

## D. School 421

Chapter 421 - Problems with variables

What kind of ability does a good back have? Is it Gattuso's excellent interception ability? Is Makelele as full of energy? Is Pirlo's excellent control ability? Or the pivotal ability of Harvey Alonso to connect before and after? At the moment, Lu Qiu Jian is telling them with his own performance that the overall view is also indispensable.

With Lu Qiu Jian controlling the situation in the backcourt, directing the offense and defense of the main side, the already weaker substitute side was immediately oppressed and breathless.

After receiving the ball, Lu Qiu Jian led his teammates to run, while constantly combing the attack by passing the ball. He knew the consistent characteristics of the Chinese men's football team. The position indicated was always unmanned. The defense was easily torn open. He sent a straight to the front of the penalty area. Striker Gollinsmann took the ball and took a strong shot when there was no defense in the penalty area. This time he finally did not hit the plane and pulled back one for the main side. ball.

He could n't even believe what had happened after the goal was scored, and he did n't ask him in a suspicious tone until his club's eldest brother Li Datou came over to celebrate for him. Seems to have no effort at all! “

“Look at your kid!” Li Datou was amused by him, rubbed his hair, and looked at Lu Qiu Jian with a complex expression. , Sure to score! “

He is a veteran of the national team. He has participated in nearly 100 national team games, but he has n't seen a clear attack like this a few times. This situation was also when he was loaned to Everton. Seen in the Premier League.

Then the situation on the field was completely controlled by the main party. The offense of the substitute party was strangled by the player who was commanding the attention of the party before Lv Qiu Jian. Occasionally Lin Xiao broke through to the backcourt with his outstanding foot skills. Will be intercepted by him with Redondo's elegant technology.

Lv Qiu Jian, who switched to the main side, reduced the number of direct attacks, but only used the pass to tear the defense of the substitute side. Even if there was a free kick, he was given to Hao Junmin and Zhao Yiji to exercise, every time At the end of serving, he will pull the free thrower to his side, and like a coach, he will analyze in detail where he made the mistake. What should I do

next time? After carefully pondering over these people, they feel that they have learned a lot. They all decided to wait for the training to end and then follow Lu Qiuqian's instructions to practice.

"Coach Dui, it seems that Professor Lu's change to the lower back position has a greater effect on the team as a whole?" Huang Ziwei is also banging and drumming. For him, if Dui becomes obedient, it is always better to change. The head coach came easily.

"No, no, now they can score because of the weak side of the bench. They will come to the Olympics. But they will face world-class defensive players like Marcelo and Burdisso. The goal you want to go is not easy! "Dui still insists on his point of view.

Hehe, you just thought about Marcelo and Buldiso, did you ever think that our back line is to face offensive players like Messi, Robinho, Ronaldinho? at this time. Huang Ziwei was completely stubborn, he decided to call Gao Guidian as soon as the game was over.

The game ended with the main side's reversal of victory and returned to the locker room. Taking advantage of Dui's effort to prepare for the post-match analysis and press conference, Lu Qiuqian began to throw carrots to his teammates, "Everyone is doing well today. If this progress can be sustained, I will help you to contact European clubs when the Olympics are over! "

"Brother Lu. What are you talking about?" The Olympic team players except Li Weifeng's old age and his thoughts of going to Europe, and Zheng Zhi's absence from overseas games, those young players can play in Europe. It was full of yearnings, and my eyes brightened at the moment.

"I still have some relationship in Germany, if your strength can reach the standard to go to Germany to play football. Then I will help you contact the German club!" Lu Qiuqian began to build confidence for them, "After this game, I also have some knowledge of your strength. Although from the current point of view you are still a certain distance from the Bundesliga level. But you are both young now and there is still a lot of room for improvement. Work hard. There is no chance to go to Europe in the future! "

They are still relatively young, and have not been completely contaminated by the big dye tank of Chinese football. In other words, there is still hope for salvation. When I heard of the opportunity to go to Europe, I was immediately excited.

After the excitement, some people have concerns, "Brother Lu, I don't hide from you, there were European teams who contacted me, but the club did not let people go!"

“Xiao Ting, don’t worry about this. After the Olympics, if the club still doesn’t let people go, I will help you solve it!” Even if you don’t use your upper-level relationship, Lu Qiu Jian has a way to make those clubs succumb. Not to mention, most of the group companies that stand behind the clubs are listed. If they do n’t agree, they should just kneel after playing a few hands on the stock market.

Seeing that Lu Qiu Jian was so loyal, these children just bowed their heads. Hao Junmin and Zhao Yi were thinking about how to invite Lu Qiu Jian to guide the free kick for themselves. Dui knocked on the door and came in, “Lu, big head, You two and I went to the press conference together! “

Arrived at the press conference, Lu Qiu Jian found that the reporters on the scene saw a lot more than he saw on the sidelines. I’m afraid I was hurried to get the news when I wanted to come?

After the routine news briefing ended, at the time of free questioning, Lu Qiu Jian naturally became the focus of attention of reporters. The reporter who took the lead with the microphone could not wait to ask, “Professor Lu, I want to ask what is the reason for you to decide Are you determined to join the Olympic team? Will you still participate in the men’s Olympic team? “

“Because I haven’t been too busy recently, I came here; as for the men’s basketball team? I think if time permits, I will also participate. After all, I have already promised Brother Yao!” Lu Qiu Jian’s answer made the reporter somewhat Enlightened.

“Well, there was a training session for the men’s basketball team some time ago. Why didn’t you participate at that time? And you will come as soon as the national Olympic team training starts again?” Another reporter asked.

“The reason is very simple. Mathematically speaking, the variables that can be produced by five people and eleven people are not at the same level. I am familiar with the tactics of five people much faster than the tactics of eleven people. Come to the football team! “

Chapter 422 - He is back (20/23)

Lu Qiu Jian said that it is indeed a reason. On the basketball court, the head coach can use a tactical arrangement to score points. This is unlikely to happen on the football field. Even with free kick tactics, the success rate is quite low. This shows that there are more uncontrollable factors on the football field than on the basketball field.

The reporters finally understood Lu Qiu Jian’s meaning, and he couldn’t help sweating for a while. The thinking of scientists is really different from that of us!

“Professor Lu, I found that during the practice game, the positions played by the main side and the substitute side have changed. So can you tell us that you think that position can play your advantages better? Is it the back waist or the wing forward?” “Someone finally asked sensitive questions.

“I think our Olympic team is still in a relatively backward position among all the Olympic teams, and there is a big gap with the world’s strong teams such as Brazil and Argentina, so we should first consider not to lose the ball or less, and then study how to score goals, based on this consideration, I think I can play a bigger role in the lower back position!” “Lu Qiuqian said truthfully.

“So does Coach Dui think so?” The bad-willed reporters also threw the question to the coach Dui. They have seen some clues from the training. Lu Qiuqian was very excited when he was playing the forward. Applause and applause, when he came to the waist, but he raised his arms without saying a word, if there is no greasy inside, hell!

Oops, you young people, do n’t always think about making big news! Huang Ziwei on the side looked at Dui slightly nervously. If Lu Qiuqian joined the team on the first day, there would be disagreements, but it was not very good! Despite having moved away Dui’s mind, contradictions are definitely not suitable for breaking out now.

“This is my first contact with Lu, it is too early to limit his position now, I need more observation!” Dui said ambiguously.

This answer can neither satisfy reporters nor Huang Ziwei, let alone Lu Qiuqian; the reporters heard some disagreements with what Lu Qiuqian said just now, but there is no conclusive evidence; Huang Ziwei believes Even if he does not agree with Lu Qiuqian’s idea, he is not suitable to speak in front of the reporter; and Lu Qiuqian is more determined to change the head coach because of Dui’s stubbornness.

There was a buzz in the press room. They are all old rivers and lakes, can’t you tell the meaning of Dui? Although there is no solid evidence, but can we play freely! Therefore, such as the coach does not know talent, Lu Qiuqian suffered a cold encounter, Lu Qiuqian joined the team to play big names. Headlines such as the coach’s anger and daring to speak gradually emerged in their minds.

Of course, the former idea is a little more. Dui has been hacked by the media and fans many times, do n’t care about this one or two more; and Lu Qiuqian’s impression in the hearts of the fans is very good, the fans are He did not participate in the national team slightly, but these disappeared after the news of the Nobel Prize. After all, individuals can understand the issue of the World Cup participation rights and the Nobel Prize.

The media is also to make money. Except for a few media with special positioning, most newspapers and websites do not want to lose a large number of potential readers because they have blackened Lu Qiujian.

Therefore, the next day the newspapers of major newspapers in the street, in addition to the big Lu Shuang Yingzi who built Lu Qiu on the training ground, showed his optimism about the situation of the Olympic team, the rest All of them are the interpretation of the head coach Du Yi's remarks at the press conference.

For a time, the fans' favor with the head coach fell again, and all major websites were full of vomiting and refuting him. With the participation of Lu Qiujian, this Olympic team has become a history for fans. Since then, the most promising team has made a breakthrough. But the head coach and the team's hopes of winning diverge, which is obviously not a good sign.

As for the choice between the two, one is the world's number one superstar who has won the European Golden Globe Award and Mr. World Football and led the team to the Triple Crown; the other is the second-rate leader who led the Olympic team to repeated defeats Coach, does it take much thought?

So among the fans, Dui's slogan for class was again heard, and they began to be candidates for the coach of the Olympic team. Among them, Bayern coach Magath became the biggest hottest. The reason for the fans is that this world There is no coach more familiar with Lv Qiujian than Magath.

In addition, the call for Lu Qiujian to serve as the coach and captain of the Olympic team is not small. Fans who supported this view took the evidence of Lu Qiujian's command in the last UEFA Champions League final as evidence, and they received some support. Unfortunately, considering that Lu Qiu built several positions, I am afraid there is no time to take up this position, so they have to give up.

Quickly. News of Lu Qiujian's return to football has also spread to Europe. Major media such as team newspapers, photo newspapers, and kicker magazines have moved the news of this week's European events to the back. Picture of the National Men's Football Olympic Team.

As for the title, they chose him back almost at the same time! In the middle of the front page, there is a photo of Lu Qiujian wearing the Chinese National Olympics No. 10 jersey, and photos of players who may participate in next year's Olympic Games, such as Messi, Robinho, and Giovenko, are dotted next to it. The accompanying text is "Are you all ready to play against him again?"

“Yes I am looking forward to playing with him! You all know that the last time Real Madrid and Bayern Munich confronted me, I was still in Brazil. After I came to Real Madrid, I did n’t touch the Champions League. To Bayern; when I heard that he had quit Bayern, I thought I would never be able to meet him again on Luyin Field, and I did n’t expect the opportunity to come again! “Robinho looked vigorous,” I hope the Olympics At that time, the Brazil team can be divided into a group with the Chinese team, so that I can play with him earlier! “

Hey, poor child, you have never been an opponent with him! If you had played with him, you wouldn’t be able to say such things now? The reporters looked at Robinho sympathetically. Was it not good for you to fail to meet Bayern on the Champions League? If you go all the way to the finals, you will not.

“This is a good thing for international football. I always think it’s a pity that he withdrew from football at such a young age! I hope to meet him at the Olympics!” Messi replied with a frustrated face. You race! Would this guy tell me that you are still young after the game!

Chapter 423 - High guidance

“Professor Lu, I’ll bring you what you want!” Soon after returning home, Huang Ziwei called and he already took Longge’s materials to where he lived. ????

“Please sit down, I am looking for the tea leaves that someone gave me last time!” Lu Qiuqian turned over the tea leaves under the coffee table, and Huang Ziwei took the tea with a little anxiety after scrambling for no success.

“Good tea! I also called Gao Gao just now. He is also very interested in the position of coach of the Olympic team!” Huang Ziwei took a sip of tea and began to report to Lu Qiuqian for work. Well, he has now Looked at Lu Qiuqian as his head boss, his future can be in the hands of others, can it be equivalent to the head boss! “Guidance Gao has excused the family to take leave for the team and will be able to go to Beijing tomorrow!”

“That’s good, let’s find a place to sit after the three of us warm up tomorrow!” Lu Qiuqian said while looking at Longge’s material, “You choose the place, keep it secret!”

“You can rest assured! I won’t let anyone else know! I changed the taxi a few times when I came here.” Huang Ziwei’s work is very reliable. “Actually, I am also very high in guiding this person. Appreciate, his biggest ideal is to lead the national team into the World Cup, and now the position of coach of the Olympic team can just serve as a springboard for his ideal, and he will definitely do it with his heart! “

“Let’s talk about it tomorrow!” Lv Qiujian was undecided. Although he also appreciates the high guidance, the news and facts obtained from TV and the media will still be different. If tomorrow’s negotiation is not suitable, he can only think about it. Way.

At 7:30 the next night, at the Workers Stadium in Beijing, tens of thousands of fans came from all over the country to make the stadium full; outside the stadium, many fans waved banknotes to pray for a ticket from the ox.

“I still have one hundred and eight tickets left for you?” Huang Niu glanced and asked a fan who was waving banknotes.

“Want! How much!” The fan uncle suddenly became excited.

“Ten thousand and eight! Pay money in one hand and give tickets in one hand!” Huang Niu added a zero directly behind the fare.

“Hiss ~” This uncle had a toothache for a while. He was ready to bleed, but he did not expect the fare to rise so exaggerated, he couldn’t help distinguishing, “I said buddy. You earn a little bit and you get it It ’s a bit too much to turn over so many times? Well, I ’ll give you five hundred. Give me the ticket! “

“Five hundred? How many votes do you have? I haven’t seen it! You don’t have to see what kind of game it is! If you don’t talk about it before, it’s 80 yuan! No one bought it for 80 yuan! But it’s different now. The first star is playing in the Olympic Games! “Huang Niu is eager to go,” Yes, if you don’t buy me, find someone else! “

“Don’t I! Isn’t it a step late!” The uncle fan was depressed for a while, and earlier people asked him if the ticket for this game was coming, he didn’t want to go away when he was busy with his work. Who knows that news of Lu Qiujian’s joining the Olympic team soon came after he was evacuated. He suddenly regretted that his intestines were all green. Now he wants to go in and only buy high-priced tickets.

Handed over the money and handed over the delivery. He took the 1,800 back-seat tickets and entered the stadium, shaking his head with self-deprecation. Hey, I spent the usual seat money to take the worst position!

“Today our lineup is a goalkeeper ... defender Li Datou ... midfielder Hao Junmin, Zhao Yiji ... forward Lin Xiao ...” Du Yi Bao published ten names, and finally saw Lu Qiu Jian for a long time before saying, “Lv, you still play the position of the wing forward in this game.”

“Okay!” Lu Qiu Jian shrugged and responded. He didn’t have that idle time to argue with the head coach. Anyway, Gao Gui is already watching the ball on the court. He played the two warm-up games first.

At the beginning of the game, Lv Qiu Jian quickly used his excellent technology and physical ability to rule the entire side road, and brought it to break through again and again, if not Xiao Lin was too nervous for the first time. The goal was already broken.

“Don’t think too much, I didn’t enter this time and come again next time!” Lu Qiu Jian patted his head to encourage, and only Lin Xiaomin had judged his own idea just now, and ran to the right place. It was only when the shot was deformed due to tension that he kicked and flew.

Under his appeasement, Lin Xiao quickly returned to normal, and his second chance was finally seized by him. He received Lu Qiu Jian’s inverted triangle pass in the small penalty area to push the goal and the Olympic team led by one to zero.

“Good shot!” The uncle who bought the scalpel ticket stood up and applauded loudly. It took a long time to sit down again and said with emotion, “Hey, I haven’t seen our team play such a neat attack in years!”

“The goal just now relied on Lv Qiu Jian’s personal ability. If it wasn’t for him to catch up with the Guoan team’s three players, it would be a good pass. The Olympic team could not score!” A man next to him was covered by sunglasses and masks. The real man whispered while writing and drawing on the small book. “Just now the Olympic team’s midfield and back line have been disconnected. If the Guoan team counterattacks, it will be easy to break the goal.”

Two times! Uncle Yellow Tickets recalled the situation on the court just now. It seems to be exactly the same as what he said, but he didn’t expect to sit beside him to understand the ball!

Next, the two chatted while watching the ball. The situation on the court has always been in the direction that Sun Men said. After the National Olympics team led three to zero, the players played thoroughly, and the other side players trying to learn to look like Lv Qiu Jian to break the ball, but was cut off by the Guoan team and hit a quick counterattack to pull back a goal.

“Hey, this is the national security team! If you face Brazil, Argentina, these teams will not have this good luck myself!” Sun Men shook his head slightly.

The game ended with a five-to-one score. Dui was glowing at the press conference. Talking about Lv Qiuqian’s attacking power was the key to the Olympic team’s victory; Lv Qiuqian let him say nothing. After he hurriedly answered two questions, he left the scene on the pretext that he had done it in advance.

Arrived in the place Huang Ziwei said in a car with Bai Yaoran. As for the paparazzi who followed him, there were professionals like Bai Yaoran who didn’t have to worry at all.

Went to the place and pushed the door in. I saw a dark-skinned man with long face and small eyes talking to Huang Ziwei. A pair of sunglasses was placed on the table between the two. When they heard the door ringing, they turned their heads and looked here.

Lv Qiuqian took two steps to hold the right hand of the long-faced man, “Hello, you are a high guide! I have always been admiring the big name, but I have seen a real person this time!”

Chapter 424 - Plotting down

“Don’t dare to do it. In fact, I wanted to see you a long time ago. I was just afraid of being too presumptuous and didn’t come to visit. This time I will come over with a call from Team Leader Huang!” Gao’s posture is a little low, but it is normal, and he was also the most brilliant It’s just the top domestic star, but Lu Qiuqian is currently the best player in the world.

The three of them went straight to the topic without too much politeness. Since Guidance High was willing to show his attitude, Lu Qiuqian took out a thick stack of printing paper from the bag and handed it to Gao. “High Guidance, I think the yellow leader Did you tell you? You also watched today’s game, and you must know that according to Dui’s current tactics, we will continue to play in the Olympics! So we thought whether it would be better to change coaches? I Team He and Huang both think that you are the most suitable candidate. This is some of my thoughts on the tactics and training of the Olympic team in the later period. Do you have any questions? “

“I have pondered the adjustments you made in the Champions League final many times! There are many details that I have replayed several times to see and understand!” The high guide took the information and quickly looked through it. He knew that these were not short-term. Finished, so I focused on the tactics formulated by Lu Qiuqian. There are many similarities with his ideas, but I think more comprehensive and far-reaching than myself.

Huang Ziwei and Lu Qiuqian were silently drinking tea and waiting for the high guide to read it. After about twenty minutes, the high guide raised his head, “The general direction is the same as

what I thought in the past two days. The tactics you formulated are very consistent. The technical characteristics of our Olympic team players, but I think they may not meet your requirements! “

“This is going to be a lot of hard work under the guidance of high guidance, urge them to train!” Lu Qiuqian timely put on a certain high hat, “I am very relieved of your ability!”

High guidance shook his head, “I can’t be busy by myself alone. There are many training programs in it that are beyond my understanding. I think I need a full-time assistant coach!”

Lu Qiuqian knew that his old partner Ali Shaw had already gone to Namibia as their national team coach. “You do n’t need to worry. My relationship with Bayern is not bad. If you can accept it, I will ask Beckenbauer. Mr. Er helped support some assistant coaches. You know that the youth training in Germany has developed very well over the years, and their coaching skills are also very high! “

The reason why did not take the lead in contacting was because they feared that high guidance would produce the idea of aerial self-sustaining. Now, Lu Qiuqian provides tactics and training plans. The assistant coach is always his, so what do you do? When to be a mascot? Therefore, Lu Qiuqian also explained the sentence after saying, “Of course, these people must go through your interview before they can go to work, and they are directly responsible to you for their usual work!”

“I’m not so stingy!” The high guide waved his hand. “I know this is also a rare learning opportunity for me. If I had not signed a contract with the club, I would like to be the full-time head coach of the Olympic team! Being able to work with a coach from Bayern is also a me Great opportunity for promotion, you do n’t have to worry about my ideas! “

That ’s good, since the other party cooperated so well, Lu Qiuqian naturally paid off, “I heard that you always want to go to a foreign club to study? When the Olympics are over, I will apply to Beckenbauer for an opportunity to learn from Bayern! , It would be better if you had a better chance because of your performance at the Olympics! “

Hearing this, the high mentor’s eyes lit up, and he had planned for studying abroad. It ’s just that he never had a good chance. What he thought was to go to the Netherlands to study. Now he has the opportunity to go to the top giants like Bayern Munich, and to learn from world-class coaches like Magath or Heathfield. Surprise.

He stood up and said excitedly, “Professor Lu, I can’t speak, you don’t care; but since you trust me so much, then I will do your job well! You will see my performance Right! “

Lv Qiu Jian saw the most sincere love for football from his eyes, which is the most important reason why he chose high guidance. He quickly got up and helped Gao Gui sit down, glanced at Gao Gui and Huang Ziwei, "Hey, I can play this Olympic Games. Although I can't participate in the next game, I also hope that Chinese football can Healthy development, now I hope it will be yours! "

Guidance Gao is a bit ignorant, but Huang Ziwei heard another meaning from Lu Qiu Jian's words. So if my work during this period can satisfy him, he will support me as the full-time vice chairman of the Chinese Football Association. ? One thought so far. Huang Ziwei's heart also began to show waves, but although he can often go in and out of the elder's office, to say that someone like Long Brother, he believes that Lu Qiu Jian has this ability, but it is not so easy to support a vice chairman ?

Perhaps seeing the thoughts in Huang Ziwei 's heart, Lu Qiu Jian reported with confident eyes; if not much change, then this year Qin Feng will become a member of the new elders group, but he is very enthusiastic about football ! Moreover, his relationship with him is much closer than that of the current elder group. This can still be done!

The three men discussed some details again went away separately, and the high director intends to go back to the hotel to study the information given by Lu Qiu Jian. Lu Qiu Jian dialed Beckenbauer in the car. phone.

"Lu, I heard that you are back?" As soon as the phone was connected, Beckenbauer could not wait to ask.

"It just happened that the Olympic Games will be held in Beijing, and I will not participate in any competitions afterwards!" Lu Qiu Jian explained a few words and explained his intentions, "Mr. Beckenbauer, I called this time I came to seek help from the Bayern Club ... "

"Assistant coach? Not a problem at all!" Because of Lu Qiu Jian, Bayern has become the club with the most fans in China. Now Lu Qiu Jian has left. Bayern's influence in China is gradually declining. Beckenbauer is Thinking about how to restore it, Lv Qiu Jian gave him a chance, he immediately agreed, "What kind of assistant coach do you need? ... Anyway, you are familiar with the team's current coaching team, except Eich. Other than Cohen, you can choose other people, as long as they agree, I will never stop them! "

"I need a goalkeeper coach, a physical coach ... " Lv Qiu Jian gave the list, "It's just that they may have to wait a month or two to get on the job, you know that changing the coaching staff is not a piece Simple thing! "

“Okay, I will prepare it for you!” How could Beckenbauer who has changed countless coaches not understand, he simply agreed.

Chapter 425 - Bought a watch (21/23)

Remember [??] in one second, to provide you with wonderful novel reading.

With high guidance and Bayern 's assistant coaching team, the Dui team 's replacement is now complete. Back to the room, Lu Qiu Jian first sent Huang Ziwei his Olympic team information and his own tactics and training plan to Becken Ball, the assistant coaches that he transferred to Bayern, they just can use this time to get acquainted.

In the second game, Lv Qiu Jian switched to the lower back position according to the previous idea. The opponents in this warm-up match are stronger than the Guoan team, and the attacking power is also a grade higher, but they have attacked many times under the organization of Lv Qiu Jian. After failing to return, Lu Qiu Jian caught them and made a sharp and quick counterattack from the loophole of the attack and defense, assisting Lin Xiao to open the first record; afterwards, he used a free kick and a long shot to break the goal and finally won three to zero. .

Well, this is the tactics suitable for the Chinese Olympic team. The highly-armed high guidance in the stands nodded slightly, but unfortunately Dui was not very satisfied. He kept saying at the press conference if Lu Qiu Jian was sure to be an avant-garde. Being able to score more goals made Huang Ziwei completely grieved for him.

“I won't participate in the next training and warm-up. In addition, you send me a copy of the domestically competent players. I will go back to research and research. At present, some of these people still can't meet the requirements!” After the warm-up match, Lu Qiu Jian said to Huang Ziwei.

“Well, I'll send it to your mailbox when I'm ready!” Huang Ziwei nodded. “I will be ready for Dui's side. I must find some good opponents for them in the next warm-up match!” He drove away Dui's plans, and he had some media with good ties in his hands, waiting for the game to end and let them fire uniformly.

“These things will be yours. I need my cooperation or Long Ge has any ideas. Call me!” Lu Qiu Jian gave him a pill.

After going to the Olympic team for a while, Lv Qiu Jian returned to the base again and started to be nervous. The most important task in the near future is to review the planning and design of the Changan base.

“Li Yan, come here!” A phone call passed, and Li Yan arrived at his office in a moment. Lu Qiu Jian directly started the discussion of the work without a greeting. “I have read this plan and found several problems. Need to adjust ... “

The two of them were lying on the table and had a fierce discussion and debate on the plan. They did not reach a unified opinion until after work. Li Yan collected the plan with the revised opinions. “I will immediately communicate the revision opinions to the planning unit. It is expected that the revision plan will be completed in two weeks, and then we will continue to discuss!”

“Okay, hard work!” Lu Qiu Jian said while turning off the computer. Remove the coat from the hanger and leave for work.

“Director Lu, are you going home?” Seeing him like this, Li Yan retreated from the door, and he remembered another thing, “If you go home, can you stop by Hua Guoquan Academy of Sciences?”

“Oh, are you talking about that?” Lu Qiu Jian thought for a moment and understood what he was going to say, “Isn’t it good to deliver it today? Why hasn’t it been delivered yet?”

“Yes, this is what I want to say. They called and said that there was a small problem and the delivery needs to be delayed. I want to trouble you in the past to see what went wrong!” Li Yan said with a frown, obviously he was right The other party was very dissatisfied with this behavior.

“I know, I’ll take a look here!” The place is not far from Xia Xiao’s studio, and she can pick her up after work.

After coming out, Lu Qiu Jian gave Bai Yaoran a vacation, and drove his car to the Huaguo Institute of Metrology, but fortunately there was only a little problem there. He made the matter clear in a few words, and the other party promised to take it tomorrow Delivery to. 【×】

After finishing the work, Lu Qiu Jianshun turned to the downstairs of Xia Xiao’s studio. Walked into the elevator and pressed the floor where Xia Xiao’s studio was located; he was wearing ordinary clothes and changed his hairstyle today, so that the passengers on the same elevator did not realize that the person between his size It is the most famous scientist in China and the new player of the Olympic team.

“You’re here! Miss Xia is talking about business with customers!” Seeing him walk in, the front desk quickly stood up and said hello.

“You are busy with you. I’ll go in and wait!” The rate section nodded slightly and walked to the lounge. Opposite the lounge was the conference room of the studio. Xia Xiao saw him from the window and waved with a smile.

Is this almost the same? Seeing her greet Lu Qiuqian simply walked in, and politely greeted the client opposite her. Then said to Xia Xiao, “You are busy first, I’ll go outside and wait for you!”

“No, we have already negotiated!” Xia Xiao started to pack up. “Why, how are you free today?”

“I went to buy a clock nearby! Come and pick you up by the way!” Then he turned his gaze to the customer opposite Xia Xiao, “This is?”

“This is Mr. Han. Mr. Han just returned from Neon and opened an animation production company, intending to adapt my comics!” Xia Xiao gave them a brief introduction. “Mr. Han, this is my boyfriend, your name is He Xiaolu will do. “

Mr. Han mainly focused on the field of animation when he was neon. He had only heard Xia Xiao’s name before and knew nothing about Lu Qiuqian; when he heard the three words of boyfriend from Xia Xiao’s mouth, his brows were slightly wrinkled After a closer look at Lu Qiuqian’s dress, he didn’t see any way.

After a little thought, he tentatively asked, “Xiao Lu just bought a clock? Is it a clock?”

“Well, it’s a clock!” Lu Qiuqian nodded and replied.

Hey, there aren’t any high-end department stores nearby! Look at his wrist again, it seems to be empty, and Han always shows no trace of Patek Philippe on his wrist. “It happened, I also like to collect watches. I bought this Patek Philippe in Switzerland. It cost 80. How much; Xiao Lu, what brand did you buy? Can you show me a long view? “

“Oh I bought something different from what you bought. There is no brand. It is made to order. It will be delivered tomorrow. I’m afraid I can’t show it to you!” Road.

Hand-made watch! This has always been the area where talents who are tired of playing with brands are involved. Is this young man's child? Mr. Han glanced at Xia Xiao, who was pure and pleasant, and he asked unwillingly, "That's really a shame. I don't know how much it cost Xia Lu to buy this watch?"

"It's a clock, not a watch." Lu Qiuqian emphasized again, "Because it's an internal relationship to get the goods, the price is not very high. It took more than 30 million yuan!"

"How much!" Mr. Han was stunned by this price!

Chapter 426 - Don't be extravagant with scientists

This world is not without more than 30 million watches. For example, the Hublot Big Bang watch set with 1282 diamonds is worth 5 million US dollars. For example, the Patek Philippe mechanical pocket watch worth 10 million US dollars is filled with a large number of fine colored diamonds. So that the surface of the Chopard 201 carat diamond watch is almost covered. The estimated value is as high as 30 million US dollars.

But these are legendary products. In general, watches with a value of one million yuan can become top luxury goods, so President Han was shocked by Lu Qiuqian's words, so that he forgot the sentence he emphasized earlier. "Is a clock not a watch".

Suddenly he regarded Lu Qiuqian as a god-class prodigal son who didn't care about spending money on his father, but even if he was a prodigal son, he spent 30 million yuan on a watch. Is this the only one in the world? Even the oil princes in the Middle East can't do this kind of thing?

It took a long time for President Han to wake up from the shock. His watch enthusiast's attributes prevailed again, staring at Lu Qiuqian with his eyes glowing and asking, "What kind of watch do you make? Can you take me to a long time tomorrow? ? "

"I'm afraid it won't work. We are a confidential unit, and outsiders are not allowed to enter!" Lu Qiuqian replied with a smile, just a moment ago, his expression change was really interesting.

"Secret unit?" President Han had no time to think about the relationship between the secrecy unit and the clock. He continued to ask pitifully, "Can't you let me see what model and material you can always tell me? If you don't say that I am I'm afraid I can't sleep at night! "

"I bought an atomic clock only! You want to buy it on the market too! It's just that my requirements are higher, so I spent so much money!" Can't bear to tease his Lu Qiuqian to reveal the answer, modern scientific research The requirements for measurement accuracy are getting higher and

higher, whether it is length, weight or time, and many special measurement tools have been born, and the atomic clock is one of them.

What Xihe plans to use is of course the highest accuracy that can be achieved by Hua Guo technology. It is reasonable to spend 30 million yuan in funds, and this atomic clock is just a temporary item in the planned opening phase. He also placed a higher order. But this will not be completed in a short time, otherwise the price will be more scary.

President Han almost spurted blood. After talking for a long time, it turned out to be this thing! A house so big is also called a clock? What's the point of not being able to take it on your wrist to show off? He was completely speechless now, only to stare at Lu Qiuqian straightly.

“Oh, did I do scientific research! Should I buy some experimental facilities!” Lv Qiuqian looked at him with a smile and secretly vomited. The most luxurious thing in the world is not a local tyrant, a corrupt official, or a prince. But we scientists!

Diamonds are extremely precious luxuries for you, but in Lavoisier's opinion, they are nothing more than experimental consumables. He placed the diamonds in a glass cover. Use a magnifying glass to gather the sunlight to burn the diamond and get a colorless gas. Through verification, the gas was found to be carbon dioxide, which proved that the diamond was made of carbon. In this experiment, the diamonds he consumed were enough to make the one hundred brides who were married feel heartbroken and could not breathe.

For them, silver is an important material for creating jewelry and decorating rooms, but for scientists, it is just a raw material for wires; in the Manhattan project of the United States, in order to build a large cyclotron, a huge magnetic coil is required. The coils designed by Lenz are up to 80 meters each and require a lot of silver.

Lorenz found Lieutenant General Groves, the commander of the Manhattan Engineering District, and Lieutenant General Groves immediately arranged his assistant Nicholas to discuss with the Ministry of Finance; Nicholas found Deputy Finance Minister Bell. Explaining the intention, but refusing to disclose the purpose, only stressing that this is a need for war.

“How much?” Bell asked?

“6000 tons” Nicholas replied.

Bell heard this number and knelt directly. At that time, the National Treasury had only 47,000 tons of silver in storage. He said with a lesson, “Young people, you must know that the National Treasury uses ounces to calculate silver.”

In the end, Bell agreed to the requirements of the Manhattan Project, providing a total of 14,700 tons of silver for use in the Manhattan Project, which accounted for almost one-third of the total storage in the National Treasury of the United States.

Fortunately, the coil can still be recycled, otherwise the National Treasury will go bankrupt because of the provision of wire materials for the Manhattan Project. This 4,700 tons of silver was not fully paid until 1970.

The company uses marble, genuine leather and natural wood, plus expensive metals and multiple sets of diamonds and rare colored diamonds to create a super-luxury laptop worth millions of dollars. The supercomputers used by scientists are usually denominated in billions.

Open the world’s most expensive material list, the top of the list are those rare elements that scientists play. For example, plutonium, tritium, californium, etc., just a few grams is enough to buy a bunch of gold! Not to mention in cern’s plan. The production of one-hundred billionth of a gram of antimatter will cost nearly US \$ 6 billion.

\$ 6 billion is exactly the entire assets of Jack Taylor, ranked 100th on the global Forbes list last year, that is to say, the entire property of the world ’s 100th richest person can only produce one hundred billion gram of antimatter; Therefore, it is absolutely not necessary to spend extravagance in front of scientists Maybe someone in the laboratory can cover all your property with just one device.

Suffered by this, Mr. Han left in dismay, and Lv Qiujian took Xia Xiao back home; after the two of them finished watching TV on the sofa, Xia Xiao was still thinking about the matter just now, “What is that atomic clock really?” Is it so expensive? “

“Yes!” Lu Qiujian squeezed her nose and told her how the atomic clock works. “This small thrust will lift the cesium balloon up through a microwave cavity filled with microwaves, and then cesium The atomic sphere has absorbed enough energy to start falling, and once again passes through the microwave cavity, and releases all the absorbed energy ... “

Lv Qiujian took her to her leg and sat down on herself. “In this way, repeating the up and down movements many times can determine the precise time!”

Hey, why is it that such a serious and serious topic comes out of his mouth? Xia Xiao didn't know why his face started to get hot. Lu Qiujiang wanted this effect. He took the advantage of removing the fabric that hindered the accurate measurement of time, and began to stuff his atomic ball into Xia Xiao's microwave cavity. , To simulate how the atomic clock works.

Chapter 427 - So-called super scientific research program

The precise time measurement was completed after one hour, 13 minutes and 7 seconds. Lu Qiujiang returned to the bedroom with a paralyzed Xia Xiao, lying on the bed until she slept with a smile before gently taking care of her. After finishing the quilt, he came to the computer and started working again.

Xihe Project is undoubtedly the largest super scientific research project in China since two bombs and one star. Even if it is put on the global scale, it can be comparable to the super scientific research projects of the Manhattan Project and the Apollo Project.

The so-called super scientific research project will definitely consume a lot of capital, huge resources, and hundreds of thousands of manpower. If you count indirect investment and personnel, it will be more. It is no exaggeration to say that there is only a global scope. The United States and China have the capacity to carry out such a plan with the power of one country.

The two-bomb and one-star project was directly led by marshals of the ranks of marshals, and established a highly authoritative organization including leaders of the Presbyterian Church and the Military Commission. It integrated command power, financial power, and personnel power into one, mobilizing all forces throughout the country to conduct large-scale cooperation; The top level is coordinated by the nuclear industry, the aerospace industry and the Chinese Academy of Sciences, which is mainly reflected in the close coordination and cooperation in scientific research technology; nationally, it is composed of national defense research institutions, Chinese Academy of Sciences, industrial departments, and higher institutes Universities and local research institutions, the Ministry of Metallurgy, the Ministry of Chemical Industry, the Ministry of Machinery, the Ministry of Aviation, the Ministry of Electronics and the Ministry of Railways, the Ministry of Petroleum, the Ministry of Geology, the Ministry of Construction and other 26 departments (institutions), 20 provinces, municipalities and autonomous regions (including more than 900 Factories, scientific research institutions, colleges and universities) participated in the research battle.

The mere explosion of the first atomic bomb directly costs 2.8 billion. If the construction of the nuclear industry system and supporting expenses (such as uranium mining, etc.) are included, this number will expand to 8 billion.

What is the concept of 8 billion in 1964? The total cost of the three-year Korean War was 6.2 billion yuan, and the national defense expenditure in 1959 was 5.8 billion yuan. This cost was 30% more

than the national defense expenditure for the entire year of 59; if put into the present, China's national defense expenditure last year was 100 million yuan. Adding three more achievements is close to RMB 400 billion!

The Manhattan Project brought together scientists and engineers from all over the world. The project used 539,000 people at its peak, with a total cost of up to 2.5 billion US dollars. If inflation is taken into account, this cost is equivalent to 22.5 billion US dollars.

Among them, the Los Alamos laboratory has more than 9,000 staff, and the Oak Ridge uranium material production plant cost 900 million US dollars. With 36,000 employees, the Hanford Ford plutonium material production plant costs more than 300 million US dollars and employs more than 17,000 people.

Among the scientists involved in the Manhattan project, there are many Nobel Prize winners, such as Fermi, Feynman, Yuri, Lawrence, Compton, etc., while in Germany that competes with the Americans, Bonn, Frank, Pauli, etc. The award winners have left, more than 150 highly qualified physicists engaged in basic research have been deported, and more than 400,000 highly educated Jews have fled; Hitler stubbornly believes that Germany can persist for a hundred years without physics and chemistry. However, he did not persist for ten years; the impact of scientists on the country is evident.

The Apollo project lasted about 11 years and cost US \$ 25.5 billion. At the peak of the project, there were 20,000 companies, more than 200 universities and more than 80 scientific research institutions participating in the project, with a total number of more than 300,000 people.

Now, the Xihe plan led by Lu Qiuqian will cost hundreds of billions. It can be expected that for a long period of time, the state will spend at least tens of billions every year to support this work. The total expenditure on scientific input is comparable. It should be understood that last year, China's fiscal expenditure on science and technology was only 48.3 billion yuan.

But this cost cannot be used for the research of controllable fusion, because Xihe plans to declare space exploration research. In any case, there is still work to be done in this regard.

Fortunately, the basic research in these two fields also has many things in common, such as supercomputer research, material science research, laser technology research, etc. The breakthroughs in these basic fields will have a full range of impact, aerospace Technology and controlled nuclear fusion research will benefit at the same time; this also provides a lot of convenience for China to disguise the true purpose of Xi and the plan.

Similarly, such a large-scale project needs perfect industrial support and an all-round talent reserve. Hua Guo is currently in the high-end field, whether it is industrial technology or talent reserve, and the rice country has a big gap, but it can basically meet the needs of Lu Qiujiang.

The scarcity of high-end talents is in some ways a good thing for Lu Qiujiang, if he went to Rice. Certainly will not receive such attention, I want to take charge of the entire project as I am afraid it will take longer and face greater resistance.

Lu Qiujiang reviewed the list of cooperating units on his computer. He listed more than three hundred universities, nearly two hundred research institutes, and thousands of enterprises for him. Their areas of expertise are more or less manageable. Nuclear fusion has something to do with it. For these cooperative units, Lu Qiujiang does not need to tell them the real purpose of Xi and the plan, but only needs to send them research tasks or product production tasks according to the planned needs. Their work may be to study a certain screw on a controllable nuclear fusion restraint device, or perhaps to develop a special material for experiments.

This can keep the secret to a certain extent. The core research plan and progress are only known to the core team and the Presbyterian Association led by him.

Of course, each job will not only be distributed to a certain cooperative unit. Usually, it will be distributed to several relevant units with the highest technical level in the country at the same time. Whoever comes up with the right results first and who harvests the biggest fruits, This is similar to commercial bidding.

This specific split research plan and the assignment of research tasks are completed by the relevant staff of the project's core team, but Lu Qiujiang also needs to have an understanding of the strength of these cooperative units in order to better carry out overall management.

Quickly completed the electronic file in units of g. Lu Qiujiang has imprinted the information of these cooperative units in his mind; but these are only the data on paper! Some important cooperative units must also go and see for themselves, Lu Qiujiang thought about rubbing his temples.

But this is far from the biggest difficulty he is facing. Even the most important ignition and restraint problems of controlled nuclear fusion cannot be regarded as the most headaches for him. What he is most worried about now is what the opposition forces within China will take. Means to prevent him from successfully completing the plan.

Chapter 428 - Opposition forces (22/23)

If controlled nuclear fusion succeeds, it will bring inexhaustible clean energy to China, which at first glance seems to be a good thing for the benefit of the people! There is no need for China to endure foreign constraints on oil. The sky in major cities will gradually return to blue, and young people will not need to postpone their car purchase plans due to oil prices. ∈ ♀

However, everything has two sides. People often lose other things when they get something. Since controlled nuclear fusion has completely solved the energy problem, how should the existing energy industry practitioners deal with it?

As of last year (cough, actually 15 years of data provided by book friends), there are more than 1 million employees in thermal power production across the country, and the remaining enterprises and institutions do not count their own thermal power plants; the total number of gas stations in the country is about 95,000 , About 500,000 employees, excluding those who sell oil sporadically; about 7 million coal employees nationwide, excluding those that are privately exploited; and about 5 million employees in the petroleum industry, excluding pharmaceuticals, plastics, etc. Derivative industries, these only refer to direct practitioners, plus more employees in affiliated industries.

The total number of people above is close to 14 million people. If you count them as a family based on a family of four, 56 million people will face a sharp decline in the quality of family life because of the success of Xi and the plan. Danger; this is almost equivalent to the population of the whole country!

Now that the aftermath of the layoffs in the 1990s is not over, Lu Qiuqian deeply remembers the anger and helplessness that broke out when the factory where his parents were facing the layoff crisis. I vowed to stop this kind of tragedy from happening again through my own efforts. I never expected to smash the rice bowl of tens of millions of people at once.

At that time, the number of laid-offs was about 5-6 million a year, and the most five years had laid off more than 30 million employees; in order to solve these problems, the Chinese government has made every effort to this day. The negative effects are still not resolved. The word laid off will be the pain of many families throughout their lives.

Admittedly, the preparation time for the Chinese government is still very long. Seniors can do all preparations according to Lu Qiuqian's planned progress, such as controlling the development scale of the traditional energy industry, re-finding employment opportunities for related industry practitioners, etc. .

Even if the staff of the gas station is changed to the power station and the employees of the thermal power plant are changed to the nuclear power plant, this will certainly not solve the work of all

employees in the old energy industry, because the human resources required by the nuclear power industry and the traditional energy industry are not Similarly, millions of employees will lose their jobs because they cannot adapt to this change.

Of course, these people have no effect on Lv Qiujian at least now, because they certainly have no way of knowing how much change Xi and plans will bring to their lives; but some people are different. When they were laid off in state-owned enterprises, those who had great energy saw that they could get some opportunities, and naturally they would not oppose the government's behavior.

But now, if Xi and the plan are really successful, they will definitely lose many, many things, which they will not be happy to see, and these people have great energy, they will not sit back and watch Lu Qiujian's experiment Successful, but also able to interfere with Lu Qiujian's experiment plan.

Of course, these people are mainly the leaders in the traditional energy industry, in addition to some people in other fields. It is not only the energy industry that is affected by the government's introduction of the Xihe plan. The government's annual budget is so much. The funds for the Xihe plan are more, and the funds in other fields are naturally less. Departments that have been cut spending will of course attribute their grievances to Xi and the plan.

Therefore, at the previous conference, Xi and the plan were very difficult to pass after many rounds of discussion. The number of votes against this plan almost created a new historical record for China; The media have started to discuss this, and there are also quite a lot of doubts on the Internet. Is the space exploration program really the most urgent task of China at present? Wouldn't the Chinese Congress decline due to Xi and the plan, just like the Red Empire that was dragged down by the Star Wars plan?

Fortunately, the political system in China determines that as long as the upper levels are confident, even if it is difficult, they will continue to carry out what they believe will be carried on; whether this system is good or not will be ignored. At least it is good for Lu Qiujian to realize his plan.

Of course, the premise of all this is that Lu Qiujian can fulfill his promise to the Presbyterian Church as scheduled according to the blueprint he planned. During the period of a little difference, he will be crushed by the opposition forces, and those opposition forces that are temporarily dormant are also Think so.

Moreover, dormancy does not mean to sit idly by, and within their ability, they still do n't mind making small, insignificant troubles that are enough to affect the progress of the project for Lu Qiujian; for example, the core personnel of a cooperative institution suddenly get A job-hopping opportunity that can improve his position and salary, so he left cheerfully led to a delay in the

progress of a small plan; for example, market fluctuations caused the price of a certain consumable required by the plan to increase, thereby increasing the project budget and so on.

And these small problems need to be resolved by the project team members themselves, is not a nanny for you. How can you control such a big plan if you can't solve these small things?

And now these things have appeared some signs, the delay of the delivery time of the atomic clock is just one of the trivial things, but this also attracted the attention of Lu Qiuqian, he regarded this matter as a test of opposition forces Then there must be more means waiting for him.

Hey, the trouble I have now is much more serious than that of Groves and Oppenheimer, who hosted the protection of Manhattan in those days! What they have to face is the other departments that are seeking financial appropriation and the power of the hostile country. At least in the top level of the United States, most people support the Manhattan plan, and they have to steal the appropriation and the old energy with him. The two forces represented by the group are fighting at the same time.

However, when I first formulated this plan, I already considered this kind of difficulty. If you think that I am just a scientist who has been measured, it would be wrong! Lu Qiuqian smiled slightly, if you use unconventional means to deal with me, then I will use more unconventional means to return, both domestic and foreign forces are the same!

Chapter 429 - Should scientists be poor?

“How did the contract provide for delayed delivery?” Lu Qiuqian asked Li Yan who had just checked the atomic clock. He was not sure if the delay was against the test of power, but in order to avoid such situations in the future, this Never do nothing at one time. ※%

“The contract said that the delay time was still within reasonable fluctuations within three days, and there was no punishment.” Li Yan replied with a shrug. This action reminded him of whether he was a white man.

“This means that the other party is not in breach of contract?” Lu Qiuqian knocked on the table depressedly and asked unwillingly, “What about our payment time? How is the contract agreed?”

“The contract divides the payment into three parts. The first part is the prepayment, which is hit into the other party's account after the contract is signed; the second one is hit into the other party's account within one week after product delivery, inspection and acceptance. ; The last sum is a deposit, which needs to be used for one year after the atomic clock is used, and no major failures will be paid to the other party! “Li Yan remembers the terms of the contract very clearly.

“Then the card will pay them before the contractual deadline!” Since the other party’s means are within the scope of the contract, then Lu Qiuqian also returned it in the same way, hoping that those cooperative units can be clear. Comprehend what you mean, and do n’t see a similar situation again.

“There will be similar cooperation in the future. The terms of the contract may be more stringent. It is still in the early stage of preparation. The time requirements are still relaxed. If such a situation occurs again when the experiment is carried out until it is urgent, our losses will be lost. But it’s big! “After resolving the matter in front of him, Lu Qiuqian didn’t forget to make up for it.

“Okay, I’m already preparing these!” Li Yan was not surprised. He has extensive experience in this area and knows what to do.

Seeing that the matter was over, he meant that he had not left yet. Lu Qiuqian asked, “Is there anything else I need to solve?”

“This is the case. Our department recently planned to introduce a talented person who is a Ph.D. student at MIT and has excellent professional skills. My colleagues and I hope that he can join our team!” Li Yan While reporting, handed over the man’s resume.

“Aren’t you the only one who can decide these things?” Lu Qiuqian asked, wondering. The members of the core team asked him to review them one by one, but the people in each group should be reviewed by their own department heads. What does Li Yan tell me now?

After asking Lu Qiuqian to open his resume, hey, or alumni! Lu Qiuqian saw the resume of this young scientist named Li Long dazzling and went to Miguang after graduating from the Physics Department of Beijing Normal University. After entering the Massachusetts Institute of Technology to follow the authoritative Daniel in the plasma field for further study, when he participated in the annual meeting of the Plasma Physics Branch last year, he was also invited to give a special report. After receiving his doctorate, he chose to return to China like Lu Qiuqian. .

The Plasma Physics Branch is considered to be the larger one in the physics branch of the United States. Many of the characters in the meeting are the core members of the National Ignition Device of the United States. It has been proved that they can obtain their recognition and obtain the opportunity to report at the annual meeting. Li Long is at the level of the field.

“Such a talent must definitely stay!” Lu Qiuqian said enthusiastically, he even wanted to let him serve as an assistant in plasma after a period of training.

“But when I called him to report, he told me that he had found a job!” Li Yan shook his head helplessly.

“Oh? Where did I go? The East Research Center in Anhui Province? Hua Guo Academy of Sciences?” Lu Qiuqian guessed his whereabouts. “It’s okay, tell me his unit, I’ll go find their leaders.”

“No, he went to a financial company!” Li Yan’s answer was somewhat beyond Lu Qiuqian’s expectations.

“Huh? Why?” Lu Qiuqian asked wonderingly. This Dr. Li Long clearly has a bright future in science, but why did he give up? Would n’t it be good to go to Wall Street if I went to a financial company? Why go home?

“Because of the salary!” Li Yan replied depressively, “He said during the interview that he knows that there is a big gap between the domestic research environment and the country. But as long as we can give him an annual salary of 120,000, he will Willing to stay; but you know, our salary standard does not reach this number; and his annual salary to this financial company is 400,000. I think this is the biggest reason why he made this decision! “

“This is indeed a problem!” Lu Qiuqian leaned on the chair in distress, rubbing his temples with his right hand. He took over Xi and planned for a short time. There are many systems that continue to continue the past practice in the field of research in China. The salary package is the same.

In today’s media campaigns, people like to give respectable scientists some praises such as devotion to poverty, hard work and frugality, as if they don’t need money at all, so when Lu Qiuqian took over from the court interview last time They would be so surprised when they saw the millions of bicycles This propaganda model has a certain historical origin. In the early years, the poor countries could not afford scientists too much material rewards, so they had to use Spiritual rewards were replaced, but when the economy came up, this model was continued; except for the Huaguo Technology Recognition Conference, which increased the bonuses, the material rewards did not increase much.

The result of this propaganda is that the vast majority of people regard poverty as the label of a successful scientist. Lu Qiuqian feels that this view is extremely inappropriate! Why should scientists be willing to be poor? I am busy with experiments, busy with writing papers, and having no time to spend money is my business, but you must not think that scientists do not need to eat human fireworks!

Lv Qiuqian remembers that after Yuan Lao won the highest national science and technology award in China, because of the five million yuan bonus, it caused a huge controversy in the society until people saw Yuan Lao on the TV after receiving this bonus. Still maintaining a simple style, he satisfactorily stopped the debate, and pretended to say admiringly, look, this is the real scientist ...

Isn't Yuan Lao's achievement worth the five million reward? In Lu Qiuqian's opinion, even if he was given five hundred million, it wouldn't be too much. Moreover, 4.5 million of these five million were for his scientific research. As for rewarding him personally, it was only half a million; fifty Ten thousand yuan, there are many enterprise executives in the capital that have much more year-end awards than this.

"You call him, and I will talk to him about a certain time!" Lu Qiuqian thought for a moment, then straightened and said.

#### Chapter 430 - Salary reform

The cafe on the third floor of the Grade A office building has simple and elegant decoration. The decorations on the walls and the small decorations on the table are all handmade products collected from all over the world. It can be seen that the boss is a stylish person. People, they spent a lot of thought and money on the layout of the cafe. ↑

The environment here is elegant, and the people who come and go are all high-income gold-collar workers, so the price of coffee is also quite expensive, which makes Li Yan, who is accustomed to hard work and frugality, a little uncomfortable. After reading the menu for a long time, I only asked the waiter to ask A free glass of lemonade.

High-end cafes naturally provide high-end services. The waiters here have been trained many times before they go to work, so they did not show disdain because of Li Yan's frugality and plain clothes. They still smiled and quit to prepare drinks for them. went.

"At that time, our project department should also have such a place to relax, but we do n't need to make all of this closed small box, we should divide another area to make an open communication place for the staff of the project department to come A collision of ideas! "Since it is now outside, Lu Qiuqian replaced the base with the project department.

"Like Princeton's tea room?" Li Yan did not object to Lv Qiuqian's suggestion, "a large space has been reserved in the plan for leisure and entertainment, I think it can fully meet your needs."

“In addition, we also need a fitness hall, an electronic game hall, a small movie theater, and a roller skating rink, billiards room, etc.!” Lu Qiuqian smiled, “The project department is away from the city of Chang’an. There is still a distance, they are inconvenient to go in and out, you have to provide some dating places for young people in the project department!”

“Hah, no wonder when you were setting the recruitment standards, you asked the clerical staff to give priority to women under the same conditions! It turns out that you have already thought of this!” Li Yan and Lu Qiuqian discussed the planning of the base. One side looked at the door from time to time. Fifteen minutes have passed since the agreed time, why hasn’t Li Long yet come.

“Don’t worry, overtime in the financial industry is normal. Even a billionaire like Simmons is no exception, not to mention his newcomer!” Lu Qiuqian persuaded, and the two continued to discuss what to do in the base. What supporting facilities come.

Another half hour passed. Li Long, who was in a hurry, appeared at the door of the cafe. Li Yan quickly got up and greeted him; Lu Qiuqian observed his senior, and saw that he was ordinary, but his eyes were extraordinarily smart, wearing a temporary suit. The new Armani suit, shirt and tie are also the same brand. From this point, it can basically be judged that this is his first high-level formal suit, which also makes Lu Qiuqian understand why he values the salary so much; after sitting down, he gasped. Two greasy breaths calmed down, and I thought I might have just run down the stairs.

“I’m sorry. Professor Lu and Li Gong, I’m late!” Li Long didn’t explain too much about his reason for coming late and formally apologized to them.

“It doesn’t matter, I also know the working style of the financial industry!” Since he couldn’t wait for the elevator and ran downstairs, it can be seen that he still attached great importance to this opportunity, plus he didn’t find a reason for his lateness. Character, Lu Qiuqian quickly improved his favor to him.

“Seniors haven’t eaten yet? Order to fill up your stomach, and then we will talk!” Lu Qiuqian took the menu and handed it over. It’s almost eight o’clock now, and he must be hungry. “We haven’t eaten yet, just happened to order together!”

Li Long was not too restrained. He generously ordered a set meal. Lu Qiuqian and Li Yan also ordered something they liked; when they ordered something, Lu Qiuqian found an interesting thing. He and Li Long were two Chinese. Ordering steak, Li Yan, a white man, ordered a rice set meal.

“Hey. I think it’s too awkward to use a knife and fork. I can’t learn anything, or use chopsticks at ease!” Li Yan explained, looking at them curiously.

Li Long couldn't help but laughed out loud, and it is really rare to use chopsticks to be more skillful than white people with knives and forks! Laughter is the best way to bring people closer together. This episode makes the slightly serious atmosphere between the three disappear. By the time they finished eating, the three had already started talking and laughing.

Li Long also frankly explained to Lu Qiuqian the reason why he was entangled in salary, "Well, I grew up in rural areas, and it was not easy for me to provide my family with college at home. Although I went to Beijing Normal University to pay with student loans and work-study Tuition, supporting myself, but at such an old age it is not always a problem for the two old people to suffer at home! "

"So, I only put forward such conditions during the interview. I really like doing research! So I do n't expect the salary you give me to make a home in Beijing, but my parents are older, if they are physically If something goes wrong, you have to let me bear their medical expenses? "

"It doesn't matter much if I suffer a little bit myself, but my parents have worked hard all their lives. In my later years, I can't make them feel more comfortable It's just too much to say! So I'm only here Company work! "Li Long said frankly to Lu Qiuqian, his eyes faintly shining with some expectation.

"The doctorate of the world's top universities, proficient in English, French, German, Russian, Japanese and five foreign languages, there are not many people with this ability for 400,000 a year!" Lu Qiuqian also said sincerely, "even if it is our alma mater Fresh students, it takes 120,000 a year to go out to find work, and some companies want it! "

"But, you also know our current system, according to the previous regulations, Engineer Li can't really make this decision! And our situation does not meet the requirements of the Yangtze Scholars Program and the Hundred Talents Program. As for the Outstanding Young Scholars Science Fund Sponsorship is for research funding, not for personal remuneration! That 's why you let the seniors run for nothing! "Lu Qiuqian said after an explanation." But I still have some power in Xihe plan. I also think that you are fully worthy of this salary, so I would like to ask, if the salary meets your requirements, are you willing to resign to join our team? "

"Of course, we will definitely make up for your current salary. All I can give you is half of it now, which is 200,000 a year! If the project goes well, there are still some bonuses! The bonus that the company may receive is comparable! "After talking, Lu Qiuqian looked at him quietly.

“Personally, I am very willing to continue scientific research work! But now there is another very serious problem!” Li Long said.
