

D. School 491

Chapter 491 - Catch up

Because James and Anthony needed to help Boozer to defend Yao Ming, the defense of the outside line unknowingly appeared a loophole. Lv Qiujian seized the opportunity to break through Paul's defense and went straight into the inside line. When he came over, the first reaction was not to block but to avoid.

However, the speed of the inside player can't be compared with the outside player anyway. What Lu Qiujian is looking for is that he can still let him run. Put it on and put his arm on his arm, which is responsible for fouling. But it's not just Yao Ming alone! The basketball rolled two laps on the hoop and fell into the net, and another two plus one reached.

In the second half of the game, only four and a half minutes, the three insiders of the Dream Eight team all carried four fouls. Coach K compared the defensive deterrence of Boozer, Howard and Bosh. Stay on the field.

When Yao Ming once again scored easily in front of Boozer, narrowing the point difference to eleven points, the Mengba team could not bear it anymore, coach K called out a timeout, and after this time of thinking, he also thought Good countermeasures, "LeBron, Kobe, Dwyane! Yao Ming is an advantage and disadvantage for the Chinese team on the field! Although he can easily score inside, the speed of the Chinese team is also slowed down by him! When the game restarts a while later, you speed up the attack and immediately start to rush to the offensive rebound after the shot, and quickly counterattack after the goal is lost! Each attack must end within eight seconds! Whenever there is a chance, they will hit the basket, they Since we can make Howard's foul, we can also knock down Yao Ming! "

Has no opinion on the decision to speed up the Dream Team. D'Antoni is also a member of the coaching staff. The whirlwind of small **** he set off during the Suns is quite memorable, and the Dream Team underwent similar training under his guidance.

But the second one is a bit embarrassing, and now there is only one and a half hours left. I'm afraid it's not realistic to strike Yao Ming down? And can't the Chinese men's basketball team think of this?

Kobe Bryant made a jump shot near the free throw line, James and others quickly rushed to the basket, but faster than them was Lv Qiujian's voice, "Arab, jump to the left!" The rebound fell into Yi Jane joined hands.

“Don’t worry. Slow down!” Lv Qiujian took the basketball from his hands and slowly walked towards the half of the Mengba team. Until Yao Ming successfully settled, he began to sort out the attack, and then Yi Jianlian’s high block was unrolled. Open Paul. Hanging the ball over the head of Boozer around the front defense, the basketball fell into the hands of Yao Ming. After Yao Ming received the ball, he was facing the basket. A clean dunk ended the attack. Boozer’s round Lu Qiujian did not cause any trouble before.

After the attack, Lu Qiujian didn’t return to his own half immediately. Instead, Paul, who was caught in the dribble, didn’t relax until the Chinese men’s basketball team stood in the defensive position, and the offensive rhythm of the Mengba team was dragged down by him.

After a few quick passes, the defensive formation of the Chinese men’s basketball team was torn open a gap, Wade lightning started to throw away Sun Yue, rushed directly to the basket of Yao Ming, and soon came into contact with Yao Ming’s body In the flash of an hour, Du Feng shot from the side and slapped him **** the hand.

“Although I can’t help too much on offense, I can still get one or two fouls!” It doesn’t matter if the opponent can’t understand Chinese. Du Feng said to him with a smile.

Wade, who was so painful in his hand, also missed his free throw. He made two free throws and his rebound was grabbed by Yao Ming. From these rounds, it can be seen that all the plans made by the old coach K have failed, fighting for the frontcourt. The rebound was lost to Lu Qiujian’s accurate landing judgment, the quick attack was lost to Lu Qiujian’s personal entanglement, and Yao Ming was fouled and lost to the other players of the Chinese men’s basketball team to protect.

However, the strength of the Dream Team is that they have the best player in the world in any position-um, well, the position of the center and the point guard in this game is not counted-even if the tactics are not blocked, they can Rely on the stars’ singles to open up the situation!

Wade, who has the highest scoring average per game in the current Olympic Games, stood out. He was not bothered by the free throw department just now. He continued to get into the basket and caused Yi Jianlian’s foul to make a three-pointer with a free throw. He also intercepted Du Feng’s fast-break dunk and succeeded in facing Sun Yue for the third time. Three pointers. Suddenly the score was doubled.

The Chinese men’s basketball team did not panic in the face of this situation. Lu Qiujian still maintained a slow speed to dribbles the ball to the front court and gave it to Yao Ming. Anthony immediately rushed to join Yao Ming with Boozer.

Yao Ming didn't hit hard, and passed the ball to Zhu Fangyu. Zhu Fangyu cut the three-pointer to stabilize the situation; then Yao Ming also blocked James' layup in defense. Lv Qiujian took the ball forward and shot directly one meter away from the three-point line. The basketball responded to the net and the point difference returned to single digits again.

Just like that, you make a three-pointer, and I also get a dunk. You succeeded in a single shot in the basket, and I succeeded in shooting; both sides scored alternately, and the point difference is constantly changing.

In the third quarter, when there were still three minutes to end, Boozer finally couldn't withstand it. He pulled a foul and was expelled from the field during a defense. The situation suddenly changed.

Coach K still dared not switch to Howard at this time, he planned to put Warcraft in the most critical fourth quarter; so only Bosh was pushed up in the last few minutes, he must now be annoyed that he did not recruit Duncan or Garnett. Especially, even Bynum and Dampier! As long as there is any one of them, this game will not be so embarrassed.

Bosh was plagued by fouls. After playing, he shrank his hands. The inside line became almost Yao Ming's back garden. Coach K didn't think of using shark-cutting tactics Yao Ming's career free throw The hit is as high as 83.2%. Isn't it a point to foul him?

Yao Ming's scoring in the NBA is also a distinctive feature. In general, if a player's average score is 24 points, then his score distribution is about six points per quarter, including the second and fourth quarters. It may be a little lower because of the rest, but it is not too exaggerated.

But Yao Ming is trapped by his physical fitness, but his scoring trend is gradually declining. If he is in a better state, he may be able to score 90 points in the first quarter, and then he will continue to score six or seven points in the second quarter, and then decline in the third quarter. To four or five points, the last quarter is even more pitiful, only three or four points.

However, this game is different today. Yao Ming did not play in the first two quarters, and did not consume in the previous few games. In the third quarter, he was full of energy, but the Mengba team did not dare to block because of fouls; in his great power. Next, the score was gradually forced closer.

Chapter 492 - Shot in 0 seconds (thanks to handsome ** silk)

Bosh's defense around the front is almost useless for Lu Qiujuan. He threw the ball directly to the rebound. Yao Ming grabbed the rebound and pressed it directly into the rim. With only 18 seconds left in the third quarter, the Chinese men's basketball team Draw the difference to eight points.

The last attack of the Mengba team was handed over to Kobe. Kobe slowed the dribble outside the three-point line. When the chronograph jumped to 5 seconds, he broke through. He squeezed away Sun Yue and hit the basket. To vote, the score difference was widened to ten.

The two-digit score difference entered the last quarter. This result was not too bad. Coach K breathed a sigh of relief and picked up the tactical board to prepare for the tactics of the last quarter. However, they all forgot that there was only 1.6 seconds left in the game. End.

Yao Ming made the bottom line and Lv Qiujuan found that there was no one in front of him after the ball. After a move, he shot decisively at the top of his own three-point line. After the whistle at the end of the third quarter, the basketball went into the net and the scoreboard The score became 82-89, and the Chinese men's basketball team was 7 points behind, and they pulled back 10 points in this quarter.

this is okay too? When Lu Qiujuan hit the ball, a young baby-faced player withdrew his eyes from the TV in the basketball hall of Davidson College in North Carolina, the United States. He took the basketball and walked to the logo of the middle circle. Looking at the basket in the distance thoughtfully.

"Boys! The 2002 World Championships, 2004 Olympics, 2006 World Championships, the dream team with the best players in the world has not won the championship for three consecutive competitions!" Coach K said solemnly, tactically adjusted blocks There is not much room, and he can only find ways to inspire the players' desire to win.

In 2002, the Indianapolis World Championship dream five team lost to Argentina, Yugoslavia and Spain at home, only sixth; the 2004 Athens Olympics Dream Six team lost to Argentina again in the semi-finals, only third; 2006 The Neon World Championships in 2014, with a strong lineup of golden generations such as James, Anthony, Wade, and Bosh, lost to the Greece team in the semi-finals, and once again lost the championship. What a disappointment.

The Mengba team, who re-entered as a mourning soldier, exploded into a powerful fighting force. They took the magnificent attack when Yao Ming and Lv Qiujuan were off the court, and replaced Deron, Reed, Prince and others Blasting Hua Guo's bench into scum, Yao Ming had to reappear after only one minute.

Yao Ming's role after debut is not very obvious. Although he can easily get to the position, Anthony's turn around makes Liu Wei unable to pass the ball to the hands of his old partner, and the score is pulled away again.

So after only two minutes of rest, Lu Qiujiang played again; he didn't even take five minutes to rest for the entire game. Do n't forget that he played the 120-minute men 's football final yesterday. Does his physical fitness keep up? The audience at the scene and the national commentators on the commentary raised questions at the same time.

Even the three elders were worried at the same time. It did n't matter if they lost this game. If Lu Qiujiang was exhausted, the loss would be huge!

However, Lu Qiujiang didn't show any slight fatigue, and he had a long shot in front of Delong just after playing. Quickly stabilized the situation; then grabbed the rebound and transported to the frontcourt to assist Yao Ming to score, and the point difference became eight points again.

He was so awesome that Coach K couldn't sit still. He quickly sent Kobe, James and other main players to the field. Howard also played again after a full quarter of rest.

The Mengba team could n't resist Yao Ming 's strong attack and Lv Qiujiang 's long shot. The Chinese men 's basketball team could n't resist Kobe 's backward jumper and James 'strong breakthrough. The two sides formed a stalemate with a score difference of 8 points. 6 points. There are constant changes between 8 points, 5 points, and 7 points, and no one can increase or decrease this number.

In the fourth quarter, the game went to the fifth minute, and the situation changed fundamentally. After holding on for more than three minutes, World of Warcraft was finally sent off for the fifth foul and was sent off. Tithe, and he only had the last chance to foul.

"Good job! We beat Bosh and we'll win!" Lu Qiujiang and Yao Ming gave a high-five to congratulate, and stared at Bosh after watching.

If this is an NBA game, if there are six foul chances, it will be the turn of the day. Howard thought after the end of the game, but adapting to the rules of the game is also an essential skill for athletes. Obviously, the Chinese men's basketball team has an advantage over the Mengba team in this regard.

Yao Ming made one of two free throws, and the point difference was still six points. Then it was expanded to eight points by Anthony; when it was the Chinese men's basketball attack, Lv Qiujiang naturally found Bosh, but this time Kobe helped him and fouled the foul line first, Lv Qiujiang He threw the ball to the hoop before falling to the ground, his fifth 2 + 1 in this game.

Next I want to help Bosh block the eye. The defense of the Mengba team became a mess. Lv Qiujiang changed his strategy after two unsuccessful attacks, using the opportunity of the Mengba team's defense to shrink to send a good pass to the outside Wang Shipeng and Zhu Fangyu. In the middle, the Mengba team was entangled again.

Bosh tried his best to persist for only three minutes. In the last two minutes of the game, the interior of the Dream Eight team was all played, the Chinese men's basketball team was only five points behind, and Yao Ming had two free throw opportunities. .

Two free throws were easily thrown into It only takes a three-pointer to make the Chinese men's basketball team to tie the score; at the last moment of the game, James desperately defended this man more than twenty centimeters taller than him The center, the effect can be imagined.

The game passed another minute and a half, and with the remaining thirty seconds left, Lu Qiujiang made another three-pointer from a long distance, and the Chinese men's basketball team finally overtook the Dream Eight team, leading by two points.

At the last moment, Bryant stood out again. After receiving Kidd's pass, he avoided the defense of Wang Shipeng and Yi Jianlian and scored a layup in the air to equalize the score. At this time, there were only seven remaining games. Seconds.

Yunas decisively called a timeout. He knew that the strength of the Chinese men's basketball team could not keep up. He would definitely lose in overtime. The hope of winning was on this last shot.

"Lv, look for Yao Ming after catching the ball. Yao Ming has a good position on the inside card! Either make a foul or score directly! If you can't pass the ball to Yao, then you come by yourself! Wang, Dazhi, Du, you help them in the outside running position. Open space and wait for opportunities!" He shouted loudly.

"LeBron, see Yao Yao, don't give him any chance! Jason, Kobe, Lu Yi will take the ball!" Coach K is also arranging defense.

Lv Qiujian received the basketball passed by Wang Zhizhi with difficulty. Kidd and Kobe were the two best defensive players. Yao Ming's receiving route was blocked by James.

There is no time, Lv Qiujian leans on Kidd and jumps high!

Chapter 493 - the brightest star in the night sky

Jason Kidd was selected to the NBA All-Defensive First Team four times, and was selected to the Second Team five times; Kobe Bryant was selected to the NBA All-Defensive First Team nine times, and was selected to the Second Team three times. The two defensive defenders prevented Lu Qiujian's last shot, and coach K did not pay any attention to him.

Seeing that Lu Qiujian took advantage of his physical advantage to rely on the old Kidd to jump up, all the players of the Dream Eight team and all the fans on the scene and in front of the TV held their breath.

Kobe stretched his arms to seal Lu Qiujian's shooting line tightly. Kidd glanced at the referee while secretly leaning his elbow against Lu Qiujian's waist.

At first glance, Lv Qiujian no longer had a chance to score, but the basketball in his hand did not meet Kobe's high raised arm. He withdrew the ball from the back of the head and flicked it. The basketball fell to the penalty line arc not far away Wang Zhizhi in the top.

At the moment, Wang Zhizhi was empty. He turned around and glanced at the basket. He flicked his fingers gently. At this moment, the audience stood up and watched the basketball slowly cross the sky. It fell when the red light was on Into the basket!

The audience was like a freeze. Everyone stared blankly at Wang Zhizhi standing at the top of the free throw arc. He looked at the rim in the distance with nostalgic eyes. I wonder if he remembered Dallas on April 6, 2001. The Mavericks played against the Atlanta Hawks. When the game reached six minutes and seven seconds in the fourth quarter, he took Steve Nash's pass and shot himself in the NBA in the same position and in the same way. The first ball.

At that time, he was just twenty-four years old. It was when Feng Hua Zhengmao was the first Chinese player to land in the NBA. His body was shrouded in dazzling aura. However, because of technical and character defects, he was in the NBA. The road was extremely difficult; later, in order to get a chance in the NBA, he and the basketball center had a huge disagreement, which led to his long-term blockade.

However, he also used his actions to let the basketball management center know that the athletes are not allowed to let them knead, and used his painful price to open a blood path for later Yao Ming and others. Won more room for them.

In 2006, he returned to the national team and led the national team to win the Asian Championship with his outstanding performance; in the current Olympics, he also used his aging body to carry the inside line without Yao Ming. The burden of offense and defense, although the first few games are not as dazzling as Lu Qiujiang. But he also contributed to the invincible strength of the Hua Guo men's basketball team.

In this final, he used three points and a mid-range shot to bite the score tightly, striking the inside line again and again with his bruised body, desperately creating fouls by Howard, Bosh and others.

After Yao Ming re-entered, he did not give up the opportunity to re-enter. Ningshen focused on the defensive formation of the Mengba team; indeed, in the last second of the game, he found the opponent's defensive loophole and ran to his most confident position. Lu Qiujiang's pass was sent in time like Nash's. When he arrived, he didn't hesitate at all, he shot decisively and presented a most wonderful lore in basketball history!

Remembered his efforts for the Chinese men's basketball team, and remembered his bumpy career, his tears could not help rushing out.

"Dad. When was your most glorious moment? And I am now!" I don't know why, but the Sakuragi Flower Road of "Slam Dunk" when he played against the Mountain King was not in his mind at this time. Segment words.

"Yes, the most glorious moment in my career is now!" Wang Zhizhi raised his right hand high, and then slammed down with a fist!

Toot! The referee's whistle sounded and two points were valid. The game ended. The Chinese men's basketball team defeated the starry dream eight team with a two-point advantage in the final of the 29th Summer Olympic Games men's basketball with 89:87, and won the final. champion!

"Ahhhhhhh!" The audience instantly turned into a boiling ocean. "Wang Zhizhi! Wang Zhizhi! Long live Wang Zhizhi! Long live Chinese men's basketball!" The cry is like a mountain tsunami.

“Ambition, you are too good!” The always restrained Yao Ming rushed up first, holding the big brother in the team and shaking for a while, then Yi Jianlian and Du Feng. Wang Shipeng and Chen Jianhua on the bench ... Wang Zhizhi was instantly submerged in the crowd.

“Do you think I will definitely cast the last ball myself?” Lu Qiujuan looked at Kobe with a dull expression. “Basketball is five people! I trust my teammates!”

All the members of the Dream Eight team want to solidify and stare blankly at the scoreboard above. They still can't believe that in this game of great strength, they were only averaged 4.4 points by an NBA career. The water dispenser guard is here! Some are weak-willed and can't help crying. Nothing is more painful than being here in the final second of the final!

“Let's go, you performed very well in this game, and the responsibility for failure is on me! If I can find out the purpose of their internal killing tactics sooner!” Coach K first recovered and embraced his players one by one.

He looked at the scoreboard far away with a last look. He knew that his dream team coach's career was coming to an end! When he was in Duke, he almost made him lose the position of head coach. In the Olympics, he took away the championship from himself. Lu Qiujuan is really his own nemesis!

After the celebration, all the members of the Chinese basketball team stood on the top of the podium wearing a national flag, and the smiling prime minister who appeared to be shut up in person appeared in front of the podium in preparation for awarding them.

Shook hands next to each other, wearing medals for them, from Yao Ming, Lu Qiujuan, Du Feng ... Finally when they came to Wang Zhizhi, the applause of the fans on the scene reached the apex.

Yes, there are countless outstanding players in this game today. There are 35 minutes played, 28 points, 10 assists, 13 rebounds, 5 steals and 2 blocks. Lu Qiujuan has only half. In the time, Yao Ming scored 18 points and 8 rebounds and sent 3 hot pots. There were Yi Jianlian who rushed to the inside to create fouls. There was a veteran Li Nan who was not weak at the moment. ...

However, Wang Zhizhi, who only got 11 points and 6 rebounds, became the brightest star in the night sky of Beijing tonight! His here will also be remembered in the hearts of countless fans for ten, twenty years, and even the moment he leaves!

The national anthem sounded, the bright national flag slowly rose into the sky, Wang Zhizhi left his hand on his chest, and sang along with the rhythm; today, my career is no regrets!

Chapter 494 - Olympic best athlete

After the award ceremony, the team members returned to the locker room. Chen Jianghua picked up the champagne and was about to spray it. The door was pushed open again; Prime Minister, Qin Feng and Lu Kunqi came in.

“The boys are doing very well today!” The Prime Minister glanced at the champagne in Chen Jianghua’s hands and said with a smile, “We just came in to say hello, don’t be nervous.”

They stayed there for three minutes before leaving. Du Feng looked out his head from the door and looked at it for a long time. No one was going to come in. Then he closed the door heavily and the team began a crazy celebration.

“Brother Yao, you don’t have too much feelings sometimes! The Rockets are obviously not a team suitable for winning the championship. I think you should consider your future plans when you go back!” Mingla whispered to the corner, “I think the Lakers are a good choice!”

Los Angeles has a huge market, has excellent teammates, and has a good management team. Whether in terms of business or economics, Los Angeles is a more suitable choice than Houston.

“Well, I was thinking about the Olympics for a while! After waiting for two days to relax, I must think about it!” Yao Ming solemnly agreed.

“Okay, guys! Stop for a while, we should go to the press conference!” Yunas looked at his team members, “Lv, Yao and Dazhi, you three follow me!”

For today’s finals, the performance of these three players is undoubtedly the most concerned. The reporters will be upset if they are missing; the three quickly rushed and changed into sportswear and followed Yunas. Went out.

At the press conference, the Mengba team was already seated. Coach K and James and Kobe lost their faces. “This is a great game. The Chinese men’s basketball team is more fully prepared than we have seen in the third quarter. When Yao Ming came back, I felt like my mind was blank ... It was all my responsibility, I did n’t do my duty as a head coach, these guys were great. The failure was all because of me “Coach K took all the responsibility for the failure to himself.

“To be honest, I still feel like I’m dreaming ...” Yunas blushed excitedly, “I will treasure the video of this competition forever, thank Hua Guo These great guys in the men ’s basketball team. It ’s the glory of my life to be able to coach them! “

The speeches of the coaches of both sides ended, and it was the turn of the free questioning time. The first question really asked Yao Ming, “Yao, you have not played in the first few games. Has the team already formulated a strategy?”

“It’s not!” Yao Ming replied easily. “I have been in the recovery stage since I was injured last season. When the Olympics is about to start, I still plan to take injuries. But Xiao Lu persuaded me, Xiao Lu and I He said he was responsible for his career and helped me find an excellent doctor for physiotherapy and acupuncture recovery, so I could catch up with the final. “

“So why didn’t you play in the first half of the final?” Another reporter asked, and the answer just now clearly did not satisfy them.

“This is the team’s tactics. Everyone knows that the Dream Team is too strong. If we don’t take some small measures, we can’t find the slightest chance of winning; so yesterday, Xiao Lu told me that in the first half Give it to him! He will do his best to pull the score, he did it too! “Yao Ming said.

“Coach Yunas, are the inside killing tactics you used in the first half unethical!” This is a reporter from the United States who is not worried about the defeat of the Dream Team.

“All our actions are within the limits of the rules and do not violate any sports ethics! It happens that Mr. Nielsen Jr. is my assistant coach. I would like to ask you, you will think that the shark-cutting tactics pioneered by his father Mr. Nielsen Is it unsportsmanlike? If you want to blame, you can only blame the inside players brought by the dream team is too few! Since you have your own shortcomings. So why ca n’t we think about your shortcomings offensive? .

“Dazhi, how does it feel to be in lore?”

“Excellent, this is the best memory of my career!”

“Professor Lu, will you participate in the 10-year South Africa World Cup and Turkey World Championships?”

“It’s a pity. I think that game just now will be my last official game, and then I will put all my energy into Xi and planning!” Not to mention that my time is not enough, the country is afraid Don’t you let yourself go abroad at will? “I’m here to say goodbye to my teammates who are fighting side by side with me, and I apologize to the fans who have supported me since Changjiao.

The scene suddenly became noisy, even though there was already this speculation. But Lu Qiujian personally acknowledged this or let them feel very sorry.

“Actually, I haven’t planned to participate in the competition since I left Bayern! But I still remember the commitment to Yao Ming at the Athens Olympics, so I only had this Olympic tour, and now that the commitment is completed, my career can also be officially The announcement is over! “No need for a farewell match, no special press conference, Lu Qiujian here announced his retirement statement.

I also asked a few questions about whether he has the possibility of a comeback. Feng Hongqi stood up, “Professor Lu, according to the latest news, you and the double-break 100 meters 200 meters world record Olympic double champion Bolt and Phelps, who won eight gold medals and seven world records, became a popular candidate for the best male athlete of this Olympic Games. Who do you think will win this honor? “

Bolt and Phelps have very good results, but they are both champions in the same major event; Lu Qiujian won the championship in two different projects, football and basketball, considering The popularity of football and basketball, as well as the difficulty of winning the championship of two teams in China, Lu Qiujian seems to have a greater chance of winning this honor.

In the closing ceremony of the second day, Lu Qiujian became the flag bearer of China, and he also defeated Phelps and Bolt to be the best athlete and became the champion.

After the celebration, athletes from various countries returned to China one after another, and Lu Qiujian also packed up his bags and prepared to return to Chang’an to continue his research work, but Feng Hongqi’s phone call stopped him.

“Professor Lu, I don’t know if you know, I just received the news, now there is a news that is very bad for you ...” Feng Hongqi’s tone was full of excitement and anger!

“Oh? What’s the matter? Don’t hurry and say slowly!”

Chapter 495 - "Nature" and Doping

"I just got the latest issue of" Nature ", there is an article about you!" Since becoming Lu Qiujian's counterpart reporter, Penguin has given Feng Hongqi no matter whether he can understand or not. A large number of scientific journals, the first thing he received after each receipt was to read if there was anything related to Lu Qiujian.

"What's so strange about this?" Lu Qiujian was a little puzzled for a while. Isn't it normal for an article about himself to appear on "Nature"? Especially the two major fields of theoretical physics and mathematics.

"But this article is not about your academic achievements!" Feng Hongqi looked at this article's title with extreme anger, and his tone of speech was also excited. "The title of this article is: Why do the outstanding performances in the Olympics provoke people? Doubt? There is another one: maybe we can catch the subtitle of the cheater! Its author is Evan Callaway from the University of California, Santa Cruz. Callaway has doubts about your continuous participation in high-intensity competitions in the article. ... I think you might be taking ... taking certain medicines that help increase physical fitness ... "

Feng Hongqi said the meaning of the article intermittently. Lu Qiujian shook his head and asked directly, "Did he say that I took a stimulant?"

"Although I didn't say it clearly, what I want to express in the article is indeed this meaning!" Feng Hongqi solemnly reminded, "Professor Lu, I called you as soon as I saw the article! I think you'd better make preparations, I estimate that it won't take long before the media from all over the world will find you for an interview! "

"Okay, I know, if I have anything to say to the media, I will definitely notify you as soon as possible!" Lu Qiujian voted for Taobao Li. After finishing the call, he hung up the phone and said to Bai Yaoran. "Go to Beijing Normal University! I won't go back to Chang'an today!"

Bai Yaoran didn't ask why, and immediately drove the car to Beijing Normal University; the most important thing now is to get the magazine to see what the article said. Lu Qiujian just dialed Professor Zhang's phone as soon as he sat down. "Hello, Professor Zhang. I have something to trouble you! I'm on my way to Beijing Normal University, and I will be there in about an hour; I want you to help me find the latest issue of" Nature " "You know that I have stayed at the hotel these days, which is a bit inconvenient!"

"OK! No problem, why, is there any important article in this issue of the magazine?" The mathematics community pays more attention to the four major journals, so Professor Zhang has not seen that article.

“A familiar reporter called me just now and said they published an article about me ...” Lu Qiujian relayed Feng Hongqi’s words to Professor Zhang.

“What article is this called? Do you think we are taking stimulants when our grades are good?” Professor Zhang was also angry. “I asked someone to send the magazine right away, and you will come straight to my office in a while!”

“Okay! Excuse me!” Liao Qiujian hung up and called Ye Chu and asked them to immediately go to Professor Zhang’s office to wait for themselves. He already had a preliminary plan for how to handle this matter.

Then his phone did not stop ringing along the way. Some familiar reporters asked him what he thought of the matter. Some teachers from Princeton expressed concern. Some students from the University of Munich despised Callaway, some colleagues from Cern, some Chinese. Other acquaintances in the country ... It wasn’t until the electricity was gone that it was quiet.

Went to Professor Zhang’s office in Beijing Normal University. He blacked out a magazine and said, “Xiao Lv, let’s take a look first! There is no conclusive evidence in the whole article. Just intentions and speculations. When will” nature “fall to such an article?”

Lv Qiujian saw Ye Chu and others on the side were also very angry, thinking they had read this article; picked up the magazine and turned to read that article carefully, this article is not long, just one Over a thousand words, the author named Evan Callaway questioned Lu Qiujian’s performance at the Olympics.

According to his statistics, Lu Qiujian participated in a total of 5 football games and 5 basketball games in the 18 days from August 7 to August 24. Each of these football games has 90 minutes, and the finals have played for 120 minutes. The playing time of each basketball game is also more than 32 minutes; on average, it takes less than two days to participate in a high-intensity game, which is rare in professional games.

Even more surprising is that Lu Qiujian has maintained a very good state in the two-line battle. Not tired at all; according to his statistics, Lu Qiujian’s average running distance in five football matches is 13.2 kilometers, which is the first place among all Olympic men’s football players. In the final, his running distance is as high as 17.6 kilometers, breaking the record of 16.1 kilometers of football running distance created by Beckham against Greece in the 2001 World Cup preliminaries.

On the second day of creating this record, he participated in the final of the men's basketball team without any fatigue, playing 36.6 minutes. In the confrontation with James, Kobe, Kidd and other top nba players There is no downfall; this can't help but cause people to doubt Lu Qiujiang's physical fitness. Is this what normal athletes can do?

Lu Qiujiang finished reading the whole article, and it is exactly the same as what Professor Zhang said. There is no evidence in the whole article, but Luo listed a few of Lu Qiujiang's seemingly exaggerated performances. , He doubted the honesty of his achievements, "Hehe, Phelps won eight gold medals and seven world records in the Olympic Games, Bolt won 100 meters and 200 meters gold medals and broke two world records at the same time. To doubt, but just found me on the head, can't we yellow people get good results in sports games? "

In any case, the prejudice reflected in this article cannot be concealed! Lack of logical argumentation and lack of rigorous logical analysis, Lu Qiujiang did not know how such an article would be published through review.

"Professor Zhang and Professor Lv bother you." Just when he finished, Assistant Xiao Liu knocked on the door and came in, he said a little uncomfortably, "Many reporters came downstairs and said they wanted to interview Professor Lv, you see ... "It seems that he also knows about this article.

"Xiao Lu, do you see?" Professor Zhang turned his eyes to Lu Qiujiang.

"Since you have come, then see you! Professor Zhang, I would like to borrow the meeting room in our department. Is it convenient for you to see?" Said Lu Qiujiang.

"It's just like your home, just use it if you want to. Isn't it right?" Professor Zhang told Xiao Liu to go to the meeting room.

"A few of you will go with me too!" Lu Qiujiang called Feng Hongqi and beckoned, beckoning Ye Chu and the three of them to go to the reporter with themselves.

Chapter 496 - Don't say i bully

Below the Beijing Normal University, more and more reporters received the news; they waited while discussing the article of "Nature".

"Hey, I said that this American can't afford to lose?" A reporter said contemptuously, they had just turned out Evan Calaway's identity, "Watching their dream team lose, they began to doubt Did we use stimulants? Want me to say that this grandson is too kind! "

There was a chord next to it. The championship of the men 's basketball team and the men 's football team was enough for the Chinese fans to remember for a lifetime. Seeing that someone can block their hearts, "It is! And they are not the first time to lose. They lost to Greece before. , Why didn't you see them post in Argentina? "

Of course, there are also spirits of foreigners who hold different opinions, "If I say that our country has so many cases of doping in swimming teams and track and field teams before, it 's no wonder that people will be so suspicious of themselves; I think they should be seen when others criticize themselves First think about what you did wrong! "

"Then I will slap you now. Can you figure out if you have to do it right there?" How can it sound uncomfortable? Someone immediately choked him. "There is no evidence and you directly publish such an article. Do you think it is appropriate? "Nature" is a serious scientific journal. Do you think it's your gossip tabloid? "

"Just remember that Chinese athletes take stimulants. Do the Americans eat less? They are the countries that take the most stimulants. Montgomery, Jones, Armstrong Have n't taken the medicine? Why do you Staring at our athletes? "Someone threw out the dry goods.

"I'm fair!" Well, someone used the classic opening line of the pull frame. "When I saw Phelps win eight gold medals in a row, I also thought about it, lying guy, this guy. Is n't it drug use? It must have been the same idea of the American people when they saw Professor Lu 's performance! It 's just that the American people have freedom of speech and allow such articles to be published. If I open my speech, I will definitely send me to Phelps His question was written in the newspaper! "

"As a media practitioner, you should have a conscience. Pursuing the facts is the basic morality of the media practitioners! Is there any truth in your questioning of Phelps? Free speech is not nonsense! I don't think you are suitable for doing it at all. Reporter, you should still write a net article! At least you can YY anyway there! "His remarks also caused a rebuttal.

The quarrel downstairs has a tendency to intensify, some impulsively even rolled up their sleeves, but fortunately Xiao Assistant Liu appeared in time to divert their attention. "Everyone, the conference room has been packed, please show your ID and enter in order, Professor Lu will make a statement on this matter!"

This time they could not care about the quarrel, and swarmed to Assistant Xiao Liu. When they entered the venue, they found that there were three young people sitting next to Lu Qiujian. Some people who had paid attention to the Olympic reports and recognized one of them was Ye Chu, a

member of the men 's basketball team and the men 's football coaching staff, but the other two did not know. Too.

Seeing that the meeting room is full, Lu Qiujian is no longer talking nonsense, and he began to speak directly, "I think the purpose of everyone coming here should be the same? So I will not talk nonsense, let me talk about my matter first. Attitude!"

The scene was quiet for a short time. The reporters took out all kinds of guys and prepared to record Lu Qiujian's words. Lu Qiujian said in a calm tone. "I used to think that" Nature "is one of the most influential and prestigious natural science journals in the industry, but I regret to see that it would publish such an almost unbiased article of prejudice. Although it is only one The press release has no peer review and no critical judges; but as a channel for public access to science and understanding of science, authors and editors should at least provide readers with the correct facts and appropriate context, and they obviously did not do it. "

"How about participating in ten games in 18 days?" Lu Qiujian asked, "We can look at the schedule of the NBA regular season, starting from November to ending in April. In just over five months, each team wants to After completing 82 games, an average of more than two games a day! This also adds to their time to fly to various cities! "

"And the Olympics only need to be held in Beijing! The duration is less than 20 days! It is true that football games consume more energy than basketball games. But there are many players in the NBA who can complete all 82 games, and even add Preseason, playoffs; and I only need to participate in 10 games in 18 days! Such physical fitness seems to be smaller than those NBA players! "

"Kobe Bryant participated in a total of 82 regular season games last season, averaging 38.9 minutes per game and 21 playoff games. He averaged 41.1 minutes per game! After spending so much for the entire season, he can I scored double-digit points in every game at the Olympics! And I have been much easier than him in the past year! "

"In my usual work life, I also pay attention to maintaining my state, and my physical state has always been very good; from the beginning, my physical condition will be better than these NBA players who have worked hard for a whole season! At the end of each game, I have a urine test, and the results of the drug testing center have proved my innocence! "

"I don't know why Mr. Evan Callaway so questioned. Why did Nature publish this article with no scientific value!" Lv Qiujian's voice became serious, "If I am just an athlete , Maybe I can only send a few soft protests! "

“But neither Mr. Callaway nor Nature magazine seems to have forgotten that my job is as a scientist! In the face of such a stigmatizing of my own reputation, I will fight back in a way that belongs to a scientist!” Lu Qiujiang The words made the scene suddenly boil, and it seems that this time I caught the big news! How will Professor Lu fight back?

“First!” Lv Qiujiang raised a finger In view of the low quality articles published in “Nature”, I can think that this magazine has lost its original level, so I am here Solemnly declare that from now on and the team I lead will not post even an article to Nature! I also refuse to comment on any articles published in “Nature”! “

“Second! For Mr. Callaway’s article, I will refute one by one from the scientific point of view!” Lu Qiujiang shrugged. “Of course, if I personally go out of the horse, it will be too bullying! So I plan to use this It’s up to my students!” Lu Qiujiang reached out to Ye Chu and others.

Chapter 497 - Counterattack

“Xiaoye, I will give you three days, can you handle this?” Lv Qiujiang turned back and asked.

“It doesn’t take three days!” Ye Chu and others looked relaxed. This article is full of loopholes, and you can easily find a bunch of mistakes and omissions, “Give us two days, we guarantee to complete the task!”

“Well, then two days! I will send your article to” Science “in two days.” These two magazines are competitors for many years. Presumably, “Science” will be happy to see his old opponents come out.

“Okay, what I want to say is over, what else do you have to ask?” Lu Qiujiang’s two moves are very sharp. High-quality articles are the lifeblood of a scientific journal. He is currently the world’s top One of the mathematicians and one of the theoretical physicists announced that he would no longer submit to “Nature” and refused to comment on the articles published in their magazines, which means that anyone who wants to communicate with this authority in the fields of dark matter, high-energy physics, etc. , Will not choose “Nature” magazine, they will lose the top articles in these fields for a long time; Lv Qiujiang’s status in mathematics and physics is like Tang Jiasan’s status in the web literature, If Tang Jiasan announced that he would leave the starting point, it would surely cause shock at the starting point! And it will take away a large number of readers and authors, this loss can be great.

This trick is a punishment for irresponsible “Nature” and random review. The punishment for Callaway is better than refuting his article; the other party’s identity in the scientific community is really comparable to that of Lu Qiujiang. It’s too far to go, he won the game and there is nothing to

show off, so he pushed Ye Chu and others to the stage, lost to me, you can also show off, lost to a few guys who have not graduated from graduate school. Is there nothing to say?

“Uh, Professor Lu, I would like to ask you if you have done this too much? This is just a trivial question. You only need to explain it clearly! Don’t you have to make such a big move?” After a long time, Only then did the reporter raise his hand weakly and ask, they also thought that Lu Qiujian would fight back. But did not expect such a sharp counterattack.

“I think if the ordinary athlete is being questioned, what should he do?” Lu Qiujian asked, “He doesn’t have enough scientific knowledge to refute each other’s articles, and the results of the drug test are not recognized by them. What will he do at this time? In fact, if this article is published in a gossip newspaper, or even a comprehensive newspaper or magazine, I will not be so excited, because the editors of these magazines may not have the expertise to distinguish this article, but “Nature” is different! I don’t believe that the editors and reviewers of “Nature” will judge the quality of this article! “

“If they can’t, then I think that the level of” Nature “has dropped to the level of even university-level journals, so why should I send the article here? If they can, they still decide to publish it. This article. Then the situation is even more serious, a journal that has lost its fair judgment is completely unnecessary to survive! “

“However, athletes in our country did have a record of taking stimulants before. It seems normal for them to have such doubts?” Which reporter downstairs stood up again.

“I remind you that China’s pharmaceutical technology is not ranked high in the world. The vast majority of pharmaceutical laboratories in the world that develop and manufacture stimulants are in Europe and the United States. I think you have probably heard Barco of the United States. The scandal that broke out in the laboratory that year? This is the largest stimulant scandal in the history of the world in San Francisco, the United States! “Lu Qiujian said with a smile.” Compared with the technology of stimulants, we are still worse than them. ” Far, why doesn’t Nature question others? Must find my head? “

“They thought that publishing such an article, and then ended up with at least a few tickling protests? Unfortunately, I just have a little counterattack! I think they will be pleasantly surprised by the news! “Lv Qiujian’s move is also a double-ditch, that is, counterattack” Nature “, but also to warn those who peep at themselves in secret, don’t think I speak well, and if I annoy me, I will be ready for revenge!

“Professor Lu, our country’s tradition is to complain with virtue! Do you seem to be a little stingy?” He asked somewhat unwillingly.

“Who said that repaying grievances with virtue is the tradition of our country? This sentence comes from” The Analects of Confucius. “The original text is: or saying:” Reporting grievances with virtue, how is it? “Zi Yue:” Why do you repay ethics? “” Lu Qiujian glanced at him. Although he didn’t speak, everyone else has seen the meaning of this look. Who taught your language? Are you still a reporter at this level?

The man sat down blushing, and the reporter next to him laughed. Just now, he hasn’t looked good in the following, but now he can breathe a sigh of relief.

After half an hour, these reporters hurried to the office while making a phone call This time the news must be sent out in the shortest time!

“Don’t be too excited! It’s just a trivial thing!” After the reporter left, Professor Zhang came out to comfort Lu Qiujian.

“This is just the prejudice formed by the long-term power of the West! It is expected that we will face this prejudice and arrogance many times in the future for a long time!” “The world has become accustomed to the power of the West, both in the West and in us, so they will issue such doubts after their dream team is defeated, so our reporters will think that their doubts are reasonable. of!”

“Look, that’s Kobe, James and Wade! Such a luxurious team will be defeated, if there is nothing behind you, do you believe it?”

After talking, Lv Qiujian turned around and walked to the window, looking into the distance through the window, “In the past, I defeated the proud team of the Americans on the basketball court. Beat NASA, beat Lawrence Livermore Labs, beat Harvard, Yale, MIT ... and Princeton! I do n’t know if they will be as proud as they are today! “

I really ca n’t wait to see what happens when the Americans hear the controlled fusion of China ’s sight! By that time, their expressions will be very interesting, right?

Thinking of this, Lu Qiujian couldn’t help laughing out loud! That day will not be too long!

Chapter 498 - This is called Xueba

Lv Qiujian's remarks inadvertently revealed the goals of Xi and the plan. The Lawrence Livermore Laboratory is affiliated with the National Nuclear Security Administration of the Ministry of Energy. His main mission is to ensure the country's nuclear weapons by adopting advanced science and technology. In addition to being safe and reliable, it is also responsible for the study of controlled nuclear fusion.

The laboratory is located forty miles east of San Francisco and is managed by the University of California; it has more than 8,000 staff members, including 3,500 scientists, engineers, and technicians, as well as billions of dollars in equipment and Annual funding of US \$ 1.6 billion.

There is BlueGene / L, the world's fastest supercomputer, with a peak speed of 360 trillion floating point calculations. It is a super machine jointly produced by Livermore Laboratory, IBM and the National Energy Department of the United States.

The national ignition device is an important result of the laboratory, but the investment of the Mi Guo team in this project is only 3.5 billion US dollars, which is far from comparable to the Xihe plan; the reason why this situation occurs is that Mi Guo feels controllable nuclear The application of fusion is still far away. The second reason is that since 2005, the shale oil and gas production technology of horizontal well drilling + volume fracturing has been broken by the Petroleum Service Company of the United States. Later, the volume of horizontal wells has been increased rapidly, and the output of shale gas has increased rapidly. From 2% of total natural gas extraction in 2000 to today, this proportion has risen to nearly 20%; thanks to this technological achievement, although they still need to import oil from Canada, the United States has begun to gradually get rid of OPEC and The Middle East's dependence on oil is less urgent than the need for controlled nuclear fusion.

This scientific and technological achievement of the United States is a good thing and a bad thing for them. The advantage is that they can no longer worry about energy issues in a short period of time. The disadvantage is that shale oil and gas will also be cleaned one day. The mining process will also cause problems such as waste of water resources, water pollution, and minor earthquakes.

Shale oil and gas is still a traditional energy source, and its prospects are far from comparable to controlled nuclear fusion. This is like a country that reduced its investment in aircraft carriers during the Second World War because of the significant improvement in battleship technology. They acquired tactically. Certain advantages of going back, but they have taken the wrong path strategically.

"The three of you go back and prepare the article! If you lose the teacher's face, you will be thrown away!" Lv Qiujian hurriedly diverted the topic to avoid what Professor Zhang guessed.

Ye Chu and others left the office in a smoky way. Preparing to refute Callaway's article, Professor Zhang looked at Lv Qiujian with a smile and shook his head, "You look like this now, but you have become an outrageous school bully!"

The emphasis of the word "student" in Professor Zhang's mouth is on the word "character". A simple translation can be interpreted as academic hegemony. Those who can be called academic hegemony must have a strong influence in a certain field; in the past, the term was often used to criticize those who used their academic influence to suppress young scholars. Authoritative, now Professor Zhang said this with praise. He already recognized Lu Qiujian's status in the fields of mathematics, high-energy physics, dark matter, etc. in these fields. There is no doubt that he is a huge influence, and anyone who wants to provoke him will pay a heavy price.

The next day, when Lu Qiujian had just arrived in Chang'an, the news of this press conference had spread all over the world. The Nature magazine, which thought it was just a trivial trifle, suffered a blow. They did not expect Lu Qiu Jian's counterattack will come so sharp.

Scientists such as Lu Qiujian are striving to please any scientific journal in the relevant field. The high-quality articles they provide are the core of these journals; and Lu Qiujian is not yet 25 years old this year. The output law of a general scientist will be in a stage of vigorous output of academic achievements for a long time to come. Losing him means that Nature will lose top articles in the fields of high-energy physics and dark matter for a long time to come. This result is unbearable for them; however, more serious consequences are yet to come!

"Hello, Dimir, I'm Humphrey!" Just when the editorial department of Nature Magazine began to have a headache for this matter, a certain editor's phone rang.

"Ah, Professor Humphrey, the weather in California has been good recently, and your life in school must be very pleasant!" Professor Humphrey has contributed to "Nature" many times and is an old acquaintance with the editor of Demir. "Are you calling to ask about your latest submission this time? This article has passed peer review. We are planning to find a good position for you in the next issue!" Dimir quickly told him the good news.

"Oh! No!" Professor Humphrey's tone became hurried, "I called this time to remove this article, you must not post my article to the next issue!"

"But why? Did you find the loophole in this article in the later experiments? If so, we can postpone the article and wait for you to readjust it before publishing it!" For authority like him. "Nature" is still very considerate.

“Not in the next issue, nor in the next issue! My article has no problems, but I can’t give it to you! Dimir, we have been very happy working together in the past, but now, I think we I have to say goodbye!” Professor Humphrey said in a helpless tone.

Dimir stood up with a brush. There was an ominous guess in his mind, “Dear Professor Humphrey, please, for the sake of an old friend, can you tell me what made you decide to give up” Nature “?”

“You know, this article of mine is about dark matter! In addition to showing my results, I also want to let more colleagues see it and discuss my point of view.” Humphrey Professor Lai said slowly, “For a scientist, peer discussions can always bring me a lot of inspiration, and I also attach great importance to this. As a top journal in the industry, Nature will make my articles more Many peers have seen it and provided me with valuable advice, which is why I chose you! “

“Yes,” Nature “has been committed to promoting the exchange of scientists around the world!” Dimir has guessed the reason for Professor Humphrey’s request for withdrawal.

“But, just this morning, I saw that Lu from China announced that he was not commenting on the articles published in Nature! Then the meaning of my contribution was half of it!” His tone was full of helplessness.

Chapter 499 - Ice and Fire 2

“Lv is the biggest authority in the field of dark matter, and his opinion is very important to me! So Dimir, I can only say sorry to you now!” Professor Humphrey summarized his words with an apology.

“But Professor Humphrey, we are” Nature “! Did you easily give up a chance to get on” Nature “?” Dimir now feels like hearing a player reject Real Madrid’s invitation .

“If you can’t get Lu’s evaluation, then even” Nature “doesn’t make much sense! Okay, Dimir, I still have an experiment to complete. Today’s call is here! Remember to withdraw it for me Manuscript, I think I might try “Science”! “Humphrey said the word that Dimir least wanted to hear.

“Editor-in-chief, Professor Humphrey asked to withdraw his manuscript! I think we are going to readjust the publication plan for the next issue!” Dimir put down the phone and said to the editor in frustration.

“Oh my god, another request for withdrawal!” The editor-in-chief rubbed his hair that wasn’t much. “With Professor Humphrey’s article, this is the third person to request withdrawal!”

“Who else wants to withdraw the manuscript?” Dimir couldn’t help but ask, did Lu Qiujiang’s statement really have such power? It seems that someone is responsible for agreeing to publish Callaway’s article.

“The CERN project team’s article on the latest collision experiment, the research results of the Brookhaven National Laboratory on the Higgs boson!” The editor-in-chief threw out two heavyweight articles, “Gosh! I should Where to find high-quality articles to fill these gaps! “Even” Nature “, it is not always possible to encounter such articles with great influence.

“Mr. Editor-in-Chief, Professor Xuft of the University of Munich asked to remove his article!” There was another bad news before he was over with emotion!

“Should I be fortunate that we haven’t prepared too many mathematics articles now?” The editor-in-chief is now helpless, he shouted loudly on the table, “Now, contact Professor Lu immediately and ask him how he can get him back if!”

“Nature” here is bleak, but “Science” is full of joy. “Professor Humphrey, we have received your article. We have to say that this is a high-quality article. It has very unique insights on the composition of dark matter and its effect on the universe. I think that once published It will lead to a heated discussion of physics! “

“So will my article be published?” Professor Humphrey looked nervous.

“Although we have not yet carried out peer review and review, but based on my years of experience as an editor in” Science “, the chances of your article being published are very great! Just wait patiently for the good news!” The editor uses enthusiasm Reported the good news to Humphrey.

“That’s awesome! Thank you for your notice!” Humphrey asked another question before hanging up the phone, “Mr. Sullivan, if it passes the review. Will my article be published in the next issue?”

“Ah, if we speed up the speed of reviewing the manuscript, your article may indeed be reviewed before the next issue of the magazine!” Speaking of Sullivan’s tone, “I want to publish it immediately, I’m afraid there are some problems!”

“What’s the problem? Why can’t it be published since it’s all passed?” Professor Humphrey was quite puzzled. It was quite unfavorable to publish a later issue and get comments from peers for a period of time. Go to arXiv or contact Lu Qiu first?

“Dear Professor Humphrey, if you received your article before today, I can guarantee that it will definitely appear in the next issue, but things have changed a little bit since the morning!” Variety. Sullivan couldn’t help laughing.

“So I am not the only physicist who contributed to you today?” The little brains engaged in scientific research are not enough, Professor Humphrey asked.

“Yes, CERN, Brookhaven National Laboratory, University of Munich ... they all submitted submissions to us temporarily!” Sullivan paid attention to the wording and did not say that he would resubmit the manuscript. “You know Yes, “Science” is a comprehensive journal. We must control the proportion of articles in each issue of each magazine. We cannot publish too many articles of high-energy physics in the same issue! “

“So well, I think I get it!” Professor Humphrey sighed in frustration. Despite his confidence in his article, he did not think that it could surpass the scale of large research institutions such as CERN and Brookhaven National Laboratory. Now he only has to wait another month, I hope there will be no more in this short time. Substantial articles are submitted to “Science”.

“Mr. Editor-in-chief. Another heavy-weight manuscript was withdrawn from” Nature “and voted for us!” Sullivan hung up and thanked the editor in chief.

“Awesome, Sullivan! Thank you Mr. Callaway! I just want to award him a gold medal! He did what we haven’t done for many years!” The editor-in-chief happily exclaimed Whistle.

“I think we can hire Mr. Callaway to let him continue to contribute to” Nature “! In this way, we will not have to worry about the quality of manuscripts of high-energy physics for a long time in the future!” Someone stood up A bad idea came up.

“Unfortunately, the guys in” Nature “won’t be so stupid!” The editor-in-chief shook his head. “If they really do, I think we can provide Mr. Callaway publication fees and review fees. And provide him with generous Of the manuscript. “

“Fortunately, Mr. Callaway chose” Nature “instead of us!” Everyone was for the first time pleased that someone chose “Nature” between “Nature” and their own magazine.

“Even if he voted for us, I don’t think we will let him pass the review!” None of us here forgot the plagiarism incident of Poincaré’s conjecture, which gave them a full understanding of Lu Qiuqian Destructive power, after that incident, they haven’t gasped for a long time.

Fortunately, mathematicians are more inclined to publish articles in the four major journals, which caused their losses not to be serious; however, high-energy physics is different. This type of article is very popular among them! “Nature” has more losses this time than they do. It is expected that they will lack high-quality papers in the field of high-energy physics for a long time in the future.

The editorial department of “Nature” sighed everywhere, and the editorial department of “Science” was almost open to celebrate with champagne. Two similar editorial departments showed different scenes of ice and fire, and it was all because of Callaway. That article.

Chapter 500 - Times have changed

“I received an email from Professor Lu!” The editorial department of “” has really received too many surprises in the past two days, but this is obviously more exciting than the previous ones.

“Is it a reply to Callaway’s article? Open it and see!” The editor-in-chief immediately ran to Sullivan’s back and looked at his screen without blinking.

“Yes! It’s a reply to Callaway!” Sullivan answered with a glance at the headline, then opened the text and scanned it carefully.

“Did Professor Lu personally refute Callaway? It’s like Jordan and high school students playing, the strength is simply too disparate?” How many real materials can scholars who can use this method to gain attention? Lv Qiuqian should not be too easy to defeat him.

“No, it is not Lu Qiuqian’s own article! He is the corresponding author. The authors of this article are three graduate students of the Mathematics Department of Beijing Normal University.” Sullivan replied while watching, “but the quality of this article is comparable to Callaway. Articles are much taller! They refute every argument of Callaway article one by one! God, I can’t bear to read it anymore, Callaway is refuted for nothing! If you let others read this article, you will definitely think These three gentlemen are professors and Callaway is a careless undergraduate! “

“Isn’t that just right!” Nature “publishes inferior gossip articles, and we come up with high-quality rebuttal articles. In this comparison, I believe everyone will know who is the more authoritative magazine!” Happy smile, “This article will be reviewed as soon as possible, and strive to be published in the most eye-catching position of the next issue!”

“But the next issue is full!” Sullivan reminded the editor.

“Will these simple things let me do it myself? I don’t care about the process, I just need this article to appear in a position that will satisfy me!” The editor happily issued the order.

At the same time, Mr. Callaway who wrote the article questioning Lv Qiujian taking stimulants had an unpleasant life, “What? You said you want to take down my manuscript?”

“Yes. Mr. Callaway! We have reviewed and found that there are many loopholes in your article and did not meet the publication standards of” nature “. I think we all made mistakes before, now it is time to correct this mistake Alright! “Dimir now can’t wait to reach out from the phone to strangle Callaway. See how much he has caused to “nature”.

“Since it is published, it proves that you have approved my article! Now you say that my article does not meet the requirements! I think I need a reason!” Is it easy to brush an article on “nature”! You can’t do this to me.

“In the history of” nature “, there have been many times to withdraw the published manuscript, you are not the only one! As for the reason, I think I have just said that your article does not meet our publication standards, before ‘S publication is an unmistakable mistake, and now is the time to correct this mistake! “Yes, this is a costly mistake!

“Okay, you don’t need to say more. By the way, I have reminded you that” “has received a manuscript from Prof. Lu to refute your article. I believe you will see it soon. You still have to think about how to deal with it! Goodbye, Mr. Callaway! “Dimir hung up the phone without hesitation, he never wanted to talk to this guy again!

Fak! Callaway dropped the phone angrily. What’s wrong with this world? I just questioned the sports performance of a Chinese athlete and suffered such unfair treatment? He obviously forgot that Lv Qiujian’s participation in sports is just a hobby, and his main business is a scientist; even if he doubts Phelps, he is better than doubting him! But then again, if he doubts that Phelps’s words may not be able to appear in “nature”!

When the articles by Ye Chu and others were published in “”. Callaway’s academic reputation has even fallen to the bottom, and even “Nature” has been widely questioned. How did such a flawed article appear in their magazines? Are their review levels reduced to such a degree?

Even “nature” published a withdrawal statement for Callaway in the new issue of the magazine. Neither can the negative effects of this incident be recovered.

“What’s wrong with this world?” The editor-in-chief of “Nature” expressed the same emotions as Callaway. “We just published an ordinary article. Why do we suffer such serious consequences?”

“Mr. Editor, times have changed!” Dimir said with emotion, “After Li Zhengdao and Yang Zhenning won the Nobel Prize, it proved that the Chinese can also make a difference in the scientific community. When Lu Qiuqian won the award, they were already in The scientific community has a considerable right to speak! And a series of scientific research programs currently formulated by Hua Guo, such as Xihe plan, cepc, etc. And gradually expand their influence! “

“Although there is still a certain gap between their strength and the European countries, it is no longer an era in which we can be left at will! Lu’s counterattack is a good statement! And he is still so young. I think we will learn to get used to it in the future. Respect them! “The scientific community is a circle of strength, and Lu Qiuqian has already demonstrated his strength. It should n’t be treated like this, maybe it ’s really something we did wrong.

“Have you not contacted him yet?” The editor-in-chief stopped complaining. Now that the complaint can’t recover the loss, let’s think about how to make it up!

“His phone can’t be reached The email didn’t reply! Maybe he is still angry with us!” Dimir replied cautiously.

“Go find a scientist who has collaborated with him! I think we need a middleman!” The editor-in-chief waved weakly and motioned to Dimir to find someone quickly.

After some twists and turns, they found Director Guo of the Department of Physics of Beijing Normal University. After agreeing to a series of conditions, Director Guo called Lu Qiuqian’s phone, “They have already removed the manuscript, and they also agreed to apologize to you. ... “He first laid out the conditions of” nature “, and then persuaded,” This result is almost the same, I think you still shake hands and make peace! Turning it over, if it continues, it will not benefit us. ! “

“Come on, I will forgive them when their apology statement comes out!” Lv Qiuqian knew that if he persisted this way, it might affect other Chinese scientists who contributed to “nature”, “I don’t have time to take care of them now, This is the case! “

After talking about it, he hung up the phone and looked at the by-product developed by the Xihe Planning Research Center. What price should he sell?
