Chapter 211 - Higgs' invitation

“Fantastic ideas!” At the end of the speech, Furstenberg took the lead in applauding, and then came to the other mathematicians who attended the award ceremony, the mathematics professors of Hebrew University ...

“I don’t quite understand the question in the third quarter, can you tell us about it?” Before the applause ended, Higgs began to ask questions.

For these mathematicians, Lu Qiujian’s article only optimized some existing mathematical methods; for the Higgs, this is one of the keys to whether their theory can be finally confirmed.

“I’m happy to answer it for you!” Lv Qiujian took the pen and wrote down the whole process of the question asked by Higgs on the writing board, and then explained them in detail.

Fürstenberg occasionally chimed in to explain his point of view. Higgs and others nodded from time to time; after more than half an hour passed, they finally understood what Lu Qiujian wanted to express, and then asked the second question.

Gradually other onlookers mathematicians and physicists also joined in the exchange. Lu Qiujian secretly observed the lightening changes of Higgs and others while answering.

When the last question was answered, he finally saw a satisfactory smile on Higgs’ face; yes, it seems that this trip to Jerusalem will have a good ending!

“Lu, the three of us agree that your article is a great boost to particle physics experiments! We can’t wait to see this article in the Physics Review Letters!” Higgs praised At the same time, I thought about it secretly, maybe I can call the editorial department of Physics Review Letter? Let them publish this article soon?

“Thank you, if it determines that it can speed up the analysis of experimental data, I will also be happy!” Kang looks like Higgs seems to have something to say.

Sure enough, after Lu Qiu Jian finished speaking, Higgs sent out an invitation, “Now that it has been re-commissioned, if possible, I hope that next time you test, you and Professor Xuft can come to cern!”

“Thank you for your invitation!” Lu Qiu Jian secretly rejoiced, showing a just smile, “I will convey your invitation to Professor Xuft. I also believe that the tutor does not want to miss this physics that may witness the greatest physics in this century. Opportunity to discover! “

Needless to say, Lu Qiu Jian also knew that the purpose of this experiment was to find the Higgs boson. Lu Qiu Jian’s words just now were a blessing to Higgs; of course, even the most optimistic physicists would not expect the first This goal can be successfully completed in the second start. It is expected that at the end of this experiment, it will continue to burn a large amount of funds for the second and third experiments.

Believe in going to cern. After thoroughly understanding the various test equipments of cern, we will find out better experimental schemes. I do n’t know how Higgs would be grateful at that time.

“It seems that Professor Higgs has gained a lot!” Seeing that the exchange between them was coming to an end, Furstenberg chimed in time, “Now it’s time for dinner. How about we go and taste the unique food of Israel?”

“Haha, thank you for your invitation, I will have two drinks with Lu well later!” Higgs laughed and walked to the door, followed by Engle and Braut.

After dinner, Lv Qiu Jian did not return to the hotel arranged by the organizer, but followed Natalie to her room; after slowly picking up, Lv Qiu Jian plugged his own USB disk Entering Natalie’s USB interface, began a long debugging process, and eventually a large amount of data was sent out by him, but unfortunately because of the firewall blocking, it was not received by Natalie.

the next day. After farewell Yuan Lao, Higgs and others at the airport, Lv Qiu Jian spent a few more days in Jerusalem, and visited all corners of the holy city with Natalie. Not willing to leave.

Hu ~ It seems that I have to find an assistant to help myself deal with these trivial things! When the plane landed at Munich Airport, Lu Qiu Jian received countless interview calls as soon as he opened his mobile phone, and he hurried to deal with one. He simply turned off his mobile phone and felt depressed.

Those calls were of course intended to interview him, the winner of the New Kwulf Prize, some from the mainstream media in China, some from the comprehensive media in Germany, and some from well-known magazines in the United States. There are even sports media reporters such as “Photo”, “Team News” and so on. They didn’t even play a game. God knows what they want to interview!

“Bayern’s situation is not so good! They just lost 1 to 4 to Leverkusen in the last game.” As soon as he returned to school, Dietrich reported Bayern’s situation to him. “Three rounds, one win, one draw and one loss. Now Bayern is only ranked tenth in the standings. Magath must be under great pressure!”

“No wonder he hurriedly called to urge me to come back!” Is it to think of himself as the hope of pulling Bayern out of trouble? Don’t you need to be so nervous?

After seeing Magath, Lu Qiuqian found that the coach in front of him was not as nervous as described by Dietrich; think about it too. The next game is home battle, the opponent is still ranked in the bottom Bielefeld II. Bayern can easily win with the current lineup.

Magath’s words also cleared his doubts, “The reason why you try to participate in this game is because Bielefeld is not a strong opponent, it is suitable for your first appearance in the Bundesliga; you can hold Play with a relaxed mind. “

“Does the club have a video of Bielefeld’s game? Wait for me to take it back to study it!” Lv Qiuqian listened to the bit and asked for it.

“After a while of training, I will arrange for someone to prepare these!” Magath is also very satisfied with his attitude, “but you may not be able to appear until the second half.”

“I understand what you mean!” Presumably I want to wait for the lead before sending myself out, so that my pressure will be less.

At the end of the training, Lu Qiuqian returned to the University of Munich with a video of Bielefeld’s game and several tickets for the weekend game. The video was used for research, and the tickets were distributed to Dietrich; of course, Lu Qiuqian. There is still one left, because Patrice will come to Munich at the weekend; just let him see that he is not only playing basketball well, but also has football skills far beyond ordinary people.

At the same time, the major domestic media also saw the name of Lv Qiujian from the big list announced by Bayern in advance, and they agreed to wait with anticipation for the start of the game.

Chapter 212 - Bundesliga debut

“Substitute! Old Feng, do you say he can play this game?” Because of many interviews with Lu Qiujian, Feng Hongqi has become the focus of attention of fellow journalists in China. Some people asked when they saw the list of appearances. Road.

“I don’t know! I have watched his basketball game before, but I have never heard of him playing football!” Feng Hongqi was also completely confused.

“I heard a news!” Someone pretended to be mysterious and said slowly after enjoying the eyes that everyone expected. “I heard that Guoan’s scouts saw him playing football while visiting friends at the Beijing Normal University. At that time, I wanted to invite him to join Guoan, but I later dismissed this idea after asking for a clear background. “

“Oh, I didn’t expect that he didn’t go to Guo’an, but Bayern!” The player warm-up is over, these reporters have been idle for a while, and began to exchange their information.

“You said, is this the highest academic level among the players in our country and the world?” Someone suddenly asked.

“I remember that Socrates also seemed to be a doctor? Bol from Denmark participated in the Olympic Games? The one who won the Nobel Prize!” Someone asked uncertainly.

“Socrates received his medical doctorate only after he retired! As for Bohr, he was only the goalkeeper of the Danish ab team. It was his younger brother who participated in the Olympics, but his younger brother was also a great scientist!” Someone pointed out the error in his words!

“So that this Dr. Lu can set a record as long as he appears on the court. Of all the players who play football, the one with the highest academic level?” Feng Hongqi thought about it. It seems that there really is no higher-educated player than Lu Qiujian, right? ?

“Oh, that’s not necessarily! As far as I know, the academic ability of a player in the history of our national team will never lose to him!” A reporter wearing glasses smiled mysteriously.

“No? Someone in the national football team has a higher academic level than Dr. Lu ?!” The reporters were dumbfounded and asked quickly, “Aren’t you kidding? Don’t sell it, let’s talk about who it is!”

“Oh, don’t you even know? At the Far East Games in 1937, our country’s left-winger surnamed Qian, called Qian Weichang! For now, dare you say that Dr. Lu’s academic achievement has exceeded Qian Lao?” Once the name came out. Everyone was shocked. Although Lu Qiujiang had just won the Wolf Prize now, but to say that his academic achievements have surpassed Qian Lao, the father of modern mechanics in China, I am afraid no one will believe it.

“You are not right! Qian always received a Ph.D. in Applied Mathematics from the University of Toronto in 42 years! At that time he should have stopped playing football?” It was a reporter. There are a lot of cattle in Bo Wen Qiang Ji, and soon someone turned over Qian Lao’s resume to refute, and the reporters fell into a heated debate until the game began.

Today Bayern ’s starting lineup is 442, and the goalkeeper is still Lion King Kahn; Link, Lucio, Goritz and Law form the back line; Flins, Barak, Salihamidzic and Ze-Ro Boto partnered midfielder; Hashmian and Ma Kai partnered the striker.

Bielefeld contracted across the board as soon as the game started. Bayern couldn’t find a suitable opportunity at the moment, the game was boring, and the reporters on the side were very depressed.

Ok? A reporter who often pointed the camera lens at the Bayern bench from time to time quickly discovered a scene that surprised him. Lv Qiujiang did not observe the situation on the court as seriously as Desler, Schweinsteiger and other benches, but instead I read a book from the carry-on bag and read it with relish.

The reporter adjusted the focal length, pointed the lens at the cover of the book by Lv Qiujiang, and then zoomed in, reading the few words with difficulty, “” God Particle: If the universe is the answer, what is the problem? ” . The authors Lederman, Teresi ... “

He rubbed his eyes and looked up at the tens of thousands of fans around him, only to be sure that he was at the Munich Olympic Stadium and not the study room of a university; should he be so hard! All reporters burst into tears for a while.

“Lv, pay attention to observe the situation on the field, you are very likely to play in the second half!” Magath reminded with a little dissatisfaction, the bus that Bielefeld posed was not easy to crack at the moment, maybe he will use his arbitrary in the second half The ball!

“Bielefeld ’s current midfield passing success rate is not high, and their center defender Gabriel turns slower; if our midfield strengthens the press, after quickly scoring the ball after the opponent, the explosive power of Ma Kai . You can seize the opportunity! “Lu Qiujiang replied without looking up.

Forehead, Magath observed for another two minutes and determined that the current situation on the court was exactly the same as Lu Qiujiang said, so he stopped talking; okay. Why do you love it?

“Lv, what kind of book are you reading? Is it interesting?” Piggy Schweinsteiger turned and asked curiously.

“This is the book of the Nobel Prize winner in physics in 88, which records the process of physicists exploring the ultimate particles of the universe. The description of inner space, outer space and time before time is very interesting Uh, Bastian, what’s wrong with you? “

“I ... I ...” Schweinsteiger burst into tears. I want so much for Mao! What was he talking about?

“Makai!” Fortunately, Deisler’s screaming rescued him from the embarrassment. All the people on the Bayern bench stood up at the same time. Barack just intercepted Bielefeld’s pass and passed it directly to Makai. Ma Kai used his explosive power to throw Gabriel left foot and scored.

“Beautiful shot!” The bench was full of joy Everyone cheered for Ma Kai’s goal.

This game basically won! Magath suddenly relaxed; when he returned to his seat, he suddenly felt that something was wrong. Think carefully, eh? This goal seems to be exactly the same as Lu Qiujiang just predicted!

Does his field insight ability exceed me? If this is the case, I need to reconsider his position, and Magath is in deep thought.

In the end of the first half, Bielefeld caused some trouble for Bayern, but it was easily resolved by Kahn ’s brave play. Bayern returned to the locker room with a clear advantage.

After fifteen minutes, the game restarted, and Salihamidzic seemed to be a little unwell; this was not a critical game. Magath did n't dare to take the player 's physical risk. It seems that the replacement plan is ahead of schedule! He turned his attention to Lu Qiujiang, "Lv, ready to play!"

"Wait a moment, I'll finish reading this paragraph first!" Lu Qiujiang replied without looking up.

Chapter 213 - The national football team is expected to win the World Cup

Brushed, all the players on the Bayern bench were focused on Lu Qiujiang, buddy, you are brave enough!

"Well, sorry, Professor Lederman's description is so wonderful!" Lu Qiujiang raised his head and smiled apologetically, then put the book down, "I'm going to warm up!"

"Audience friends! We saw that Lu Qiujiang was already warming up on the sidelines!" The match was also broadcast on the court platform, and the gold commentary partners Huang Daxian and Tao Wei were specially sent. Huang Daxian noticed the situation on the sidelines. Excitedly said, "As long as Lu Qiujiang debuts, he will become the first doctor to appear in the official competition of the five major leagues!"

At this time, a player from Bielefeld who fouled Ze Roberto at the front of the penalty area was awarded a free kick. The game was suspended and Lu Qiujiang came off the bench.

"Okay, Lu Qiujiang has already played. Since we haven't got any information from him before, we don't know exactly where he played, but from the perspective of being replaced by Salihamidzic, Maga Let him play maybe a right-forward! "Huang Daxian's tone became excited." We saw that Ze Roberto gave the chance to take a free kick to Lu Qiujiang! Does he have a foot? A free kick? "

Lu Qiujiang stood behind the penalty point, bent over to pick up a pinch of grass scraps, and let it fall to the ground before he began to accelerate. This penalty point is located slightly to the right 25 meters before the penalty area and is suitable for the left foot. work hard.

"We saw that Lu Qiujiang was taking a small step to quickly run up, which reminded me of Robert Carlos' signature stunt! Shot! Lu Qiujiang's left foot was pumped hard at the bottom of the football, and the ball was like a lightning from the side of the wall. Bypass! Bielefeld 's goalkeeper did n't respond! The ball rubbed the post on the right side of the goal and got into the net nest! Lu Qiujiang scored the goal with the first foot of the Bundesliga debut! "Huang Daxian is like a machine gun Said in one breath.

“Lv Qiujian is also the third player to score in the Bundesliga after Yang Chen and Shao Jiayi!” Tao Wei added in a timely manner, “I remember that Jiayi also achieved his Bundesliga through a free kick last season. First goal! “

The fans on the Internet and in front of the TV jumped excitedly. Since Bayern Munich’s same-city team was relegated in 1860, how long has it been since the Chinese players scored in the Bundesliga?

Yay! Magath used a fist, it seems that he signed the contract this time! The first game scored. If he can maintain this efficient free kick scoring efficiency in subsequent games, all opponents in the future may not dare to foul in front of his penalty area! How do you play this game?

Soon after the celebration ended, the players of Bielefeld made another big mistake. They shoveled Frings on the left side of the front of the penalty area, and the referee once again awarded a free kick.

Just shot with a left foot. This time the free throw point is on the left side, shouldn’t the arc like that just appear? Bielefeld’s goalkeeper Hein prayed as he directed the wall.

As a result, his prayer did not work, and Lu Qiujian broke the goal again with a Sauer back kick; this goal not only expanded the score on the court to 3: 0, but also won a standing ovation from Bayern fans.

Sauer has been with Bayern for twelve years and has won the love of Bayern fans. As he grows older, he has played fewer and fewer starts, and now a young man shows this on the field How can the Bayern veterans’ signature stunts not make them excited?

It can be said. With this goal, Lu Qiujian has won the love of Bayern fans; in the following game, Lu Qiujian also repeatedly used a sharp breakthrough to hit Bielefeld’s side, and sent out high-quality pass in.

Taking photos of the power of his free kick, the players of Bielefeld are getting more and more squeezed, and Magath immediately changed into a header with an excellent ability to Santa Cruz; Santa Cruz did not let him down either. Quickly received Lu Qiujian’s side pass header and scored.

Seeing that the score had become 4: 0, Bayern had no intention of creating a slaughter, so the pace of the offense was slowed, and the players of Bielefeld were relieved.

But just before the end of the game, they forgot the painful lesson just now. An unintentional foul gave Bayern a free kick and Lu Qiujiang successfully completed the hat trick.

“In my memory, only Mikhainovic made a free kick hat trick when he played for Lazio’s old owner Sampdoria in 1998!” Tao Wei once again showed his memory. “It seems that no one has reached the Bundesliga. This achievement. Lu Qiujiang once again set a record! “

At this time, the Internet has exploded, and posts about Lu Qiujiang in major forums have been frantically updated. Tonight has become the happiest day for all Chinese fans.

These posts are simply watered, there are technical analysis of Lu Qiujiang’s free kick footing, there is a hat trick that is more difficult to compare between Lu Qiujiang and Mikhainovic ...

However, the amount of replies to these posts is not as good as a post that at first glance has nothing to do with the game. The title of this post is-“I have a plan to take the national football team to win the World Cup!”

After the post was issued, it was quickly squeezed by the post about Lv Qiujiang, and it was only a few minutes later that someone replies, “Ring ring ring. This trick is not new! Is the landlord Cuntong?”

“Who says it’s a ring set ring! My plan is higher than that I don’t know where it goes!”

“Oh? Tell me!” It seems that someone is interested!

“My plan is to make full use of Lu Qiujiang’s mathematical talents and free kick skills! With the assistance of the emperor , you will be invincible. No matter Brazil, Germany, Italy, or France, Holland, and Argentina will lose to the national football. “” Sun and Moon posted the same light and proudly revealed the mystery. “Let Lu Qiujiang serve as the captain. Presumably with his mathematical talents, guess the coins will definitely win.”

“Then the national football team can get the ball right. After the kick-off, Lu Qiujiang passed the ball to the emperor! The emperor quickly displayed his invincible ball protection stunt until the game was about to end, and then the opponent’s interference fell to the ground; The national football team will get a free kick! With Lu Qiu built in, the free kick is for us to score! This battle can certainly be scored 1: 0! “

“This is repeated a few times, it is quite easy to win the World Cup!”

When this post came out, all the fans were dumbfounded, and soon the replies brushed up.

“Landlord great talent, turn to the Football Association!”

“Approved, special day and night Xi Tongguang joined the national football team as head coach.”

“Emperor Xiao Lu’s two swords are combined, Brazil and Germany are the best!”

“.....”

Half a day later, someone weakly asked, “Well, isn’t the football game divided into the first and second half? 1: 0 in the first half, what to do in the second half?”

Chapter 214 - The secret of free kick

Fans are happy, coach Magath is even happier, he also signed a player who has never played in professional games under unclear pressure. Lu Qiuqian did not appear on the list a few times before, plus Bayern’s poor record, his pressure is even greater; but this big victory brought by Lu Qiuqian can completely shut up those pungent media. ∴

“Lv, Oliver, go to the press conference with me!” Kahn is the captain of Bayern. Lv Qiuqian is the best player in this game. It is normal for Magath to let them both participate in the press conference.
.

“Yeah, okay!” Lu Qiuqian nodded. He did not participate in commercial activities and did not accept interviews, which has caused a lot of trouble for Magath. The press conference will not delay much time. Go and go!

At this time, the most excited people at the press conference were the reporters from China. They were surrounded by German journalists and tried to dig some information from Lu Qiuqian from their mouths; but the news they got was Lu Qiuqian. Previously studying in the United States, returning to China to obtain a doctorate and later studying in Germany and other academic achievements, he also knew nothing about his football career.

“... This game Bielefeld caused us a lot of trouble, but this is Lu’s first game; Bielefeld players are not familiar with his technical characteristics. As a result of this score, maybe we won’t be as relaxed as we are today in the next game ...” Magath spoke official language with some concern.

“... We have some chances in the first half. In the second half, Lu’s debut completely disrupted our plan ...” The opposing coach couldn’t help but praised Lu Qiujiang.

The coaches of both parties concluded their summary, and it was time for free questioning; the news officer’s voice just fell, and countless arms were raised. He glanced around and clicked a familiar reporter. “Please” Kicker “magazine Mark’s question. “

A bearded German middle-aged stood up. He took the microphone and turned his eyes to Lu Qiujiang. “I want to ask Lu a question. Bayern scored three threatening free kicks in the front of Bielefeld’s penalty area in the second half, and your three free throws all resulted in scoring. Can you tell us why your free kick is so? Is it accurate? “

As soon as this question was raised, all the reporters raised their ears, and even Magath and Kahn turned their heads slightly, trying to figure out the secret of Lu Qiujiang; especially Kahn, who suffered from this in the training competition. The torture of the move will make it possible to make good coping strategies in advance next time.

“Well, the answer to this question is actually very simple!” Lu Qiujiang looked around. Pick up the tactical board and pen that Magath dropped on the table, and write and draw on the tactical board. “I think of the court as a three-dimensional Cartesian coordinate system with the free throw point as the origin! “

Lu Qiujiang first drew the origin in the center of the tactical board. “This way we can determine the coordinate value of the free throw point as (0,0,0). According to my observation of a point where the football can pass by next to the wall of 9.15 meters from the free throw point. The coordinate value is (-3,9.2, -11), the coordinate value of the football landing point on the right side of the goal is (-6.3,27.8, -23). ”

Ignored the confused eyes of the reporters and Magath, Kahn and others. Lu Qiujiang draws a parabola to connect these three points. “We bring the coordinate values of these three points into the standard formula of the parabola in the three-dimensional coordinate system, and we can get the specific equation of this parabola.”

Lu Qiujiang wrote the result of the calculation on the parabola that crossed the goal straight into the goal. “Now that we know the equation of this parabola. Then the next work will be easier, as long as

we guarantee football You can easily score goals by moving according to the predetermined trajectory! Do you understand what I said? “

The speech ended for a long time, and many reporters who heard the dizziness shook their heads in unison. “Photo” reporter responded the fastest, and then asked the press officer, “How do you ensure that the football moves according to your calculated trajectory?”

“We all know that the standard weight of a football is between 420 and 425 grams. I measured the real weight of the football when placing it; then based on simple mechanics, I can calculate where the football needs to be How much force it exerts to make the football fly according to the predetermined trajectory. “Lv Qiujian wiped the parabola and drew a schematic diagram of the force analysis of the football on the tactical board.

Then write a lot of data next to the football, and then draw a schematic diagram of the force of his left foot next to the football, “According to the result of my calculation, I want to exert force in the lower left corner of the football; so I first accelerate and borrow inertia “At this time, he wrote the acceleration formula next to him,” My speed was ***** meters / second, and my weight was 75 kilograms. From this we can get another data, combined with this data I By adjusting the kicking speed and strength of the left foot, you can ensure that the trajectory of the football flight is consistent with my pre-calculated results. “

The reporters burst into tears at the same time, press officer, we are here to attend the press conference, but we are not going to listen in the physics class of a university!

“But there seem to be some other factors that will affect the trajectory of the football flight?” There was a dull guy who didn’t notice the strange appearance on the faces of the other reporters and asked with doubt.

Slot, which media reporter is this? Why are you so ignorant? The hatred of all the reporters was concentrated on him But now that it was too late, Lu Qiujian once again wiped off the traces on the tactical board and began to write and paint.

“There are many factors that affect the flight path of football, the wind speed on the scene, the humidity of the air, etc.!” Lu Qiujian painted a blade of grass on the tactical board. “I don’t know if you noticed it. I used the blade of grass before the free throw. The free falling motion measured the wind speed. Based on the weight of the grass blade, the time of landing, and the direction of the grass blade deviation when landing, the wind speed at the scene was ***** / m / sec. Then I added this variable to the force of the ball From the analysis, we can draw a new piece of data. Based on this data, I adjusted my angle and intensity of playing ... “

The whole conference directly became the training of Lu Qiujian's mathematics and physics. A group of clever reporters on weekdays all closed their mouths, and pitifully opened their eyes to see Lu Qiujian's drawing on the tactical board. A pattern and a lot of formulas next to it.

It wasn't until the press conference ended that they recovered and suddenly began to freak out; by the way, how to write the news tonight! I didn't understand all the things he said just now!

Chapter 215 - Archimedes

I'm fucking, because he took a class like this, the whole person seems to have returned to the third grade class, his head is dizzy, and I forgot to ask him as the first Chinese player to debut on the European giants team. How it feels! All Chinese reporters lamented in unison.

Of course, those who can eat this bowl of rice are not so easily dismissed. As soon as the press conference ended, they used various means to continue to dig the news; it is okay to find Lv Qiujian's phone. I have Kahn here. , He has Schweinsteiger there, or dig some news from them!

German reporters started to get out the phone and contact Bayern players. Those reporters from China did not have such resources! However, the actions of these German journalists still gave them some inspiration, and soon they took out the phone and made random calls.

"Eh, my old classmate is me ... yes, yes, I am now a football reporter ... I have a question to ask you!" Someone found the former Xueba classmate, "You are not at Shuimu University Do you read a blog in the physics department? I have a few small questions I want to ask you! What is the parabolic equation in 3D Cartesian coordinate system and the stress analysis of football ... "

"Hello Teacher Liu, are you still at Wuyue University? ... I am the 98th Xiao Wang, I am now in Germany! I am thinking of bringing you some gifts ..." Someone found their own university teacher, "... no trouble, no trouble at all, I promise to bring it to you! ... how kind of asking for your money ... but I still I really have something to trouble you, I encountered such a thing today, the way things go like this ... "

So, on the second day, a piece of manuscript was freshly released, and some academic authorities were found to analyze the formulas drawn by Lu Qiujian at the press conference. The title is "Student on the Field"; The detailed analysis of Lu Qiujian's three free kick kicking force diagrams and trajectory calculations, and then one-to-one correspondence with his speech at the press conference, the result is that these data should be analyzed by the general school, in a short time Definitely not finished; Lu Qiujian can calculate the result in less than a minute before the free throw. 【】 And ensure that the trajectory of the football flight is exactly as expected, which reflects Superman's computing power and extraordinary body control ability.

Also dug out the performance of Lu Qiujiang and compared it with today, the title of the article is written "His nickname is a professor"! Comparing Lu Qiu's experience of using the frontier issues of various disciplines to spray **** at the Ivy League and today's press conference; seeing that, we are not only good at mathematics and physics. In-depth knowledge of biology, economics, politics and other disciplines! As for the skill of the ball, it's needless to say, the first game was staged with a hat trick, and the take-out also sent an assist. In just 45 minutes, he won the title of the best player in this round, and he is in a giant like Bayern. Dominating football is just around the corner!

Also used Lu Qiujiang to read a book on the bench as the cover. This article first introduced the book "God Particle: If the Universe is the Answer, what is the problem?" ", And then took pictures of Lü Qiujiang talking with Higgs when he received the award in Jerusalem some time ago. It is very interesting to analyze that Lü Qiujiang's next academic breakthrough may be in the field of God particles.

As for the German media, because of the long-term dealing with Bayern, there may be more channels of information. Although the interview was supplemented by Lu Qiujiang, it was dug out from the mouths of Magat, Kahn, and Schweinsteiger. Less information; therefore their article focuses more on the field.

"" Does Bayern suffer or take advantage of such a contract? "" Pictorial "uses such a title. In their article, the contract between Lu Qiujiang and Bayern was leaked out for readers to analyze, signing a person with a salary of 300,000 euros a year, who can't participate in the away game, can only work 90 days a year, and at any time. It is possible that players who are on leave are worthless!

Of course fans feel worth it! There are such free kick players on the field, which is a great deterrent to all opponents. Bayern also has Ze Robert, Salihamidzic, Lizarazu and other breakthrough players. If the opponent is afraid of fouling If you don't know what to do, these breakthrough players will teach them to be humans in minutes! As long as they have a victory record at home, the Triple Crown is just around the corner! The only problem is probably the UEFA Champions League final and the Cup final, but such a big game must have convinced the club to build Lu Qiu, right?

The media such as "Kicker" magazine and "Team Daily" also used Lv Qiujiang's identity as an academic tyrant. They listed the academic tyrants and Lu Qiujiang's progress on the courts such as Ball, Camus, Socrates, etc. Compared. It is agreed that Lu Qiujiang is likely to become the highest academic level among all players and the best football player among all academic circles.

As for the British "Sun" once again embodies the strength of their first gossip media in Europe, they hired German-speaking lip specialists to discuss Lu Qiujiang's conversation with Magath before

playing. Cracked, Lu Qiujian's sentence "Wait a moment, I'll finish watching this paragraph before I say it!" Let everyone in the editorial department break their glasses.

They naturally refused to let go of this big gimmick that could detonate sales. The savvy editor next to the photo of the conversation between Lu Qiujian and Magath was accompanied by a cartoon before Archimedes was killed by Roman soldiers. Of course, they did not forget to match what Archimedes said at the time, "You wait Kill me again and again, I can't leave the world with an incomplete formula! "

So, after losing a lot of glasses in the British Isles, Lu Qiujian had a new nickname, Archimedes.

Bayern celebrates victory here. The media worked hard to dig up all kinds of information, and Lu Qiujian came to a luxury hotel to visit Patrice, an old classmate who had not seen him for more than a year.

"Hey, man, you have to say that you are really a miracle guy!" Patrice shook his head and gave a big hug, "When I learned that you joined Bayern, I didn't believe my ears, but then I thought Just think, if it's you, it's not surprising to make any exaggerated moves. "

"I didn't expect you to know Bayern!" The two went into the living room one after another.

"Football is more popular in Africa than basketball!" Patrice poured a glass of wine to Lu Qiujian, and the two sat on the sofa and chatted.

After talking about his experience for more than a year, Lu Qiujian asked curiously, "What is the purpose of your coming to Europe this time? Can I help you?"

Chapter 216 - Diplomat Patrice

"I started working in the government after returning home! Perhaps because I was familiar with the country, I was sent to the Ministry of Foreign Affairs!" Patrice did not answer directly, but talked about his experience after graduation.

Well, as I thought, this guy is really a member of the big family! Lu Qiujian nodded and listened to Patrice's experience after returning home.

"Hey, I have to say that staying in a weak country's Ministry of Foreign Affairs is a very tormenting thing!" Patrice sighed. "In order to buy some things that our country must have, I stayed in the country for two months. , No progress has been received! "

“Oh, that’s a good thing for the guy we met at the bar in Princeton!” Lu Qiujian made a joke, trying to relieve Patrice’s depression.

“Haha! If I really meet him in the Ministry of Foreign Affairs of the United States, I will definitely humiliate him!” The beautiful campus life memories suddenly diminished Patrice’s worries, but he deeply remembered that day in the bar, Lu Qiu How did Jian use his own memory and clever words to defeat the white man who teased himself, and finally win the favor of the beauty.

“What do you want to buy? Tell me, maybe I can help you think of a way!” Out of concern for friends, Lu Qiujian asked the above words.

“You know, my country is extremely rich in petroleum resources.” Patrice put down the glass and waved his hands to introduce Lu Qiujian. “But the western oil companies used to buy crude oil, but not in me. Of the country ’s plans for the refinery; I do n’t want my country to be just a resource exporter, so I put forward a plan to establish my own smelting company in the Congo to increase the benefits that oil brings to us. ”

“You want to grab something from those oil tycoons, no wonder your lobbying in the United States is unsuccessful!” Lu Qiujian shook his head. He and Patricia both knew the influence of oil merchants on the government of the United States. There is no doubt that it will reduce the profits of oil merchants, so how can his plan in the United States succeed?

“So I failed in the United States!” Patrice shrugged dejectedly, picked up the glass and poured a full one, and then drank it, as if he wanted to use alcohol to dispel his depression.

“Then do you plan to come to Europe to try your luck?” Since the United States cannot. Then come to Europe to find opportunities, anyway, there are only a few countries that have a complete petroleum smelting industrial system.

“Yes!” Patrice’s frowned eyebrows were still not released, and it seemed that his experience in Europe was not very pleasant.

“Then you encountered the same result as the rice country?” Think about it and know that the European capitalists and the rice country are essentially the same. How can they abandon their own interests?

“They are very interested in crude oil, but no one is willing to establish an oil smelting industrial system for my country!” Patrice drank another glass of wine.

“The establishment of an industrial system in any country is full of ups and downs!” Hua Guo was also the same! When I think of Lu Qiu Jian in China, I suddenly have an idea. Will my own country be interested in these?

At this point, Lu Qiu Jian calmly digressed the topic and re-opened the basketball. The Princeton Tigers’ strength dropped rapidly after Lu Qiu Jian left. Patrice tried his best to bring the Tigers to the tournament. Unfortunately, he was eliminated in the first round.

Patrice’s performance on the court also attracted the attention of some blue-collar teams who lacked inside, but he and Lu Qiu Jian also chose to give up the nba; in his words, no Lu Qiu Jian’s nba did not attract him. force.

Until late at night, Lu Qiu Jian refused to leave Patrice’s resignation, and the two sides agreed to meet tomorrow at the University of Munich.

Back to school, Lu Qiu Jian calculated the time difference. It seems that it is six o’clock in the afternoon of Chinese time. It seems to be more convenient to call; so he found a safe place and dialed someone’s phone, “Hey. Hello, this is Lu Qiu Jian! “

“Hello, I am Lin Qianjun!” Said there for a moment.

“Well, I know you are Lin Qianjun; Pinglin Mo’s smoky forest, a thousand dollars worth of money, I and the generals to solve the battle shirt army! Is it convenient for you to speak there?” Although I am willing to help Patrice However, Lv Qiu Jian did not have the resources in this area. Second, he did not know whether this would affect the country ’s existing strategy, so he did not mention it with Patrice; he would not find a professional to consult after he waited.

“I am very convenient here, but you are there ...” Lin Qianjun’s phone is encrypted. No one can eavesdrop, but Lu Qiu Jian cannot guarantee it here.

Lv Qiu Jian’s phone is also modified by himself, and the safety performance is better than Lin Qianjun’s, “I have no problem here. This is the case ...”

“Wait a moment, tell me your address, and I will arrange for someone to send you another phone call immediately!” Lin Qianjun interrupted his words without waiting for him to finish, and he did not dare to take risks.

Less than half an hour after saying his address, a middle-aged man with an unremarkable appearance knocked on his door silently passed an ugly phone. “I’m waiting outside and I will get back the phone in half an hour.”

Ha ha, did he think I should be so cautious about what information I want to send him? However, this matter does not seem to be suitable for others to know. Perhaps it was reported to him from there. Before he dialed the phone, it rang automatically, and the voice of Lin Qianjun was heard across the face from the answer button. “Dr. Lu, hello.”

“This is the case. When I was in Princeton, there was a classmate ...” Lv Qiujian also knew that there was no need to deal with them. Moreover, during the time when the phone was sent, they probably knew they had been in contact recently. Who has passed, so I went directly to the topic, “... so I want to ask if we are interested in this matter?”

“I need to report to my superiors!” His answer did not surprise Lv Qiujian.

“Well, okay, but hurry as soon as possible! He doesn’t expect to stay long!” Lu Qiujian said with a lip.

I do n’t know whether it is because the other party ’s work efficiency is indeed very high, or whether China ’s demand for resources has reached a very urgent level; after three days, the middle-aged person who sent the phone visited again, and there were another 30 who accompanied him. Years old.

“Dr. Lu!” The young people greeted him politely. “We are very interested in what Mr. Kabila said. I don’t know when it will be convenient to see him?”

Chapter 217 - new method

The victory of this game raised Bayern’s ranking to fifth place. Lv Qiujian also made it to the shooter list with that half-court hat trick. He was listed by long-known shooters such as Neuville and Klose.

Just as the reporters were looking forward to going to Dortmund to wait for another wonderful performance by Lu Qiujian, they found out that there is no Lu Qiujian’s name in the 18-member roster announced by Bayern.

It seems that the contract that “Picture News” broke out is true! All the reporters lamented in unison, especially the reporters from China; the match between Dortmund and Bayern was considered to be a meeting between the two strongmen, and German journalists still have a lot of content to write about; what can Chinese journalists do? Who does not care about the news of Lu Qiuqian except for these two diehards!

“What book do you say you have such a good talent! Isn’t it more profitable than playing a doctorate to play football?” A reporter who just arrived in Germany couldn’t help but spit.

“Hey, who makes people more academically gifted!” Feng Hongqi knows Lu Qiuqian’s experience better than them. “Playing football is probably an amateur hobby for others! If you really want to earn money, It’s better to go to NBA, where the salary is much higher than the Bundesliga! “

If Lu Qiuqian participates in the draft, the first three will definitely be able to get it. The salary is estimated to be between 4 million and 5 million US dollars, more than ten times the Bundesliga.

“The youngest winner of the Wolf Prize in Mathematics and the First Prize of Natural Science in China in history. It is a waste to play football with such a person!” A reporter from a comprehensive media followed the rebuttal, no matter where Lu Qiu was built. In the field, he can use it to write manuscripts without delay.

“I’ll go back to Munich! Go to the University of Munich and see if I can interview him!” Someone packed up and prepared to leave, and then more people began to prepare to return to Munich. After a while, Kung Fu here Chinese reporters have only two or three big cats and kittens left.

Lu Qiuqian and Patrice are now tasting German-specific cuisine in a well-known restaurant in Munich. Neither of them brought anyone else; Patrice ’s face did not have the depression of the previous days, “Thank you You, Lu! If not you. I really do n’t know what to do next! “

The contact with Huaguo was very smooth in the past two days. The two parties have concubines and concubines, and they quickly joined together ... Oh no, a series of cooperation intentions were reached; the specific contract terms still require further cooperation from both parties. contact. But being able to get in touch with China is already a pleasant surprise for Patrice.

“Don’t be too happy, there is nothing in the world that you can get for nothing.” Lu Qiuqian warned, “If you want to get the oil industry system, you must prepare for other responses; I think there are many people I do n’t want to see you change from a resource exporter to an industrial exporter! “

“Yes, I understand this!” Patrice said solemnly. “My companions and I will be prepared to respond!”

“Okay, don’t say this, say something happy! For example, have you met a new girl recently?” Seeing that he was prepared, Lu Qiu established a moment to bring the topic aside, and she didn’t want two old classmates. The meeting became an international situation analysis meeting.

Across the strait, Edinburgh, Higgs called the assistant’s phone for the third time today, “Did the Physics Review Letter arrive?”

“I’m sorry, I have called to confirm, the postman’s car is broken. You may need to wait for a while.” The assistant explained sweatingly.

“Why do you have to wait for the postman to deliver it! Mr. Moore?” Higgs couldn’t help but feel sad. Do you have to arrange this little thing yourself? “

“I’ll drive out immediately!” Suddenly there were murmurs such as moving of the chair, things falling on the ground and screaming and crying on the other side of the phone. It sounded like Mr. Moore had hit his leg.

Higgs shook his head depressed and hung up the phone. Fortunately, the staff of Cern would not have no initiative like Mr. Moore, otherwise he would not have to expect the discovery of Higgs boson.

“Professor Higgs, this ... this is the magazine you want!” Half an hour later, Mr. Moore panted open the door of Higgs’ office, holding several identical magazines in his hand.

Higgs grabbed the magazine from his hand, quickly flipped through the article found by Lu Qiu Jian, and hurried through it before raising his head to thank Moore. “Thank you, Mr. Moore! Now please send all the members of the data analysis team to me now!”

“Yes, sir, do it now!” Is there any great article in this issue of the magazine? Why is Professor Higgs so excited? While making random guesses, he quickly ran to the site of the data analysis group.

“Gentlemen. Look at this article!” With a snap, Higgs put Lu Qiuqian’s article in front of them, holding the table with both hands and staring at the person in charge of the data group, “Mr. Napier. And tell me how long it will take you to learn the new method in this article after reading it!”

“Okay. I’ll watch it now!” Napier took the magazine and distributed it to the team’s backbone, and then opened the rest of the found articles and studied it carefully.

“Huh! Which laboratory’s result? Cern? Oak Ridge? Helmholtz or Kurchatov?” Just a few glances, Stokes, who has the deepest math skills in the team, couldn’t help but surprise. Asked, “This method looks very feasible! It can greatly improve the current work efficiency!”

“University of Munich, Professor Xuft’s laboratory!” Higgs knocked on the signed position, “I met an interesting little guy in Jerusalem this time, this article is his work!”

“Munich? Jerusalem?” Stokes could not understand why these two places were connected by Higgs, and then looked at the author’s name carefully before they realized, “This is the result of Lu Qiuqian! No wonder you will meet him in Jerusalem! “As a researcher from the Department of Mathematics, Stokes certainly knew that Lu Qiuqian had won the Wolf Prize.

“The old guy from Xuft was so lucky!” Higgs’ jealous eyes were about to burst into flames, if Lu Qiuqian could read the blog under his own hands.

After reading the article, several backbones of the data group joined together and discussed in a small voice. Finally, Napier wiped his sweat and stood in front of Higgs. “Mr. Higgs, this article is based on the method described is indeed feasible. “Before Higgs was happy, he remarked,” But with this article alone, we seem to have no way to master this method ... “

Chapter 218 - Professor Xuft’s troubles

“What is the problem?” Higgs stood up. When he was at the Hebrew University, listening to Lu Qiuqian’s explanation, it seemed that all the issues that should be considered were taken into account?

“Well, you know, maybe it is limited by space. This article only describes the outline of the method. Many details have not been shown one by one, which makes us lack specific steps!” Napier replied helplessly. “So at least now we can’t work according to the method he described.”

“If we improve ourselves, I estimate that it will take at least a month to come up with a rough implementation plan!” Stokes added, “so, if possible, I hope you can invite Mr. Lu to Edinburgh to give us a detailed explanation!”

This reason left Higgs with nothing to say. I knew Professor Furstenberg had already asked him to record a video at Hebrew University! “Okay, I’ll try to contact Professor Xuft!” Higgs waved them to signal that they would go out first, and then picked up the phone.

Well, I should say so to the red nose for a while, while wondering how to open the door to invite Professor Xuft and Lu Qiujian to communicate in Edinburgh, while dialing his number.

Beep ~ beep ~ The prompt tone during the call disrupted Higgs’ plan. He threw the phone down on the desk in depression, turned the phone twice in the office and dialed the number again; yeah, still on the phone!

The same is true when calling Lv Qiujian, is this a pizzeria ordering phone? Why is it so hard to beat! Even if it’s a pizzeria ordering phone, it’s not a meal time now! Professor Higgs became more and more depressed.

“Hello, Director Chen.” Just after hanging up a phone call, it was too late to drink. Lu Qiujian’s mobile phone rang again. As soon as he saw the name on the phone, Lu Qiujian immediately pressed the answer key to greet him respectfully.

“I said Xiao Lu, you don’t mean enough! I haven’t said anything in my high-energy facility for so long, I just made such a big move when I arrived in Germany!” The director pretended to be angry. “I read your article in” Physical Review Letters “, which is also very useful for our high-energy institute!”

“You can’t say that!” Lv Qiujian quickly called out injustice. “When I was staying with us, I didn’t give you the hard work; the upgrade plan before I left was much earlier than you expected. You can’t be wronged me!”

“Haha, since so many contributions have been made for high energy, can it be more!” Director Chen laughed, “Do you think you are returning to China or I’m sending someone to Germany? You have to put this This method is complete for our church! “

It seems that Director Chen encountered the same problem as Higgs. This method has greatly improved the efficiency of data analysis in high-energy physics experiments. However, it is not just a matter of reading the article, but also on-site counseling by Lu Qiujian.

I do n't know yet. It 's the first few calls that Lu Qiuqian received today about this issue. He immediately replied in the same language as before. "I 'm afraid I have to listen to Professor Xuft 's arrangement for the specific time. Just now Xu Professor Fut and I have already received several such calls, and I will let you know as soon as possible as soon as there is a result, okay? "

"It seems that everyone's efficiency is very high!" Director Chen sighed, "That's all right! You have to rank our high-energy institutes in the first batch!"

At this time, Lu Qiuqian was in Professor Xuft's office. Professor Xuft just watched what he was about to say when he hung up, and the phone rang again before he opened his hand.

Professor Xuft shrugged helplessly and pressed the answer button. "Hello Professor Penny Cook!" Because there are so many calls today, Professor Xuft has no strength to deal with his colleagues, too lazy to ask the Oak Ridge National Laboratory where the other side is recently new. The action went straight to the topic, "Did you just call because of the article in" Physical Review Letters? "

"Yes, Professor Xuft!" The other party said with excitement, "I want to invite you and Dr. Lu to come to Oak Ridge for a visit and exchange. I don't know if you have any time recently?"

"If it is at other times, I will be happy to accept your invitation!" I knew that, Professor Xuft and Lu Qiuqian looked at each other with a wry smile. This is already the first few invitations he has received today. If every Both promised that they would not have to do anything else for the rest of the year!

"How? Have you agreed to others?" Penny Cook's voice immediately became irritable. "Which laboratory? Or a college?"

"No, no, I didn't agree!" Professor Xuft quickly denied, "It just seems that there are too many people calling us to invite us, so I want to put all those who want to learn this method together. Make a speech. So everyone can save time! "

"Great idea! If the time and place are confirmed, please let me know!" It was emphasized several times that Penny Cook hung up the phone.

"I said Lu, when have you been recently ..." Before he finished, he was interrupted by the knock on the door.

“Oh my God. Rikov! Can’t you knock on the door a little lower!” After a long phone bombing, even the good-tempered Professor Xuft couldn’t help complaining.

Professor Zikoff squeezed through the door crack can tell from the name that he is a Slavic origin Work, is he also for that article.

“Professor Xuft, your phone is too difficult to get through, so I came directly!” He ignored Xufut’s complaint and walked straight to Lu Qiuqian, “Mr. Lu, follow me to Physics to make a report. ! “

“I knew that!” Professor Xuft fell into a happy worry. His laboratory’s achievements were gratifying, but the constant phone calls throughout the day were too annoying! Now that Rikoff has come to the door, the next one is not far away.

“Sorry, Professor Xuft has other arrangements for this matter!” Lv Qiuqian smiled and refused the invitation of Rikov.

“Professor Xuft? ...” Rikov turned his head and was about to ask, but saw that Xuft picked up the phone again.

“Hello Peter!” Hearing the familiar voice on the phone, Lu Qiuqian raised his ears as if it were Higgs.

“Thank God, I finally got through the phone! Hillman, do you know how difficult it is to get through your phone! I’m from ... fuuk! How did it break again!” As soon as it was connected, Higgs had a series of calls He complained, but he didn’t wait until he finished complaining, and the phone hung up again.

“Well, it seems that there are too many calls because of too many calls!” On the Munich side, Xuft innocently shook the phone that had been blank.

Chapter 219 - Lecture location CERN

While Professor Xuft was scrambling to find a charger, Higgs’ phone was called to Lu Qiuqian’s cell phone again, and he naturally explained it again. ※%

“Is there no power to answer the phone?” Hey, it seems that his plan to invite them to the University of Edinburgh will be overwhelmed; Higgs immediately understood the current situation of Xuft and Lv Qiuqian. Since there is no way to invite Edinburgh, then There is only another place, “Have you determined the time and place of your speech?”

"I'm answering the phone all day today, and I haven't had time to consider this matter!" Lv Qiujian said the truth. Before the article was published, Professor Xuft's plan was to invite the University of Munich to communicate if anyone was interested. , Now it seems a bit inappropriate.

"How about going to cern if you are not sure?" Higgs made his own suggestion. Cern is the center of high-energy physics in the world, where it has the world's largest data analysis team, and it has many connections with other high-energy physics laboratories. Choosing this place is perfect.

"I will pass on your opinion to Prof. Xuft!" I thought about entering cern before I came to Europe, but I didn't expect the opportunity to come so fast; since it was built, the search for the Higgs boson has become it The most important task, Higgs has a considerable influence in this research center, it is appropriate for him to bring himself in.

"Are you with him? If you are together, give him the phone!" Higgs felt depressed again. If Lu Qiujian had applied for his doctoral student, how good!

"Okay!" Lu Qiujian handed the phone to Xuft, and explained that it was Professor Higgs at the end of the phone; Professor Xuft received the call, "Hello Peter!"

"You lucky guy!" Higgs couldn't help saying jealous words, "Oh, are you ready to hold an exchange meeting? Where are you going to hold it?"

"Munich is very good!" There is not only the University of Munich. There are also research institutes related to high-energy physics, such as the Technical University of Munich, the Max-Planck Institute of Physics, etc., which can also be regarded as a city with high influence in high-energy physics.

I also think Edinburgh is more suitable! Higgs shook his head depressed and swallowed the words of his stomach, and persuaded Professor Xuft, "Silman, I think it's better to change the location to Geneva! Even if you expand to the world, you may not find it here. Looking forward to the city of this exchange! "

For these researchers of high-energy physics. Geneva is synonymous with cern; indeed, even if Professor Xuft has traveled around the world several times, he ca n't find a place with more high-energy physics researchers than the west of Geneva.

“Where is Rolf?” Professor Xuft and the director of the research center of cern Rolf-Hoyle are also old friends. Due to work, he often goes to cern. It can be said that Geneva is second only to Munich. Familiar city.

“Yes, I will talk to him later, and I think he will be happy to welcome you and Lu Qiu Jian!” Higgs continued to follow the temptation, “Think about it, Hillman; global high-energy physics experiments The rooms are all looking forward to this exchange. Is there a place more suitable for hosting than cern? “

“Are you sending an invitation on behalf of cern?” Xuft asked half-jokingly and half-seriously. In the normal order, cern should send out the invitation first, isn’t he promising?

“I’ll contact Rolf immediately!” Higgs saw Xuft’s tone loose, and said decisively that there was no reason to disagree if he wanted to come to cern.

“So okay, you go to discuss with Rolf, and I need to study with Lu!” Xuft said, hung up the phone and looked back at Rikoff, “I’m sorry. I’m afraid Lu can’t go to Parkes-Pu The Ranke Institute of Physics! “

“Is it Geneva?” Xuft just called and did not evade him and Lu Qiu Jian. He heard some information faintly. “If that’s the case, I think I’m going back to contact cern for an invitation letter!”

With the status of Marx-Planck Institute, it is fully qualified to participate in this exchange. The only question is how many places can be obtained. Now, while the other institutes around the world have not yet responded, we need a few more.

“Lv, what is your opinion? This time it’s all your credit. The choice of the place of communication should still be based on your opinion!” Xuft asked for the first reason, even though Lu Qiu Jian refused to refuse cern. His opinion.

“I want to go to cern for a long time!” Jingcheng High Energy Institute has already excited myself. I don’t know how it feels when I get to the place that is countless times larger than High Energy Institute?

“Then the problem is all solved! We just need to wait for the fax from Rolf!” Professor Xuft will turn on the mobile phone that has been charged for a while, and then retracts it when the finger touches the phone; Now that things have been determined, let yourself be quiet for a while!

“I wasted another day!” Professor Xuft shook his head helplessly. Instead of getting the phone, put on your jacket and get ready to go out, “Go, go back and have a good rest, let the assistant handle the call like this tomorrow!”

The little Lu of Higgs was very tall, cern sent an official fax the next day, inviting Lu Qiujian to go to Geneva for academic exchanges.

Professor Suft and Lu Qiujian discussed for a while, and set the time on the weekend of the next week. After all, scientists in major research centers around the world still have time to fly to Geneva.

After cern announced the time of the exchange meeting on their official website the contact phone they left was quickly exploded, and consultants who spoke different languages such as English, Russian, Japanese, Chinese and so on Consultation meeting arrangement, request invitation letter; looking at the growing registration list, cern has changed the venue of the exchange meeting again and again. Moving from the hall of 500 people to the hall of 1,000 people seems to be unable to meet all the applicants. Demand.

Not to mention hotels and vehicles, so that the intern trainees expressed their emotions, “What is happening? Is the Higgs boson or dark matter discovered?”

And Lu Qiujian also ushered in good news at this time. After this week’s tactical training, Magath patted his shoulder cordially, “Lu, you will be the starter next time!”

“Uh, sorry, coach, I’m going to Geneva next week, I’m afraid I can’t play!” Lu Qiujian said apologetically.

“What are you going to do?”

“Go to give lectures to all high-energy physics institutes in the world!”

Chapter 220 - On the train

I’m going to chihuahua! Magath again burst into tears, Xiao Lu, do n’t be so capable, OK! It’s self-evident to think of a normal Bundesliga game as compared to teaching a high-energy physics institute all over the world. Magath couldn’t even say what he tried to persuade. ☆ →

“I’ll be busy this week, maybe next week!” Lu Qiujian was also a little embarrassed, and quickly expressed comfort. “Besides, I can’t play now and just save time to participate in the future Champions League! Bayern’s strength this year Very strong, we can make a big difference in the Champions League. If time permits, I will consider participating in a few knockout road games and the final in Istanbul! “

Indeed, Bayern ’s lineup is not much better than other giants. Goalkeeper Kahn is always strong, the defender has both offensive and defensive lines, midfielder has Barak at the peak, and the forward has a terrible Ma Kai in the state; he also has Real Madrid of the seven superstars is stronger than them on paper, but the name of Real Madrid Champions League sixteen Lang has just passed out! These seven superstars not only have no way of summoning the Champions League trophy, they have been eliminated from the beginning of the playoffs every year since 2002, Bayern’s hopes this year are indeed not small.

“That’s the way to go!” Magath said in this remark that he was heart-wrenching. When he was a player, he won countless championships. The Bundesliga, the Champions League and the Winners’ Cup won all the championships. I only won the runner-up in the Bundesliga in 2003. Although the start of Bayern this year was not smooth, the team’s condition is getting better day by day. He is full of confidence in this year’s Bundesliga championship, but the Champions League is different. Things can happen, if Lu Qiujian can participate in this stage of the game, Bayern’s hope will be greatly increased.

“I will do my best, I wish you a smooth weekend!” Blessing is over Lu Qiujian has left, and he dare not give a positive commitment now. If there is a conflict between the Champions League game and the research breakthrough, he will undoubtedly choose the latter.

Back at the University of Munich, I just met Dietrich and others packing up. When I saw him come in, Dietrich quickly said, “Lu, the train ticket has been bought! First seat! Depart tomorrow morning and expect to arrive in Geneva in the afternoon! You Is there anything I need to clean up for you? “

“Well, why don’t we take a plane?” Lu Qiujian was a little puzzled. It seemed that there was no direct train from Munich to Geneva by train. You need to transfer from Stuttgart or Innsbruck. Is it a bit troublesome?

“Because Mr. Professor doesn’t like to fly by plane!” Karl shrugged and began to tell Lu Qiujian the gossip of Professor Xuft, “Mr. Professor’s father was a fighter pilot during World War II and was shot down by the Allies when the war was about to end He died, so every time Mr. Professor took a plane, he would think of his father. In order to avoid the sadness of Mr. Professor, we will choose other modes of travel unless we have to!

“Thank God, the location of this meeting was not arranged in the United States!” Now Lu Qiuqian somewhat understands how Professor Wenger has a headache for Bergkamp, and it is better to go to Geneva, which is about eight hours by train. Do you have to cross the Atlantic by boat when you go to the United States?

“I’m definitely going to take a plane to the United States! But probably for this reason, Professor Xuft rarely visits the United States!” Ludwig comforted. “Lv, you don’t have to be too depressed. The road from Germany to Switzerland The scenery on both sides is very beautiful! There are even many tourists who choose to take the slow train to enjoy the beautiful scenery along the way, but this is not available by plane! I promise you will not be disappointed! “

Well, Lu Qiuqian instantly thought of the scene of crossing the Ozark Plateau with Natalie. It would be nice if she could accompany herself to Switzerland this time! Unfortunately, her current class is also very busy. I had to wait for the next opportunity.

Early the next morning, people took the laptop and other things necessary for the meeting to take the Munich University car to the train station and prepare to go to Switzerland.

At the same time. Bayern’s 18-man list against Freiburg will be announced again. Lv Qiuqian still does not appear on the big list! The reporters from Huaguo were depressed again! Did n’t you say good home games will be played?

“Excuse me, Mr. Magath, why didn’t Lu Qiuqian participate in this game?” They flocked to the periphery of Bayern’s training ground to block Magath. The tone of the question was not polite. Be biased!

“Lü is going to Geneva this weekend, so he didn’t appear on the big list!” Magat explained with difficulty.

“What’s the matter with him going to Geneva?” The UEFA headquarters is in Bern and the FIFA headquarters is in Zurich. Why did Lu Qiuqian go to Geneva?

“He will go to the European Nuclear Research Center to give lectures to the Institute of High Energy Physics all over the world!” The voice just fell, and the reporters suddenly became silent. This style of painting is a bit wrong!

Ha, seeing the shock of this group of reporters, Magath quickly took the opportunity to slip out, they finally realized my mood yesterday!

“Shall we chase Geneva to interview?” The reporters were a bit undecided. If there was a game, they would have to chase it even if they were far away, but we couldn’t understand this scientific conference!

“Go!” Several journalists with strong media made up their minds. Since Lu Qiujian’s debut in Bayern, the sales of his own media have skyrocketed. Should this be a big move? Don’t miss it!

Lu Qiujian and others have completed the first phase of the journey at this time, get off from Stuttgart and re-board the train to Zurich. After arriving in Zurich, they will back up again to the final destination Geneva.

When Lu Qiujian and others entered the carriage, they soon attracted the attention of a young black-haired young man in the carriage; hey, he seemed to be also a Chinese! And it seems familiar, where have you seen it?

The train continued to move. Lu Qiujian, Dietrich and others listened to Professor Xuft’s experience of communicating with the Federal Institute of Technology in Zurich, and asked one or two sentences from time to time.

Can’t hear the German accent! Am I wrong? The young man retracted the raised footsteps again, wondering where he had seen the person’s picture again?

After a while, Professor Xuft was a little tired, and he began to lean on the chair and closed his eyes to refresh himself; Lu Qiujian and Ludwig came to the vehicle connection to move.

Let’s ask, the young man made up his mind and walked over!
