Chapter 261 - The greatest physical discovery in the 21st century

The exploration of new particles in the physics session is carried out in this way. First of all, there are well-known particles and processes, and then they are used to detect “new particles”. Scientists have no way to observe this so-called new particle. They just know that once there is this particle, You will see different signals in the experiment. These particles are the result of self-consistent theory and experiment.

When they speculated about the properties of this “new particle” and knew its mass, width, spin, etc., they added this particle to the model to simulate and experiment with the detection of the next “new particle”. Constructed the current standard model and experimental framework of particle physics.

There are currently sixty-two particles in the standard model, including twelve kinds of lepton such as electron, positron, electron neutrino, and anti-electron neutrino. Lepton refers to spins that do not participate in strong interaction / 2 of the fermions.

There are also thirty-six kinds of quarks, such as red quark, green quark, blue quark, anti-red quark, anti-blue quark, and anti-green quark, which are the basic units of matter.

Finally, there are 14 types of gauge bosons such as photons, graviton, w^+ boson, w^- boson, and Higgs boson. They are medium particles that transfer basic interactions, and their spins are integers.

At present, twelve kinds of lepton, thirty-six kinds of quarks and twelve kinds of gauge bosons have been experimentally confirmed. Only the Higgs boson and graviton have not been discovered, but their properties have been theoretically Physicists speculate that the graviton is defined as a boson with a spin of 2 and a mass of zero; the Higgs boson is a boson with a spin of zero.

Therefore, as long as the properties of the Higgs boson are observed in this experiment, it can be proved that the particles long sought by physicists are real.

The set of data discovered by Dietrich came from the observation of cms. Lu Qiujian converted it to a picture where the vertical axis represents the number of events observed for a pair of photons, and the vertical axis represents the quality. It can be clearly found in the quality When the interval is $125.3 \pm 0.6\text{gev}$, the number of two-photon yields increases significantly.

This phenomenon is fully consistent with the current speculation on the properties of the Higgs boson, in other words, this is the conclusive evidence of the existence of the Higgs boson!

The people present, from Professor Xuft to Ludwig, were familiar with the attributes of the most Higgs boson. When they saw the results shown on this chart, they all held their breath. The heartbeat suddenly accelerated, and they knew that they were witnessing the greatest physical discovery to date in the 21st century!

“This is ...” Dietrich was so excited that he couldn’t even speak clearly, when data analysis began. He looked forward to this moment, but when he did arrive, he found that he was not ready to accept it.

“Yes! This is the evidence of the existence of the Higgs boson!” Lu Qiujian stood up and patted Dietrich’s shoulder hard, “You made a great discovery!”

It is true that even without Dietrich, others will find out sooner or later. Because the data produced by this experiment that can prove the existence of the Higgs boson is definitely not only such a set, but it also cannot deter the credit of Dietrich.

“Congratulations, Dietrich!” Professor Xuft came over to hold his hand, and after a moment turned right to Lu Qiujian, “Lu, congratulations to you too, if we don’t have you, I’m afraid we have to wait a long time before we can do that. a set of data!”

Yes, without Lu Qiujian insisting on changing the experimental plan, without him improving the efficiency of data analysis. The Higgs boson must not be discovered so soon.

Ludwig, Karl, Frederick and others came over to hug Dietrich and Lu Qiujian, and sent them their congratulations, the laboratory suddenly turned into a jubilant ocean.

“Now, let’s send this result to cern!” After a short celebration, stimulated by this great discovery, everyone’s fatigue was wiped out, and Lu Qiujian prepared to send this chart to the grid data In the center, everyone else went back to their seats to continue searching for data.

Since the Higgs boson really exists, then there will definitely not be only this set of data. Dietrich found this unique set of data from the observation data of cms. There are data from other observers

such as atlas! The more data found, the thicker the evidence, the more likely it is to prove the existence of the Higgs boson.

The end of the delivery, Lu Qiujian did not care about the current time. Dr. Evans' phone was dialed directly, and the phone rang for a long time before it was picked up. Dr. Evans was not awakened by anger, and there was an excitement in the trembling voice, "Hey, Lu. Yes. New discovery? "

"Yes! We found a very special set of data in the observations of cms. When the mass interval is $125.3 \pm 0.6\text{gev}$, the number of two-photon yields has increased significantly!" Lu Qiujian reported this result quickly To Evans.

After hearing these data, Dr. Evans' breathing was significantly faster, and then the sound of Lv Qiujian's voice came from the microphone If the data is correct, then the Higgs boson does exist. of! "

Boom ... boom ... After a messy voice, Lü Qiujian's phone made a beeping hang-up; the first sound should be the sound of a mobile phone falling to the ground, and the second sound seemed to be someone falling, Egypt Dr. Vince shouldn't be in trouble! Lv Qiujian quickly redialed the call, but the voice from the phone was unreachable.

Just when he was going to call the other people in the experimental group to get him to quickly go to Dr. Evans' room to check the situation, a strange number came over, "Lv, it's me, I just fell. No, no, my body has no problems at all, it has never been better than now! ... My phone broke, and I am calling you from someone else 's phone The data has been sent? ... Okay, I 'll check it out immediately! "

Evans hung up the phone again, and finally the sound from the phone was a fast running sound. Lu Qiujian could even hear that Dr. Evans was wearing slippers now! It seems that he couldn't even change his clothes and went out!

With the first set of data, the second and third sets quickly appeared. After all the data analysis was completed, Lu Qiujian and his partners found several groups from the observation data of cms and atlas, respectively Evidence that can prove the existence of the Higgs boson.

"Okay, rest for one night, and we will go to cern tomorrow!" Professor Xuft said, looking at the messy children with dark eyes.

Chapter 262 - Miracle Road

“Thank you, Lv! Thank you for bringing me this good news!” The train station in Geneva, the 70-year-old Higgs, Englé, and others personally greeted Lu Qiujiang and his party. Lu embraced Professor Higgs, and then firmly held Professor Englé’s hand, “Silman, thank you for bringing the lucky messenger from the far east to Europe. € ¤”

Then Dietrich, “It is said that you first discovered that set of data? Thank you very much!”

Of course, Karl, Ludwig and Frederick did not ignore, “You are a very good team, thank you for your efforts!”

So at the entrance of the station, a group of people delayed for a full ten minutes, during which the flash light was turned on from time to time. It seems that many well-informed reporters already knew the big discovery.

Coming to CERN, this time the greeted person was replaced by Dr. Evans, first congratulated them like Professor Higgs, and then pulled Lu Qiujiang to the side, “Now the data analysis results of various cooperative units have been sent. At the grid data center, the sorting work has come to an end. Everyone agrees that the report of the day after tomorrow should be yours! “

Is this an affirmation of my previous work? Out of the habits of the Chinese people, Lu Qiujiang Wen Yanxian first humbly, “The work is carried out under your leadership, I think it is more appropriate for you to give a report!”

“Haha!” Evans was very satisfied with Lu Qiujiang’s modest attitude, but this did not allow him to change his mind. “Listen, Lu, if you don’t change the test plan, we don’t know how long it will take. The energy level is increased to the point where the Higgs boson can be found, and even if the Higgs boson is indeed produced during the experiment, the screening work will continue for a long time without your data analysis method! “

“Yes, these are all you deserve!” The second hand puller of the previous experimental group followed Evans’s topic. “You saved hundreds of millions of dollars for CERN, and more importantly, you saved us too much time!” If he had doubts about Lu Qiujiang’s ability when he first joined the group, there are still left Only the deepest admiration.

When he saw Lu Qiujiang in the experimental group, he thought that Lu Qiujiang was just to help the experimental group solve some mathematical problems. After all, he was the winner of the Wolf Prize in mathematics and enjoyed a good reputation in the mathematical world; but he did not think How much did Lu Qiujiang play in the experiment. Because experimental physics is like medicine, it is too empirical. Many members of the experimental group have worked in CERN even longer than

Lu Qiujiang's birth to date; I did not expect that in the process of formulating the plan, Lu Qiujiang was brought one after another surprise, quick report processing ability, perfect grasp of details, familiarity with the function and status of each device ... This made his mentality change from dissatisfaction to appreciation.

When the tree fern that could prove the existence of the Higgs boson was discovered, the only suspicion in his heart had vanished, and the only remaining respect for the genius and future expectations ... seemed to wait Dr. Evans has retired, and working under his staff is not bad!

"Yeah, Lv. You promised to invite Dr. Evans and Dr. Lafayette!" Higgs was also talking to him. Compared with Evans and other staff, how grateful he was to Lv Qiujiang Only more and more.

"So good!" Lu Qiujiang saw that when the fire arrived, he no longer insisted, and readily agreed, this is a good opportunity to prestige! If he was really taken by someone else, would he still regret it?

After a busy day, Lv Qiujiang prepared the speech and made it into exquisite courseware; on the third day of coming to CERN, he came again to the lecture hall where the method of data analysis was last taught.

Is also a huge audience. The only difference is that last time the audience was dominated by experimental physicists, and this time the theoretical physicists and the experimental physicists each accounted for half; the same reporters gathered. The only difference is that there were a lot of sports reporters mixed in last time, and this time I came from the world's top media reporters such as Xinhua and Xinhua News Agency. Of course, reporters like Feng Hongqi who have long followed him have also mixed up. Admission tickets.

Lv Qiujiang came to the stage and looked at Higgs and others in the center of the front row. I saw that he was nervous, even if he heard Englert's words, he was absent-minded, glancing at the large screen behind the podium, lest the title of the lecture on the curtain would be replaced by an experiment The word failure.

Hawking is being teased by the people around him. One of the happiest laughs was with the physicist Kip Thorne who bet against him. CERN's discovery of this experiment won him a hundred dollars from Hawking.

But Hawking didn't lose much after losing, he still used his unique electronic sound to play jokes with Thorne, Witten, and others, and didn't know if he had any good bet ideas.

Witten's face is complicated I don't know if I think of my own string theory that can't be verified by experiment; um, it's not right to say that it can't be verified by experiment. In fact, Witten's theory can still be tested by experiment What was verified was that the requirements of this experiment were a little more stringent!

All string theory is verifiable in principle: no matter what kind of string theory, it considers elementary particles as vibrating strings rather than point particles on the Planck energy scale, in other words, if you can treat the collision If the function scale is raised to the Planck scale, then in principle the basic assumptions of string theory can be verified.

However, the Planck energy scale is too far away from us because the gravity is too weak. The Planck energy scale is more than one trillion times the highest energy scale. With the current accelerator technology, the accelerator radius that can reach the Planck energy scale will be The solar system is still bigger, and humans do n't have to think about it when they can build a Dysonian star-level civilization. Of course, if there is an unimaginable breakthrough in accelerator technology, we can predict that unless it is frozen, Witten has little hope See this scene.

All reporters pointed their long guns and short guns at Lu Qiuqian on the stage, waiting quietly for the great news he was about to announce! Feng Hongqi's position in the corner is very emotional-no way, it is good to be able to come in at the level of the media he is in, he can't care about the quality of the position-from to the seven thousand years of math problems, from Munich From the Olympic Stadium to cern, how many miracles did the young man I knew actually create? But he can say with certainty that this time Yun will not be the end of this young man's miracle.

Chapter 263 - Nobel Prize has no suspense 15/34

"Ladies and gentlemen, welcome to r!" Lu Qiuqian walked slowly to the podium, his eyes swept over the crowd below, and many famous physics figures sat on chairs and screens He listened quietly to his speech.

There are fourteen Nobel Prize winners, six Wolf Prize winners, and four Planck Medal winners. Oh, yes, maybe it wo n't take long for the number of Nobel Prize winners. Will rise to seventeen!

The lobby was already packed tightly, and some late workers could only sit on the ground. They all stretched their necks and looked at Lu Qiuqian on the stage.

"Today, here, I will announce a great and milestone discovery on behalf of r!" Withdrawing his gaze, Lu Qiuqian directly cut into the topic of the speech, and then the screen behind him showed the title of the speech-about Analysis of some data in this experiment.

“Before the official report, I want to talk about the history of physics.” The page turned, and a portrait of an old man appeared on the screen. Lv Qiujian faced Stephen Weinberger, a professor of physics at the University of Texas at Austin, under the stage. Nodded, “Weinberg published a paper in 1967, pointing out that all objects are composed of two basic and indivisible particles of lepton and quark, and tried to interact with three kinds of interactions in nature except gravity. Force-The electromagnetic interaction force, strong interaction force and weak interaction force are unified. “

“The standard model established by Professor Weinberg is as ambitious as its name means that everything we can see with the naked eye, no matter how complex and diverse, is composed of a small group of basic particles that interact according to the same simple rules. And it ’s constructed. ”Speaking here, Lu Qiujian shrugged.“ Unfortunately, Professor Weinberg ’s paper did not receive a citation within three years after the publication of the paper. It was not until the prediction of the “neutral flow” was first confirmed by experiments. Attach importance to academia. “

“60 of the 61 elementary particles it predicts have been successfully discovered, and the remaining one is the Higgs boson. But this fish that is missing. It is precisely the foundation of the skyscraper of the standard model.”

“Because the standard model is established with canonical symmetry, according to this symmetry, some elementary particles themselves cannot have mass, otherwise the entire model cannot be unified.” Hearing the attention of physicists here from Weinberg to Greek Gus. “Professor Higgs proposed that at the beginning of the universe, the field generated by the Higgs boson interacts with elementary particles, thereby giving them mass.”

“Professor Higgs’ theory saved physics, which allowed us to understand why the universe is composed of mass particles. At the same time, it maintains beautiful symmetry. We believe that the Higgs boson is the origin of mass in the vast universe. An indispensable link. “

“Of course, the great significance of the Higgs mechanism is not only these. The qd mass generation mechanism, together with the space-time dynamics proposed by Mr. Einstein, the quantum gauge field completed by Mr. Yang Zhenning and Mr. Mills, has become the three supporting substances and interactions. Basic pillar dynamics model ... “

Although everyone in the lecture hall except Feng Hongqi can understand the knowledge described by Lu Qiujian, they all listened attentively at this moment, just like the pupils who listened to the class seriously, because understanding a theory is It’s one thing, and it’s another thing to witness this theory confirmed by experiments.

“Okay, let’s get to the topic!” After talking about the great significance of the Higgs boson, Lv Qiujian turned the courseware to a chart transformed by the set of data found to prove the existence of the Higgs boson. That page, “In the experiment not long ago. We tried to increase the energy level of the collision to 8. This experiment produced some interesting data!”

“Through this chart, we can see that ...” Lu Qiujian slowly told the information fed back by this chart, and the physicists on the field exclaimed, when the greatest physical discoveries of this century appeared. When they were in front of them, no excitement would appear excessive.

After a lengthy analysis process, Lv Qiujian finally announced the results of this test, “We detected a new boson with a mass of 125.3 ± 0.6 GeV in the compact coils, measured by the torus instrument. The new boson with a mass of 126.5 GeV. These two particles are very similar to the Higgs boson. Although there is still not enough standard in the statistical sense to prove that the Higgs boson is indeed there. But I and my colleagues believe that with this discovery, the Higgs boson was finally proved to be a matter of time! “

Wow wow wow! Ruchao’s applause rang immediately, and all the listeners stood up. Strong applause to the staff of CERN as well as Higgs, Englert and Brout and other people sincere congratulations.

Higgs burst into tears like a child at this moment. Forty years of waiting. At this moment his dream came true. He stood up and turned his back to raise his right hand, made a fist, and then waved vigorously, like a stoppage time in the World Cup final. The players who scored the winning goal at the stage also celebrated as heartily as possible.

Englert supported the table with his right hand. I was afraid that I might fall because I was too excited, and raised my left hand to express my gratitude to the people who congratulated me.

Brout seems to have forgotten everything, only to know that grinning makes a series of unexplained sounds. Then he hugged tightly with Higgs, then Englert joined again, and the three let tears randomly swayed, laughed heartily.

The flash light kept on, and this moment was frozen in the camera. This photo will also become the front page of tomorrow’s major media.

“The deadline for nominating the Nobel Prize in Physics has not yet been exceeded. Presumably, there will be countless letters with the names of the three of them sent to the Royal Swedish Academy of Sciences after today!” Fear Papadopoulos beside Feng Hongqi said with emotion.

“So the three of them are very promising to win this year’s Nobel Prize in Physics?” Feng Hongqi’s heart began to thump, and witnessing the birth of the Nobel Prize in Physics was a rare experience.

“It’s not very promising! It’s definitely available!” Papadopoulos quickly pressed the shutter.

“Professors Higgs, Englert and Prof. Braut have been waiting for nearly forty years. The Higgs boson was confirmed by r’s great experiment. This year’s Nobel Prize in Physics has no suspense; it will certainly be awarded to these three gentlemen. Others will have to wait for luck next year!”.

Chapter 264 - Aegean Sea

“Congratulations, Professor Higgs! Congratulations, Professor Englert, congratulations, Professor Braut!” Lu Qiuqian stepped down from the stage and said in a double sentence; this congratulation congratulated their theory, It is also an advance wish for this year’s Nobel Prize in Physics.

“Thank you, thank you very much!” Higgs crowded the crowd and gave a big hug, “If not for you, I don’t know how long to wait!”

“I think you should thank Dr. Evans even more!” Still not used to the hug of a man. Lu Qiuqian broke free of his hug and pulled Evans in front of him. “Even without me, the experiment will continue one day. The Higgs boson was discovered; without Dr. Evans’ contribution, this big guy who can discover the Higgs boson does not know how long it will take to complete it.”

“Thank you again, Lynn!” Compared to Lu Qiuqian, Higgs, who often comes to Cern, and Evans, who has worked here for more than thirty years, are much more familiar.

“Congratulations, Peter, Francois and Robert!” Evans embraced them one by one, and Dr. Evans felt with emotion, even if he retired now, there is no regret!

“Professor Hawking, you don’t look like you have lost your bet at all!” Lu Qiuqian launched the crowd and just saw Hawking’s wheelchair next to it.

“If each of my defeats can bring about a major change in physics, I would rather lose a few more times, even if the losers are ruined, I will be very happy!” Hawking replied.

Unfortunately, the electronic sounds don’t hear his emotions, otherwise it might be more interesting! Lu Qiuqian pushed his wheelchair aside, and now the reporters have already embraced it, and he is still optimistic about Hawking. It would not be good if something unexpected happened.

“Professor Higgs, I just received news that Professor Kruzeman of the University of Helsinki has nominated you and Prof. Engeler and Prof. Braut as candidates for this year’s Nobel Prize in Physics after watching the live broadcast. , Do you have confidence in the award? “This is a reporter from cnn. In addition to the cern team, it seems that there are definitely a lot of journalists who are suitable for the physicists who have the right to nominate this report.

“I wouldn’t even think about it now. I just want to celebrate this great discovery with a few old friends!” Higgs pushed the microphone away carelessly and hugged Dyson who had come together.

“Who do you think is the most important job in this discovery!” The reporter climbed to the table and knelt on the table with both knees. He desperately reached for the voice recorder in his hand to Higgs.

“The work of all the people involved in this trial is very important!” Higgs replied while listening to the whisper of Dyson, “Of course, if there is no Lu, I am afraid I have to wait a long time!”

“Do you mean that Dr. Lu Qiuqian’s work is the most critical!” The reporter asked. While signaling his partner to visit Lu Qiuqian quickly.

Feng Hongqi, who was squeezed outside the circle by the five major and three thick European and American reporters, quickly turned to his notebook and quickly wrote: “Professor Higgs, the most popular candidate for this year’s Nobel Prize in Physics, believes that Lu Qiuqian’s work is his award key!”

“Dr. Lv, Professor Higgs believes that your work only gave him the chance to win the Nobel Prize! What do you think?” The reporter’s morality is almost the same. Higgs just said this This is what a beautiful journalist says.

“This is an honor that belongs to all the staff of the entire cern, and is also the common honor of hundreds of cooperation units from all over the world, such as the United Kingdom, the United States, the United States, and China. Of our citizens, it is their taxes that enable us to build such high-end equipment. “Of course, Lu Qiuqian will not be fooled, and the momentum of the third-rate star to win the fifth-rate small prize at the fourth-rate film festival is a riot. The seven meat and eight elements around this black belly reporter.

“Professor Hawking. How do you comment on what Professor Higgs said just now!” The reporter woman turned her head to Hawking with a black line.

“Lu’s contribution accounted for at most one percent of this success, but as Edison said, without this one percent, the remaining ninety-nine percent would be meaningless!” Hawking said The evaluation of Lu Qiu Jian’s work is not low.

After dealing with a few more reporters, Lu Qiu Jian quietly withdrew from the lecture hall. His purpose has been achieved. Do n’t hinder Higgs. They are the protagonists of today; of course, I believe that it will not take long before, and I will be like They are also here to accept congratulations from global physicists.

Waved at Feng Hongqi, who was squeezing over here. Put your hands on your chest and make a gesture of tapping the keyboard, then push out the door and go away.

Hey, don’t say a time, do you keep me waiting for qq? Feng Hongqi shook his head helplessly. Well, go back and hurry to the next mobile phone QQ!

Lu Qiu Jian, who returned to his room, was completely relaxed. The busyness of this time can finally come to an end; it is just taking advantage of the winter break, and find a place to relax and change the mood. It has been a while. Talley called, and enjoy the two-person world with her this time!

But where to go? Lu Qiu Jian dialed the number while searching the world map quickly in his mind, “Hi, nat, how are you doing recently?”

“Congratulations, Lu, I just came out of the multifunctional hall of the Department of Physics at the Hebrew University, and you have made amazing results!” Natalie’s tone did not complain.

“Thank you! How are you going to celebrate for me?” The globe in Lu Qiu Jian’s mind stopped rotating, then zoomed in, and a blue sea surface appeared.

“Well, what do you want?” Natalie asked back.

“How about a three-day trip? Last time we climbed the mountain together, how about we go to see the sea together?” Lu Qiu Jian began to imagine Natalie wearing a bikini.

“Ok, has the destination been decided? I’ll go to book a flight ticket!” Natalie’s surprise laughter came from the phone. Apparently, this invitation made her very happy.

“Greece, Aegean Sea, Crete! What do you think of this place?” Lv Qiujian said his destination. “I was going to leave tomorrow, but I was a little worried?”

“Worry?” Natalie bent her lips.

“In case Athena and Hera come to the world because they are jealous of your beauty, what method should I use to stop them?” Lv Qiujian’s tone revealed endless worries, and Natalie wept with joy again!

Chapter 265 - Hippo War

“Greece Islands, beautiful Greek islands!

The fiery Savor sang love songs here;

Here, the art of war and peace go hand in hand,

Dilos rises and Apollo jumps out of the sea!

The eternal summer also gilded the island,

But apart from the sun, everything has been depressed.

Kai Muse, Theo Muse,

The hero’s harp, the lover’s lute,

Originally earned a reputation on your shore,

Now it is dumb here in the birthplace. . “

In a secluded villa on Crete, Lv Qiujian stood on the balcony overlooking the sea, and gave Natalie, who was sitting on a sun lounger, sunbathing in a calm, rhythmic and reciting passionate poem.

But Natalie had a glass of local Greek wine but had not tasted it for a long time. In her eyes, only Lu Qiujian had a body-like figure like Hercules Hercules and the magnetic voice of Apollo, the **** of poetry.

Perhaps most people think that European and American poetry does not pay attention to rhythm, but in fact, it is just that the translator has insufficient ability to balance the format, meaning and rhythm in poetry translation! The poem that Lu Qiujian recites now is the most famous passage in “Tang Juan”, the representative of Lord Byron, the famous British romantic poet-“Greece of Greece”.

This poem uses a four-step iambic step. The so-called step is a special combination of accented and non-accented sounds in English poetry. This kind of step is very rhythmic when read together; plus Byron The rhyme chosen for this poem is also very particular. The friction sound “S” is interlaced with the “O” sound most representative of sadness in the heart of the American poet Allan Po, making this poem slowly sounded by the gentle breeze A storm of low sorrow and indignation.

Lu Qiujian ’s recitation brought Natalie back to the situation when the Persian king Xerxes led the invasion of Greece 2,500 years ago. Tens of thousands of warships were scattered in the Aegean Sea, and countless sails covered the sky. The Greeks are far inferior to the Persians in terms of strength and equipment.

But they did not succumb. On the land, Spartan King Leonidas led three hundred warriors to guard the hot springs and killed tens of thousands of Persian warriors; on the sea, Timmistokeri led the weak Greek navy to use Sa The narrow terrain of Lamy Bay made Xerxes flee with fewer wins and more fights.

“It’s really hard to imagine that the people here are descendants of these heroes!” Natalie looked at the lazy sunbathing locals on the beach who were unwilling to work. Said with emotion.

“When I went to Italy to race, I also went around the city. I can’t imagine those lazy and romantic Italians being the successors of the Roman Empire!” Lu Qiujian said with a shrug, if Caesar saw Italy in the two Performance in the subworld. I’m afraid they will crawl out of the grave.

The Greeks are also similar to the Italians. In the later generations, Lu Qiujian was impressed by the fact that they played the European Union with the European Union. But then again, the people who have maintained a strong fighting spirit since thousands of years ago are really rare, except for the Chinese!

After reciting the poems, Lu Qiujian returned to Natalie, picked up the glass on the table and gently touched her. “Greek winemaking has a history of more than 2,300 years. Although they are not as

famous as French wines, they also have their own unique features. Since they come, it is better to taste them carefully!”

“I used to drink red wine produced by Naousa before, but this is my first time tasting Cretan wine!” Natalie shook the glass, put the awake wine into the mouth, and then closed her eyes slowly Taste.

The two casually chatted about the characteristics of fine wines around the world. You have a glass of me, and soon finished the bottle of wine, Natalie’s face slowly began to appear after the slight red blush. It looks particularly attractive and attractive.

Lv Qiujian saw that the time had come to get up and put one hand on Natalie’s legs, one arm around her shoulders, hugged her back to the master bedroom in the villa, put it gently on the bed, and then began to take off her clothes.

At this moment, Lv Qiujian was transformed into the largest warship under Xerxes, the thick angle of the bow was raised high; and Natalie became the Greek side against the aggression, letting the narrow Salami bay slightly Open, just waiting for Lu Qiujian’s collision angle to enter the bay, he hit on both sides, trying to introduce the collision angle into the depths of the bay and then deal with it slowly.

Lu Qiujian was much smarter than Xerxes, the king of Persia, and saw the enemy open the bay but did not rush into it. A huge angle of collision was cruising at the entrance of the bay, taking advantage of the tide to slowly enter the entrance of the bay, and slowly exiting with the ebb tide, so that the ambush that had been waiting on both sides was not. Neither is retreat, it’s because of restlessness.

Repeatedly, the ambushes on both sides lost their vigilance, and in a trance of the other party, the angle of collision suddenly accelerated straight into the bay, and the thick logs were deeply wedged into the bay. Pushing the ambushes on both sides far away, at this moment, the bay seemed to squeeze the corner wider; the top of the corner was only a few millimeters away from the enemy fortress.

The cable hoisted at the bottom of the collision swept across the hills on both sides of the bay, entangled with the dense forest at the top of the hill, and the two huge rocks hanging on both sides of the giant ship beat the fortress below the bay hills fiercely. The enemy troops wailed in bursts.

The soldiers on both sides finally reacted, reunited their determination, and desperately squeezed into the middle, trying to keep the collision angle in the bay; but Lu Qiujian had expected this, and

slowly exited the bay at the time of the ebb; When the defenders on both sides were extremely disappointed, they quickly rushed into the bay again, filling the whole bay slowly.

This time it was more severe than the previous offensive. The tip of the angle of attack continued to touch the wall of the Greek army headquarters before receding again; then the offensive of the angle of attack became more elusive. The mountains on both sides of the strait suddenly changed their direction of attack when they were ready, and pointed the collision angle high to the weak defense zone that the Greek army feared the most.

If it is repeated, the waves on the sides of the mountains that have been lifted by the rapid entry and exit of warships are covered with sea water. Of course, the collision angle of the giant ship and the boulders on both sides are not immune.

Lv Qiujian's giant ship attacked until sunset, and slowly retreated when Salami Bay was unable to stop himself from attacking.

The war continued for three days, and the Persian giant led by Lv Qiujian finally conquered Natalie's Greece and completely occupied this fat land.

After reluctant to bid farewell at the airport, Lu Qiujian returned to the long-lost Munich; well, the time seems to have played two more games in the league, I do n't know how Bayern performed in these two games?

Chapter 266 - Lensing's troubles

Opened the page and took a look at the official website of Bayern Munich. In the first home game after the winter break, Bayern defeated Hamburg three to zero, and in the second game they played against Hertha Berlin and continued to rank in points. The position of the top of the list; however, because Lu Qiujian did not participate in these two games, he was reversed by Minter on the shooter list and fell to the second place. ½ ½ c [

It does n't matter, I 'm going to scrub the data for the home game against Leverkusen this weekend. Lv Qiujian closed the webpage indifferently and started to log in to 6arxiv. There are any new good articles.

The next day was the day when Bayern conducted daily tactical training. Lu Qiujian hit a taxi and went straight to the training base at the foot of the mountain.

“Oliver, where did you go on holiday? It looks like you played well .. Bastian, don't look at me with this kind of eyes. I said last time that I won't easily agree to teach you fighting skills. Aha, Lucio,

you can see from the sunburn on your body that you must have a lot of encounters on the beaches of Rio de Janeiro .. ”The enthusiastic and welcoming teammates along the way greeted each other.

“Lu, have you returned to your country? Why did you come here at this time?” Lucio apparently didn’t read the newspaper and asked still.

“Fool, didn’t you watch TV? Lu made a great show. He is going to win this year’s Nobel Prize in Physics!” Ze Roberto snapped his compatriot’s back with a slap. ≠ ⊢. (⊃ .c {o [m {

Well, I just wanted to commend you, but I heard that the words of Nobel Prize Lu Qiuqian took back his own words, and the mind of this goods is not necessarily sober than Lucio.

“Lv, can you go to Spain with us at the end of the month? Or do you still want to go to Geneva this month?” Magath asked about his most concerned topic. He was afraid that Lu Qiuqian would go to bsp this month; “This I do n’t think I need to go to Geneva so often in October! I think my experience in the experiment is almost the same! ”Before waiting for Magath to be happy, Lu Qiuqian changed his words again,“ So I ’m going to start now Theoretical research, I am afraid I still have no time to go, but I strive to participate in every game at home! “

Uh, okay, fortunately Bayern Group is the first. After entering the knockout game, they have the advantage of playing away and then playing at home; the big deal is to play conservatively when going to Bernabeu. As long as they can draw Real Madrid and return to the home Luqiu to return to the team, there is still great hope to eliminate the Galaxy fleet!

Nothing to see Magath. Lu Qiuqian then greeted the other teammates, and they all responded enthusiastically, except that Renxin still seemed to be listless. = ⊢. <.

Hey, what’s wrong with this kid? Lu Qiuqian remembered that he looked like this before the winter break. Has something happened recently? Let me ask when the training is over! Out of concern for his teammates, Lu Qiuqian made such a decision.

After the warm-up, the tactical training began, and Magat now no longer wants to fight for that position for Lu Qiuqian and has a headache. The instruction he gave to Lu Qiuqian is that you feel that it is appropriate to go to that position!

Lv Qiuqian did not disappoint him. When defending, he can always entangle the opponent’s offensive core. When attacking, he will appear in the most dangerous area of the opponent’s defense

line, and use his own skills and degrees to break through the score, or use the pass. The ball allowed Ma Kai to grab a point, and Barak put in a long shot. The side who played Real Madrid quickly lost.

of course. The strength of Bayern's substitute players cannot be compared with Ronaldo, Zidane, Figo, etc. However, the tactics of the substitute side still apply the tactics of Real Madrid. The main side can achieve such results for Magath and off-site watching Beckenbauer and others are very satisfied.

"Uli, when was Lv's contract signed?" Beckenbauer asked Hennes. When he first saw Lv Qiujiang's contract, Beckenbauer was very dissatisfied. He signed a professional game experience. No guy, is Magath's brain pumping? But now he is extremely grateful to Magath for his determination.

"Franz, Lv's contract is tied to the specific length of his doctorate!" Hennes is also aware of the problem, although the player in front of him is good. But Bayern may not be able to keep him all the time! "I consulted an old friend of the University of Munich. According to the practice of the University of Munich, he should have a graduation reply in April of 07!"

"Damn, at that time the European Champions Cup was at a critical stage. I can't bear to lose such a player!" Beckenbauer moaned his chin, thinking of a bad idea! "If the reply fails, can he only stay in Munich and prepare the thesis again?"

"Well, Franz! Do you think he can't pass the defense? If so, I'm afraid the whole of the University of Munich will be a laughing stock!" Hennes couldn't help but wiped his sweat. He also read the latest news, and actually marveled at Lv Qiujiang's weakness level, and then immediately ordered the staff of the Bayern official website to put this news on the official website, which was also marked with a large font-"Bayern players Assisted in making the greatest physics of the 21st century! "

"That is not necessarily the case, even a genius scholar may fail in his defense!" Beckenbauer was not idle during this time, he showed from the data that Heisenberg's experience in the defense almost hung up. Perhaps this can be used as a reference, "but it is still too early to say that, we can first inquire and see if there are our fans at the University of Munich!"

Not to mention that the two chairmen were thinking about unseemly activities outside the venue. Lu Qiujiang returned to the dressing room to wash after the training, and then waited for Rensin to come out at the entrance of the training base.

"Hi Michel! Can you please me for a while?" Lu Qiujiang waved his arms to greet Lunxin slowly out of the base gate in his car.

“Okay, Lu, where do you want to go?” Renxin barely squeezed a smile and stopped the car and opened the passenger door.

“Thank you, I’m in a hurry to go back to school. It’s not easy to get a taxi here! Fortunately, you haven’t left yet!” Just find a reason to explain why you stopped here!

Along the way, Lu Qiuqian tried again and again, and Lensin was all that worried. When he approached the school gate, Lu Qiuqian simply said, “Michel, I think you seem to have any troubles? It is better to say Listen to me, I have some research on psychology, maybe I can help you! “

“Ah.” Lensin looked back at the sincere face of Lu Qiuqian, hesitated for a long time, and finally seemed to be determined, “Well, Lu ...”

Chapter 267 - Good way to catch derailment (17/35)

“Let’s find a quiet place to sit!” Lu Qiuqian saw that Renxin was willing to speak, so he suggested; the environment also has a subtle effect on people’s psychology. In a relaxed and quiet environment, people are more willing to reveal their concerns. .

“Okay!” Rensin parked the car, followed Lu Qiuqian to the University of Munich, walked through the excited teaching building, the two came to a flat lawn, and found a corner with few people to sit down.

“No one should be able to hear our conversation here!” Lu Qiuqian looked around. Hey, this place can’t be compared with Princeton’s lawn! On the grass next to the Princeton dormitory, you can often see beautiful girls lying on the lawn leisurely and sunbathing, but here they are all wrapped up tightly.

Amount, it seems that the weather is still cold, and besides, it seems that the German sisters’ exposure of their bodies is not a pleasant thing!

“Things are like this!” It may be that Lu Qiuqian easily infected Lensing. He finally began to talk about his troubles. “I recently discovered that my girlfriend Dian’s behavior seems to be abnormal!”

Then he talked about some small details in his and Dian’s life, for example, recently Dian began to resist him, for example, she often giggled on the phone, etc., and then concluded, ” .. So, I doubt if Di An has a new lover! “

Poor child, this is the rhythm of being ntr! “If that’s the case, why don’t you talk to her openly and honestly? If that’s the case, you and her can break up peacefully!” Long live my breakup party!

“But Dian has been avoiding this problem!” Lun shook his head hard. “I had already asked her to marry last year, and she agreed! When the season is over, I plan to go back home and marry her! . “

Don’t say that! Do you want to completely cut your career? You dare to stand this flag! Since someone outside refuses to break up, what is the reason? Lu Qiujian slowly pondered, “I took the liberty to ask, what does Dian do? What is her economic situation?”

“When I first met her, she was working as a graphic model! But she hasn’t worked much since we lived together!” Rensin seemed to have thought about this problem, so I didn’t express anger when he heard this question meaning.

Said good European and American women insist on independence! I seem to understand some of the girl’s plan. Although Rensin’s salary is not high within Bayern, it is already out of reach for ordinary people! The girl seemed to intend to tie him up. Break up after marriage, so as to claim a large amount of compensation.

Asked a few more words, Lv Qiujian found that Renxin was also aware of this, but he had no evidence. Not sure, so he became more and more depressed as the wedding date approached. But this product is not like a good person! I do n’t see much regret when I hear that my girlfriend is empathizing, but I ’m just worried about my financial loss. Lu Qiujian compares his ***** for this super couple.

“Ok, then the problem now is that you suspect that she is derailed, and you are ready to accept this. You just don’t want to suffer financial losses because of it?” Lu Qiujian said what she had summed up.

“Yes, as long as I find the evidence, I can get out of this sad love! But she is very guarded, and the private investigator I am looking for has found no evidence at all!” The child was also ruthless enough.

“Then I have an idea, you may try it!” Since it is not a good person, it is better to prefer the one who is more familiar with yourself!

“Oh?” Lunsin’s eyes ignited hope. Lv is so high in IQ. The attention he came up with must be more reliable than that stupid private detective. He quickly asked, “Lv. What are your good ideas?”

“Michael, you know, once a woman doesn’t love a man, she will always be more resistant to her performance! So she will repeatedly refuse your request!” Lu Qiu Jian slowly analyzed Said, “So we will use this to create opportunities! To break her defenses and find evidence!”

“Yes, that’s it! You continue to say!” Rensin groped in his pocket for a while, as if to find a book to write down Lu Qiu Jian’s words.

“We are going to challenge Bielefeld next week after we have played Leverkusen!” Lu Qiu Jian suddenly shifted the topic and talked about the schedule.

“Yes!” Lensing’s eyes were filled with sadness, “That day happened to be Valentine’s Day, I wanted to spend it with Dian. But now not only the schedule is not allowed, but even the relationship between us has changed!”

“So, the night before you went away, you justified that it was Valentine’s Day. You asked her to slap it!” Lu Qiu Jian said his plan. “The number of slaps should be as many as possible. Oh, if that ’s what I can buy you two blue pills! “

“I have no problem at all!” Lunsin’s face was red and red with Lu Qiu Jian’s eyes, “My body is extremely strong, and it is not because of this that Di’an is having problems!”

“So okay! Let’s assume your body is fine!”

“It’s not an assumption! There is no problem!”

“Okay okay Your body is not only problem-free, but also particularly strong enough to make her unable to cope with it, so it’s always okay?” See Lun Xin nodded with satisfaction, Lu Qiu Jian continued Go down and say, “You ask for slaps first, because it will be Valentine’s Day soon. Presumably she can’t find a reason to refuse. When slaps, you need as many times as possible, and at the same time as rough as possible , Make her feel wronged. “

Lv Qiu Jian is like Mephistopheles in Goethe ’s pen at the moment, “Then when you wait for you and leave the next day, she will go to her lover for comfort as quickly as possible to make up for

what you brought her Trauma of your mind! At this time, the private detective you hired can come in handy! “

Lv Qiujiang heard Renxin shudder, this guy's mastery of human nature is too terrible! The designed solution is very tight, even if I think about it with my nose, I know that this solution has strong operability.

Then he subconsciously moved away from Lu Qiujiang, and considered that it was finally held for a long time, “Okay, just do it!”

“Then the problem is solved, I hope you will recover soon!” Said Lu Qiujiang got up and left.

Lencin opened the car door and sat in. Lu Qiujiang waved and walked into the campus. After two steps, he turned around and asked, “Michel, are you sure you don't need any blue things?”

“Go!”

Chapter 268 - Return to the arena

()

“We lost to Leverkusen on the road in the third round. If we lose again at home this time, you will be completely stricken this week's holiday! Got it!” In the locker room, Magath was doing the final Mobilization.

Well, the pressure is so great! Lv Qiujiang really sweated when he saw Leverkusen's appearance list. Leverkusen's front line, the Brazilian striker who partnered with the dashing Geberbatov, was actually called Franza. I was not Super Saiyan. People, can't resist this product! Well, this game will go to the frontcourt, and Franca will give Lucio to deal with it.

“Only five minutes after the game started, Lu Qiujiang used a beautiful breakthrough to win a corner kick for Bayern Munich!” Huang Daxian waited a long time, and finally waited for Lu Qiujiang to return to the arena, and the explanation was particularly passionate. -Roberto is ready to take the corner kick, Lu Qiujiang and Ma Kai, Lucio and others are ready to grab points in the penalty area, and Barak is ready to make a long shot at the front of the penalty area! “

“Lu Qiujiang's height is 1.86 meters. From the video of the game he is playing, his jumping ability is also very good!” At this point, Tao Wei seemed to remember something, “but the strange thing is

that in Lu Qiu Jian hasn't seen him score the ball with the header in these competitions! It's a bit unthinkable! “

“Perhaps it's bad luck?” Huang Daxian guessed, but it shouldn't be! From the previous game, we can see that Lu Qiujian's judgment on the placement of football is very accurate, there is no reason to miss the header!

Speaking, Ze Roberto had already kicked the corner kick, and the football flew across the arc to the center of the penalty area to see where the drop point was in the direction of Lu Qiujian. “The quality of this corner kick is very high, and Lu Qiujian has got rid of it. As a defensive player, as long as he jumps high, he can directly hit the goal! “

Lu Qiujian really jumped between his speeches, but what he thought was a little different was that Lu Qiujian jumped higher, half of his body beyond the head of Leverkusen defender Roco-Junior; I saw that he stopped the football, turned and jumped violently after landing, and the right foot raised high slammed the football towards the goal.

Leverkusen's goalkeeper Bout has no reaction to the ball. He originally wanted to block the lower left corner of the goal to pounce on Lu Qiujian's header. Unexpectedly, Lu Qiujian used an upside down gold hook and the football flew to the right of the goal. Watching football into the net.

“Beautiful upside down golden hook. This goal will surely become one of the top ten goals of this round of European competitions!” Huang Daxian applauded excitedly, and the celebration was over, and doubts came up again. The words of this ball seem to be Is it more reasonable to use a header to attack the goal?

“Beautiful goal, but why didn't you just use the header?” Ballack stepped forward to celebrate. I asked what Huang Daxian wanted to ask.

“You know, I'm still reading now!” Lu Qiujian drew a circle in his temple. “It is necessary to keep my head clear at all times. It is said that the increase in heading may have a slight adverse effect on the brain; for me Academic career, so I minimized the use of headers! “

Well, well, this reason is very good and powerful! Barak left with a black line. Does this mean that these physical players do not usually use their brains, so can they unscrupulously header?

Now that the situation has been opened, the following things are much easier to handle. Bayern Munich patiently searched for opportunities under the control of Lv Qiujian. Leverkusen's striker did not show up to a million fighting power, and was considered dead by Lucio.

In the first half, Lv Qiujian scored a long-range goal again. In the second half, he completed the hat-trick early and was replaced by Magath, plus Ma Kai's goal. In the end, Bayern easily defeated at home with a score of 4: 0 Leverkusen, who reportedly revenge 1: 4 away in the first round, continued to stabilize the position of the top of the list, and Lu Qiujian also returned to the top of the shooter list.

"Michel, you can implement your plan this week!" After the game. Lü Qiujian took the free rider of Lensin and returned to the school. In the next game, he did not plan to participate in the game against Bielefeld. Such opponents are enough to abuse once a season, and then bully Lu Qiujian is also embarrassed!

"Well. I have negotiated with a private detective!" The next game will start in 9 days, Bayern will also go to the road to adapt training in advance, so he will probably leave Munich on the 12th; in this case, he will implement it on the 11th The plan is ready. When you follow Bayern to Bielefeld, the private investigator will track Diane, and you must catch the evidence of her derailment!

"That's good! But if you find something. Don't be too excited!" Lu Qiujian patted his shoulder as a comfort, then got off the bus and walked to the campus.

Rensin turned his head and drove towards the apartment where he and Dian lived; when he passed a certain traffic light, the huge signboard of a pharmacy on the roadside attracted his attention. Well, if Lu said Where to buy some medicine?

What am I thinking! Rensin shook his head violently, but I am a professional player, and I have no problem with my physical strength! But it seems that I haven't been with Dian for a while! Oliver seems to have said that men are not for a long time, when they start again, they will always be very fast for the first time! If it were because of this impact plan, it would be bad!

Hesitating again and again, Lensing finally gritted his teeth and parked the car nearby. He found a pair of sunglasses and sneaked into the pharmacy.

"Sir Excuse me, what do you need?" A young pharmacy salesman came over and looked at Lensing's face for a while. Hey, where did I seem to have seen this person!

“Ah, give me a box of that!” Lensin’s head dodged from the other’s eyes, pointing his finger at the small blue pill on the counter. I am a celebrity in Munich. It would be miserable if recognized !

“Mr. Lensin! Are you going to buy a Viagra?” But his wish broke, and the young salesperson recognized the celebrity Mr. Munich!

The young salesperson lamented, hey, Mr. Lensing is young, looking at the figure is also strong, and can’t pinch for Mao!

Lying trough, can you recognize it with sunglasses? Lensing took the medicine, pulled out the euro from his pocket and handed it over. He took off his sunglasses and asked, “How did you recognize me?”

The salesperson looked at him with an idiot’s eyes for a long time before saying, “Mr. Lensing, although you wear sunglasses, you can still wear Bayern’s training suit!”

Chapter 269 - Goalkeeper crisis

Remember [love your novel network] in one second, the fastest update, no pop-up window, free reading of popular novels!

Just as Bayern Munich went to the away game against Bielefeld, Lu Qiuqian stayed at the University of Munich to study his theoretical article. Of course, since Valentine’s Day is coming, he has not forgotten to call Natalie and Xia Xiaotong.

Soon he received news from the website that Bayern Munich was unexpectedly defeated by Bielefeld on the road, and when Lu Qiuqian returned to the team to participate in training, he found that Lensin was not in the training ground.

Well, is this child swollen? Is it because of witnessing his girlfriend’s treachery and then killing them? In this case, do n’t I have to take the responsibility of abetting?

“Poor Michael, he said that he accidentally slipped his right hand and hit the wall when he was at home. It is now being examined in the hospital. It is estimated that it will take one month to return to the team!” Fortunately, Kahn said Lu Qiuqian Saved back from worry.

Falling and hitting the wall? How can this sound so unreliable? After changing clothes, Lu Qiuqian procrastinated in the dressing room for a while, waiting for them to leave before picking up the phone and dialing Rensing’s number.

Hey, I knew that! From the phone, Lu Qiu Jian figured out the ins and outs of the matter. Sure enough, as he thought, it was n't that Rensin 's right hand accidentally hit the wall! Instead, after seeing the evidence from the private investigator, he punched an angry punch on the table, but the table was okay, and his hand was injured.

However, Lensin 's hands did not cause much trouble for Bayern. Lensing was only the second goalkeeper. Kahn is now strong and in good shape. He has not been given a few chances to play. It is now a big deal when he plays Dortmund in the end. Change the third goalkeeper Schlosser to the 18-man roster!

Last game lost to Bielefeld made Magath furious! This year Bayern intends to make a three-line match. A weaker such as Bielefeld is a good opportunity to grab the score and Schalke 04 and Werder Bremen are behind. Now!

Only by accumulating enough lead in the early stage, can he rotate in the later stage of the UEFA Champions League. Now these guys let the expected three points fly away. If you don't win Dortmund this time, you have a good look! In the dressing room, Magath said fiercely.

As a result, the Bayern players who suffocated their stomachs started to attack Dortmund's backcourt like a tiger. This season's Dortmund is in the renewal stage. The stars who won the championship three years ago are gone. The younger generation that has shocked the entire European football team in the future is still working ***** the youth echelon to practice their skills! This year the game has played until now. They are only ranked 11th, not even qualified for the UEFA Cup, how can they be opponents of Bayern Munich, and it is said that Bayern and Lu Qiu Jian are now the big killers.

The ninety minute game is over. Dortmund swallowed six goals and left the Munich Olympic Stadium in despair. Lv Qiu Jian once again scored two goals and two assists, further consolidating her advantage in the top scorer list; although she did not play many games, he played in him. In the game. At least two goals can be scored, and the efficiency of this goal scares almost all opponents.

"The Champions League in the middle of the week depends on you!" After the game, Lu Qiu built goodbye to them in the locker room. Now that the thesis has entered a critical stage, he has no time to go to Spain with them! "Relax, I will definitely participate in the home game, as long as you don't lose too much on the road, we will definitely advance!"

Responding to him was a ***** raised up, Kahn reached out his right hand, "If I were not injured during the World Cup. Ronaldo show a goal I want to go! This time I am in good shape, we can win even on the road royal house Madrid!"

"Casillas defending the goal is not unbreakable!" Ma Kai also said confidently, this year can almost be regarded as the best year of his career, whether facing Buffon or Casilla He is not afraid.

Seeing everyone is confident, Lu Qiujiang certainly will not say anything discouraged, "then wish you a great victory at the Bernabeu Stadium in advance!"

Back to school, continue to prepare his thesis, when the midweek competition starts, Lu Qiujiang turned on the TV. Take a few cans of beer from the refrigerator and watch the game while drinking.

This is not only a relaxation of the gap between writing papers, but also an opportunity to understand the opponents of the next game in advance. Looking at the paper strength, Real Madrid is the world's first! Ronaldo, Zidane, Figo, Irving. There are only four Golden Globe winners, plus Carlos, Casillas, Beckham and other superstars. Such opponents must be treated with caution. Who knows which star will suddenly flash to end the game.

Good and bad spirits, Lu Qiujiang is thinking about when the Real Madrid player will suddenly burst, Ronaldo has thrown away his Brazilian national teammate Lucio's defense and obtained a single-shot opportunity; Ronaldo rarely makes use of after the injury Out of the pendulum style, the man got rid of the goalkeeper and hit the empty door. However, his shooting skills are getting better and better. A fake moves off Kahn's defense and nudges the bottom right corner of the goal to help Real Madrid go to the first city.

Fortunately, Magath was sober, knowing that losing a goal away was not an unacceptable situation, immediately stopped the chaos of Bayern players on the sidelines, reorganized an effective defense, and avoided losing the ball again.

In the second half, Real Madrid players began to recover from the chaotic state they had before, and Lucenberg did not care about the big names under his hands. Ronaldo, Figo and others stayed in the frontcourt and just wanted to score another goal. Even Carlos also overwhelmed the center line, which gave Bayern multiple opportunities for single-handedness.

It is a pity that Casillas was in a state of bravery, which resolved the shots of Mackay and Santa Cruz one by one.

Seeing Ze Roberto fly the free kick again, Magath now misses Lu Qiu's construction, if he had won this game long ago, right?

The game entered the second half stoppage time, Bayern Munich got a corner kick in the last minute, Kahn saw the time is running out and bravely entered the penalty area of Real Madrid, trying to use his height advantage to score the header.

Ze Roberto took the corner and flew in the direction of Kahn. Kahn jumped high, and then with a loud noise, the football rolled into the Real Madrid door, and Casillas looked at Kahn with a stunned look. .

There was no rejoicing in Magath's face, but he was staring at the referee who was showing a red card to Kahn! Scolded in my heart, Nima, you think this is your own restricted area! Also hit the ball with a fist into the goal!

Not good! No goalkeeper in the next game! Beckenbauer and Hernes in the stands thought at the same time.

Chapter 270 - Should I come? (18/35)

It is not the first time that Kahn smashed the ball with his fist when scoring a corner kick. In the 2000-2001 season in the Bundesliga Bayern vs. Rostock, the game was nearing the end. Bayern fell behind 0-1 like today. At that stage, Kahn rushed to the opponent's penalty area and used a corner kick to smash the football into the goal. At that time, he was also sent off the court. Unexpectedly, the same scene was staged again today!

Magath kicked the mineral water with a kick. What if this game lost 1: 0? Bayern is still very promising to return to the home court, but Kahn's main goalkeeper in the next game is gone, he must adjust the tactics to ensure the safety of the back line, so the frontcourt strength will be weakened! Bayern is now one goal behind!

Fortunately, after the referee sent Kahn, the whistle at the end of the game was sounded, otherwise Bayern may lose the ball. Magath has already used up three substitutions. Now there is no goalkeeper on the court! If you give Real Madrid a few more minutes, it is likely to score a second goal!

"Sorry, coach! I just had a fever in my brain, I didn't expect it. I didn't expect it to happen!" Back in the locker room, Kahn apologized with his head drawn down. Rensing was injured recently. Kahn knows his importance to the team. He can't play in the next game and the blow to Bayern is huge!

Magath took a deep breath of his anger under pressure, and since things had already happened, it would be useless to blame Kahn. He patted Kahn on the shoulder and comforted, "It doesn't matter, we still have Schlosser, just a show. It's just a game, I believe he will play to a normal level!"

But including Schlosser himself, all Bayern players do not believe this. Although Kahn is now older, he is still the top ten goalkeeper in the world football. Schlosser's level is far from him. Now! Every goal in the UEFA Champions League game is very important. Real Madrid has now led by one goal. Bayern have to score more than 2: 0 at home to be directly promoted. If they lose one goal, they must score more than three goals! The gate guarded by Casillas was not so easy to break.

It is now two weeks before the next game. Hope Lensing can return to the field sooner! Even if he is not as good as Kahn, is he better than Schlosser?

In the game of going to Freiburg on the weekend, even though Kahn's red card did not affect the appearance of the Bundesliga, Magath still threw him on the bench. Schlosser was sent out for the first time; but the result of this adjustment was not satisfactory. Schlosser had been out of battle for a long time. After re-entry, he obviously appeared nervous. There were several unnecessary catches and takeoffs. Fortunately, Fry The striker of the fort is not very powerful. Without seizing the opportunity, Bayern kept the one-ball lead to the end.

But Bayern's biggest opponent is not a team like Freiburg, but Real Madrid from the Galaxy. Magath dare not expect stars like Ronaldo, Irving, Figo, Raul to miss this opportunity.

In the last league match against Real Madrid, Bayern played against third-ranked Bremen, Magath simply threw Kahn out of the roster and transferred Kraft, who was less than seventeen years old, from the reserve team. Acted as a substitute goalkeeper; Klose gave a good lesson to Schlosser. He made two supplementary shots and scored the ball from Schlosser's shot; fortunately, Lu Qiuqian still played a brave game, two shots and one pass Helped Bayern Munich keep the fruits of victory.

Magath wanted to change Kraft to become familiar with the game after the lead. However, because the score has been stuck, even if Schlosser did not play well, he did not dare to replace Kraft!

As the Champions League approached, Schlosser's condition made Magath more and more worried, and Lensin's hand was still tightly wrapped, and he would have to wait another half a month for his debut! Obviously, this key game is not up to date!

On March 9, the second round of the UEFA Champions League quarter-finals, Bayern Munich vs. Real Madrid is about to officially start, Magath will send Schlosser to the starting list, and Kraft will serve as a substitute!

Warm up before the game. Lu Qiujian was in the midfield with Ze Roberto, Mackay and others to pass the ball training, and Barak wearing the captain's armband approached Schlosser, he looked a little nervous, as the captain should help him Build confidence. "Jan, let's try to pounce on my long shot!"

Barak has already thought about it. When he shoots, he will go to the area where Schlosser is good at throwing the ball. After a few successful saves, he must be relaxed?

But the development of the matter clearly exceeded Barak's expectations. When he shot for the first time, Schlosser rushed to the right. Sure enough, the ball was saved from the sideline, but before Barak was happy, Schlosser covered his shoulder with pain.

Lying, Magath almost ran to the court to give Barak a kick! The game started right away, do you give me the whole thing? The team doctor immediately ran to the goal and shook his head after some inspection. Schlosser had not done a good protection just now and his shoulders were dislocated.

It's too late to change the big list! What's more, there is only one goalkeeper in the team except Kraft! Depressed Magath had to change Kraft to the court At the same time, he prayed prayerfully, hoping that this young man would be as young as Buffon.

When Kraft set foot on the lawn of the Munich Olympic Stadium, he had not yet reached the age of seventeen, he set a record, the youngest goalkeeper in the Champions League was born,

Lusenberg saw Bayern temporarily changing the goalkeeper and was overjoyed, immediately grabbed Ronaldo, Zidane and others for a while, presumably let them strengthen the long shot!

Not long after the game started, Real Madrid's first attack received an excellent opportunity. A beautiful straight from Zidane crossed between Lucio and Kovac, and Ronaldo received the ball to form a single shot.

If it is Kahn in front of the goal, Ronaldo will definitely shoot the same goal as the last game, but now the Bayern goalkeeper is a little stinky little guy, Ronaldo will fake Kraft to the ground with a fake action, and then Going to pass through the empty gate by his side.

Kraft didn't expect that he would play. He pulled Ronaldo's ankle directly under tension; just three minutes after the opening, Bayern's young goalkeeper was sent off and Real Madrid got a penalty kick. What makes Bayern fans desperate is that there is no goalkeeper on his bench!

Lv Qiujian looked at the dumb Magath and Barak and others, shook his head and walked in front of the goal, "Will you let me be the goalkeeper?"
