

## D. School 35

### Chapter 35 - Yang Yang visited

“Mom, I know, don’t be too hard for you and Dad, have I received the money sent to you? I now have a good part-time income here, you can rest assured ... Mom! How old are you to tell me this is a bit early? ... I ’m going to class, I ’ll hang up first! “Today, Lu Qiujian has a lot of calls. It ’s time to come home again; he is speechless to his mother. Was he only 19 this year? He was thinking about introducing himself to the blind date.

Ok? Who is this? Just put down the ringtone of the phone and rang again, looked at the number and pressed the answer button, “Hey, Yangyang!”

“What are you busy with? I haven’t called in several times. Shouldn’t I make a phone porridge with my girlfriend?” Yang Yang was playing a joke on his mouth, but he was nervous.

“No, talk to my mother!” Hey, wouldn’t it really introduce me to a blind date when I go back next year? Lv Qiujian felt a headache for a while.

“Are you busy tomorrow weekend?”, And waited for Lu Qiujian to answer her, and then continued, “If not busy, I’ll go to Princeton to find you? Last time, I said I would take a tour of the school!”

Ah, besides the competition, I plan to go to the library to read books on the weekend, but I think that people did n’t help themselves last time, and the debts they owe are still to be paid! “Okay! What time do you arrive? I’ll pick you up!”

Yay! Yang Yang said quickly than the scissors hand, “Our first bus to Princeton departs at about 6:30 in the morning. It should be eight o’clock in your school! You don’t need to pick me up. I’ll call you when I get there!”

噚 噚 噚, the end of the call Yang Yang turned several circles in the dormitory, lying on the bed silly smile for a long time before suddenly climbing up, rushed to the closet for a long time, what clothes should I wear tomorrow This piece seems to be a bit rustic, it will seem that I have no taste; this piece is slightly exposed, would n’t it be bad if he thought I was too casual? This one is too loose to show my figure, this one ... looking at the clothes in the whole wardrobe, Yang Yang sighed softly, hey, I still have few clothes!

She is too busy here, but Lu Qiu Jian stayed in the reading room as if nothing else, quickly flipped through various professional books, and did not leave with the newly borrowed books until night.

“Here!” Yang Yanggang got off the CMB bus, and before he could reach out the phone, he heard a familiar voice shouting in Chinese. Looking up, Lu Qiu Jian was standing in front of him beckoning.

Hey, why is he here too? Yangyang just turned around, and the fat man Fu Wei got out of the car door behind her. He took three steps and took two steps to catch up with Lu Qiu Jian’s hand.

“Brother, thank you for coming to pick me up and Yangyang today! 吆 Lao Pha is here today too! “

Lao Pa? Lv Qiu Jian looked at Patrice with a black line. Wasn’t he talking about this? Fu Wei shook hands with him and found Patrice again, “Today Yangyang and I are in trouble for two of you!”, And he and Yangyang were put in the position of couples during the conversation.

“No problem! The food you took us to New York last time was very good. Come and taste Princeton’s food today!”, Patrice offered a warm hug.

Looking at Fu Wei’s blushing face, Lu Qiu Jian couldn’t help laughing, and the power forward’s hug was not so enjoyable.

“I had planned to come by myself, who knew this guy had been waiting at the station early in the morning!” Yang Yang walked over and said in a whisper.

“Yangyang and I have heard that the Princeton campus has beautiful scenery, and I’ll trouble you and Lao Pha to take us to go shopping this time!”, Fu Wei sees Yangyang coming and hurry up here, standing intentionally or unintentionally In the middle of them.

“Okay, let’s have a breakfast first!” Lu Qiu Jian didn’t care about his carefulness. While introducing them to the scenery on both sides, he walked to the place where he had breakfast.

The other three were okay, but Yang Yang, who was blocked by Fu Wei on the far side, was depressed. If he wanted to talk to Lu Qiu Jian, he had to bypass Fu Wei, but he was just a fat man. The sun is covered strictly. Along the way, the two people continually scrambled for the position by taking the opportunity to stop and go. For a moment, Fu Wei separated Yangyang from the outside. After a while, Yangyang grabbed the opportunity to see the scenery and grabbed the side of Lu Qiu Jian. .

Side Patrice couldn't help but whispered, "I think their card technology is much better than me, this year we better not meet New York University in NCAA!"

After breakfast, I continued on. Soon, four people came to a small ochre red building. The small building was only three floors, and on top was a milky white bell tower, a very unremarkable look. Lu Qiujian looked at this small building with a longing look.

"Where is this place?" Yang Yang asked.

"Princeton Institute for Advanced Studies!", Lu Qiujian replied softly, "One of the world's top research centers, they invite the first-class scholars in various fields to do the most pure and cutting-edge research, and are not subject to any teaching tasks, scientific research funds or Sponsor pressure. "

"There is such awesome?", The little fat man froze for a moment, looked over at his eyes.

"I studied mathematics. I will take the mathematics school inside!" Lu Qiujian pointed to the small building. "In the field of mathematics, the highest honor is the Fields Medal. The Fields Medal is every four years. Once, a total of 44 medals have been awarded so far. In the School of Mathematics of the Princeton Institute for Advanced Studies, there are six owners of the Fields Prize, including Burgan and Deligne! ", Which has not been included. The Edwards Witten working in the Faculty of Natural Sciences, Fields Medal has been awarded since 1936. Excluding those who have died and faded out of research, almost half of the medal winners who are still active in research are gathered here. Historically, a total of 38 Fields Award winners have intersected with this institute, and even Real Madrid does not have such a luxurious lineup!

"I dare not say anything else, but in terms of mathematics, it can be called the world's first!" Lu Qiujian continued after they digested what they just said, "If you still don't understand, then Einstein always listens Did you say? After he came to the United States, he did research work here, and Qiu Chengtong and Yang Zhenning also worked here! "

"Can we go in and see?", Or the name Einstein is loud enough, as long as you have been to high school, you will inevitably see the portrait of this gentleman on the school wall, and it will inevitably be admired under the eyes, even Yangyang, who studies finance, is no exception.

I really don't know if I can go in, Lu Qiujian scratched his head.

“Lu!” When he was hesitating to ask, a head came out of the window on the second floor and shouted.
