Chapter 33 - Team strength assessment

Professor Zhang's idea was to wait for Lu Qiujian's second paper to come out and then publicize it together, but Secretary Jia did not do it, and inexplicably called himself and said nothing to let himself get out of it. what!

After all, he came from a professional background, and Secretary Jia gave Professor Zhang and Professor Ren two old technology houses in a few words, and the truth of the matter was drawn from their mouths. "You mean that there are students of our college in the top international journals. Published an article? ", After all, it is a person in the ivory tower, Officer Jia is still very clear about the weight of this matter, her eyes lit up, this is a big news! You must catch yourself!

"Not one, but two!" Professor Zhang quickly distinguished, "It's just that the second one hasn't been published yet!"

"Look, this is the article!", Professor Ren also smiled and handed over the magazine.

Officer Jia rolled his eyes and roared in his heart. The old lady studied communication, what do you mean to me? Want to read the joke, right? But she is not in vain, and quickly found the entry point from the position and number of pages of the paper, "Oh, this position is not just any article!"

"Yes!", Professor Zhang nodded and agreed, "Generally speaking, the typesetting of papers in journals is calculated according to the weight of the article, and this article by Xiao Lu can barely be regarded as a front line in this issue. 'S identity! "

This is like taking a group photo. The person sitting in the middle of the front row must be the heaviest person in this group photo. They are important people next to them on both sides. In the middle of the row is the middle-level backbone, and the characters in the last corner can be ignored. And Lu Qiujian's position this time is between the front squat and the middle of the second row.

"Then it's a good thing, why can't you start propaganda immediately?", Officer Jia secretly ecstatic, it seems that this time he is right, for the propaganda staff, there is no more worthy of attention than the big news, can grasp Ok, this opportunity to make a beautiful article, then your future is ...

"I plan to wait for the next article to come out and start advertising!", Professor Zhang is still a little embarrassed, this way is a bit mean to play tricks.

“How do you do that?” Jia Secretary was anxious. This time it happened that everyone else had gone out. This opportunity was seized by himself. If the matter is not settled now, until the leader knows, such a big thing will definitely be arranged. For more senior people to do it, isn't it a joy for Bai?

“Professor Zhang, you see, I guess you mean that two papers are heavier than one, so are you planning to publish them together?”, Officer Jia quickly used his brain to find a way.

“Well, it means that!”, Professor Zhang directly admitted.

“Professor Zhang, to say something that is not very respectful, you are one of the top figures in our country in the mathematics, but you may be a little out of the news communication!”, Officer Jia said while looking at Professor Zhang's expression. He continued listening after watching him with an open mind, “The news is about timeliness! If you can't release this news in the first place, the effect may be discounted!”

Just listen to it. Officer Jia's brain quickly turned around to find various reasons. “Besides, I am afraid this magazine is not just for you here? If it is seen by others and posted on the campus network, the direction of public opinion can be Not guided by us; and if the time interval for publishing an article is relatively long? Are we just waiting so long? And ... “

Professor and Professor Ren blinked and blinked, the girl said so well, why haven't we thought of such a thing before! Oops, talent! The two exchanged glances. Professor Ren nodded and Professor Zhang hurriedly said, “If it weren't for your reminder today, I would be in a hurry! So how do you write this article?”

“First of all, this student Lu is a student of the Department of Mathematics of Beijing Normal University. This is for sure! Although he is now in Princeton, he is only going to make temporary exchanges ...” After thinking about it, starting with Lu Qiujian's identity, he began to speak out his thoughts on Barabara. “... Finally, the achievements of Lu are not only personal honors, but also the harvest of our long-term work in the Department of Mathematics of Beijing Normal University Under the encouragement of Lv, after all, he has achieved greater results! “

“Yes, yes, that's what it means!” The two professors nodded again and again. More results must be supported by more funds and higher-level equipment. Officer Jia said that they were gone.

“Then I will prepare the article. After waiting, I will give you a look. If you feel that there is no problem, give us a call!” Officer Jia quietly used Professor Zhang as a shield. She wanted to use When things are done enough, I will report to the leader through Professor Zhang’s mouth, so that the leader will not replace him to do this.

“Okay, then trouble you!” Professor Zhang always seems to be very slow outside of mathematics. Then I can see the doorway here. When I sent Officer Jia to the door of the office, I felt that I was almost. “Xiao Liu, help me deliver Officer Jia!”

“Eh!”, Liu assistant came out quietly, “Come on, Jia, I will take you downstairs!”

Yu Guang in the corner of Professor Zhang ’s eyes saw Assistant Liu throwing a pen into Officer Jia ’s hand by guiding him without a trace of smoke, and patting Assistant Liu ’s shoulder when he returned, Not bad! “

After Professor Zhang went back, Assistant Liu was relieved. Amitabha, today’s negative impression is finally clear.

At the same time, the Princeton Tigers have defeated the third preseason opponent Florida International University Golden Jaguar. On the way to the fourth opponent Monmouth University Eagles, a group of people turned the freshly baked ball Team strength assessment.

“The Tigers’ strength is quite average for players other than Patrice, but with excellent teamwork and tactical execution, they have won two wins and one loss in the first three games!” Read the comments about the Tigers in the magazine.

“It ’s worth mentioning that they showed amazing reading ability in the first three games. They were always able to adjust to the loopholes they showed and achieved good results. This shows that the Tigers’ coach Thompson III has made tremendous progress in the past year ... “, reading this, everyone looked at Coach Thompson with a smile.

“Player’s individual ability D, tactical execution ability C, coaching ability B, Princeton Tigers comprehensive strength C ...”
