

D. School 371

Chapter 371 - Internet boom

amount, what is this! After listening for a while, the fans couldn't help laughing. This song is so inexplicably sung by such a sound!

"Hahahahaha!" Miller really thought the song was too interesting, and he laughed loudly on the table.

"Miller! What are you laughing at?" His girlfriend Susannah was also attracted by his laughter and asked to run out of the kitchen with a handful of green onions in her hand; what about holding her green onions? Oops, people are talking about Chinese cuisine recently.

"My dear, this song is so interesting!" Miller took off the headphones and turned on the speaker. In order to achieve better results this time, he clicked the purchase option without hesitation.

"Eu ..." When Hawking's electronic sound sounded in the accompaniment of everyone's instruments, Susanna couldn't help laughing, and as the song went on, she unconsciously began to twist her body and dance to the rhythm of the music.

Dancing just dancing, what are you doing with a bunch of green onions in your hand! Miller, who was taking out the dv to prepare to photograph his girlfriend's dance posture, couldn't help but spit it out; but he looked at it for a while, and it seemed more interesting to match such a contradictory prop with this somewhat inexplicable song!

So he immediately turned on dv, and then pressed the loop playback option to take a serious shot. As for the focus of the shooting, of course, the green onion that was flung in Susana's hand!

When he finished shooting, he began to upload the video on the Internet in a hurry, and when he woke up the next day, he was suddenly stunned by the six-digit number of views! This is the rhythm of Shenma. Am I becoming an internet celebrity?

Opened the comments below, almost all of them are all kinds of words and expressions representing laughter. It seems that the audience of these videos have been amused by Hawking's singing and Susanna's dance! Well, especially that green onion! Unfortunately, there is still a barrage, otherwise there will be countless barrage and then ask her where the green onion was bought!

“Miller! We should go to the supermarket to make the last big purchase before Christmas!” Just when his stomach hurt when he smiled while looking at the comments, Susanna had already changed her clothes and was ready to go out.

“Oh, okay! Here I come!” Miller Yiyi was reluctant to leave the computer and drove to Wal-Mart with Susanna!

Amount, this is the situation of Shenma! How come many people coming out of the supermarket are holding a bunch of green onions in their hands! Susanna looked at them inexplicably. Has Chinese cuisine become popular recently?

“Are there any green onions! I don’t want anything else now, just that! Will Wal-Mart be out of stock so soon!” Entering the supermarket, there are complaints everywhere!

It was easy to buy enough Christmas items-of course, Susanna wanted to buy another green onion for the purpose of failure; Miller rushed to the computer as soon as she returned home.

After refreshing. The number of times his video has been played has risen directly to six figures; in addition, many people have begun to imitate Susannah holding a handful of green onions and began to dance enthusiastically with Hawking’s music.

Was normal at the beginning. Everyone was wearing everyday clothes to dance; but by the afternoon, someone had played various virtual characters and danced with green onions!

This is a video of Spiderman dancing with green onions, and that is a video of Hulk dancing with green onions! amount. Is this a Hobbit? Why does it seem that people are not much taller than green onions! Tian An, help! Audrey Hepburn also began to dance with green onions! You give back my childhood!

“Ha ha ha ha, it’s so interesting!” In the cern hotel, Xia Xiao looked at these funny videos and laughed at the blossoming branches of flowers, Lu Qiujian was dumbfounded for a while!

“You can send the link to your friends in Neon! For example, Mr. Inoue, Mr. Fu Jian, they? Have they also read a happy Christmas!” Lu Qiujian provoked unkindly, from Ni The thing that the rainbow was born still let it return to the neon!

“Okay, okay! But where did I seem to have seen this dance?” Xia Xiao frowned, thinking about the video link to his neon friends through social software.

Fortunately, when this video spread out in neon, someone finally turned out a similar video. In the neon animation “Inoue Inoue has such a movement of throwing onions.”

So someone with a good deed immediately intercepted this action to match Hawking’s singing into a video, and the video immediately burst into neon. And spread to Huaguo through the subtitle group.

For a time Hawking’s singing went from European red to North America, from North American red to neon, and from neon to China, Pearl, Treasure Island and Korea, he became the most popular singer on the Internet during Christmas.

Professor Hawking, who still maintains a childlike innocence at such an age, was very happy. In the Cern’s Christmas celebration, he just pulled Lu Qiuqian and they took the stage together and performed again.

This craze directly led to the sales of late-stage records, and the sales of platinum records have been created in many countries.

And all this has nothing to do with Lu Qiuqian! Just when the entire network was crazy about Hawking’s songs and that unique dance, he took Xia Xiao to the Alps and started a pleasant skiing trip!

From the Alps to the Black Forest, from the Palais des Nations to the clock museum. The two spent a relaxing and unforgettable holiday. Xia Xiao left many beautiful pictures on the picture books he carried with him.

After Christmas, the two returned to Munich! Xia Xiao is busy to continue to draw her serial comics. And Lu Qiuqian started a new job.

Before, he always wanted to complete a popular science work But because the research work occupies most of his time, now dark matter has been discovered, and subsequent experiments do not need too much participation by himself At the University of Munich, there are only graduation debates left here. Bayern players are still enjoying the winter break!

So he finally had time to complete his plan! He intends to start with mathematics. Then came physics, writing the process of humans using mathematics as a tool to explore the truth of the universe step by step, and then the vast and beautiful universe.

I hope this work will make more people interested in science and devote themselves to this great work, let more people master the scientific thinking, and the person he met at the door of Beijing Normal University will never appear again Such a tragedy.

So what's the name of this book? Lu Qiuqian closed his eyes and pondered.

Chapter 372 - When humans start to look up at the stars

Stephen Hawking's popular science works are called "A Brief History of Time", "The Universe in the Husk", Freeman-Dyson's popular science works are called "Cosmic Waves", "All-round Infinity", "Sun, Genome and Internet", "Imaginary World", the names are very high, and I know it is a very powerful book.

So what is the name of my book changed? Lu Qiuqian thought about it for a moment, um, just use Da Liu's classic sentence in "Chao Wen Dao"! At the top of the document, he typed the words "When Humans Start to Look at the Starry Sky".

"When humans start to look up at the starry sky, then they are only one step away from uncovering the ultimate mystery of the universe." Thanks to Da Liu, Lu Qiuqian can no longer find this sentence more suitable as the beginning of his article.

The most important factor that promotes the development of human science and technology is curiosity. When human beings become curious about the starry sky, he will use his imagination to guess the hidden secrets in the starry sky.

Humans first determined the time, direction, and calendar by observing the sun, moon, and other celestial bodies and celestial phenomena. . The ancient Egyptians discovered that the rising water of the Nile River in the delta region coincided with the rise of the sun and Sirius at the horizon. They set the time between the occurrence of this phenomenon as one year, a total of 365 days. The whole year is divided into 12 months, 30 days per month, and the remaining 5 days are used for festivals; at the same time, the year is divided into 3 seasons, namely "flooding season", "growing grain season", "harvest season", 4 months per season.

The ancient Chinese found that the moon's profit and loss cycle can be used to measure the length of the year, and found that the twelve full moons are one year old. This discovery is one of the most accurate results of the early calendar.

The Stonehenge built by the ancient British on Great Britain can accurately understand the 12 positions of the sun and moon, and observe and estimate the rise and fall of the sun, moon and stars in different seasons.

Ancient Greek Thales carried out the first predicted total solar eclipse; Meton discovered that the moon's phase repeats on the same date of the current solar calendar on a 19-year cycle; Odox proposed the concentric movement of the sun, moon and stars around the earth; Parmenides and Democritus argued that the earth is spherical, thinking that the morning star and the faint star are the same Venus. It is also proposed that the Milky Way is made up of many dense stars; Anasagora proposed the cause of the lunar eclipse, and believed that the moon is bright due to the reflection of sunlight.

The Romans, Arabs, Mayans, Indians, etc. each proposed their own understanding of the mysteries of the universe, and made progress in different fields.

In the process of human beings exploring the ultimate mystery of the universe. They found the most powerful tool—that is, mathematics. Through mathematics, they can process all kinds of data collected through observations for a generation. At the same time, there are many data that cannot be directly obtained by observation, so mathematical knowledge such as logarithm, spherical coordinate system and trigonometric functions are generated.

At the same time, with the deepening of human observation of the universe, their requirements for observation tools are getting higher and higher, and the manufacture of these tools also requires superb knowledge of mathematics, physics, and chemistry. After Newton used the classical mechanics system to describe the macro world in mathematical language, mathematics and astronomy became more and more closely connected. Non-Euclidean geometry and calculus developed rapidly under the demand of astronomy.

In modern times, whether it is Einstein's theory of relativity or Gamoff's theory of the Big Bang. Many advanced data tools have been borrowed. It can be said that human beings cannot achieve today's scientific and technological achievements without mathematics.

Lu Qijian intends to start with the development of mathematics, gradually unveiling the process of human beings gradually revealing the ultimate mystery of the universe using mathematics as a tool, which will also be interspersed with some knowledge of physics and chemistry.

What he wants to do is not just to tell people these conclusions, but more importantly, to show the scientific methods of mankind in the process of pursuing the ultimate mystery of the universe, bold

assumptions and precise verification, so as to rule out those wrong guesses and draw the correct theory. .

The test-oriented education currently implemented by Hua Guo has guaranteed the fairness of education to a certain extent, and cultivated a batch of useful talents in a short time, but it is not without its shortcomings. Examination-oriented education often pays more attention to conclusions and ignores the process; in order to obtain better results in the exam, teachers usually let students remember those important conclusions, such as formulas, definitions, and so on. It ignores the derivation of the process that produced these conclusions.

Doing so has created a series of problems. People tend to pay attention to the process of ignoring results, but know that in scientific research, processes are often more important than results.

And when telling these conclusions, some inappropriate examples and methods are often used. For example, Newton was smashed by an apple and his head flashed brightly and discovered the secret of gravity. A steam engine.

These stories have left a deep impression on people, that is, as soon as the aura of light flashes, an invention will suddenly appear! This is one of the important reasons for the emergence of scientific delusions.

Admittedly, Edison also said that success equals 1% inspiration and 99% sweat, but I think that 1% inspiration is more important than 99% sweat. But inspiration also needs foundation. If Newton does not have deep knowledge of mathematics and physics, then he will not think of gravity from apples; there are so many apple trees all over the world. He is not the only one who is hit by an apple in the head. Most people probably only wipe the apple and eat it. Only Newton found the mystery of gravity.

In the same way, there are countless housewives who see the lid of the teapot being lifted by steam, but they will only turn off the fire and use the boiling water to make tea to brew coffee. .

Therefore, in this book, Lu Qiujian not only wants to tell people these conclusions, but also wants to show the production process of these conclusions to all readers, so that after reading this book, they have a relatively scientific understanding of science, not I will admire the tall nouns such as gravitational waves and material waves, and express my opinions without thinking.

It is obviously not an overnight matter to complete such a book, and the most important thing about popular science is that it is easy to understand and interesting. If it is as difficult as writing a paper, no one will read it, so this requires a long process.

However, he is not in a hurry. Anyway, he is gradually idle now. Some of them have time to complete, and now it is not the right time to sell even if it is written; as for the best sales opportunity, he already has a plan in his heart, just waiting. An award is announced!

Chapter 373 - Hernes' troubles

“Congratulations to Bayern Munich’s victory over Arsenal into the UEFA Champions League final! In the confrontation between the two professors, Bayern Munich led by Lv Qiu Jian easily defeated Wenger’s Arsenal with a 4: 0 record in two rounds. In no way gives opponents a chance! “At the Allianz Arena, countless fans wearing Bayern jerseys shouted Lv Qiu Jian’s name loudly, thanking him again for bringing his beloved team to the final of the European Champions Cup!

This season, Lu Qiu Jian participated in the competition more frequently than last season, especially after the winter break, he basically participated in every game. The consequence of this move is that the Bundesliga champions of this season have been lost early. Suspense, before this game Bayern Munich has included the silver plate representing the Bundesliga champions, the German Cup is also surging all the way, it seems that this season is likely to repeat the triumph of the last three championships!

This is the third consecutive champion! If there are so many teams in the Triple Crown, this team has achieved this achievement, but winning the Triple Crown has never been a feat in the history of European football! At the thought of this, tens of thousands of Bayern fans in the audience were thrilled and unable to themselves.

However, just as the audience cheered for another major victory at Bayern Munich, the Big Three in the box were dignified.

“What a wonderful feeling!” Beckenbauer looked at the crazy celebrating fans below and fell into deep memories. He said with emotion after half a day, “Uli, Heinz, do you know, today’s The scene reminded me of when I was young! Oh, yes, Heinz, you were there then! “

“I didn’t know Willy Reinak in the first season, and I played very well in the next two seasons! At that time, I was still young, and only followed you to achieve that kind of result!” Rumenig already knew Beckenbauer remembered something.

“Are you talking about the three consecutive Champions League championships from 74 to 76!” Henes is also a hero who participated in the championship process throughout the course, of course he knows what they are saying; Rummenigge has one less championship than them. It was only 74 years before Bayern Scout Willy Reinak was introduced to the Bayern Club, so he did not catch up with the first championship.

“Yes!” Beckenbauer’s voice was deep and distant, with nostalgia for the past and longing for the future. “Since the restructuring of the European Champions Cup, it has become more and more difficult to win! Even a defending champion has never appeared! Neither Sir Alex Ferguson’s Manchester United nor Madrid’s Galaxy fleet have achieved this achievement, I thought Never see Bayern’s chance of having three consecutive championships! I didn’t expect it to be right in front of me now, just within my reach! “

Beckenbauer’s hand stretched forward slightly. He seemed to want to catch something, but after a moment he had to retract his hand regretfully, and he didn’t catch anything.

“Yeah!” Hernes also sighed. They all know where Bayern’s three-time championship is their greatest hope, but this hope will soon be shattered! “It looks so close and so far! He is a gift from God to Bayern. But Bayern will soon lose him!”

“Aren’t there any chances?” Rumenig asked somewhat reluctantly. If Bayern Munich can win three consecutive championships, their total number of Champions League wins will reach seven, which will surpass Milan’s Champions League title. The second place on the list, even if Lu Qiu Jian stayed at Bayern for a longer time, it is not impossible for them to win Real Madrid more than nine times.

“The chance is not big!” Hernes shook his head. After Xia Xiao arrived in Germany, he did everything he could, providing accommodation, arranging the vehicles needed for travel, lending them a yacht to play, and invited famous chefs for them. Cooking and so on, but Xia Xiao returned to Asia a month later.

Looking at the time of parting, her biggest attachment to Germany is probably Lu Qiu Jian. Everything she did did not give her a sense of belonging to Munich, and her plan to influence Lu Qiu Jian failed.

“According to the latest news, Lv has provided Prof. Schulte with the subject of his debate, and he will have a graduation reply by November at the latest! If all goes well, he will be on the winter break next season. Leaving us to return home in time! “Hernes reluctantly spoke of Lu Qiu Jian’s latest developments.

“Can’t he return to China five months later!” Rummenigge knew that if Lu Qiu Jian left, Bayern’s chances of winning three consecutive titles would be no more!

These seasons, Barcelona's Ronaldinho and Milan's Kaka are in good shape, Manchester United's Cristiano Ronaldo has gradually emerged, and there is a tendency to become the next dominant player. Bayern without Lv Qiujian couldn't find an opponent who could compete with them.

"If the thesis defense is passed, he has no reason to stay!" Hernes shook his head unwillingly. "Since this year, he has been very enthusiastic about China's new space exploration program. Germany cannot provide him with such an opportunity. ! "

"Can't the European Space Agency?" He smiled as soon as he asked him. The headquarters of the European Space Agency is in Paris. Instead of letting Lu Qiujian go to Paris Saint-Germain , he might as well put him back home!

"The authority and resources that the European Space Agency can give are different from what China can give!" Hernes denied this possibility. "Although it is mean to say so, I still want to pray to God, Almighty Lord Ah! Please let Lu Qiujian's thesis defense fail! This way we can keep him for a few more months! "

"A Nobel Prize candidate's doctoral thesis defense will fail? What a joke?" Beckenbauer shrugged. It was like saying that Cristiano Ronaldo would not pass the Bayern Munich trial.

"What field is his thesis in?" Rumenig seemed to think of something.

"He reconstructed the model of the universe on the basis of existing theories and the discovery of dark matter." Hernes asked very clearly. After all, there are still many Bayern fans at the University of Munich.

"Maybe we still have a chance like this! We all know that Heisenberg almost didn't pass the thesis defense!" Rummenigge's voice grew from small to large, and since Lu Qiujian joined Bayern, they have all become half. Physics enthusiasts know a lot about Heisenberg 's gossip, which also inspired Rumenig.

The more he thought about it, the more operable it was, "If his thesis is about dark matter, then we can do nothing. After all, he is the most authoritative person in the field, but such a big problem is not necessarily .. ""

Chapter 374 - Rumenig's plan (3/15)

“Heinz, what do you want to say?” What does the sly Hynez seem to think of? His eyes were shining, and he turned around and asked.

“Although I don’t understand physics, but since Heisenberg’s papers may be almost rejected, then it means that there is no foolproof thing in the academic!” Rumenige sorted out his own thoughts, “And Lu will arrive There must be more than one Professor Xuft to answer! If someone has to criticize his essay, is it still possible for him to postpone his graduation and continue to revise his thesis? In this way, as long as it persists until April. Oh no, Even in March, when he entered the Champions League knockout, Lu was probably embarrassed to leave directly? “

“But there are risks in doing so? Who would bet on his academic reputation for Bayern? Lu Ke is not a general doctoral student! The professors at the University of Munich estimate that there are few higher than him!” Beckenbauer Er retorted.

“Yes! So I asked his thesis title first! If he continues to write dark matter, then I will not come up with this idea! But since he has re-entered a field, and it is such a grand question!” Rumney Grid shrugged and emphasized again, “I don’t understand physics, but I also know that the bigger the problem, the easier it is to go wrong. You only need to find a small flaw. You don’t even need to be a flaw, as long as you find it slightly controversial There is an article for you to do! We are not going to completely deny his article, we just hope his article is more perfect! “

Seeing Beckenbauer still refuting, Hernes stood up and said, “Franz, we are not professionals, it’s hard to judge whether Heinz said something! But it sounds like there are possibilities, wait for me Ask a professor at the University of Munich tomorrow and ask! “

“Well, but it must be kept secret! If it is leaked, let others know that Bayern is not good at treating his heroes like this! Will Lu also turn his face?” In the end, the temptation of three consecutive championships prevailed, and Beckenbauer acquiesced. Rumenig’s plan.

The next day, in a private villa on the outskirts of Munich, Hernes met with Professor Trinon, a professor in the physics department of the University of Munich; Professor Trinon was an immigrant from the Netherlands. When he came to Munich, it happened to be the great era of Bayern Munich’s three consecutive UEFA Champions League. Since then, he has fallen in love with Bayern for thirty years!

Professor Trinon is a true Bayern loyal. All the information about Lü Qiujian’s academic aspects learned by Hernes was obtained from him; this time Hernes also pinned his hopes on him.

“Uli, the last game was awesome! It looks like Bayern will add another trophy to the European Champions Cup next month! I really saw the hope of the great miracle of your time reappearing!” Meeting Professor Trinong talked about the game just passed.

Hernes was worried about how to speak, and now he was overjoyed to see him take the initiative to mention the history of three consecutive championships, and quickly followed his topic; Henes shook his head half-truly and sighed, “Hey. This year. I am confident in the finals, but Bayern will not be so lucky next year! “

“Ah? Why is this? What problem did Bayern encounter?” Professor Trinong was really fooled, he asked puzzled, “I remember Bayern’s financial situation has always been one of the best among all European giants, and because Lu For your sake, your sponsorship is increasing! Is it a personnel problem? “

“Yes! I’m afraid we will lose our core next season!” Hernes sighed. “You know, Lu will graduate and return home next season? Without him, I wouldn’t have the chance to re-enter the final. a lot of!”

“Well, it seems to be the case!” Professor Trinon frowned, “He has just submitted his thesis title. He is expected to respond in November! It is estimated that I will also participate in this time. Defenses! “

This is really great! Hernes gave a high-five in his heart and praised him. He was still thinking about how to open up the question and answer teacher’s composition. Unexpectedly, Professor Trinon announced the answer.

“Yes! Bayern and Lu have already stated in the contract that he will automatically terminate the contract when he obtains his doctorate!” In fact, the contract says that Lu Qiujiang has the right to terminate the contract after obtaining the degree, but Henes thinks this It would be better to mislead some Professor Trinon.

“Oh my God, it’s really a terrible thing! With Lu’s academic skills, the passage of the paper is a breeze!” Professor Trinong also regretted, “It seems that we really want to lose him!”

“No, dear Professor Trinon! I think it is still possible for us to leave Lu until this time next year!” Henes threw the bait. “As long as you can provide Bayern with a little help!”

“Uh, is there anything I can do?” Professor Trinong confusedly confused the situation!

“Look, since the contract says that Lu can only get a degree to terminate the contract! So if you don’t pass his thesis, can you delay him by a few months?” Hennes throws Rumenig plan.

“Uli, did you have a fever? Let me deny the paper of a Nobel Prize candidate!” Professor Trinon was shocked. “Once it’s spread, I will be the laughing stock of the whole academic world!”

“But is his article really incapable of criticizing?” Hennes prepared long ago. “With such a grand subject, the article cannot be controversial at all! You only need to enlarge the controversial part, in accordance with the principle of strict requirements Is n’t it ok? If I want to do this, the academic community will only feel that you are serious and responsible? “

“Think about it, you only need to delay Lu’s graduation for a few months, Bayern can achieve three consecutive championships!” Seeing him seemed a bit tempted. Hennes continued to seduce, “Professor Trinon, Bayern has prepared hundreds of millions of euros to increase their strength during this transfer period! As long as Luneng can play more than half a season, a new dynasty will be born!”

“But I haven’t read his article yet, is it difficult to say that there is such a problem?” Trinong seemed a little perturbed and said uncertainly!

has hope! Hennes couldn’t help but rejuvenate! Continue to work hard as long as you have such an idea! It’s still a long time now! You can track the progress of Lu’s thesis from now on, and you can always find some problems in six months? “

“For Bayern’s three consecutive championships?” Professor Trinong seemed to convince himself.

“For Bayern’s three consecutive championships! You will be the biggest hero of the three consecutive championships!” Hennes strengthened his encouragement!

“So good! I will wait until I get the article and read it!” Professor Trinong responded.

Chapter 375 - The future is yours

“Penalty! Opening is only fifteen minutes! Bayern Munich was fined by Norwegian referee Haug!” At midnight in China, countless audiences in front of the TV screamed in unison. 8__ w-w · w-.`

“Let’s look at the slow motion again. Ronaldinho broke into the penalty area and was tripped by his national teammate Lucio! There was indeed physical contact between the two, but in such an important game, a penalty was awarded. The psychological quality of the referee Haug is evident! “Huang Daxian’s voice is a little low. Bayern will fall behind if it opens, and it may be difficult to play in the next game!

However, the bigger blow is still behind. Bayern Munich coach Magath is dissatisfied with the referee’s penalty and is talking aloud to the fourth official; the fourth official told him decisively. Referee.

“Ah! Let’s see what happened on the sidelines? The referee showed Magath a red card to drive him out!” This is probably UEFA’s move to not see Bayern win the championship? Huang Daxian secretly guessed, “The lack of a coach and a penalty kick, Bayern’s game is difficult to play! I am afraid that the assistant coach Eich Cohen will replace the command!”

However, Huang Daxian’s words were not finished yet. A scene in the scene made him suddenly silent. I saw that Magath finally calmed down after receiving the red card. He shouted Lu Qiujiang’s name loudly, when Lu Qiujiang reached the sidelines After that, he hugged Lu Qiujiang’s shoulder and said, “Lu, you will arrange the tactics for the next game. You must take the trophy back to Munich!”

“Okay, you can rest assured!” Lu Qiujiang said calmly, and Eshikeen and Kahn did not object to it. In the exchanges on weekdays, he and the players have long admired Lu Qiujiang’s tactical literacy. The five bodies have landed!

“There was an incredible scene in the field! Magath seemed to give Lu Qiujiang the power to direct the game before he left! Since Gullit and Viali retired, another player and head coach stood. Greenery on the field! “Huang Daxian was so excited that he couldn’t be himself.” We all know that Gullit and Viali will only change themselves on the field in the second half of the game. It is rare to direct the game on one side! If Bayern can win this game, Lu Qiujiang will leave his own legend at the France Stadium-the first player and tactical commander to win the championship! “

Ronaldinho’s penalty hit unexpectedly! The score was behind, the head coach was sent off, but the Bayern players’ faces were not tense, because they all knew that as long as Lu Qiujiang was still on the court, Bayern Munich would definitely be able to win the game-this was in the previous dozens of games It has been proved in the game. >> 8 w = w`w`. · Y-a-w-e = n`8-.`c`om

Sure enough. 吧 ... w · w · w · . · Less than ten minutes after scoring in Barcelona, Lu Qiujiang broke into the penalty area from the side and burst into the vicinity of the bottom line, before Puyol

and Marcos hit a light hand. A round shot bypassed Valdes's defense and hit the goal in the dead end.

"Lu Qiujiang! Near-zero angle shot! Lu Qiujiang! Lu Qiujiang has done! Don't give Barcelona any chance! Great zero-angle goal! He inherits the glorious tradition of all the excellent shooters in history! Teng, Robert Carlos, Van Nistelrooy possessed souls! At this moment he is not alone in battle! Not alone! "Huang Daxian was crazy when he saw this scene. He screamed desperately regardless of the neutral position that the narrator must have.

From Paris France Stadium to Munich, from Germany to China, countless fans are also crazy because of Lu Qiujiang's goal!

"This is already the sixteenth goal of Lu Qiujiang in the current European Champions Cup!" Seeing that the situation is not good, his old partner Tao Wei quickly digressed. "He broke the UEFA Champions League goal record of Van Nistelrooy's twelve goals in the 02 to 03 season and Puskas' 59 to 59 season!"

"And most of his goals were scored in the knockout stage, which is particularly valuable! If Lu Qiujiang participates in all the Champions League games this season, I am afraid that this goal record will be increased to despair of all latecomers. To what extent? "Wong Tai Sin also recovered, hurry up to remedy, and pray not to lose his job because of this.

The final stage of the first half became the personal performance time of Lu Qiujiang and Ronaldinho. Barcelona could not stop Lu Qiujiang, and Bayern Munich could not stop Ronaldinho. Fortunately, the goalkeepers on both sides also waved. Excellent, keeping the draw until the halftime break.

"I'm afraid Bayern Munich will be more unfavorable in the second half because they don't have a head coach! If they encounter a sudden incident, they will fall into a passive situation!" This is the common idea of almost all commentators!

But shortly after the second half. Bayern made a change! Lu Qiujiang took the opportunity of a dead ball to walk to the sidelines and said something to Eichcorn, and soon Deisler was replaced!

The newly played Dessler quickly played a role. He received a pass from Lu Qiujiang at the front of the penalty area. A clever fake move away from Van Bommel's defense and broke into the penalty area. A shot was saved by Valdes. Barcelona's players were too late to be happy, Lv Qiujiang appeared in the football landing point, a light push to help Bayern lead.

Fxxk! Barcelona coach Rijkaard hit the canopy with a punch! He looked at everyone on the bench Larson or Lionel? Eventually the trust in the veteran prevailed, and he replaced the newly made Van Bommel with Larson to strengthen the offense.

Lv Qiujian saw this scene came to the side of the field again, and soon Lizarazu replaced Ram. Entangled with Larson, Larson's effect was resolved!

Rely! I'm older now but I can't kick you! Can't even tactics compare to you! Rijkaard unbuttoned his suit and stood on the sidelines yelling! But no matter what tactical adjustment Barcelona makes, Lv Qiujian will easily resolve it.

In desperation, as long as Rijkaard played the final card, he sent Lionel Messi, the star of hope. However, Messi's appearance did not change the situation. Not only did he fail to equalize the score, but also Lu Qiujian broke the ball directly from under his feet and scored Ma Kai! Locked the victory for Bayern.

After ninety minutes of the game, Ronaldinho stared blankly at the score on the big screen, and Messi cried sadly.

"Lionel, don't cry! Just win it again next time!" Then there was comfort in his ear. Looking back, Lv Qiujian was waving to him with his jersey, "Remember, you are still young, and you are the future of you!"

"Thank you, Lu!" Messi quickly took off his jersey and handed it over. Well, Lu is really a good person!

Chapter 376 - Reunion of old friends

This game has made fans all over the world addicted, and also made the major media extremely happy. Lu Qiujian's performance is simply impeccable! Even UEFA did not feel annoyed by the failure of Bayern to win the championship. After Magath was sent off, Lv Qiujian's on-site command became the biggest attraction of the game. This is also unintentional.

Lu Qiujian used his superb tactical command to resolve wave after wave of offensive in Barcelona. In the past two years, Rijkaard in La Liga has had a hand in hand in front of him; Lu Qiujian used his own performance to perfectly explain football Not only is the competition of strength and skill, but also a game of wisdom!

Netizens Sun and Moon Xi Tongguang even lamented on the bbs of China that it seems that the position of the coach of the widowed national team is not guaranteed! There was Lu Qiujiang, from the goalkeeper to the forward, to the head coach, he did all the work! It's hardly alive for us!

Fans have responded to the post and cheered, and finally Sun and Moon Xi said that Guang Guang was so difficult. Since Lu Qiu was there, it was almost enough to be an assistant coach!

After winning the Triple Crown again, Bayern put an end to this season! Most of the players on the team are not too relaxed, they are still waiting for the World Cup in Germany soon! But Lu Qiujiang was completely relaxed.

"Lv, where are you going to play during the holidays? It is better to stay in Germany to watch the World Cup! Call your girlfriend and I have prepared the best tickets for you!" Henes persuaded enthusiastically.

"Thank you, Mr. Hernes!" Lu Qiujiang smiled and refused his good intentions. For others, the World Cup is a feast that cannot be missed, but what is the meaning of replay for him! "But I plan to go home for a trip, you know, I haven't gone back in a long time, and I really miss my family!"

"That's really a shame! But don't give up this opportunity easily. I always keep the tickets for you. I can get you what game you want to watch on the 5th road." Henes was heartbroken for a while. Another missed opportunity.

Greeted the school and Lu Qiujiang quietly embarked on the flight back home alone; even if he did not notify anyone. However, the news of his return to China still could not conceal the relevant departments. Just when he landed at the Beijing Airport, the special car of the relevant departments stopped directly at the airport.

Entering directly into the most mysterious building complex in China, after a detailed conversation, both Lu Qiujiang and the elders got a message that they were satisfied with; the elders reaffirmed that Lu Qiujiang would return to the country this year, and Lu Qiujiang also Knowing what China has done for the controllable nuclear fusion program this time.

Of course, the sound released on the bright side was prepared for space exploration, and China directly took out ten-figure funds for initial investment. A large number of talents have also been gathered, and after a rigorous review and selection, a politically reliable and professionally outstanding team is left in full preparation.

The media has continuously released the wind, and even the blueprints of the plan have been obtained by the superb media. What is the third manned space flight in xx, the construction of the moon landing space was completed in xx, and the moon landing was officially implemented in xx. Wait!

When the media asked the spokesperson of the relevant department, the spokesperson said righteously, "These news do not know where you got it! Anyway, no matter whether you believe it or not, I do n't believe it!"

This has deepened the netizens' trust in this blueprint. Although some conscientious media are still calling out that the people in the west are still eating grass, and that the country has no meaning in these face-saving projects, etc., but netizens still eagerly look forward to this plan.

Wait for Lu Qiujiang and the elders to communicate. Xia Xiao also returned to China from neon. She came back with all her luggage this time. The things on the neon side have been dealt with and her studies have ended. From now on, she is ready to develop in the country with peace of mind!

After a busy day, with Xia Xiaoman's sales department in the capital, Lu Qiujiang finally chose a renovated high-end apartment; when the real estate staff recognized Lu Qiujiang, their boss had to free the house for free For Lu Qiujiang, he only needs to borrow his name. He said that Lu Qiujiang also bought the house here for publicity, but Lu Qiujiang refused decisively!

Although the house in Beijing is expensive. But Bayern gives a higher salary! There is absolutely no need to disturb your life because of this cheapness.

Relocated the home of Beijing, Lv Qiujiang and Xia Xiao went to the parents 'home of both parties to accompany the elderly of the family; when they returned to Beijing, the World Cup had already begun.

The two of them came to Jingcheng International Airport again. But this time it is not going to Germany to watch the World Cup, but to another beautiful country.

"This time I will take you to see the black continent portrayed by Tezuka in the Forest Emperor! Look at the lions, zebras and elephants on the prairie!" Lu Qiujiang sighed slightly in his heart, waiting for his next return home If you want to go abroad, please trouble yourself. Take advantage of the last free time now and take her to play!

After a long flight, several flights were replaced in the middle, and the plane finally landed on the African continent. Lv Qiujian and Xia Xiao walked out of the cabin and heard a familiar voice shouting, “Haha, Lv, you finally arrived I am a guest here! “

Looking down from the top of the gangway, a tall black man with a tall suit and a tall grin is showing a sincere smile on his mouth That’s not who the housemate Patrice of Lu Qiu built in Princeton can be!

“Haha, Patrice! I haven’t seen you for a long time!” After the meeting, there was naturally a warm greeting. Lu Qiujian also introduced each other to him and Xia Xiao.

“I thought you would wait until the World Cup is over! I didn’t expect it to be so fast!” Patrice refused to shut up when he was in the car. Barbara said endlessly.

“I’m not very interested in this World Cup, but if you gamble, I can give you some advice!” Lu Qiujian said with a smile.

“Oh? Are you optimistic about which team wins the championship?” Patrice remembered the scene with Lu Qiu’s killing in Las Vegas.

“Italy!” Lu Qiujian uttered the word, and Patrice nodded thoughtfully.

After the dinner, Lu Qiujian and Xia Xiao returned to Patrice to rest in the arranged room. When Xia Xiao went to take a shower, Lu Qiujian stood on the balcony with a thoughtful vision.

“What do you see?” Xia Xiao asked curiously after about half an hour after the bath.

“Nothing? I remembered a classic sentence about Africa!” Looking at her curious expression, Lv Qiujian read the words in a low voice, “The rainy season has passed, and it is the season of reproduction.”

Chapter 377 - Patrice's troubles (4/16)

The roar of helicopters shattered the silence of the Congo River. This river, which is second only to the Amazon River, is famous for its dangerous beaches, waterfalls, and rapids. Unfortunately, due to economic, transportation, and safety factors, it is possible to travel here There are not many tourists, but this also protects the local complete ecology.

“The air here is so fresh!” Xia Xiao greedily breathed the moist air from the side of the waterfall because of the water vapor. There was no unpleasant smell of oil smoke, no pm2.5, everything looked like this. Beautiful.

“I’d rather they suffer because of industrial pollution than wrap their poverty in a beautiful natural environment!” Patrice shrugged and looked at the dilapidated shed in the distance.

Looking at whether his old friend frowned, Lv Qiujian knew that he was not happy after returning home, which is understandable. Returning to the backward motherland from the most developed country in the world is inevitable. For comparison between the two places, he did not see the hope of the rapid development of his motherland, but anyone who pursued it would be troubled.

“Anything takes time, doesn’t it?” Lu Qiujian comforted. He understood Patrice’s current mood. The outstanding people of each nation always hope that their nation can stand in the forest of the world. It is a minority, which requires not only too much and too much effort, but also suitable opportunities, hardworking people, etc.

“Oh, sorry, I just ... you know!” Patrice scratched his head embarrassedly. His good buddy brought his girlfriend here to relax, not to listen to his troubles. The good mood of the two should not be ruined; Patrice’s suites had already set up tents and set up barbecue racks during the talk, so he quickly greeted Lu Qiujian and the two, “Come on, try the unique cuisine of the African continent !
“

Judging from the food prepared, Patrice is very careful. Not only are there local cassava buns, peanut bread, ant sauce, monkey specialties, but also ordinary foods such as rice, steaks, lamb skewers, etc., you can find yourself anyway. Taste of food.

“Aha. I am also very good at this!” Lu Qiujian suddenly seemed to think of something, picked up a few strings of birds and planned to roast on the shelf.

“This is not okay! You only need to beat it yourself!” Patrice’s optimistic character made him recover quickly, got up and looked around, and beckoned an entourage. He took off the military crossbow he was carrying and handed it to Lu Qiujian. He did not ask whether Lu Qiujian would use this guy, because in his view the old classmate was omnipotent!

“You wait here, I will go!” Lu Qiujian smiled and said to Xia Xiao; then disappeared in the jungle in the direction pointed by Patrice.

It didn't take long for the distant treetops to shake. Vaguely, the sound of slack arrows can be heard, and after a while Kung Fu Lu Qiujiang returned with his spoils.

Boiling water, losing hair, and breaking the belly, soon a fat bird was put on the oven, smeared with ingredients, and turned twice from time to time, so that every part of the bird could absorb heat evenly And the aroma of the ingredients.

A few minutes later, Lu Qiujiang handed a roasted tender yellow bird to Xia Xiao's hands, "I personally called this bird for you."

Xia Xiao took the roast bird, his eyes flickered, I do n't know what Lu Qiujiang 's action represented. Should I eat or do something else?

"Haha. According to our Congolese customs, if a man has a fancy for a woman, he will give a roast bird to her as a courtship!" Patrice slowed down and said to Xia Xiao in English, "You If you intend to accept his courtship, then give back a corn for a long time. "

Is really romantic! Xia Xiao immediately looked around for corn, but Patrice was well prepared, and corn-potatoes were not far away.

Lv Qiujiang took the corn and put it on the shelf to roast it, um. This must be exclusive to one's own! After nibbling the corn, he picked up the beef, sheep, potatoes and other ingredients and roasted it.

"Lv, I dare to say that even if you don't do postgraduate or basketball, you will become a world-class standard if you are a chef!" After a meal, Patrice patted his stomach with satisfaction.

"If I can't find a job after I return to China. I will consider your suggestion to open a barbecue restaurant! By the way, what do you think of the name of the barbecue galaxy as a store name?" Lu Qiujiang replied with a mind.

"Yeah, this name is really ... very special! But at your level, I'm not surprised even if one day to open the barbecue restaurant throughout the galaxy!" Patrice certainly did not understand the implicit meaning of this name, so Answer so.

After eating, Xia Xiao was a little tired. Let's go back to the tent for a little rest, and Lu Qiujiang and Patrice sat on the boulder and watched the waterfall in the distance, drinking and talking about each other's situation.

“... Did you know that when your Chinese factory started construction in the Congo, I was very happy, I think he could train reliable workers for the Congo and drive Congo’s development! But I found that I was wrong “!” Patrice said helplessly. “Management in China always complains to me that the workers here will disappear as soon as they get their wages, and then come back after the wages have been spent; it has been a year since the factory was put into construction. With more, local workers can only do the simplest jobs! “

“China’s management is indeed much more generous than Europeans, and they are also very happy to teach local workers, but they don’t want to learn at all! They also always complain that Chinese workers get higher salaries than them! But why would they refuse to pay? There are gains?
“Patrice’s eyes are full of confusion It is very rare to want to change the personality of a nation!
“Lv Qiujian knows that Africa’s rich products allow local people to harvest food without too much hard work. How many people will have fighting spirit in thousands of years?” Only education can change everything! “

“Yes, I hope that our next generation will no longer be as ignorant as their parents.” Patrice talked about his ideals. After returning home, he not only opened a school, but even went to They teach.

“However, the current international situation is becoming more and more stable! Congo is not so easy to achieve rapid development!” Finally, he said with emotion; indeed, this is not the era of the end of World War II, small countries ... especially Africa The small countries that want to develop will always suffer a lot of interference.

“As long as you work hard, there will always be a chance!” Lu Qiujian’s eyes shone inexplicably, like a prophecy, “Maybe the international situation will change greatly in the near future!”

Chapter 378 - Madrid Airport

During the annual transfer period, Madrid Barajas Airport is always waiting for many reporters. They come from the major sports media such as “Marca” and “Aspen”. Whenever a new group of passengers walk out of the channel, They will search for those news-worthy faces with Falcon-like eyes. ←

Just a month ago, Real Madrid ’s superstar Zinedine Zidane announced his retirement after the World Cup, leaving fans with endless regrets; immediately, the major media are guessing which footballer will land on the Galaxy Battleship. .

Real Madrid’s moves during the summer transfer period are not too small. For \$ 28 million, they bought midfielder Diarra from Lyon, and \$ 15 million will be incurred by the full-faced shooter Van

Nistelrooy. Under your command, Cannavaro and Emerson were packaged for \$ 23 million on the opportunity of Juventus' downgrade due to a phone door.

If you put it on a normal team, these recruitments should be enough for media reporters to party for a while! But it is not enough for Real Madrid. What about Cristiano Ronaldo, the star of good hope? What about good Brazilian genius boy Kaka? In the summer transfer period, don't you raise the football's highest transfer record by 10 million US dollars? Is it Real Madrid?

So as the five major leagues gradually kicked off, countless sports reporters still hope Real Madrid can create miracles! And Madrid Barajas Airport has become their greatest hope for miracles. No matter which agent wants to come to Madrid to negotiate, they must land from here, right?

Another group of passengers came out of the passage, and the reporters immediately swarmed up, looking forward to finding the figures of big-name brokers such as Mendes and Laiola from the crowd. Those wearing sunglasses and masks became the focus of attention. .

"It's nothing else! This summer is really boring!" Mark Serena, a Marca reporter, withdrew from the crowd and said to his old partner Pablo Diez.

"Calderon is more stingy than Florentino! He is reluctant to invest a lot of money on the superstar!" Pablo said disdainfully, Zidane + Pavin's policy of recruitment has already been announced Failure, but Florentino never worried about the club having no news, almost every season the act of introducing a Mr. Football made fans and the media crazy!

But since Florentino stepped down. The good times of these news media are over! This summer's summer transfer period came to an end, Real Madrid only spent 66 million euros, which is not as good as the transfer fee of Zidane alone! Is this still Real Madrid!

"Wait a second! I think Real Madrid's transfer door is still not closed!" Mark said reluctantly, not knowing whether it was for Real Madrid or his own bonus.

Another flight from Germany landed, and Mark regained his spirit. Although Germany's most famous superstar Barak had already transferred to the upstart Chelsea, they still had the hope of Ram and Schweinsteiger. Star, if you can transfer to Real Madrid, it is a big news!

"Gosh! Who did I see!" Suddenly Mark opened his mouth and rubbed his eyes incomprehensibly. The man who had just appeared at the entrance of the channel drove all the sports reporters who had

been waiting for a long time. They rushed up like evil dogs who saw bones, and the flashing lights kept on.

“If he can come to Real Madrid, I will love Calderon!” Pablo abandoned Florentino without hesitation, desperately squeezed forward.

“This transfer will definitely create a new record! I guess it will exceed 100 million euros!” Mark’s face flushed with excitement.

“100 million euros! Just kidding! 100 million pounds is almost the same!” A reporter from the Aspen newspaper refuted, and greeted the person who came out loudly, “Lu! Can you come to Madrid and Calder? Did Long negotiate? What made you decide to leave Bayern and join Real Madrid? “

“Lv, I heard that Real Madrid has paid a transfer fee of 100 million pounds to Bayern? Is this true?” Well, this man took the Aspen reporter’s joke seriously!

“Lu. I heard that Calderon gave you an annual salary of 15 million euros after tax. Is this the real reason for you to abandon Bayern?” Another exaggerated news came out.

“Well, where did all of your news come from? I didn’t plan to leave Bayern Munich!” Lu Qiujian watched the airport security in the distance still have some time to reach here, so he stopped helplessly to answer the question.

“So what are you doing here in Madrid?” These reporters really couldn’t think of other reasons. And they quickly found support, “And you did not appear in the first two games of Bayern Munich in the new season, nor did you enter the big list. Isn’t this because of the conflict with Bayern’s top management?”

“I have a good relationship with Bayern. I went to my homeland with them some time ago to participate in the warm-up match! I have no plans to join Real Madrid!” Ah, those security guards can’t run faster!

“Not Real Madrid Is it Atletico Madrid?” This is not scientific! Does Atletico Madrid have the money to pay Lu Qiujian’s high transfer fee?

“It’s not Real Madrid or Atletico Madrid. It’s not Getafe or Real Vallecana! I didn’t plan to join any of Madrid’s teams!” Lu Qiujiang’s head is big, where are you from? Such a rich imagination!

“Lv, you must have come to Madrid to transfer? Is your goal Barcelona right?” The reporter of the “World Sports” stared at the pro-Real Madrid media reporters in the surroundings.

“I didn’t come to Spain for football. I have other things to do!” The security guard finally came over, and Lv Qiujiang quickly ran out of the channel they opened. At this time, the talent who came to pick him up appeared embarrassedly. In front of him.

This is not a place to speak. Lv Qiujiang hurriedly walked with him to the outside of the airport, got on the car she brought, and drove quickly outside the airport; the reporters behind were willing to miss this opportunity and got on the car one by one. On the phone to inform the newspaper, while catching up.

It is a pity that it is the time of traffic congestion in the urban area of Madrid. A group of reporters lost Lu Qiujiang’s figure in the traffic of the city before long, and had to return to the newspaper office with regret.

But the appearance of Lv Qiujiang in Madrid meant big news, so a piece of articles that relied on speculation and a piece of news was freshly released, and suddenly shocked the entire European football.

Chapter 379 - International Conference of Mathematicians

The speed of news expansion is very fast, especially in this summer when there is a lack of big-name transfers. At the regular press conference of Bayern Munich the next day, there were more than twice as many journalists as usual. They were all looking forward to Bayern Munich official response to Lu Qiujiang’s trip to Madrid.

“... Although we lost Michel, our performance in the first two games is still excellent. Bayern is on the right path!” Majestic introduced the team’s current situation. There is no shortage of regrets in his heart. If Lv Qiujiang can be sure to stay, Barak may not transfer to Chelsea, right?

It’s easy to end the routine topic, and it’s time for reporters to ask questions. The news officer still took care of the reporters of the “Kicker” magazine. He did not hesitate to ask the questions that everyone cares about, “Ask Coach Magath, Why did Lu not make it to the roster in the first two games? Is he really going to move to Spain? “

“Is it not normal for Lu to be on the roster? He is not a full-time player. Playing football is just work and frugality for him! He had other things to do in the previous two games, so he didn’t participate!” Maga I was not worried about the false rumors at all, and answered with great ease, “As for his going to Madrid, the club has known for a long time! To be sure, he will not transfer to any team!”

“So what does Lu do in Madrid?” The reporter of “Photo” asked first before the news officer could speak.

“Of course at the International Conference of Mathematicians!” Magath shrugged. “Don’t you read the newspaper? The 25th World Mathematics Congress is now being held in Madrid! Lu is one of the best mathematicians in the world today. First, is it normal to attend such a conference? “

Amount, this answer suddenly made all reporters dumbfounded! Yeah, Lu Qiu Jian seems to be playing a sideline, and his authentic identity is that of a mathematician and physicist, so he went to Madrid to participate in the World Mathematics Congress is almost normal!

So we all want to be crooked! But who would care about those tech news as a football reporter? They made excuses for themselves.

“In addition, Lv’s participation in this conference may bring us a new surprise!” Margot blinked naughtily, and he didn’t say anything about the surprise.

Madrid. More than 4,000 mathematicians from all over the world gathered here at the site of the International Mathematicians Conference. If Eta is here to carry out an attack to kill these people, I am afraid that the development of world science and technology will receive a huge delay? Lu Qiu Jian thought with emotion.

“Lv, we haven’t seen each other for about three years?” Andre-Okskov, an old friend from Princeton, greeted him cordially. He contributed a lot in connection with probability theory, algebraic representation theory and algebraic geometry. Mostly, it is a popular candidate for this Fields Medal.

“Andrea, I am afraid that after this conference, Princeton’s Fields Prize winner will be one more!” Lv Qiu Jian sent congratulations in advance.

“How could it be one? Didn’t you get the degree at Princeton? It should be two!” Okskov knows that among these candidates, Lu Qiujian is the most qualified to receive the award. Fortunately, the Philippines The Erz Award has four places. It didn’t make him lose the chance of winning.

In addition to the two of them, this year’s winning candidates include Tao Zhexuan from the University of California, Los Angeles, fellow Andre, Gregory Perelman from Moscow, and mathematician Wendrin from the University of Paris 11 in France. Warner.

This also vividly illustrates the current pattern of the mathematics world. The United States, France, Lucia, Princeton, and Paris Eleventh University still maintain their leading positions in the mathematics world. In addition, with the emergence of Qiu Chengtong, Tao Zhexuan, and Lu Qiujian, Chinese Americans are also beginning to move towards the highest field of mathematics.

But there are only four Fields Prize places! There are currently five winners. Apart from Lu Qiujian’s cracking of Poincaré’s conjecture and too many achievements in the field of the Langlands program, they are not necessarily awarded; and among these four, Tao Zhexuan is only three At the age of eleven, there are two chances for the conference, and the others will exceed the requirements of the Fields Prize before they are forty years old! I don’t know who will be the frustrated one?

This conference will last a total of nine days. At the opening ceremony on August 22, the organizing committee will first award the Fields Award, Gaussian Award and Nervina Award. The following days will be lectures and exchanges on some topics. Received an hour of conference report time.

except him. Researcher Chen Zhiming from the Academy of Mathematics and Systems Science, Chinese Academy of Sciences was also invited to give a 45-minute report at the conference.

But until the opening ceremony of the conference, Lu Qiujian still did not see the figure of his old friend Perelman, not only shook his head regretfully; Perelman was a lonely man, in his mind, except mathematics Not interested in anything. If Lu Qiujian had attracted him to China by presenting some novel ideas in the first two occasions, would he probably not even attend those two awards?

Chairman of the International Mathematical Union John Bauer hosted the opening ceremony expressed his welcome to more than 4,000 mathematicians from all over the world. After that, the winners of the three major awards were announced.

The Gaussian Prize is jointly awarded by the International Federation of Mathematicians and the German Federation of Mathematicians. The German Federation of Mathematicians is specifically

responsible for the management of the award. The Berlin International Conference of Mathematicians decided to establish it for the first time this year.

The first Gaussian award was given to Ito Kiyoshi from neon. He proposed the Ito formula, which became the basic theorem of the new branch of mathematics of random analysis; like Simmons, he also used his own mathematical ability to make storms in the financial street In order to be “the most famous neon person on Wall Street”, he was 90 years old this year and could not be present, so his daughter took the place of him to receive the award.

The Naiwang Linna Prize is awarded to a major contributor to the mathematics of computer science. This year’s winner is Jon Kleinberg from Cornell University.

“The twenty-fifth Fields Medal winners were Lu Qiujian and Perelman ...” John Ball did not let Lu Qiujian wait too long, and he quickly reported the name.

This news was quickly returned to the country with the reporter on the spot. In a certain residence in Modu, a highly respected and versatile elder sighed slightly after hearing the news.

Chapter 380 - Acceptance speech

The elders are still very pleased that there is a winner of the highest award in the world of mathematics in China, especially since he also created the record of the youngest Fields Medal winner; the youngest Fields Medal winner before Lu Qiujian The man is the French mathematician Throw-Pierre-Sale, who was born in 1926 and won the Fields Medal for his outstanding achievements in algebraic topology at the Amsterdam International Mathematician Conference in 1954. At that time he was less than 28 years old.

For a long time after him, most of the Fields Medal winners were over 30 years old, so that people thought that her record could not be broken until Lu Qiujian appeared!

Lu Qiujian was born in 1983. Since his birthday is at the end of the year, he is not yet twenty-three years old. He is put on the average person. This is the age when he just graduated from the undergraduate degree. Awards.

The elders a little regret that Lu Qiujian cracked Poincaré ’s conjecture a year later. It would be nice if this achievement was completed in 2001. In that case, the twenty-fourth festival of mathematics held in 2002 in China At the family meeting, you can hand out the Fields Medal to this young man.

The elder is a versatile old man. He is fluent in English, German, French, Spanish, Russian, Japanese and other languages. He is even good at the remote Romanian and Urdu languages. At the

same time, he is good at Peking Opera, piano, Erhu and other fields have performed well, and he used his talents to attract countless foreigners when he visited various countries.

These may have been seen on TV and newspapers, but I am afraid that few people know that he has also published many scientific papers and received a high number of citations; in addition, he has also performed well in the field of mathematics, even Now he can also help grandson tutor mathematics.

In his graduation commemorative book, the students mentioned in his message, “Dr. is a smart person since childhood, and his academic achievements are at the forefront of each column, especially in mathematics, which is a full-level crown.”

At that time he attended the celebration of the first anniversary of Macao 's return to the motherland. During the visit to Haojiang Middle School, a plane geometry question was issued to the teachers and students of the school to verify the “five points co-circle”, “Assumption: any star, five triangles, and the circumscribed circle intersect at five points. Proof: These five points Round. “

State this question in a standardized mathematical language like this: in any five-pointed star, l. Proof: Five points of k, o, n, m, and l are in a circle.

To solve this problem, no advanced mathematics knowledge is needed, and it can be solved by relying on the junior middle school geometry knowledge, but it is still a good mental training, if not smart enough. Without the ability to think logically, even with advanced knowledge, there is nothing to do.

Even the first Chinese professor, Professor Qiu Chengtong, who won the Fields Award, took this question for more than half an hour to crack it, which made him appreciate the meaning of this question exquisitely.

Well, the matter of the elders is put aside first. Anyway, Lu Qiujian has more chances to see the elders after returning home. Everyone knows that countless people are sending blessings to the elders, he can already live for centuries; Let's come back to see Lu Qiujian's performance after winning the award!

Lu Qiujian and two other winners stood on the stage (As for those two people, I will not say it, I always feel that it is inappropriate to replace anyone!). Waiting for King Carlos I of Spain to award them medals; the last winner, Perelman, refused to come to Madrid to receive his due award.

The winners were absent from the award ceremony. This is not the first time in the history of Fields Medal. Coincidentally, the previous three times were related to Perelman's motherland.

In 1966, Lu Qiujiang's old friend and Pope Alexander Grothendieck of the algebraic geometry boycotted the Fields Medal ceremony in Moscow to protest the Red Empire's military operations in Eastern Europe.

1970 winners Sergei Novikov and 1978 Gregory Alexandrovich = Margulis because of the red empire's restrictions on their exit, they can not go to France, Nantes and Vancouver, Canada to receive the award.

But they all have reasons. For the first time, non-political factors such as Perelman gave up receiving the prize. Fortunately, King Carlos I of Spain has a wealth of mascots ... oh no, it was a major attendance Activity experience. He casually picked up the medals and put them on the winners one by one.

Walking to Lu Qiujiang's side, Carlos I suddenly sent blessings to Lu Qiujiang's ear and asked quietly, "Dr. Lu. What do you think of Madrid?"

"Madrid is a beautiful and charming city, His Majesty the King!" Lu Qiujiang is not a Secondary Two, so only praise is given at this time.

"I also think so!" Carlos I smiled with satisfaction, and still refused to let go of Lu Qiujiang's hand, "If that is the case, you may wish to consider living in Madrid! Real Madrid will definitely welcome you of!"

Rely. I have long heard that King Carlos I of Spain is a fan of Real Madrid. It is the first time in the history of football to contribute to the signing of the team at the awards ceremony of the Fields Prize!

It's hard to say in front of him that Spanish universities and scientific research institutions are not powerful enough. Lu Qiujiang had to use other reasons to politely refuse. I can refuse your kindness!

"Ah, that's a shame!" Carlos I said regretfully. Seeing no chance, he could only end the conversation and walk to the next person. The Fields prize is not more than a thousand. Five hundred dollars, but Lu Qiujiang's income is more than that. In addition to the Fields Prize bonus,

the representative of the American Cray Mathematics Institute also gave him a million-dollar bonus to solve the seven thousand-year mathematics puzzles. This trip to Spain is quite rewarding.

The award ceremony was over, and it was time for the winners to give their award speeches; Lu Qiujian boarded the podium under the guidance of John Ball and began to deliver his award speech.

He first picked up the Fields Medal and carefully looked at it. This gold medal has Archimedes' head relief on the front and Latin engraving on the back: Mathematicians around the world make new contributions to knowledge And proud.

"I will carry it with me! Because maybe I will go to Finland to play someday!" Lu Qiujian's opening remark made the mathematician present stunned, and then caused a laugh.
