Chapter 381 - Big Elder's Phone

This is a terrier that only a mathematician understands. It is the story of the first Fields Prize winner in 1936, the Finnish-American mathematician Als-Alfoss.

Shortly after Alfors won the award, the haze of World War II covered all of Europe, and people's travel was subject to various restrictions; once again he finally got an opportunity to visit his wife from Finland to Sweden, but wait until he went to the train When I bought a ticket at the station, I found that I only had ten dollars in my body, which was not enough to buy a ticket.

So he flipped out the Fields Medal and took it to the pawnshop! This is enough to cover the travel expenses, which is estimated to be the only Fields Medal that has been spent at the pawnshop. Fortunately, this medal is gold, and if Mr. Alfors, the poor copper, would be unable to meet his wife.

After the laughter faded, Lu Qiuqian began his acceptance speech, "I am very honored to receive this award. I have always believed that mathematics can guide the truth for us. With the efforts of generations of mathematicians, we are getting closer to the truth Recently. Tonight, I can stand here to receive awards because of them. Their tireless pursuit and exploration of mathematics since the birth of human civilization have made me today ... "

Thanks to a series of appointments from his mother to middle school teachers, from professors at Peking University to Princeton authorities, Lu Qiuqian began to promote his judgment on the future development of mathematics. This is four thousand mathematicians! Even if only one-tenth of them are moved, it is good for their own plans.

After two years of fermentation, Lu Qiuqian's speech on the future of mathematics has also received more and more attention from the mathematics community. A new achievement has been researched and an article has been published in four major journals; this People will never look down on his speech again because of his age. Four thousand mathematicians listen to Lu Qiuqian's speech seriously.

In the next few days, Lv Qiuqian took advantage of the opportunity of public reporting to demonstrate again in the past two years. The latest achievements that the mathematics community lacks in these ten questions have greatly enhanced the exposure of the awards and journals that it has set up. I believe that after this conference, the submissions received by its own journal will be more and more More.

Is at the same time as the conference. The Chinese ambassador to Spain also found Lu Qiujian and took him from the venue to the embassy. “Congratulations to Dr. Lu, you can win glory for the Chinese mathematics community and all Chinese people this time! The elders specially called to say congratulations to you in person! That’s why we specially invited you to come!”

Of course, not only is it so simple to call, but also full-time staff to take pictures, so the ambassador specially invited him to the embassy to report the situation. It did n’t take long for Lu Qiujian to pick up in the specially cleaned room. After the phone call, the photographer quickly started shooting.

Lv Qiujian also understands the importance of this matter to the Chinese mathematics community and the entire scientific session. This is China’s first world award in the natural category! His award will inevitably attract countless young people to participate in scientific research, enhance the national pride of the people, and promote a new wave of development in the scientific community, so he did not refuse to shoot the photographer.

“Dr. Lu, hello, I am xxx.” A familiar voice rang on the phone, “On behalf of the Central Government, the Government Administration and myself, I won the highest award in the mathematics community at the 25th International Mathematicians Conference ——The Fields Prize expresses sincere congratulations! “

“Thank you, elder elder! This is not only my personal honor, but also ...” Lv Qiujian is also a series of clichés. In fact, there are not many choices in this serious occasion.

“... I hope you will achieve better results in your future research!” Speaking of the final elder elder slightly revealed some tone. “We also look forward to your return to China as soon as possible to join the great plan of space exploration!”

Hanging up the phone, Lu Qiujian was in deep thought, did he mean that the controllable nuclear fusion plan was finally passed? Of course, Lu Qiujian would n’t think that what he called the space exploration plan was literal; but Lu Qiujian was still a little unwilling. He remembers what the elder elder said was to join the great plan of space exploration, not to host the great plan of space exploration.

May be to publicize the call process, so it is not appropriate to say so? Or will the elders feel that they are still too young and have insufficient qualifications to host the plan? If it is the former, then Lv Qiujian is acceptable, if it is the latter, then it is too much trouble! He didn’t want his work to be constrained.

“Dr. Lu? Dr. Lu?” Mr. Ambassador saw him staying for a long time and quickly came to greet him.

“Oh, I suddenly received such a call. I was a little excited, and made you laugh!” Lu Qiu Jian pretended to be flattered.

“Haha. This is normal!” Mr. Ambassador laughed. “I just received a call from the office of the elder. It was also shocked!” He was only a call from the staff of the office of the elder, Lu Qiu Jian talked to the boss of the war.

“Hey, we all blame our failure to do a good job! I don’t know you are going to Madrid to attend this meeting! Otherwise, someone will definitely be sent to the airport to pick you up!” Mr. Ambassador quickly made up for the mistakes in his previous work, “We are preparing for you today After the gala dinner, the chef skills of our embassy are still good! I am afraid you do n’t often eat authentic Chinese cuisine in Germany? There are also representatives of local Chinese and overseas Chinese, representatives of international students Do n’t refuse! ”

“Then thank you Mr. Ambassador for your kindness!” Lu Qiu Jian followed Mr. Ambassador to the banquet hall, behind him was a photographer carrying heavy equipment.

At 7:00 p.m. GMT, the whole news began to broadcast the good news that Lv Qiu Jian won the Fields Medal. The court first broadcast the call records of the elders and Lv Qiu Jian, and then Lv Qiu. Jian received the Fields Medal from King Carlos I of Spain, and finally gave a detailed explanation of the background, status and significance of the Fields Medal.

The entire news took a total of three minutes, which is extremely rare in the whole news, which shows that the national team Lu Qiu Jian has received the attention of this award.

Subsequently, the major media also quickly changed their news page, and published the news of Lu Qiu Jian’s Fields Medal as the front page headlines.

For a time, these three words of Lu Qiu Jian became the hottest names in China. From the university research institute to the streets and alleys, this young man was being discussed everywhere, even the study room of high school students.

“Eh, do you explain whether the current affairs and political questions of the New Year’s College Entrance Examination will take the question of Lu Qiu Jian’s Fields Medal?”

“I think I will take the exam! It is estimated that the political teacher should emphasize it tomorrow!”

Chapter 382 - Fields and Nobel

However, the focus of people's attention on this news is only that a scientist from China won another world award, and he did not care about what he studied. Of course, there are not many people who can understand the reason for his award; so After a few days of crazy reporting, this news slowly faded away, and it was completely different from the future generation of female scientists who won the Nobel Prize.

The reason is not that Lu Qiuqian's research results are weaker than this female scientist, but that the Fields Prize is far weaker in public influence than the Nobel Prize.

The reasons for this are many. First, the Nobel Prize was founded in 1900, which has a history of more than thirty years than the Fields Medal founded in 1936.

These thirty years are the era of rapid advancement of human science. Einstein, Bohr, Dirac, Heisenberg and other shining names have added the brilliance of the Nobel Prize and made it the most concerned science and technology award in the world. After the establishment of the Fields Prize, the golden age of mathematics has passed. Hilbert, Gauss, Euler and other legendary figures made ancient works and faded out. Except for Grothendieck, they could never meet them The figures are on a par.

And the Nobel Prize covers six fields of physics, chemistry, physiology and medicine, economics, peace, and literature. It is awarded once a year, and the Fields Prize is only awarded every four years, with a maximum of four places at a time; It is calculated that in four years, the Nobel Prize can create 24 winners, which is six times more than the Fields Prize. There are more news points to report, and the influence is naturally greater.

At the same time, the Nobel Prize is much better than the Fields Prize in the promotion of awards. The Nobel Prize is announced in October every year. An award is announced every day, which can maintain the popularity of the week. From the announcement of the award list to There are two months after the awards are presented, and they can be advertised again when the awards are presented; together with the media interpretation in the middle, interviews with the winners and other news filling, it can be said that each year is from October to December. It is a hot period of Nobel Prize publicity.

As for the Fields Prize, it is only presented at the four-year International Conference of Mathematicians. It takes tens of minutes from the announcement of the list to the award, and there is little room for hype.

The average person's recognition of these awards is different! Let's take a look at the reasons for winning the Nobel Prize last year. The reason for winning the Physics Award is to recognize the predictions made by Higgs and others for the God particle.

The reason for the Chemical Award is to contribute to the research of olefin metathesis reactions in organic chemistry; olefin metathesis reactions are widely used in the production of materials such as pharmaceuticals and advanced plastics, making the production more efficient, the products more stable, and producing less hazardous waste.

The reason for winning the Physiology and Medicine Award is the discovery of bacteria that cause gastritis and gastric ulcer.

Economics, peace and literature awards do not belong to the natural sciences. I will not mention them. Most people see such reasons for at least ambiguous understanding, and then look at the brief introduction in the news. You can almost understand the significance of these results.

Look at the reasons for the Fields Prize this year, "because of his contribution to the development of stochastic conformal mapping, the geometry of Brownian motion two-dimensional space and the theory of conformal fields." "Because of his analysis in geometry and convection And revolutionary insights into geometry. "

Lying trough, what is this stuff! Not to mention that ordinary people can't understand it, you can find an undergraduate in the math department to see if he can understand it? Mathematics is probably the only subject that puts the achievements of the early twentieth century in the undergraduate curriculum and is beyond the scope of the subject. Even the professionals in the mathematics department can't understand it, how can the layman understand it?

And the news media are not easy to explain these reasons! Did you list a large list of mathematical formulas and symbols in the newspaper? There are anecdotes about the winners in that forum, such as Grothendieck 's anti-war, Perelman 's reclusive life, etc. And not every winner has gossip, so they can only give readers a little unconscious impression at most.

Since even the winners are so incomprehensible, how can you gossip with others? This award is too cold. It can only allow math professionals to entertain themselves.

In addition, the Nobel Prize has two awards that it has enjoyed. Peace and Literature Awards; you do n't understand physics, you do n't understand chemistry, and you do n't understand medicine. It

does n't matter if the threshold for reading a novel or poem is not too high? To understand the international situation, you only need to read the newspaper.

These two awards are due to the low threshold of recognition. It has always been the most reportable award in the Nobel Prize; when it comes to other awards, readers may not be evaluated, and everyone will talk about the literature award, oh. Haruki Murakami won no prize this year! Isn't anyone in our country claimed to be nominated? Why didn't he see him to receive the award? I knew his level was not enough!

As for the fact that more people think of it as a joke, ha ha ha ha, isn't most of the wars in the world initiated by the United States? How can the President of the United States still win an award? Shouldn't I send one to Moustache? Lying The map head broke the Red Empire and won the prize, which is really speechless!

Although these two awards are not authoritative enough, you have to admit that they have provided discussion resources for countless readers. The Nobel Prize has thus expanded its popularity unconsciously.

In addition, compared with physics, chemistry, biology, and medicine, the mathematics community does not have high funding requirements, which also causes mathematicians not to increase their exposure to media to increase their possibility of obtaining funds. They are not very interested in interviews. . Reporters of general interest will no longer interview people of this kind who have no lace news and are cold.

If Lu Qiuqian and Tao Zhexuan hold a press conference at the same time, there must be several times more reporters attending the press conference than Lu Zhejian; the reason is very simple. In addition to being a mathematician, Lu Qiuqian In addition, he is still a football star, and the news that can be reported greatly exceeds Tao Zhexuan.

However, these are just for ordinary people, in the education, mathematics and even the entire scientific and technological community in China, Lv Qiuqian's influence has been connected to several steps because of this award, and has quickly become the most popular in the scientific community of China Influential figures.

Also brought him a lot of benefits. At least at the highest level in China, there was a lot less doubt about whether he could host such a major project.

Chapter 383 - Unexpected substitutions (6/16)

When Lu Qiuqian returned to Munich after attending the International Conference of Mathematicians, it was naturally a warm welcome, from the principal Bernd Huber to the professors

Prof Schutt, Dietrich and the tile of the Mathematics Department Professor Lie and others, all the friends who came down to the laboratory gave warm blessings. 》

Of course, Hua Guo also wants Lu Qiujian to return to China to celebrate. Both the Spanish ambassador and the German ambassador have issued invitations many times, but he is still preparing to answer the debate. He has no time to wait for his degree. Returned to China for reasons to refuse.

This made many Chinese people feel sorry, especially the elder who was in Modu. He originally planned to also invite Lu Qiujian to hold a private celebration. Well, I heard that his musical instrument played well. Can you play an accordion and a guitar and have fun!

It is also a pity that they also have the person in charge of the Beijing Normal University Press. Lv Qiujian has sent the written “When Humans Start to Look at the Starry Sky” in the past. The head of the publishing house decided to publish it as soon as he saw the name of Lv Qiujian. However, Lu Qiujian always said that the time is not yet ripe, so he should do design, typesetting and printing first, and then release it when the time comes.

So to speak, the director of Beijing Normal University Press, Yuan Xinye, was anxious at the time. It was not such a good time to win the Fields Award. So he immediately booked a ticket to Munich and planned to convince Lu Qiujian himself.

“President Yuan, I know you want to use the Fields Medal craze to promote sales! But I don’t think this is the best time!” Lu Qiujian looked at Yuan Xinye opposite him in a coffee shop near the University of Munich Said.

“Dr. Lu, you do n’t know if you are not in the country! The news is your name all day long, and even the whole news has been on the news several times! The court station also made a special program for you! Now not on, when Come again?” Yuan Xinye persuaded.

“The Fields Award is not the most sensational award!” Lu Qiujian said leisurely, and at the same time remembered a very important thing, “By the way, are you going to sell exclusively or jointly with other companies?”

Is n’t the Fields Award the most sensational? After listening, Yuan Xinye seemed to understand the meaning of Lu Qiujian; but the design and layout were easy to say. Printing needs to invest a lot of money, if Lu Qiujian can’t do it this year ... Then why don’t you want to put a lot of money in

vain? Just when he was thinking about how to speak, he heard Lv Qiujian's second sentence and immediately became alert.

He also knows that if Lu Qiujian was not from Beijing Normal University, this publishing job would not be in his hands. As long as Lu Qiujian releases the sound of wanting to publish books, companies willing to help him publish can be ranked from Beijing Normal University. To Zhongbeihai!

Don't think about it and know that by Lu Qiujian's name, this book will definitely sell well! It is also possible that the sales records of Siniang and Han drivers will be exceeded! He asked if he was not satisfied with the strength of his publishing house? Don't lose such a big business!

After a moment of contemplation, Yuan Xinye replied, "We have a cooperative relationship with Beijing University Press and major universities across the country. The existing channels are very complete! With our strength, we can definitely bring you a good result!"

Lv Qiujian shook his head slowly. It was still too narrow to be limited to colleges and universities. What I wanted was not so. "I give this book to consumers not just college students. I hope my book can make more Many people see! Jingshi University 's experience in the college market is indeed very rich, but I am afraid that it is a little weak in the best-selling book market? I mean, it is introducing several companies with strong strength in this field to cooperate! "

Then Yuan Xinye came up with various reasons to persuade Lv Qiujian to abandon this plan, and even raised the already high royalties, but Lv Qiujian spent a few million euros a year in Bayern. In your eyes? What's more, his original intention was not to make money.

Under his repeated persistence. Yuan Xinye reluctantly agreed to his request, and returned home depressed to contact the partner company; while Lu Qiujian played the game while perfecting his reply.

The time soon came to October, when people in China began a long National Day holiday, Lu Qiujian had to play for the European Champions Cup for Bayern.

This match Bayern will play against Allianz Arena against Inter Milan from Italy. The remaining two teams in this group are Spartan Moscow and Atletico Lisbon. It is reasonable to say that the top two teams will be generated in these two teams. Unfortunately, Inter Milan lost to the last game. With Sporting Lisbon, if you lose again, it will be the penultimate group.

So in order to ensure that the group can qualify. Inter Milan opened a fierce attack on Bayern Munich under the leadership of Figo.

For a time, Bayern's door was full of noise, and Ibrahimovic and Crespo both found several good opportunities in front of the door. Fortunately, Kahn played the brave one by one to resolve the threat.

As the game progressed Inter Milan's loopholes were exposed. In this game, due to Vieira's suspension, Cambiasso was injured, resulting in the lack of generals in the midfield of Inter Milan and the defense Not very stable.

The three midfielders from Inter Milan are 33-year-old teenager Zanetti, Serbian national footballer Stankovic and French player Dakot; the ability to replace Vieira's appearance is certainly not comparable to his compatriots. In contrast, Lu Qiujiang regarded him as the focus of the attack.

This strategy soon came to fruition. Pizarro quickly got rid of Dakot after receiving Lu Qiujiang's pass and planned to break into the penalty area. Dakote, who had been long in the battle, pulled subconsciously. Pizarro Immediately fell to the ground.

When the referee's whistle sounded and a free kick was awarded, Inter Milan coach Mancini was almost kneeling! Who doesn't know that Lu Qiujiang's free kick goal rate is comparable to the penalty kick in the entire European football field! Is Inter Milan falling behind so quickly?

"Lv, it's up to you!" Pizarro got up from the ground and said to Lv Qiujiang with a smile.

Lv Qiujiang took the football and set it up. When he was about to make a free throw, he suddenly heard the fans at the scene exclaiming in unison. He looked back. Sauer on the sidelines was standing in the middle line to prepare for the debut, and the substitution sign was written aloud. his name.

what 's wrong? All Bayern players including Lu Qiujiang are ignorant! It's only ten minutes since the start of the game. And the replacement is still the number one superstar in the team, what is Magath to do?

Chapter 384 - Call from Sweden (July / Sixteen)

"What the **** is going on? How did Magath make such a substitution? This is totally unreasonable? We didn't see any signs of injury to Lu Qiujiang; the game only started for ten minutes, and there was no tactical adjustment yet. At the time, let 's say that even if tactical

adjustments are required, it does n't make sense to replace the most threatening player in his lineup?
"Huang Daxian in the live room also felt inexplicable.

In his commentary career, it's not that he hasn't seen substitutions in the opening ten minutes, but those players are either injured or have a yellow card and play extremely badly. Lu Qiujiang did not meet these two conditions. This is why?

"I kicked this free kick!" Lu Qiujiang couldn't figure it out, but he still intends to follow Magath's arrangement, but he still wants to take the lead for Bayern Munich before the end.

"No! No more! You are off now!" Magath looked anxious, and it seemed that something very important happened! Shouted loudly from the sidelines.

Inter Milan, teenager Zanetti and Stankovic looked at each other, what happened to Magath to make such a substitution? For a time, curiosity ***** the fluke of escape.

Two minutes before the time, when Bayern players were fighting with Inter Milan on the court, and the players on the bench cheered for them, Sauer's mobile phone buzzed suddenly around him.

"Who's cell phone!" Magath turned his head suddenly. He had already stipulated that the player's cell phone could only be placed in the dressing room during the game. Now some people violate his rules, which is unforgivable.

"Looks like Lu!" Sauer looked in the direction of his voice and saw Lu Qiujiang's jacket on the bench vibrating obviously.

"Ah." This time Magath was suddenly embarrassed. This rule is for all players, except for Lu Qiujiang. Due to the nature of his work, he needs to keep in touch with Professor Xuft's laboratory and cern, so Ma Gatt authorized him to bring his mobile phone to the court.

The phone has stopped shaking during the talk. Magath turned his eyes blankly to the football field, but before he could find the football and flew there, Lu Qiujiang's mobile phone shook again.

"Melmut, you help him take it, maybe it's something that matters!" It's not a way to be so loud, Magath waved.

“Is it so good?” Sauer felt a little inappropriate, wasn’t it a violation of others?

“It doesn’t matter, you just say that Lu is playing. If there are important things, you can help him convey it!” Magat helped him make a decision.

“So okay!” Sauer shrugged and took out his phone from Lu Qiujian’s jacket pocket. Hey, the number above doesn’t seem to be from Germany!

“Hello, hello.” No matter, let’s speak German first, and then the other party can’t understand it! Sauer greeted him by pressing the answer button. Fortunately, the opposite side also answered in German, “... No, no, I’m not Dr. Lu Qiujian, Lu is playing on the field now. I’m his teammate, Is there anything important I need to convey?”

Gradually, Santa Cruz and Karimi, who were also on the bench, felt something was wrong. How did Sauer’s voice tremble?

It’s easy to finish things. The other party had hung up the phone. Sauer still kept the phone in his ear like a marble statue. He didn’t wake up from the shock for a long time.

“Melmut, what the ***** happened!” Magath’s tone also became serious. Isn’t it something that happened to Lu Qiujian’s family?

“Teach ... Mr. Coach, just ...” shouted three times in a row before Sauer woke up. Repeating what the other party said on the phone with a trembling voice, the players, coaches, assistant coaches, and team doctors on the bench opened their mouths at the same time, showing an incredible expression.

“Mr. Coach! What should I do now?” Sauer’s tone of speech finally became smoother. “The other party said just now, and he will call again soon!”

“Well, what are you talking about?” Magath didn’t understand what Sauer said in a trance, and asked him to repeat it again before starting the arrangement, “Melmut, go warm up immediately! , You go to apply for an exchange person! I will use Melmut to replace Lu! “

“But, Felix, what about the game? We haven’t taken the lead yet?” Assistant coach Eich Cohen replied conditionally.

Magath shook his head, "Go, do what I said, for Lu, this game is no longer important!"

"Okay!" Erich Cohen also figured it out. Compared with what was said on the phone, what is a group game in a UEFA Champions League? He filled out the substitution application quickly and ran to the fourth official like a young man, "Bayern applied for substitution!"

"Are you sure?" The fourth official was also a little surprised. Judging from the situation on the court, Bayern could not see the need for substitution.

"Yes, very sure!" Eshkorn said without hesitation.

"So good." The fourth officer finished his job in accordance with the application submitted by Eichcorn, and walked to the center line with the electronic card for substitution. "To be honest, this substitution surprised me a little. Not many of these things happened in my refereeing career!"

"What surprises you is still behind! We are all witnessing history today!" Eiken walked a little, and he still suspects that he is in a dream.

Ok? what did you say? The fourth official could not help but look back at Eichcorn, what happened today? But now that they had reached the center line, he suppressed curiosity, and the slowing man's sign was raised high above his head. The numbers shown above are number 7 and number 27!

"What's this for Magath? Lu is about to take a free kick! He wants to replace him!" The Bayern fans in the stands have been whispering when they saw Sauer warming up, and now see Sauer It was Lu Qiuqian who was replaced and could not believe his eyes.

A burst of exclamation sounded from the stands. From their point of view, the only possibility of being replaced at this time was injury, and all Bayern fans stood up worried for a time.

"Lv, there is your phone!" After the high-five hug with Lv Qiuqian, Sauer walked to the field without rushing to participate in the competition.

As soon as Lu Qiuqian took the phone, it started to vibrate again. Lu Qiuqian pressed the answer button, "Hi, hello, this is Lu Qiuqian!"

“Dear Dr. Qiuqian Lu, I am from the Royal Swedish Academy of Sciences ...”

Chapter 385 - Nobel Prize

“Dear Dr. Qiuqian Lu, I am Normark, Permanent Secretary of the Royal Swedish Academy of Sciences.” A polite voice came from the phone.

“Hello Mr. Normark! I am glad to receive your call!” Lu Qiuqian’s heartbeat suddenly accelerated, and he received a call from the Royal Swedish Academy of Sciences in early October. The meaning of this is self-evident!

Sure enough, Normark announced an important message without waiting for him, “Dr. Lu Qiuqian, I only represent the Royal Swedish Academy of Sciences, and I ’m honored to inform you because of your contribution to dark matter theory, especially the development of a brand new Test methods to discover the outstanding achievements of dark matter particles. “

Speaking of which, Normark raised his voice, “The Nobel Prize in Physics selection committee decided to award the 2006 Nobel Prize in Physics to Chinese scientist Lu Qiuqian, in recognition of your basic theoretical research and groundbreaking great discoveries in the field of dark matter! “

Hearing this, Lv Qiuqian could n’t help but use a fist and waved a few smiles, with a brilliant smile, “Thank you very much for telling me this good news, Mr. Normark; thank you to the Royal Swedish Academy of Sciences and the Nobel Prize in Physics for selecting me The supreme honor! Today will be the most memorable day of my life! “

“This is the honor you deserve! Then I will not disturb you and share this good news with your colleagues, friends and family! Later we will send you the invitation letter of the award ceremony and wait for you in Sweden!” Normark was going to hang up the phone when he finished speaking, and he had finished his work, so there was no need to delay others celebrating.

“Please wait!” Lu Qiuqian asked quickly, “If it is convenient, can you tell us which other physicists won this year’s Nobel Prize in Physics?”

“This year’s Nobel Prize in Physics only awards you one person, respectable Dr. Lu! This is the first time since the French physicist George Chapak in 1992!” Normark said, “You will enjoy this year’s exclusive The Medal of the Bell Physics Award and a prize of 10 million SEK! “

“Thank you, thank you very much! I look forward to meeting you and your friends at the Royal Swedish Academy of Sciences in Sweden! Let’s meet in December!” Lu Qiuqian hung up after the greeting.

“Lv! You are so incredible!” He just hung up the phone, and Santa Cruz, who had been waiting for him, rushed to hug him tightly, and then came to the bench players such as Lensin and Podolski.

“Don’t, don’t do this!” Lu Qiu Jian wailed and was knocked down by Santa Cruz. The other players rushed to play as they celebrated the goal.

“What are you doing! Hurry up! What if Lu Nong gets hurt!” Magath was so scared that his hair was standing up. If Lv Qiu Jian had an accident, these substitutes of the Bayern Club would not become the sinners of the entire human civilization. ?

At this time, the game on the field has already restarted, and Sauer reluctantly left the sideline under the urging of the referee. Joining the game, his free kick failed and the two sides reopened the tug of war.

Zanetti tackled Ma Kai’s offense with a tackle. When he got up, he saw Bayern’s substitute player in a frantic celebration. He subconsciously glanced at the big screen; hey. Am I dazzled? The score above is still 0 to 0! How did they make it as if they had won the European Championship?

“Mr. Referee, do you care?” The experienced Figo put the pressure on the referee in time, and he pointed to the crowd celebrating on the sidelines. “They are very influential in the game!”

Amount, I think about it, are there any rules in the football rules that prohibit substitute players from celebrating this when they don’t score a goal? The referee scratched his head, not knowing what to do with this group of players.

Fortunately, at this time, Magath and Eichcorn had rescued Lu Qiu Jian from the pile of people. He helped Lu Qiu Jian pat the grass scraps on his body and reached out his right hand. “Lv, congratulations, you once again created a miracle!”

“Thank you!” Lu Qiu Jian looked at the confused Bayern and Inter players with a shy look, shrugged and said, “I hope it will not affect the outcome of the game!”

“Compared to this good news, the outcome of a game is totally not worth mentioning! Besides, as long as you are there, are we still in doubt to get the group first?”

So I shook hands with assistant coaches, team doctors and other staff and thanked them for their blessings; the fourth official who had followed them for a long time was dumbfounded. No wonder Sauer said that he was still more surprised. History! Received the Nobel Prize winning call while playing football. This is probably a miracle of no one before and no one after!

At the end of Lu Qiu Jian's handshake with the last staff member, Magath's phone also rang, "Hello Mr. Beckenbauer ... No, no, no surprise to Lu's body ... It's a call from the Royal Swedish Academy of Sciences. Inform him that he won this year's Nobel Prize in Physics ... I will help you and Mr. Hennes and Mr. Rummenigge convey congratulations! ... I have to ask Lu to answer you, please do n't hang up! "

Said Magath walked over to Lu Qiu Jian while holding the microphone, "Lu, Mr. Beckenbauer's phone."

"Lu, congratulations on winning the Nobel Prize! I think today will be the most surprising day in the history of Bayern Munich!" Said to let Magath congratulate him. But he couldn't help saying it.

"Thank you! Thank you very much!" I don't know how many times Lu Qiu Jian thanked today. Without a few words of greeting, Beckenbauer couldn't help saying his purpose. "Lu, if you don't mind me I want 70,000 fans and all the audience in front of the TV to share this joy with you. Do you think the on-site commentator can tell everyone the good news? "

Ha, this is a good opportunity to promote Bayern! Beckenbauer is really not simple, but he seems to have no reason to refuse! Lu Qiu Jian agreed directly, "Okay, if you think it is appropriate, I have no opinion!"

噢 Since Bayern's players have been absent-minded since Sauer came up! The experienced teenager Zanetti keenly discovered the change of Bayern, he decided to strengthen the offensive; this is his 500th game on behalf of Inter Milan, if you can win a victory, it would be better.

As he drove the ball forward, the Allianz Arena's wide-rang suddenly sounded, and the on-site commentator announced loudly in an incredible tone, "It's an honor to tell you that just five minutes ago, Bayern Munich's 27th player Lu Qiu Jian received a call from the Royal Swedish Academy of Sciences ... "

Chapter 386 - The game is meaningless

d "... Dr. Qiu Jian Lu won this year's Nobel Prize in Physics for his contribution to the theory of dark matter, especially the development of new experimental methods to discover the outstanding achievements of dark matter particles! Let us give Bayern Munich Applaud the first Nobel Prize

winner in the history of the club! “The commentator has spoken several times in multiple languages including German, Italian, Spanish, etc., and strives to be understood by every fan present. £ ∞, ..

The voice of the narrator fell, and Zanetti stumbled the ball out of the sideline, tilting his head and rushing forward to prepare to grab a spot in front of the door. Ibrahimovic hit the head post and was tearing Crespo in Lucio’s jersey competition for position lowered his hand. Mancini on the sideline rubbed his ears desperately. He still suspects that he has auditory hallucinations.

The fans at the scene froze for a while before cheering in unison and shouting Lv Qiujiang’s name, and Lv Qiujiang also stood up in a circle and waved to the fans in the stands.

This news also spread to the rest of the world with the live broadcast signal. Huang Daxian in the live broadcast room of the Chinese Imperial Court looked at the note passed by the director. , Did you give the wrong note? Today is not April Fools ’Day!”

“I have checked with the reporters on the spot, and this is what the live broadcast said!” With Lu Qiujiang’s excellent performance, Chao Tingtai also sent his own reporters abroad. The director has just made several phone calls just now. Confirm the authenticity of this news! “Bayern Munich will never make such a joke in front of people all over the world?”

“And I can’t think of another reason why Dr. Lu will be replaced!” Tao Wei also came out to help, “I was a little bit puzzled by the move on the Bayern bench. It seems that it was originally for Dr. Lu. Celebrate! “

“Then I will broadcast it!” Huang Daxian also wanted to announce the good news to the fans in front of the TV for the first time, and he couldn’t care more about it. If there was an accident, his job would be smashed. .

“Broadcast!” I’ll go out with you if something happens! The director gritted his teeth and made up his mind. Huang Daxian put on the headphones again and brewed his emotions to prepare to broadcast the good news.

Hey, how good is it to understand the speaker for a long time! And the situation on the court is chaotic! Just when the fans in front of the TV doubted, Huang Daxian’s voice re-sounded. “The audience friends in front of the TV are honored to be able to witness this great historical moment with everyone!”

Ok? what 's wrong? All the fans raised their ears in front of the TV. "We just saw that Magath replaced Lu Qiujian in just over ten minutes at the start of the game. I and everyone are equally curious about the purpose of Magath's move; We just contacted the reporter sent to Munich by the court station, and he told us on the spot why Lu Qiujian was replaced. "

Speaking of which, Huang Daxian raised his voice and announced the news in a nearly shouting way, "During the eighteenth minute of this game, Dr. Lu Qiujian received a call from the Royal Swedish Academy of Sciences, Sweden The staff of the Royal Academy of Sciences announced that Dr. Lv Qiujian won this year 's Nobel Prize in Physics, which is also the first Nobel Prize winner in the history of China! Audience friends in front of the TV, let us make this great Cheers at the moment! "

"Lying trough!"

"Awesome!"

"Ba Shi!"

"Forehead thief!"

"Oh mom!"

.....

All kinds of exclamations sounded from the front of the TV. The fans waiting in front of the TV did not care that it was late at night and shouted loudly when they opened the window to vent their excitement and pride.

"You're sick, the youngest! Watching the ball in the middle of the night and shouting so loudly!" In a university dormitory, five strong men sat up naked from the bed and looked at the thin man in front of the computer fiercely.

"A few brothers! We Chinese people have won the Nobel Prize!" The guy called the third son shouted excitedly without paying attention to their eyes.

“What? Nobel Prize! Are you not just watching the ball?” The five people’s drowsiness and the irritability of being awakened swayed in an instant. He crawled out of bed and ran to the computer to watch Huang Daxian’s commentary; cheers soon rang through the dormitory building and quickly spread throughout the school ...

This happened not only in one place, but the president of Peking University was also awakened by a phone call from his sleep. Without saying a word, he quickly got up and turned on the TV. Hearing the news from Huang Daxian’s mouth, he was so excited that he couldn’t help himself; he quickly picked up the phone and started dialing.

“Lao Zhang! Don’t sleep! Hurry up and call all your people to my office for a meeting!” As he said, he couldn’t help laughing, “We won a Nobel Prize this time at Beijing Normal University! “

“Nobel Prize?” Minister Zhang of the Propaganda Department also instantly sobered up, “Is Dr. Lv Qiujian! Hahahaha. I will call the group of monkey cubs to work! Headmaster, you can rest assured, I will definitely this time The celebration is very lively! “

When they came to the office building after changing their clothes, they discovered that it was in the early morning hours. The lights of the whole dormitory building of Beijing Normal University are on, and cheers are ringing through the sky ...

Not to mention how China celebrates, the game of Allianz Arena is not over yet! Bayern’s players are now unintentionally attacking, and Inter Milan are also at a loss. Are we supposed to attack, or are we wasting our time?

“Javier, what should I do?” Figo asked beside Captain Zanetti.

“Well Zanetti glanced at Mancini on the sidelines, he was also at a loss,” Forget it, it seems good to get a draw at the Allianz Arena. ! “

“I think so too!” Figo nodded in agreement. “Even if we can take advantage of the chaos and get a three-point wait for the news to spread, our Inter Milan image will be completely finished!”

On such a gleeful occasion, they will not be able to face the hundred people anymore when they go down the road to pursue victory. This game will not determine life or death, and it is impossible to create a dead enemy for their club!

Besides, there is still a second round in the group stage. Is it possible for Lu Qiu to build his strength at the Meazza Stadium and leave Inter Milan with an unforgettable score? Figo and Zanetti both remember the painful lesson of Werder Bremen!

“Javier, Louis! Control the emotions of the players, don’t be impulsive, just hold the draw!” At this time Mancini also calmed down, and he shouted loudly on the sidelines.

He knows that today, under such circumstances, the outcome of this game is completely unimportant!

Chapter 387 - All parties scramble

“Dr. Lu, I am a reporter from Dexin News Agency, how are you feeling now?”

“I am a reporter from the Associated Press. Can you tell us what you want to say to fans around the world?”

“Dr. Lu, I am a reporter from China Xinhua News Agency! Congratulations on becoming the first Nobel Prize winner in China. What do you think is the most important reason for your award?”

The scene of the press conference became the home of major news agencies around the world. The poor sports reporters were squeezed aside. Mancini and Zanetti looked at each other and shrugged. They knew that even if they left now No reporter will care.

Zanetti stroked the jersey in his hand with satisfaction. This was the jersey worn by Lu Qiujian when he won the Nobel Prize! I am afraid that there is no more legendary and collectible jersey than this one in the history of football. I did not expect it to fall into my own hands! When thinking of the scene when Lu Qiujian mentioned the exchange of jerseys with him, Zanetti felt like he was dreaming.

Mancini was not dissatisfied with the result of the draw! After all, Inter Milan is now the only team to score points from Bayern Munich with Lu Qiujian playing!

The Bayern Big Three, who are hiding aside, are even more happy. With today’s news being broadcast all over the world, the name of Bayern Munich will spread from Europe to America, from Asia to Oceania, from ... Concerned about the Nobel Prize? But today’s advertising role exceeds the salary he gave to Lu Qiujian!

Thank God Lu Qiujiang chose the University of Munich instead of the Paris Normal University, Cambridge University ... Thank you Magat for her wise and decisive decision! The Bayern Big Three also drew a cross on their chests.

“Dr. Lu, can you continue to play after winning the Nobel Prize? What is your next plan? I just received news that your alma mater, Princeton, held a press conference to congratulate you, And announced that you have been offered the position of lecturer professor of physics! “Before they were happy for a long time, a question from a reporter from the United States poured on their heads like a scoop of cold water, allowing them to calm down instantly.

damn it! I just forgot about this just now. Lu Qiujiang was about to defend the thesis. After the thesis defense, he will terminate the contract with Bayern Munich! His team will lose this great player in another month.

“Uli. How’s your business going? What did Professor Trinon say?” Beckenbauer frowned, and it felt terrible to fall from the cloud.

“I think he might be more cautious now? After all, it takes great courage to question a Nobel Prize winner!” Hernes was not sure whether Professor Trinon would follow Rummenigge’s plan Too.

“I think we can’t just put hope on him!” Rummenigge has a new idea. “Since Princeton University is willing to provide Lu with a professorship, then Munich University or Technical University of Munich will also make The same decision? Or the Mark-Planck Institute? If he wants to do more research? “Since Lu Qiujiang came. The Bayern Big Three have put a lot of effort into the pattern of the Munich education and technology community.

“I’m going to call President Huber immediately! You can also try to contact the Technical University of Munich and the Mark-Planck Institute.” Beckenbauer figured out his mobile phone. He and President Huber were both representatives of Munich’s high society People naturally have the other party’s phone.

“Haha, Bernd, have you received that news? ...” Gu couldn’t help it. Beckenbauer directly explained the situation, “Did you know? A reporter told us interesting news at the press conference just now that Princeton University provided Dr. Lu with a physics lecturer position!”

Hearing the sound of the chair falling from President Huber, Beckenbauer smiled at the corner of his mouth. Presumably, he will act soon! “... No, Dr. Lu has not agreed, he said that he will not consider the next plan until the thesis defense is passed ... Ok, I am also looking forward to his continued stay in Munich ... “

“It seems that President Huber also intends to provide him with a similar position! How is your situation?” Hang up the phone, Beckenbauer looked at the other two giants.

“The Technical University of Munich is a little worried. They think that even if Lucen stays in Munich, it is more likely to go to the University of Munich! But they also said they would send an invitation to Luc!”

“The Mark-Planck Institute said it still needs to be considered carefully, but if Lu is willing to go, he still hopes to take the position of the Mark-Planck Institute of Physics!”

“That’s all we can do!” Beckenbauer sighed slightly. After all, Germany and the level of education and scientific research are not the status of the first half of the last century. If it is still the era of Göttingen, keep Lu Qiuqian I’m afraid the hope will be much greater!

After the news conference, with the news that Lu Qiuqian won the Nobel Prize and Princeton and many other universities and research institutions sent him invitations, more institutions joined the competition.

Dr. Evans of CERN told reporters, “There is no better place for Lu than CERN! If he is willing to come, and I will retire immediately to let him take over my position. He is in charge of the job, he You can use as many experiments as you want! “

Rolf Hoyle, director of the CERN Center, also expressed support for Dr. Evans ’decision,“ Although we are reluctant to retire Lynn, she is very old after all. It is also time to hand over the heavy work to young people Now! “

Cambridge, who is far across the strait, also responded. They claimed that if Lu Qiuqian was willing to teach in Cambridge, they would provide the most excellent conditions, and even said that they would let Lu Qiuqian take over the seat of Lucas Mathematics professor after Stephen Hawking retired. .

In this regard, London giants not far from Cambridge have expressed their support, Wenger said he will certainly have more common language with Lu Qiuqian. Abramovich said that as long as Lu Qiuqian would come to Chelsea to play football, he would give Lu Qiu a blank cheque, and let him fill in the above amount.

Lord Ferguson of Manchester United is wondering how much it will cost to buy a small private jet to run the Cambridge to Manchester route.

When the Chinese saw the news, they could not help getting nervous. These tall institutions provided such favorable conditions and such a respected position. Will Lu Qiuqian return to the country?

Chapter 388 - Decide

“Twenty-three-year-old Nobel Prize winner! This may have created a new record?” After entering the meeting room, an elder shook his head incredulously.

“Yes, Dr. Lu broke the record of Lawrence-Prague and the youngest Nobel Prize winner in 1915 when he was 25 years old! And Dr. Lv is still a single award this time, Lawrence-Prague was with his father. The winners! The two can’t be the same in terms of weight! “The Prime Minister also said happily that Lv Qiuqian was able to win the award, which is in part to the achievements made by China in the field of science and education in the past decades sure.

“I have just sent him a formal congratulatory message on behalf of the central government! The consulate general in Munich is already contacting him. I will call him later!” The elder knocked on the table, “Dr. Lu will be in another month It ’s time for a thesis defense, no one thinks he wo n’t pass the defense? “

There was a burst of laughter from the people who participated in the meeting. This is the stereotyped Germany. If it is placed in China, what defense is needed! I’m afraid he will be announced directly? Well, it seems that Lu Qiuqian was like this when he graduated from Beijing Normal University.

“According to the previous agreement, Dr. Lu will return to China after obtaining a PhD in physics from the University of Munich. Hey, how do I think this is a bit awkward to say?” The elder elder couldn’t help laughing when he said halfway. Degree, how to listen to how it sounds like language sickness!

It’s no wonder, who let Lu Qiuqian obtain a Phd degree from Princeton and a Ph.D. degree from Peking University before calculation. This is his third doctorate degree.

“The three doctorate degrees are really amazing! And then ...” Although there were many masters of Chinese studies with double-digit doctorate degrees in the Republic of China, their weight was comparable to that of Lu Qiuqian ... Ha ha, some people stopped when they said halfway. After all, they are politicians.

“So let’s start the discussion right now! There should be a conclusion about the candidate for the chief of Xihe Project now!” The name Xihe Project refers to the space exploration program to the outside, and the controllable nuclear fusion program to the inside .

The intelligence personnel of the United States did a lot of research when they received this codename. They first thought of the ***** who controlled the Japanese car in ancient Chinese mythology. It seems reasonable to name the space exploration program by the ***** who controls the Japanese car traveling through the sky. Did n’t the United States also name its own moon exploration program Apollo? Hua Guo, this is the cottage!

However, when Xi and the true face of the plan were revealed, the talents of the United States discovered. Xihe has another identity. She is Emperor Jun’s wife and has ten sons with Emperor Jun-that is, the legendary ten suns. Isn’t the sun undergoing nuclear fusion all the time? It turned out that the answer was hidden in the name of this plan long ago, but I regretted not thinking about it!

“Everyone talk about it. Who is the person in charge of this major plan that will directly affect the great rejuvenation process of China?” The elders looked around and waited for others to answer.

“I think Dr. Lu Qiujian is the most suitable person for this plan!” An elder from the Qin Feng family took the lead in speaking. If this plan can be successful, they will be the most successful in this department, so he will stand up first Supporting Lu Qiujian, “The plan was proposed by Dr. Lu Qiujian. I’m afraid no one knows all the links of the plan better than him! I can’t think of anyone else who is more suitable for this position except him.”

“Simply from a technical point of view, I agree with you! But is Dr. Lu too young?” Some people began to repeat the old saying, which is also a problem that will be mentioned in every meeting. A three-year-old man came to preside over such an ambitious plan. Will it be a bit rash? “

“This plan will definitely involve tens of billions of funds and hundreds of thousands of staff. It is not only the professional ability that needs to be tested, but also the management ability, resource coordination ability and interpersonal relationship ability I am afraid that Dr. Lu is still inadequate? “

“So I think the best plan is for Dr. Lu to be the chief scientist. We are selecting a highly respected manager as the general manager, so that it will be more secure!”

“If there is a dispute between this general manager and Dr. Lu, who should listen to it?” The elders of Qin Feng’s line immediately retorted.

“Professional issues are based on Dr. Lu’s opinions, non-professional issues are subject to the opinion of the person in charge!”

“So how to define professional and non-professional? The allocation of personnel, the appointment of professional or non-professional? If there are no suitable candidates, Dr. Lu may be difficult to cook without rice!” The two sides had a heated argument.

“There are thousands of scientists at the European Center for Nuclear Research, and Dr. Lu directly managed them when conducting dark matter experiments!” Finally, others joined the discussion. “I think Dr. Lu has already proven his management ability, resource co-ordination ability, planning and implementation ability! As for seniority, I think that since the top scientists from all over the world are able to accept his management, our If scientists have any more opinions, I will have to question their moral issues! “

“The two awards, the Nobel Prize and the Fields Prize, will greatly enhance the prestige of Dr. Lu. This shows that he has stood at the highest level among the scientists in the world. He has heard the story first and the winner first! This is us What the ancestors said! Can’t our people do what the ancients were able to do? “

Hearing their discussion, the elders’ hearts finally came down The number of parties who originally supported and questioned Lu Qiuqian was similar. But the heavy weight of the Nobel Prize has made a subtle change in things, and this change is officially moving in a good direction.

After listening for a while, the elders felt almost ready, and reached out to stop the discussion, “Okay, let ’s vote now! Please support Dr. Lv Qiuqian as the head of the Xihe project!

The elders of the Qin Feng family took the lead in raising their hands, one after the other, two ... The elder elder also raised his right hand and calculated the number of supporters. The elder elder nodded in satisfaction, “Pass! I Announced that Dr. Lu Qiuqian will become the general manager of Xihe Project! “

So, in this small conference room, a major appointment concerning the future development of China, which will affect the whole world and even the future of mankind, has been decided!

Chapter 389 - publishing

“... Thank you very much. I will report to you as soon as I return to China!” After receiving this good news from the phone, Lu Qiuqian pressed to thank the elder. ←

“Haha, I said it last time at the National Science and Technology Commendation Conference. If you win the Fields Medal, you will have a banquet in Haizi. As a result, you won not only the Fields Medal, but also the Nobel Prize. ! Are you planning to save money for me to put two tons into one meal? “The elder also joked.

At the same time, the photographer on the side and the Chinese ambassador to Germany and the Consul General in Munich showed a surprised look. In their impressions, the elders have always been unsmiling, and it is the first time in their minds to make jokes as easy as they are today.

In the following days, reporters from China to Munich continued to flow. In addition to the few media that had to deal with, such as Chaotingtai, others Lu Qiuqian either refused or accepted their interviews through the Internet. Allow yourself to be quieter.

But there is a person who has to be personally received anyway. That is Yuan Xinye, the president of Beijing Normal University Press. After receiving the news of Lu Qiuqian's award, he rushed to Germany and came to discuss the book “Being a Human Being” with him. Start looking at the starry sky.

“Dr. Lu! Your decision was so brilliant!” He took out a sample book and handed it to Lu Qiuqian. The cover was a vast starry sky. In addition to the title of the starry sky, there was a line of eye-catching characters- The 2005 Nobel Prize in Physics and the 25th Fields Medal winner Lu Qiuqian!

While reading the sample book by Lu Qiuqian, Yuan Xinye kept expressing his admiration, “Now it seems that I am really a little impatient! The public influence of the Fields Medal is indeed not as good as that of Nobel. Awards, the timing of publishing books is much better now than August! “

“The cover is okay, I will look at the text again!” Lu Qiuqian opened the text, which contains beautiful illustrations in addition to the text. Of course, these illustrations are all from Xia Xiao's hand. When she was in Germany, she wrote her own manuscript. She drew illustrations, and each painting was subjected to his instructions and modifications, which is more reliable than finding someone else. There are few illustrators who are better than her!

“I have contacted several well-known book companies in Modu, Xingcheng and Shudi, and I have found several advertising companies to develop a promotion plan for this book. They have already made your plan for winning the Nobel Prize when they made the plan. Now you can use it

directly! At present, all the preparations are ready. The printing house also runs 24 hours of non-stop printing! “Yuan Xinye, who was all over the red, kept telling her credit.

The company he was looking for basically covered several major media centers in China. Through their channels, he could send his books to all parts of the country in the shortest time.

“In addition, the government is also very supportive of this book. The Xinhua Bookstore took the initiative to come and order books, and the first batch will have millions of copies!” Maybe these people saw that the high-level leaders valued themselves so much, and wanted to sell them through these means. ? But this is absolutely no harm to himself! The channel of Xinhua Bookstore can reach almost all cities above the county level.

“By the way, Dr. Lu, do you only write manuscripts in Chinese or do you have other languages? We have recently planned to translate your books into other languages and sell them abroad. I am afraid that those translations are not good at mathematics and physics. , There should be some undesirable errors. It would be better if you had the manuscript! “Yuan Xinye saw Lu Qiujian in a good mood and tentatively made his own request.

However, Lu Qiujian quickly shattered his dream, “Oh, you do n’t have to worry about things published abroad. There are publishers in Europe, America, and Neon. I have negotiated a contract with them! These things let Let them locals do it! After all, they are more familiar with the channels of their country. “

“Eh, that’s ... really congratulations!” Depressed Yuan Xinye only held back these words for a long time, and he was very depressed! This is not only a question of economic benefits, but also a good opportunity to start your own brand. However, he missed it that way; but he was still unwilling to wait. After asking the countries responsible for those publishing houses, he had to go to the book distribution rights of some small countries around China before he was willing to do so.

“Well. Yes, I didn’t find any problems! Just release it!” Quickly turned it over, and Lu Qiujian made a decision.

“It’s good if you are satisfied, then you see that some promotional activities may require your cooperation, such as signing and selling books ...” Yuan Xinye said the lower the voice, he probably knew that Lu Qiujian did not have this time, but It’s a little unwilling to say nothing.

“How much did you bring this time with your signature? I can help you sign up to a hundred copies. Even if you attend the event, I won’t be able to return to China before December. After returning, I

will definitely be busy and have no time to participate!” Speaking of Lu Qiujiang, he took a pen and signed his name on the title page of the sample book.

“I have my own collection of this book!” Yuan Xinye immediately hugged the book in his arms like a baby. As for why he can return to China after December, it is because the Nobel Prize award time is December. !

A few days later Just when the exposure of Lu Qiujiang was high, “When Humans Start to Look Up at the Starry Sky” began to be released nationwide. Due to the previous bombing propaganda and the strong appeal of Lu Qiujiang, many There was a long queue at the door of the bookstore.

Among these people, some are Lu Qiujiang’s fans. It is not enough to collect Lu Qiujiang’s jerseys. Now, besides a book, he doesn’t know whether he can read or not, he will buy it and show it again! What’s more, I heard that there are lottery events where you can get Lv Qiujiang’s autograph! Not many fans can get Lv Qiujiang’s signature!

There are also enthusiasts of mathematics, physics and astronomy. They want to see how the world’s top scholars explain those problems that interest them!

The parents of Wangzi Chenglong and Wangfeng Chengfeng hope that their children can learn the wisdom of Lu Qiujiang from them.

Of course, there are also restless, for example, this sneaky walking around in the team is, “Oh, brother, do you want the latest book by Lv Qiujiang? Twenty-eight are sold here, I only need ten! “

The guy who bought the pirated version was soon discovered by the law enforcement personnel. Several uniformed staff members immediately ran over to grab him and interrogated him to find his book collection location.

Unpacking the paper bag, the law enforcement officers were speechless. I saw that there was “Lü Qiujiang’s mother telling you how to cultivate genius” and “Zero Contact: Lu Qiu” Jian has to say the secret “..... What are these!

Chapter 390 - The defense begins

“Professor Trinin! Lu’s doctoral thesis is coming soon! How are you preparing?” Hernes is now more familiar with Lu Qiujiang’s academic schedule than the teachers at the University of Munich!

“Uli, this is really difficult!” Professor Trinong looks like a constipation. “Lv just won the Nobel Prize in Physics last month. If his graduation thesis is postponed, then you think that the academic peers want He laughed at him and denied me his paper? And once the matter happened, the school would immediately intervene in the investigation! “

That’s the Nobel Prize in Physics! Scholars who can receive this honor are all top physics professionals. To be honest, Professor Trinong estimates that there is no way to get a nomination in his life, let alone an award! In other words, his level is several grades away from Lv Qiu Jian. After this incident, he wanted Lv Qiu Jian to help him read the article. Everyone may not be free. Henes actually asked him to go to the article of Caluciu ! This is really hard! If he was a little daring a month ago, he is almost going to give up now.

“Old friend! Bayern Munich now leads second place in the Bundesliga standings by 10 points, and has secured the first place in the group in the UEFA Champions League! The German Cup is also successfully promoted! Seeing Bayern Munich win the Triple Crown for three consecutive years The opportunity is right in front of you, do you want to see all this disappear? “Hernes played a sad card.

Seeing Professor Trinon in deep contemplation, Hernes added another fire, “Michel is gone, we have not been able to get Ribery in the summer transfer period, if Lu Qiu Jian leaves again, then Bayern Even a superstar is gone! Not only the Champions League, it ’s hard to say whether you can maintain the lead in the Bundesliga standings. You know, many games this year were scored by Lu ’s goals victorious!”

“Not to mention that in the team ’s more than two years in the team, opponents have taken the threat of his free kick and dared not use foul tactics on our players. If Lu left! I believe they will soon use rough fouls. To interrupt our offense; over the years, the players have adapted to this technical game, and Deisler has regained confidence. Young people such as Ram, Schweinsteiger and other young people have benefited from this style of game. “

“But it also made them have the inherent concept of neglecting to guard against fouls; if Lu still quit the team and they still play in this way, they will definitely get hurt! So, I hope Lu can stay for a few more months. Coach Magath can have enough time to change their habits in the game! “

“You don’t want these Bayern Stars of Hope to be fouled at the beginning of their careers?” Any veteran fan will particularly like to see his young players grow into the backbone of the team, Heine Si uses the champion and youth team members to try to persuade Professor Trinong.

“I know all of this, but ...” Professor Trinong is very tangled, if Hernes asked other students to help him. Not to mention the postponement of the thesis, just let him hang up directly, but now I want to target the youngest Nobel Prize winner in history!

“I believe you have read Lu’s paper? Isn’t it really a question?” Henes asked unwillingly, looking at his tangled expression.

“To be honest, I can’t understand some places!” Professor Trinong was a little embarrassed at first, but soon returned to normal! I’m sorry because I am a professor but can’t understand a student’s thesis, but when I thought that this student had just won the Nobel Prize in Physics, it returned to normal immediately.

“So, can I understand this!” To say that academic Hernes is scum, but when it comes to conspiracy, he directly dumped Professor Trinong 18 Streets. In a short sentence, he thought of countermeasures, “Lu’s thesis is quite difficult-of course, this is also very normal, are they the Nobel Prize winners! But this is not not every professor who participated in the defense Can you clearly understand his thesis? “

“Yes! Maybe Professor Xufter knows better that the process of the birth of his thesis can be better, other professors participating in the defense may not clearly understand the value of this thesis!” Professor Trinong said honestly.

“Very good!” Hernes nodded in satisfaction, “I think you and other professors who participated in the defense can first ask him questions, and then let him readjust for the reason that this paper is too difficult!”

“You didn’t say that this paper is wrong, but that he was too difficult to study for others.” The more he said, the more he felt his idea was reliable. “You see, an ordinary physics professor thinks that Nobel Is n’t it normal for the winner ’s paper to be difficult? This will not affect your reputation at all. ”

Yeah, I am not picking the fault, but hope that more people can understand his thesis. Does this seem to make sense? Professor Trinong struggled for a while, but he still fell under the constant offensive of Hernes, “Okay, I will try it out when the formal reply But I do not guarantee that it will succeed! “

“Thank you very much! If Bayern Munich can continue to win the Triple Crown, then you are the biggest hero!” Hernes put on a high hat and discussed some details with Professor Trinong before they dispersed.

Finally, it's time for the formal reply! Should I tidy up the things in my room and return to my country? In the morning, Lu Qiujiang looked around, and most of his things in the room were various professional books. The rest are the paintings left by Xia Xiao and the gadgets she bought while in Germany.

Changed his formal clothes and brought what he needed for the defense. Lu Qiujiang walked slowly to the defense conference room. After this matter was settled, his life in Europe could come to an end.

"Lu, come on! I really envy you for getting your degree so early! But this is just too normal for you!" Outside the door of the meeting room, Ludwig and other small friends stood there to him Welcome.

"If I say our school is too old-fashioned! Put it in any school in the world, I am afraid that Dr. Lu will have been directly awarded!" Dietrich shrugged.

"But I don't think any school in the world can find the second student who has already won the Nobel Prize in Physics without a doctorate in physics?" Frederick pointed out the loopholes in his words.

After a while of fun, the crowd hugged Lu Qiujiang in the middle and entered the meeting room, and the defense was about to begin.
