

D. School 30

Chapter 30 - Paper publication

Lv Qiujian touched the thickness of the envelope. There seemed to be several magazines in it. Is this a sample? Does that mean that his paper has been published for review?

Under the eyes of Professor Hu and Alfus, Lu Qiujian ripped open the envelope, and pulled out several sample publications and a letter from it. Alfus could n't wait to grab a copy and quickly flipped through the catalog. "Lu!" A Method for Solving Partial Differential Equations "Your article is published!"

"Oh? I have a look too!", Professor Hu quickly picked up a copy, it seems that his school has not yet qualified for an article on the page of "Annual Mathematics"! The young people are amazing now!

"A few of you whisper!" The reading room administrator came over and knocked on the table. The three of them looked up and almost everyone's eyes focused on them.

"Oh, I'm sorry, I'm sorry!" Alfus quickly apologized and turned to look at Lu Qiujian, "Lu, why don't we go out!"

"Ah, okay!" From the current form, I'm afraid that the administrator will rush to stay in the future!

"I'll go with you too!", Professor Hu also picked up the tea cup and stood up. He has now extinguished the idea of soliciting Lv Qiujian. What a joke, the person who can publish an article in the "Annual Mathematics" His small temple can tolerate it.

At this point, Professor Hu's face was feverish for a while, and he couldn't help but glared at Alfus. Why didn't you come a minute earlier, if this matter is passed back to China, do I still have a face in the mathematics? Hey, hurry up and ride the young man, please coax, let him rotten this thing in my heart!

After walking out of the library to the nearby cafe, the waiter brought two cups of coffee and stared at Professor Hu's big teacup for a long time before slowly leaving. "Lv, show me what the letter says?" "

“Nothing, just accepted official documents!”, Lv Qiu Jian handed over the letter. It simply stated that your paper has been accepted after being reviewed. Welcome to continue to submit official discourses such as submissions.

“Let me have a look too!” Alfus couldn’t wait to take it as soon as he saw it. He kept twitching at the mouth, looking at the papers and the letters printed on them, the shining, especially It’s the “Annual Mathematics” and how to see how shiny it is when hiring a few words, but it looks much more comfortable than the letters of those periodicals that I often submit!

“Now the young people are amazing! I also read Xiao Lu’s masterpieces!”, Maybe it was found that Lu Qiu Jian and Alfus looked at him curiously with a letter, and Professor Hu picked up with old blush. The magazine looked over.

Professor Hu’s English skills are fairly solid, of course, not solid enough. At present, almost all academic frontiers are in the hands of Europe and the United States. If you don’t understand their dynamics, Professor Hu will not be able to mix up with her current status.

When I just saw Lu Qiu Jian’s paper, Professor Hu’s brow furrowed again. I know most of these words. How come I can’t understand them when they come together? Hey, it is a pity that he is studying partial differential rather than topology!

But Professor Hu’s emotions turned into luck. He was studying partial differential instead of topology. The partial differential paper can also be lightly said that the research field is different and it is not easy to evaluate. If the topology paper does not understand But it’s a big loss!

“It’s all immature ideas that make you laugh!” After watching Professor Hu put down the magazine before he finished his thesis, Lu Qiu Jian knew his situation well, so he didn’t ask him to comment If you really want to ask your own article, it’s a face-slap.

“Hey, the young people are really amazing now!” Professor Hu said with emotion again, “Our generation can’t keep up with your footsteps. If you’re just talking about it, you should listen to it as a joke. Remember to come to the devil in the future.” Just look at me and give me face! “

Professor Hu is more than sixty years this year. It was just a period of turmoil when he was studying. When the turmoil period is over and it is a waste of time to enter the university, it is estimated that all they can do is translate and translate foreign papers. Apart from a few top colleges, the remaining students are all products that have been screened by the technical secondary school. The difficulty of picking out a few seedlings from them can be imagined. Finally, the situation is better. It’s almost retirement age.

So in his academic career, he did not achieve any breakthrough results, nor did he train many outstanding students, so I just saw Lu Qiujian when he started to love, and hope to fill some regrets from him, but wait until Al When Foss took out his thesis, he knew his dream was broken.

“You are too humble. If you come to the Modu in the future, there must be something to trouble you!”, Lu Qiujian said with a smile.

“Lv, your article was published a month faster than the regular one!” Alvors couldn’t help but ask, “I don’t know when the next article will be published?”

But two months from submission to the present time, shorter than a month periodical practice three months, as evidenced by Lvqiu can jump the queue built this article really good There are article? “Professor Hu not help but ask, in the country, this article alone is enough Review of Professor, how there is a? True when the” Annals of Mathematics “is the school’s BBS Why? Want to send to send?

“The Ahlfors students is to post the article, in which I somewhat there is some force!”, Said Lvqiu build modest.

“No, no, you can not hear him say that!” Ahlfors quickly resolved, what if people misunderstand their own occupation of the results of others on the bad, “Lu provides a new perspective for my article, my article it can be said is done in the framework of his given, so he is also the author of the article. thesis has been recognized by Professor Gowers, published perhaps only a matter of time! “

“Professor Gowers?”, Professor Hu nodded, “the day before yesterday met her in greeting the dinner, Professor Gowers if it is approved, then it will be able to publish the article!.”

Ah, go back and remember diligent point to periodicals room, breakfast good lesson learned men out to those students who think they feel good, Professor Hu secretly plan. This would not have to go back and students and Professor Wiles said he laughing, and the light of the outcome of Lvqiu built out enough.

Three men talk excitedly to dinner time, Lvqiu built in accordance with customary please Professor Hu meal, he returned to the base from this back to the dormitory.

Etc. After the news spread, classmates chorus of congratulations; then across the oceans to the magazine of the Royal Park, came to the hands of the dean Professor Zhang Lvqiu built where the faculty.
