

DEMON SCHOOL

Chapter 3 - Alien visitor

I was scared when I heard this voice on weekdays. When Lu Qiujian was really lost now, he fell into panic again. After many calls and no response, he collapsed on the bed. In this world, he finally became a real lonely widow! Yes, he is not a person in this plane. He originally lived in a similar plane, and lived a normal but fairly warm life. Then the arrival of the universe special wanted criminal 1A7488 changed all this. 1A7488 In order to escape the search and parasitism into his body, and then tear open the space-time crack to escape to the present plane, in the process of escape, his body completely disappeared, he had to be attached to Lu Qiujian's body, 1A7488 used the last The energy has transformed this body, which greatly improved Lu Qiujian's physical quality and brain space. Up to now, the remaining energy of 1A7488 has been unable to support his activities and fell into a long sleep. Now he needs to complete the plan made by 1A7488 alone!

After all, it was a transformed person. Lu Qiujian quickly recovered from his sorrow, rubbing his slightly swollen temple and thinking about the problem that was urgently needed to be solved now; the solution just mentioned by 1A7488 seems to have heard of it before. It took 0.01 seconds to dig out a middle school memory from the depths of his memory. He sat in the penultimate row of the classroom by the window, his left hand propped on his side and looked at the female teacher in a white skirt on the podium. That day she brought a blue butterfly hairpin and stood on the left side of the podium, holding a textbook and preaching in Mandarin with a hint of Jiangnan style, "We have a scholar named Wei Gang from the University of Pennsylvania, he is an expert

in automatic machinery. I was fascinated by reading, and my hard work during work time was self-evident, even when I was eating and sleeping, I often lost track, and my brain was still thinking, not to rest. In the end, he was too tired, and came up with a special way to recuperate his brain, that is, saw Wood. He piles a lot of wood in his house. Every day he wants to saw the wood into small pieces and saw the small pieces into smaller ones for rest. It seems by accident that it is much like a madman tearing paper in a madhouse. The pursuit of knowledge itself, so much as magic. “

That's right, this is the story. Lu Qiuqian still remembers that after listening to the story, he scoffed at the automaton scientist. Isn't it easy to spend a relaxing time? Why did he torture himself like this? He didn't expect that he would face the same problem as Wei Gang today, leaving him little time. The energy needed by 1A7488 is far from being able to be completed by the current plane technology, he can only walk alone on this thorny road.

Princeton was also chosen for this purpose, because to complete the task of 1A7488, Lu Qiuqian must achieve results far beyond the current state of science and technology in various related fields such as physics, mechanical industry, astronomy, and materials science, and all natural sciences are different. According to various theories and doctrines, the correctness of a theory needs to be tested, and the tool for testing is mathematics. The theoretical system needs to be described, and the tool of description is mathematics. The derivation of theory requires calculus, and the tool of calculus is mathematics. In other words, mathematics is the foundation of all natural sciences. To complete the task, Lu Qiuqian must learn mathematics. To learn mathematics, at least there is no better choice than Princeton!

On this campus with the deepest mathematics research on the earth, follow those masters to complete the reserve of mathematics knowledge, and then go to other schools to study physics, astronomy, machinery and other

knowledge, find a powerful organization to cooperate, and create 1A7488 Required energy manufacturing equipment!

Hey, this is really a difficult process, and 1A7488 will not wait indefinitely. The time left for him is not ample. Lu Qiujian needs to bring a qualitative leap to the technological level of this plane in an extremely limited time. .

After a while, his headache slowly dissipated, and he stood up with a sigh, let it all start from Princeton!

Butler Residential College is located in the south-central part of Princeton. Two U-shaped red-brown buildings blend harmoniously into the surrounding natural environment. Surrounded by green trees and green grass, the clear river flows quietly around the town; Sunlight shines through the glass window on Patrice Kabila's face, this is a strong black young man, "Oh my God, this **** sunshine, can't I sleep well?" "", Grumbled up from the bed, washed up in a daze and sat on the sofa in the living room, "Damn, didn't it mean that there will be new people staying in this dormitory today? Why not come? God bless him will be A good fellow! "

The door knocked as soon as the words fell, and Patrice moved her long legs to the door and unscrewed the handle. "Hey, welcome to Butler College, I am Patrice Kabila."

Lu Qiu built up his head to see clearly the face of this black young man, whispering in his heart, his height of one meter eight or six is no longer low, the person in front of him is even taller than himself, afraid that it is more than two meters; busy With his right hand extended, Patrice gently shook his hand, "Hello, I am Lu Qiujian, an exchange student from China, Department of Mathematics, UU Reading I am very happy to know you!"

“China? Nice place, I went with my father when I was a kid!”, Patrice took Lu Qiuqian’s bag to help him carry him in, “I am from Congo, studying political science here!”

“Those white people can teach you the politics that your country really needs!” After hearing that Patrice is from Congo, Lu Qiuqian immediately changed to Congo’s official language, French. “You might as well go to make your country strong.” My country studies! “

“Wow, your French is awesome!”, Patrice opened his mouth exaggeratedly. He has been in the United States for more than two years, and few people know that his country uses French. The move quickly won his favor, “Man, you are such a nice guy, and I will definitely ask you for a drink later! I know the bar with the most Princeton hotties!”

“Why not!”, Lv Qiuqian shrugged his shoulders as a black man on TV, opened his suitcase, put the contents in the bedroom, and it was already evening when everything was finished. After Patrice found a fast food restaurant to fill his stomach, the two came to a small bar on the street corner!

“Come two glasses of your best beer here!”, Patrice snapped the waiter and waited for the wine to come up and chat with Lu Qiuqian, talking about the African style, and watching the girls going in and out. He quickly found his goal tonight, “Lv, what do you think of the blonde girl by the bar? Oh my god, her figure is amazing! I’ll go and have a drink with her!”

Patris took the glass and walked to the blonde girl who was chatting with her partner, “Hey, beauty, we seem to have a class in a classroom?”

UU reading is welcome to all readers. The latest, fastest and hottest serial works are all at UU! For mobile phone users, please read.
