Chapter 431 - Liquidated damages (23/23)

“When I signed a contract with this company at the time, I signed a three-year contract. If the contract is cancelled in advance, the penalty will be paid, and the penalty will be three times the signature fee!” Li Long felt very sorry, if Lu Qiujian came a week early, There will be no such trouble, but now he has been **** by the contract.

“You just joined the job, should it be considered a trial period? Isn’t it possible to leave the trial period yourself?” Lu Qiujian also frowned.

“I don’t have a probation period. I just signed a formal contract!” At the end of the interview, this was his pride, but now it has become a burden.

Yeah, of course, such excellent talents do not need to be restricted by the probation period. Li Yan could n’t help but interjected and asked, “How much did he pay for the signing fee when he signed the contract?”

“Signature fee is 100,000, that is to say, if I want to cancel the contract now, I have to pay 300,000 in compensation!” Not to mention 300,000, even 100,000 Li Long can’t take it out now, the money just got him. I paid 50,000 to my family, and the rest of the renting house and clothing were almost the same.

“One hundred thousand yuan!” Li Yan couldn’t help but slap, really making money in finance! People signing a word is almost higher than his one-year income!

This amount of money is not a problem for Lu Qiujian, but he has no reason to pay Li Long’s liquidated damages, and Xi and the planned property will not agree with this fee, even if he lent it to Li Long himself and then let him use it later. Wage repayment in installments is not appropriate or the company that convinced Li Long.

“What is the background of the company you are working for now? Do you think there are other ways to solve this problem?” Lu Qiujian asked.

“This company is a branch of a small company on Wall Street in China, and has close contacts with the embassy of the United States. If you want to find a way from other aspects, I am afraid it will

not be easy to solve!” Li Long thought that Lu Qiuqian wanted to use official influence. Tested the company and quickly persuaded.

“A company on Wall Street?” Lu Qiuqian really thought about this method. If a domestic company finds a representative from the official to make peace, it is sure that the other party will give him this face, but the foreign company is not the same. It seems that there are other ways to think about it, “Which Wall Street company’s name is it? What is the character of your boss? Is it possible to negotiate a solution?”

“Our parent company is called the Carlson Fund, which is named after the surname of the founder of the company, Carlson. He is a graduate of the Mathematics Department of the State University of New York at Stony Brook and earned the first pot of gold by relying on a set of algorithms he researched. This created the company! The owner of the Beijing subsidiary was Mr. Myers, Carlson’s early partner. Mr. Myers was rigorous and valued the contract very much. It might not be easy to persuade him!” Li Long is not very optimistic about this matter. Can be resolved peacefully.

“It’s okay, things are all talked about!” Lu Qiuqian seemed to have an idea. “It’s a little late today. Tomorrow you can see if you can ask Mr. Miles to talk.”

“I’ll give it a try! If there is news, I will call you immediately!” Li Long is not very confident. But for his own dream of scientific research, he was still willing to try, even if he was scolded by his boss.

Wait for your news! “Lv Qiuqian and Li Long exchanged business cards, and then they chatted for a while about professional issues in plasma.

Speaking of professional issues, Li Long suddenly became energetic, and the tiredness of working overtime was swept away. He and Lu Qiuqian discussed the latest research results of major institutions in the world.

This chat lasted for more than two hours. All the guests in the coffee shop had run out, and Li Long reluctantly said goodbye to Lu Qiuqian. When he came out, he asked about Li Long’s residence. It is not far from here. Lu Qiuqian stopped by the car and took him to his home.

After coming to sleep, Xia Xiao fell asleep, Lv Qiuqian searched the information of the Carlson Fund online, and it took another hour before he slowly slept in the bedroom.

Things seem to be going very smoothly, and Mr. Miles, who is rigorous in Li Longkou, accepted Lu Qiuqian's invitation happily. The two parties agreed to meet in the evening, and the place was still the cafe.

"I didn't expect that the first time I saw the Fields Medal winner was in China!" Myers' first sentence revealed the true reason for his appointment.

"That's probably because your work is too busy! If you have time to go to Princeton, there are Fields Award winners everywhere!" From Wall Street to Princeton is not far away.

"But they won't like financial industry practitioners like me. They always complain that Wall Street has taken too many math geniuses!" Myers is not as serious as Li Long said!

It seems that because the treatment can't keep up with leaving the scientific research field, it's not just born in China! However, the salary of scientific research personnel in the United States can basically meet their living expenses incurred in their maintenance, and China cannot.

The chat between the two parties was very pleasant at the beginning, but when Lu Qiuqian talked about Li Long's problem, Miles regained his character as a businessman. "Professor Lu, I understand the importance of a genius for scientific research! But I understand how much profit a genius creates in the financial market! I cherish Li's smart brain as much as you do!"

"So you are not going to let him go?" Lu Qiuqian wondered what conditions he would make.

"The contract is a contract. Since Li signed the contract and received the signing fee, he should work for the company for three years in accordance with the contract for a long time! Of course, he can leave if he wants, and he only needs to pay 300,000 breach of contract damages! I want to follow He will soon be able to make up the figure for Li's ability!" Myers replied with his hands spread out.

"We all know that time is equally valuable for scientific research and financial markets! At the same time, I think there must be other ways for you to cancel this contract!" Lu Qiuqian looked into his eyes.

Myers lowered his head to avoid Lu Qiuqian's gaze. The coffee spoon stirred in the quilt for a moment, it seemed to be judging how much Lu Qiu Jianken paid for Li Long. Looking up, "Professor Lu, you are one of the best mathematicians in the world. I think you also understand the importance of mathematics to finance!"

“Yes, I know very well!” He and Patrice and Harvard’s Norman trio were really happy in the financial market.

“Then I will just say it! As long as you are willing to help us a little bit in mathematics, then I will be happy to return Mr. Li ’s contract to him. Not only does he not have to pay a penalty, he can keep his signature fee himself ! “Myers set out his own conditions!

Chapter 432 - Call still works

To be honest, Myers was a little uncomfortable when he said this. If in the United States, he could not have taken the liberty to make such a request to a Fields Medal winner, but his good life in China has been a long time, and he is used to it. He was flattered by others’ compliments on him. \geq

Furthermore, even if Lu Qiujian refused his request, he would have no losses. Li Long will either pay a liquidated damages or continue to work for himself to create profits, no matter how he calculates he will not lose money.

To be honest, Lu Qiujian helped his company deal with some small problems, whether it is optimizing algorithms or analyzing a competitor, it is not difficult and takes little time, but these are under the premise of his own willingness , And now Myers’ request made him feel uncomfortable.

“Oh, if you ask me to do this, the price will not be enough!” Lu Qiujian smiled plainly, and picked up the tea cup for a fine taste.

“Oh? What conditions do you want to say, our company still has a certain strength!” Myers opened his eyes and thought that Lu Qiujian just wanted to get a higher salary.

“Forget it, I think I’d better make a phone call. I’m sorry, Mr. Miles, I’ll be out of company first!” Said Lu Qiujian to put down the tea cup and walked out.

“Li! Do all of you Chinese like this?” If the business didn’t succeed, Miles wouldn’t be happy. He spread the depression on Li Long and said to him with a lesson tone, “You Chinese always love Speaking of relationships, when you encounter problems, you do n’t want to solve them through your own efforts, but pin your hopes on the illusory relationship. This is an incorrect choice! “

“Perhaps Professor Lu has a huge influence in China, but I will not succumb! No matter which senior official he hires to be a lobbyist! I will not give up my own interests!” I am proud of my country, “You have been in the country for so long, you should also know that in the country,

business is business, and we are always concerned about how to create higher profits for shareholders. Not because of someone's Relationship damages the interests of shareholders! "

I am not uncommon in the United States when others use relationships to do things! If it was not my white classmate who relied on his father's relationship to take my place in the laboratory, how could I return to China so early? Li Long secretly slandered, and at the same time he was puzzled by Lv Qiujian's method. Yesterday, he already told Lv Qiujian that Miles and the Embassy of the United States are close to each other. Finding someone through the official channel is not a good solution. .

It did n't take long for Lu Qiujian to return with a smile, and Myers greeted Lu Qiujian's return with an exaggerated smile. "Professor Lu, I'm curious who will receive the call in a while? It is Hua Guo Finance Co., Ltd. One of the directors or a director of the Ministry of Foreign Affairs? "

He shook his index finger like Uncle Mu. I started to show off my background. "I haven't been in China for a day or two. What kind of calls haven't been answered? At the dinner hosted by the American Embassy, we talked with your senior officials, young people, Don't think about the problem too simply! "

"Let's wait and see!" Lu Qiujian's smile was missing, looking at the exaggerated expression of Myers like a monkey at the zoo.

"I don't think it's necessary to wait any longer! I have hundreds of thousands of dollars in business transactions per minute, but there is not much time to waste!" He said he was going to get up and leave, at this time he did not forget to stimulate Lu Qiujian, "Li is a very good employee. I look forward to him creating more profits for me!"

Not waiting for Lu Qiujian to refute, Myers's phone rang, Li Long's eyes lit up, looking forward to watching Myers' expression change; Myers' face was slightly nervous. Only a few minutes after Lu Qiujian went out, he received the phone call himself. This influence was somewhat beyond his expectations.

But when he saw the call, he smiled again, "It disappointed you. It's Carlson's call, not a big man in China that you were expecting! Well, I'm going to answer the phone. Lee, let's go! I I don't think we will come back here again! "

"I think you'd better pick it up here, lest you have to run back again later!" Lu Qiujian's smile on his face grew stronger.

Myers shrugged and pressed the answer button. The smile on Lu Qiuqian's face really disgusted him. He wanted to see Lu Qiuqian's disappointed expression. "Hello, Carlson, you shouldn't be at this time. Is the New York Stock Exchange busy? How can I have time to call me?"

"Listen, Myers! Are you now with Professor Lu Qiuqian? That mathematician who won the Fields Medal last year!" A harsh voice came across the phone!

"Yes! Carlson, he is discussing with me the question of my new employee going to stay!" The smile on Myers' face suddenly froze! Who did Lu Qiuqian just call? President of the United States? Why did you call your big boss so quickly?

"I already know about this matter, you immediately cancel the contract with that employee and let him leave!" Waiting for Miles to finish talking, there was no way to issue an order over there.

"But ... but Li is a very good employee. He will create high profits for you!" Myers reluctantly distinguished, "And, it is he who offered to terminate the contract. Out, he has not paid the penalty yet!"

"I am the boss, and I care more about my profits than you!" Carlson retorted mercilessly. "The issue of liquidated damages does not need to be considered! Now I will give you half an hour to solve this problem! Half I will call again in an hour, and then I do not want to hear that you have not done it yet!"

"Yes! Yes! I'll do it now!" Myers' face is now very ugly.

"Also, apologize to Professor Lu!" The other side hung up.

Miles stood stiffly and stood there embarrassedly, only half a day before squeezing a smile, "I'm sorry, Professor Lu, I think I underestimated your influence! I'll go and do his resignation for Mr. Li formalities!"

"Are you saying that you will not succumb to any relationship?" Lu Qiuqian looked at him with a sneer! Just now Miles taught Li Long what he heard clearly.

"I didn't expect you to affect my big boss at all!" Myers' ability is still relatively strong, and he admits his mistakes.

“Look, as you said, I am one of the best mathematicians in the world. You should understand the importance of mathematics to finance!” Lu Qiuqian returned what he just said.

Chapter 433 - 0 people plan

“Well, no matter who puts pressure on my boss through whom, I will handle the resignation procedures for Lee!” Myers raised his hand and surrendered. “Wait here for a moment, I will take his Get the contract! “

After Miles left, Li Long looked like he was talking; Lv Qiuqian said with a smile, “You can ask anything you want, isn’t it awkward?”

“Professor Lu, who are you looking for?” Li Long asked the same curious question of Miles. He also wanted to know who could make the big boss of Miles call so quickly. △

“Simmons of the Renaissance Company, he was the dean of the School of Mathematics at the State University of New York at Stony Brook. I think Mr. Carlson might have known him and called to try it in the past!” Carlson was in New York State University of Stony Brook has read books, even if he is not sure that Simmons was still at Stony Brook at that time, but since Carlson was talking about life on Wall Street, he would not have thought of contacting this Wall Street gangster and the front of the School of Mathematics at Stony Brook Dean.

This matter is very important to Li Long, but for financial tycoons such as Simmons, it is at most a sentence. He is even embarrassed to ask Lu Qiuqian to be humane.

“Lee, you are really my lucky star. It was my wisest decision to hire you!” Myers smiled again when he came down, apparently when he went upstairs to get the documents New York contacted them and it seemed to be good news.

“Professor Lu, if you said earlier that you know Mr. Simmons, I would definitely not be like that!” Miles’s tone was more respectful, and even a bit flattered.

“It’s my fault, I always thought that Mr. Miles was a person who would not succumb to any relationship!” His predecessor’s appearance was particularly interesting.

“The so-called principle has always required a high price to be violated.” Mr. Myers was not embarrassed, he said with a shrug, “It is clear that the invitation letter for Mr. Simmons’ private dinner is worthy of my violation of my principle.”

It turns out that for entrepreneurs like Carlson, they have the opportunity to reach the top circles on Wall Street and are willing to pay a big price. Moreover, he only needs to cancel the contract of an ordinary employee.

Myles and Li Long slammed through the cancellation procedures. Myers signed his name on the document and said, "As for the issue of the signing fee, Mr. Carlson said it 's okay ..."

"No!" Lu Qiujian didn't want to have too much relationship with him, took out the checkbook and filled it with a digital signature and handed it to Myers, "I paid for Li Long!"

The matter was resolved, Lv Qiujian also had no intention of chatting with him, took Li Long to leave and walked out of the cafe, leaving Miles alone.

"Professor Lu, I will give you back 100,000 yuan!" After going downstairs. Li Long gratefully said that in this company, he may make a lot of money, but he can no longer get the kind of happiness that he can experience in scientific research; now Lu Qiujian has given him a return to scientific research. The opportunities in the field and the salary also make him particularly satisfied, how can Li Long not be grateful!

"Don't worry, give you a few days to deal with personal affairs, go to Li Yan to report next Monday!" Lv Qiujian

"I have nothing to deal with, go to the company tomorrow morning to pack up my personal belongings. Then settle the salary, and I can report it in the afternoon!" Li Long couldn't wait.

"You don't need to hurry, take a good rest for two days, and adjust your state!" As she said, she drove the car back to his residence.

Lv Qiu Jian originally thought that he would report to the base after two days according to his orders. Unexpectedly, he appeared in the base the next afternoon. When asked, Li Long said eloquently that he had not been in contact with research for two months, so he had to hurry up and make up.

His own work is arranged by Li Yan. Lv Qiujian didn't need to bother, after Li Long left from his office, Lv Qiujian leaned back on the chair. Thinking about the whole story.

It can be expected that with the expansion of the project team, there will be many people like Li Long who cannot join the team because of economic reasons. If they want to solve the problems one by one, then they do not have to do other work.

You can use the case of Li Long to formulate a special system for breakthroughs. It is still difficult to improve the overall treatment of scientific researchers, but you can first increase the treatment of some core personnel. For those important areas that are capable of making key breakthroughs Of strategic talents and leading figures, the state has an obligation to solve their worries for them, so that they can devote their precious energy to scientific research.

Lv Qiujian remembered a plan for the introduction of senior talents that will be launched next year-the Thousand Talents Program. This plan is mainly aimed at overseas high-level talents, with generous treatment and sufficient research funds to attract them to return to China for scientific research, and Good results have been achieved in the following period.

Since the government will introduce such a policy, it shows that the government is relatively recognized for enjoying high treatment for high-level talents! But the Thousand Talents Program has its own limitations.

He only aimed at high-level talents from overseas which did not benefit the senior talents in China, which is obviously unfair; there is such a case. Metal Research Institute, do you need senior talent in this field?

The staff of the research institution looked at each other. Isn't the world's top talent in this field just in this institute? We represent the world's most advanced level in this field, and we still need outsiders!

However, the higher-level unit still found an associate professor from the United States with a policy of not using it in vain. When he arrived at this research institution, the local researchers of the research institution looked at this person with less than one-third of his ability. People pay ten times as much as they don't know what it feels like in their hearts.

What Lu Qiujian intends to submit to the superior is a revised version of the Thousand Talents Plan, which lists the talent needs of the major areas of the Xihe Plan, whether they come from home or abroad, as long as they can achieve The requirements required for the position, then you can enjoy the salary and treatment that meets its value.

Lu Qiuqian also formulated a solution to the problems of audit confusion exposed during the implementation of the 1,000-person plan, and the introduction of talents who could not concentrate on full-time domestic work.

It took three days to sort out the report. Lu Qiuqian submitted it to him through Ke Xianlong, and then quietly awaited the reply of the superior.

Chapter 434 - artificial intelligence

Senior executives need to investigate, discuss, and review this plan, which will take time. Obviously, it will not be able to produce results overnight. During this time, Lu Qiuqian continued to carry out another important work.

The Xihe plan requires the cooperation of hundreds of universities, research institutes, and thousands of companies. This involves a wide range of fields and complicated affairs. There are countless things to report to him every day. If he depends on his personal ability to solve it, he Even incarnation of three heads and six arms like Nezha is not enough.

To solve this problem, on the one hand, it is necessary to configure a number of assistants for yourself. When the matter comes, the assistants first review it, excluding those who have obvious errors, others can solve, and the wrong delivery department does not need to be personally solved by Lu Qiuqian. After waiting, let him deal with it.

On the other hand, Lu Qiuqian is now working on something. He needs to use artificial intelligence to deal with some routine, clear rules can refer to things.

Speaking of artificial intelligence, people will feel very deep, but this is not the case, and now artificial intelligence has penetrated into every corner of people's lives.

The academic community divides artificial intelligence into three levels, weak artificial intelligence, strong artificial intelligence and super artificial intelligence; weak artificial intelligence is artificial intelligence that is good at a single aspect, such as the computer deep blue that defeated Kasparov ten years ago, It will only play chess, and if you let it play mahjong, it will kneel.

Strong artificial intelligence refers to artificial intelligence that can compete with humans in every aspect, and it can do all the brainpower that humans can do. Super artificial intelligence is defined as being smarter than the smartest human brain in almost all fields, including scientific innovation, general knowledge, and social skills; it can be better than humans in every aspect, or it can be better than humans in every aspect. Trillion times stronger.

Among them, weak artificial intelligence has been widely used, such as the anti-lock brake system of the car, which can sense the changes in the environment of the car and make corresponding countermeasures; for example, when you are online, product recommendations from various e-commerce sites, social networking sites Friends' recommendations, etc., when you search Durex, in addition to a list of products, the website also pops up a link to Ma Fulong. This is a simple application of artificial intelligence.

While strong artificial intelligence and super artificial intelligence still exist only in sci-fi and sci-fi movies, so people do n't have to worry about Skynet sending a nuclear bomb on a certain day to destroy humans.

Some things are very simple for humans, but very difficult for artificial intelligence, and some things are just the opposite; for example, reading the text in children's picture books. And to understand the meaning of those words, six-year-old children can do it, but Google spent billions of dollars. The computer has not yet mastered this ability.

Conversely, things that ordinary humans find very difficult, such as calculus, statistical analysis of large amounts of data, etc .; in the words of Turing Award winner Donald Gnutt, "Artificial intelligence has surpassed almost all areas that need to be considered Humans, but on things that humans and other animals can accomplish without thinking. It's still far away. "

To achieve strong artificial intelligence, you need a computer that runs faster, has more storage space, is more reliable, and lasts. It requires editability, upgradeability, and more possibilities. It can also be software for collective cooperation; from the current perspective The level of artificial intelligence can at most reach the level of ants, not even the birds.

However, in many fields, it is enough to reach the level of ants; Lv Qiujian's intention is to let artificial intelligence play the role of worker ants, and hand over those tasks that do not require too much imagination but require huge amounts of calculations. Go smart. And you only need to get the result.

Then meet this standard. Lu Qiujian must provide artificial intelligence with deep learning capabilities, a highly expandable internal structure, and strong data analysis and integration capabilities; these are the technical levels that humans have or will soon reach, and what Lu Qiujian needs to do is to find A new method of integration, thereby improving the ability of artificial intelligence.

Fortunately, the country has spared no effort to support Xi and the plan. In this base, there are several supercomputers of various levels, which gives Lu Qiujian the ability to realize his own ideas.

He used the authority granted by the base to control a supercomputer through his laptop, and then started this work with the computer team in the base.

In the field of artificial intelligence, China is actually not much behind the United States. It may be second only to the United States and Canada in the world, and it is on the same level as neon. Even ahead of individual countries in Europe.

Lu Qiujian's artificial intelligence team has leading talents from domestic strong artificial intelligence schools such as Jiangnan University, Jingcheng University of Aeronautics and Astronautics, Jinling University, Jingcheng University of Posts and Telecommunications, and Mingzhu Chinese University. That is only three to five years behind.

Now with the addition of Lu Qiujian, the team's work efficiency has rapidly improved. From moving to the base to carry out the project to the present, they have made important breakthroughs in certain fields.

When Lu Qiujian walked into the artificial intelligence laboratory, he just saw a large group of people looking around in front of the large display with relish. There were nineteen lines on the display, and several black and white chess pieces were scattered on the intersection of the lines.

Microsoft's artificial intelligence was tested with chess, so put it in China, naturally use the traditional intellectual game of China-Go!

It is much harder to make a computer a master of Go than a master of chess because it cannot be exhausted, because its search is too wide (the choice of each step is hundreds, not tens) and it is too deep (A game of chess has hundreds of steps instead of dozens of steps), but Lu Qiujian's team divided the board into several small pieces. Artificial intelligence only needs to calculate the variables of a small piece and then integrate it, so that the computing power is solved. The problem.

"What level do you estimate its chess power?" Lu Qiujian approached and asked.

"It's not easy to say, the business academician with the strongest chess in our base is also the amateur three. The business academician played a total of three chess games with us. The first victory, the second defeat, and the third defeat. According to the judges of the business

academicians, the player may have reached the level of a professional chess player in the last game! But it is not easy to say a few paragraphs! “Said Xie Ke, the head of the artificial intelligence team.

“Then either register an account on the Go website and let it try those professional players?” Lu Qiu Jian said, touching his chin.

Chapter 435 - Big chess

“Okay!” These people worked hard for several months, and now it’s finally time to test the results. As soon as Lu Qiu Jian’s voice fell off, he rushed to the computer and started registering an account online.

“Our current well-known online Go game websites are Yicheng Go, Jilang Go, Qingfeng Go, etc. Among them, Yicheng Go has the largest number of registered users and online users, and there are often many professional players. , Let’s register an account in Yicheng Go! “Xie Ke has done a lot of work in this aspect of Go during this time.

“Eh, what do you say this id nickname should be?” He was stuck at the first pass of registration.

“Called Wu Qingyuan! Sooner or later, our artificial intelligence level can reach the level of the first person in Go, what is this called?” Someone came up with an idea.

“It might as well be called Li Changhao, Mr. Wu is a past tense after all!” Some people refuted.

“To be honest, do these two names allow people to register!” Xie Ke glared at them.

“It would be better to call it Gu Shiyan! Or Wang Ji salary will do!” Some people came up with the names of two ancient Chinese players, and they still did not succeed under the solution test, and then tried Fan Xiping, Shi Xiangxia and other ancient Chess players still fail, these names have already been registered.

“Don’t stare at the ancient chess player! Our artificial intelligence is completely different from the ancient chess player! It would be nice to ask me to see the name black and white.” This is a fan of Jin Yong’s novels.

“If English is not good, how about English?” Someone came up with the name of Fujiwara Sato in “The Soul of Chess”, but these two good names have also been registered.

“Our artificial intelligence hasn’t reached the point of these people yet? It needs to be learned slowly. It’s not appropriate to have such a popular name from the beginning. It’s better to call it big **** if I want to see it!” Has passed the name.

The result of the efforts of the most high-end artificial intelligence talent in the entire country turned into a big chess **** and landed on the Yicheng Weiqi website and began to find opponents.

“Go and see which professional chess player is online? Let’s find him next game!” Xie Ke just got it done, and someone said impatiently.

“Don’t be funny, let’s see that our grade points win rate is all zero! Even if there are professional chess players, people will not take care of us!” Xie Ke scolded and looked back at Lu Qiuqian with a smile, “Professor Lu, Would you like to contact Huaguo Chess Academy? Have you found two professional chess players? “

“I only watched them on TV. I guess they are the same, they can’t be contacted!” In fact, if you want to contact to find a relationship, you can always get it. Improve the level! When the points level goes up, are you afraid to find a good opponent? “

“Just do it! Why should everyone do it? Just leave someone here to monitor, just call it if you encounter an abnormal situation!” Xie Ke set up the program and left the monitoring computer.

After a while, a netizen with a win rate of more than 30% and a level of 15k found a big chess slag, and the two sides started the first game.

“Huh, I’ve been stuck at 15k for a long time. The teacher couldn’t get the level because of the problem of winning rate. After more than half an hour, I finally got a rookie!” At the end of the computer, a middle-aged man said Clicked the button to start the game, and his smile froze after ten minutes.

“... This is too bad! This is the master who registered the vest to tease us!” In the middle game, there is no need to play this chess anymore. The middle-aged man chose the middle game depressedly Admit defeat, watching the falling victory rate again, crying without tears, trying to find a soft persimmon to pinch, but unexpectedly pinched a hedgehog.

The initial level of Yicheng Go is 18k, and its upgrade rule is that the unit is 10 rounds between 18k and 11k. You can advance one level by winning six matches, and two levels by eight games; 15

games are the unit between 10k and 1k, you can upgrade one level by winning ten matches, and two points by 14 games. level.

After completing this upgrade process, you can change to a new level, that is, from one stage to nine stages, the number of games and win rate required in this upgrade process is higher; unless special circumstances, as long as you reach the intermediate level, professional players Only consider playing against you.

Therefore, the big scum children's shoes also need to devastate some amateur rookies for a period of time to upgrade the level, in order to get the chance to compete with professional chess players.

Can imagine. At the beginning of this time, it was extremely boring. After watching it for a while, everyone dispersed, leaving only a staff member in front of the computer to watch the big chess scum bully the smelly chess basket.

The big chess ***** does not need to rest like human beings, he can score points online 24 hours. So the upgrade is fast, which has also attracted the attention of the staff of the Yicheng Weiqi website.

"Hey, look at this id, it hasn't been offline for more than 48 hours. I've been looking for someone to play chess, and it's still a total victory so far! Isn't it a plug-in?" The duty officer patted the colleague's shoulder.

"Look at me!" Colleagues checked the data in the background. "It's not like that. His game looks normal, and what is the use of plug-ins on our website? Can it help people win chess? There is no bonus even if they are up to nine stages!"

"Then what do you think is going on? Normal people can sit in front of the computer for so long Especially Go or high-intensity brain activity, who can hold it?" He asked.

"Perhaps it was the children of the chess school who had to unite to brush a nine-segment account?" The colleague gave a guess that sounded reliable.

"Would you like to look at his IP address?" If you find the IP address of the big chess slag, you can also determine his location, so that the colleagues' guesses can be verified.

“Well, check it out!” However, the results of the query made them even more confused. The IP address of the big chess ***** has been changing, from Beijing to the northwest border town, from China to Europe, and even Africa has visited several times.

Nima also plays Go in Africa? The level is still so high! Is this teasing me? ! The staff of the Yicheng website suddenly fell down.

“It seems that people don’t want us to check!” Nor did they check the violations of the big slag, the staff had to continue to monitor.

The big ***** has been upgraded rapidly all the way, and it quickly aroused widespread concern among Yicheng netizens. Several masters on the website rushed up unwillingly and were then hacked back by the big slag.

Until the third day, a ridiculous id on the Yicheng website entered the game room of the big chess slag. The netizens quickly entered the onlookers and looked forward to this dragon flying tiger can give the big chess ***** the first defeat.

Chapter 436 - Cut down professional chess players

Long Feihu ’s id is famous in Yicheng Weiqi (well, it ’s actually breeze). When he first made his debut, he quickly gained popularity. He lost only two games in more than a hundred battles, and one of them lost to the Korean profession. Liu Duan Mu Zhenshuo, but Long Feihu quickly defeated his opponent and pulled back.

Long Feihu’s glorious record has attracted the attention of the website law protector and professional master Luo Xiaozhu of Hua Guoqi Academy. He published the war book through the website, and Long Feihu readily accepted; just as chess fans have speculated that Long Feihu will be When they slaughtered, the results surprised them.

Long Feihu and Luo Xiaozhu had four consecutive battles in four stages, and all of them won in four battles. In the future, they will become the first Chinese country to beat the first person in the international competition finals, Li Changhao, nine stages, and Luo Xiaozhu, who won the Samsung Cup. It didn’t even win a game, which made the fans of the entire site collectively silent.

With this battle, Long Feihu became famous and established his position as the first person on his website. Chess fans looked around to see if Long Feihu was the national player, but no one had stood up to admit it.

Since then, Long Feihu's occasional appearance on the website will cause a large number of people to watch. Unfortunately, it has been a long time since I saw this id come online; today he appeared in the game room of the big chess slag, which made the original Chess fans have become very excited.

Someone who is good is calling this game a two-generation legendary match between the old and new websites. The result of this game will determine who is the real first person on the website! Did Long Feihu defend the honor, or did the big chess ***** later prevail? Thousands of chess fans put down the work at hand and waited for them to concentrate.

"It seems like a master!" Although the staff responsible for monitoring is not familiar with the history of the website and the origin of Long Feihu, the information in the chat room has already leaked everything, and he quickly greeted others.

"Let's take a look!" Xie Ke heard the sound and immediately went to the big screen, holding his arms to study the information of Qilong Feihu and the conversation in the chat room.

"I seem to have heard of this id. It is said that it may be Gu Li. Some people say that this is Nie Jiutuan or Ma Jiutuan, and some people say it is the collective account of the national junior team!"

"So it's very likely that those who are playing chess with the big ***** are professional players now?"

"From the point of view of her past record. Such a high win rate is not what ordinary amateurs can achieve! And his layout style is very professional!" The Go enthusiast replied.

"If this game can win, it will prove that our artificial intelligence level is already in the leading position in the world!" Xie Ke said with excitement. "After all, there are no cases in the world where computers have beaten professional Go players!"

"If it weren't for the ideas and algorithms provided by Professor Lu, we might not be able to reach the current level after several years of trial and error!" Seeing the big chess ***** formed a stalemate with Long Feihu in the situation. A staff member said with emotion.

No wonder that Microsoft Research will hire the Fields Medal winner Michael Friedman. It turns out that a distinguished mathematician has such an important role in the development of the computer field. Some people thought of another Phil who is so popular in the computer field. Award winner.

If Lu Qiujian hears his inner thoughts, I am afraid that even if Friedman comes, he will not be so proud of pushing their work so fast?

The game of Long Feihu and Big Chess is fast. It didn't take long for the game to enter the mid-game stage. From the perspective of the layman here, it seems that the big chess ***** is not in the disadvantage.

At the same time, in the dormitory of Hua Guoqi Academy, Ding Wei Ba Duan raised his head from the computer and leaned on the back of the chair to rub his temples. I wore a vest to challenge professional chess players online, but now I didn't expect it to be challenged.

Whose vest is this big chess piece? Gu Li? Zhou Heyang? Chang Hao or Kong Jie? Ding Wei went through several teammates in the chess school who loved to go online, but he didn't find a character who was similar in chess style and the big chess scum on the opposite side.

It's bad, just think about this. The game time was delayed by me! Ding Wei hurried back to the computer, he did not have an advantage in the situation, just a moment ago, there was not much time left for him, and the situation became more and more unfavorable under the hasty response. , He reluctantly chose to vote down.

Long Feihu's confession, the entire website suddenly exploded. This id has not lost chess before, but he lost all professional high-level players such as Mu Zhenshuo and Luo Xiaozhu. But what character is this big scum? Can you beat the first person on the site, Long Feihu? Netizens have been gossiping about the status of big chess pieces.

"Ding Wei, open the door!" Ding Wei, still depressed, heard the cry of his national teammate Zhou Heyang and had to put the game aside to open the door.

Zhou Heyang could not wait to walk to the computer as soon as he came in. "Your kid can lose a game online! Who is this opposite?" Long Feihu's identity is kept secret from outsiders Many people know that this is Ding Wei's vest.

"I don't know, if I ask people, I won't return any information!" Ding Wei pointed to the dialog box at the corner of the display. He asked the face several times, but the big ***** never responded.

“Let me play a game, let me see if he can see something from his chess style!” Before Ding Wei agreed, Zhou Heyang chose the game to start. Of course, the big **** over there will not refuse.

“Fuck, why don’t you use your own number!” Ding Wei, who was one step behind, was even more depressed. He was about to see Zhou Heyang’s game, and the knock on the door rang again.

“Brother Ding, did you just lose the game online? Who is the opposite?” Gu Li asked from the door crack, before Ding Wei answered him and took a glance at Zhou Heyang in front of the computer. “Yo, Zhou Brother started? I have to take a good look! “

Said that he took a chair and took a seat until Zhou Heyang looked carefully; yeah, all came one by one, do I have to charge a ticket?

Ding Wei today realized what it meant to be a proposition, then chess players such as Kong Jie and Chang Hao also poured into his dormitory, sitting behind Zhou Heyang and paying attention to the game.

It’s so easy that no one knocked on the door. Ding Wei had a lot of laps in the dormitory, leaning on, and the chairs were all taken out by you! Where should I sit? As a result, Ding Wei, the owner of this dormitory and the first professional chess player in history who lost to artificial intelligence, had to stand and watch chess.

Chapter 437 - who are you?

“Hey!” When Zhou Heyang chose to vote down, a sigh sounded in the small dormitory until Zhou Heyang was still in a weak lead in the middle plate, but in the Guanzi stage, he lost his chance due to calculation errors.

“Just when I saw you playing that move just now, I felt wrong! I didn’t expect such a small mistake to be caught by the opponent. His computing power is too amazing!” Although it is only a network game, these professional players all uphold Following the principle of watching chess without saying a word, until Zhou Heyang conceded defeat, Gu Li pointed at the display and said, “You didn’t get out of here, just make up your hand, he would not have this chance!”

“Although it is safe to make up a hand here, but the mid-abdomen is exposed again, as long as the big **** is here, the ending will be the same!” Chang Hao also disagreed.

“He was here, I took the opportunity to attack the lower right ...” Zhou Heyang hadn’t spoken yet. The two of them quarreled first, and then Kong Jie joined. The dormitory stayed busy for a while.

Zhou Heyang bent down, avoided the waving arm above his head, and entered in a very awkward posture in the dialog box, “Who the **** are you? One more game?”

“Director Xie, the other party asked again, shall we respond?” The staff responsible for assisting the operation in front of the computer asked.

“Let’s wait and see, it’s not yet time to announce it!” Xie Ke touched his chin and said, “Is the opponent’s IP found? Is it a professional player?”

“I found it, inside the Hua Guoqi Academy! This Dragon Feihu also used an agent to change the IP, but this little trick can’t hide us!” The other party wants to check the IP of the big chess slag. They are the top Chinese players. Computer experts want to find opponents but they are in hand. “You can be sure that the opponent is a professional chess player.”

“According to the analysis of the computer, from the perspective of the style changes of these two games, Long Feihu should have changed the user once! We checked the game data stored in the database, through the game style, certain details According to the comparison of processing habits, the current result is that the probability of the opponent in the first game is Ding Wei is 73.95%, and the probability of Gu Li is 11.35%; the probability of the opponent in the second game is Zhou Heyang is 75.14 %. Chang Hao ’s probability is 9.67%; other people ’s probability is too small to be ignored. ”The project team not only found the other party ’s IP, but even guessed their identity.

“The two chess players are in the top position in the world rankings. Among them, Zhou Heyang won the runner-up in the Fujitsu Cup last year! Now it seems that it is not only the two of them sitting opposite the computer!” Speculation.

“Ask them!” Xie Ke paused. Slap the operator on the shoulder and say, “Ask who else next to them?”

“Okay!” The operator’s fingers flew, and soon a message was sent through the dialog box.

“The other party is back!” Ding Wei shouted for a long time without seeing anyone reply. He just came back there after he typed a word, and Zhou Heyang couldn’t help crying in surprise.

“Fuck! Who is this!” Seeing the message sent by Daqi Zha. The five people in the dormitory suddenly froze; I saw the message sent by the big chess slag, “Are you Zhou Heyang? The first game was Ding Wei just now? Is there anyone next to you? Can you get a newcomer?”

“Is this going to challenge the entire Chinese State Chess Academy?” Seeing Long Feihu did not deny that the fans watching the game immediately exploded. They all speculated who the big scum was and what the next challenge would be. Chess player.

I did n’t know anything about the opponent, but the opponent checked himself out, and all five of them were dumbfounded; after waking up, Gu Li first ran out, shouting while running in the corridor, “I ’m going Look at the other dormitories one by one. Who is joking with us? “

“I also go. Gu Li went to the dormitory to check, and I went to the Internet cafe downstairs!” Ding Wei also went out with him. When he first started using Long Feihu’s account, he played chess in the Internet cafe! It is difficult to guarantee that this method is also used in the big chess slag. Although it may also be in Internet cafes in other places, after all, is it the greatest chance near the Huaguo Qiyuan?

Others have no objections. In their view, masters of this level can only appear in Hua Guo Chess Academy or Korean Chess Academy. As for neon? The first two years were okay. These two years have gradually declined. They have not touched any trophy of the world championship for two years. The only time he reached the final was Zhang Xu, a Chinese player.

“Then I will drag him here first?” Kong Jie rubbed his hands and squeezed Zhou Heyang away from the computer. Fortunately, Gu Li ran out first, otherwise he might not be able to grab him.

So the five people were divided into two groups. Gu Li and Ding Wei went out to find someone, Kong Jie was responsible for holding the opponent against the big chess slag, Zhou Heyang and Chang Hao were watching.

“Hello, I’m Kong Jie, shall we come for a game?” Although many people have speculated that Long Feihu is a professional chess player, the other party did not deny what the big ***** had just said. But Kong Jie’s debut was again set off.

“Yes!” The big ***** side quickly recovered.

“I rely on! What a broken computer Ding Wei!” Just when Kong Jiemo was ready to start, the match interface on the screen suddenly stuck, he could not click the button to start the match.

“It’s probably not Ding Wei’s computer problem! It should be the server of the Yicheng website is stuck!” Chang Hao said quietly, “You think, this game is so hot, there must be many fans who are online! One time server It ’s normal if you ca n’t stand it! ”

“Rely on rely on! If card also waits for me to play chess, won’t you?” Kong Jie, quite a few things, my pants were off, so you give me this rush! It’s extremely depressing!

“I’ll call the website and ask!” Chang Hao reached out his phone, said a few words and hung up, and said to Kong Jie, “The website is already restarting the server It is estimated that it will be better in a while, Wait patiently! “

“Wait for what? Why haven’t you started?” A professional chess player came in from outside the door. Soon there were more people in the room. Not only did Gu Li not dig out the big chess pieces from other dorms, but also All chess players from other quarters were recruited.

Seeing that the small dormitory could not stay, Nie Jiudian simply greeted them to the hall downstairs, holding the notebook and connecting the projector, Kong Jie sat in front of the laptop, and the others sat on the back sofa. Nibbling melon seeds and drinking tea, the bigger and bigger the occasion!

Successfully re-logged in successfully, but there is no shadow of the big chess ***** in the game room; Huh, this guy ran there?

Chapter 438 - Challenge the world champion

“Now that the server of the website is stuck, let’s take a break!” After so long, everyone is a little tired. Xie Ke waved his hand and said, “Leave the staff on duty to continue the game of big chess slag. Everyone else went back to rest and waited for work tomorrow before letting him challenge these professional players! “

According to the running speed of the big chess slag, the time until everyone is going to work tomorrow is enough for it to play millions of games. This exercise can greatly improve its game level. If it can be met again tomorrow To which professional chess players, the probability of winning will be higher.

The big ***** was off line, but it caused a small wave in the Hua Guo chess yard; searching for a long time did not find the shadow of the big ***** in the online chess hand, everyone had to conclude that he had gone offline when the website crashed. Too.

Gu Li, who was looking for various dormitories, and Ding Wei, who ran to the Internet cafe, also came back. The people looked at each other for a moment, and Gu Li couldn't help but ask, "I said, should this big chessboard be among us? Now that they have all come here, so there is no way to go online for a match? "

The eyes of Ding Wei, Kong Jie, Zhou Heyang and others flickered, and they seemed to think of Gu Li together. They swept across the players with suspicion. The others also paid attention to the people around them and tried to I saw something strange in someone's face, but I didn't see anything for a long time!

"I went to a computer in a dormitory and watched it one by one! This time, the Kung Fu login record must not have been deleted before!" Gu Li was still not reconciled, and he ran out while speaking.

"You come back to me!" His startled look really made Nie Jiutuan a headache. He hurriedly stopped it, and when Gu Li came back depressed, Nie Jiutuan swept across the crowd, "This is really true Did n't you guys do it? "

"Mr. Nie, you haven't seen this big chess piece have been online for so long! My work and rest these two days are very regular! How can this time be!"

"When Big Chess and Ding Wei played the first game, I was talking with Xiao Hu about the last game of his lg cup!" Everyone showed various evidences to show their innocence.

"Who the ***** is that?" Nie Jiudian knocked his head with a folding fan in distress, and thought for a while before asking uncertainly, "Is it a person in the Korean chess court?"

"How to explain the time problem?" Kong Jie asked,

"Look for a group of small players to take turns to score points. Then play with us?" Zhou Heyang guessed, "Will it be Mu Zhenshuo? He played with Long Feihu before and knew that Ding Wei used this number!"

"Even if he can guess me, how can you guess you?" Ding Wei retorted. Take out the phone, "Let's not guess, just call and ask!"

This question not only did not ask for the result, but aroused the interest of Korean masters such as Li Shifo and apprentices, as well as Li Shiya. They all expressed that they also wanted to fight with this online chess player.

“Leave a person in front of the computer and wait for him to go online. Others will take a look at these two games together to find the loopholes in this big chess piece!” It is not a way to wait like this. Nie Jiuduan greeted everyone to study the game together.

The projector quickly showed Ding Wei’s first game of chess, and after watching it, everyone was arguing about Ding Wei’s stinky chess, but Gu Li was abnormally quiet, sitting on the sofa and holding Thinking hard.

“Why? What did you think of?” Nie Jiuduan looked at the rising star of the Chinese chess world and asked, he must have thought of the point that others did not think of.

“I think the style of this big chess game is very strange! His style does not seem to be the result of formal Go training.” Gu Li raised his head, his eyes continued to be confused.

“Oh? How do you say?” Nie Jiuduan is getting older, and he hasn’t seen much in such a short period of time.

“His understanding of Go is different from ours!” Gu Li walked to an idle chess board and sat down with a few pieces of cloth. It was the match between Ding Wei and the big chess slag. Gu Li pointed to a chess piece and said, “Mr. Nie, look at this hand. This hand is undoubtedly a stinky move in our perception, and Ding Wei responded very correctly!”

“Well, that’s true!” Nie Jiuduan nodded and replied.

Then Gu Li dropped a dozen pawns again and again, “Now look at it again! Did the role of this ***** manifested itself? The tenth step before we remembered that the smelly chess came here has become a wonderful hand! “

“Hey!” Nie Jiuduan’s fan closed with a fan brush, “It is true, no matter whether it is our chess player, or the chess players of the Korean chess court and the neon chess court, there is no such chess!”

“What is a good game. What is a bad game, the efficiency of the force, and the potential correlation between unrelated pieces; if you only look at these two games, the big **** is completely different from our opinion!” Gu Li said his findings.

“Oh. You say that I think of myself!” Nie Jiudian hesitantly talked about a story in the history of Go. “A few decades ago When Master Wu Qingyuan swept the neon chess world, it was the most terrifying. It is not the extremely high win rate, but the way to win the game: it is obviously a bad game of conclusive, he regardless of the ground to play a long string. The opponent feels that he has the advantage all the way, looking back after dozens of hands, the game has been lost. “

“Do you mean that this big chess slag, like Master Wu, has led the understanding of Go for a whole period of time?” Ding Wei on the side also heard the conversation between them, “Isn’t it possible? If there is such a person, already Sweeping the chess world! Will that leave the championship trophy for Gu Li and Li Shiya? “

They did n’t say anything about folk masters. They knew the unbreakable gap between folk chess players and professional chess players. They did n’t learn chess at the age of five or six. Fighting in the chess world, don’t look at the fact that most of the young people in this room are in their twenties. Their number of games is far more than those of folk players.

Chess strength always depends on playing chess. Folk players do not have the same conditions as them. In this case, there is almost no possibility that folk players will outperform professional players.

“I want to play chess with him!” Gu Li hit his right hand on the palm of his left hand and said, “I’ll go and play for him!”

Gu Li won the lg cup last year and won the Chunlan Cup a while ago. At a young age, he already has two world champions in his hands. He is regarded as the leading chess player of his generation; now he To challenge the big slag, the game of the most tested chess player in the city of Harbin suddenly made waves on the Internet.

Chapter 439 - Truth exposure

The next day, when Lu Qiujian came to the artificial intelligence laboratory early in the morning, he found that they were talking happily around the computer.

“What’s the matter?” Lu Qiujian walked over and asked.

“The world champion Gu Li has written a game to us! Asked big chess ***** and him to play offline five games! Yicheng website also gives the game fee and bonus!” Xie Ke pointed to the top on the Yicheng website The news said.

“Oh, it’s really a lot! If all five rounds are won, the bonuses will add up quickly enough to provide the big chess pieces with electricity for several hours!” The artificial intelligence they develop must also rely on supercomputers, and power consumption is not a small number.

“Let’s promise him? But what about offline games? Let’s go out and help the big players?” Xie Ke asked.

“Let’s fight for the online game first! If we open up the identity of the big chess squad now, maybe others will not be treated so formally!” Lu Qiujian decided to let Gu Li think that he is also a game player. Real players are better.

“Well, I’ll reply!” Xie Ke personally operated the account to log in, and wrote Lu Qiujian’s meaning as a post to Yicheng’s forum. It was a reply to Gu Li. The post named him willing to accept Gu Li. The five-play chess game, but refused to show up online, if Gu Li is willing to play online games on the Yicheng website.

For the decision of the big chess slag, the Yicheng website is naturally happy. Since the appearance of the big chess slate, the number of new users and the number of online users on their website have risen at the same time. These five games can attract more Go. Enthusiasts joined Yicheng; so through their consultations and the desire of Gu Li Pair and Big Chess Game, the two parties quickly reached an agreement, and Gu Li agreed to the conditions for playing Wu Fan Chess on the Yi Cheng website.

After negotiating with the Yicheng website, the two parties quickly determined the date of the game. The first game of chess officially began after the contract was signed; the Yicheng website learned the previous lessons and this time directly shut down their function of watching the game. Turn to live video on the homepage, and also invited several professional chess players to explain.

After a period of self-match practice, the big chess ***** has once again gained strength. The speed of the Gu Li Luo Zi in the Hua Guo Qi Yuan is getting slower and slower! From time to time frowns for long exams.

“Did he hide his strength last time? This opening game is much stronger than when he played with He Yang last time!” The players in the Hua Guoqi Academy whispered in the viewing room.

Zhou Heyang and Ding Wei were depressed for a while. It turned out that the last time they did not use their full strength, they cut us down! They did not expect that this was just a big improvement of this time!

At the same time, at the Korean Chess Academy. Li Shifo, apprentices, Li Shidan Jiu Duan and other professional players are also paying attention to this game. "The situation of Gu Li is not good! The big ***** is broken, and the road is quite far-reaching." Li Shiya took the lead in expressing his views.

"Now the game has just begun, this disadvantage is nothing! Gu Li still has a chance!" Li Shifo, who has ruled the chess world for more than ten years, has gradually declined, but his vision is still there. Different views were put forward.

"Gu Liqi is masculine and has a strong attacking power; the opening and mid-game are his best time to find a chance to win; the second half is his weakness. Since he cannot establish a lead in the mid-game, he is equal to losing Now! "Li Shiya knows the advantages and disadvantages of Gu Li quite well, and points out the crux of the problem. This time the Stone Buddha did not object; if he was young, he may be able to find opportunities in the second half, but Gu Li is somewhat It's dangerous.

Entering the midfield, Gu Li made a series of moves, and the situation was once developing in favor of him. However, the big chess ***** still continued his steady chess style, calmly responding, and slowing down. After resisting the ancient three-axe, the situation was slightly inferior, but it did not widen the gap.

"This chess ..." When seeing the big ***** dropped a white piece into the black chess open space, Li Shiya could no longer maintain the calm on his face, the black chess piece felt very empty Big, with his computing power is fashionable and can not calculate the specific changes here, I did not expect the big chess ***** to think about it here or not.

"This is the winner of the big chess slag! Just eat this white piece, Gu Li can win! If he can't take this hand, he will lose!" Zhou Heyang said while playing the game with Kong Jie There are several changes on the list. But the white piece surrounded by black chess is like a rock on the seashore. If you are afraid of striking, I will stand still and be nailed to the heart of black chess.

"Gu Li wants to lose!" Just as Zhou Heyang and Kong Jie blurted out. Li Shifo and Li Shiya in the Korean Chess Academy also made this judgment at the same time.

“Which player is on the opposite side?” When Gu Lito conceded, the players and fans of the three great Go players in East Asia guessed the identity of the big slag.

“How did he play that hand just now? Did you judge the form of that black chess in such a short time?” After a long time after the game, Gu Li was still thinking about the winning hand from the big chess slag. “Or he I have already planned where to wait for me? “

“Good job!” There was a gloomy mood in Hua Guoqi Academy, but there was a lot of cheers in the artificial intelligence laboratory. If it weren’t for the electronic equipment everywhere. I am afraid that some people are going to open champagne!

“This time was just luck, and I ran into a situation that could reflect the advantages of artificial intelligence computing! The next game may not be so smooth!” Xie Ke was more cautious and showed his attitude after being happy.

“It doesn’t matter, the biggest advantage of artificial intelligence is not computing power but growth! If you play with Gu Li immediately after playing with Long Feihu, he is very likely to lose! The next game will be played tomorrow, during this period There are more than 20 hours for him to improve his chess skills! The next game will be more and more smooth! “Lu Qiujian said.

After the game Big Chess has started a new round of self-match practice; then in the remaining four games, Gu Li was not given a chance, but fortunately this time only five times Chess, Gu Li downgraded after losing four games in a row, but only to enjoy the treatment of being transferred first.

When the last game ended, the three kingdoms lost their voices at the same time. Even Li Shifu asked himself that he couldn’t win five games in a row at his peak.

Professional chess players and fans are curious about the identity of the big chess ***** again, but at this time, the big chess ***** has also announced its true identity!

Chapter 440 - Public appearance

“Pretty!” With the end of the last game, cheers broke out again in the artificial intelligence laboratory, defeating the world’s top ten professional players in the most complex board game invented by humans. This is artificial intelligence. Significant progress is the same as the deep blue victory over Kasparov in the chess game. ↑

“Congratulations to everyone for the achievements this time!” Lu Qiujian also applauded and celebrated for them, “But now is not the time to rest, let us write an article of this time and send it to” Nature “!”

“It won’t take long, the data and data are ready-made, and you can submit the manuscript directly after a little integration!” Xie Ke looked at everyone in the laboratory. Well, the author list of this article will be very long .

This achievement does not involve content that is inconvenient to disclose. You can use it to prestige. At the same time, it can also block the mouth of some people who have always complained about Xi and the plan to fail to produce results, so Lu Qiujian does not mind taking this matter. Let’s do some hype, “In addition, it’s time to reveal the identity of the big chess ***** to the outside world!”

The vast majority of people are eager to be recognized by others. Scientists also hope that their results can be followed and understood by more people, so Xie Ke immediately took action and flew his fingers to declare the identity of the big chess slag. .

“Professor Lu, do you think it is appropriate to write this way?” Within ten minutes, the statement of several hundred words has been written. Xie Ke turned to the display screen and asked Lu Qiujian to review it.

“No problem, just post it on the Yicheng website!” Lu Qiujian said after glancing at it.

“Hol!” Xie Ke rammed to log in the Yiqi Go forum with his big ***** account, copied and pasted this statement, and then pressed f5 from time to time, waiting for the fans’ response.

I rely on, is this the id of the big chess slag? Chess fans in the forum are arguing fiercely about the true identity of the big chess slag. After the first game, this debate has become the hottest topic in the Yicheng Forum; Li Shifo and Li Shiya may defeat Gu Li. Of the players were once considered to be big chess pieces by chess fans.

However, the possibility of these people was rejected by the chess fans one by one. Just when Daqi Zha and Gu Li played the second game, these two were making live commentary on the Korean Go website! How could it be possible to play against Gu Li; then all the other first-class players in active service have also been found evidence that it is impossible to be a big player.

Since it is impossible for active players, is it possible for retired players or young players? So chess fans have turned their attention to the legendary master Wu Qingyuan in the history of Go. Will this be a joke made by the masters and the juniors? But Master Wu is already 92 years old this year, he may not have the physical strength to play the game!

The possibility of young chess players has also been denied one by one, although many talented teenagers have emerged in Nie Jiuduan 's dojo, such as the younger brother Ke who won the National Junior Children 's Go Championship at the age of nine, but they do not yet have The strength of the tricks, besides, they watched the live broadcast for a few days these days, and no one was absent.

All professional players were denied. So everyone had to accept the messy possibility that they initially disproved-Daqi Zha is a private hidden master! Although they can't imagine how the folk masters can have the strength far beyond professional chess players, but there seems to be no other explanation.

Then everyone guessed the identity of this hidden master. The chess fans of the three East Asian countries have listed various evidences to prove that the big chess ***** is definitely their own country! He also tried every means to make him play for his country's chess academy; among them, Korean chess fans were the most excited.

But when the statement was thrown out, all chess fans who saw this post were dumbfounded; their first reaction was that this was a high imitation vest registered by the boring person, was it funny? But they put their eyes on the screen, and they did not find anything like a small dot in the middle of the three characters, and then look at the registration time and history posts. This is undoubtedly the big chess Slag's own id.

Stolen number? This is their second thought, but Xie Ke soon uploaded a screenshot of the main perspective of the game of big chess slag. This is evidence that no fake can be done, and only the big chess ***** can get; then the chess fans are slow Slowly began to believe that playing against Gu Li is really a computer!

"Gu Li. The identity of Big Chess is revealed!" Said Kong Jie, who pushed open the door of the training room and looked at Gu Li who had been staring at the chess board; after the fifth game, he stayed here except eating and sleeping , Thinking about his own gains and losses; hey. I don't know how he would react when he heard the news.

"Oh? Who the ***** is that?" Gu Lisha stood up.

“I don’t know what to say, just come and see for yourself!” Kong Jie smiled and shook his head bitterly, pulling Gu Li to his computer.

“Computer ?!” Gu Li grew his mouth Isn’t it said that the computer can’t win the professional Go players? “After the defeat of Kasparov by Deep Blue. People in the Go circle also studied this possibility. Finally, the scientific community agreed that there was no such possibility in a short period of time, and the result was only ten years. The position of Go is also Was captured by the computer.

If the opponent is a human, Gu Li can still barely accept it, but when he thinks that he has been demoted by a computer, it is not a taste in his heart! His eyes glanced at the bottom of the book, “Xihe plans artificial intelligence laboratory ?! No, I have to find them!”

“Where are you going? Do you know where they work? Even knowing that you can go in?” Kong Jie grabbed him, and a series of rhetorical questions stunned him.

“What should I do?” Gu Li asked blankly.

“Let Teacher Nie think of a way! He has a good relationship with the above, see if I can find out!” Kong Jie said.

Then, the news that the big ***** was not a person quickly spread throughout the three countries of East Asia. For a time, the Go world and the computer world shook at the same time. Application for interviews and interviews flew like snow flakes.

“For those in the industry, you can tell them that we have submitted the article to” nature “, and we will communicate after they have read the article; as for those news media, we will arrange a time for a press conference in the near future!” These circumstances Lu Qiujian had foreseen for a long time, he arranged according to the original plan.
