Chapter 451 - Liang Xiao's new job

This is Chang'an! After coming out of the train station, Liang Xiao looked at the Internet cafe opened in the city wall not far from the station, and suddenly there was a feeling of clutter in the wind. This style of painting was too inconsistent. The city wall was full of historical sense and modern. It's awkward to get an internet cafe together!

"Don't look at it, go to the parking lot with us, the company's car is still waiting there! When the company is settled, and you will see it later!" The non-ferrous metal company went to Beijing to greet the staff of this new group of staff. Pat his shoulder.

I do n't want to see this! Liang Xiao felt that the image of Changan in his heart suddenly collapsed, and he followed the other new employees from Beijing to the bus sent by the company.

The bus went around the city for more than an hour, and finally came to the company headquarters in the suburbs. The company's door is still the old-fashioned building. When it enters, it is another scene. Half of it is a newly-completed modern technology full of beauty. Wind construction, the other half is a busy construction site, many construction vehicles are in and out, it seems that it should be building a new plant.

This is the environment where I want to work! At this time, Liang Xiao's depressed mood was finally better, and the old staff who accompanied them pointed to the building outside the window and introduced them to them one by one. "That is our company's laboratory, which was just completed last year. The equipment inside is all world-class. Yes; there is the company's administrative office building; and then there is the company's dormitory. Your room is ready. There is a room for two people, with a separate bathroom, complete appliances, and everything you bought for the bedding. "

"Is there any internet!" Someone immediately asked the questions they were most concerned about. For these young people, there can be a TV, a refrigerator, a washing machine, but absolutely no Internet!

"Network interfaces and routers are ready-made. You can use them when you go in!" The speaking room has arrived at the entrance of the cafeteria, and the old employees quickly greeted them to get out of the car. Next. The company's leaders will formally pick you up in the evening. "

People who have just experienced a long journey will not have a good appetite. After a little drink of Tang Liang Xiao, they put down the bowl and waited for the others to finish eating. Their new batch of employees checked into their dorms according to the company's arrangement.

"Cheng Gang, we both have a dormitory! In the future, we can buy a host to play games together!" Liang Xiao happily patted his roommate's shoulder, he is alive and stripped, looking for someone to chat on the train all the way. He knew all these new employees. It's quite good to chat with Zhang Chenggang, a chemistry major, because he likes to play rpg games.

"Hmm." Zhang Chenggang also nodded excitedly and began to fantasize about the happy life of the two swords with Liang Xiao and the ss along the way.

However, before they got their first month's salary and enough money for the host, they had to say goodbye to this wonderful dream; Zhang Chenggang worked overtime in the laboratory almost every day until late at night, and Liang Laughing because the company is short of staff, in addition to finishing its own internal journal editing work, it is also responsible for radio stations, company websites, corporate culture construction, and other related work. It is also very busy. Both of them are almost the same. Go back to the dormitory and go to bed, let alone games. Even less time to speak.

A month slowly passed, Liang Xiao's familiarity with the work gradually improved, and gradually became more comfortable. In addition, the importance of his position is relatively weak, coupled with his excellent writing skills and coordination skills, his work efficiency has also been greatly improved; so his free time has gradually increased, but unfortunately Zhang Chenggang Still working overtime every day, the desire of the two to play games together has never been fulfilled.

Today is Friday again, Liang Xiao checked the manuscript for the last time, and sent it to his direct superior. Then he opened the webpage and quickly searched for the food in Changan City; he planned to have fun in the city center for two days this weekend, try Local cuisine. Then go to the digital market to see if he has been looking forward to a few new games.

"Xiaoliang. Come to my office!" The leader summoned him on qq before waiting for him to make the schedule. It seems that there is something to tell him.

Would you like to work overtime? I should have no problem with this manuscript? I have finished all other work? With questions Liang Xiao pushed the door of his boss's office open.

"Sit!" Duan Yunfeng, the director of Changan Nonferrous Metals Corporation responsible for corporate culture construction, looked at his subordinate with satisfaction. Since he came, his

department's work has improved greatly. The leader has praised himself several times at the company's regular meetings. , Worthy of being a talented student of a prestigious school.

"Leader, what's the matter?" Liang Xiao is a familiar character. This month, he has been familiar with Duan Yunfeng, and there is no sense of restraint in front of him.

"I'm afraid you can't go out to play this weekend." When I went to the cafeteria for lunch at noon today, Liang Xiao kept asking him what specialty snack bars Changan has. Originally, he was thinking about coming off work and driving him to the city, but a phone call just disrupted his plan.

"What's the work?" Liang Xiao returned to normal when she was slightly depressed. It was normal to see all kinds of unexpected changes in her work. It seems that she will only go again next time.

Seeing that he didn't show dissatisfaction, he asked about the content of his work with concern. Duan Yunfeng raised his evaluation of him in his heart a little, and now there are not many solid children like this.

"I was very satisfied with your company's superiors and your work a while ago. I just sent you an application to prepare for the report in advance. There is a great chance of passing!" People who take serious work are always worth encouraging. Duan Yunfeng handed over an application; of course, if he complained that he had to work overtime just now, then this application would not come out.

"Thank you for your leadership!" Liang Xiao was secretly proud. No one in this batch of new employees has already been converted. It seems that he will become the first batch of converted employees.

"Okay, let's talk about the business right now! As long as you get this thing done, I'm sure you will get through in advance, and there will be a bonus!" Duan Yunfeng said, "Recently an important person wants to come to the company for inspection. Among them, the technical center is the focus of the inspection. Those of them have no problem in starting professional work. Unfortunately, their writing skills are worse, so they want someone with excellent text organization skills to help in the past! "

Chapter 452 - Lean ore smelting

"You know, our company's current main product is the smelting of rare earth mines, and Xihe plans to have a great demand for the products we have extracted, so Director Lu will visit our company in the near future!" Because of his identity, Duan Yunfeng called Lu Qiu Jian the director, that is, his position in the Xihe project.

“Professor Lu is coming?” Liang Xiao asked in surprise. He called Lu Qiujian another way; if he didn’t talk to Lu Qiujian on the show, he would not come to this company. I didn’t expect to see him again so soon.

“Huh? Do you know Director Lu?” Duan Yunfeng heard the information implied in his tone, and immediately asked curiously, if there is such a relationship, then can Lu Qiujian use it when he inspects it!

“Professor Lv had just participated in a program shortly after returning to China, and I went to the scene as an audience ...” Liang Xiao repeated his question to Lv Qiujian, and finally scratched his head embarrassedly, “At the beginning, my tone of questions was a little sloppy, but I didn’t expect Professor Lu to ignore it at all, and gave me such a patient explanation. “

“Who has n’t been young before! When I was studying, I could n’t wait for our industry to immediately surpass the United States, and the deeper I knew, the harder this road was; but now it ’s much better than before, at least in our company. In this field, we have slowly caught up now ...
“Duan Yunfeng was consoling while wondering how to make use of this experience with a small amount. heiyani

Hey, the relationship is still a little shallow, but it is better than nothing! If Director Lu still remembers him, it is also good to have one more topic during the inspection! There are many units involved in Xi and the plan, and now everyone knows that they can get big orders by holding the thighs of Xi and the plan. Now that the international market is sluggish, they are all counting on Xi and planned orders!

Although Changan Nonferrous Metals Co., Ltd. smelted in rare earth ore, although it is in the first-class position in the country, it is not unique. There are more than a dozen other provinces and cities that are similar to Changan Nonferrous Metals Company. If it is not the reason for Changan, Lu Qiu Jian will not choose them for the first time. It is always better to have one more chip than none, and sometimes the wins and losses are in this tiny detail.

“I have already talked to the technical center, please go directly to find them! The materials are already prepared over there, you can help to sort it out!” Duan Yunfeng began to arrange work,
“This is the time to report to Director Lu Yes, it is related to whether our company can get Xi and planned orders, we must be careful! “

“Okay, I’m going here!” It’s no stranger to the technology center Liang Xiao, where his roommate Zhang Chenggang works, and this month, out of the need to edit the company’s internal journals, he

divided the company into various departments It's all over, and the technology center is especially important.

"Well, if you have any questions, please call me at any time!" Duan Yunfeng watched Liang Xiao leave and picked up the phone at hand. He began to report the news he had just received to the leader. "Hello, Mr. Zhang, did you bother you? I have here I want to report this to you. It is Liang Xiao, a new employee in our department, who had been with Director Lu last year ... "

This phone call increased the company's emphasis on Liang Xiao and made new arrangements for his role in Lu Qiujian's visit.

"Director Hello, our Director Duan said let me come to you!" Liang Xiao knew nothing about it, he had just arrived at the Technology Center and entered the office of Director Guan Yanqing. Speaking of the director, it is probably the most special position in the officialdom of Hua Guo. There are clerk-level directors, section-level and division-level directors, and even higher to the department level; Lu Qiujian is the director, and Guan Yanqing is also called As the director, even the fairy came to the world to exercise EQ, but also to be the director.

"Xiaoliang, it's easy for you to come here. I can't stand it anymore in the past few days!" Guan Yanqing saw him as if he saw the big savior and quickly got up and greeted warmly, "We are the people in our department. It 's not a problem for a trial, a data analysis, but let them write things but it 's too old! A reported ppt has been doing it for more than half a month, and the above leaders are still not satisfied. "

"Come on, come over and give some suggestions for revision!" Said Guan Yanqing directly pulled him to the computer and opened the ppt.

Hey, nothing else, just say this template, I did n't use it five years ago! Just after seeing the first page, Liang Xiao understood the reason why the leader transferred himself. There is no dry goods in this ppt. It is not easy to say. Just looking at this interface is unsatisfactory. There is no aesthetics at all!

"Director Guan, you know that I am not very good at professional things, so I am afraid you still need your cooperation in the process of revision!" Liang Xiao said while turning the page. As he went deeper, he found that it was not only the page layout Problems, most of the textual expressions are not satisfactory, the text is dry, verbose, and lacks focus; he has no problems with page beautification and text polish The part that can involve professional is not He can easily change it.

“No problem! I have arranged the work for these two days. You can modify it in my office. If you have any questions, just ask me!” Guan Yanqing pointed to the table next to it. Where was Liang Xiao prepared? Computer.

“OK, then I’m welcome!” Liang smiled and nodded, and began to ask questions, “Director Guan, first of all, I want to understand what our ppt is for? What purpose do we want to achieve?”

“Of course, to show Director Lu the strength of our company, so as to win Xi and the planned order!” Guan Yanqing began to popularize, “At present, there are 14 large companies that overlap with our company’s business internationally, domestic and our company level There are almost a dozen or so, and we now need to grab orders from these companies! “

“Foreign companies can ignore them for the time being, because the price of their products is too high in the first place, and the demand for the product is too large in Xilai and the plan. This key resource cannot be controlled by foreign companies, so our main Competitors are all domestic! “

“And the biggest gap between China and foreign countries lies in minerals. Although there are many rare earth mines in China, there are many types of rare earth mines that can meet our production needs. If you want rich mines, you must import them from abroad. There is no doubt. We have increased our production costs, and foreign mining companies have formed a price alliance through alliances. If a large amount of purchases are made, the price will definitely rise significantly! Therefore, improving the level of smelting of poor mines has become our most important goal! ”

Chapter 453 - modern war

“Smelting put it bluntly is actually the process of excluding the wrong options among several options. Why is neon’s smelting technology more advanced than ours? It is because they started earlier than us and spent decades more than us, excluding the wrong options one by one. Finally, one or several correct answers are dug out. These are the accumulation of time and the consumption of a lot of funds! “Guan Yanqing continued.

“Science has no shortcuts, if you want to shorten the time to catch up with or even exceed the neon, you must invest more money than them, accumulate more human resources than them, and make a lot of trial and error!”

“But not everyone has the opportunity for trial and error. The opportunity has always been only for those who are prepared! Our company has always valued the accumulation of technology since its establishment, so it only has the status it is now; although our level is now There are still some gaps with countries such as Neon, but these gaps are not as insurmountable as they were back then! So Director Lu will choose our company for inspection! “

“What we have to do now is to show our strength to Director Lu completely, so that he can have full confidence in our company, so that we can get enough funds for the accumulation of trial and error!” Said Guan Yanqing for a long time. Final summary.

Some people oppose it and some people support it. The large sums of money Xi and the plan have made some people lose their opportunities, and also brought new opportunities to others. For example, Guan Yanqing is one of them. Through the fund support of Xi and the plan They can quickly complete the accumulation of technology and catch up with or even exceed the world’s advanced level. This is a temptation that Changan Nonferrous Metals Co. cannot refuse, so despite some hints, the company did not hesitate to block it back! This risk is nothing compared to the company’s development!

“The competition in the modern international society can be said to be a competition between large multinational companies to some extent.” Liang Xiao’s literary temperament reappeared at this time. Through this period of familiarity with the industry, he knew to compete with his company Among those foreign companies, there are several Fortune 500 companies, and now they have the opportunity to participate in the competition with this world’s top companies, and he can’t help but let his heart surge. “If we make an analogy, now we have defeated a Fortune 500 company. It is equivalent to destroying a country in ancient times! “

“The economic value created by one of the world’s top 500 in modern society is much greater than that of an ancient country!” Guan Yanqing agreed with his analogy. “Last year, the world’s top 500 top ranked ExxonMobil’s operating income was More than 339 billion US dollars, while the GDP of Austria, which ranks 22nd in the world in terms of economic strength, was only 309.3 billion US dollars; in other words, if ExxonMobil was regarded as a country, Its gdp can be ranked 22nd in the world! Can it be regarded as an economic power! “

“The competition of modern enterprises is essentially the competition of science and technology. If you put it in ancient times, you are equivalent to such famous stars as Bai Qi and Wang Jian! Tadpoles, the important task of destroying the country, fall on your shoulders!” Speaking of which, Liang Xiao couldn’t help but say Regret, “Hey, I am afraid that someone like me can only be a literati like Wang Changling and Gao Shi to write some articles for you to promote your achievements!”

“Haha, Gao Shi has been a Huainan feudal envoy. He has led soldiers and fought wars! Besides, there are many poets from Wu Shuangquan in history. People like Xin Qiji and Cao Cao not only wrote well poems but also fought wars. You may not have such an opportunity in the future!

“Unexpectedly, Guan Yanqing also studied the history of literature and pointed out the loopholes in Liang Xiao’s words.

“Good! At my level, being a poet strategist is probably similar to Zhang Zongchang.” Song Ge Xing “can’t be written! You can write at most ‘look at the Black Mountain like a mallet, happy to come The following thick ‘Poems like this!’ Liang Xiao also joked.

After joking, Liang Xiao started his busy work. Just now, Guan Yanqing’s remarks made him realize the importance of Lu Qiujiang’s inspection to his company, and he also wanted to witness Changan Nonferrous Metals Co., Ltd. after obtaining a large amount of financial support to overcome technical difficulties, catching up and even surpassing international advanced technology. Level, and then put the unrestrained scenes of the international companies that have brought their own companies down, and I thought that in the near future, I will witness the “war of nations” in modern society, Liang I can’t help myself when I laugh.

He knew that his ppt would be seen by Lu Qiujiang as an important material, so he became more cautious and took out all the means. Xian Zi carefully and carefully studied the original ppt provided by Guan Yanqing several times. Questions were raised one after another.

After he thoroughly understood the ppt, he began to transform it; first, he made a simple and atmospheric new template, then adjusted the content structure, and reorganized the text of the ppt. Make the whole ppt’s regulations clearer, the logical order more strict, and the text more fluent.

Considering that Lu Qiujiang’s time is precious, he must be impatient with the long report, so he compressed the content of ppt again to remove those useless content. It directly shows the core competitiveness of your company, and uses detailed data to describe the company’s technical strength.

Had been busy for a whole week before he considered this manuscript ready. Guan Yanqing was very satisfied after reading it and handed it all the way to the top of the company. The company’s top management held a special meeting to review the manuscript.

During the audit, the keynote speaker also became Liang Xiao. In front of all the senior leaders of the company, he talked confidently, and the explanation was smooth, accurate, yet interesting, and soon aroused high praise from the senior management.

Hey, if this kid’s personal image is better, it will be perfect! The company’s leader looked at Liang Xiao’s obese figure secretly, but this was not a decisive factor. He whispered a few discussions with several people at the decision-making level, and quickly reached a consensus.

“It’s a good talk!” At the end of the explanation, Liu Guangming, the leader of Changan Nonferrous Metals Company, took the lead in applauding. After the applause was over, he smiled and looked at Liang Xiao. “Xiaoliang, you have worked hard this time, but you can’t do it now. Relax, the company now has a very important job for you to do! I do n’t know if you have confidence! “

“Guarantee the completion of the mission!” Liang Xiao shouted with the spirit of freshman training.

“Okay, when Director Lu comes to inspect, it is up to you to explain it!” Liu Guangming snapped the table and said.

what? Liang Xiao suddenly froze!

Chapter 454 - Inspection

“Well, how can I, a liberal arts student engaged in corporate culture construction, do such work of explaining professional knowledge?” Liang Xiao said with a daze.

Liu Guangming looked around and chuckled, “The organization has decided, you do n’t have to refrain; today you have a good performance, but there are still areas that need to be improved. After going down, practice a few times and try to give Director Lu the sixth brother. good impression!”

“Well, I must be well prepared!” Liang Xiao was originally a temperament who didn’t know what to fear. Since the leaders value it, let’s do it.

“Xiaoliang has done a good job recently, and Lao Duan also made an application for regularization in advance. I think we will give him the formalities for regularization, right?” The deputy general manager of the company ’s personnel work threw another carrot. If people work well, what if they do n’t give them a reward? What’s more, Liang Xiao’s previous performance has been in line with the company’s standard of being regularized in advance. He just did it in favor of Shun Shui, why not.

Others will naturally not object, so Liang Xiao ’s successful reorganization in advance was successfully handled. He became the first of these new employees; a liberal arts student actually walked in many famous schools in a technology company In front of science and engineering students, this is the first time in the history of Changan Nonferrous Metals Company.

After a few more days, it was finally time for Lu Qiujuan to come to the company for inspection. All employees of Chang’an Nonferrous Metals Company started to be busy three days in advance, cleaning the company up and down cleanly, even inside the dormitory. A variety of welcome banners and flags make up the factory area with joy; Liu Guangming took the leaders of the

company up and down at the door of the company. Did he stand on his toes and look into the distance, waiting for Lu Qiujian with a very excited and excited mood.

Because of having a relationship with Lu Qiu, Liang Xiao was also drawn to the forefront, occupying a position in the ranks of company leaders.

“Here we are! Director Lu’s convoy has arrived at the crossroads ahead and is expected to arrive at the company in five minutes.” Secretary Liu Guangming’s walkie-talkie heard a reminder from the person in front.

“Everyone got together, and Director Lu was coming soon!” Liu Guangming adjusted his clothes and turned to greet loudly, and everyone’s energy suddenly changed.

Ho, this battle is really big! Liang Xiao saw the **** vehicles with special license plates before and after the team. With emotion in his heart, he stretched his neck and guessed which car was Lu Qiujian’s car.

“Hello, Director Lu, welcome to the inspection work of Changan Nonferrous Metals Company!” Lu Qiujian just came out of the car, and Liu Guangming immediately greeted him. Regardless of the other’s age, he was not half his age, bending over and holding Lu Qiujian’s hand for a while.

“Chairman Liu is good!” Lu Qiujian looked at so many people gathered at the door of the company, frowning slightly, it seems that all the leaders of the company have almost arrived, don’t they need to work now? Hey. This kind of demeanor!

However, he did not immediately show his dissatisfaction, but smiled and shook hands with them while listening to Liu Guangming’s introduction, and then he saw Liang Xiao’s figure in the crowd.

Like his huge body, it can be called the factory’s iconic building in that factory, even if you can’t see it, it’s unrealistic! “Huh, isn’t this Mr. Liang from Beijing Normal University? How did you come here?”

“Professor Lu, since I listened to your explanation last time, I have developed a strong interest in Xihe Project. It just happens that Chang’an Nonferrous Metals Corporation is also a cooperative unit of Xihe Project, so I came!” Liang Smiled generously.

Behind them, Liu Guangming, Duan Yunfeng and Guan Yanqing exchanged glances. It turns out that Director Lu still remembers Liang Xiao! This is good news without compromise!

Lv Qiujian didn't talk much with Liang Xiao. He exchanged a few words and went to the next person. After a while, he fully recognized the leadership and technical backbone of Changan Nonferrous Metals Corporation.

He refused the company leadership's invitation to let him take a short break, and directly started the inspection inside the company. Liu Guangming followed him as an interpreter along the way.

"Our company is composed of technical R & D center, production workshop, mining department, business department and other departments. The mining department is mainly distributed in various mining areas. At present, the company headquarters of Changan is mainly responsible for technical research and development and finishing of semi-finished products! You see now It is our technology research and development center, which is also the core department of our company! "Liu Guangming knows that Lv Qiujian 's research leader likes to know the most about the technical strength, so the first stop of the inspection is arranged here.

"Is the machine quite new!" Lu Qiujian glanced at the equipment in the R & D center, and it can be seen from the nameplates of these equipments that their delivery time is not long.

"Since I learned that the Xi and the plan will be launched above, we have started the preparation work, and spent a lot of money to find a variety of advanced equipment from all over the world! At the same time, we have introduced a group of senior technical talents from home and abroad, it is not an exaggeration to say , Whether it is hardware facilities or talent reserves. Our company is in a leading position in the country! "Liu Guangming gave Lu Qiujian a slightly self-satisfied introduction to the situation of the technology research and development center This is a multi-stage tandem extraction technology The research and development laboratory, this is Professor Guo Zhenyu, the director of the laboratory. Professor Guo and you all graduated from Beijing Normal University! It is our talent specially introduced from Beijing Normal University. He is an international first-class expert in the field of rare earth separation! "Liu Guangming solemnly introduced his company's technology masterpiece to Lu Qiujian."

"Good seniors!" Lu Qiujian asked the senior who was twenty years older than him, "I don't know what you have to do with Professor Xu Guangxian?"

Professor Xu Guangxian is an authority in the field of rare earth research in China and the director of the State Key Laboratory of Rare Earth Materials Chemistry and Applications at Beijing Normal University. It is said that this old gentleman is very likely to win the National Highest Science and

Technology Award this year; since Guo Zhenyu graduated from Peking University, he is likely to come from Professor Xu.

“Professor Xu is my teacher!” Guo Zhenyu replied in a respectful tone.

“I met Professor Xu at Beijing Normal University before I came and asked him a lot of rare earth problems; then did your laboratory use Professor Xu’s method?” Professor Xu did not mention that he had students in Chang’an. I want to come to avoid influencing Lu Qiuqian’s judgment. He not only secretly admired the noble character of the older generation of scientists.

“Yes, we improve the extraction efficiency of minerals through the development of new extractants and complexing agents ...” Speaking of professionalism, Guo Zhenyu immediately started talking.

Chapter 455 - with potential

Probably after listening, Lu Qiuqian has learned that his brother is really in stock. He has a unique view on the smelting and purification of rare earth metals. He inherited his own insights on the basis of inheriting Professor Xu Guangxian’s method. In addition, in the past few years, he has been active in the front line of research, and there are even signs that the blue is better than the blue in the transformation of the laboratory results.

We in China have never lacked talents, the key is whether we can provide them with a platform to display their talents; Lu Qiuqian looks around the advanced instruments in the laboratory. Here not only has the most advanced solution extraction equipment, but also is used for Special computer for chemical reaction simulation.

“Using a computer for experimental simulation not only saves time and costs, but also avoids all kinds of accidents during the experiment. Since our laboratory bought this big guy, our work efficiency has been greatly improved! “Liu Guangming saw Lu Qiuqian’s gaze stuck on the computer, and he quickly explained it.

“Unfortunately, the model of this computer is a bit old, and the performances are gradually unable to meet the needs of research and development. If there is a newer computer, I can double the efficiency of research and development!” Guo Zhenyu habitually called After suffering, as the head of the laboratory, fighting for funds is simply a habit that is carved into the bones, and the nature is immediately exposed at the first sight.

If it had been before, Liu Guangming must have taken out the difficulties of the company to block him back, but today is different. What is the purpose of Lu Qiuqian’s inspection in the company?

Isn't it to seek a reliable rare earth metal supplier for Xihe plan? In order to ensure the supply of rare earth metals, he has a large amount of support funds in his hands. If his own administrative staff proposes to come to Lu Qiujian, he may be disgusted. The technical staff proposed by Guo Zhenyu is much better.

"Chairman Liu pays so much attention to technology, and will certainly meet your wishes!" Now that it is not time to express his opinion, Lu Qiujian kicked the ball back quietly.

"Paying attention to technology has always been the most important item in our company's core values. I won't deduct anyone's money from the technology R & D department!" Liu Guangming had no choice but to say so, and it was another turn to ensure that the style of painting was finished. The International Mining Union has once again raised the price of ore, and several international companies that have a competitive relationship with us have lowered the unit price of the product. This rise and fall has greatly compressed the profit margins of domestic companies, and many private companies have converted to real estate. , Now our company is just barely pushing the sun!
“

After complaining, Liu Guangming once again expressed the importance of technology, "but since Director Guo has proposed it. I have solved this matter in a few days!"

"Rare earth metals are indispensable raw materials for aerospace, electronics, and many other fields. This kind of resources related to the lifeblood of the country cannot only be imported from abroad, so no matter how bad the form is, you must stick to it!" Without this, Xihe plan needs a strong state-owned company to provide a large amount of high-quality raw materials. Lv Qiujian was quite satisfied with this company through browsing information and this half-day inspection, but it is not yet time to make a decision.

Waiting for the whole company to be completed, it is time to eat at noon, take a short break after eating, and the inspection enters the next link. The morning inspection only looked at the current situation of the company headquarters, and other more content depends on the company Thematic report.

Lv Qiujian and Ma Yang came to the large meeting room of Changan Nonferrous Metals Company with their assistants. The projector here has already been prepared, and the company's leadership looked at Liang Xiao in front of the podium with a slight anxiety. Are we right to hand over such an important job to such a young man?

If he can show the level of the previous few days, then the effect is reached, plus his previous relationship with Lu Qiujian, can some points be added? As for Lu Qiujian's questions during the

listening process, there are professional and technical personnel present, as long as the content of rare earth smelting, Guo Zhenyu and Guan Yanqing can cope with it!

I am the only one to read the manuscript today without any pressure. Liang Xiao 's ideas at this time coincided with the company 's top management. Seeing Liu Guangming sent him a signal to start his speech. He cleared his throat and began his speech, "Dear Director Lu, Assistant Ma, distinguished guests and leaders. Now let me tell you the next strategic development plan of Changan Nonferrous Metals Corporation."

To be honest, Lu Qiujian was a little surprised when Liang Xiao stood on the podium. His strong memory told him that Liang Xiao didn't learn Chinese language and literature? Just go to Changan Non-Ferrous Metals Company, can he also get this kind of professional report?

"... At present, there are two main methods of rare earth smelting, hydrometallurgy and pyrometallurgy; rare earth hydrometallurgy metal chemical metallurgy, the whole process is mostly in solution and solvent. Such as rare earth concentrate The process of separation and extraction of decomposition, rare earth oxides, rare earth compounds and single rare earth metals is the use of precipitation, crystallization, redox, solvent extraction, ion exchange and other chemical separation processes. The organic solvent extraction method that is more commonly used today is A general process for industrial separation of high-purity single rare earth elements. The hydrometallurgical process is complex, the product purity is high, and the application of this method to produce finished products is broad.

The pyrometallurgical process is simple and the productivity is high. Rare earth smelting mainly includes rare earth alloys produced by silicon thermal reduction, rare earth metals or alloys produced by molten salt electrolysis, and rare earth alloys produced by metal thermal reduction. The common feature of pyrometallurgy is production under high temperature conditions ... "

As the speech progressed, he gradually changed his view of Liang Xiao. Although he only played the role of a reader during the speech, the kind of full self-confidence and passionate elaboration still made him quite Appreciation Under the leadership of Director Guo, our company has conducted in-depth research on Professor Xu's cascade extraction theory and achieved a series of results ... At the same time, the team led by Director Guan Yanqing In the transformation from laboratory to industrial production, it is also at the forefront of the industry ... In summary, if our company obtains large amounts of financial support, it will definitely improve our rare earth metal smelting in a short time. Level....."

During the speech, Lu Qiujian and Ma Yang interrupted him to ask questions from time to time, Guo Zhenyu and Guan Yanqing and other technical personnel answered one by one, Liang Xiao quickly took the opportunity to take a sip of water to moisturize some hoarse voice .

More than three hours passed unconsciously, the speech finally ended, and everyone looked at Lu Qiuqian anxiously.

Chapter 456 - End of the first stop

“It’s really hard for us classmate Liang! A blood-Chinese language and literature, it’s not easy!” Seeing everyone’s serious expression, Lu Qiuqian smiled softly.

“Eh, learn Chinese language and literature! That’s really not easy. Can you understand what’s in the report? Classmate Liang?” Ma Yang, who was always reticent, was also taken aback.

The three-hour speech was an exhausting physical exercise. Liang Xiao finally persevered. Now that he is tired enough to choke, listening to Ma Yang said, his brain twitched and said, “It’s okay, I High school chemistry is pretty good! “

As soon as this remark came out, the leadership of Chang’an Nonferrous Metals Company became black. This mood can’t be said. Do we have to work so hard to prepare for so long?

“Ha ha ha ha!” Lu Qiuqian froze for a while, then laughed, and smiled for a long time before saying, “It turns out that so many experts here have worked so hard for so long, that is the level of high school chemistry! “

If on other occasions, some people say that their whole thing is the level of high school chemistry, Guo Zhenyu they have to turn their faces, but now Lu Qiuqian is the Nobel Prize winner, and he has the supreme status in the Chinese science and technology community. Liang Xiao said the wrong thing first, it would be good if they were not angry! So they laughed.

Such a laugh suddenly eased the tense atmosphere at the scene. Liang Xiao also scratched his head and smiled. He had realized that he had said the wrong thing just now. Fortunately, Lu Qiuqian was not entangled, otherwise he would be in trouble.

After the laughter gradually subsided, Lu Qiuqian cleared his throat and began to make a final evaluation of Changan Non-Ferrous Metals Company. “Through the previous data review, as well as this morning’s visit and the report just now, I have already evaluated your company’s technical strength and production. A certain understanding of ability. “

The leaders of Chang'an Nonferrous Metals Company immediately listened to Lu Qiujian quietly. They knew that Lu Qiujian's next words will determine whether the company will grow or decline in the future.

"... To tell the truth, your company's current technical strength and production capacity have not yet reached the requirements of Xi and the plan." Lu Qiu first attacked it when he built it, "Technically speaking, your current The level is still a certain distance away from countries such as Neon, and Xi and the plan have higher requirements for raw materials than the highest level that Neon can currently reach; in terms of output. Your annual output is not enough for Xi and Plan for three months of consumption ... "

After talking about Lu Qiujian looking at them, several people exchanged glances, or Guo Zhenyu stood up, "Professor Lu. I would like to say a few words about technical issues. The reason why neon is now in front of us is because they It started much earlier than ours, but as the country attaches importance to the industry in recent years, we are catching up at an extremely fast speed. I am here to assure you that as long as there is sufficient financial and human support, I am confident to lead me 'S team completed the catch-up within one year! "

"You don't have to worry about the output. The company has invested a lot of money to acquire several private enterprises since it learned of Xi and the planned start. The renovation of the plant, the commissioning of equipment and the reconnaissance of the mine are in full swing. The output can be increased at any time and can fully meet the needs of the project! "Liu Guangming also stood up and spoke.

"On this point, I still believe in the capabilities of Chairman Liu and Senior Guo! But I still want to emphasize that since you said so, then I will take your words as a guarantee for Xi and the plan. If it is at the agreed time When you arrive, you have not completed the supply of raw materials with quality and quantity, then you will bear all the consequences! "These are the things that are well-known in the contract, and Lu Qiujian emphasized it again to show his importance.

As an enterprise, he is never afraid of strict requirements from Party A, only afraid that Party A will not give opportunities. Liu Guangming was not scared by Lu Qiujian 's harsh words, not to mention that he did have confidence in the strength of his enterprise. Give the meaning to them and make a guarantee immediately, "Director Lu, don't worry. Changan Nonferrous Metals Co. is confident to provide Xihe with enough high-quality raw materials to ensure that you will not be disappointed!"

"So you are planning to provide support for our company? At this time, I finally have the money to add equipment to the laboratory!" Guo Zhenyu's eyes lit up to see this fellow who had left him far behind more and more cordial.

“I’m just satisfied with the strength and preparation of your company!” Lv Qiujian waved his hands even though he really liked this company. But now that the inspection is not over yet, it ’s really bad to say, “But whether the contract will be given to you or not has not yet been decided. From the information I have seen, several other companies have their own strengths, and who will not choose at that time? Easy to say! “

“Director Lu, don’t worry. It’s all in an industry to discuss life. We are all aware of the situation of other companies. It’s not my bragging. What our other companies can do, our company can certainly do, and other companies can’t. Things, our company can still do it! “As long as they are given a chance of fair competition, Liu Guangming is not afraid of any opponent.

“It’s good to have confidence!” Lu Qiujian nodded. “I will leave in a while, but the review of your company is not over. In the later period, Xi and the planned project team will continue to track your company. If your progress during the period If we fail to meet our requirements, we may still lose the opportunity for cooperation at any time! Do n’t think you ’re just fooling me! ”

Afterwards, Lu Qiujian conducted an in-depth discussion on several issues that Xi and the plan were more concerned with and some experts For Lu Qiujian’s questions, they took the answers seriously, some of them You can reply on the spot, but some of them are still in the field that they have not yet entered. They have written down these questions one by one. It seems that the company’s main research direction will develop towards these questions in the future.

After everything was processed, it was already supper time, and Liu Guangming sent an invitation, “Director Lu, we have prepared some light meals, and also invite you and several leaders of the review team to appreciate the light.”

Lv Qiujian looked at his watch and waved his hand, “Thank you Chairman Liu for your kindness, but it ’s not too early now, we should go back. Tomorrow I will go to other units to check the situation, and I will attack their information at night. So let ’s just eat! Let ’s talk next time when we have the opportunity to come to your company again! “

Liu Guangming was willing to let him go so easily and quickly retained him, but Lu Qiujian was determined to let them go.

So anxious, which unit will be tomorrow? After sending them away, Liu Guangming wondered.

Chapter 457 - Buy a house

“Mistakenly reporting on projects to defraud funds, falsely issuing invoices for consumables, and taking relatives and friends as laborers to receive labor remuneration, these people really did

everything!” Just after coming out of a famous national university, Ma Yang was upset. Said, today’s inspection disappointed him and Lu Qiujian.

The owner of the laboratory they just visited was also considered to be a big authority in the country. Ma Yang still admired him a lot, and now the idol’s collapse in the heart is really uncomfortable.

“Since they are like this, they can now be removed from the candidate list of Xi and the planned cooperation units!” Lu Qiujian’s face is also not good-looking. As a researcher, there is no better way than scientific research. He was angry!

“Professor Lu, just cancel their candidacy?” Ma Yang asked reluctantly. “If you give them the funds to other laboratories, how much can you achieve! Such a person like him is simply to the whole of China Crime in the national scientific community! “

“How can it be so easy!” Lu Qiujian didn’t want the funds of Xi and the plan to be squandered by such people. He came to inspect mainly to select suitable partners, and also had the idea of finding a chicken to kill and show to the monkey. Now that someone has hit the muzzle, it must not be let go.

“Oh? Then what are you going to do? It seems that what we know today is not enough!” Ma Yang asked with concern. When he encountered such a thing, he also said more.

“Professional things are left to professional people to do a good job!” Lu Qiujian looked at Bai Yiran in the driver’s seat, “Yaoran, how about this matter for you?”

“This kind of thing should be the responsibility of the disciplinary inspection department!” Bai Yiran replied in a tone without any emotion, “but I can reflect the situation to them. By the way, I am urging, I don’t think it will take long. There are results! “

The department that Bai Yaoran belongs to is very scary. When he urged Lu Qiujian to feel relieved, “Okay, then I will wait for your good news! I will provide you with some information later. You can take it and talk to them.” “

Today they are only based on their knowledge of the study. Only by analyzing from a professional point of view, the conclusions above can only be proved that the other party has great suspicion, but there is no direct evidence. Lu Qiujian intends to hack into the other party’s computer after a while and find out if he can find other more direct evidence.

Talked about it all the way and returned to the hotel not long after. Li Yan also finished his work at the base these days and was resting in the hotel; now Lu Qiujian and Ma Yang's inspection of other cooperative units around Chang'an has come to an end. You can relax in the next few days.

"From now on to give you a few days off, you can go wherever you want to go! Next Monday we will go back to the capital!" The conclusion of the conclusion, Lu Qiujian said.

Several assistants and Ma Yang are young people. They believe in working hard as they work, playing hard as they play. During this period of intense and busy work, they have tossed them enough. Now that they have time to relax, they immediately discuss with excitement. The itinerary came and discussed for a long time Ma Yang asked, "Professor Lu. Will you go with us?"

"I will not go, I have other things!" In addition to collecting evidence, taking advantage of the few days before leaving, I quickly finalized the house.

Back in his room, without much effort, he found some evidence of his corrupt funds from the computer of the laboratory manager at noon. What was even more unexpected was that there was a selfie video of him in the computer. Lu Qiujian glanced at it for only 13 seconds.

Think again about the account he just found. He spent a lot of money on this girl. The five-figure fund only sold for 13 seconds. This well-dressed beast is really generous!

Pass the information to Bai Yaoran, rest for one night, and wake up in the morning. Lu Qiujian started searching for a suitable house according to the information found on the Internet yesterday.

"Professor Lu, there is a car following us!" The car didn't take long. Bai Yaoran reminded him.

"Oh? Who is it?" Lu Qiujian looked into the rearview mirror, trying to find out what he said.

"It doesn't look like a professional. I've asked people to check the license plate number. I believe there will be results soon. Are we going to throw him away now?" Bai Yiran has not found any threats yet, so he is still very calm.

Reporter or who? Today is not going to the key department. Besides, even the spy Lu Qiujian is confident to ensure the safety of himself and Bai Yaoran! Uh, okay, people from Xiaobai are here to protect him! “Then let them follow and see what they are doing!”

The car slowly drove towards the suburbs of south of Chang’an. There are many high-end villas at the foot of the mountain. Whether it is for safety reasons or to let parents live a comfortable life, this is a good choice.

“Hello, sir, is this the first time we have come to our project?” After receiving a positive response, the capable property consultant passed his business card. “I am the property consultant Han Xiao of our project. Please call me Xiaohan. Alright, what do you call me, sir? “

“My surname is Lu!” Lu Qiujian followed her to the sand table.

The property consultant introduced Lü Qiujian to the project while he was on the sand table, and used some inadvertent small problems to find out about Lü Qiujian, trying to judge his economic strength and purchase intention. Unfortunately, her These small tricks did not conceal Lu Qiujian and were resolved by him one by one; in desperation, she had to directly inquire, “How big is the size of the house Mr. Lu wants to buy? We have a variety of products such as townhouses, stacked and independent buildings. , Are feng shui treasures with mountains and mountains facing back ... “

“Let me take a look at the three apartment plans!” Lv Qiu had already selected the target long before Jianlai came and asked directly at the three townhouses by the lake.

“Please come here, I will take you to see the flat sand table!” Han Xiao was very happy, it seems that he has a big business today!

Arriving at the apartment sofa, Lu Qiujian saw that the three sets of villas were not too different from what they saw online last night, and then went to the site to look at them. The house can be delivered in a month, but it is just enough to catch up with him in Changan.

Went back to the sales department to bargain, and all kinds of extremely professional viewpoints smashed Han Xiao with sweat, and she was not relieved until the final deal.

Pay the deposit, get the contract, complete the whole procedure, the townhouse in the best location of this community belongs to Lu Qiujian.

Thought this was the end. Then I knew that Han Xiao received a call from Han Xiao the next day.

Chapter 458 - bribe

“What’s the matter?” Lu Qiujian frowned slightly, and based on the information he collected, there were no better houses nearby than these three sets. There may be single houses, but like this, it is suitable for the three families to live together. There is only one group in the triple row. If something goes wrong, it is really troublesome!

“It’s really embarrassing, this is the case. A client came to see the room in the morning and also chose one of the three sets of the households you selected yesterday. Because our sales control was off work earlier yesterday, we were not on sale. The three households you bought were delineated on the watch; so the house consultant who received him sold your house again! “Han Xiao said carefully, and was ready to welcome Lu Qiujian’s Anger, “Now do you have time to visit our sales department? Let’s negotiate how to solve this problem!”

Half an hour later, Lu Qiujian came to this sales department again. As soon as he entered, he was taken to the VIP reception room by Han Xiao. The manager welcomed him into the room and began a series of apologies. “Mr. Lu, this time is really I ’m sorry, it ’s because our work was n’t done that caused you so much trouble ... ”

“Tell me how you plan to solve it?” Lu Qiu Jianlai didn’t want to listen to this, and directly interrupted his nonsense.

“You can rest assured that our company is a powerful brand company and has a perfect handling mechanism for this kind of thing!” The manager took out several sheets of printing paper from the side. “You see, this is our company’s rules and regulations. There are detailed compensation clauses for selling such things. “

Seeing Lv Qiujian receiving the document, he explained while watching his expression change, “According to the regulations, our company will double the compensation if such a thing occurs, and we have negotiated with which customer, we can free in other areas Give him a house, you can continue to keep this villa, and we will compensate you for the same amount of cash! “

“If you are unwilling to accept cash, we can also give you three villas for free decoration, and the decoration plan is negotiated by both of us!” The manager took out another document and handed it over. “The style of the villa you bought is modern Chinese, and our company now hires Mr. Liang Zhitian, the most outstanding modern Chinese interior designer of Mingzhu, as a decoration consultant. We can invite him to carry out decoration design for you! In addition, we can also invite Mingzhu The famous Feng Shui master, Master Li Qiming, will show you Feng Shui! “

After talking, the manager looked at Lu Qiuqian with a pair of Cheng Zhu in his chest, besides delaying the other party for a long time. He did not cause any losses to him, and the delayed half-day can bring him millions of extra income, even if he does not care about the money, Liang Zhitian and Li Juming can not be moved by anyone, presumably he will not be indifferent Right?

However, Lu Qiuqian's reaction disappointed him. Lu Qiuqian laughed twice and threw the documents on the table; as the manager just said, their company is a powerful brand company, and the rules and regulations are very perfect. How can such a low-level error occur? And after all, even if an error occurs, these companies are not charitable organizations. With such a good talk, they will surely try their best to shirk their responsibilities. How can they so actively lose money and admit their mistakes?

"Oh, let's talk. What is your purpose?" Lu Qiuqian sat upright and looked down at the manager.

"Mr. Lu, this is indeed a mistake of our company ..." The psychological quality of sales is still relatively good, even in this case, he still wants to fool me.

"I think you already know who I am. Do n't forget that I am still a mathematician. There is a sentence in mathematics. A small probability event is impossible! I do n't think such a thing will happen to a company with a strict system like you. "Lv Qiuqian's eyes were a little harsher." Of course, you don't have to tell the truth. But when I find out the truth, it's not that simple! "

The manager's eyes flickered, as if he was measuring the gains and losses. Just when Lu Qiuqian wanted to lose patience and got up, he said quickly. "Mr. Lu! This time we did have some ideas. Since the truth you just came in, our staff will recognize you, just to see that you are not like revealing your identity without disturbing you!"

"There are celebrities like you staying in our project, and it will play a huge role in promoting our project! However, considering that you have never been in the advertising experience, we are worried that you will not agree to it, so this is the reason. Make a decision! "The manager said sincerely. "Our original intention was to wait for the matter to be dealt with, then send this matter as a soft article, and then build the momentum through the navy, and slowly point out that you are actually buying the house, so that you can get it once at a small price. Very good promotional opportunity! "

"This is some of our selfishness, if you feel that the price is not satisfactory, we can add it!" The manager is very depressed now, paralyzing me to make money as a grandson to make up for everyone to make money, we are giving away the money He didn't want to go up! Why is the gap between people so big?

“It seems that I am wasting my time today! Let’s go!” What he said is really interesting and sounds reasonable, but it is not the answer Lu Qiuqian wanted.

“Professor Lu! Professor Lu!” The manager quickly stepped forward to stop him. Before waiting for him to hold Lu Qiuqian’s clothes, he was gently pushed away by Bai Yiran.

The two passed through the sales department and walked straight out of the door. The manager shouted all the way. The two of them did not slow down at all. They went directly out of the gate and left the car suddenly.

“Lying trough, this seems to be a big disaster!” The manager looked at the distant car with sweat, stomping his hate, took out his mobile phone and walked to a secluded place to make a call. “Li, Lu The professor did not accept our terms. He seemed to guess something said he would go back and investigate the matter ... “

“Stabilize him, I’ll come over right away!” There was a tumultuous voice on the phone, the company’s person in charge of the project said anxiously.

“But ... but the others have already got on the car! I just went and stopped, I was pushed away by his bodyguard ...” The words hadn’t finished yet, and the phone was hung up there. .

Hey, it seems that I have to find a new job! The manager thought depressingly as he heard the beep on the phone.

At the same time, Lu Qiuqian went back to the hotel and looked at Bai Yiran on the driver’s seat. “Dao Ran, did the car that followed us find out yesterday?”

“It has been found!” Bai Yiran replied, “The car is a private car, but the person in the car yesterday was the leader of a cooperative unit that we have inspected before.”

Chapter 459 - Kaikyo

“What does that unit have to do with this real estate company?” Lu Qiuqian never believed that such a small probability event would happen to him, and it would be strange if there were no deep-seated reasons! The only person who knew he went to this property to buy a house was Bai Yaoran, who had the car behind them.

“We are collecting information, I believe there will be a reply in a short time!” The work efficiency of Bai Yiran’s unit is not covered, and the information has been sent as soon as he returned to the hotel.

Bai Yaoran quickly flipped through the information, and the answer came out, “Director Lu, I have checked it out! Which branch of the cooperative unit and another branch of the group company that this real estate development company belongs to have deep Partnership! “

The relationship is really a bit ugly! This answer did not go beyond Lu Qiujiang’s expectations, “It seems that there must be evildoers if something goes wrong! So which cooperative unit has reached some kind of agreement with his real estate company through his branch, so I Will you get this compensation today? “

“No direct evidence has been found yet.” Due to the nature of the work, Bai Yiran’s answer is very cautious. “However, in this case, I feel that it is necessary to continue to pursue it. I believe there will be results soon!”

This year’s real estate development company, which one does not have something that can’t withstand the investigation? As long as Bai Yaoran ’s unit works, he ’s not afraid that they wo n’t tell the truth; Lv Qiujiang shook his head, “If you do n’t track down, these millions will become my legal income. Bribes are really trying their best! If they use this momentum for scientific research, their units may not be what they are today! “Baidu Yixia Hey, Yan, Brother watched for free without pop-ups chapter

Maybe it is because people are willing to work hard in this respect, so they can develop to the current scale! Bai Yaoran didn’t agree with Lu Qiujiang’s views, of course, he would not say it directly, “Director Lu, do you mean we continue to investigate?”

“When the Xihe Project was opened, I already told the elders that I can ignore the pettyness in other areas, but units related to the Xihe Project will never allow this to happen! I did not expect to encounter so many on the first stop. Things that are not eye-opening, since the director of the laboratory has started the investigation last time, then this one can not let go! “Although Xi and the plan have a lot of funds, they can be wasted without a penny. Under this unhealthy trend, I don’t know how many years it will take to realize my plan! Before Lu Qiujiang thought about killing chickens and monkeys, it seems that the director of the laboratory is not enough. Now, with this large unit, I believe that some people should be scared.

“It must be given in advance, what the ancients said makes sense! They are now willing to send me millions, presumably planning to get more from me! Let these units help other provinces and cities

across the country Thousands of cooperative units have a long memory! “Lu Qiujian said with emotion.

“Understood! I will report to the superiors!” In addition to being the report of Lu Qiujian, Bai Yaoran also has the responsibility of communicating between Lu Qiujian and his unit, which has exceeded his The terms of reference must be approved by a higher level department before they can be implemented.

“Well, let’s go.” Lu Qiujian said lightly, he was still very relieved about the strength of Bai Yiran’s unit. Since he gave the matter to them, I believe there will be a satisfactory result soon.

Sure enough, just before they planned to return to Beijing, the owner of the real estate company personally called and hurried to the hotel after getting permission from Lv Qiujian to tell the story of the incident.

“Director Lu, it was my lard that made me feel guilty. I made such a mistake without temptation!” The big boss, who was luxuriously dressed and was twice as old as Lu Qiujian, continued to enter the room. Apology.

“On the evening when you signed the contract, the manager of another company of our group called me and said that someone was willing to eat all the businesses of our building, but only asked me to promise a small condition, that is, the next day. The situation encountered! I thought there was no loss to you, and it was good for the company, and I agreed! “At that time, I thought it was a pie in the sky, and now he regretted his death. In the past few days, various powerful departments visited each other and tossed. He almost collapsed.

“I don’t care about these things, please tell Xiaobai!” His guess was confirmed, and Lu Qiujian handed him over to Bai Yiran, believing that he must have evidence of Bai Yiran’s interest.

The next day, the group of passengers used the special trains that they used to drive to Beijing. This trip to Chang’an took a detailed look at the construction progress of the base and determined the time for personnel relocation; inspected the main local cooperation units and determined a number of The cooperative unit with strong strength and correct attitude has also dug out a group of borers in the scientific community, which can be described as quite fruitful.

“Next, except for the core cooperative units in the first sequence I won’t go anywhere else! These jobs will be done for you!” Lv Qiujian set up one for them this time Benchmark, let them know what standards should be used for inspections, “said the ugly saying, although China has always attached great importance to talents, but China has always lacked talents, if anyone has done

anything in this inspection What he shouldn't do, his great future is gone, and he will even accept harsher penalties! “

“Such a person is a shame in the scientific community!” Li Yan expressed more indignation than Lu Qiujian. People born in such a family are always idealistic. In the mind of idealists, the dark side will only be Deeply disgusted, Lu Qiujian, who is responsible for the audit of the cooperation unit, is very relieved.

After a long journey by train, Lu Qiujian and his party finally returned to the capital city after a long night. When they came out of the train station, Lu Qiujian found that the current capital was not the same as when he left.

The security of the crowded areas such as train stations and squares has obviously been strengthened a lot. Before he can figure out the reason, Qin Feng's call came over, and he suddenly realized that it seems that the new conference will be held soon. !

This conference will select the new elders, which will have an important impact on Xihe plan, and Qin Feng is a popular candidate for the new elders. If he can be shortlisted, Xihe plan There will be one more guarantee.

So what does he call me now? Lu Qiujian immediately pressed the answer button.

Chapter 460 - future

“Xiao Lu, have you returned to Beijing?” Qin Feng's familiar voice came from the phone. He sounded in a good mood, maybe it was the reason for going further!

“Yes, just out of the train station!” Lv Qiujian was not surprised. The confidentiality of his itinerary is relative to the average person. It is not surprising that his level is known.

“We haven't seen each other for a while? It happened that I was in Beijing this time. If you have time tomorrow, let's have dinner together and talk by the way! Remember to bring Xiao Xia, your Aunt Yuan keeps talking. I want to see her! “Qin Feng knew him very well and sent an invitation without a condom.

Ok? Presumably this will not be an ordinary meeting? Reminiscent of the present time, Lv Qiujian guessed that he must have something very important to say to himself tomorrow, “Then I'm welcome, and tomorrow I will go to you and Xiaoxia to eat with you!”

“OK, then that’s it, then I will send you the location later.” After a few casual chats, Qin Feng hung up the phone.

Back at home, the two people who haven’t met for a long time are naturally lingering again. After the lingering, Lu Qiu Jian hugged her in her arms, “Tomorrow you don’t need to go to the studio! Just happen I will rest tomorrow, I will discuss together Discuss the renovation of Chang’an’s house; then have dinner with me at night! “

“Who’s cooking!” Xia Xiao’s house property is very heavy, and he has never liked these entertainments. Lu Qiu Jianping rarely took her to attend such occasions, and today I asked her to be curious.

“Qin Feng and his wife invited us to dinner!” Lv Qiu Jian squeezed her nose. “There are only four of us at dinner, no outsiders, you don’t need to worry!”

“Is Teacher Yuan and her husband?” The woman’s thinking is different from that of men. In advance, the couple first thought of Qin Feng as a politician, and women often thought of teacher Yuan as a singer.

“Yeah, she always wanted to see you! You don’t have to worry, she actually doesn’t have a shelf, she’s kind!” Lu Qiu Jian said.

“Then do I have to prepare a gift?” The two discussed for a while, and finally decided to let Xia Xiao draw a comic for the two of them; they seemed to have nothing missing. It is not suitable for collecting too expensive things. A painting by Xia Xiao is just right.

Woke up in the morning, eat breakfast, the two came to the study to discuss the renovation of the new house. I have to say that women seem to be full of enthusiasm in this respect. Xia Xiao turned out the renderings of various styles of decoration in his computer and discussed with Lu Qiu Jian excitedly.

Talking about it and feeling that it was not addictive, and took out a brush to draw a schematic diagram; Lu Qiu Jian actually did not care much about soft clothes. He had already thought about the decoration plan when he looked at the existing house. The new house will be fully intelligently controlled. Artificial intelligence is responsible for the daily maintenance and security measures of the house. The design completed at his level is enough to keep out those who have mischief.

After discussing for a whole day, it was finally determined to be a combination of traditional Chinese style and futuristic style. The effect of the decoration should be a perfect fusion of these two styles. It has the traditional charm and the beauty of technology. The requirements are very high, and even Liang Zhitian recommended by the real estate company does not necessarily meet Lu Qiujian's requirements.

But these are not difficult for him, this small work plan can use his time off work to do it at home. Of course, Xia Xiao will also help; the two together improve every detail of the new home. Think about it as a very romantic thing.

In the afternoon, two hours before the agreed time, the two took a white car to the appointed place; after more than an hour of driving, the car stopped at the door of a quaint old restaurant.

The two of them went in and waited for a while, and the two of Qin Feng's husband and wife also arrived. "Xiao Lu, the buns in this shop are very good. The rare thing is that since I first came to the present, the taste remains the same! Try more "

Heart jam. How do you say you want to be an elder, I thought what kind of tall food to eat, it turned out to be buns! Before Lu Qiujian spoke, Mr. Yuan took Xia Xiao's hand. He greeted enthusiastically and praised him when Xia Xiao sent the painting; this lady of Qin Feng acted with great care and care, and took Xia Xiao to another place with a few words. A private room, "Their pharmacies are big buns, we two go to eat Xiao Long Bao next door!"

It seems that there is really something important to say! Otherwise, you will not even avoid these two, after tasting the famous brand buns and snacks in the old city. The conversation between the two entered the topic, "This time I invite you to dinner, I have been missing for a long time, I want to see what changes you have now; Second, your aunt Yuan wants to see Xiaoxia, this third is something you want Talk to you in advance. "

"You must also know that there is a meeting recently. According to the situation of the previous meeting, the central government has added a burden to me!" The meaning of adding a burden is naturally a promotion. Qin Feng's status has been very high before. Elder This matter has not been announced. He can now tell that he attaches importance to Lu Qiujian, "In terms of the division of work, the central government gave Xi and the plan to me! Time, we will often deal with each other! "

The professional and daily management of Xihe Plan is Lu Qiujian, but it is not suitable for such a large plan to have no direct leader. Qin Feng, who is about to become an elder, is personally in charge, which shows that the central government attaches importance to the plan. In addition,

according to Lu Qiujian's understanding of the current political situation in China, Qin Feng is very likely to become the next elder.

So if there is no accident, he will be in the highest political circle of China for the next 15 years, and his management of Xi and planning will be of great benefit to the continuity of the project; perhaps it is for this reason that the central government Give him this task?

"So, in the near future I will become the leader of the Xihe project management team! You will be directly responsible to me in the future!" Qin Feng finished looking at Lu Qiujian.

Hey, for such a large-scale project, the position of the top manager is the team leader, which sounds not domineering at all! Before coming, Lu Qiujian had guessed a few points, so I was not surprised. "I think working with you will be very happy with our cooperation in the later period. I also have the confidence to complete this plan within your term of office!" Lu Qiujian also made a package ticket here.

"Oh? You mean the application of controlled nuclear fusion within fifteen years?" Qin Feng said for fifteen years even with excitement.
