! Even he was a little jealous of the girl.

“I feel like you just lack a chance now!” There is no problem with painting skills and no lack of effort, so as long as there is a good story and a chance, she can succeed, “Let you say that you really want to see your comics What does it look like? “Now there are only some sketches around her. There seems to be no manuscript.

“If you want to watch it, I will bring it to you tomorrow!” It seems that when she talks about comics, she seems to be undefended.

“Oh, you are not afraid that I am a bad guy!” Pro. You are so easy to believe that people are really okay?

“How can a person who likes comics be a bad person?” She said plausibly.

What you said makes sense. I was speechless. Lu Qiujian suddenly said in Gu Long’s article that people who like to drink will not be bad guys! He extended his right hand, “Let me know, my name is Lu Qiujian! I am a student of Beijing Normal University!”

“My name is Xia Xiao, I am from Star City Science and Technology. I just graduated this year!” Xia Xiao reached out and shook hands with Lu Qiujian.

“Are you looking for opportunities in Beijing?” Every year, countless people come to this city to find dreams Some have succeeded, but more people are still disappointed, I hope she will be lucky.

“Yes! Now the students are looking for work, but I just want to draw comics! There is no animation company in Star City, so I came to Beijing!” Xia Xiao said generously.

The two had been chatting for so long, and there was no one to take care of her business. Lu Qiujian was a little unbearable. He sat on the Mazar opposite Xia Xiao. “You can paint a picture for me! Don’t use sketches. Just use the comic style you are good at! “

“Okay!” She didn’t realize that she came to the business, but she was simply happy to have a chance to show her comics skills, and immediately picked up the brush and described it to Lu Qiujian.

Hey, I didn't pay attention just now, it seems that his temperament is really unique now! Wisdom and confidence, there is nothing in the world of Buddha release that can trouble him the same! Xia Xiao thought while painting.

The manga was quickly drawn. Lv Qiujian took a look. Although there were only a few lines, his temperament was revealed. He couldn't help scratching his head. "It seems that I am a lot more handsome!"

"No! You are beautiful!" Xia Xiao tilted his head and compared the difference between Lu Qiujian and the painting for a long time.

"Well, I like it very much. I will stick it on the wall when I go back!" Lu Qiujian's hand reached into his pocket during the conversation, and ... he was embarrassed immediately, "Ah, I don't seem to have any money!"

Chapter 168 - Paplov's sister

Seeing Lu Qiujian's embarrassment, Xia Xiao burst out laughing, she shook her head and said with a smile, "It's okay! I haven't said so much to people for a long time, this painting is the reward for you to speak with me All right!"

"That's so embarrassing!" Lu Qiujian scratched his head, making an embarrassed look.

"For a cartoonist, there is no better gift than someone who appreciates her work!" Xia Xiao said seriously. "You just accept it! If you don't accept it, I would think that I did not paint enough." it is good!"

"That's fine!" Lu Qiujian seemed to be persuaded by her and carefully collected the painting. "Then I will go first. There are still some things in the school. I will have time to read your manga tomorrow!"

"Hmm!" Xia Xiao nodded, watching Lv Qiujian disappear into the sea of people, and then began to whisper again, but almost everyone hurried past her, and never got a business.

Seeing that it was time for lunch, her stomach screamed; she took the bread from the bag, hesitated for a while, and put it back again. It has not opened today. What if you eat it now?

It's really annoying. As soon as I eat, my sense of smell becomes extremely sensitive. How can I smell the taste of my favorite milk cake and baked cake! Wow, it even smells like shrimp cake! No, I can't help it anymore! Although he covered his nose, the taste became stronger and stronger.

"Hey!" Lu Qiuqian suddenly reappeared, shaking the bag in his hand. The fragrance senator just came from here! He returned to his position and sat down, "You gave me a picture, I invited you to eat! It's just ready, it's still hot! It's almost lunch time, do you like it?"

"Aren't you without money?" Xia Xiao looked at him squinting. 【】

"I didn't bring any money! But the credit card is still there! I bought them by swiping my card!" You might forget to bring money! It was just to lay the groundwork for these pastries now! For a girl like Xia Xiao, if she invites her to eat rashly, she may not agree, but having a painting as a buffer is not a problem at all!

As for the things I bought, they were all specialties of Shonan. Lu Qiuqian inferred from her accent that she was from Shonan. Presumably I would like these specialties from my hometown? As for finding specialty shops selling these. Lu Qiuqian, who has a detailed map of Beijing in his mind, is not a problem at all.

"Hey, look, I have accepted the paintings you sent. If you don't accept the cakes I invited, it will make me feel like a greedy and cheap person! It's so sad!" Pick up a piece of milk cake and deliver it to your mouth. "Well, it's delicious! It would be a pity if you didn't try it!"

I don't know whether it was the temptation of hometown deliciousness or Lu Qiuqian's words persuaded each other. Xia Xiao hesitated to pick up a piece of pastry and delivered it to his mouth, and was quickly conquered by the long-lost hometown taste. Later, it was robbed with Lu Qiuqian, "The last piece. You have to leave it to me! Said it was for me, why did you eat more than me!"

"Okay, okay! Let me give you a good time!" Lu Qiuqian made Xia Xiao amused by Yi Yi's reluctance, but still did not put back the pastry in his hand. After such a trouble, the relationship between the two people It seems to have drawn a lot unconsciously.

"It's really delicious!" Lu Qiuqian stood up, patting his stomach, "I really have to go back to school this time! Remember to bring your work to me tomorrow!"

"Okay! Give me some useful advice at that time!" Xia Xiao stood up and watched Lu Qiuqian leave.

The next day, it was still the time when Lu Qiuqian met yesterday. As soon as he sat down, he shook the bag in his hand. "Today you invited me to read comics. So I invited you to dinner!"

"Sweet sugar and shortbread!" Xia Xiao smelled what Lu Qiuqian brought without opening the bag. This time she didn't say anything and took it generously; then she took out a stack of drawings from the bag and handed it over. In the past, the two of them sat side by side on the side of the road, eating pastries and looking at the comics, as if the street was a coffee shop.

When the pastry was over, the artwork was turned to the end. "How is it? Do you have any suggestions?" Xia Xiao asked with expectation, winking, somehow. She always felt that Lu Qiuqian could give appropriate advice.

"Well, how to say! I have heard two sentences about comics before. The first sentence is how good a person can't be a cartoonist. How much is it? The second sentence is if the painter is not good. Then try it at Shueisha! Where is very forgiving to the novices with poor painting skills! "Lu Qiuqian turned to the forefront of the draft and pointed to the picture," Your painting skills can already meet the requirements of becoming a cartoonist. Basic needs! But it is not enough to paint well. The biggest difference between cartoonists who can be liked by readers and those who are not accepted by readers is not the ability to draw but the ability to form, that is, the ability to have a mirror! "

Turn the sketch from the beginning to the end. "The manuscripts you give me are all single paintings, and I still can't see your ability to split the mirror! If you look at these paintings alone, you may be an excellent illustrator, but can you become a cartoonist? uncertain!"

"It seems like this!" Xia Xiao nodded thoughtfully. Then I will look for an artwork with a split mirror to bring to you at night! "

Right, that's how it is, otherwise I have a reason to come tomorrow! Today's goal was achieved, Lu Qiuqian compared himself with a scissors in his heart. He got up and Xia Xiao agreed to meet tomorrow and leave.

On the third day, Lu Qiuqian brought crispy duck and shortbread, and chatted with Xia Xiao about the simple picture of Toriyama and the action of the gorgeous action.

On the fourth day, Lu Qiuqian brought the oil cake and sweet potato cake, and discussed with Xia Xiao about the beautiful scene of the clamp and the simple action.

On the fifth day, Lu Qiujiang brought **** sugar and roasted vegetarian recipes, but this time the topic was changed to Inoue Inoue's god-level skills in the final segment of "Slam Dunk" where you can hear the sound of shoes rubbing the floor. .

On the sixth day, the food was transformed into hemp cake and kumquat pie, and the subject of the discussion became Inoue Takehiko's teacher Hojo. The subtle and perverted background is really amazing, from architecture to small watches. Hojo is very detailed.

At eleven o'clock on the seventh day, when Lu Qiujiang appeared a few days ago, Xia Xiao unconsciously turned his gaze to Lu Qiujiang's direction, but after waiting for a long time, the other party did not appear.

At a blind spot in Xia Xiao, Lu Qiujiang clearly saw the expectation and disappointment in her eyes, and she couldn't help smiling slightly. It seemed that his own Pavlov had a good effect on the sister method.

Chapter 169 - You can treat your sister not only in math

The so-called Pavlov's sister method is to let the girl first get used to your behavior, and then suddenly break this habit, she will have deep doubts and losses in her heart, and will find you with interest and doubt. Then he beat it down again.

This method draws on the conditional reflex test of the biologist Pavlov, so it is named after Pavlov; so it can be used not only for mathematical skills, but if the biology is good, it can quickly become a sister. talent. As long as you apply the biological knowledge you learned to the sister, you can get the sister paper in a month or two, and there will never be a situation where you cannot push the sister paper from the third year to the second year!

Students can use Pavlov's sister method, learn physics can say to the sister "My love for you just like the entropy only increase!", Such romantic words can certainly touch the heart of the sister paper.

Of course, students in the physics department can also use Schrodinger's method of sisterhood, and use the probability theory shown in Schrödinger's cat experiment to metaphorize the sister; taking Lu Qiujiang's behavior as an analogy, he flips a coin every day when he gets up and uses randomness. Decide whether to give Xia Xiao food.

Since then, Xia Xiao will have a strong interest because of the mystery of Lu Qiujiang's behavior. This mysterious man, at this moment Schrodinger's possession, with deep sadness like quantum theory, made her unable to extricate herself ever since!

More advanced is Heisenberg's sister method, using Heisenberg's uncertainty principle to attack the sister's heart, but from the perspective of Xia Xiao's reaction, the most basic Pavlov's sister method is enough. By the way, Schrödinger's high-end skills such as Sister Law and Heisenberg's Sister Law should be used in the future!

Feeling the time was almost up, Lu Qiuqian reappeared in front of Xia Xiao, shaking the bag in his hand, "I went to buy chrysanthemum siu mai and rock sugar lotus ginseng today. Rock sugar lotus ginseng takes a little time, so I am late and you are not hungry Bad? "

As if the sun had swept away the dark clouds. The warm wind dissipated the chill. Xia Xiao felt warm in her heart, full of security, and a bright smile on her face, "No! I thought you might not be here today "

"Why, if I can't come, I will definitely say it in advance!" Lu Qiuqian sat down in the old place, waiting for him to invite him, Xia Xiao took the bag out of sight, opened the lunch box, and scooped a spoonful of rock sugar lotus seeds with a spoon. Participate in the mouth. Then he closed his eyes comfortably.

"It tastes exactly the same as when I was at home!" Xia Xiao couldn't help but sigh, have food, and chat people who understand comics. This time of day is like heaven.

But he will leave at twelve o'clock every day, and then he has to face the heavy real life again; Xia Xiao is deliberately thinking while eating food. Now he seems to be Cinderella Cinderella in this state! The only difference is probably that Cinderella's dream ends at twelve in the evening, and her own ends at twelve in the day.

"I've eaten it!" Xia Xiao took the paper towel that Lu Qiuqian handed over and wiped the small mouth clean, and then packed the bags and lunch boxes and spoons into the trash can. When she came back, she found that Lu Qiuqian was holding it. Her new works are fascinating.

"Is the progress of these two great! Can you submit your papers!" Lu Qiuqian heard her footsteps. Said without looking back.

"Domestic is really easy to pass the editor's screening, I have rarely been rejected!" Xia Xiao said confidently, as long as it is about the topic of comics, she has become less shy than before. "But even if it passes, it won't do much! The domestic magazines are not as influential, and they don't pay a lot of manuscripts ..."

“Yeah, maybe you can try the neon magazine!” Lv Qiujian closed the sketch, “I can help you translate the narration and dialogue into neon! I can also send you emails!”

“Although I have learned some neon words. But translation and e-mailing are not enough at all!” Xia Xiao is not as talented as she is in comics in other respects, “But will it be too much trouble for you?” Alright! And why are you helping me this way? “She couldn’t help asking.

“This world is becoming more exciting because there are many people who stick to your dreams like this! One more person can realize his dream. This world will be more beautiful!” Lu Qiujian looked at the crowd rushing in and out of the subway entrance, How many of these people are dreaming? “After all, I am also a selfish person! To help you is to make the world you live in more beautiful!”

“Thank you!” Xia Xiao’s nose is slightly sour. If you don’t meet many selfless help people like Lu Qiujian in the process of studying comics, she probably can’t go so far!

“Well, do you have a computer and a drawing board? If so, hurry up and change these manuscripts into electronic versions!” Lu Qiujian didn’t look back, fearing to interrupt her.

“Yes!” Even when she was hungry, she never thought of selling her computer and drawing board for food. “The electronic versions of these manuscripts have already been drawn. I will bring them to you tomorrow!”

“This research is much more convenient. I go back and look up the information to see which editor is more appropriate to submit the manuscript!” Lu Qiujian felt that she had returned to normal, so she turned to look at her carefully.

Xia Xiao’s smile because of seeing his dream made him feel a trance, and his long-term fluctuations also showed a ripple, so he couldn’t help saying, “I sing you a song! It’s about dreams!”

Don’t wait for her promise, Lu Qiujian picked up the beverage bottle and sang with the beat.

“Ne ,,

What is the scenery of this city in your eyes?

What is the scenery I can see now?

Ne ,,

Ironically, I heard someone's tenderness

What should I do in such a time?

I only recall good things,

My mood has become seriously aging.

Although saying so, but now

I will act in my life

I have to change into a gear

Hope is limited

Disappointment is increasing

Even then, my heart tomorrow

Is still shaking and trying to imagine

What will happen?

.....

My heart is still shaking in hope

Although I stand at a crossroad every time

Will still feel confused

.....

Even then, my heart tomorrow

Is still shaking and trying to imagine

“Probably what will happen?”

Encounter is limited but the difference is increasing

Even then

My heart is still shaking in hope

But can't look back

Go ahead

Towards the road without you Lv Qiu Jian sang the band's “”, the song probably told an old man who was very desolate, and one day saw the guitar in the mall window awakened his music Dreaming, and then frantically looking for the partner of the past; as a bassist in the ramen shop, a drummer moving bricks on the construction site, and opening the second guitar in the grocery store.

They reunited and fulfilled their dream of performing when they were young, and left with satisfaction. Then a young man picked up a note with the name of their band, and the dream was passed on to the new generation.

It's no more appropriate to encourage Xia Xiao with this song. Although she can't write emails, it's okay to understand the meaning of the lyrics. By the time the song stopped, she already cried into tears.

Chapter 170 - Target Munich

In addition to dating Xia Xiao and giving lessons to the three students who have completed the formalities, Lu Qiujian will continue to brush and film lecture videos for the court platform. More importantly, he has finally chosen this time. School of physics-Ludwig-Maximilian-Munich University.

The University of Munich, founded in 1472, is one of the most outstanding research universities in Germany and even Europe. It, together with the Munich University of Technology and Karlsruhe University, became the first three elite universities of the German government. League school. A total of 34 Nobel Prize winners have been trained in history, ranking 13th among global universities. Physics such as Max Planck and Werner Heisenberg have emerged among alumni.

But his choice may not be easily accepted by others, because the world ranking of the University of Munich is not high, and it has not entered the top 50 in several mainstream university rankings.

However, there are deep-seated reasons for this phenomenon. The first few rankings are all created by the Commonwealth countries. In the rankings, it is inevitable to be biased towards the Commonwealth countries and their original colonies. Some universities in Pearl City tend to rank very high, but the actual level is not as high as the ranking response.

Second, in the ranking of international universities, comprehensive universities tend to be very dominant. The reason why Wuyue University in China had to merge so many institutions was also due to this consideration; while German universities usually pay more attention to The degree of professionalism of some majors is very high. For example, the physics department of the University of Munich has long been in the world's top twenty. The computer of Karlsruhe University of Technology and the machinery of Aachen University of Technology are also very strong. Hope, the owner and founder of sap, graduated from Karlsruhe Institute of Technology; at the same time, there are many top scientific research institutions, such as the Mark-Planck Institute, the Helmholtz Institute, etc., which scattered the research power of universities; comprehensive Weakness and high professionalism have become the characteristics of German universities, so they have suffered a lot in rankings.

Third, there are also reasons for German universities. German universities are relatively closed. The degree of internationalization is low; on the one hand, its willingness is that German is far less influential than English, which leads many students to give up their plans to study in Germany because of the language, and on the other hand, German universities are stubborn in their old ways that cannot be integrated with international School system.

Although German universities have many shortcomings and low rankings, Lu Qiuqian chose the University of Munich. The reason is that the physics department of the University of Munich is indeed very strong, and on the other hand, there are Heisenberg and The inheritance of Ranke, the academia, like the aristocratic circle, valued the origin of people; he accounted for a lot of the advantages of being born in Beijing Normal University in China. Why not continue to use it if this one is useful?

Lu Qiuqian has seen a 20th century physicist ranking before. The first gear is undoubtedly Einstein; the second gear is the goalkeeper of the Danish ab team, the head of the Nobel kindergarten, and the Copenhagen school. Ball and Heisenberg of the University of Munich are tied; the third gear is Dirac, Schrödinger and Yang Zhenning; the fourth gear includes Pauli, Feynman and Landau.

Of course there are many problems with this ranking. For example, Bohr 's ranking is too high, and the difference between the second and third gears is not so obvious. Most of the selected are field theory physicists, lack of other theoretical and experimental physicists, etc., but they also reflect these to a certain extent. The influence of physicists.

An important identity of Heisenberg is one of the founders of the European Nuclear Research Center; in 1952, Europe decided to compete fully with the United States in the field of particle physics. We decided to establish the European Nuclear Center (cern) near the border of Geneva, Switzerland, and France, to build the world's largest particle accelerator to verify quantum field theory predictions and discover new particles. Heisenberg was appointed as the honor of the committee Chairman.

University of Munich has the heritage of Heisenberg. Heisenberg has a huge influence on the European Nuclear Center. If you can enter the University of Munich and learn physics with the students of Heisenberg, then it will be more convenient to enter the European Nuclear Center in the future; so the University of Munich 's physics department has become Lu Qiuqian. The best choice.

Of course, applying for a PhD at the University of Munich is not that simple, and there are many processes to go. First of all, I have to communicate well with the professors of the University of Munich to let him recognize his academic level. Of course, Lu Qiuqian is very confident; if he is approved by the professor, then the next step is to follow the process. Lu Qiuqian is applying for a Ph.D. in physics from the University of Munich. Although he has not received a master's degree, Princeton's phd should be able to solve this problem.

The remaining issues of dsh (German college entrance examination for foreign applicants) or the cost of studying abroad can be easily solved for Lu Qiuqian.

Then. Prepare an article first. Lu Qiujiang has completed several articles in the field of high-energy physics during this time. He studied which professor's thesis collection, and then found an appropriate one, and then contacted With Witten and Dyson, it's time to find a letter of recommendation.

"University of Munich? Nice place, but still not as good as Princeton, do you really not think about coming back?" On the phone, Witten tried to persuade him to return to Bellefonte. Thank you for your invitation, But I still think Munich is more suitable for me! "Lu Qiujiang declined his invitation," but maybe we will meet again soon next year, maybe you will also go to CERN?"

"Haha, yes! (Large Hadron Collider) is almost done, I can't wait to see the results of the experiment!" Witten laughed happily, "If I go to Europe, we are here. Where to meet up now?"

After arranging the time for sending the recommendation letter, Lu Qiujiang hung up the phone, opened the mailbox, and downloaded the comics from Xia Xiaofa for translation.

The comics originally had few words, and Lu Qiujiang completed the translation without much effort, and put these words on the screen, plus a submission letter explaining the situation, and all the preparations have been completed.

Went out for dinner, went back home, opened the mailbox, and returned a batch of homework assignments from the three students. It was time that Dyson and Witten should have sent the recommendation letters.

So Lu Qiujiang sent his thesis, application letter and resume to the mailbox of a professor at Munich University, and then sent Xia Xiao's work to an editor of Shueisha; the next step was to wait with peace of mind.
