

## D. School 341

### Chapter 341 - Dark matter discovery

Lv Qiujian rubbed it quietly, as if it were a piece of paper; at a moment when Feng Hongqi didn't pay attention, he secretly opened it. It was a set of phone numbers written with lipstick and a bright lip mark.

Wow, this is the legendary flesh and skin? We have been in football for many years and finally caught up with the same treatment as Ronaldo! Lv Qiujian whistled and shredded the paper into the trash bin without any tangles. This kind of non-challenging blending means nothing! Moreover, after a while, I will go to Tokyo to see Xia Xiao. It is totally unnecessary to waste this time. Besides, I will be very busy recently!

At the airport exit, Lv Qiujian and Feng Hongqi took the Bayern Club car to the club headquarters. In any case, they received such an important award. It is also appropriate to hold a press conference; the time for him to negotiate with Bayern Club is at Nowadays.

Arrived at the club, took the trophy brought back by Hennes and took a few photos, answered some of the reporter's questions, even if the press conference was over! While other reporters are depressed about how to write news, Feng Hongqi can't wait to go straight to the hotel and start writing a press release. This is truly exclusive news! Whether or not I can become the first football reporter in China is this time!

Hey, think about when the editor-in-chief found himself letting him come to Germany, he was a little bit unhappy; think of me as a basketball reporter, how can I go to Germany to cover football? But the editor-in-chief said that the newspaper had decided to let you go to Germany to interview Lu Qiujian; I had to read two poems. I was a brick of revolution. I moved to Germany wherever I needed it, and then I came to Germany. Really brilliant!

Feng Hongqi's thoughts flowed vigorously, and his fingers hit the keyboard like flying. Within one hour, a fresh manuscript was written and sent to China. The editor-in-chief immediately arranged it for the front page of tomorrow.

While domestic fans were holding hot reports about Feng Hongqi, Lu Qiujian continued to perform boring data analysis in the laboratory of the University of Munich.

Perhaps it is the reason for the successive failures. Although the laboratory friends are still very professional, the data processing speed is not slow. But Lu Qiujian clearly felt that their enthusiasm

had dissipated a lot. It seems that there is not much expectation for the result of this time, and even the most passionate Dietrich did not have the momentum before.

Okay, wait and see! If some of the data is unearthed, their mental outlook will immediately change dramatically? Lu Qiujian didn't take it seriously. Continue to carry out his work.

Three days passed, everyone except Lu Qiujian in the laboratory experienced various kinds of exhaustion to varying degrees, Ludwig kept yawning, Carl massaged the temple from time to time, and Dietrich had a cup after cup. Drinking coffee; sure enough. It is difficult to carry out long and hard work without passion!

Lu Qiujian Looked at the time, it seemed to be ten o'clock in the evening! Since they are all tired, let them go to rest. I will do the rest today! Rather than let them persevere here and lead to constant errors, it is better to take a good night's rest and restore the state tomorrow.

Lu Qiujian stood up and clapped his hands, and said when other people's eyes turned around, "Okay, everyone is working hard! If you are tired, go back to rest! Regain your spirit and start working again tomorrow!"

Everyone seemed to breathe a sigh of relief, stood up swayingly, and greeted Lu Qiujian and walked out of the door; Dietrich, who finally got up, came to the door and suddenly turned back. "Lu, don't you go to rest? You have been working longer than all of us these days! I'm afraid I will get sick in this way!"

"Isn't this always the case? Have you seen me having any problems?" Our physical fitness is not a level! Lu Qiujian pushed his shoulders and pushed him out of the door. "You still have to take care of yourself first! Drinking so much coffee is not good for your body! Waiting for the rest to work hard tomorrow, I want to expect your good luck to give I am surprised! "

As Dietrich left, the laboratory was left alone. Lu Qiujian did not start working directly, but went outside and did half an hour of exercise to wait for his brain to regain clarity. Only back to the office to start work.

He turned on the computer in the next seat. Load the unfinished shares of other members of the experimental group into it, and handle their own tasks and their shares at the same time. Like cern, put your hands on the two keyboards, and the left and right binoculars respectively pay attention to the two monitors. Lu Qiujian has improved the efficiency of his own data processing.

Sound similar to “Flying Bee” sounded again in the laboratory of the University of Munich. Fortunately, there are no other people now. If Dietrich sees Lu Qiuqian’s data processing efficiency, they must be scared.

“Carl’s share processing is done I didn’t find the desired result .. Ludwig’s data analysis was completed, and I still failed to reach the goal .. Frederick has the most data left, but it has not It can bring surprises! Ah. I ’ve done it myself too! It ’s just Dietrich ’s! Are we waiting for tomorrow again? ”Lu Qiuqian muttered while typing on the keyboard. Two hours later, I arranged today Only the data of Dietrich is left in the task.

Dietrich is the most efficient in the laboratory except for Lu Qiuqian, so he has the least unfinished share. According to Lu Qiuqian ’s current processing efficiency, it only takes about 20 minutes to complete! After losing again and again, Lv Qiuqian didn’t have much confidence in finding something from the rest of his data.

“Hey, hurry up and go back to rest!” Although the body is not tired, but mentally still a little tired, Lu Qiuqian shook his head to start the last work tonight.

“Only the last three groups are left ... Hey, are you finally going to be disappointed today? It seems that you have to wait for tomorrow’s work. I’m afraid I can’t get anything tonight!” Lu Qiuqian opened lazily. The last data, and then sat upright, “Huh? These sets of data are completely different from the previous ones! It looks very similar to what is described in his theoretical model!”

Lv Qiuqian was refreshed and immediately processed these sets of data quickly. When the final result was presented to him, he knew that what he was looking for was right in front of him.

“Hahahaha, Dietrich! You are really a Lucky guy! “

## Chapter 342 - The Great Earthquake

“Finally, I found it!” Lv Qiuqian laughed excitedly and threw the papers and pens on the table into the sky, waiting for a piece of rubber to hit Lv Qiuqian’s head. I did n’t put a pencil sharpener on my desk! Otherwise, it is not cost-effective to get a knife.

Celebrated for five minutes, Lv Qiuqian restored calm; finding the data does not mean the end of the work, but also learn to write an article to explain the relationship between this set of data and dark matter, and show the derivation process without error.

So Lu Qiuqian pulled the sundries on the chair to the ground, and immediately began writing the paper. Until the sky became white outside the window, the article was finished; he checked the article and found the problem. Grid data center, and then leaned back in a chair and fell asleep.

Another hour later, when Dietrich, who was the first to come to the laboratory, opened the door of the laboratory, the scene in front made him stunned. Lu Qiujian leaned on the chair and snored, and the ground was scattered everywhere With paper, documents, signature pens and other debris, what the \*\*\*\* happened!

Crept to Lu Qiujian's side and realized that his breathing was still steady. Dietrich was relieved, maybe he was too tired! Just let him rest for a while!

Dietrich stepped away from Lu Qiujian and squatted down to pick up the debris on the ground! Hey, Lu's recent pressure is really a little bit bigger. Maybe he worked hard all night last night, but he still didn't find anything to use threw debris to vent his depressed mood?

Half packed, Lu Qiujian's mobile phone on the table buzzed and vibrated; huh? Dietrich stood up. He saw that Lu Qiujian moved a little and quickly accelerated his pace. Lu Qiujian was so tired that Dietrich did not want him to be woken up by the phone.

Dr. Evans? What did he call so early? Dietrich looked at Lv Qiujian, then the phone, hesitated to take the phone out of the laboratory for a moment, walked to a place where Lv Qiujian would not be disturbed, and pressed the answer button, intending to explain to Dr Evans , Let him fight over later.

"Lu! Unbelievable! You really did it! This is really amazing! I can't believe it until now! Do you know what they looked like when they saw your article! I think this physics The meeting will be crazy because of your discovery. "Dietris was too late to speak. He was stunned by Dr. Evans's words, and his breathing became rapid. What did Lu find out last night?

"Well, please wait. Dr. Evans! Lv is sleeping now. I am his colleague Dietrich. Yes, we met last time in r. With Prof. Xuft. Yes. Yes, he worked late last night alone. It was too tired, so I picked him up for the phone, which is really embarrassing! "It was easy to make things clear, and Dietrich finally asked with curiosity. , "Dr. Evans, what article did Lu send?"

"Haha, his experiment was successful! He found conclusive evidence of the existence of dark matter, just last night. Oh no, it was early this morning! I looked at the time, and he just passed the article to the grid data center three hours ago. Professor David Colin was crazy when he saw this article, and now the whole r is celebrating his great discovery! R is so honored! In less than a year, two people were born Great discoveries destined to go down in the annals of humanity! "

“Damn! I should insist on staying with Lu last night!” Dietrich rubbed his hair angrily, deeply regretting that he missed this historical moment, “Dr. Evans, Can I see Lu’s article on r’s website now? “He didn’t want to disturb Lu Qiujian.

“Professor David Collin called all relevant staff immediately after reading the article. They reviewed Lu Qiujian’s article in the shortest time, and it has been initially confirmed to be correct! On the official website of r, where can you browse! Well, I am going to be busy! “Dr. Evans said regretfully before hanging up the phone. “Dittrich, I think Lü probably won’t have a rest today! Physicists all over the world are starting to pay attention to his article, and his phone will be broken soon!”

“No need to wait! Someone is calling in now!” Dietrich smiled bitterly at the new incoming call that jumped to Lv Qiujian’s phone. “It seems to be Professor Francois-Engle!”

“Okay. I won’t disturb you anymore! Remember to congratulate Lu on behalf of me and all the members of the experimental group! In addition, you should wake him up! Haha, I really look forward to the few albums that Professor Hawking will choose. Song! “Dr. Evans hung up the phone in laughter.

Has encountered more surprises in the more than a year he has worked with, more than the first twenty-five years of my life combined! Dietrich woke up from the shock and quickly walked into the laboratory, pulling the collar of Lv Qiujian uncontrollably for a while, and shook it for a while. “Lv, wake up! Have your phone!”

“Ah? What happened?” Lu Qiujian woke up staring at the fans, staring blankly at the anxious Dietrich!

“Professor Engeler’s phone!” Dietrich put the phone in his hand slapped his shoulder hard, “Lu! You are too great! You send to grid data The article of the center has passed the preliminary review of r and caused an earthquake for the entire physics session! “

Yes, I posted an article last night, “How long have I slept? What time is it now?” Lu Qiujian rubbed his eyes and stood up, looking at the phone in his hand. Broke, but Professor Engle did not give up, he quickly called again.

“It is 7:18 am Munich time!” Dietrich looked at his watch.

Less than three hours, but after the discomfort just after waking up, Lv Qiujian became energetic again, and he made an apologetic gesture to Dietrich and pressed the answer key, “Engel Professor Le, hello, I’m sorry I was still sleeping! “

Engel would still care about this at the moment, he immediately sent a series of congratulations, Lu Qiujian responded with a smile, “Thank you for your praise, but statistically speaking, the current evidence is still too thin to be conclusive. Prove that my theory is correct! More experimental results are needed! “

“Haha, with the first time there will be the second, third and even 100th time! Isn’t that the experiment of the Higgs boson!” Professor Engeler was very optimistic. To be continued.

Chapter 343 - Hua Guo boiling

Remember [] in one second, the fastest update, no pop-ups, free reading of popular novels!

“I hope so!” After only a few words with Professor Engel, Lu Qiujian had to say goodbye, “Sorry, Professor, I see Professor Witten called me!”

Professor Engeler’s congratulations have been delivered, so he will no longer pull Lu Qiujian to continue to speak, “Okay, you will report the report at CERN soon? I’ll go to book a ticket to Geneva. By then we will see you in CERN! “

“Ok!” Lu Qiujian remembered after hanging up the phone, as if it was the awarding ceremony of the Nobel Prize! Professor Engel Kong Kong will be able to go to CERN in a few days, but CERN will also take this factor into account when arranging the report meeting and make appropriate delays and stagger the time of the award ceremony?

After Edward Witten, Robert Brout, Professor Brout, and then Director Chen of the High Energy Institute of China, Director Chen, and Freeman Dyson, and then Director Guo of the Physics Department of Beijing Normal University. After that, Director Guo had his turn to Professor Xuft; and Professor Xuft had no electricity before half of the words. Fortunately, his figure also appeared at the door of the laboratory. Run here.

It can be seen from the details of the buttons of his clothes that he was rushed over when he was awakened by someone during his sleep. “Lu, this moment will be the glory of the entire Munich University and even human civilization!” With an excited expression, and gave a strong hug.

Lu Qiujian could hardly believe that such a great power was actually given by such an old man. Even his transformed body felt a bit of discomfort. “It’s all thanks to you who promised me to be

your graduate student. If it 's not you, I do n't know how long it will take to achieve such an outcome. “

Indeed, without Professor Xuft's relationship, he didn't want to break into the cern, and he couldn't get in without access. Nothing will have today's results.

At this time, colleagues such as Ludwig and Frederick also rushed to the laboratory, followed by Professor Jorge Dietrich, Professor Theodor-Hensch, and finally the President of the University of Munich. Professor Ende Huber also appeared here. The lab, which was originally quite spacious, is getting more crowded!

They did not care whether they had a seat or not. They all stood quietly and listened to Lu Qiuqian about the process of discovering the sets of data. “.. After Frederick 's data processing was over, I thought it would be nothing again tonight! At that time I wanted to go directly to rest, but look at Ludwig 's remaining share. So I persevered again! When I analyzed the last three sets of data, the miracle suddenly came when I was least prepared ...

“Oh! God! I know that!” Dietrich sighed in frustration. If he persisted for two more hours, he would find dark matter like the Higgs boson last time. With glory in your arms, you will probably be remembered by future physicists because of titles like “Lucky Dietrich”! but. It was only two hours away!

“Hahahaha, don't be like this, Dietrich!” Good friend Ludwig stood up and comforted him, “It's not a bad thing to miss a great discovery because of a two-hour work difference. You will be remembered by future physicists because of ‘Unlucky Dietrich’! When someone wants to get off work on time, the person in charge of the laboratory will warn him, ‘Hey, you imagine that is unlucky Did Dietrich miss the same great discovery? ‘Nobody would dare not work overtime in this way?’

Lying, are you comforting me or blacking me! Dietrich wanted to cry without tears. How bad are the nicknames “Unlucky Dietrich” and “Lucky Dietrich”! If the latter nickname. The physicists of later generations will surely express their envy after seeing it. Hey, I would have had the luck of Dietrich! And the previous one. God bless you, do n't make me miss the great discovery like that “unlucky Dietrich”. Think about it makes you depressed to death!

The people on the side did not care about Dietrich's depression, and they all cooperated with Ludwig. After a while, laughter filled the entire laboratory, and then diffused from the window to the door of the laboratory where the laboratory is located.

“Eh, what’s going on here? Sounds like a party? It’s not yet noon?” A Chinese woman’s voice rang from outside the courtyard door. She was obviously attracted by laughter, “Mr. Major . Are you sure this is Dr. Lu ’s laboratory? “

“Reporter Su, that’s right. Just enter through this gate! Presumably they are celebrating too!” If Lu Qiujian is here, he will recognize that the major next to the woman is Mr. Military Officer of the consulate he is familiar with.

“Then let’s hurry in!” Su Xiaoge, a female reporter at the court station, couldn’t help but feel lucky that she had just come to Munich for an interview. Only encountered this once-in-a-lifetime opportunity! According to the leadership, Lv Qiujian made the Nobel-level achievements this time! This is absolutely rare news!

Only when Mr. Wuguan opened the road in front of him could Su Xiaoge be squeezed out of the crowd. As soon as she saw Lu Qiujian surrounded by the crowd, she hurriedly handed her business card as gracefully as possible. Su Xiaoge, a reporter at the court, first of all congratulates you on achieving such a great achievement ... “After a bunch of praises from Barbara, she made her own request,” Can I interview and shoot here? “

“Of course there is no problem!” Professor Xuft, the owner of the laboratory, immediately agreed to come down. This is the first one. It is estimated that reporters from other media are on the way.

“Then let’s avoid it first, Lu, remember to come to the evening banquet!” Principal Professor Huber said gracefully.

“No, no! I think this interview is more real!” Su Xiaoge quickly kept, “You can ignore my reporter status just like before!”

As a result, everyone continued the discussions and blessings just now, and reporters from major media such as Agence France-Presse, CNN, and Discovery Channel also swarmed in.

At seven o’clock in the evening, in the whole news of the court station, Lv Qiujian discovered the news of dark matter. The president and faculty and staff of the University of Munich showed Lu Qiujian the picture of celebration spread to all corners of China, waiting for hundreds of millions. When the audience of Ji Jiu learned from the news the weight of Lu Qiujian’s achievement, the whole country was boiling! Is China’s first Nobel Prize in the natural category coming?

Chapter 344 - Yi Jin also CERN

“Hahahaha, some people who said that Dr. Lv’s experiment will fail! Someone! Come out and let me see if my face is swollen?” Before some news is over, some people can’t help running online posts to make faces. Read a book? · K? A? Hu ·

“Thanks to Dr. Lu for letting me keep Tintin!” Xiaoyao Supreme appeared again in the tall building where he was broadcasting Chetintin. When the second experiment failed, he was extremely depressed, and now it is all leaked out.

“Uh, how many years has it been since I saw the whole news! Counting the news that won the Golden Globe last time, Lu Qiujian’s news in Zhendian appeared more frequently than the top frequency in many provinces!” This is a senior key Political member.

“Oh, don’t worry, there’s more to come! This will soon be at the awarding ceremony of Mr. World Football!” Someone took the sentence below.

“It is not necessary to wait until that time, the award ceremony of the Nobel Prize is earlier than the award ceremony of Mr. World Football! Dr. Lu made outstanding contributions to the awards of Higgs, Engle and Braut, and then the court Taiwan would like to mention a few words? “Some people expressed different opinions.

“Then he counted when he cracked the Poincaré conjecture, won the first prize in the natural sciences, the Wolf Prize, the new mathematics award, and the Champions League final and the Champions League award! Carefully count his whole news on the court. The number of times is almost double digits! Even in the entire Chinese scientific community, not many people can match it? ” One reading? ·? K? A watching ?? h? U watching · ??

The school where Lu Qiujian once studied has reacted in the first place. In his home elementary school, middle school and Beijing Normal University, he used the banners, display screens, official website and other methods to make this to Lu Qiujian. Greatness now congratulates.

A slightly later hot talk show on the court station invited the authority of the domestic high-energy physics session to in-depth interpretation of this current Lv Qiujian. When the host and the audience in front of the TV had a vague understanding of dark matter Afterwards, the host finally asked the topic that everyone is most concerned about, “Director Chen, then based on your understanding of the physical world, what is the probability that Lu Qiujian won the Nobel Prize for the achievement of the current dark matter?”

“It is impossible to say that the dark matter has been determined! The current requirements have not yet met the statistical requirements. More data must be supported to determine this achievement.”

Director Chen first cautiously expressed his attitude , And then became agitated, “But according to the current situation. One It is a matter of time before the dark matter is determined. This will have a profound impact on the entire physics session. We all know that the universe is about Twenty-three percent of the material content is dark matter, and through Dr. Lu ’s present situation we can ...

The host heard the corners of his eyes straight. Director Chen, we are not physicists! We do n’t understand this. What we lay folks care about is whether Lu Qiujian can win an award! He couldn’t help but interrupt Director Chen’s long speech, “Well, Director Chen. Audience friends want to know whether Lu Qiujian can win the prize!”

“In my opinion, there is great hope for this achievement to win the Nobel Prize!” Director Chen, who has always been cautious, also magnified his courage at this time. “This is the current situation that affects the entire pattern of physics. Such an achievement cannot be awarded. What? Such achievements can be awarded? As long as Lu Qiujian has accumulated enough data for statistics in the future experiments, then his award is almost certain! “

“So when do you think he will win the prize? Can you break the record of the youngest Nobel Prize winner created by Lawrence Prague?” The host also became excited.

“I remember Xiao Lu was born every year? This year is just 22 years old, he still has two years to break this record!” Director Chen recalled the age of Xia Qiujian said, “He won the prize in my opinion There is no problem, but whether you can break the Lawrence-Prague record depends on luck, because when is it enough to accumulate enough data? Who are there in the queue at the Nobel Prize podium? Will there be more explosive occurrences in the next two years! “

“Take the case of this year’s Nobel Prize in Physics? Everyone had thought that Professor Theodore Hensch at the University of Munich, John Hall at the University of Colorado and Roy Glauber at Harvard University won the prize. Hope is the greatest! But at the beginning of the year, the Large Hadron Collider of the European Nuclear Research Center showed the Higgs boson. This made Professor Higgs, Professor Engeler and Professor Braut quickly replace them, and the winners eventually changed. Become the three of them. “Director Chen gave an example.” Yes, Lu Qiujian also made outstanding contributions in the current process of the Higgs boson. If not, he provided new data analysis. Method and improved the experimental plan of the Large Hadron Collider, I am afraid that the three of them will have to wait for a while. “

Having said so much, I still didn’t give a correct answer! But this question is too sensitive. If Director Chen firmly believes that Lv Qiujian can break the record of Lawrence-Prague, but the Royal Swedish Academy of Sciences has to wait for Lv Qiujian to give him an award when he is 26 It seems good to be so ambiguous. The host nodded and led the topic away. After a few more words,

the show is over! Let countless viewers in front of the TV look very tickling! Can you give me an accurate word? It's too confusing to be so appetizing!

The newspapers on the second day were overwhelmingly publicized. In less than a month, Lu Qiuqian occupied the front pages of major newspapers for the second time.

Beijing, somewhere outside the rehearsal room. A young man with long glasses looked at the photo of Lu Qiuqian in the newspaper and secretly sighed, hey, if one day I could make headlines like him.

Such awesome news is obviously not a day's report that will satisfy readers. The major media have sent their elite teams to Europe on a recent flight, intending to dig deep into this news.

But Lu Qiuqian had already left Munich at this time. Follow the first-step reporters to Geneva! The data on the Munich side has been processed, and he needs to go to the next step.

Looking at the most striking orange-red ball building outside, Lu Qiuqian was quite moved. When he first came here last year, he was a newcomer in the physical world, but now it has become one of the most shining stars in history. The greatest is now about to be completed in my own hands; look at the large number of reporters behind him, Lu Qiuqian secretly pondered, I am also considered to be Yijin.

#### Chapter 345 - Next experiment

"Professor Higgs! Haven't you left to Sweden yet? Do you want the Swedish ambassador to Switzerland to award you like Professor Landau?" Lu Qiuqian saw Higgs at the first sight after entering the CERN exchange center Professor Si, so he made a joke; in the history of the Nobel Prize in Physics, the only time outside Sweden was awarded in 62 years, the Swedish ambassador to the Red Empire awarded the award to the Red Empire Academy of Sciences Lev in Moscow-Davidovich Landau.

Landau, like Heisenberg, studied under Born. He was probably the last encyclopedic physicist. When he was fifty years old, the Red Empire Institute of Atomic Energy gave him a marble slab. The 10 most important scientific achievements in Landau's life work are engraved on the board. This is the famous "Landau Ten Commandments" in the history of physics.

But in the 20th century, after all, it was not an era in which all fields could be occupied by one person. Although Landau's research field is extensive, covering many fields such as condensed matter, superfluid, quantum theory, superconductivity, mixed state theory, but Heisen Scientists such as Fermi and Dirac have sailed a brand-new physical paradigm. There is still a gap. Perhaps he will use his talent in a specific field to achieve greater achievements?

“No, I have booked a ticket to Stockholm! I just want to witness your success before going to the prize!” Higgs said kindly, and there was no misunderstanding because of Lu Qiuqian’s words. He did n’t go to Sweden to receive the award because of his physical reasons. Instead, he persuaded him to follow Lu Qiuqian ’s words, “Lv, since you mentioned Landau, then I want to persuade you that your talent is not weaker than him. But I do n’t want you to follow the same path as him; Landau disperses his talents too much. From the current perspective, it seems that you also have this trend, from the Poincare conjecture, the Langlands program to the Higgs boson, Dark matter, he is only twenty-two years old, has been involved in so many fields, this is not a very good choice; since you have unveiled the veil of dark matter. I hope you can concentrate on studying in this field! “

“Thank you for your kindness!” It’s a pity that the family can’t do it! If he is a pure scientist, Lu Qiuqian will definitely consider Higgs’s proposal, but what he needs more is a breakthrough in application, not just theory. After waiting for the evidence to collect the dark matter, he did not intend to study it. After getting his degree, he returned to China to concentrate on nuclear fusion! But there is no need to talk about these words with Higgs. He turned the topic to the Nobel Prize, “I am going to receive the supreme honor of the physics, how are you feeling now?”

“The Nobel Prize is just to prove that you are a good physicist. It’s not remote from the top!” Higgs said reservedly. “Some people are honored for being awarded the Nobel Prize, such as me; more people But because of the award, the Nobel Prize is glorified, such as Einstein, I hope you do n’t feel as satisfied as I was because of the Nobel Prize. “

Einstein won the Nobel Prize only once, the reason for the award was not his well-known theory of relativity, but the relatively inconspicuous photoelectric effect; but some people said that he won the award because of the theory of relativity, the reason is that the Nobel Prize organizing committee feels love We must give him an award because Einstein is so powerful, but they don’t understand what the relativity theory is about. If it proves wrong in the future, wouldn’t it be a shame. So they found another reason to award him an award.

Fortunately, they made this decision. Otherwise, the authority of the Nobel Prize will be reduced by at least one third. Think about it. The greatest physicists of the twentieth century have not won the award, but other physicists have wave of waves. How to convince people to win the award? So Higgs would say that the Nobel Prize awarded to Einstein is to add glory to the Nobel Prize.

He also expressed his expectations for Lv Qiuqian, and had contacted great physicists such as Einstein, Dirac, and Heisenberg during his long career, but Xiang Qiuqian was so talented in physics The family is still rare, he does not want Lv Qiuqian to lose his motivation because of the Nobel Prize-in his view Lv Qiuqian won the award not too long.

“Lv, congratulations on your great discovery!” A wonderful electronic sound rang from behind Higgs, and Professor Hawking appeared in front of him with the help of a wheelchair. There was no bet on the face that he lost.

“Thank you, Professor Hawking!” Lu Qiu Jian bent down to thank him.

“Hey, Stephen, are you going to honor your bet immediately?” Higgs turned into an old puck at the moment. Hawking jokes.

“No problem! I’m ready!” Speaking of the game, Professor Hawking became excited. “Lv, didn’t you say the lack of drummers last time? I went to Pink Floyd’s drummer Nick Mason! He I have agreed to participate in the production of my album; and you promised to be a bass player! Do n’t forget! “

“Relax, my skills won’t let you down!” Brian May is a world-renowned guitarist, and Nick Mason can be a drummer in a great band like Pink Floyd. One can imagine the skill, if Lu Qiu Jian is too good, I am afraid there will be a lot of people laughing at it!

“So did you choose the music?” It seems that Hawking is very interested in the album, but thinking about his previous history of participating in various movies and records, Lu Qiu Jian knew that there was always a childlike in his heart. It is understandable to be passionate about such fun things.

“I’m researching, and I will send you the score and lyrics in a few days!” Well, I have to go back and check the “Song Onion Song” or something. Is it out? At the communication center, Lu Qiu Jian was surrounded by physicists who came from all over the world. Because the data has not been processed and the Nobel Prize is about to be awarded, Lu Qiu Jian simply chatted with them for a while and left the exchange center. As for more content, wait until the press conference is announced!

Back at Dr. Evans’ office, Lu Qiu Jian was directly poured with champagne and sprayed with colored ribbons. Lafayette was using this method to express his congratulations to Lu Qiu Jian.

When the celebration was over, when Dr. Evans drove them out of the office, one person stayed with Dr. Evans.

Rolf Hoyle, the director of the CERN Center, looked at Lu Qiu Jian with a smile, “Lu, are you ready to start the next experiment?”

Ha, a few days ago, I was still worried about the failure of the experiment to continue the experiment. I did not expect that the experiment was successful. CERN is more anxious than myself.

#### Chapter 346 - Arrived in Tokyo

“Of course, the next experimental plan does not need to be changed much, just follow this time!” Lu Qiuqian certainly will not refuse this kind of good thing, but this time he does not intend to keep an eye on the whole process. It is enough to have Lafayette, the experienced staff, to preside.

“Very well, we are already coordinating the problems of electricians with France and Switzerland! It is expected that the next experiment will start soon. Do you have any help for us?” Professor Hoyle was extremely active at this time, I He just discovered the Higgs bosons and dark matter one after another, making him one of the most successful research institutions of this year and this century, which makes him extremely proud, and each member country has become a big fund for next year. Lu Qiuqian played an important role in this process.

Fortunately, he had expressed his support for him in the previous meeting. If the plan was interrupted after the second trial, the consequences could not be imagined.

“That’s really thank you! If I can, I would like to add some staff to the experimental group. When the experiment starts, I may not be able to rush back. Dr. Evans and Dr. Lafayette may need some new support. “” Lu Qiuqian was also polite, and began to ask for human support directly.

“Well? Where are you going recently? Let me guess, are you going to Sweden to attend the award ceremony of Professor Higgs?” Rolf Hoyle also showed his lovely side.

“Oh, no.” Compared to being an audience, I want to participate in the Nobel Prize award ceremony as a winner! “You know, I am still working hard at Bayern Munich. At the same time as the award ceremony, I will go to Tokyo with the team to participate in the World Club Cup!”

“Ah, I almost forgot that you are also a genius in football!” Hoyle couldn’t help but make a joke, “Of course. It would be better if the team you joined was Stuttgart.” He used to be at Stuttgart University Reading is a fan of Stuttgart.

“Now the members of the experimental group are already familiar with the experimental process. Dr. Evans and Dr. Lafayette can definitely complete it successfully. So I think I can spend more days in Tokyo to rest and rest. It is a bit too busy! “Lu Qiuqian greeted him in advance by the way. I do n’t have to wait for myself to come back to start the experiment; woo woo, I have n’t seen Xia

Xiao for a long time, and there are other things I have done after playing the game in Tokyo. Awards ceremony in the mathematics. “

At the end of the year, it is time for various awards to get together. In addition to the European Golden Globe Award, Mr. World Football and the Nobel Prize, the New Discovery Award for Mathematics founded by Lv Qiuqian is also time to be awarded; The influence of this award has gradually expanded, and the number of winners this year is two more than last year. This makes him very happy.

I just said it was missing. This guy is not only a genius in physics and football, but also in mathematics! Hoyle was still a little worried, “Is it okay if you are not there?”

“Dr. Evans has been working for decades, and Dr. Lafayette has been here for more than ten years; if they are not sure, they will not agree?” Lu Qiuqian said with a shrug.

“So good! I hope you can successfully win the World Club Cup!” Rolf Hoyle was a little depressed after speaking. As a Stuttgart fan, he even blessed Bayern Munich’s championship. It feels tangled!

“Thank you! I will take care of other tasks before going to Tokyo!” Um, next time I meet Stuttgart, do I have to score two fewer goals? Lu Qiuqian thought about it secretly.

In the next few days, Lu Qiuqian stayed at the data analysis results transmitted by various cooperative units for detailed research, fine-tuned some details of the experimental plan, and then left Geneva to return to Munich. Prepare to travel to Tokyo with Bayern Munich.

“Lv, what does your girlfriend look like? What does it do? Are you a scientist like you?” On the plane, the Bayern team heard that Lu Qiuqian’s girlfriend would pick him up at the airport. Suddenly surrounded.

“She is a petite and tender girl.” Lu Qiuqian’s lips showed a smile, “She is not engaged in scientific research, she is pursuing her own dream, but my girlfriend is very popular in neon and China Cartoonist! “

“Comics? Are they like Superman or Spider-Man?” Kahn scratched his head and asked, for them, the comics of the United States are more famous.

“Completely different styles. She drew classic Chinese-style comics. The story is more delicate, and the lines are much softer than Mi Guo’s comics.” Lu Qiuqian talked about Xia Xiao’s comics and Mi Guo’s superheroes. The difference in comic style comes.

“I have seen a football teenager! Ruo Lin Yuan San inside looks better than Oliver!” Schweinsteiger came over. Then a group of people started a fierce gossip about the comics.

The distance from Munich to Tokyo is too long, even if Bayern only charter flights directly. It also takes twelve hours, and after a while, these people can’t stand it. One by one went back to his seat and fell asleep, Lv Qiuqian turned out an academic book on dark matter from the bag and looked.

When they woke up after a sleep, the plane was not far from Tokyo Haneda International Airport; the flight landed smoothly, the players checked each other’s images, and vigorously walked off the ramp.

At the exit of the airport The neon Bayern fans have already prepared for the reception. They hold large pictures of Kahn, Barak and others standing at the passenger exit. Of course, the most is Lu Qiuqian’s photos, there is no way, the neon people’s worship of the strong is rooted in the bones; fans look forward to staring at the place where Bayern players will appear.

In addition, there are some well-dressed and academically dressed people standing beside the fans; let n’s reporters repeatedly cast curious eyes, “Yamamoto, if I am not wrong, the one over there is Professor Mochizuki Shinichi of Kyoto University! What kind of person can actually make him wait so respectfully? “Scholars have a very high status in neon, Mochizuki Shinichi is again the leading figure in neon mathematicians, so It was quickly recognized.

Just as a reporter called Yamamoto was about to answer, a beautiful figure appeared in his field of vision, “Hey, how come the beautiful girl cartoonist Xia Xiao also came? Today’s Haneda Airport is really lively!”

#### Chapter 347 - Grand welcome lineup

The sensation caused by Xia Xiao is not over yet. Amidst a group of young people in smart clothes, several trembling middle-aged and elderly people also appeared at the airport exit.

“What! They are here too! His Excellency Sato! His Excellency Koshiba ..! And His Excellency Sasaki! Almost all the treasures of the University of Tokyo are here? Is it Mr. Einstein who has come back to the world again!” Reporter Yamamoto couldn’t believe his eyes.

Chito Sato is the winner of the Wolf Prize in Mathematics for the 0th year, Masahiro Koshihara is the winner of the Nobel Prize in Physics in 2002, and Yiyi Sasaki is the current principal of the University of Tokyo! Coupled with Mochizuki Shinichi, who walked towards them, these people almost represented the top power of the neon science education community. It is no wonder that Yamamoto would exclaim this.

“Ah! These are neon national treasures! Yamamoto Jun, did you say I used to ask for an interview?” Hideo Suzuki, who was following Yamamoto’s internship, asked anxiously, if they were interviewed successfully, even if it was a sentence! You can immediately become a regular employee of n!

“Gah! These are all the most respected characters in Neon! If you don’t make an appointment, hurriedly say hello, it is an unforgivable rudeness!” Yamamoto said with a low voice.

The president of the University of Tokyo and neon top scientists arrived at Haneda International Airport. The news spread quickly among the crowd. They all cast their respectful eyes and gave way to Sasaki and others.

Hadn’t waited for them to stand up, and a group of scholar-like people appeared in front of them, and the familiar ones greeted Sasaki Yi, Xiaochai Changjun and others.

“Senior Yamamoto, who are these people?” Hideki Suzuki looked at them curiously. “It seems that President Sasaki and they are also familiar!”

“Ah! That’s Professor An Xiguangyi, director of the Neon National Institute of High Energy Physics. I’m sorry, I didn’t find the name Hu Xiaxia!” Yamamoto has long followed the neon science education community and has a deep memory of the appearance of these bigwigs. It must be to welcome His Excellency Lu Qiujian! “

“Huh? Which Golden Globe winner at Bayern Munich?” Suzuki had just graduated. University studies journalism and communication, and does not know much about the dynamics of the scientific community. “Senior do you mean that these scholars are here to welcome him?”

“Don’t young people study materials carefully before starting work?” The Showa boy’s coercion of Heisei herbivorous man is engraved in his bones. Yamamoto felt with emotion that young people like Suzuki Shuichi might not even find work in the Showa era! “Lord Qiujian is not only a talented player. At the same time, he is also the world’s top scholar in the field of mathematics and physics. He successfully cracked the Poincaré conjecture that plagued the mathematics for nearly a hundred years in 2002, and helped Sigg again earlier this year Lord Sis confirmed the existence of the Higgs

boson, which directly led to this year's Nobel Prize in Physics awarded to the three professors Higgs, Englert and Higgs! Not long ago he confirmed the existence of dark matter! It's no wonder that such genius characters will come together in neon education and science!

At this moment, Kahn first appeared at the passenger exit. He habitually raised his right hand to wave to the greeted fans, but waiting at the exit were several middle-aged and elderly people, wearing a Bayern jersey in the distance. The fans showed excitement in their eyes. But still suppressed his excitement, afraid of disturbing the gems waiting in the front row.

Amount, what the hell! Kahn lowered his right hand and scratched his head. He has rarely encountered this situation. I remember when he came to Tokyo in 0 years, it was very popular!

"Dr. Lu!" Mochizuki Shinichi is younger and has a sharper look than those old people. He quickly finds Lu Qiuqian in the crowd and immediately greets him. Sasaki and others quickly followed.

"Professor Mochizuki! Long time no see!" Lu Qiuqian greeted expertly in neon words, while extending his neck to search for Xia Xiao's figure.

"Yes. It has been almost two years since the last report of the Poincaré Conjecture! I thought Lu Jun would be quiet for a while after solving the Poincaré conjecture. I didn't expect you to make the whole thing so quickly. The results surprised by the world are really amazing!" Mochizuki said, holding Lu Qiuqian's hand.

"Yes. Lu Jun, let me introduce you! This is Professor Xiaochai Changjun from the University of Tokyo. He is ..." After the greeting, Mochizuki Shinichi introduced Lu Qiuqian's peers directly.

"Professor Xiaochai was the winner of the Nobel Prize in 2002! How could I not know it!" Lu Qiuqian reached over there, "Professor Xiaochai's research on neutrinos has inspired me a lot."

"This is Professor Sato Senou? Bernstein-Sato polynomial is a rare gem in mathematics!" Lu Qiuqian shook hands one by one without his introduction. "Director Ansi, you were fat after seeing you last time A lot! But pay attention to your body! Uh, this is ..."

"Yoshisa Sasaki, President of the University of Tokyo, very much welcome His Excellency Lu Qiuqian to visit the country!" Sasaki is not a person in Lu Qiuqian's familiar field. Therefore, he did not recognize him; Sasaki Yi respectfully issued an invitation, "The scumbag knows that you have other things to come to Tokyo. But the opportunity is really rare. So the scumbag has to look forward to the face. Your invitation. If you still have free time after the game, please come to the

University of Tokyo to give a speech, please! “After he finished speaking, he came to a 90-degree bow.

Lying trough, I just want to hug Xia Xiao now! You even gave me this! Lv Qiujian couldn't be more depressed at this moment, and looked at Xia Xiao, who was not far away with tears in his eyes.

“Well, if I have time, I will consider it! Principal Sasaki, my teammates are very tired. It seems that we have been blocked at the exit like this!” Lu Qiujian said gently.

“Hi! It's my rudeness!” Sasaki took the road with everyone, and Xia Xiao couldn't bear it anymore. With so many reporters on the scene, he immediately rushed forward to join Lu Qiujian's arms .

“Well, I feel a little thin! It seems that you have worked hard during the neon time!” Holding her in a circle, Lu Qiujian said softly in her ear.

Hush Ze Roberto and others whistled and whistled, causing Xia Xiao to blush for a while, not knowing how to answer it. The small face was deeply buried in Lu Qiujian's arms.

Seeing that they were so affectionate, the Bayern players did not bother and walked past them; until Magath appeared, he coughed and gently patted Lu Qiujian's shoulder, “Lu, since you have been for a long time I have n't seen you. I 'll give you two days off. You do n't have to worry about the semi-finals. You just have to return to the team before the finals! ”

Chapter 348 - Let's come mahjong

“Pay attention to the body, don't become a soft-footed shrimp in the finals!” Lucio whispered in his ear.

“Lv, I wish you a happy holiday!” Ram also got acquainted with him during this time, patting his shoulders to send blessings, and soon the Bayern players walked clean and left him alone At the airport.

“I'm sorry, this situation doesn't seem suitable for talking about too serious matters!” Lv Qiujian shrugged and said to Sasaki Yuki and others who were standing aside. “Professor Mochizuki has my phone. We will call again after the final. ! “

At this time, they remembered that Lu Qiujian, who had made so many great achievements, was only a young man in his early twenties, and Sasaki's serious face also rarely smiled, “We are taking

the liberty! But Lu Jun, The Ginkgo Tree Road at the University of Tokyo is a rare US dollar. You and your girlfriend may wish to walk around if you have time! Now we will not disturb you and wish you a happy time! “

After talking about the University of Tokyo, the Neon National Institute of High Energy Physics, and Mochizuki Shinichi, the first to leave the passenger exit, Lu Qiu Jian also hurriedly ran out behind them, and if they didn't leave, the group of reporters should have rushed.

“Ooooooooo, can't fix it! I didn't expect my goddess Xia Xiao to have a boyfriend anymore!” Suzuki Shuichi looked at Xia Xiaoyu, who was taken away by Lu Qiu Jian, crying without tears. Although there are many neon cartoonists, However, the number of female cartoonists is much lower than that of male cartoonists, and there are not many people with outstanding facial values. Since Xia Xiao 's photos were exposed, they have become the goddesses of all second-generation otakus, but today they must be neon otakus. A broken day!

“Going there, some friends in the comics industry have to see what kind of person my boyfriend is, so they follow!” Xia Xiaoyi snuggled in Lu Qiu Jian's arms, reaching for a stop not far away A commercial vehicle.

“Hey, why are they so disrespectful! I just want to be with you now, I don't want to ignore others at all!” Lu Qiu Jian complained half-truly.

“Okay, are they also kindhearted! They have already set up a restaurant, and they will leave when they finish eating!” Xia Xiao shook Lu Qiu Jian's arm, “My recent serialization is coming to an end. After your game is over I will go to Germany with you for a while! “

“Really?” This is good news! Lu Qiu Jian couldn't help but stop and turned around to ask.

“Well! I won't disturb you?” Xia Xiao asked, biting her lip.

“No, I won't be very busy from now until next year.” What I have done is complete, I don't have much work except answering the debate, “I will take you to Europe and walk around then. We can go to the Palace of Versailles to see the roses. We can go to Provence to see the lavender and go to Bergen to pick the fir fruit ... “Uh, Crete does n't have to go.

Said that the two of them got to the side of the car, and Lü Qiu Jian's door opened automatically when he reached for his hand, and several guys who caught the border protruded their heads. “Yeah, is this Ms. Xia Xiao's boyfriend? Doesn't it look as handsome as me?”

Wipe, just like your fat-headed otaku, if you are not a famous cartoonist, I'm afraid you can't even find your girlfriend! Lv Qiujian secretly slandered, Xia Xiao smiled for a long time before covering his mouth, "These are the predecessors I met in neon, and they have provided many pointers to my comic skills. This is Mr. Fu Jianyi Bo, This is Mr. Inoue Takehiko. ". Finally, she pointed to the man who was joking just now. Well, it was also the most intractable of these people. "This is Mr. Oda Eiichiro."

Actually, she did know Lu Qiujian, she also pulled Xia Xiao into the car, and then greeted each other, "Mr. Fu Jian, do n't give Xia Xiao my family the bad habit of spreading drafts!"

"Oh, I haven't said anything in a long time!" Fu Jianyi Bo scratched his head embarrassedly.

"That's why you have been losing in mahjong recently!" Inoue Takehiko revealed the truth mercilessly, and Fu Jian Yi Bo will only work hard to draw money and make money when he loses in mahjong. A fight. Then he took the initiative to extend his right hand, "Lv Jun, I heard that Xia Xiao's boyfriend is you, but I specifically found a video of your game in naa. Did you still play basketball?"

"This! As long as you start to draw the sequel of the slam dunk, I will immediately come back to the basketball court?" To say to these people, Lu Qiujian has the deepest grievance to whom, I am afraid this is the handsome uncle.

"This request is really tangled!" Yuuhiko Inoue was a little bit embarrassed, but he finally shook his head. "Unfortunately, the story I want to draw is finished! Youth is really memorable because of regrets!"

The last one, I didn't expect you to be able to marry a model like a dead man. Really a lucky guy! After saying hello to them, the car took them to the scheduled kiosk.

Hey, the neon food looks pretty good, but it can't fill your stomach at all! After dinner, Lu Qiujian was thinking about how to clean up Xia Xiao at night, and some people who didn't open their eyes spoke. Fu Jian Yi Bo rubbed his hands and said, "You guys, it's too early to go back now, let's play mahjong!"

Inoue and Oda also deliberately coaxed to agree with each other Lü Qiujian only hated his teeth, how could he go first in this case? Paralyze, do n't write the three of you, Lu Lu, upside down!

The vast majority of gambling games can be attributed to the problem of memory and probability analysis. For Lu Qiu Jian, it is a breeze to remember the order of 136 mahjong cards, especially this hand-washing mahjong has no suspense!

“Hu Hu, fifty-six thousand seventy thousand, seven hundred eighty-nine thousand, three eighty thousand, three ninety thousand, one pair seventy thousand! Pure one million stones, double the service!”, The first Lu Qiu Jian took them Kneeled.

Fujian Yoshihiro, Inoue Takehiko, and Oda Eiichiro were all ignorant, and the entire game became Lu Qiu Jian’s personal performance.

After they all lost three times, Fu Jian Yibo finally gave up his plan to get back a game, “Lu Jun, please be sure to tell me the secret of your mahjong win!”

“In fact, it is very simple. I think of mahjong as a mathematical formula:  $naaa + ab + dd$ ,  $n$  can be equal to 0, as long as this formula is completed, you can win the card! Then remember the position of each card, and then Considering the variables caused by each card played, a comprehensive analysis is enough! “Lv Qiu Jian said lightly.

Fujian Yibo wants to cry without tears, knowing that you can remember all the cards and play wool! Hey, it seems that I have to draw the manuscript for several months in a row!

Chapter 349 - Iron Gallbladder (24/38)

These noisy guys finally left! Watching them leave in a taxi, Lu Qiu Jian felt a lot more comfortable, holding Xia Xiao’s little hand, “Where are we going now?”

Xia Xiao’s face turned slightly red, and he hummed in a mosquito’s voice, “Since you don’t need to meet the team, then go to where I live now!”

Hey, it ’s not like you have n’t, what blush! But this shameful look is really pitiful! Lu Qiu Jian pulled Xia Xiao into the car, and the driver of Shueisha sent them to the apartment building where the mobile looked good.

“You originally lived here! I thought it was the kind of neon-style building often seen in anime!” Lu Qiu Jian said, looking up at the tall building.

“This is Tokyo! There are so few people here, and I can’t afford such a house with my current income!” Xia Xiao walked into the elevator with his arms.

“Do you like the place where you live now or the small building? If you like the small building, I’ll buy you a good one!” Lu Qiujian pinched her nose.

Xia Xiao pressed the elevator floor and shook his head without thinking too much. “Still not, don’t you return to China in one year? I will go back with you at that time. If you buy a building, you have to transfer , It’s too much trouble! Not to mention that I used such a big house alone? “

“Are you afraid of cleaning too hard?” Lu Qiujian quipped, and at the same time there was a touch of emotion in his heart. “Doesn’t it affect your career if you return to China?”

“No, now there are many domestic comic magazines looking for me to draft! I do n’t have to worry about work at all when I go back!” She seems to have thought about this problem herself, “And what I have learned on the neon side has already It ’s enough, I ’ll go back when you graduate! “

“I don’t know if I will be back in that city! I don’t know if I will have time to accompany you at that time!” This is indeed true. Lu Qiujian also couldn’t guess that the Chinese Congress would put the Nuclear Fusion Research Center there. The fact that the Tonmark device is in Anhui Province is due to the fact that Huaguo University of Science and Technology is also located there; but its own plan will land there. Now it ca n’t be changed anyway, but the developed coastal cities can basically be excluded.

“It doesn’t matter, it’s always closer than from Tokyo to Munich?” The talking room had reached the floor of the apartment where Xia Xiao lived. She came out of the elevator and opened the door.

Lu Qiujian went in and scanned a few times. The room was small but clean. The gifts he bought from Munich and Geneva and when going to the away games were neatly placed in the most striking position, “Well, this glass craft seems to have been bought when I was in Turin. This tapestry was bought in Istanbul after the Champions League final. Arrived! “

“And the Beatles limited edition album you bought in Liverpool! I will listen to it every time I draw. The black tea and tea set you mailed to me in London, why would I always have a cup whenever I lack inspiration? Black tea, then inspiration will automatically come to your door! “Xia Xiao said quietly, his tone full of attachment.

"I have carefully read the comics you sent me every time!" The two of them were already sitting on the sofa in the living room and glanced at the big bed in the bedroom. Lu Qiujian didn't feel that it triggered an impulse.

"You just drank a lot of sake, and I will wake you up with a cup of tea?" Xia Xiao planned to come out of his arms during the conversation.

"Eh, don't move! That wine won't fail me!" Lu Qiujian held her in her arms and refused to let go. How should I turn to the topic? Hey, with that, a magazine thrown on the coffee table inspired Lu Qiujian, "I suddenly thought of a very fun game, why not let's play anime games?"

"Huh? What role do you want?" Xia Xiao's face flushed slightly, and she seemed to have guessed what Lu Qiujian wanted to do.

"Let's play the game of Iron Gallbladder Trainman!" Lu Qiujian hugged Xia Xiao and put it on his knees. The two looked at each other.

Xia Xiao turned his head shyly. "Uh, what's the role of this anime? How do you want to play?"

"It's up to me to play the Sunshine Trainman!" What if the sunshine? Sunlight comes from the sun, and the abbreviation of the sun is, uh, you know, "You play the tunnel, the train enters the tunnel, the train exits the tunnel, enters the tunnel, exits the tunnel ... Isn't this interesting?" Has started to be irregular.

In a moment. The sofa in Xia Xiao's living room turned into a neon land, Lu Qiujian became a railroad trainman lying on the ground, Xia Xiao became a continuous tunnel between the mountains, and let the Sunshine train played by Lu Qiujian enter in and out. . The long journey did not end until Xia Xiaoshi was tired.

"... The European Nuclear Research Center confirming the existence of the Higgs boson should also receive the Nobel Prize in Physics. But for the Nobel Prize jury, it is more difficult to reward institutions like the European Nuclear Research Center; here I Thanks to the staff who worked hard during the discovery of the Higgs boson, especially Dr. Evans and Dr. Lv Qiujian. Without their efforts, I would not stand on this podium! " It was still Xia Xiao 's apartment. Lu Qiujian was lying in bed and hugged Xia Xiao while watching the live broadcast of the Nobel Prize ceremony.

Xia Xiao's eyes are full of admiration, his boyfriend is really a great guy! "It must be hard work at the European Nuclear Center, right?"

“Um. Okay! It’s not as hard as last night! You see, I don’t even have the strength to start now!” Lu Qiujian said with a cheek, “Now I’m hungry, do you feed me pastries? “

“Open your mouth!” Xia Xiaoming knew he was deliberate, but he didn’t have the heart to refuse. He reached out and picked up a piece of pastry from the bedside table and sent it to Lu Qiujian’s mouth. “I usually like this kind of pastry. I just don’t know if you like it. dislike.”

“As long as you feed, I like it all!” Lu Qiujian finished speaking and refused to eat, “but I want you to feed me with your mouth!”

“Lai Pi!” Xia Xiao happened again twice Seeing Lu Qiujian always shut his mouth and refused to include the pastry he sent to his mouth, he had no idea for a while, and finally it seemed like Lu Qiujian Gently sent to Lu Qiujian’s mouth as said.

Lu Qiujian immediately responded, eating the pastry bit by bit around Xia Xiao ’s neck, and then kissed her lips, and her clever tongue pryed off her teeth to launch a fierce attack. The two hands are even more irregular; it wo n’t take a while for the Sunshine train to start its long tunnel journey again. .

Chapter 350 - High-level meeting (25/38)

“Qin Feng, the members of the Presbyterian Church are here now. Tell us about it!” In the conference room in Haizili, nine elders in charge of the Political Bureau of China sat at the conference table. The elders watched Qin Feng looked at the end of the conference table and said.

“Leaders, first of all, I will do a review here! In the previous period, I violated the principles of organization and did not work in accordance with the normal organization procedures. Although there is no regret, this behavior is not worth it. Appreciation! “Then Qin Feng spoke out about his contact with Lu Qiujian when he went to Germany for a foreign affairs visit. The problem he said violates the organization principle is actually to arrange for Wang Yang to contact Lu Qiujian.

It stands to reason that the transmission of such confidential documents should be done by professionals. Things like Wang Yang who are not professionally trained are prone to problems. Fortunately, Wang Yang has not caused losses.

“Well, if this happens in the future, you must arrange for professionals to contact!” The elder nodded and nodded. “You continue to talk!”

“In fact, I didn’t realize the weight of these two materials when I first started, because according to my time I asked a professor at Jiangnan University to understand, these experts told me that it would be at least fifty years before the controllable nuclear fusion is put into practical use! So I just treated these two materials as regular data! “Qin Feng said slowly.

“But! In the two experimental tests conducted by the Ministry of Science and Technology, both of these materials have shown extremely strong practicality! And far beyond the current international frontier level! This makes me have to be cautious!” Qin Feng said here Take a deep breath, “According to my previous contact with Dr. Lu Qiujian, his research results in this field are far more than these two materials! If his research results in other areas can reach the level of these two materials, Then it may take less than fifty years for controlled nuclear fusion to be put into application! “

“In 2004, China’s oil imports continued to rise sharply when international oil prices hit record highs. Crude oil imports exceeded 120 million tons, an increase of 34.8%; refined oil imports exceeded 37 million tons for the first time, an increase of 34.1%; the net imports of crude oil and refined oil reached a record 143.7 million tons, plus the net imports of LPG and other petroleum products, the total net imports of oil was as high as 1. [ × ] 51.5 billion tons, a year-on-year increase 43%, the dependence of oil imports is close to 50%. The total oil imports are as high as 431.5 billion US dollars, an increase of 112.56% year-on-year. “The Prime Minister couldn’t help but interject.

“China’s GDP last year was less than two trillion US dollars, and oil imports alone accounted for more than 2% of the GDP!” The Prime Minister was worried, “because of the energy bottleneck. Our country has to make many concessions in international exchanges! And it is foreseeable that with the growth of our economic development, the energy problem will become more and more serious. If controllable nuclear fusion can really be realized! benefit!”

“But, can this plan be successfully completed?” Of course, some people questioned, “From the current point of view, there is still a big gap between China’s technological development level and that of Rice and Europe. I don’t seem to hear that they are in There is breakthrough progress in the field of nuclear fusion. “

“And which Dr. Lu I saw last year!” Said an elder who had participated in the China Science and Technology Commendation Conference. “He seems to be in his early twenties? It can be expected that the plan will definitely invest a lot of money and manpower.” , Material resources, is it not safe enough to pin all hope on a young man in his twenties? Why not wait and see? “

“Despite his young age, Dr. Lu has shown his convincing strength in the scientific community!” Since the plan was proposed by Qin Feng, the interpretation work can only be left to him, “In the mathematics circle he cracked Poincaré Conjecture, it is only a matter of time before the Fields Medal, the highest award in mathematics, is achieved. [ × ] “

“And just a few days ago, he used the Large Hadron Collider of the European Nuclear Research Center to discover dark matter, and quickly became a popular candidate for the Nobel Prize!” Qin Feng paused, waiting for them to absorb this information Said later. “The previous two documents have proved that he also has a very mature idea in the field of controllable fusion. The previous two experiments were very successful, and the results obtained have thrown away a lot of counterparts in Europe and the United States! I think if it is on him Investing, China will never lose money! “

This year’s elder engineers have more backgrounds, and they quickly found the problem, “Whether it is Poincare’s conjecture or dark matter is basic research, and controlled nuclear fusion is applied research, these two The difference in the field is a bit big! Even if Dr. Lu proves his strength in the basic field, it does not mean that he will have the same result in the application field. “

Perhaps he felt a little absolute, he added. “Of course, a scientist like Dr. Lu is the jewel of the entire nation! When he returns to China, we can invest part of the funds to support it, and wait for the results to be added!”

“I’m afraid it’s not appropriate!” During this time, Qin Feng made a lot of effort in the field of controlled nuclear fusion, and he also had an approximate impression of the financial, human, and material support required by Lu Qiujuan. “The field of controlled nuclear fusion is very expensive, and it makes no sense if there is less investment!”

“Although the economy has improved in the past two years, there are still a lot of places to spend money!” The Prime Minister also frowned. “Infrastructure, defense costs, personnel expenditures, etc. have almost completely consumed the economic growth! Although I do n’t quite understand how much money the plan mentioned by Qin Feng noticed but it must not be too little, it is still difficult to meet this sudden extra budget! “

The meeting lasted for several hours. During this period, experts from China in this field were consulted, but they were still unable to form a unified opinion; this is also a matter of course. Once the plan is implemented, it will be at least tens of billions of units of consumption. How can it be so easy to make a decision.

“Okay, today ’s meeting is here! Since everyone ’s opinions cannot be unified, then I propose to put the plan aside for a while, and the intelligence department will arrange for someone to stay in touch

with Lu Qiujian and make a decision based on the value of the information he returns. “The elder said.

Qin Feng was still a little unwilling. He raised his hand in silence for a moment to signal that he had something to say, and said after obtaining permission, “Dr. Lu is now in Neon. According to my understanding, he will return to China in the near future, or Let’s listen to his plan before making a decision? “

“Well, then do it!” The elders said after exchanging opinions with each other.
