Chapter 181 - Watch the Spring Festival Gala

After banging, waking up around the sister's paper, it's refreshing! Lv Qiujian carefully pulled out his arm from under Xia Xiao's neck and planned to get up and make her some breakfast. 【】

But despite his slight movements, Xia Xiao was awakened. She slightly opened her eyes and immediately buried her head in the quilt; it took a while before she protruded her head again, shyly. Looked at Lu Qiujian.

"Be good, you lie down for a while, and I will make breakfast for you!" Lu Qiujian kissed gently on her forehead, opened the quilt and walked out of bed.

"I'll do it with you!" Xia Xiao turned up and stood on the floor. Someone stumbled and sat back on the bed, but his face turned red.

Amount, seeing this situation, Lu Qiujian still didn't know what happened, and immediately helped her to lie down on the bed, ran to the kitchen, and finished her breakfast soon.

After eating breakfast, Xia Xiao also adapted to the changes in his body; Lv Qiujian found a car, and the two began to run between various housing intermediary companies. After a busy day, they finally found the house; the layout and decoration of the house Yes, it is only ten minutes away from Beijing Normal University. Both parties are very satisfied.

When she went to the place where she rented and moved things to her new home, it was already dark, and both parties were too lazy to clean up again. Lu Qiujian took Xia Xiao back to his house again; naturally, there was a lot of people who liked to see it at night. The starting point is not to write things.

The next day, she helped her clean up the new house and bought some items necessary for her home. Xia Xiao finally had a comfortable residence for a while. Since then, the two have been busy each other, occasionally gathering together, and living in a small life. It is very moisturizing.

Shortly after New Year's Day, it was time for the exam. The whole school suddenly became nervous, and he could n't even find enough teammates to play football, but he was just a leisurely look.

E-mail Professor Xuft every day to brush up articles and prepare for graduation thesis. Life is full, but Director Guo only gave himself a bunch of materials first. I am really going to see and I am afraid that I will wait until the next semester.

Seeing that the winter vacation is coming, Xia Xiao wants to stay in Beijing to paint and have no time to go home. He had to go back to see his parents, but just as he was preparing to book a ticket, a phone call disrupted his plan.

“Dr. Lu is the pride of our city. On behalf of several teams in our city, I would like to express my condolences to your elders and thank you two for training such excellent talents!” In the past few days, Lü Qiujian’s home has successively leaders at all levels come to condolences, making his parents a little overwhelmed.

At the beginning, it was the principals and teaching directors of elementary and middle schools that Lu Qiujian attended. Later, the level of consolation is getting higher and higher. From the director of their district education bureau to the district chief, it is their city today. The deputy mayor, who was in charge of science, education, culture and health, took Lu Qiujian’s parents’ hands and said a good call as soon as he entered the house.

Fortunately, these people were all good people. After discovering his parents’ uncomfortableness, he greeted him a little and asked if there was any need for help in the city. After getting a negative answer, he dropped the condolences to leave. This makes them easier.

“Yo, this is that leader again?” As soon as the leader left, the neighbors in the left and right ran over to see the excitement. The three sisters next door looked at the huge pile of things in the living room and were jealous. “Your little Lu is now But it’s amazing! “

“Oh, I heard that the child won a Chen Shengsheng Award, it seems that it is the first time in our city, so they will come over!” Lu Qiujian’s mother turned over in the pile of condolences and found a few boxes of tonics In the past, “Don’t go back empty-handed since you came. Take these back to make up for you and your pillars!”

“Why am I so sorry! These are for both of you!” As the saying goes, the hand holding the handbag will not let go.

“For decades of old relationship, what else do you want to treat me with!” Lv Qiujian’s mother picked up two jars of wild honey and stuffed it into the bag. “Anyway, we can’t finish eating too much!”

“Hehe. Then I will take it! Yesterday the pillar’s nephew sent two spore legs over and turned back to give you one!” After living in a yard for a long time, it is like a family. Will be shared around.

“Eh, it’s almost winter vacation now? Didn’t Xiaolu come back when he said?” Three aunt asked with concern.

“Hey, this child said that there was something wrong during the Chinese New Year. I’m afraid I won’t be able to come back this year!” As soon as he talked about this mother, she frowned depressedly.

“That’s really busy enough!” Auntie San was also a bit lost. But she collected information from many good girls in the past six months, and was waiting for Lu Qiujian to come back and introduce him to him. Chance!

Since there is no such opportunity to sell human relations, you have to think about other ways! The three aunts carried things around in his house; hey, this house has three big houses of its own. It seems that there is nothing missing!

Hey, when she returned to the living room, she finally found an opportunity. “I said Qiu Jian’s mother. If Xiao Lu doesn’t come back, go to my house for the Chinese New Year! My kid just bought a new TV two days ago ~ www.mtlnovel.com ~ What is a new product with a large plasma screen, it looks much clearer than yours, and the two of us will watch the Spring Festival Gala together! “

“But ...”

“Do n’t do anything, it ’s all set! By the time our two New Year ’s Eve dinners are done together, the crowd will be more lively! I ’ll tell you about my new TV, it looks like a movie screen in front, but it ’s big Alright! Your old man’s eyes are not good, and he is looking comfortable! “Aunt San decisively interrupted Lu Qiujian’s mother’s words.

“That feeling is good, but ...”

“Don’t worry about someone coming the New Year, we live so close together, someone can see it from the window when they come!” Said the three aunts will go back, “That’s all right! I will be there early in the morning Come and find you! “

“But the kid said, let me go to the court court with him this year to watch the Spring Festival Gala!” Lü Qiujian’s mother finally said the words in one breath, “So I will be with Qiu Jian in a few days. His dad went to the capital together, I’m afraid I can’t go to your house! “

“Go to the court to watch the Spring Festival Gala?” Three aunts suddenly became messy in the wind, as for this! I just want to show off the new TV. You can come directly to the studio to watch it. Do you want to be so ruthless!

“Yes, the kid said that he did a show for the court this year, so the court gave him a few tickets to let him take his family to the scene to watch!” Lu Qiujian’s mother’s face was full of pride and happy.

Chapter 183 - Awards

“Professor Qiu, you are here too!” It seemed that the seats were arranged according to the research field and work unit. Upon entering, Lu Qiujian saw Qiu Chengtong’s figure, so he stepped forward and said hello. ◇ ↓

“Xiao Lu, I haven’t seen you for a long time!” Qiu Chengtong and Lu Qiujian just said a few words, and the people next to them pointed out the reason why Qiu Chengtong would appear here.

“Congratulations!” Lu Qiujian congratulated quickly. Although Qiu Chengtong is now a citizen of the United States, he has always been concerned about the development of domestic mathematics, initiated and organized the International Conference of Chinese Numerologists, and raised funds to establish the Jingcheng Morningside Math Center and Wu Yue University Math The Science Center, the Mathematics Research Center of Mizuki University and other institutions, not to mention its contribution to helping young mathematicians in China go abroad to exchange and study, he deserves the award.

“Then I want to congratulate you! You are a popular candidate for the Natural Award!” Qiu Chengtong replied with a smile, he was very happy to see the rise of a young Chinese mathematician.

After a brief greeting, the meeting officially started. From the number of leaders present, we can see that the government attaches importance to this conference. In addition to the top leaders and prime ministers, five elders from the Ninth Congress have come!

The beginning of the meeting was the highlight. The top leaders first issued award certificates to the two academicians who won this year's highest science and technology award; one of the two winners is an authority on the earth's environment and has made a lot of originality in loess research. The research results have made China one of the top in the world in the field of ancient global change research.

The other is the leader of aerospace technology and the first chief designer of the manned aerospace project. Hua Guo's first successful manned aerospace project was successfully completed under his guidance; the two of them won the award. Return.

"The following is about to be awarded the first prize of the National Natural Science Award!" The words of the conference host focused the attention of the participants from Beijing Normal University and the mathematics community on Lu Qiujiang.

Lu Qiujiang took a deep breath to calm down his emotions. The headmaster sitting next to him gently patted the back of his hand, "Don't be nervous."

"Huh!" Lu Qiujiang promised in a whisper, while raising his ears to listen to the voice of the elder who presided over the meeting. "The first prize of this year's National Natural Science Award was the 'Chengjiang Fauna and the Cambrian Explosion' project, Completed the Jinling Institute of Geology and Palaeontology, Chinese Academy of Sciences"

Lu Qiujiang couldn't hear clearly. Slightly lost, leaning his back on the chair, did he lose the election because of his age? The headmaster next to him was there, and he was not disappointed.

Sure enough, after reading the list of the people who completed this project, the voice of the chairperson of the meeting sounded again, "And the" Poincaré Conjecture Crack "project, the person who completed the Lu Qiujiang of Beijing Normal University! Please invite the above personnel to take the stage to receive the award!"

Huh, I almost forgot that the first prize of the Natural Science Awards can be issued more frequently. Although the first prizes have been vacant in recent years, 11 projects have been awarded simultaneously in 1987; two prizes were awarded this year. Not much.

"Hurry up and get the prize!" The principal took the initiative to stand up and gave way to Lu Qiujiang. The people next to him also stood up and said congratulations while making way for him.

When Lu Qiuqian walked to the stage. The entire venue suddenly made waves; despite the unexpected facts that Joseph Needham won the award as a foreigner, Lu Jiaxi won the award as a middle school teacher, but this time, Lu Qiuqian's age made them eaten up. shock.

"Who was the youngest winner before? I'm afraid it is twice as old?" Although the top leader was on stage, they couldn't help discussing it.

"This is only twenty-one years old! None of the graduate students I brought is smaller than him!" The people next to him echoed, and there was something unclear in the words. "In my opinion, he will never It was the only time on stage! Previously, Mr. Zou Chenglu won the two awards for the research of bovine insulin and protein in 1982 and 1987. Mr. Tang Yuanqing and Mr. Jiang Yuansheng also used the theory of coordination field theory and molecular orbital graphics theory respectively for the past two years. The two awards, plus two bombs and one star, Mr. Zhou Guangzhao and the two awards in 64 and 1982! It is estimated that it will not take long for the fifth scholar to win multiple awards to appear! "

"Able to make such an achievement as Poincaré's conjecture. It is more than enough to give a first prize; if I don't think that the highest technology prize is more application-oriented, even this prize is eligible for him!" One person joined the discussion.

Lu Qiuqian went to the stage with the three paleontology experts and stood in the middle of the stage; this time the award is still given to the top leader. Lu Qiuqian also saw the elders who participated in the Poincaré Conjecture Report last time. Reminiscent of what he did when he left, Lu Qiuqian somewhat understood what he said to the deputy prime minister at the time.

"Thank you for your outstanding contribution to the development of China's scientific and technological cause!" After shaking hands, the top leader accordingly handed the award certificate to the hands of four people on the stage and waited until the final Lu When Qiu Jian was in his hands. The leader's movements were clearly paused. Obviously he was also surprised by Lu Qiuqian's age. "Does Comrade Xiao Lu look very young!"

"Both Gauss and Galois made results that surprised the entire math world before they were twenty years old. Compared with them, I was still a little bit late!" With a lot of sweat, the supreme leader is in front of you!

The leader has always been surprised by Gu Jingbubo's face, but he still appreciates Lu Qiuqian's self-confidence. He continued to hold his hand and said, "I have read some of your information, and I said You will be the next Fields Medal. The next Fields Medal will be awarded in 2006. At that time, you were only 23 years old. Should you be the youngest winner ever? "

“If there are no surprises, this should be the case!” The youngest winner before him was the 54-year winner, Jean-Pierre-Sale, who was born in the Paris higher teacher’s school, which year he was only 27 year old! When answering, Lu Qiujian murmured secretly. The youngest Nobel Prize winner in science and technology was William Lawrence-Prague. He won the Nobel Prize in Physics when he was 25 years old. It seems difficult to break this record by himself. what!

“This is our country’s first world-class science award! When you come back, I will give you a feast in Haizi!” The leader encouraged him and patted him on the shoulder.

Chapter 184 - All parties react

“Jingcheng is actually like that, people are crowded everywhere! The air is not good, it feels like we are here to stay comfortable!” Since returning, Lu Qiujian’s parents’ home has become a gathering center for retired employees in the factory, did not arrive After eating, a group of people gathered in his living room and listened to them talk about the capital.

Fortunately, the house is big enough now, and I also greeted him. This is not because I got together today and watched TV and nibbled melon seeds while chatting.

“If I were allowed to have a Beijing residence, I would be willing to live in the basement! I don’t have to spend so much time on my child’s college entrance examination! But your family’s Qiu Jian will definitely be able to stay in Beijing in the future.” Aunt San side He said, while pulling his man, “pillar, did you say that? Pillar ... you said something!”

Seeing that his man did n’t respond for a long time, he just stared at the TV, and the three aunts were a little angry, and grabbed his ears with one hand, “What ’s so beautiful about“ The Hourly News ”! You really regard yourself as a national leader Now! “

“Ouch!” Pillar woke up from shock, opened his wife’s hand with a slap, and couldn’t rub the painful ear that was pulled, yelling at the TV, “Look at the TV, the person above seems to be Qiu Jian! “

“Ah!” As soon as the words fell, the crowd surrounded them, and the news just entered the text. “At ten o’clock today, the annual science and technology award conference was successfully held in the Beijing City Mass Hall, and leaders such as **** and **** attended. The conference also presented awards to academicians Liu Dongsheng and Wang Yongzhi, the highest national science and technology award winners, and Chen Junyuan, Hou Xianguang, Shu Deqian, and Lu Qiujian, first prize winners of the National Natural Science Award ... “Enter URL: n Watch Zui Xin Zhang Jie

“Really Qiu Jian!” At this time, the scene was just placed in the scene of the hands of the highest leader shaking hands with Lu Qiu Jian. As an old state-owned enterprise employee, the national leader has a lofty position in their hearts; the old secretary of the factory recalled It took a long time to say, “Since our factory was built to the present, the highest leader came to be a member? Now Qiu Jian can let the highest leader award him!”

None of the dozens of people present listened to him, and all listened to the announcer on the TV quietly, “Dr. Lv Qiu Jian is currently studying at Beijing Normal University and received a Ph.D. from Princeton University in the United States; he and last year Cracked the Poincaré conjecture that has plagued the international mathematics community for nearly a century, and caused an unprecedented sensation in the international mathematics community ... At the same time, Dr. Lu Qiu Jian is also the youngest of all the winners of this conference. The 21-year-old set a record for the China Science and Technology Award Conference ... this is the development of China Science ... “

Until five minutes after the end of this news, all the talents gradually woke up from shock. In the past, I heard that the children of the old Lu family learned well, but to what extent they had no concept. Until today, they vaguely understood that this child did. What an amazing thing!

Did not wait for everyone to congratulate Lv Qiu Jian’s parents, a sudden knock on the door suddenly sounded; Lv Qiu Jian’s father opened the door and was surprised again. Isn’t the person coming here on the city’s TV station every day!

“You are the father of Dr. Lv Qiu Jian! This time Dr. Lv is for our city and even the whole province ...” The secretary immediately held the father’s hand affectionately, and then took the opportunity to shake hands Crowding into the room, showing the camera behind him, while congratulating Lu Qiu Jian’s father, he kept cursing at the bad road conditions in his heart. He had planned to watch the news with Lu Qiu Jian’s parents, but it was because of a small pit on the road Delayed the itinerary, called a depressed in my heart.

The left and right neighbours in the house quietly retreated, leaving only his parents bombed by the secretary ’s uninterrupted language; they did n’t have a good life for the next few days. The two were very annoyed, and once planned to go out to Beijing to find their son.

Hehe, let’s see what they say! Professor Zhang was very happy when he saw the figure of Lv Qiu Jian on TV. The first prize of the National Natural Science Award from 56 years to now has only been awarded 28! Now Lv Qiu Jian has got one of them, which is enough to make a name in the history of science and technology in China!

At the thought of this achievement being accomplished by his disciples, Professor Zhang suddenly smiled and couldn't close his mouth; unfortunately, the child had only one semester left in Beijing Normal University, and now he can only hope in that graduation thesis, I hope that Lu Qiujiang can produce results that match his level.

However, the foundation is now running with the help of the Department of Mathematics of Beijing Normal University. The first issue of the journal has been issued. Presumably, in the future, he will have the opportunity to deal with Lu Qiujiang, so he put his heart back in his stomach.

On the Internet, Lu Qiujiang's three words have once again become a hot spot for searching; 21 years old! Winner of the first prize of the National Natural Science Award! The combination of these two words caused a huge sensation. People are always eager for genius, and Lu Qiu's popularity on the Internet was stronger than the two highest prize winners.

Lu Qiujiang's information was pulled out by the powerful netizens. From his elementary school to middle school transcripts, to the evaluation of university alumni, to the experience of Princeton during his study abroad. Human flesh came out; whether it was the move on Duke's campus or the slamming Fang Ye at the Poincaré report, the netizens' enthusiasm was even higher.

"Hey, and his current performance is presumably, the Olympics is a wool!" Someone finally understood why Lu Qiujiang gave up the NBA and the opportunity to participate in the Olympics!

"Hey, where did I see this person ... seems to be the Spring Festival Evening?" Soon the progress of human flesh was beyond everyone's imagination, even Lu Qiujiang took Xia Xiao with his parents to attend the Spring Festival Gala. The screenshots have been turned over.

Rely on, no matter how good it is! Just study well! We endured good basketball! Even finding a girlfriend is so beautiful! Also let us mortals live!

For a time, Xia Xiao's personal situation was also found out, and even the sales volume of the magazine with her comics was doubled.

In this situation, the major media can still sit still; as soon as the awards conference is over, the application for interviewing Lu Qiujiang flew to Beijing Normal University like a snowflake; from the old old friends Chaotingtai and the youth reported to the major online media, Even offended Lu Qiujiang and Beijing Normal University's "New China News" and brazenly sent new reporters.

But when Minister Zhang of the School Propaganda Department took this large number of interview applications and wondered how he could take advantage of this opportunity, he found that he could not find Lu Qiujiang!

Chapter 185 - What is the use of the collider?

The places where Lu Qiujiang is now can not be accessed by ordinary people. The high-energy physics institute can't control the background of those journalists, not to mention Professor Zhang and the physics department of Beijing Normal University. People know that Lu Qiujiang went to this place.

"You have learned all the relevant norms! But there is still a difference between actual contact and theory. I will let Xia Jia accompany you. If you have any questions, just ask her!" On the way to the High Energy Institute, Director Guo said to Lu Qiujiang.

Is a girl named Xia again. This girl sent by Director Guo to accompany her is an undergraduate student in the Department of Physics of Beijing Normal University. It looks like a top place in the Department of Physics! It is said that he is also one of the masters of the physics department. As early as last year, he participated in the cooperation between the physics department of Beijing Normal University and the High Energy Institute. Both the theoretical knowledge and the experimental level are quite good.

Speaking of the gap between the experimental level and theoretical knowledge, Lu Qiujiang remembered his future master Heisenberg; this Daniel has the theoretical level of blasting the sky, and also has extremely weak experimental ability; because he almost did not take it To a doctorate.

The mentor of Heisenberg's doctoral thesis defense was the originator of quantum mechanics and atomic physics, and the outstanding mentor Sommerfeld, who has taught the most Nobel Prizes in physics in history, in his name, in addition to Heisenberg Pauli, Debye, Bate, Lenz, Kramer, Pauling, etc. have left legends in the history of science; and William Wien who made the famous blackbody radiation experiment and won the Nobel Prize in Physics .

In the defense of the thesis, Heisenberg's theoretical ability and the experimental ability that even the kindergarten children were not as good as at the same time shocked Sommerfeld and Wien. The two gave very different results; Sommerfeld gave the highest a En gave the lowest e, and finally integrated Heisenberg was lucky to get a doctorate with a score of c.

Of course, Professor Xuft learned the lessons of his teacher. When he studied the theory, he never forgot the experimental ability, and became a world-class presence in both fields; this is also why Lu Qiujiang chose him instead of Witten as a tutor. An important reason.

The reason why Director Guo finds a girl to come to here does not necessarily have any dark thoughts, only that Xia Jia 's level is indeed good, and secondly, women always have some advantages in socializing; if some things make Lu Qiujian angry, women The unique gentleness and weakness are also easier to forgive.

“Then Xia Xuemei is in trouble!” Xia Jia is two grades lower than Lu Qiujian, and this year has only just a sophomore year.

“No trouble at all!” Xia Jia’s eyes shone with curiosity. “I wish I had a chance to get in touch with a big scientist like you, maybe it will bring a lot of inspiration to my writing!”

“Writing?” Xia Xiao likes to draw cartoons. This is writing again. Is it that the surnamed Xia are all young female artists?

“Hehe. Xiaoxia is a talented girl in our physics department!” Director Guo introduced with a smile. “Not only did he study well in this major, but his writing skills are top-notch, too. Xiaoxia has published many science fiction novels now! A character! “

“Then I have to come and read and read!” Lu Qiujian flashed a flash of light in his head, and any major project required a lot of human and material support. So, can we use the power of literary and artistic works to create public opinion, thereby promoting the development of public opinion in a direction that is beneficial to oneself? At the end of his thoughts, he couldn’t help but say, “I just have some ideas here. If you have time, I can tell you to see if you can spawn a new work!”

Talking about his hobby, Xia Jia’s nervousness just disappeared unconsciously, and soon had a chat with Lu Qiujian, talking and laughing. When they reached the gate of the high-energy institute, the two seemed to be Friends for many years.

Director Guo had made an appointment before he came. Waiting for a while at the door, some people hurried out to pick them up. After going through a series of trivial and complicated procedures, Lu Qiujian finally entered.

“A lot of people here will ask us what is the use of spending so much money to make a collider? Can they make our country stronger? Why not put this money in poor mountainous areas that need more funds?” Xia Jia took Lu Qiujian said while walking inward.

“This question can be answered by a letter from Dr. Ernst-Sturinger of nasa to the nun Mary-Eukenda of Zambia in 1970. On the one hand, the national investment in scientific research and the

investment in poverty alleviation are divided. It belongs to different budgets. On the other hand, the final results obtained by investing in scientific returns will play a huge role in solving poverty. This role is far more than simply using money to relieve poverty! “Xia Jia has many stories in the history of science and technology. It is familiar and familiar, and the human feelings of literary and art workers are hidden under the calmness of scientists.”

“Oh, have you ever heard of the name Da Liu? Recently I saw a metaphor about a collider in one of his manuscripts, which is very vivid!” Xia Jia turned her head suddenly.

“Of course, but I don’t want the scene he described in” Chaowen Dao “to really happen!” Lu Qiu Jian knew that the big Liu she said was Liu Cixin, and “Chaowen Dao” told about alien wiping. Go to the largest particle accelerator in humans. Because the proof of the unified model will bring about the destruction of the universe, “If this is really the case, wouldn’t our work be meaningless?”

“Oh, that’s just a novel!” Xia Jia’s laugh is unique. The cold machines around them also seemed to bring a touch of warmth because of her laughter, “Da Liu in his new novel compares the collider to a watermelon knife!”

Xia Jia stretched out his hand and gestured, “We first cut the proton, and its charge flowed to the coffee table, which was sticky. There was a fragrance; after the neutron made me cut in half, the quark inside jingle rolled away. When they came out, they were all walnut-sized and colorful, rolling on the coffee table, and some of them rolled to the ground ... “

“Protons, neutrons, and quarks all exhibit quantum effects, which shouldn’t look like that!” Of course, Lu Qiu Jian had read “Spherical Lightning”, and he replied in the original Lin Yun’s words, “But if protons and neutrons are true. What can be put into such a big, then it is a great gospel for the entire physics session! “

“Yes! This is the role of the collider! This is a tens of billions worth of watermelon knives, a great tool that can help us understand the operation and principles of the smallest particle physics world to the largest stellar world!” For a moment Xia Jia looked like a poet.

This analogy of Da Liu is simply awesome!

Chapter 186 - Observation and learning

Speaking of the relationship between Lu Qiu Jian and the High Energy Institute, it is not just the Beijing Normal University. Mr. Zhang Wenyu, the first director of the High Energy Institute, one of the founders of cosmic ray research and high energy experimental physics, can also be to some

extent. It is said that Lu Qiu built a double principal at Peking University and Princeton University.
□

After obtaining a master's degree from Beijing Normal University, Mr. Zhang Wenyu obtained the qualification to study abroad at Gengzi and went to the famous Cavendish laboratory, where Rutherford became his mentor, Chadwick, Kokraft, Wall The Nobel Prize winner in Physics is his classmate.

In order to return to China as soon as possible to contribute his part to the war of resistance, he gave up his great prospects and applied for a doctoral thesis defense in advance. Rutherford did not take it seriously at first, but he was finally convinced by his thesis; he even went to Germany to help the war of resistance I learned the searchlight technology at my own expense. Unfortunately, the party-state didn't pay attention to him after he returned home; in desperation, he had no choice but to accept Princeton's invitation to go to the United States to continue his research work.

At Palmer Labs in Princeton, he achieved excellent results in the field of high-energy physics; after learning the news of the founding of Xinhua State, he and Qian Lao broke through the FBI's heavy obstacles to return to China, and for the development of high-energy physics in China lay a solid foundation.

It was first proposed in a letter to the Prime Minister in 72. From the second year after writing this letter, he began to serve as the first director of the High Energy Institute. Under his leadership, the Beijing positron-electron collider After the project was successfully completed, Huaguo finally had its own high-energy physics experiment base.

On October 16, 88, the first positron-electron collision was realized. It was hailed as another major breakthrough in the high-tech field after the success of the atomic bomb and hydrogen bomb explosion and the satellite launch.

If Mr. Zhang Wenyu stays in the United States or the United Kingdom, his personal scientific research path will undoubtedly be smooth many times. Mature laboratories, high financial support, and high-quality partners will all increase his reputation in the field of world physics research. Pushed to the peak; but he chose a more difficult path. Shen Ke's century-old Hua Guo even needed practical technology that could directly generate benefits at the time, and had no ability or funds to carry out basic exploration of high-energy physics. ; So Mr. Zhang Wenyu did not get the honor he deserves.

Compared with Yang Zhenning, Li Zhengdao and even Qian Lao and Deng Lao, his reputation seems worthless. But in the long run, Mr. Zhang Wenyu's contribution is equally great. To put it in a familiar saying, your name is known by few people, and your achievements will remain forever.

Of course, now Mr. Zhang Wenyu has undergone tremendous changes. After many renovations, the comprehensive functions have been greatly improved, far from being comparable when it was first built.

"Hey, it's a pity that this big baby will end the operation in less time, ready to be demolished!" After the visit. Xia Jia said slightly sadly.

It is a matter of course to replace the new experimental equipment with the old one! The reason why Xia Jia is a little sad is that she has her own literary and artistic female attributes, but Lv Qiujian didn't feel that much. It is regrettable that it is also because the operation is about to end, and she has fewer opportunities to participate in the experiment.

However, the opportunity to witness the re-construction of the collider is also rare. This thing is at least starting from the cost of nine or ten digits. That is not the funds obtained after hard application. In general, which unit will be okay to dismantle and repair. Xiu's play?

Although compared with cern, it is an outright little guy; but the size of this little guy is not to be underestimated, the linear accelerator is 202 meters long, and the prototype accelerator is 240 meters in circumference. With a height of 6 meters and a weight of 500 tons, together with the transmission line and the synchrotron radiation test device surrounding the storage ring, the whole facility covers an area of 57500 square meters, which is about the size of eight standard football fields combined. !

And the 57500 square meters of land is not the rough reinforced concrete used to build the football field, but is densely covered with various precision instruments that represent the most advanced scientific level that mankind can reach! The difficulty of transformation can be imagined!

"The demolition is for better development!" Lu Qiujian looked around and his eyes were full of stars. After more than a year of hard work, he finally came into contact with things that can help him achieve his plan! "I believe that the high-energy institute in a few years will definitely play a greater role than today!"

"Well, I hope I will have the opportunity to work here!" Xia Jia nodded. "It takes five years for the renovation project. At that time, I probably just graduated with a master's degree! In your case, it

takes about three years to go to Germany to study for a doctorate. You can participate in its completion celebration in two years after you get a doctorate! “

Speaking of this, Xia Jia smiled naughtily, “By that time, you may be eligible to take a doctoral student. Take me by then!”

Hehe, I may not come here in the future! And I am not sure that you will continue to stay in the field of high-energy physics. From the contact during this period, you seem to be more suitable to become a science fiction writer! Therefore, Lu Qiuqian did not answer positively, “If you are still interested in physics research when I get the qualification to take a doctoral student. As long as I can pass the exam, I will definitely not refuse!”

“Huh, it’s still so strict.” Xia Jia threw out her tongue, “I’m so hard recently, you don’t give people a chance to walk through the back door!” Follow him and don’t say if you can Achievements in physics research, at least there is no shortage of inspiration for writing novels, Xia Jia thought so.

“Haha, let’s do this! When I understand the situation here, I will tell you an interesting story, maybe you can write it in the book!” Lu Qiuqian replied with a smile.

“Okay!” Xia Jia applauded and congratulated. Since talking about it on the road just now, she has been thinking about it. Now Lu Qiuqian finally gave a certain time, which is certainly worth celebrating.

“But you have to take me through this place!” Theory and experiment are different. Learning theoretical knowledge may be done by looking at the book alone, but when it comes to actual operation, someone must bring it, Xia Jia sophomore Only the very basic things can be touched; the high-end part may only be known to a few seniors of the high-energy institute.

Therefore, Lu Qiuqian’s plan for himself during this period of time was to observe and learn by himself first, and then wait for the foundation to be solid, and then use his superb mathematical skills to intervene in the transformation project in order to design the collider. , Construction, operation mechanism, etc. have a complete and clear understanding.

Chapter 187 - Love story on "Nature"

Love story in Chapter 187 “Nature”

“Hey, it’s been several months! You are about to graduate and reply! What is a good story?” Since entering the high-energy institute, Lu Qiuqian has been attracted by those sophisticated and high-end

instruments and rich literature. She dragged on her promise to Xia Jia again and again, and on this day she started a new round of debt collection.

“Then today is good, I understand the situation here almost! It is time to go back to prepare for the graduation defense!” Lv Qiujian looked at this place with reluctance, “I will invite you to dinner at night to thank you. Help me during this time, let’s tell this story while eating! “

According to the things accumulated during this period, Lu Qiujian and Xia Jia left the high-energy institute and found an elegant restaurant. After ordering food, she did not speak, but stared at Lu Qiujian.

“It is said that the protagonist of this story is also an experimental physicist, and his work is similar to those of the high-energy institute.” Lu Qiujian began to tell the story slowly, “You also know that people who study physics are like Hawking. There are not many romantics like Schrodinger who understand romance; most of them are bored men who are immersed in their own world and are not very good at expressing their inner world to others. “

Yes, you read that right; although Hawking’s physical condition is not very good, but his sister’s skills are first-class in the physics home! There are only a few lovers such as Schrodinger who can be more powerful than him.

“The protagonist of our story is also the same. He likes an elegant and beautiful violinist Gillian.” Lu Qiujian shrugged. “If you talk about experimenting and calculating the results of physical reactions based on various formulas, he may It can be done easily, but if it comes to confessing to the crush, he will be at a loss! “

“Oh, is this thing so terrible? It sounds like you have the courage to carry out a hydrogen bomb explosion experiment, but no courage to express it!” Xia Jia made an analogy.

“Perhaps it is true even if the hydrogen bomb is more powerful. The result that the explosion can achieve is also his expectation; but how the violinist will respond to his confession, this is unpredictable like Schrödinger’s cat!” After drinking tea, continue to tell the story. “What makes him even more depressed is that the violinist has already communicated with them, and they are the bassoon player of their orchestra. In the words of the physicist, I will wait until I can become a good bassoon player. In his position, the protons of the entire universe have decayed ... “

“He was completely in the wrong direction! The violinist did not necessarily like him because his opponent’s bassoon played well!” Xia Jia, as a girl, naturally understands the violinist better than any physicist.

“Well, I think so too.” Lu Qiujian suddenly felt a little bit crooked. The original meaning of Bassoon in Italian is “a bundle of firewood.” Wouldn’t this violinist fall in love with the man because of Bassoon? A piece of firewood? Ah, so evil, so evil!

Quickly turned the bad thoughts in his mind to the side and continued to tell the story. “The physicist pondered for a long time, and finally came up with a way to express my confession, but we would write a paper! Simply write the confession into the paper! So he immediately started and wrote an article called” How to forget the paper you love her. “

“In this paper, he first expressed his infatuated obsession with Gillian in lingering language! This obsession that was destined to have no results made him painfully unable to extricate himself, so he designed an experiment to try to use his own Physics theory to make herself forget her! “

“Well, isn’t it more appropriate to find a psychologist in this situation?” Xia Jia really couldn’t understand how to forget a person by a powerless method.

Lu Qiujian put her index finger to her mouth to signal her not to interrupt herself, and then went on to say, “He designed an experimental solution that can theoretically solve unrequited love. This experiment uses the following equipment and materials.”

“A large generator requires an instantaneous electrical conductivity above 20 amps (including 20 amps). Two bundles of large-size copper cables are connected to the positive and negative poles of the above generator respectively. The on-off is controlled by the handle, so that you can There is something to grab when you step barefoot in a bathtub filled with salt water. “

“A quantum flip-flop that works better with an old laser dial; a photomultiplier tube to detect random photons emitted by the laser source; a camera that is aimed at the phonebook with the number of the person you secretly love. “

“The last is a pre-programmed computer that will start the generator under the control of a quantum trigger, but if the camera detects that the name disappears from the phone book, the generator will be turned off.”

“If he did this experiment, he would die!” Xia Jia clenched her fingers in both hands. There seems to be some worry about the fate of this physicist.

“But in theory everything is unpredictable since he pressed the quantum trigger. There are millions in this process. Even billions, trillions of him will die.” The radium luminous dial may emit a Photon. It may not be issued, two possibilities exist at the same time, and “if survived through this process, it means that the name disappeared from the phone book Gillian is not in this world Existence, the generator is automatically turned off by the computer program! In this way, he will get a world without Gillian! Never worry about love again! “

“Then? What is the result of this experiment? Has he really got rid of Gillian’s unrequited love?” Xia Jia saw Lu Qiuqian stopped and couldn’t help but urge.

“The result was unexpected!” Lu Qiuqian shrugged helplessly again. “He hasn’t pressed the quantum switch until today. In the physicist’s words, he can’t imagine himself living in a dislike Gillian. In the universe! “

“Hahahaha!” Xia Jia couldn’t help laughing, attracting customers around her to look back.

After a long time, she stopped, took out the paper towel and wiped the tears out of her smile, and spit out her tongue apologetically.

“Well, I felt the same way when I first heard this story!” This boring man can be said to be romantic in a way!

“I think I must be able to write a good story on this subject!” Xia Jia’s look at Lu Qiuqian now seems a little different.

“Well, I think so too, and let my girlfriend draw a comic after you write it!” Then Lu Qiuqian saw the light in her eyes dim obviously.

Chapter 188 - Thesis defense

“The extremum principle plays a very important role in the study of partial differential equations ... Combining the above reasons, I have summarized some of the extremum principles of partial differential equations, and also given several extremum principles Several applications “In the conference room of the Department of Mathematics, a senior student is elaborating a summary of his thesis with a little nervousness.

As the first-ranked college in the country, the Department of Mathematics of Beijing Normal University is not like those schools that can graduate as long as they pay money. The cards for graduation thesis are still strict; Papers that cite materials that are not authoritative and other issues

are usually not easily passed, so in addition to the classmate who is defending, others also look at their papers nervously; only Lu Qiujian is still a relaxed pair Look.

Professor Nan returned to Beijing Normal University this semester. He is sitting on the stage and listening to the student's report carefully. After he finished reporting, he moved the microphone to his mouth and asked, "Tell me that you are in energy mode Estimate the reason for using that formula in the fifth section of that section. Is this formula the optimal choice for this problem?"

"Well, I thought so ..." The students below clearly heard his voice trembling and even tense with his own mood; the professor Nan in front of him gave the seven major math problems to him Questions for the students' final exams! Compared to the requirements for graduation thesis, it will only be higher!

Why didn't he come back for half a semester late, we still have to be assessed by him before taking his class, it is really a big loss! Everyone slandered in unison.

"It's not appropriate for you to put this formula here. You didn't consider that you still need to solve the problems of ... and ..., and you didn't make up for this loophole in the following article!" Professor Nan just answered his question. Shaking his head pointedly pointed out the errors, "So, there is a major flaw in your paper! I suggest ..."

"Cough, Professor Nan!" Professor Zhang couldn't help interrupting his words. Although there are some problems with this paper, but it is not irreparable, don't shoot the child directly! "I think let him go back and revise it. Then reply again!"

"Well, that's it!" Professor Nan hesitated for a moment and agreed with Professor Zhang's opinion.

"Thank you Professor Zhang, thank you Professor Nan. Thank you Professor Ren ..." The child was crying because he was wronged, and he had to bow down one by one.

There is such an example in front, and the students who responded later were more nervous; but the more nervous the more error-prone, and some of the original papers had no problems, but when Professor Nan asked him, he was a little confused. The words spoken in the mouth were not satisfactory, and soon suffered a similar end to the classmate just now.

Xu Ye and Li Yincheng, Lu Qiujian's roommates, are better. They have let Lu Qiujian help them to read their papers before, and all the slightly obvious problems have been dealt with, so they passed this level and passed the defense smoothly.

“Student Kong Yuan, please come forward to reply, and please prepare, Lv Qiujian!” The time for the reply passed quickly, and it was not long before Lu Qiujian arrived. He took the paper out of the document package and prepared the reply. Preparation.

“Well. You can answer a few questions. You can see that you have done a good job in preparation!” Professor Nan said after hearing Kong Yuan’s answer. “There are only a few details that are not perfect. This I’ll let you pass the second reply; but I’m afraid I need to improve it if I want to post it.”

“Yes, thank you Professor Nan, thank you Professor Zhang ...” Kong Yuan let out a big breath and bowed to thank him with a smile.

Next, it was Lu Qiujian’s turn, and almost everyone in the meeting room turned his attention. The other classmates in the next room also finished sneaking in. They wanted to see the legend of the Beijing Normal University in the paper What a demeanor when replying.

“Oh, Xiao Lu. You have been in the high-energy institute for several months! After Professor Nan returned to China, you didn’t visit him much, this is a bit undesirable!” Didn’t wait for Lu Qiujian to start elaborating his thesis Professor Zhang said with a smile, if not during this time, the papers issued by Lv Qiujian have continued to increase. He has to go to the High Energy Institute to get him out!

“Yes, this is mine, not! I will surely make a good guilt to Professor Nan!” After Professor Nan returned to China, he only met once at the welcome party on the first day, and has been staying in the High Energy Institute since then. Not kind.

“It’s okay, I want to see me at any time. Such learning opportunities are not always available; besides, your recent article has given me a lot of inspiration!” Professor Nan changed the rigor of his talents, and he didn’t think that meaning.

“High energy is still used to staying? Want me to say that the cafeteria there is really ridiculous. I went there last time. The braised pork roast, biting a mouthful of oil, wasted those good pork belly!” Professor Zhang even grinned, as if there was such a piece of braised pork in his mouth.”

“It is better to say that this is the best braised pork roast in the small cafeteria of the faculty and staff of Tancheng University compared to universities and research institutes across the country! That’s

really a sweet and soft, fat and not greasy ...” Professor Ren who didn’t ask much questions also came to join in their conversation.

Lv Qiujian and the students under the stage were all messed up in the wind, teacher, we are the defense of the Mathematics Department of Beijing Normal University, not the graduation design assessment of New East Culinary Arts School!

“That’s of course, don’t look at where Tancheng is! The braised pork came from them!” Another professor said, “If you want me to watch colleges and universities all over the country, there is no comparison of roast pork. Their good! “

“If you want to just say that it is braised pork, I have no opinion! But I would not agree to expand the scope to the meat!” Someone immediately stood up to object Dongpo Meat of Wuyue University Academic Exchange Center! Gourd meat in the expert canteen of East Guangdong University! There is also the burning of the Institute of Religion of Shuzhong University! Not to lose to him! I ’m talking about pork. I have n’t mentioned the yak beef from Tubo University, the lamb from Western Region University, or the Baodao University ... “

This is obviously a foodie, and everyone who can speak can’t help swallowing; seeing the topic a bit far away, Professor Ren quickly patted the table, “You guys, want to eat meat for a while, I invite you, we still have Answer it! “

At this time, all the people woke up from the lively discussion, Professor Zhao smiled embarrassedly, and then looked at Professor Nan, “Professor Nan, it’s almost the same time to see this reply. Xiao Lu passed it right now?”

“Well, let’s go!” The students under the stage were messy again in the wind!

Chapter 189 - Station 1 Paris

But if you think about it, they have nothing to say. Lu Qiujian now publishes more articles in the four major journals than the entire faculty and staff of the Department of Mathematics of Beijing Normal University. Is it possible to pass the undergraduate thesis defense?

“By the way, there is good news coming late to tell you!” Professor Zhang announced with a smile, “The degree committee decided to award you a doctoral degree in recognition of your low-dimensional topology, partial differential, algebraic geometry, number theory, Outstanding achievements in many fields including set theory! “

Professor Zhang said with a self-deprecating smile, “Actually, this Ph.D. degree should have been given to you. It makes no sense to get the phd at Princeton, but not at Peking University; but our procedures are more troublesome than Princeton. , So I wo n’t give it to you until now! “

Not long after the graduation ceremony, Lu Qiujiang’s black and red two-color doctoral robe and the bright red tassels on his hat stood out against a pile of black bachelor robes.

This graduation photo has even become a unique landscape in the Hall of Honor of Peking University. Everyone who comes here will stop in front of it and listen to the legendary story of Lu Qiujiang.

“Go to Neon and take care of yourself, don’t be too hard! Remember to eat and sleep on time every day! Just call me if you have anything! I also know some people over there, and I can help you with problems. At the airport, Lu Qiujiang comforted Xia Xiao in his arms in a low voice.

Before waiting for him to embark on a journey to Europe, Xia Xiao left Hua Guo first; in the past six months, her comics responded enthusiastically in neon, and was sold to Hua Guo; in this case, Shueisha gave her An invitation was sent, and she was invited to work and communicate with Neon for a while.

If Lu Qiujiang is still in China, she may not agree to this invitation; but Lu Qiujiang will go to Europe in a few days, and she does n’t mean much to stay in the country alone, so she agreed with Lu Qiujiang ’s persuasion. Invited by Shueisha.

“Well, you have to take care of yourself in Europe!” Xia Xiao whispered, leaning his head on his shoulder. “You don’t have to worry too much about me. I have been taking care of myself for so many years. I completely coped. “

Even if he was reluctant, the flight would not wait for others. At the urging of the airport, Xia Xiao wiped her tears. Step back three times toward the security channel.

Watching her figure disappear into the crowd, Lu Qiujiang called a professor at a neon university and asked him to pick up Xia Xiao at the airport. Although Shueisha would send someone to pick it up, one more preparation was always Okay; since the last meeting. Many neon mathematicians also often communicate with him via email, and it takes no effort to handle such trivial matters.

Singing “Those Flowers” and “Friends”, eating casual meals, a group of people except Lv Qiujiang were all drunk; after so many tossing, this year’s students packed up their bags and left Beijing

Normal University; Of course, many of them will return to study for a master's degree after two months.

When Lu Qiujian left, he also wanted to ask Professor Zhang to return the house key, but was rejected by Professor Zhang. "This house is yours! When you are in Europe, the school will arrange people to clean it regularly, even if you If I ca n't come back in the past two years, can my parents live in Beijing? "

Of course, Beijing Normal University does not expect Lu Qiujian to choose a house because he will return to work after returning home. It is always good to have a good impression.

Must go home to see before going to Europe. This time, it may take two years to come back. Parents still need to make arrangements.

As soon as his flight landed, someone called to hear the familiar coarse voice, and Lu Qiujian's mind reappeared as Wang Nima's image. "Hello, Yao, have you returned home now?"

"Yeah, preparing for the Olympics!" There was a pause there before continuing, "Xiao Lu, are you really not going to participate in this Olympic game?"

"No way! The professor from Germany asked me to pass by early. It just happened to be an important experiment, and there was a conflict with the Olympics in time!" Lu Qiujian explained, "So I can't go this time?"

"I can't go this time?" Yao Ming looks stern, but in fact, he is very smart. Soon I heard the implied meaning of Lu Qiujian's words, "Then do you mean you will participate in it next time?"

"It also depends on the working arrangements of the time. If you can find the time, the event at the door can still go." Of course, Lu Qiujian's purpose may not be as simple as Yao Ming thought.

"Haha, that's good! I'll wait for you at that time!" After a few more words, Yao Ming, who hung up, was in a daze for a while. After four years, did Lu Qiujian still sweep the level last year?

Not to mention Yao Ming's confusion, Lu Qiujian returned home and had a few days to share his life; the power of the first prize of natural science is huge. When the city's leaders heard that he came back, almost every day Come and visit.

What's more exaggerated is that when he visited the alma mater with the principal of the middle school that he was studying in at the beginning Heran found that his big picture had been posted on the wall of the alma mater, and he was alongside Newton and Zu Chongzhi He wiped a sweat.

After another three days, Lv Qiujian could not bear the enthusiasm of the local leaders. He quickly excused his parents to go to the body and hid in the provincial capital; at the largest hospital in the provincial capital, he accompanied the parents to carefully check the body, and then took After they traveled for a week, Lv Qiujian said goodbye to their reluctant parents and returned to the capital.

At this time, all the procedures for studying abroad have been completed, the study visa has been handed in, the dsh exam has won a high score without any accident, and Professor Xuft also applied for the highest scholarship for him.

Finally, I went to Beijing Normal University to say goodbye to Professor Zhang, Professor Nan and others, and then sent the final installment of the teaching video to Chaoting Terrace to arrange my three students' study plans and went to the foundation 's site for two days. After ending a few minor problems, Lu Qiujian's domestic affairs were properly arranged.

Just in July, Lv Qiujian came to Jingcheng International Airport accompanied by professors of Peking University; thanking them all, carrying simple luggage, Lv Qiujian entered the security channel.

Half an hour later, Lu Qiujian boarded the Air France plane; after the plane took off, Lu Qiujian sitting in the first class glanced through the window at the capital. It might be two years after coming back next time?

Then his gaze returned to the book in his hand, it would be a long journey, it would take seventeen hours to reach the first stop he planned-Paris.

Chapter 190 - Good tea on tea

In the evening, the plane landed at Charles de Gaulle Airport in France. When he walked out of the passage with the flow of people, the driver from the Four Seasons Hotel in Paris had already waited with a sign.

The driver's superb driving skills and the superior performance of the vehicle made him hardly feel any bumps. After arriving at the hotel, he took a short rest. He came to the le-restaurant and tasted the French national treasure-class chef Philippe Le Jean German's craftsmanship seems to be

slightly higher than that of the master busson who met with Patrice and Yangyang in New York last time.

Although the hotel is only a few steps away from the famous Champs Elysées, Lu Qiujian is not interested in which street luxury goods! So after the meal, I went to the gym to exercise my body, and then went back to the room to take a break and jet lag.

Woke up early the next morning, Lu Qiujian packed up the phone at the hotel reception and called a car, ready to start his first job in Europe.

The current mathematics community has two centers, one in the United States, with Princeton as the core, plus Harvard, Stanford and other cooperative colleges; and the other is in France, with the French Academy of Advanced Sciences and the Paris Higher Normal as the core. Lafferge, one of the Fields Medal winners, works here, and Grothendieck has spent a lot of time here.

These two centers represent the highest level in the world of mathematics. Other countries such as the United Kingdom, Germany, and Lucia can be counted as the second grade; then China, Neon, Natalie's home country Israel, India and other countries can be counted as the third grade.

Therefore, since you have come to Europe, you should visit the French Academy of Advanced Sciences anyway; not to mention that Laurent-Lafferge is also studying the Langlands program, and Lu Qiujian also wants to communicate with him about the Langlands program. The latest research progress.

On the way to the French Academy of Advanced Sciences, Lu Qiujian suddenly remembered a very funny thing. Lu Qiujian had long thought about why French mathematics is so powerful. After he arrived in France, he finally found a reason. .

The expression of numbers in French is really crippling, 76 does not read 76! Read sixty plus sixteen! 96 do not read ninety-six, read four twenty plus sixteen! Phone numbers are two numbers and two numbers! 176988472 Don't read one seven six nine eight eight four seven two! Read one hundred plus sixty plus sixteen, four twenty plus eighteen, and four twenty plus four. Sixty plus twelve!

This also perfectly explains why French men tend to go straight in when they talk to each other, instead of going to the phone number and communicating slowly, who remembers such a perverted number!

Living in such a cruel language environment, but also interested in entering the mathematics department. It must be both a genius and a passion for mathematics. It would be unscientific if he could not achieve results.

Lv Qiujian visited Lafayette, who graduated from the Higher Normal School in Paris and became a tenured professor of mathematics at the French Academy of Advanced Sciences four years ago.

When I think of Lu Qiujian here, I want to vomit again. The names of French universities are so frustrating! What a higher teacher in Paris! What is the sixth university of Paris! What the 11th University of Paris! If Yangyang's mother heard it, they should think that the status of these schools in France is equivalent to the two universities in China.

But the fact is that the 11th University of Paris is the number one prestigious school in continental Europe. Paris Sixth University is also in the top 50 in the world! There are only more than 2,000 students in the Higher Normal School in Paris. It is only a quarter of Princeton, but it has produced 11 Nobel Prize winners, 10 Fields Prize winners, 4 Wolf Prize winners and one Abel Prize winner!

"Mr. is a senior scientific researcher in front!" The speed of the car slowly slowed down, and the driver's reminder interrupted his thinking.

Lv Qiujian looked at the gate of the academy not far away and said, "I estimate to stay here for a long time. You can spend some time at a cafe nearby. I will call you before leaving."

The driver put Lu Qiujian down and waited until he walked to the entrance of the gate before slowly driving outward; at the gate. Lv Qiujian saw an old man with half-haired in the guard house looking attentively through the latest issue of the Journal of Mathematics.

Are the guards understand this? Is the French Academy of Advanced Sciences so powerful? Lu Qiujian sweated a little, and then he knocked gently on the window of the guard house.

"What's the matter with you here?" The old man asked, slowly raising his head.

"I am looking for Mr. Lafouge and want to communicate with him!" Lu Qiujian replied.

Hearing the name of La Foge, the old man's expression changed slightly, but he did n't put Lu Qiujian directly into it, "Which school are you from? It looks like you should still be studying undergraduate?"

"I'm from Beijing Normal University, I just graduated half a month ago!" I don't know if he will take out the test questions like a guard of the Mathematics Institute to do it by himself?

"Beijing Normal University?" The old man seemed to have made a decision when he heard the name, "Young man, if you want to go in, please choose a time when you are open to the public; Mr. Lafouge is very busy. I am afraid there is no time to satisfy your curiosity! And You have just finished your undergraduate course, and now you want to communicate with Mr. Laverge, do n't you think it 's too early? "

Apparently he regarded Lu Qiujian as the star chasing clan of La Foge, but in terms of his age, Lu Qiujian did not care about him. "I have obtained two doctorate degrees from Peking University and Princeton. I have also communicated with Mr. Lafferge before. Please tell me my name to Mr. Laverge. If he refuses, I will leave immediately!"

"Doctor of Princeton?" The old man's tone revealed a respect, quickly put down the magazine and stood up, walked out of the guardhouse, and came to Lu Qiujian. "I have never met such a young Dr. Princeton, can you ask for your name?"

"Lv Qiujian! I met Mr. Lafouge in the capital of China last October. I believe he still remembers me!" Lu Qiujian shook his head slightly helplessly, or the Princeton name should be used better!

Lu Qiujian? Does this name seem familiar? The old man frowned and thought for a moment Suddenly raised his head suddenly, held Lu Qiujian's right hand enthusiastically and shaken, "So you are the one who has cracked the Poincaré conjecture! I will take you to Mr. Lafferge 's office, I believe he will be happy to see you too! "

Tea, tea, tea! The old man's attitude change several times in a row reminded Lu Qiujian of this allusion! I can enjoy the treatment of Zheng Banqiao today!
