

D. School 361

Chapter 361 - So-called innovation

In view of this, Lv Qiujian left without talking nonsense with him. If it is the former, mental illness is not so curable! If it is the latter, it is even worse to wake up.

However, Lu Rui still didn't understand it. She caught up and asked, "Dr. Lu? Why didn't I just say a few words? I just heard him say that his results are an innovation for the entire physics session. Is this kind of research worthless? ? "

"The so-called innovation! It must also conform to the most basic rules!" Lu Qiujian looked at the uncle who was next to the candied gourd. He immediately found a good way to give Lu Rui an example. Does it look good? What is it made of? "

"You see! I am an authentic hawthorn. I picked and nucleated my own one by one, and made it with my own sugar syrup! There are absolutely no unclean things, and the taste is guaranteed!" I am very proud of my craft.

"That's good! But I think it's always monotonous to always do this! You have to innovate!" Lu Qiujian continued to speak, "I think if you put a layer of cement on raw eggs and wear it with bamboo sticks It must taste better! "

The uncle froze for a long time before recovering. He leaned over Lu Qiujian and snorted unkindly, "Are you sick!"

"See it!" Lu Qiujian shrugged and said to Lu Rui, "I was in the same mood as this uncle! You said that you can do innovation, you can replace the hawthorn with oranges, apples or something. ! At least you can eat it? What's the matter if you switch to raw eggs and cement? It doesn't meet the basic rules of making candied gourd! My mood just now is the same as this uncle! "

"Have you heard Uncle Guo's cross talk? Uncle Guo said in his paragraph. If you want to learn to cook and want to innovate dishes, you must know the pots and pans first? You don't know if you want to innovate. Can I eat the toilet cooking? "After speaking, Lv Qiujian regretted it. I will cook for a while!

At this time, Lu Rui's face was almost flushing to his neck. His feelings were just a joke! Lv Qiujian turned to comfort, "In fact, I don't blame you. The average person hears the names of

gravitational waves and material waves and they can definitely be bluffed, but these nouns are not only because of those words, but It is the strict logical derivation, complete theory and countless mathematical formulas behind these nouns! If you only know these words, you can win the Nobel Prize. Then the Nobel Prize should have been given to the Blue Cat! People are in the cartoon It's much clearer than this one! “

“Although this is what I said, it must have been a long time to see which Mr. Guo looked like. Should we not respect this person who pursues his dreams? Or maybe he understands his mistake? “Waking up from depression. Lu Rui ’s petty bourgeoisie recurred, and those who pursue their dreams are worthy of respect, right?

“People who pursue their dreams are indeed worthy of respect! But it does not mean that they are delusional!” Lu Qiuqian continued, “First, it is unreasonable to tell him, and he will not stand here if he can be convinced! Second It is okay for me to respect his dream! But who can respect physics, mathematics, and the dreams of tens of thousands of hard-working scientists from Newton to Einstein, from Ball to Witten? The delusional respect is the greatest disrespect for science! “

Perhaps I feel that my tone is a little serious. Lu Qiuqian changed the saying, “The gravitational wave is very weak, and scientists may not be able to find it with the most advanced instruments, and this Mr. Guo directly talked about the application of gravitational waves. What is this not delusion? “

“Besides, the support for science will cost a lot of money! The laser interference gravitational wave observatory built by the United States cost 350 million US dollars. Do you think we should give him 3 billion yuan for his research? Support? “

“Surely not!” Lu Rui blurted out. She is also a person who pays personal income tax. Give her hard-earned money to someone like him to realize her dream. It is impossible without thinking! If you want to support it, you might as well choose the career of Dr. Lu in front of you. At least Dr. Lu has already proven himself?

“Hey, it is actually a question of popular science! With the development of modern science and technology, science is getting farther and farther away from ordinary people!” Uh, it seems that ancient times are similar! People in ancient Greece may not understand Archimedes' research if he understands what he is doing? “If it is not an insider in this field, it is difficult for outsiders to understand their research, even for Nobel Prize-level scholars; so this requires the popularization of scientific knowledge. So that the general public can master the most basic science Common sense and scientific way of thinking, people like him will naturally be less! “

Lu Qiuqian remembered his plan to write an undergraduate general book. It seems that he can write now! Then if you can win the award, it will be sent when the news is most exposed after the award.

“Oh? Dr. Na, are you going to do this work?” Lu Rui also thought of this.

“Well. There is this plan! Professor Freeman Dyson and Professor Stephen Hawking have also made outstanding contributions in the popularization of scientific knowledge, and I think I have an obligation to write an undergraduate general book!” You can start warming up!

Wow, I finally got a valuable piece of news. I did n’t feel embarrassed about this embarrassment. Lu Rui thought happily, “I must buy one by then. After reading it, I ’m afraid there wo n’t be such an embarrassment today. Now! “

After this episode, the distance between Lu Qiuqian and the film crew was shortened a lot; they also picked and picked when buying vegetables, and Xiao Yue also followed the kitchen to help when cooking; and Lu Rui Once again revealing an embarrassing look, she and Xia Xiao have always only eaten but not done!

So after the meal was over, she quickly helped Xia Xiao to clean up the tableware. After a short break at noon, she began to work and film in the afternoon. Lu Qiuqian walked around the awards ceremony to see and give some small opinions from time to time.

In the evening, the members of the film crew once again won big gains, watching Lu Qiuqian and the world’s top mathematicians talking easily, probably worth the trip, but a little depressed, when Lu Qiuqian was talking with these mathematicians It seems that there are a lot of languages used, and what they can hear is English, French, German, Russian, and neon. It seems that when they go back, they will have to find someone to translate!

Chapter 362 - Pleasant communication (29/40)

()

,

“Dr. Liu, it’s your turn to award someone else this year!” The venue was not just foreigners either. Dr. Liu Pengbo, who won the award last year, also came here, and Lu Qiuqian also brought over three students including Ye Chu. This is the benefit of studying under them. Which other undergraduate students can be involved in the gathering of these mathematical elites?

“I just chatted with Tao Zhexuan and Wang Yuexin, and their views are very inspiring for my subsequent research!” Liu Pengbo was quite emotional. “Having talked for half an hour, I learned more than a month of studying alone! It would be nice if such a party could be held regularly! “

“I’m afraid it’s a bit difficult. These people are all around the world. It’s not easy to call them together!” This is why the mathematics of Princeton and the French Institute for Advanced Studies can be ranked in the forefront of the world. Home discussion, if you want to grow fast, you can’t!

“Also, if I wanted to communicate with them before, I had to go to the United States and France, and now at least once a year I can meet them at home, which is much better!” Liu Pengbo nodded.

“Xiao Lu! You won glory for your alma mater this time!” The vice president who hosted these mathematicians on behalf of Peking University also saw Lu Qiuqian and hurried over to shake hands.

“Today I am proud of my alma mater, and tomorrow my alma mater is proud of me, but this is what you taught us at the conference when I was enrolled!” Lu Qiuqian laughed jokingly.

“Haha, it’s rare that your memory is so good!” The vice-principal couldn’t remember whether he had said such things. “When I went abroad to exchange, I said that I was from Beijing Normal University! Everyone nodded, oh, yes The school in Hua Guo! I just reported the name of the school last month, and other school representatives who attended the meeting immediately blurted out. I know that is not the school that Dr. Lu Qiuqian used to study! Because of you, our school International popularity has greatly increased to a new level! “

Lu Qiuqian was ashamed for a while, which was a bit overrated. Quickly and promptly; the vice principal said two more jokes, and suddenly his face fell, “But Xiao Lu! Some things you can do are not too kind!”

“Uh, what’s the matter? You also know that I’m young now. There are inevitably places to do things. If you feel that you have problems, just say it!” !

“Look, you gave a speech at the University of Tokyo, but when you came back to your alma mater, there was no movement! That’s not enough!” The vice-principal was almost ready, and revealed his purpose. “It’s a rare trip back this time. In any case, have a good chat with your brothers and sisters!”

“I’m afraid I can only put it in the morning the day after tomorrow. I’m going to the airport the night after tomorrow. The ticket for home has already been set!” Lu Qiujian calculated the next schedule. The award ceremony will be held tomorrow. Time is only so short!

“Okay! That’s it! I’ll arrange the staff to prepare for it!” The vice principal’s purpose has been achieved, and he left the exchange meeting with satisfaction.

Hey, it’s really busy with your feet! But what exactly is the speech to Beijing Normal University the day after tomorrow? Do you repeat your question at the University of Tokyo, or do you talk about other things?

Never mind. Let’s continue with that topic! In this way, it can also show your eager desire for space exploration programs. If the court is intentional, it will certainly respond to it!

“Aha! Terence, I haven’t seen you for a long time!” After thinking clearly, Lu Qiujian rejoined the exchange of these mathematicians and greeted Tao Zhexuan, Villani, Smirnov and others.

“Ly, you had caused me a lot of trouble a while ago!” Tao Zhexuan quipped as soon as he saw him, “Because of you, I delayed my appointment with Laura!”

“Oh? What’s the matter?” Lu Qiujian took a glass of champagne from the waiter’s tray and walked to sit next to Tao Zhexuan.

“That day I had an appointment to go to the movies with Laura! A little genius who took over Caltech suddenly came to me with some math problems!” Tao Zhexuan said Shelton’s story with a smile. Finally, I summarized this story, “He first planned to do research on dark matter, and later changed it to gravitational wave under the guidance of the tutor! Fortunately, he changed his direction, otherwise when he saw your previous stage of discovery. Really I do n’t know what kind of expression will be! “

“Uh, are you talking about gravitational waves?” Lu Qiujian was sweating suddenly. I seemed to persuade the country to increase investment in this area yesterday. If the state restarts the Lyra plan to build more high-end detection equipment, Who will find out that the gravitational wave is really hard to say!

The time to discover gravitational waves must be much longer than the time that Lu Qiujian discovered dark matter! Did the poor child work hard for several years. Then he was robbed of the honor he deserved by Lyra? Gee, it’s really unlucky!

But the research competition is so cruel! I only remember the name of the first discoverer. Behind the three Nobel Prizes won by Higgs, Braut and Engle, there are three other scientists who also proposed the Higgs mechanism crying in the corner! Who made their articles later than Higgs and others?

Of course, Sheldon will certainly not get nothing in these times. According to Tao Zhexuan, the other party should also be a great genius. Even if he is unlucky and he has not become the first discoverer, he will definitely become a world-class scientist.

“See? No one is a gold medal winner, but others have already made admirable results! I’m afraid you don’t want the gold medal to be the most glorious moment in your life?” Lu Qiu Jian pointed to which Zhenghe Said Perelman, the Lucia man who was very happy.

Lu Qiu Jian refers to Stanislav Smirnov, who is currently teaching at the University of Geneva. At the age of 16 and 17, he won two full marks and gold medals in the International Mathematical Olympiad. He later obtained a Ph.D. from California Institute of Technology and worked at Yale, the Max Planck Institute in Germany, and the Princeton Institute for Advanced Study.

Smirnov has profound research skills in the field of statistical physics and is also one of the winners who will be on stage tomorrow to receive the award.

Although Hua Guo has also produced many full-scale and gold medal winners in many international mathematical Olympiads, no one has reached Tao Zhexuan, Perelman and the Smirnov mathematician in front of him. Qiu Jian placed his hopes on his students.

Chapter 363 - Awards and presentations

“Several hard work! My work is here today! Let’s see you tomorrow!” From the exchange center, Lu Qiu Jian and the reporters of the court court waved goodbye! I’ll go back to Xia Xiao Iron Gallbladder Trainman in a moment, this is not suitable for shooting drops!

“Thank you very much, Dr. Lu, but today is very rewarding!” Xiao Yue, who has the deepest qualifications, said that originally the court station only planned to do a special program, but tomorrow’s highlight drama awards ceremony and speeches were not filmed. The material, the time of one episode is not enough anyway, it seems that this interview will be integrated into a series of programs!

“Yes, yes! Today’s interview is completely different from what I had imagined!” Lu Rui stared at the stars. Lu Qiu Jian just held a wine glass and communicated freely with those mathematicians from all over the world. It was really handsome. Alright!

“I hope that more young people will be interested in scientific research because they have watched your program, so our program will not be done in vain!” The controllable nuclear fusion program requires massive human support, and there is a lot of talent. Young people who join the study have one more chance of success sooner.

Several people waved goodbye. Wang Qiju drove his car back to the imperial court. They had to stay up all night to process the collected materials. Lu Qiu Jian went to his residence. Hey, he left Xia Xiao alone in the house. All day long!

Opening the door, Xia Xiao is still devoted to drawing comics in front of the computer. Lu Qiu Jian walked gently and hugged her shoulder from behind, “Did I eat well when I was not at home?”

“I tried to make two dishes myself at noon!” Xia Xiao’s face turned red again, and he hummed like a mosquito. “After I finished it, I tried it. I couldn’t eat it at all, so I had to order takeout.”

“Haha, you and you!” Lü Qiu Jian felt distressed for a while after the laugh. Hey, I really do n’t know how she spent these hours in neon, “No wonder you feel thinner than when you left the capital! Waiting for us to go to Germany together. I guess I wo n’t be as busy as now, It ’s time for you to make good food every day. Feed you fat! “

“Don’t get fat!” It seems that a girl is sensitive to this word! Lu Qiu Jian kissed her cheek, and walked into the kitchen neatly to pick up a few small dishes.

After eating supper, they lay in front of the sofa and watched TV for a while. Then they went back to the bedroom and played the game of Iron Galleon again, then hugged each other to sleep.

Early the next morning, the trio of the court station visited on time. After breakfast, the group arrived at the venue of the award ceremony. Unsurprisingly, they met a lot of colleagues here, many of whom were like the court. Film crew working at Taiwan; these media reporters saw them full of jealousy. Hey, we won’t get the opportunity to interview for Mao!

The award ceremony was not much different from last year. The president of Beijing Normal University first gave a welcome speech and welcomed mathematicians from all over the world to

Beijing Normal University. Then Lu Qiuqian went back to review the development of mathematicians last year, and then the formal The awards ceremony is now!

There are six winners this year. In addition to Smirnov who greeted last night, two mathematicians from the United States, two from France and one from Germany won the award. Among the winners, Chinese scientists did not appear again.

But it does not matter, in the past year the number of papers published by Chinese mathematicians in his journals has gradually increased. It has now surpassed Germany and Japan, occupying the third place after the United States and France, presumably after a period of incubation. Next year, there will be no such thing as today.

After the winner list was announced, the last winners came to the stage to award the winners. Perelman naturally presented the award to Smirnov. Although the old Mao Zi is no longer the scary red empire , But their geniuses are still emerging.

Tao Zhexuan gave awards to the two winners of the United States. The last French winner gave him two trophy and a cheque of US \$ 100,000. Liu Pengbo gave the award to the German winner in the end.

Lu Qiuqian looked on the stage. The mathematician who was present this year is much stronger in quantity and quality than last year. Perhaps the award he founded in a few years will be eligible to compete for the glory of the three major awards in the mathematics industry !

Used lunch together at noon. After a short break, this afternoon is the time for several winners to elaborate their academic ideas. Lu Qiuqian sat down and listened carefully. The six winners brought him a lot of surprises. Some of their results can be directly applied to the study of controlled nuclear fusion.

My ten million dollars and the energy I put into the award have not been wasted! How much precious time their achievements can make their Jason students!

The speech was over. The award ceremony came to an end. The Beijing Normal University who would like to stay and continue to communicate will provide convenience for them. If they are busy with work, they will rush to the airport overnight.

The next day, Lu Qiuqian's speech at Beijing Normal University also kicked off! The largest auditorium of Peking University is full of people there are students and teachers of Peking

University, and there are also audiences who rushed to Beijing from other schools or even from other places.

This is also the reason why the news of the lecture was only released one day in advance. If the time is more ample, there will be more people who must come?

The students and teachers of Peking University are full of pride. There are many first-class scientists who come to Peking University to give lectures. Among them, there are many winners of the top international awards such as Fields Award, Nobel Prize, and Lax Award. The Nobel Prize winners of Beijing Normal University (they may count Yang Li from the Southwest United University), but those are too long apart, and the pure Nobel Prize candidates like Lu Qiuqian are still the first!

After the introduction of the president of Peking University, the lecture officially started. In fact, there is no need to make an introduction. The students and teachers here also have Lu Qiuqian who does not know one of the best alumni in the history of Peking University!

“I am very happy to go back to my alma mater again. In addition to my younger brother and younger sister, there are also my seniors and sisters, my teacher, which makes me feel a little panic!” Slowly walked to the podium Previously, Lu Qiuqian began to greet the audience.

This sentence makes people a little trance, yeah, almost forgot, this talent on stage has just graduated from the undergraduate less than two years! There are a lot of students who are studying for postgraduates and Ph.D. under the platform are his elder sisters!

It 's us who should be apprehensive, right? Those seniors and elder sisters were sweating suddenly, and the younger brothers were so prosperous. We haven't graduated yet. What a shame!

Chapter 364 - Domestic matter

The commotion in the audience is not over yet, Lu Qiuqian has already started his own speech, “The topic of my speech is” Out of the Cradle-Human Future Technology Outlook “! I guess with a cheek, maybe some students have already watched I've lived my video of this speech! “

Indeed, shortly after his speech at the University of Tokyo was completed, some overseas students of China sent the video back to China, and it made a lot of waves in domestic universities.

“However, there is a saying that important things have to be said three times. This is the second time. Please do n't dislike it! At the same time, although the topic of my speech is the same as the one at the University of Tokyo last time, but The details are still different! “Then Lu Qiuqian began

a formal speech. Like last time, he listed the major scientific breakthroughs made by mankind since the beginning of the 21st century. The stagnation contrasts, it is very exposed to his longing for space.

Then he came to a different place. The direction he gave this time was more specific and more instructive than when he was at the University of Tokyo last time. As the saying goes, the water is not falling outside the field. If there are students or teachers present, To benefit from it, thereby promoting the development of Huaguo technology, there is no need to speak in vain.

“Okay, this speech is over here! Thank you for taking the time to listen to my speech during your busy schedule. I hope you will gain something!” Two hours later, Lu Qiuqian finished his speech , Thank you bow.

The thunderous applause sounded instantly, and he refused to stop for a long time. Lu Qiuqian bowed again and again to thank the applause for stopping. The result of each bow actually made the applause become more heated!

The last few principals came to the stage and pressed down with their hands, only to calm down the passionate young people who were inspired by Lu Qiuqian’s speech.

Next is naturally the time to answer questions. A teenager wearing glasses was lucky to get the first chance. He took the microphone and asked, “Dr. Lu, I am Ma Yang, a sophomore in the Computer Department of Beijing Normal University. What I want to ask is which of the so-called ‘talent’ and ‘acquired learning’ is more important in scientific research! “

This spectacled man is obviously the best in school, when his problem has just ended. There was a whisper of whispers from the audience, “He is Ma Yang? It is said that he can remember that guy? It seems to be his national champion of the year?”

“Not only good memory! His abstract thinking is also keen! It ’s just that he seems a bit lonely and introverted, and he does n’t like to deal with people, but genius may be different from us mortals!”

“I think so about this question!” Lu Qiuqian thought for a while and began to answer. “People usually think that talent is more important to mathematicians or theoretical physicists! But what I want to say is that people often ignore the learning they have received since childhood, this kind of learning does not necessarily come from school, there is also self-learning . “

“Take Grigor Perelman, who just visited Beijing Normal University! Grisha told me that in addition to problem-solving or problem-solving, problem-solving has become his only concern. He is solving mathematical problems. During the process, he constantly learns new knowledge and new mathematical ideas. This learning process runs through his childhood, teenagers and youth, and continues to this day! “

“Gresa has talents? Certainly! But he also did not ignore acquired learning. If he neglects acquired learning by virtue of his talents, I am afraid that the gold medal will be the highest point of his life. Made such a great achievement today! “

“The level and standardization of academic training a person receives determine whether the person can make breakthrough results in the foreseeable future. Talent is far less important in scientific research than examinations and competitions, because examinations They are all completed in a limited time, and scientific research needs to last a long time; in this long process, the importance of scientific norms brought about by acquired learning will gradually exceed talent .. “

Lv Qiujian returned to the end. Ma Yang thought for a long time before nodding his thanks. “Thank you very much for your advice. I think I understand! In addition, I would like to ask one more question ..”

Hush ~ A boo suddenly sounded in the auditorium, what are you doing? Not satisfied with getting a chance? We have to wait for questions!

But as soon as Mayan ’s question came out, everyone held their breath. Obviously they also wanted to know the answer to this question, “Dr. Lu, after you get your degree, will you return to China to participate in the space exploration program? I have Without this honor to be able to come to your staff for research work? “

“There are too many scientific theories beyond human applications! So I will definitely return to China to participate in applied research after completing the dark matter research!” Lu Qiujian replied affirmatively, but as for what applications are inconvenient here It was revealed, “If you are still passionate about scientific research by then. And meet my requirements, then I welcome you to join my research team!”

Lv Qiujian did not disclose his research direction, but combined with Ma Yang ’s questions, it is easy to misunderstand that he wants to carry out research on the space exploration program! This makes the enthusiasm of the students present is even higher!

“Senior Lv!” The second person who asked a question was replaced by a girl. I have to say that this student has a higher EQ than Ma Yang. Come, “Although I am studying literature, but I am also very interested in the Space Tessor program, do I have the opportunity to join your team?”

“Scientific research also needs to be promoted! My team also needs outstanding members of literary talent!” Lu Qiu Jian replied with a smile, “Of course. Even if you don’t join my team, you can write literary works related to science. Contribute to scientific research!”

“Dr. Lu!”

“Senior Lu!”

The little girl sat down and raised more arms! The time of the lecture was delayed again and again, and it was not until the flight was delayed that the flight would be delayed.

Vehicles from Beijing Normal University sent Lu Qiu Jian and Xia Xiao to the airport. The two returned to Lu Qiu Jian’s hometown for a short holiday; then they rushed to Xia Xiao’s home in Xiangnan.

The time spent in Xiangnan was even shorter than in the northeast. Lu Qiu Jian had to leave Xia Xiao after only two days in her home.

I went back to China, accepted the consultations from the elders, awarded the New Mathematics Discovery Award, held a successful speech, and met the parents of both parties, and things were almost handled, and there are a lot of things waiting in Europe Holding him!

Chapter 365 - Back to Europe (30/40)

“Lv! Mr. Hernes has prepared a new accommodation for you! Are you going to see it?” The staff from the Bayern Club pick-up put their luggage in the car and said. 『≤

“Are you tired? Would you like to take a break with me or go to see the house first?” Lu Qiu Jian turned to look at Xia Xiao, and she seemed to be in good spirits.

Lu Qiu Jian has told her on the plane that his current residence is only suitable for him. The first thing he planned to return to Munich was to find a new house. Now that the Bayern Club has taken the initiative to help him solve this One question, coupled with the appearance that Lu Qiu Jian did not object to it, Xia Xiao soon made a decision, so let’s go to see the house first. I’m not too tired. “

“Well, let’s go to the accommodation that Mr. Henes has prepared!” Lu Qiujiang said to the driver.
“Yes, where is it? Is it not far from the school and the training ground?”

“Not far away, it happens to be near the school. You can walk to the school every ten minutes a day! In addition, the club’s car sponsor Volkswagen provides you and Ms. Xia with two cars. You can usually drive to the training ground!” Bayern The care of the club can be described as meticulous, but if Lu Qiujiang drives Volkswagen, this is undoubtedly a big publicity for Volkswagen, and Volkswagen is profitable!

The car slowly drove past the gate of the University of Munich, and then passed two blocks. It stopped in front of a quaint single building. This building has three floors, with a pale yellow wall and an orange-red roof. The balcony on the third floor is full of bright plants; there is a small garden in front of and behind the building. It is also good to stroll and drink tea with Xia Xiao in the garden every day! Looking for such a luxurious villa in such a location is really not what the average person can do!

“This villa has a total of five bedrooms and five bathrooms. There is also a study, cigar room, piano room, etc. There is also a wine cellar with red wine that has been stored for many years; you do n’t have to worry about sanitation and cleanliness, the club Housekeeping staff has been arranged for you, and they will clean it! Of course, the clubs such as chefs, housekeepers, and servants are also prepared, but they do n’t arrange it here if they do n’t know whether you like it. If you need them, they can come over immediately! The staff said while taking them around.

“This is not necessary! Both of us like a quiet life!” Lu Qiujiang politely declined their goodwill. Xia Xiao is a house lady and she is very sensitive in her work. She does not want strangers to live with them.

The whole building was turned around, and Lu Qiujiang was very satisfied. The bedding and the like on the bed knew that it was newly changed. The refrigerator was slowly stuffed with various fresh vegetables, eggs, and meat. It was no problem to start cooking immediately. In other words, the two of them can live immediately.

“Thank you Mr. Hernes, I am very satisfied with this house!” Back to the lobby on the first floor. Lu Qiujiang said.

“Just like it! This is the residence in the city. If you want to take Ms. Xia to travel around, whether it is King ’s Lake, the Black Forest or the Alps, we have prepared a holiday villa for you! As long as you inform before departure You can check in at any time! All costs will be borne by Bayern! Of

course, this house is also included! “After the staff got up and prepared to leave,” Since my work has been completed, then I will not disturb the two! “

“The study is facing the garden, and the lighting is also very good. Let me use it as your studio! Which one do you like in the bedroom?” Sending the staff away, Lu Qiujiang and Xia Xiao began to study how to allocate the room.

After the allocation, Lu Qiujiang opened the suitcase of the two. Place various items in the place where they should be placed, and then make a Munich-style dinner for Xia Xiao personally; after dinner, the two chatted casually in the garden while drinking tea, until the sleepy attack came back Go to the room and sleep.

Early the next morning, Lu Qiujiang and Xia Xiao had breakfast. Coming to the University of Munich together, she was curious about Lu Qiujiang’s daily life and places to study!

First went to the laboratory to say hello to Professor Xuft and others, Xia Xiao presented a small gift prepared by him, “Thank you Professor Xuft and your classmates for taking care of Xiao Lu!”

“Huh. He is taking care of us on weekdays! The entire laboratory knows what problems have been encountered in the process of learning and research, just find Lu! He can definitely solve it for you!” Dietrich Shrugged.

“Lv is the best student I have brought! I originally thought he was excellent in academics and sports. I didn’t expect to be enviable in life!” Professor Xuft also made a joke.

“No wonder when we went out to play, Lv was not interested in those girls! If I had such a girlfriend, I am afraid I would have no interest in those ordinary girls!” Ludwig and Frederick whispered.

“Lv, this is your first day back to Munich, and there is not much work in the laboratory, so you will take Ms. Xia to go around Munich!” After a lively moment, Professor Xuft gave reasonable consideration to Lu Qiujiangfang It’s fake.

“Okay, thank you, Professor!” Lu Qiujiang nodded his thanks. He didn’t go to the scenic spots first when he came out of the laboratory. Instead, he moved his previous residence to the current villa in batches.

He was relieved when things were done, but fortunately he did not meet Professor Teodor-Hensch at school. Otherwise, he really did not know how to say hello, he first helped Higgs grab. After leaving the Nobel Prize of Professor Hensch this year, he became a popular candidate next year, which is equivalent to delaying him for two years!

Such a busy work, it is time to eat at noon! This time Lu Qiujian did not cook by himself, took Xia Xiao to the famous Michelin restaurant Doremere in Munich, and tasted the skills of celebrity chefs; in the afternoon, she took her to visit Bodhi Street, Brandenburg Gate, Munich Churches, Wittelsbach Palace and other places of interest.

“There are also Neuschwanstein Castle, Lake Königssee, the Black Forest and the Alps near Munich, but these places are a bit far away. Let’s go when you have a rest!” Xia Xiao’s body is weaker than him, and his long-distance tired. Not completely restored.

On the third day, Lv Qiujian finally had time to report to the Bayern Club. He drove the car provided by Volkswagen to the training ground, and he got good news as soon as he got out of the car.

“Lv, prepare to join us to participate in this year’s World Football Awards Ceremony! According to my news, your hope of winning is very great!” Beckenbauer said.

Chapter 366 - begin

After a few days, Lu Qiujian came to Switzerland again, but this time he came to Zurich, not the Geneva where CERN is located. The fifteenth FIFA World Football Awards will be held here.

The result in the selection of this award, Lu Qiujian once again defeated Brazilian star Ronaldinho, making his dream of winning the award broken.

Lu Qiujian wondered why the reason why he was able to win the award was not only his outstanding performance in the last season, but also the reason why FIFA used his personal good image for promotion. Think about it, a pure star. With a star plus a scientist, which one is more valuable for promotion?

Won the European Golden Globe Award last month, and this time won the World Footballer, Lu Qiu built Van Basten in 1992 / Robert Baggio in 1993, George Viala in 95, 97 in 1997. After Ronaldo in 2002, Zidane in 98, and Rivaldo in 1999, the seventh player to win both awards in the same year.

So, on the second day of his award, this news was published on the front pages of major sports media in the world! Liu Yuzhou's phone was once again hit by the phone calls of major sponsors, but unfortunately they still did not get the results they wanted.

But this time, the media in Huaguo behaved a bit abnormally; those sports media still hyped Lu Qiujian's significance as a world footballer; but the official media played down the news and instead built Luqiu at the University of Tokyo. The speech of Peking University was turned out for a large interpretation.

Ok? What does it mean? When Liu Yuzhou received this news, he immediately notified Lu Qiujian, and Lu Qiujian also immediately opened the Internet to search for relevant information.

"Ah, isn't this the show they three filmed?" Lu Qiujian watched the passionate speech in the auditorium of Beijing Normal University in the video. He had to say that the photographer at the court court still had a few brushes. The people in the video look a lot more mature and stable than they are in reality. They obviously did post-processing. In order to avoid distrust because of his age and too young face.

Let's take a look at what the dogs are talking about? After fast-forwarding the video, Lv Qiujian opened a picture of a newspaper. I saw a striking title like "21st Century-A Century in Space" on the front page of the newspaper. They almost published the full text of Lv Qiujian. Speech. Some experts were also invited to interpret Lu Qiujian's speech.

"Youth News" also put this topic on the most eye-catching position, counting several major breakthroughs in the process of human exploration of the universe. From Gagarin's first entry into space, to Armstrong's landing on the moon; from the Voyager probe to the International Space Station; from the Hubble Space Telescope to the Shenzhou series of spacecraft.

"Science and Technology News" pointed out the various technologies that mankind needs to enter space, and listed the achievements that mankind has achieved in these fields. Finally, the view is that the space age does not seem to be far away from mankind.

Some online media have also joined this craze. Of course, in order to attract attention, in addition to these regular reports, they have turned out a lot of vague rumors, such as the wow signal received by the Ohio Radio Telescope in 1977, 1947 The Roswell incident, the legendary fifty-first district of the United States and so on.

They seem to explain that humans are not alone in the universe. In order to meet the upcoming challenges, mankind must develop space technology as soon as possible, so as not to be powerless by then.

This boom has lasted for several days. The government finally expressed its ambiguity. An official in the Ministry of Science and Technology said ambiguously that the government seems to be considering accelerating the progress of the space exploration program, which has aroused widespread concern in the Chinese people for a time.

It seems that the elders are so tempted by their plans? Is this the work that started the cover-up? Lu Qiujian looked at these reports and fell into thought.

So should I also respond? Lu Qiujian carefully pondered and revealed a few tone of voices when interviewed by domestic reporters via the Internet.

Li Meng, a female reporter of the Youth Daily, quickly entered a message in the dialog box immediately after receiving Lu Qiujian's reply, "Dr. Lu, how do you think the Ministry of Science and Technology's rumors about accelerating China's space exploration program?"

"This is a great thing for the entire human race. Since the disintegration of the Red Empire, the United States has no rivals in the world, and has gradually reduced its budget for space exploration. The pace of human space is too slow! Now our country China's economy has developed, and it's time for its own exploration plan! "Lu Qiujian expressed his affirmation to this news first, and then expressed his support. "I am also very interested in this plan. If the country needs it, I will Return to China immediately after graduation to participate in this great project! "

Yay! There is a front page for tomorrow! Li Meng shook his fist, and then asked, "But Dr. Lu, your previous research seems to be more theoretical; and the space exploration program is more application-oriented. Doesn't it bother you?"

"That's what it says But the space exploration program also needs theoretical guidance. I have a good foundation in mathematics and physics. Let me say it cheeky. I think the country still needs talents like me Yes! "I also have the results of the application, but it is not suitable for you to show! Before the tritium preparation and plasma data, they are all verified!

As soon as this news was published, the Ministry of Science and Technology also responded, saying that for a well-known scholar like Dr. Qiujian at home and abroad, we very much welcome him to participate in our plan.

So, the two sides began to speak out over the air through the media channels, so that China's space exploration program has once again received widespread attention. From the US government to the Chinese university students, they are all talking about this issue enthusiastically.

"You guys, what do you think of the recent actions of the Chinese government?" In the conference room of the White House, President Little Grove and his think tank gathered together. The projectors in front of the conference table were those reports about the space exploration program.

"Although China's space technology has reached world-class level in some fields, the overall development is still lagging behind, and it will not pose a threat to us at least within two decades!" This is that I thought I had found an opportunity, "It feels good for us to invest their funds in these fields! It would be great if China could be brought down like the Star Wars plan!"

"So, what do you think of this person!" The staff called up the photo of Lu Qiujian, "Does he have the ability to improve the technological level of China in a short time?"

Chapter 367 - The view of the country

"Your Excellency the President! What I want to say is that it is not an era in which the technology level of a country can be changed by one person alone!" John Marburg, President of the United States Science and Technology Advisor and Director of the White House Office of Science and Technology Policy. People with low IQs said nothing.

Coincidentally, the technology advisor of the President of the United States happened to be with Lu Qiujian. John Marburg has served as president of New York University Stony Brook, director of the Brookhaven National Laboratory of the United States, and has been in the United States since 0 years. Presidential Science Advisor and Director of the White House Office of Science and Technology Policy.

In his previous work, he assisted in formulating a series of anti-terrorism measures including anthrax detection. At the same time, in the context of the anti-terrorism atmosphere, he still provided support and assistance for research in the field of biology; this gave him a lot of Scientist support.

But some of his other actions are a bit confusing. He has expressed support for government policies that many scientists regard as "anti-science", such as the withdrawal of the United States from the Kyoto Protocol and restrictions on human embryonic stem cell research.

However, it is undeniable that he has a non-negligible influence on the future of the country's science and technology policy, and his opinion on Lv Qiujian will largely determine what response strategy the Rice Congress will make.

“So we don't need to pay attention to this little guy?” President Bush said with a shrug. “It seems that I have a chance to meet this little guy, but unfortunately he had returned home!”

The Little Grove is a practice of the White House. In September each year, the previous n championship will be invited to the White House to receive the president's reception; in 200 years when he first entered the White House for two years, Lv Qiujian led The Princeton Tigers won the championship of that season; Lu Qiujian could have participated in this meeting, but he left Princeton in July to return to Beijing Normal University, so he missed the meeting with the small bush.

Marburg's mouth moved. What is the time to discuss national policy now, do you pull this dry wool for me? No wonder the media is so low on you.

“Miligan should not ignore any threatening factors!” Condoleezza Rice, who belongs to the hawks, is much more vigilant than the small bush, “I think we should take some measures.”

“What kind of means? Did he get rid of him? Please. It is not the era of the Cold War! He is not an Iranian nuclear technology expert! We have no need to bear the anger of China because of him!” Xiao Shugong shrugged. The Rice proposal was not taken seriously.

“It is true. Although Lu may be the most talented scientist in this century, he is engaged in theoretical research, which is completely different from money! If Franklin Yang was to return to China, then Kimber would definitely not say Out of his top five divisions. “Marburg took Qian Xuesen and Yang Zhenning as an example for comparison.” He may put China's basic research to a higher level, but it cannot quickly improve China's ability to apply science and technology. “

“Then why did we bring Einstein and Boer to the United States during World War II?” After the small bush had just rebutted Rice, she began to target Marburg again.

“Miligan welcomes talents from all over the world at any time! Great scholars like Einstein and Bol will definitely not miss it! But if there is no Oppenheimer and Fermi, without Milian's strong economic strength and engineering foundation, even if there is A hundred Einsteins can't make an atomic bomb! Lü's theory is far farther from the theory of relativity than the atomic bomb! If he is willing to come to the United States, we will definitely welcome it. But if he wants to return to

China, we need not be too excited! ” Marburg felt congested, and it was too tired to talk to a layman.

“It doesn’t matter if he comes from a small country like Lijiapo, Thailand, Myanmar, or even neon, India, Lucia! But he is going to go back to China! Since the disintegration of the Red Empire, the country that has the greatest threat to Rice! Any country in China A breakthrough in a field is a threat to the United States! “Rice Yeran insisted on her own opinion!

“We can provide him with a lucrative position! Plus sufficient research funds!” Marburg made his own suggestions. “The treatment of scientists in China and those of researchers in America is too pitiful! And I do n’t think Hua Guo will give him too much research funding, I think he probably has no way to refuse this invitation! “

“He doesn’t look like he’s short of money! His annual salary for that football team is six million euros! Not to mention that he has a stake in the Renaissance company in Simmons!” Rice said, and Lu Qiu was built in Simmons. The secret that the company has shares is certainly not to be concealed from the intelligence services of the United States.

“Six million euros! The combined salary of my two presidents was less than a year!” Little Grove pretended to be angry and made a joke, he was ready to end this meeting that seemed meaningless to him, ” Okay, just give him a position as John said. Get him to the United States! “

“It’s a little bit early now, and wait until he wants to get a degree! If he wants to enter the university we will give him the position of lecturer professor at a famous school! If he wants to enter a research institution. I I think ns will welcome him! “Marburg threw out his prepared chips.

Chair professor’s price is not low, it is awarded by the university to full-time teaching staff with lofty academic status or major research achievements. Although the regulations vary from university to university, as honorary titles, lecture professors are often not subject to the restrictions of the number of hours taught by general professors and the age of retirement. They are the scholars with the highest academic status in a university.

Among them, the most famous ones are the Lucas mathematics professor seats at Cambridge University, which are awarded to researchers related to mathematics and physics. Only one person is granted at the same time. Newton, Huygens, and Dirac have served as the chair. The owner of the chair is called Professor Lucas. Stephen Hawking is said to be the next candidate for Professor Lucas.

Miguo also has its own lecture professor seats, such as the professor of the Massachusetts Institute of Technology and the professor of Stirling of Yale University. And Professor James-b-Duke of Duke University, etc .; if it is put in the fantasy, it will be almost a legendary character at the level of virtual combination.

Rice had originally wanted to oppose, and the school's teaching staff would just go away. ns has a lot of secrets, but when he later wanted to get him to the United States, it was easier to control than in China, so he temporarily gave up the controversy.

So the meeting of the Americans was over. Their positioning of Lu Qiuqian was an excellent scientist, but the threat to the Americans was not great.

Chapter 368 - Hawking

The plan of the American people Lv Qiuqian naturally cannot know, but if he knows it, he may only feel secretly happy! After he attended the awarding ceremony of FIFA World Footballer, he was free again.

It 's Christmas now, the Bundesliga enters the winter break, the UEFA Champions League group stage has ended, and the knockout will go in February, and the University of Munich will also give students leave; he wanted to take Xia Xiao with this opportunity Play around in Europe, but the call from cern disrupted his plan.

“Lu, congratulations, the second experiment is still a success!” Dr. Evans said with a little excitement. “This experiment again found evidence of the existence of dark matter, exactly the same as you predicted in that article. ! “

“Ah! This is really good news!” Said on his mouth, but there was no overjoyed expression on his face, because according to his calculations, the evidence should be found, and it would be strange not to find it!

“Although the statistical requirements are still not met, Professor Hawking seems to have planned to fulfill his bet! He is now looking for you everywhere in cern! I think you can come to Geneva for a trip, anyway, you are alone alone, it is better Come with us for Christmas! “He did not know that Lu Qiuqian brought his girlfriend!

The scenery in Geneva seems to be good too! Lake Geneva, the Alps, the Palais des Nations, and the watch museum are all worth taking Xia Xiao to see! As for the original plan, it will be postponed! Those beautiful scenery won't run long, and Hawking's singing can only be appreciated once!

He and Xia Xiao simply packed up, and the two embarked on a journey to Geneva. This time Lu Qiu Jian did not buy a ticket, but chose a tourist train. During the trip, you can enjoy the snowy Alps outside the window, The lush Black Forest, the ancient castles in the mountains and the stream under the bridge gave Xia Xiao unforgettable memories.

For professional reasons, as soon as she saw the scenery that impressed her, she left it on the paper with a brush. Of course, now I only draw some sketches, and the work of refining and refining will not be completed until later.

“Lu! If you can defend the title this year, I will also sing for you personally at the Stade de Paris!” As soon as he entered the cern exchange center, Brian May said welcoming him, he was also invited by Hawking Here is ready to accompany Hawking’s singing.

“Thank you for your blessings, I think I will not let you miss this opportunity!” Lu Qiu Jian said confidently, this season his schedule is much looser than last season, and there will never be a handicap from last season Missed the game!

“Is this your girlfriend? Really a beautiful lady!” Say hello to Xia Xiao, Brian Meiyong pulled a man with white flowers and long hair wearing glasses. “This is Pink Freud’s drummer Nick Masson. Look at the special shape he made for Feynman for this show!”

“This is the second time I have collaborated with Professor Hawking! I can’t wait to start!” Nick Mason said, taking the drumstick in his hand and holding a flower.

“Haha, I have prepared the song! It is a polka dance from Finland! We can modify it to our style!” Lv Qiu Jian naturally prepared “Song Onion Song”, he had heard Goth before Would n’t it be difficult to change the metal version of “Onion Song” to the rock version?

“I already knew that I took you to my rehearsal room last time in London! I really want to know what your bass level is!” Brian May took over the score and said that modifying the tune was a piece of cake for him.

“Lv, if your bass level does not meet my requirements, I will kick you out of the team!” Hawking was betrayed by losing a bet, just like a child who discovered a novel toy. The show is full of interest.

“As long as you help me find a bass. I can immediately prove my strength!” Lu Qiu Jian was not willing to show any weakness; to a certain extent, bass can be said to be the cornerstone of the

entire band. It is a melody in harmony. The guide of the voice, it is the command of everyone in rhythm. The quality of the bass player directly affects the effect of the band, and Hawking's ridicule is not unreasonable.

"Just I brought John, but he is ready to replace you at any time!" Brian May shouted to the back, and the Queen's bass player John Diken came over carrying a piano case.

"Come. Lend your bass to Lv for a use! Let's see how his level is!" Brian May patted the old partner's shoulder; John Diken said nothing from the back without saying a word. Remove the piano case and open it, and take out the guy who ate himself and handed it to Lu Qiuqian!

Lv Qiuqian knew the extraordinary of this bass once, once Brian May in order to achieve a better performance. After dismantling the fireplace in his home, he used his wood to create his own guitar red-. As his teammate, John Deacon is definitely not a normal guy.

Lv Qiuqian tried the lower voice, adjusted it slightly, and started with a beautiful hit hook, playing the Queen's classic track "the-game". This is the queen's work that best reflects the strength of the bass player. First, under Lu Qiuqian's interpretation, the deep performance of the bass will be most vividly!

As he played, more and more people came around. Brian May and John Deakin and the next Nick Mason opened their mouths at the same time. This is completely a professional level of performance!

At the end of the song, John Deacon was the first to applaud. In his opinion, Lv Qiuqian's skills were perfect, and he may only win slightly if he had experience.

"How is it? Professor Hawking? Did it reach your eyeballs?" Lu Qiuqian said after returning the bass to John Deakin with both hands. The technique is purely pure, but lacks emotional tension; although still It's worse, but it can barely meet my requirements! "Hawkinsha said with a pretext, what a senior music critic looks like!"

Ha ha ha ha, his evaluation won a laugh, everyone had to applaud his sense of humor again.

So, the four members of the band were settled in this way. The guitarist was Brian May, an astronomer from Imperial College, the bassist was Lu Qiuqian, a physicist from the University of Munich, and the drummer was Nick dressed as Feynman. -Mason, and the most popular lead singer is Stephen Hawking, a professor of physics at Cambridge University!

This lineup can be described as extremely luxurious, they will bring the most exciting show for Cern's Christmas, ah, the rock version of "Onion Song"! (

Chapter 369 - Special Christmas gifts

Cern, as a large institution with thousands of scientists, has a complete life and entertainment package. It is not a very difficult thing to find a rehearsal place here; so I waited for Brian May to modify the tune and lyrics, They walked into the rehearsal room in a mighty way.

"Professor Hawking, we all have no problem, it's up to you now!" Nick Mason and Lv Qiujin said after watching Brian May's modified tunes and lyrics. For these professionals, this song You can get started on both sides of Quzi's face, but it's a little harder for Hawking.

"Show me!" Hawking glanced at the score and lyrics, "You guys go to rehearse first, I'm familiar with it first!"

"Hmm!" Brian May shrugged, copied the guy and led them with Lv Qiujian. They plugged in the power and started the rehearsal. The violent guitar sound, heavy bass and rainy drum sounds sounded in the rehearsal room. .

Xia Xiao nodded and beat the beat, while holding up the brush and left Lu Qiujian playing bass on the paper, leaving him on the paper; Dr. Evans looked at them with a chin on his chin, and he couldn't help it soon Beat the beat with his feet.

"Onion Song" is a transliteration of a Finnish Polka folk song. The meaning of the lyrics is to say that there is a boy who wants to go out dancing with another girl, but the girl's mother is not allowed, so they secretly went out and danced Polka all night, but when she came back, her mother was waiting at the door to catch someone Too. The boy told his mother that he must be with this girl.

So its tune has a heavy dance rhythm. It is normal for Dr. Evans to have the urge to dance with the rhythm. It is not just him. Dr. Lafayette and Higgs have also begun to shake their heads and twist their bodies.

"Polka tune from next door

I can't recognize my feet, oh!

Ieva 's mother carefully stared at his daughter just

Ieva still managed to hide it, you know

Because no one will listen to mom nagging

When everyone dances happily beside .. “

At this time, Hawking was also familiar with the lyrics and melody, and hummed softly. He had to admit that his unique electronic sound and his song had a special cute point. He seemed to be particularly satisfied with the result. The singing voice is getting louder. All the listeners who heard his singing couldn't help but turn around and looked at him in surprise.

“Hey, you really picked a good song!” Brian May and Nick Masson looked at Lu Qiu Jian with an incredible eye. They were all old guns that were music decades later. It is natural to know how difficult it is to find a suitable track for Hawking 's electronic sound, and now it sounds like this piece and Hawking 's voice are seamless.

Ooooo, why didn't you take me one! Originally just watching the lively John Deacon couldn't help but envy, originally thought it was just a joke, but now it seems that this song has the potential to become a popular golden song!

“Hey. Brian!” After listening for a while, he finally couldn't help but say, “I think you still lack a rhythm guitar!” He seemed like a teenager standing by the basketball court watching other people playing at the moment. It's the longing expression of “Bring me one, bring me one”!

“Do you have a guitar?” John Deacon occasionally plays the role of rhythm guitarist in addition to being a bass player in the Queen Band. His playing level is no problem at all.

Ha, Nick Masson could not help laughing out loud, but fortunately he agreed! Otherwise, now he can only beg for the band to add a keyboard player like him, and he plays this very slippery.

“Geneva is not a small city! He wouldn't even have a piano store! I'll take a taxi and buy one!” John Deakin will go out and take a taxi!

“Don’t be so troublesome, I remember that our experimental group’s Aramis has a good guitar! I will borrow it from you!” Cern thousands of scientists, trying to find an amateur who likes to play guitar is not difficult. Soon someone came out to help John Deakin!

A phone call passed, and half an hour later someone found it with a piano case in their eyes. For music lovers like Aramis, it is a great honour to lend their pianos to the Queens ! Just wait until John Deakin returns the guitar to him, maybe he can’t play it anymore?

John Deacon and Brian May have been collaborating for thirty-five years. He joined the band very soon and worked very well with the other three members of the band. After playing three times in a row, Brian May was satisfied. Nodded and shouted to Hawking, “Professor Hawking, we are ready here! How are you practicing?”

“This is a piece tailor-made for me! I’m almost there! I’ll sing to you now.” Hawking rolled the wheelchair to the center of the rehearsal room and started his own singing. “The polka tunes from the next door made me unwilling to step on my feet, oh! ..”

Sounds pretty good! Bryan May held the guitar and watched Hawking’s electronic singing, and then looked at the expressions of Nick Mason and John Deakin. They also seemed very satisfied.

“Then let’s come to practice together once!” End of the song Brian May ca n’t wait to invite Hawking to start the exercise, and the five people have been tossing into the afternoon. Finally, this song is not very difficult. nailed it.

“What are we waiting for? Go to the recording studio to record this tune now! It just happens to be a special Christmas gift for everyone!” John Deacon couldn’t wait to wait until he was satisfied at home. Said.

However, cern’s supporting facilities are complete, and a professional recording studio that meets his requirements is unlikely to exist! So the group drove to the city of Geneva. Prepare to find a professional recording studio, and record this song today!

Although it is too short to go to Christmas, it is definitely too late to make a record and release it! But with the internet invented by cern, it is still possible for this song to meet the majority of music fans before Christmas.

John Deacon ’s plan was to upload it to the Internet for fans to download for a fee, and then release a single album after Christmas, maybe this song could create sales of platinum records!

In the UK, if you sell 300,000 copies of a record, you can be called a platinum record! In his opinion, he, Brian May, Nick Mason and Hawking have the appeal, and there is no problem in achieving this goal! By the way, Lu Qiuqian is also a well-known football star! It can also bring about an increase in sales!

Chapter 370 - Single online

Stefani von Bergen brewed a cup of coffee for himself. Sitting on the second floor, he was lazily watching the sunset outside the window. He planned to close the door of his studio when the sun disappeared on the horizon. Start a pleasant holiday. $n \in$

“Stefani! Are you still in business? I plan to prepare a special Christmas gift for Sissi! What do you think of the Christmas song that I sang in person? Come on, open your recording studio and let me in Prepare a surprise for Sissi! “Just halfway through the coffee, his neighbor Federer ran up and said.

Von Bergen looked at the setting sun in the distance, and it seemed that it was only a centimeter away from the horizon! If Federer is allowed to enter the recording studio, he will definitely not be able to get off work on time, “Forget it! Judging from my many years of experience in the music industry, your own record will not surprise Sissi, but it will be almost shocking. ! And I ’m planning to close the door to start my wonderful vacation! “

“What are you talking about! Is my voice not good enough? When I was a choir when I was a kid, I received praise from the priest!” Federer continued to beg, “Stefanie, just do me a favor.” , I will double the price! “

“Three times the price will not work!” This income can not dispel his determination to start taking a vacation quickly. Besides, he is also good for Federer. If he really made this gift, Cici would definitely break up with him.

Said he began to pack things, turned off the lights of the room, went downstairs to prepare to close the door! Federer, who had been begging behind him, was ignored.

“Hey, sir, can you record now!” Just as he walked to the door, a man with his head behind pushed the door and walked in.

“Oh, sorry, I was planning ... oh, my God, I’m not dreaming!” Von Bergen stopped as soon as he said half of it. Apparently he had recognized Pink Floyd ’s drummer Nick Masson, and their band ’s poster was still hanging in his office!

“Nick, did you get it?” The second person is even more dazzling. Because of the division of the band, Brian May, who is the main guitar player, is more famous than him.

Then John Deacon also came in. Seeing these three big-name rock stars, von Bergen suddenly tossed the vacation aside, these are all idols from childhood to big! “No problem! I have the most advanced equipment in Geneva here, guaranteed to meet your requirements!”

“That’s good, but it was found!” Brian Mei breathed a sigh of relief. Obviously this was not the first recording studio he was looking for. He turned back and shouted, “Lu, it’s done! You can come in with Professor Hawking!”

“Hey, Stefani! Didn’t you say you were going on vacation!” Federer was even more depressed! You can’t do it by yourself, just ask someone else? Is this discriminating against customers?

“It is the greatest honor of my life for them to come to my recording studio!” Von Bergen pushed him aside and led them diligently, “Mr. Brian May, Mr. Nick Mason. Mr. John Deakin, Here, please! You know, I bought all your albums. Will I be honored to have your signature after the recording is over? “

“Of course no problem!” Brian May is much more aware of this situation. I walked into the recording room and glanced. Although it was not as good as her own recording studio, it was barely able to meet the requirements, and now I don’t seem to have time to find a better one! “Not bad. Let’s record here!”

“That’s good, I will debug the equipment for you immediately!” He said that he began to get busy, and later Lu Qiuqian pushed Hawking into. This made von Bergen a little puzzled.

Lv Qiuqian and Hawking are big celebrities, he will not fail to know, but what are they going to do with these three rock stars?

Soon they used their actual actions to resolve von Bergen’s doubts. Lv Qiuqian took off the guitar on his back and placed the microphone in front of Hawking.

Are you making Hawking the lead singer? Von Bergen opened his mouth wide. What song are they going to record? After the commissioning of all equipment, Von Bergen was also honoured to stay

in the recording studio because of the need to control the equipment. He stared at these five people with wide eyes, trying to see what interesting things they did!

“Are everyone ready? Let’s practice once!” Brian May said when they were all ready.

“All right!”

“Ok!”

“no problem!”

“let’s start!”

The four responded in unison. Brian May nodded his head and swept the strings with his smart fingers to start his performance. Then John Deacon ’s rhythm guitar, Lv Qiujian ’s bass and Nick Masson ’s drums followed. .

“The polka melody from next door makes me unconscious to step on my feet, oh! ...” Then Hawking’s unique electronic sound rang in the recording studio.

Oh, God! This is a Divine Horse song! It really sounds really special. Feng Bergen, who has been in the music industry for many years, does not know how to describe his feelings after hearing Hawking’s singing!

This surprise is so great that he was forgotten about his work. Fortunately, this time he only practiced, not recorded, so he was not blamed by the band.

Has been busy for more than two hours. This tune was finally recorded. Brian May collected the disc and signed von Bergen with several others.

Back at cern, he did n’t care about calling his agent immediately after eating, and during the time he was recording, the agent had already dealt with the contract with the music website; so, it was just about Christmas On the occasion, a special track that had never been seen before appeared on the homepage of the music website.

“It’s finally done!” Brian May, the busiest of the few, said to them while cutting the steak. “The website gives the best advertising position and the best sharing agreement; I also contact the record production and distribution company. By the way, they all started preparations, but they could n’t keep up with Christmas anyway! “

“Which website? I want to download a ringtone as my phone!” Professor Hawking can’t wait.

At the same time, in Europe and North America, many music lovers also saw the most eye-catching advertisement on the website. Although Brian May, Nick Masson, and John Deakin belong to two different The band, but all belong to the circle, as for what the later Professor Hawking and Lu Qiujian do?

What kind of music did they make? They curiously clicked on the audition option.
