

## D. School 401

### Chapter 401 - Olympiad and Fields (13/21)

Lu Qiujian's remarks made the audience and the staff of the court station, such as Lu Rui, suddenly realize that in the past, they thought that as long as they attach importance to scientific research and give scientists an opportunity, they will be able to achieve success, but they have not thought about this opportunity as expensive. ←

There was a lot of noise in the studio hall, and everyone was buzzing about what Lu Qiujian said just now, "No wonder Yang Zhenning and Li Zhengdao have won awards abroad, but there have been no winners of the Nobel Prize in China. It was all a matter of money. "Liang Xiao felt blush for a while, and went back and quickly deleted some of the posts he sprayed on the Internet, sprayed with national characteristics, lest he be whip corpse after the show was broadcast.

After applause, I entered the questioning session again. This time I stood up with a girl wearing glasses. She still asked Lu Qiujian with a somewhat unconvincing tone, "Dr. Lu, what you said just now makes sense. , But I think the mathematics field should not require a lot of investment, so why do so many players in our country have won the gold medal in the Olympic mathematics competition, but only you have won the Fields Medal? "

"First of all, I correct your wrong opinion. Mathematics does not require a lot of investment. The four-color theorem is only proved by using supercomputers! And supercomputers are very expensive!" Lu Qiujian continued to answer with a smile, "We still Let 's use the data to see if there 's any relationship between the Olympic gold medal and the Fields Award! "

"Let 's take a look at how many Fields Medal winners are Olympic gold medal winners! Gregory Margulies in 1978 was also a gold medalist at the 1962 Olympic Mathematics Competition, but after him ten years There is no second Olympic gold medal winner to the Fields Medal podium; until Vladimir Deryfield in 1990, he was the Olympiad gold medal winner in 1969! "

"Then the winners of the Olympiad Gold Medal formally took the stage of the Fields Medal. From Deerfield, Gals, Laffer Court to this year's Perelman and Tao Zhexuan, at least one Olympiad Gold Medalist has won almost every session. Fields Award! It took about two decades from the time they won the Olympic gold medal to the Fields Award! "

"If you do n't count the 2002 Fields Special Award winner Professor Wiles, then from 1990 to the present, a total of 18 Fields Award winners have been born. Of these 18 winners, a total of eight have won Olympiad gold medal, this ratio is still very large! "

“Then winning the Olympic gold medal is equal to the hope of receiving the Fields Medal? I can only say that the upper limit required for these two awards is different! For the general winners, they get the full score of the Olympic Mathematics Competition 42 points is already a best effort, and for others, they can get 42 points because there are only 42 points on the roll! The gold medal won by our contestants does not necessarily mean the Fields Award! “

“In addition, let’s take a look at the results of our athletes participating in the Olympic Games! From 1985, our country began to participate in the Olympic Games, and in the fifth year, we won the first total score for the first time, and since 1997, our lowest is also the second total score. This At first glance, the results look proud! “

“However, mathematics has always been a discipline that competes with individual abilities rather than teams. We won’t get our first individual gold medal until 2000. At the twenty-year interval from the gold medal of the Orsay to the Fields Medal, we have to reach 2020 Only after the year will there be a chance at the International Conference of Mathematicians! It is far from time to reap the fruits! “

“By the way, by the way, in a few days it will be the award date of the Mathematics New Discovery Award! It happens that two of the winners in this list are China ’s Orsay Gold Medalists. They are my classmates at Beijing Normal University, I I believe that if they have maintained their current status, then it is very likely that they will receive the Fields Award in the future! “

Lv Qiujian said that Zhang Wei and Yun Zhiwei, who were enrolled in the same year, are the same as Harvard Professor Elki, who are all Orsay winners. In the future, they will have won only Rama who is awarded to young mathematicians under 32 years old. Nu Qiang Math Prize! The future is unlimited!

“In addition, although mathematics requires fewer funds, it also requires strict contact with the international frontier! Our mathematicians lacked this opportunity before. If Mr. Chen Jingrun can enter like I did when the thinking is most vigorous Communicate in mathematical holy places like Princeton and Paris higher normal schools, then I think he will achieve even greater achievements! “

“The obstacles in this area are also gradually being eliminated. The development of the Internet allows an ordinary mathematics student to closely follow the progress of the world’s frontiers. The developed air transport makes it difficult to communicate face-to-face with top international mathematicians! In addition, Professor Younan returned to China from mathematicians who studied abroad at the top universities in the early years. Bringing the most advanced academic ideas, it can

be said that the students of the mathematics department are now in the happiest era in the history of China! “

“So. I think the Fields Prize is the same as the Nobel Prize. At the moment, the time has not yet come. Wait another 20 or 30 years! Scholars in China will definitely stand on these two podiums!” The current mathematics world is a bit chaotic, not conducive to the growth of young people, but just like the Nobel Prize, as long as the base is large. There will always be geniuses! We Chinese people will not lose to any race in terms of IQ!

After answering the questions about the Nobel Prize and the Fields Prize, the audience became relaxed and the questions began to develop in a super diversified way. Some asked about Lu Qiujiang's private life, some asked Starting from China's space exploration plan; Lu Qiujiang avoided personal issues. But he was very particular about the space exploration plan. He came to participate in this show just to build momentum for the plan, how can he spare this opportunity!

Lu Qiujiang painted a brilliant picture in the foreground, presenting the charm of the universe to the audience in front of the scene, which attracted their fascination; even Liang Xiao thought about it secretly, and science seemed more interesting than Chinese language and literature. ! Do I agree to the invitation of the research institution last time?

Finally came to the end of the show, Lu Rui took the microphone, “I am so embarrassed to announce the end of the show, everyone is so enthusiastic, but Dr. Lu is already a little tired, so let's go to the last question now!”

The last question selected a young man wearing a Bayern Munich No. 27 jersey. He could n't wait to ask the microphone, “Dr. Lu! I 'm a fan. My biggest concern is that after you return home Participate in a football match? Will it play on behalf of the national team? “

Chapter 402 - I'm from science and engineering!

()

“I probably don't have time to participate in the national team game!” The national team is going to go abroad to participate in the World Cup qualifiers. Now I am afraid that the country will not dare to let Lu Qiujiang go abroad easily? Not to mention getting into the World Cup and letting him go to distant South Africa to compete! China is not a country with huge military strength in the world!

“After all, I will join the Xihe project from now on, and I will be very busy in recent years; playing football is just my hobby, and science is my lifelong pursuit!” What activity should I find next? ?

Seeing that the fan's mood was a bit low, Lu Qiu Jian could n't bear it and could n't help but reveal a small message, "Although the national team's game can't participate, I will still consider the Olympic team's game as time permits of!"

In one and a half years, it will be the Beijing Olympics in China! The match just happened at the doorstep of the home, and Xi and the planned preliminary work should have come to an end at that time. It may not be a problem to take a month to participate in the game. Besides, security issues are still guaranteed in the capital of your country!

"In 2004, because I was going to the University of Munich to report, I didn't participate in the Olympics. It's a pity so far! I hope this time can make up for the previous regrets!" Lv Qiu Jian finally concluded.

Soon after the program was broadcast, a familiar call came immediately, "Xiao Lu! Don't be too eccentric! You told me that you want to participate in the competition with me at the last Olympics, don't forget!"

"Wang ... Yao brother! How can I forget this! If there is time, I will definitely fight side by side with you!" Lu Qiu Jian said to Yao Ming with a smile, "But you must protect your body! You After playing NBA, I still have to play in the national team. I'm afraid I can't bear my body? Besides, you are a power center, and your body consumption is higher than other positions!"

When I think of Yao Ming's future encounters, Lu Qiu Jian feels sorry, and the tone of his speech is more concerned, "Brother Yao, let's say that! If you can maintain a healthy body during the Olympics, then our cooperation will definitely be achieved. The breakthrough of the Chinese basketball team in the Olympic Games is not without hope even to win a medal!"

"Now I think about it!" Yao Ming's tone was solemn. Obviously he was attracted by Lv Qiu Jian's words. The Rockets had average results in the past two years. He couldn't see the hope of winning the championship, so the expectations for the national team were even greater! Lv Qiu Jian now put forward such conditions can't help but he was unmoved!

"Can you discuss with the national team? The national team still has big ambitions and Xiaoyi. Even if you don't come back, you can't find opponents in Asia!" Lu Qiu Jian paused here, "If you are embarrassed, I'll help you talk to the basketball management center. Compared to them, don't they dare not listen?"

"Don't trouble you, I still have these things!" Yao Ming finally made up his mind! It is necessary to adjust the body and meet the challenges of the Beijing Olympic Games.

Then the Football Association's Huang Ziwei called again. Thanks again and again to Lu Qiu Jian! With him joining the Olympic team, at least qualifying for the group stage is no problem! I have to find a way to get the position of the national Olympic team leader in the event. This is all a achievement! Huang Ziwei, who hung up the phone, started his calculations.

Although Yao Ming said no, Lu Qiu Jian greeted Ke Xianlong, who was in charge of the communication between the Presbyterian Church and him, and Ke Xianlong nodded without saying anything! This matter is a matter of one sentence for him. How dare the basketball management center listen to the people around the elders?

Yao Ming's matter was resolved, and then it was the matter's turn, Ke Xianlong handed over a thick stack of information, "Dr. Lu, these are the list of people who have passed the review. You see when there is time for the last interview with them. ? Anyway to put up the shelves of the plan? "

"As soon as possible! By the way, also invite other departments to send several representatives to review together!" Lu Qiu Jian knew that although the elders devolved all their powers to themselves, they should also pay attention to daily actions, too publicity is always bad.

"Okay, how about Academician Shangyang and Academician Liang Wenchao that you have met before?" Ke Xianlong apparently prepared early, and immediately threw out the right candidates. These two were consulted by the Lu Qiu Jian as early as last year. He communicated and is now the core of Xihe plan.

Sending two acquaintances also seemed that the elders would work hard, and Lu Qiu Jian agreed immediately! Where Ke Xianlong arranged quickly, the next day Lu Qiu Jian was picked up by a private car in a secret base outside the capital, and met with academician Shang Yang and academician Liang Wenchao.

Among the bases. Many young talents who have passed the pre-audit have been waiting here. They are divided into several groups and stay in different rooms to wait for Lu Qiu Jian's audit.

Chao Dong is 27 years old this year and has just obtained a Ph.D. from Shuimu University. He was born in a scientific research family and knew the weight of Xi and the plan very well, so he decisively rejected foreign laboratories, staying in schools, and Fortune 500 companies and other students who seemed to have unusually rare opportunities to sign up for Xi and plan screening.

With his solid academic skills, genius mind and good background, he passed all levels through the written test, interview and political review, and finally faced Lu Qiujian's final review.

The thought of seeing the end of Guan Di soon, Chao Dong was also a little nervous. He looked at the left and right as if no one said that he could not talk and communicate. So he looked at the interview partners in his room, thinking about how to talk.

It looks like they are all about my age! I should have just got my degree? Chu Dong quickly found the topic of conversation, he gently touched the man next to him with his shoulder, "Eh, classmate, which university are you from?"

"Oh I'm from science and engineering! Which university are you from?" The other party replied politely!

"Science and technology!" Zhao Dong lengthened his voice, revealing a sense of restrained pride, and answered with a bit of pride, "I am from Mizuki University! I just got a doctor!"

"Oh, great!" The other person really made his expected expression!

Indeed, Shuimu University is already enough to be proud of in China, and Dong Dong continues to maintain a restrained posture, "Luck is good luck, if you are lucky in the college entrance examination, maybe we are both classmates! Of? Jingcheng Polytechnic or Bencheng Polytechnic?"

"Me? Massachusetts!"

"..." Chao Dong was speechless!

He did n't talk to other people, but it was hilarious, "What a coincidence! I am also a technologist! Caltech!"

"Is it a meeting of the Polytechnic University today? I am from Imperial College!"

"Haha, I'm from the Federal Institute of Technology in Zurich!"

Chapter 403 - Special candidates

Remember [] in one second, the fastest update, no pop-ups, free reading of popular novels!

Remember [??] in one second, to provide you with wonderful novel reading.

Several students of science and technology chatted together in a lively way, and depressed Dong Dong shrank alone in the corner to draw a circle, God! I have known for a long time that Xihe plan has high requirements for talents! But I never expected five people in a room! The self who was born in Mizuki University turned out to be the most obscure one in the school!

Where has he suffered such a blow since childhood, suddenly the confidence that had been quite full fell to the bottom of the valley, and he originally wanted to quickly obtain Lu Qiujian's recognition with his own strength! But in front of these four students from the Polytechnic University, he felt a little unsure!

In the base, Lu Qiujian has made preparations for starting interviews with Academicians Shangyang and Liang Wenchao! Academician Liang Wenchao dragged a chair and sat on the right side of Lu Qiujian with a smile, "Xiao Lu! This interview is mainly about you, we came with ears and eyes, only listen but not speak!"

Lu Qiujian knew that he was showing his attitude and made it clear that he would not interfere with Lu Qiujian's screening, but if Lu Qiujian did something inappropriate, he would still report to it!

The state delegates such great powers to itself, and it is also appropriate to do some institutional precautions! Lv Qiujian understands their cooking, but has no plans to really let them be visitors. Both of them are domestic authorities. They are familiar with the characteristics of various domestic schools. How much effort can be saved by their help. !

"Academician Liang and academician of business, I haven't dealt with this kind of thing very often since I was young. You two have to help you check it out!" Provide some necessary advice. 【×】

After the consultation was over, the interview officially began. Lv Qiujian did not start in the order in which the personnel files were placed, but took a copy from it, but this first part made him a little puzzled!

"Academician Liang and academician of business, do you think this file is wrong?" He handed the file to the two partners.

“What’s wrong?” Academician Liang asked.

“Look at the photos, should this be a white man? Xi and the core part of the plan should not be allowed to be contacted by foreigners?” Although there are some white ethnic minorities in China, the name of that person is not like it. It’s from the white ethnic minorities of the Russians and Tajiks!

“Let’s see!” Academician Liang also looked dignified, but he was relieved when he saw the name of the man. “Who was I at the time, it turned out to be Arthur!”

“Oh, Academician Liang, do you know him?” They looked familiar.

“It’s more than knowing!” Academician Liang said with a sneer. “This kid grew up in our yard from an early age. When I was a kid, I didn’t smoke him less!”

“Huh? You said to me?” It sounds like this Mr. Arthur’s life is unusual! Academician Liang lived in a big courtyard where the key department was!

“Although Arthur is a descendant of the American people. But he is a true Chinese nationality! Politically very reliable!” Academician Liang explained.

Lu Qiujian nodded and listened closely, but his heart was filled with waves. Chinese nationality is the most difficult nationality in the world. Arthur can not only obtain Chinese nationality, but also join such a confidential plan. It can be seen that the beginning is not ordinary!

Academician Liang did not let him wait a long time, and soon revealed Arthur’s origin, “Arthur’s father West Germany is a farming and animal husbandry expert in the United States. Worked with animal husbandry technology, instructed farmers to raise cows in the pasture; his mother Joan was a graduate student at the Institute of Nuclear Physics at the University of Chicago, later worked as a Fermi assistant in the Los Alamos weapons laboratory, and was also one of the few female scientists in the Manhattan project One; she also came to the Revolutionary Holy Land before liberation, met and married West Germany on the ranch, and later had Arthur! “

“Because of the influence of Mr. Edgar Snow’s” The Journey to the West “and the yearning for the revolution. They came to China and invested in the construction of the country. West Germany raised a lifetime for the country. Dairy cows have trained countless experts in agriculture and animal husbandry! Qiao An has also made outstanding contributions to the nuclear physics of China! They are also the first foreigners to join the Chinese nationality! “

Bethune, Ke Dihua and other proletarian international fighters came to China and made outstanding contributions to the cause of the liberation of China. I did not expect that the first interview would meet the descendants of international fighters. It was really eye-opening!

“They later changed the name of Hua Guo and lived in Hua Guo. After Arthur was born, in addition to the English name, there was a Hua Guo name called Li Yan! He also joined Hua Guo nationality and has been accepted in Hua Guo. Education, work, joining the party ... I have never returned to the United States so far. “Academician Liang pointed to the name column on the file.

“Li Yan, a kid who has studied physics with his mother since he was a child, is very professional and has worked in related departments before. Both his professional ability and political literacy are very reliable! He also passed the Xihe plan interview. High-level approval! “Academician Liang’s words dispelled Lu Qiujiang’s last doubt.

“So okay. Today’s interview starts with this Arthur ... Oh no, Comrade Li Yan took the lead!” Lv Qiujiang told him to go down, and he was a tall man about 40 years old. A man in a simple Chinese tunic came in.

“Dr. Lu, Academician Liang, and Academician of Commerce, hello, I am Li Yan who came to the interview!” It is slippery than the Canadian friend Dashan who often appeared on the court platform. If you don’t look at his appearance, almost everyone will think that this is a native Chinese.

“Li Gong, please sit down!” Lu Qiujiang saw that his file had the title of senior engineer so he directly called him Li Gong.

“Thank you.” After Li Yan sat down, the interview was just beginning. Lu Qiujiang asked five professional questions from shallow to deep for his previous work, and the other party answered them fluently.

Later, turning to other questions, Lv Qiujiang used psychology knowledge to test the other party’s heart when asking questions. The result of the test was that this is a revolutionary with a romantic spirit and still regards the liberation of all mankind as himself Lifelong pursuit! This uncommon pursuit among Chinese people appeared to a person of American descent, which surprised him a bit.

“How is it?” Academician Liang couldn’t help asking after Li Yan left after finishing the interview.

“The professional level is outstanding and the politics is reliable. He is very welcome to join our plan, depending on whether his original unit will let go!” Lv Qiujian showed his appreciation for him unabashedly.

Chapter 404 - Cruel scientific research (14/21)

()

“The Xihe plan is currently ranked as the highest priority, and all relevant units in the country must be unconditionally supported. As long as a transfer order continues, his current unit will definitely be released!” Academician Liang said with a smile.

Well, sometimes the national system is really efficient! Lu Qiujian started the next interview with emotion. He interviewed all the core members of the team, so the number was not a lot. It was Zhao Dong and the elite of the science and technology. It was half an hour for each person. , They also have their own arrangements.

“Yo, these are the assistants prepared for me!” Lu Qiujian said, looking at the newly opened file. There are too many fields involved in the controllable nuclear fusion project, and one can never do everything. Jian requires that he be equipped with an assistant who is proficient in research in each field.

Every scientist has different requirements for assistants. Einstein and Yang Zhenning like math assistants better. Heisenberg needs assistants with outstanding experimental ability, and Schrodinger ... he prefers his wife A pretty-looking assistant. The more beautiful the assistant's wife is, the greater the hope for his appreciation. It is like the style of Shaolin Temple.

The principle that Shaolin Temple was responsible for renting the fields under the name of the monastery was to have a good wife to plant a good land, a wife to plant a bad land, and a natural wood with a wife to plant a land! Schrodinger also implemented this principle in his own laboratory.

Of course, Lu Qiujian will not be as unruly as Schrodinger, and he does not need an assistant with outstanding mathematics like Einstein and Yang Zhenning. His own mathematical ability is enough; perhaps the assistant with excellent execution ability selected by Heisenberg is more In line with his requirements, the assistant he wants is an assistant who has the ability to carry out the solutions he provides without compromise and efficiently.

To achieve this goal is not simple, the other party must have a deep understanding of the field he is responsible for, be familiar with the domestic and international development status in this field, be able to quickly understand Lu Qiujian's intentions and quickly find an implementation plan ... If

such talents are put into enterprises at least, they are all gold collars with an annual salary of one million.

It can be said that among all recruiters, the choice of these assistants is the most important, which is directly related to the progress of the project, so Lu Qiujiang has to be treated with caution.

“Yeah, isn’t this Wang Ren!” The people who came were all elites in the field in China, and it’s no surprise that Academician Liang and Academician of Business knew him.

“The two academicians know him?” Lu Qiujiang asked. He also wanted to know more about Wang Ren before he came in for an interview.

“Well, he is currently in charge of plasma research in the EAST project in Anhui Province! I have had a lot of dealings with us before. Xiao Wang has worked very hard and is a hard-working person. He is a rare talent!” Words of beauty.

Dedication and down-to-earth are certainly advantages, but this is by no means the most critical factor. If professional skills are not achieved, these are empty. As long as his professional ability is outstanding, even if he is a spy in the United States, Lu Qiujiang is confident to control him well, keeping in mind the evaluations of the two academicians. Lu Qiujiang arranged for the staff to invite Wang Ren.

“Hello, Researcher Wang. Please sit down!” Lu Qiujiang told the ordinary-looking researcher, and then formally started the interview. “What do you think are the main problems in the research of controllable fusion plasma? Which one is it? What is the most urgent need for breakthrough? Why? What are the directions of breakthrough? “

At the beginning, Lu Qiujiang threw a big question, a little caught the other side by surprise, Wang Ren began to answer for a while, “I think the main problems of plasma have the following aspects ...”

Lu Qiujiang listened quietly to his answer, writing from time to time in the book. After 20 minutes, Wang Ren’s question was answered; Lu Qiujiang asked for a moment, “Researcher Wang, I see that you are applying for an assistant this time. Position. What I want to ask is whether you consider other positions? “

Wang Ren’s vision dimmed, and he understood that the meaning of Lu Qiujiang’s question was to imply that he did not meet the requirements of this position, which was a complete blow to him. He

firmly squeezed his right hand, desperately controlling his emotions, and after a while he replied in a slightly trembling voice, “I ... I need to go back and think about it!”

“Okay, if you have an idea, you can call me directly!” Lv Qiujian handed over a business card, he knew that Wang Ren was unlikely to join the plan, if he was really interested, how could he even The new position is specifically responsible for asking nothing?

Wang Ren walked out in a lurch. Academician Liang was a little unbearable, he asked, “Xiao Lv, although I think his professional ability is slightly lacking. But other aspects are very good, really not considered?”

Lu Qiujian knew that their generation did not have much choice in hiring people, and they were reluctant as long as they had some strengths, but now the situation is different. Thirty years of education have accumulated a large number of talents, providing Lu Qiujian with enough Room for choice. Let him conditionally give up such a talent as Wang Ren, who seems to be very good for Academician Liang.

After thinking for a while, he decided to give an example to explain the situation, “I like to play basketball when I was an exchange student in the United States, and then I heard such a story!”

“Another substitute player for the Spurs in the NBA is Jeff Els. He rarely has the chance to play. Knowing that there is a game, the Spurs have already established the lead early, so he sent him on the field! “

“At that time, all the Spurs players had scored, but he didn’t! The teammates realized this so everyone passed the ball to him, but unfortunately he didn’t score at the end of the game! Then he cried in silence! “

“Is this player not good enough? I do n’t think so! His entry into the NBA has proved that he has entered the ranks of the world’s best 500 basketball players Unfortunately, the opponent he has to face Also within these 500 players, some are even the top 100 and top 10 players! “

“He realized that he would not be able to reach the talents of others in his exhausted life. His incomparable achievements could not be realized anyway, but he saw others easily cut it. The huge sense of loss made him cry in tears!”

“The brutality of competition in the scientific community is better than that of the NBA! You have failed this year in the NBA and you can come back next year, and the competition in the scientific community rarely has a second chance!”

“Researcher Wang is indeed a survey scientist. He may be ranked in the top ten in the country, but what I want is only the best!” Lu Qiujian said slowly.

In fact, Els has not yet entered the NBA, but this is just a small problem!

Chapter 405 - Ye Chu in love

Remember [WW; M] in one second, the fastest update, no pop-up window, free reading of popular novels!

Remember [??] in one second, to provide you with wonderful novel reading.

“Xiaoye, remember not to run around tomorrow. You will have to go to the airport with the professors in the department to pick you up! I heard the teacher say that Deligne and Sel may come here this year!” Xiang Zhen said to Ye Chu in a respectful tone. 【×】

“Oh! There are more than one year of Daniel coming to the ceremony!” Ye Chu stood at the door of the dormitory, illuminating against the mirror on the wall, and occasionally adjusted his hair style with a comb.

Suddenly he seemed to have thought of something, put down the comb and hurriedly turned back to ask, “Is the teacher going too? Didn’t the school say what time to gather?”

“The teacher is busy recently, the airport is probably not going back, but the dinner party will definitely attend!” Xiang Zhen replied while looking at the paper on the computer. He didn’t talk about Ye Chu’s focus, “Hey, this year we There are two winners in the school, and now I am embarrassed to say that I am a student of a teacher! If you let others know, you should ask. Is it too shameful for you to follow a good teacher like Dr. Lu and have not yet made any achievements? “

“What anxiety, when we reach their age, who can’t achieve the same level of results?” Wang Wen said with a calm expression.

“At that time, achievements of the same level will not necessarily win prizes! More and more mathematicians have changed their research direction in the past two years. When we come up with results, the competition may be more intense!” Xiang Zhen said his words With that said, there is a

smile on the corner of my mouth, and apparently I have not flinched because of the increased competition.

“Don’t, I said which of you two will give you an accurate word! What time is it to gather to the airport!” Ye Chu finally couldn’t help it.

“Are you going to date Meimei again?” Seeing the other party is really anxious, and Xiang Zhen will no longer tease him, “Professor Deligne’s plane arrives at Jingcheng Airport at seven in the evening, and we meet at five. You have more than half a day to date! “

call! Ye Chu was relieved. Mei Mei was not easy to take a break between training sessions. The two said that they were ready to play. It would be a pity if they were delayed!

If Lv Qiujian saw him like this, he should be humiliated and embarrassed. Not only can he be his mentor in mathematics, he is also better at picking up girls! If you let others know that your students are so nervous in front of the girls, they will not be laughed at?

Ye Chu quickly packed himself and ran out of the dormitory. 【×】 Going out and hitting a car, he drove directly to the training base where his family Mei Mei was.

A call came to the place, and after a while, a young girl full of youth appeared at the entrance of the training base. She was about one and seven meters tall. She was tall, with long hair draped over her shoulders casually, and she didn’t see many traces of makeup on her delicate face; however, she didn’t need makeup, and the youthful breath she emitted was enough to make Ye Chu fall.

“Mei Mei!” She also ran out to her in two steps, trying to hold hands but feeling a little uneasy.

“Huh. You seem to have come earlier today?” Xie Limei took his arms generously, “Where are we going to play today?”

“Tonight I will go to the airport with the school leaders to pick up people, and then I will go to the welcome dinner with the teacher, so I will come earlier, otherwise I will not have enough time to accompany you to the movie!” Ye Chu’s arm is like The electric shock generally trembled for a while, and the heartbeat accelerated.

“Your teacher? Is it Dr. Lu playing at Bayern?” Xie Limei had long heard of his bullish teacher, and was curious about the athletes. She tentatively asked, “You can Take me with you? “

“Ah!” Ye Chu was a little uncertain, but agreed to grind his teeth for his girlfriend. “The teacher will probably also take the mother together! You will follow me to see the situation!”

“Okay! Then let’s buy some snacks together, and then go to the movies!” Xie Limei jumped up and cheered happily, Ye Chu watching with long legs trance.

A taxi drove downstairs to the theater, and the two advanced into the supermarket to buy snacks. Ye Chu kept throwing Xie Limei’s snacks in the shopping cart and put them back on the shelf. “... Memei, this fat is exceeding the standard ... Memei, this The food additives are not healthy enough, it will affect your explosive power ... Meimei. It is best for athletes to drink less carbohydrate drinks ... “

“This one can’t drink, that one can’t eat it! It’s even more verbose than our coach!” He said. But she still didn’t take the snacks off the shelf again. She knew that Ye Chu spent a lot of time to remember her diet taboo and realized what he had paid for herself. Xie Limei felt warm.

“... Okay. That’s it!” Throwing the last packet of snacks into the shopping cart, Xie Limei patted her hands, “Let’s go checkout!”

“Wait!” Ye Chu glanced at the contents of the shopping cart, and took a box of gum from the shelf and threw it in. “You are selling a total of 67 pieces of fifty cents. There ’s no place to use it. It ’s just seventy dollars, so save trouble! ”

With a glance at Kung Fu, Ye Chu has clearly calculated the value of the items they bought, which is indeed a bit powerful. Xie Limei said in a cult, “Wow, you are amazing! I don’t know these every time!”

Hey, Ye Chu doesn’t speak, but he is a student of the Mathematics Department of Beijing Normal University. What is this matter? Our teacher can calculate the magic of the free kick trajectory at a glance!

After buying the movie tickets It was still early before the opening time, the two were drinking coffee while chatting in the cafe outside the cinema, “Yes, I recently adjusted the training plan according to the method you gave, the effect Yes, the results have improved a bit! It has been improved by 40 centimeters compared to last year! If you continue this way, you will soon reach the 15-meter mark! “

The women's world record for triple jump is 15m5. Xie Limei's best result in the competition was 14m5.4, but after training according to the method provided by Ye Chu, the result has improved to 14m.9. This The results are enough to break the Asian record, and the world can enter the top ten of the year; this makes her look forward to the good results and even the medals she won in the Olympics one year later.

“Go back and send your data for this week to my mailbox, and I will analyze and analyze it for you! See if you can find a growth point!” Ye Chu said, and he was wondering if the teacher would help him to see for himself What? She may be able to reach the final by her own plan, but if she has the help of her teacher, she may even hope to stand on the highest podium!

Ye Chu is so confident in his teacher!

Chapter 406 - Tumei Tutorial

Remember [] in one second, the fastest update, no pop-ups, free reading of popular novels!

Remember [??] in one second, to provide you with wonderful novel reading.

The time between men and women in love is too short. Unfortunately, at the end of the film, Ye Chu should also go to the airport to meet Professor Deligne; he took Xie Limei to the Beijing Normal University and found a quiet cafe to take her. Set up, “You wait here for me for a while, and you will order something for yourself when you are hungry. I will be able to pick you up in about two hours. I will call you if I can! If you can, please remember where you are?”

“Remember!” Ye Chu already took her to the hotel that was going to hold a dinner party when they first arrived at Beijing Normal University. It takes up to five minutes to walk from this cafe. Xie Limei is not a road fan, of course not forget.

“Then I’m going first, you wait for my good news!” Ye Chuyi reluctantly waved away, and rushed to the Beijing International Airport with his brothers and sisters.

“Professor Deligne, my teacher is going to greet you personally, but unfortunately there are other things that can’t go away, I’m really sorry!” Ye Chu greeted Professor Deligne in skilled French.

“Oh, are you a student of Lu?” Deligne smiled heartily after figuring out Ye Chu’s identity. He naturally understood how busy a scholar who had just won the Nobel Prize would be, “It doesn’t matter, everyone knows that he has recently It will be very busy! By the way, I have read your article in the “Annual Mathematics” and it is quite creative! “

“Thank you for your compliment, but I think that the article still has a lot of shortcomings, such as ...” Ye Chu heard this and immediately entered the learning mode, forgot to ask Deligne now at the airport stand up.

“On this issue, my thoughts are ...” Deligne was not surprised at all. He had exchanged esoteric academic problems in the crowded airport at an early age and watched to welcome them. The staff of Beijing Normal University rolled his eyes.

The two of them chatted all the way until they got out of the car. De Ligne simply gave Ye Chu his own mailbox to let him have new ideas. Remember to communicate more. Ye Chu kept this email address in his mind. He did n’t worry about Lu Qiuqian ’s misunderstandings. The teacher himself encouraged the three of them to communicate with other scholars a lot. Only when they experienced collisions could their ideas spark sparks of inspiration. .

Deligne returned to the room for a short rest, and the dinner officially began. Lv Qiuqian also hurried here from a secret base. He just ended a new wave of interviews.

Looking around behind him, he never found Xia Xiao’s figure. Ye Chu couldn’t help but hesitate. But at the thought of Xie Limei’s look, he summoned the courage to walk in front of Lu Qiuqian, “Er, teacher, I want to bring a friend to this dinner. Can you see it?”

“Is it your girlfriend?” Lu Qiuqian saw his thoughts at a glance. “It’s okay, hurry and call her in! Haven’t you seen anyone else also have a lot of female partners? But if the girlfriend is too Even if it ’s pretty, the province can let others see it and feel no face! “He said a joke at the end.

“Thank you teacher!” Ye Chuxing rushed outside and called. Xie Limei, who sweated a little on her forehead, walked in. It seemed that she should have trot all the way.

Introducing each other, Lv Qiuqian signed her to greet the other guests present, leaving the little couple in the corner of the banquet hall.

After Lu Qiuqian returned from the entertainment, he found something was wrong, Ye Chu and Xie Limei seemed to have a certain relationship. But Ye Chu didn’t seem to know how to express it. It seemed that it was really painful to look like it was shrinking!

Hey, let the teacher help you! Teach you how to turn your sister, Lu Qiujian shook his head helplessly, reached out and recruited Ye Chu to whisper in his ear.

“Er, teacher, can this be done?” Ye Chu’s eyes showed a trace of suspicion. This seems to be too simple? Will it really work as the teacher said?

“Do you think you like her?” Lu Qiujian asked rhetorically.

“Of course!” Ye Chu replied neatly, with a very firm tone of voice.

“Do you think she likes you?” Lu Qiujian asked again.

“Ah, this ...” Ye Chu hesitated for a moment. In the end, nodded, “I think she should like me very much. During the year, she called me as soon as possible! Every time I came home, I brought a lot of specialties from her hometown!”

“Since you all have good feelings for each other now, the question now is how to uncover the last layer of window paper!” If the time is not up to Lu Qiujian will not provide him with this method. Lv Qiujian made an inscrutable look, “From the teacher’s many years of experience, girls all like romance! A romantic confession will undoubtedly destroy her last line of defense, as long as you follow what I say Do it, and make sure to get her done! “

“Teacher, are you saying that romantic confession is the most critical part of love?” Ye Chu consciously grasped the key point that Lu Qiujian said.

How can I teach you such a stupid student! Lu Qiujian was angry with him. Did you just say it in vain? “The premise I just said is that the relationship between you has reached a deep point, and you only have one confession! You must remember that confession is always a salute in a victory ceremony, not an attack. If you reverse the order, there will be a big problem! “

Lv Qiujian had seen this painful lesson countless times when he was in Beijing Normal University. A male student just had a good impression on a female student. Even without knowing the name and preferences of the other party, he ran to confess. What to send flowers, go downstairs to sing and sing various patterns frequently.

But what about the harvest Unless the confession person looks particularly handsome, most of the situations end in failure. In contrast, those who approach first, then contact slowly, and feel that the

time is almost the same, then succeed in the confession. The rate is much higher! It's not wrong for women to like romance, but it doesn't mean they like to be frightened. Anyone who walks on the street and suddenly meets a stranger or someone who has just met is confessing!

Of course, these are for ordinary people. If you look as handsome as Wu Yanzu or as rich as Wang Rigou, then everything will not be a problem.

Ye Chu listened to the tutorial given to him by Lu Qiujian, and thought about it for a long time before he nodded thoughtfully. "Teacher I remember, I will do as you say tomorrow!"

"Why tomorrow? Just now!" Lu Qiujian observed that Xie Limei is in a good mood now. It is a good opportunity to win. If you can't say it well until tomorrow, "The reception dinner is nothing to do with you! You must hurry up now Take her out from here to the teaching building, and follow the method I told you to confess! "

Chapter 407 - Confession formula (15/21)

"Teacher, will you do it tomorrow? I would like to talk to Professor Deligne a little more!" Ye Chuzhi said, telling the truth that he is a little nervous now.

Lu Qiujian saw that if he didn't dare to wait until tomorrow, he pushed his shoulders and pushed him out of the door. "Professor Deligne was still tired from the plane just now. I think he'll be back in the room soon! Ask him to ask questions about it tomorrow. Let's get this thing done today and say it early! "

Hey, am I swollen? I accepted a student like this! Lv Qiujian is now indignant, "When did you do what I said, I will give you the next guidance, if you can't figure it out, you can change the tutor!"

"Don't! Teacher, I can't do it yet!" Ye Chu was so forced by Lv Qiujian that he finally inspired the courage, adjusted his clothes, and took a deep breath to Xie Limei.

"Mei Mei, do you still want to play here?" Ye Chu wanted to give herself a slap as soon as she finished speaking. She came to lead her out! How can this be said!

"Ah? What's the matter? Do you have anything?" Xie Limei trained from an early age, and her EQ is a little higher than Ye Chu anyway, and quickly found out that he was not right.

“Yeah yeah!” Ye Chu nodded quickly, according to the plan that Lu Qiujian told him just now, “The teacher asked me to do my homework, and I still haven’t found a way to solve the problem of the equation! Now I have to make up my homework!”

“Okay!” Xie Limei looked at her watch. It was still some time before the dormitory closed. Although it was a pity, since Ye Chu was leaving, there was no need to stay here. “You go busy, I will go back to training Base! “

“Don’t use it, the topic is not difficult. I went to an empty classroom and I could do it on the blackboard. If you would accompany me to finish the topic, then I would send you back!” Ye Chu stuttered, both foreheads. Sweating soon!

“Will it affect you?” Xie Limei was very willing in her heart, but she still had various reasons in her mouth.

“Not at all. It’s faster for you to do it with me!” Ye Chu exclaimed when he was excited.

“That’s fine.” Xie Limei’s face was red, “You used to watch me train before, and today I also see how you do the questions!”

“Hey. I can do more boring than you are doing the exercises!” Ye Chu remembered Xie Limei’s agile posture and unwillingness to lose when she was training.

Xie Limei took Ye Chu’s arm and the two came out of the hotel and walked to the study room of Peking University; Peking University is worthy of being one of the best schools in the country. Ye Chu has repeatedly found a few floors of study rooms, all of which are slow Slow; until the top floor, I found a small classroom in a corner.

He quickly went in and turned on the light. Help Xie Limei put things away, “Meimei, you can sit here first, I’ll be fine for a while; if you are bored, you can play mobile games!”

“I want to see you do the question!” Xie Limei held her cheek with her left hand and looked at Ye Chu playfully; Ye Chu scratched his head and turned to the podium. He found two pieces of chalk under the blackboard and recalled what Lu Qiujian said. The title of the equation is written on the blackboard, and then quickly enter the state of doing the problem.

Looking at Ye Chu's focused appearance on the stage, Xie Limei gradually lowered her arm and sat upright involuntarily. Although she did not understand the mathematical symbols, Ye Chuxing's writing made the numbers and symbols jump like musical notes, disrupting Xie Limei's heartstrings.

No wonder TV always says that a focused man is the most attractive. Is his appearance completely different from normal days? There is a wise light in his eyes, and his movements are confident and free and easy. Xie Limei thinks how lucky she is to meet him! But he is so clever, will he think I am too stupid? Xie Limei began to suffer.

Unconsciously, Ye Chu had already filled a small half of the blackboard, and this question had come to an end. He wrote down the final answer of this question in the center of the blackboard- $128\sqrt{e980}$ .

Ye Chu clapped his hands to get the chalk dust on his hands. Turning back to Xie Limei excitedly, "Mei Mei. I made this question!"

"It's amazing!" Although I can't understand it, I know that Ye Chu's brother is the best! With such a mentality, Xie Limei was also excited. She walked to the podium with two long legs and looked at the numbers and symbols on the blackboard curiously.

Seeing that the time had come, Ye Chu's heartbeat began to accelerate. He took a deep breath and said according to the strategy taught by Lu Qiujian, "I will wipe the blackboard clean immediately. Then I will send you back!"

"I will help you!" Xie Limei was about to get the blackboard eraser.

This is not enough! If you wipe it, the plan will be ruined! Ye Chu hurriedly stopped, "I'll be fine, my hands will be dirty, you don't have to get gray, you can just look where you are!"

After some contention, Ye Chu took the upper hand. He started to wipe from top to bottom, and soon the only answer left on the blackboard was  $128\sqrt{e980}$ .

"Mei Mei!" Ye Chu controlled his emotions and looked back at Xie Limei. Seeing that her gaze fell on that answer, it seemed to be guessing why Ye Chu wanted to leave it.

Ye Chuyi gritted his teeth brave enough to wipe the upper half of the answer with a blackboard brush, so this combination of numbers and symbols suddenly became a string of English letters-i- (enter There is no way to have an intuitive understanding of the law, you can use a pen to write on paper, and then use the method of origami!).

Ok? Xie Limei was caught flat-footed by this sudden change. Before she woke up, Ye Chu had walked to her side; Ye Chu held her shoulders with both hands and looked at each other, “Memei, do you know? If both of us can live to be seventy-five years old, then our life will be only 30,000 days! “

“Both of us have consumed more than 7,500 days, which is exactly a quarter of my life! In the first quarter of my life, I always felt that it was not bad to spend these 30,000 days alone, until I met you! “Ye Chu’s voice began to tremble, and Xie Limei realized what he was going to say, her cheeks could not help being hot for a while, and her heartbeat accelerated. She was expecting and shy now.

“Mei Mei, as written on the blackboard, I think I have fallen in love with you now! I can’t imagine how to spend the remaining 22,500 days without you, then, you are willing to accompany I spent the remaining 20,000 of my life together ... “

“Well, I am willing!” Before he had finished speaking, Xie Limei, who was in tears with his sensational words, was already in his arms.

Teacher is really omnipotent! Ye Chu hugged her beloved girl and expressed such emotion in her heart!

Chapter 408 - academician

Ye Chu’s confession was successful, and Lu Qiujian’s dinner was nearing completion. When he was going home, Professor Zhang and Director Guo of the Department of Physics of Beijing Normal University came up at the same time.

“Yo, Lao Guo, are you looking for Xiaolu to have something to do?” Professor Zhang said, the meaning is to say something tomorrow. I will talk to Xiaolu today.

“Yeah, Xiaolu and I have something to talk about. Professor Zhang will go back if you are busy!” Director Guo pretended not to understand what he meant and choked Professor Zhang in one sentence.

“I also have something to do! I think my thing is also very important!” Professor Zhang reluctantly retorted. He had already guessed the purpose of Director Guo, and naturally refused to back down.

“Two, let’s sit together! The tea room downstairs shouldn’t be off work yet!” Lu Qiuqian was about to quarrel, and he quickly persuaded.

Professor and Director Guo knew that this matter could not avoid each other, so they suspended the dispute and went downstairs with Lu Qiuqian to the tea room.

“Bring me black tea to warm my stomach. It is best to drink this in winter! Xiao Lu also drink black tea with me!” Professor Zhang took the lead to sit down and greet the waiter.

“I drink green tea, green tea is refreshing, and it is very good for us who do scientific research! Xiao Lu, you still drink this good!” Yeah, just sitting down, the two of them got up again.

“You can give me a cup of flower tea!” Lu Qiuqian also expressed his attitude by saying something. If something is said, I will not immediately fall to any side.

After a while, the tea was delivered. The three of them held their pots of tea and tasted it. Finally, Professor Zhang could n’t help but speak first, “Xiao Lu, it ’s 2007 now, you know there will be next year. What’s the big deal? “

“What’s the big deal?” Lu Qiuqian had already guessed a bit. But he pretended to know nothing.

“The biennial academician co-election is about to start again! Xiao Lu, our Physics Department of Beijing Normal University intends to report you as a candidate!” Professor Zhang took the lead by Director Guo, “You all get Xiao Lu Nobel Prize in Physics. Coupled with the influence of our Peking University, we will definitely be selected! “

“Oh. Fortunately, our mathematics department also intends to report Xiaolu! Xiaolu, there are many academicians in the mathematics department of Beijing Normal University. As long as you agree to sign up, I will help you with other things!” Professor Zhang I started to think big, and as I said before, Beijing Normal University is the most influential faction in the mathematics community, and they will build Lu Qiu up. Coupled with the Fields Medal’s achievements, he is basically impossible to lose.

“Ah, two people, I don’t seem to meet the qualifications for academicians to declare?”

The highest academic title established by China requires candidates with a decent academic style and love for the motherland; foreign nationals with Chinese nationality can serve as foreign academicians; systematic and creative achievements made in the field of science and technology generally require at least National science and technology second prize natural science second prize or above winning record; senior expert in a certain field; holds senior titles such as professor senior engineer researcher.

Lv Qiujian thought about it, and all the conditions in front of him met. Only the last title of the senior title, he has just learned to return home, neither professors senior engineers nor researchers. This one is really incompatible!

“You don’t have to worry about this one at all, I’m ready for you!” The two of them said in unison, and at a glance, Professor Zhang grabbed the right to speak. “On behalf of the Department of Mathematics of Beijing Normal University, I invite you to be Visiting Professor! You do n’t need you to be a teaching task on weekdays, you only need to come to our school to give lectures from time to time! In this way, the title is not a problem at all! “

Director Guo has no words and thinks the same way; Lv Qiujian is actually very interested in the title of academician, because academician symbolizes status influence, even a scientist of similar level, one academician. A resource that is not an academician, the two can call is not at the same level.

Later generations had a highly respected scientist with outstanding achievements when others were asked why she did not fight for academicians. She said, “Fight for what to do. I’m too tired. I’ll do my own research!” As soon as the statement came out, it attracted a lot of praise, and everyone deeply applauded her high spirits.

However, you can’t get a lot of resources without competing for academicians. How can you carry out research smoothly without resources? The title of academician is not only a name, but also an interest! It is for this reason that various scandals have been constantly exposed in the selection of academicians. After each session of the selection of academicians, the media will blame the candidates.

However, in most cases, those who can be elected as academicians are quite outstanding scientists; if the score line of the finalists is drawn on the 90th, then maybe 98 people have not been selected, but there are very few Seventy people can be mixed in. For example, the chief engineer of a monopoly department in the later generations was directly blocked from the Academy of Sciences.

Lv Qiujian should preside over Xi and the plan should also have a corresponding identity. The administrative level is resolved by the elders, but the academic status can not be ignored, the academician is a suitable identity; Politely, “Thank you Professor Zhang and Director Guo!”

“I will complete the procedures for the visiting professor later, and nominate you to participate in the co-election of academicians of the two academies in the name of the Department of Mathematics of Beijing Normal University!” Professor Zhang said happily.

“Why should I use the name of the Department of Mathematics?” Director Guo did not agree. “Although Xiao Lü studied in the Department of Mathematics before, people are mainly doing research in the field of physics. Nomination should be nominated by our Department of Physics. ! “

“Xiao Lu has read a book in your physics department?” Professor Zhang retorted, “No? The doctor of physics was taken at the University of Munich, but the doctor of mathematics was issued by our Beijing Normal University!”

“Two, two, don’t argue!” Lu Qiujian persuaded, “Isn’t mathematics and physics in the same academy in the Academy of Sciences? Is there any difference in who is nominated?”

The Chinese Academy of Sciences is divided into six departments, namely the Department of Mathematics and Physics, the Department of Chemistry, the Department of Life Sciences and the Department of Medicine, the Department of Geosciences, the Department of Information Technology and Science and Technology, the academicians in the fields of mathematics and physics belong to the Department of Mathematics and Physics.

“Of course there is a difference!” The two looked back at the same time, “Although they belong to the Department of Mathematics and Physics, the field of selection is still very different!” This is the biggest reason for their dispute.

#### Chapter 409 - Suggestion

Take the selected academicians of the Mathematics and Physics Department in a certain future generation. In that year, the Mathematics and Physics Department selected a total of six academicians, one in the field of basic mathematics, one in the field of mathematics, and two in the field of condensed matter physics. The field of theoretical physics, the field of plasma physics.

All of them will play a huge role in their respective fields. If Lv Qiujian is shortlisted as a mathematics field, then if he encounters something in this field in the future, he will naturally fight for the interests of Beijing Normal University, and the same applies to the field of physics, so Professor Zhang and Director Guo will take this seriously.

“Should it be possible to nominate two fields at the same time?” Lu Qiujian also wants to play a role in these two fields at the same time, but it may not be consistent with the purpose of Beijing Normal University.

“This is fine!” Professor Zhang and Director Guo thought about it, but there have been cases where a professor from the Department of Biology of Beijing Normal University has achieved outstanding achievements in plant physiology and algae. He also has the qualification to select an academician if he declares It will definitely be reported together in two areas.

If plant physiology and algae can barely be related, then Professor Tang from the Pearl University of Technology at the same time leading the field in polymer chemistry and physics is closer to Lu Qiujian’s current situation.

The Academy of Sciences is easy to manage, and the Academy of Engineering is even more troublesome. Lu Qiujian now hangs the name of the Xihe Project, proclaiming the space exploration program to the outside world, which should be attributed to the Department of Mechanical and Engineering Transportation, but he actually The controlled nuclear fusion to be done should belong to the Department of Energy and Mining Engineering.

After some detailed discussions, the two of them helped Lu Qiujian sort out the declaration. As for the later operation, he did not have to worry too much about Lu Qiujian. As a result, he was already a recipient of the Fields Medal and Nobel Prize. There are few outright in the country in the field; Secondly, Beijing Normal University has great influence in the scientific community of China, and it is backed by a big tree to take advantage of the cold, which has saved him the trouble of many small-scale scientists.

The official list will be announced by this time next year. Lu Qiujian put the matter aside in doing the preliminary work. As for the need for him to appear later, Beijing Normal University will definitely notify him.

“Yao. Looked good today! Was it successful yesterday?” Lu Qiujian quipped when he saw Ye Chu the next day.

“Thank you teacher, the method you told me is just too useful!” Ye Chu now admires Lu Qiujian’s five-body investment ground, academically world-class and winning the championship on the football field. Even the pick-up girls are so good, their teacher is a wicked existence!

Ye Chu's brain is still the expression of tears moved by Xie Limei yesterday. If he is timid and the training base will check at night, it will not be a problem to push her down yesterday.

"You have solved this problem! Hurry and go inside to help out! Your seniors won this year, and the three of you have to work hard. Don't get nothing at that time!" Lu Qiuqian pointed to the one behind him. The venue of the award ceremony said.

"It must be!" The three of them ran in smoke, and Lu Qiuqian heard that Wang Wen and Xiang Zhen seemed to be pulling Ye Chu to let him take the things from last night, but Ye Chu clenched his teeth to do it. A gesture without killing.

Three years have passed since the blink of an eye! This is the third award ceremony of this award! Lu Qiuqian looked at the banner above the auditorium with emotion, it has been more than four years since crossing, and his answer has just entered the substantive operation stage. I don't know how long it will take to go home!

Ok? Come back home? Thinking of Xia Xiao, Natalie, Professor Zhang, Professor Nan and other relatives and friends who met here, Lu Qiuqian's heart was full of perseverance, is this because his contact with this plane is getting deeper and deeper 'S sake?

Shakes his head and throws his mind aside, Lu Qiuqian turns and walks into the meeting place! This time because of his influence has been several grades higher than before, plus the reason that there are two young Chinese mathematicians who won the prize. There were more reporters present than in the previous two sessions. When Lu Qiuqian came in, he rushed up and asked questions.

"Thank you, thank you all! But the ceremony is about to start, please keep order, we will have a special press conference after the ceremony!" Lu Qiuqian quickly accelerated his pace.

This ceremony was much grander than the previous two. The seniors of mathematics such as Deligne, Simmons, and Searle looked at each young man after receiving the medals and award certificates. Revolutionary changes are taking place, which makes them full of expectations for the future of mathematics.

The awards ceremony ended in a joyous atmosphere. No one can win the final award this year, but these ten problems have continuously made breakthroughs in the past three years. Many valuable achievements were born. Lu Qiuqian believes that after several years of accumulation, these ten problems will eventually be solved one by one.

The award ceremony was over, and the manpower selection of Xi and the plan came to an end. Lu Qiujiang had a short leisure time, and it happened to be Christmas again. He took Xia Xiao out of the capital and went to the warm south. Had a great holiday.

Amount, but after all, after two brilliant seasons in Bayern. I'm afraid not many people will mention Barak's tragedy in the future, right?

Return to the capital and take a short break. Lv Qiujiang came to Xihe's temporary headquarters in the capital. The plan has just begun. First, we must deepen our understanding of these staff members before we can complete the work more efficiently.

The first day of arrival at the headquarters was naturally a meeting. At the meeting, everyone took the lead in introducing themselves, and then carried out research with the information issued by Lu Qiujiang.

At noon break, everyone else went to the restaurant to eat, but Lu Qiujiang saw that Li Yan, Arthur, was still sitting in the office with a book to write and write.

"Li Yan, don't you go to dinner?" Lu Qiujiang approached him and asked.

"Hello, Director Lu, I'm going to finish this proposal while I'm taking a break, and eat when I finish writing this question!" Li Yan raised his head and said.

"Well? What proposal?" Lu Qiujiang was a little curious.

"A proposal for this year's conference! I am a representative of the conference, so I will naturally prepare a proposal!" Li Yan said as a matter of course.

A descendant of an American has become a representative of the Chinese People's Congress, and he seems to be a party member. This style is a bit wrong! Lv Qiujiang looked at this blond-eyed, blue-eyed man with a high nose bridge, and was a little messy in the wind!

Chapter 410 - Lonely character (16/22)

Glanced at Li Yan, who was struggling to write a book with admiration. Lu Qiujiang turned and went out to the direction of the canteen. At the first sight of the canteen, Lu Qiujiang noticed the teenager who was taking a meal on the plate alone in the corner.

Even though most of the people here are recruited from various places, but after a few days of familiarization, they all have their own friends who can talk to each other. They naturally come together when eating, except for this project department. The youngest member outside him still dine alone.

He was a very important person in Lu Qiujiang's plan, so Lu Qiujiang decided to make more contact with him; he went to the window to lay the meal, sat on the opposite side of the table with the tray, and glanced at his meal. The contents of the plate pretended to be pleasantly surprised, "Yo, Ma Yang, you also like to eat potato nuggets!"

Ma Yang looked up at Lu Qiujiang, and then turned his eyes to the dinner plate again. After a while, he replied with a mosquito humming voice, "I don't like to eat this!"

"Well, why did you fight so much?" Lu Qiujiang couldn't figure it out.

After another half a day, Ma Yang continued to answer in the voice of the weak mosquito, "I just referred to the braised beef next to him, he gave me the wrong call!"

Puff, Lu Qiujiang just drank the soup in his mouth, and the reason is very good and powerful! Putting it on the average person will definitely make a noise immediately to prevent the mistake of the canteen staff, stating that he wants braised beef instead of potato nuggets, but Ma Yang does not like to talk, so he can only look at the pile of food in the face. Full of things I don't like to eat! By the way, Ma Yang looks very skinny, and the staff also wants to give him more nutrition, giving him more than half the weight of others! Originally he was also kind-hearted, but he did not expect to make Ma Yang so embarrassed.

"If you don't want to eat, just dial it into my dinner plate! You take my braised beef!" Lü Qiujiang started to put the beef on Ma Yang's plate.

Ma Yang is also not polite, not only gave the potato and chicken nuggets to Lu Qiujiang. I also picked up Mapo tofu by the way, and he didn't like to eat it if he meant it.

Hey, that's me. If other leaders see you this set of hearts will be uncomfortable! Lu Qiujiang, a scientist with low EQ, solitary personality, and poor communication, has seen much, but to this extent he is rare.

Is usually in the news media. When people talk about scientists, the words lonely and uncommunicative appear frequently; for example, Mr. Lu Jiaxi, who won the first prize of the

natural sciences as a middle school teacher, when the reporter went to the middle school where he worked. , I have heard similar words from many of his former colleagues.

However, these scientists are not unspoken, but have nothing to say to you! All they care about is the cutting-edge knowledge in their field, and what they usually think about is this; how do you interface with the short and various messages in your parents? People want to talk to you about the recursive construction method of prime factors, and you can't catch it! Over time, the contacts between the two sides have become less and less. Naturally left this impression.

Ma Yang is also in a similar situation. Although he doesn't speak much, he has almost no loss in Lu Qiu Jian's memory and unusually sharp abstract thinking. He is also quite familiar with the theoretical research of controlled nuclear fusion. Lu Qiu Jian gave him The reserved position is a theoretical assistant, responsible for assisting himself in building a theoretical framework for controlled nuclear fusion.

Lu Qiu Jian's requirements for the staff of the project team are relatively loose. As long as they do not affect the progress of the work, he has no interest in interfering in his private life and personal character. The reason why he came here is because he wants to deepen his Understand that it will be better to arrange his work in the future.

After eating, Lu Qiu Jian didn't rush away. Watching Ma Yang prepare to get up and leave, said, "How much of the material distributed to you today? Any thoughts?"

"I have already seen the second section on page 14!" When it comes to professional content, Ma Yang's speech also became agile. "That is to say, regarding plasma restraint and \*\*\*\* discharge, I prefer the second kind of the three schemes you put forward in the data, because the first kind ..."

Lu Qiu Jian listened to Ma Yang's elaboration carefully, and nodded from time to time. From his words, he could hear that he had read through the information in the material, and also added his own understanding, although some of the understandings were due to reality The limitation does not conform to Lu Qiu Jian's real thoughts, but it is enough to surprise him.

"Well, very good!" When Ma Yang finished his thoughts. The people in the restaurant were almost gone; he didn't immediately point out Ma Yang's omission and said after encouragement. "It's a bit of a surprise that you can draw so many conclusions in the morning. But I won't give an opinion right away. I'll wait for you to read all the information before you come to talk to me! Compare with the current view and see if it will change! "

“Well, I remember!” Ma Yang nodded, keeping Lu Qiujiang’s words firmly in his mind; the two put the tableware in the recycling place and returned to the office upstairs together, starting a busy work again.

The time passed slowly. After Ma Yang read the information given by Lv Qiujiang, he found that the problems he had previously considered, Lv Qiujiang had given solutions in the following content, and the problems he did not consider. Qiu Jian has also written in the information.

Is worthy of being the Nobel Prize winner! Ma Yang gave a rare admiration in his heart, rationalizing his thoughts and knocking on the door of Lu Qiujiang’s office again.

“Let’s talk, what new ideas do you have this time?” Lu Qiujiang came out from behind the desk, came to the sofa and sat down, looking at Ma Yang next to him and asked.

“I was a little irritable at the beginning! I haven’t considered it clearly and made a hasty opinion. I won’t fully understand what you mean until I read the information!” Ma Yang told the truth.

“Your opinion is not useless work. For example, the third point you mentioned last time is very inspiring to me about the influence of the plasma on the confinement device during the heating process!”

“Those are only details, and do not affect the direction of the entire plan! If you even solve the problems of this degree, what do you want us to do?” Who said Ma Yang would not speak, this paragraph does not mean Is it pretty slippery!

“Then your job is to perfect the details of the entire theory based on this information. If you encounter problems, please come to me at any time!” The inspection has reached or even slightly exceeded his expectations. Lu Qiujiang began to officially arrange tasks !
