

D. School 521

Chapter 521 - Long-term plan

“I hope that one day, those who read” A Brief History of Time “,” Cosmic Waves “, and” When Humans Start to Look at the Starry Sky “in high school will regard the broadest universe, the smallest particles, and the most difficult mathematical problems as the objects of future research. Children, when they say their dreams, they will not be ridiculed by everyone, nor will they be discouraged by their parents. They can get some reasons for supporting their ideals from the programs of these reporters! “

Huaguo is a country with too much realism. Parents are always accustomed to choosing a broader path for their children, such as college entrance examinations and civil servants. In this way, children with distinctive personalities are wiped out under the parent ’s instruction. The ideal became the kind of person they did not necessarily want to be when they were young.

Of course, the ideal Lu Qiujian said was not the ideal of Mr. Guo whom he had encountered at the entrance of Peking University, but the ideal of stepping down to the distant goal step by step.

There are many kinds of ideals, such as becoming a scientist, becoming a painter, working as a musician, even becoming a qualified housewife, and running a small family.

Want to become a scientist is not as difficult as people think; the more people learn things, the more they learn, the more they feel ignorant. Because the horizon has become wider, the horizon of the knowledge that can be seen is farther away, until one day, the personal vision reaches the boundary of the human cognitive vision at a certain point, then if you are willing to spend In five years, a gap has been cut at this point to let out a beam of light that humans have never seen before, so congratulations, you have stepped your foot into the threshold of the academic circle.

The greater the gap, the more sunlight humans receive, and the more people involved in this work, the closer humans are to the eternal light.

“However, our propaganda strategy seems to be counterproductive now!” Speaking of here, Lu Qiujian couldn’t help but say, “Our previous propaganda seems to only emphasize the dedication of role models and ignore what they deserve. I can often see similar programs on TV. For example, a scientist is willing to study poorly and has made great achievements, but a family of four or five people are still squeezed in a broken room of 20-30 square meters! A researcher could n’t even take care of her mother to be seriously ill for the experiment ... I want to say it. After watching this kind of program, would the parents of those children let them go this way? “

I'm not targeting anyone. What I want to say is that these scientists are exposed to the competent authorities that treat them like this and shamelessly treat these as gloriously hyped media, you are all rubbish!

Qin Feng slowly shook his head, he also has a daughter. He also understands the psychology of his parents. He knows that if he watches such a show, and the child says he wants to be that kind of person, he will dissuade him anyway.

"So I want them to see that realizing their ideals does not mean embarrassing conditions, nor mean meager treatment! Here, they can also get expensive incomes and live a comfortable life!" Lu Qiujian To sum up, "Using science fiction movies, science fiction, and anime to arouse people's curiosity about science, and then through these programs let them know that becoming a scientist can also lead a prosperous life. I think, since then, I will invest in this Will there be more and more talented teenagers in the field? They do n't have to waste their talents because of the gravity of reality, they can get a more relaxed growth environment, they can ... for the Chinese nation and even the entire human The development has burst out with dazzling glory! "

"Moreover, I think that awarding bonuses to scientific workers does not necessarily arouse people's dislike! For example, at the National Highest Science and Technology Commendation Conference, after Yuan Lao received a five million bonus, did someone say he should not take it? I What I saw was that the vast majority of people still thought he was getting less! "Lu Qiujian returned from ideal to reality.

"It's true, and I think even if Yuan Lao doesn't get a lot of 500 million rewards!" Qin Feng nodded in agreement. "You just reminded me of Confucius's allusion to Zi Gonghong Lunu!"

The laws of the Lu State stipulate that as long as someone helps the Lu people who are slaves abroad to redeem themselves, the Lu government will reimburse the investor in full based on the redeemer's credentials. Confucius' disciple Gong specializes in import and export business and often travels between countries. Once when he was doing business in a foreign country. Found a Lu nationality was arrested here as a slave. So he generously contributed money, redeemed this person to Lu, and escorted him back all the way to the local government. The local government was prepared to reimburse Zigong for ransom and round-trip expenses in accordance with the law.

However, Zi Gong regards himself as a national of the Lu Kingdom. This little dedication for the country and the people is what it should be. How can it be repaid by the state as a reason to refuse the expense reimbursement; it has been admired by the people.

But Confucius scolded Zigong when he heard one of the news, saying that no one would redeem the slaves of Lu country from abroad! Because Zigong's behavior inadvertently raised the standard of dedication, before people only need to put a little effort to bring back the slaves of Lu country from abroad, and was praised; and after Zigong, whoever asks for reimbursement, I am afraid it is not Praise but despise! People do n't ask for money You are so sorry? Since then, no one will ever do such a thankless thing.

“Yes, my staff has contributed and made a huge amount of money for the project, then I should give them appropriate rewards and widely publicize this matter; then everyone will be motivated to work If I deny them the qualification to receive awards, how many people will be willing to work hard for this? Of course, mere physical awards are not enough. I also plan to apply for this year 's technology awards for them. “Lu Qiu Jian said with a smile.

“Haha, it should be! I will also strongly support this matter!” Qin Feng raised his hands in favor, “their achievements are fully qualified to receive the National Technology Invention Award and the National Science and Technology Progress Award! Looking back, you will submit the list, I let People help you stare at this! “

So this matter was solved satisfactorily, and Lu Qiujian could finally put things down here and return to the base to host the normal research work of the project! Now that the first experimental reactor has been built and everything is ready, it will be ready for ignition!

Chapter 522 - The first test

In the car back to the base, Lu Qiujian first called Xia Xiao, “Are you still in the studio? It's not too hard at ordinary times. Be careful not to break the body! Remember to exercise according to the method I taught you Well, that's good; I'm estimated to be busy for a while during this time. I'm afraid I don't have time to go home. You have to take care of yourself. If you have an urgent matter, please call XiaobaiWhen this time is over, I will accompany you to rest at home for two days! “

After appeasing Xia Xiao, he went to the parents of both parties for two more calls. Lu Qiujian turned off his cell phone. After the experiment started, he did not want to be disturbed.

Enter the base, pass through the living area and the surrounding laboratory, and come to the entrance of the cave; after carefully checking the documents, and after going through multiple procedures such as fingerprints, irises, and passwords, Lu Qiujian was able to enter the cave.

Go to the cave, enter the password in front of the elevator and enter the elevator to go down, and then go through several inspections, and then came to the core of Xihe plan-Suiren No. 1 experimental controllable nuclear fusion reaction device center.

The reaction device is a circular ring device with an outer diameter of five meters and an inner diameter of about two meters and five. The outer side of the ring is surrounded by a circle of red high-strength electromagnets and low-temperature superconducting coils. After the test is started, they will generate a strong magnetic field. Confine the plasma.

Inside is the plasma that is ready to be used as fuel. They will be confined in the center of the ring under the action of a strong magnetic field; the periphery is densely distributed with more than two hundred high-power laser emitters, these lasers will release huge energy, And concentrate this energy on a suspended plasma with a diameter of only two millimeters, so that this plasma produces nuclear fusion, releasing energy.

Just to power these laser transmitters, high-voltage cables over 180 kilometers long were installed in the base; the staff of the laser laboratory once successfully fused more than two hundred laser beams into a single pulse, generating 1.8 Megajoules of energy and a peak power of 500 trillion watts are equivalent to more than 1,000 times the nation 's electricity consumption at any given time, making it the most powerful laser pulse emitted in human history.

“Everything is confirmed, can I start the experiment?” Lu Qiujian asked Li Yan beside him. The theoretical design of the reaction device was drafted by him. Ma Yang detailed, Li Yan was responsible for the construction; this work started from the beginning of the formation of Xi and the planning team, after a long time, costing tens of billions of funds. What they get is the ring that looks a bit rustic in front of them! Even if you use gold to create an object of the same size, there is no valuable reaction device in front of you.

It can be said that the circle in front of us gathers the crystallization of the highest technology in China and the world. Whether it is useless to spend so much money depends on the next experiment!

“I have gone through seventeen inspections before this, a screw on the trail. The high-strength electromagnet outside the avenue, I have personally inspected it more than once every micrometer! I can guarantee that this reaction device has fully met the design requirements, And maintain a very good state! You can start the experiment at any time!” Li Yan seemed confident. Although Ma Yang on the side did not speak, the arc of the corners of his mouth still made people feel a little proud.

“How is the ignition energy prepared?” Lu Qiujian nodded and asked the next question.

“The base’s own power plant currently produces enough power to support this test!” Ma Yang called up a chart from the tablet in his hand. “From the power plant to the transmission line, as well

as the transformation facilities and switches along the way Knife ... I have led the team to check them one by one, and they are also in excellent condition! “

“What about the possible changes of the plasma after being irradiated by laser?” Lu Qiujian looked at Li Long.

“We use a supercomputer to perform repeated calculations, and the probability that the plasma will react according to the experimental plan and release energy is as high as 99.9246%. From a probabilistic point of view, this has far exceeded the needs of the experiment!” Li Longyan answered concisely, Handed over the calculation process of his team.

Lu Qiujian took over the tablet computer, carefully checked their calculation process, and returned the computer to him after finding no problems, “Very good!”

Li Long straightened his waist, as if to say, now you can believe that you spent the favor to dig me out of the financial company without losing money?

“Is the laser emitter able to achieve accurate and stable energy output?”

“Six experiments have been completed before, and the energy output of the laser emitters is extremely stable, which can fully meet the requirements of the experimental design!”

“Is the energy receiving system working properly?”

“Everything is normal. It is absolutely possible to accurately measure the total energy released by this experiment!”

“What is the result of the high temperature resistance test of the wall material of the reaction device?”

“After many tests, the wall material of the reaction device has not changed in the high temperature test that exceeds 50% of this test! It is enough to withstand the high temperature of this test!”

“How is the plasma **** discharge system detected? Is the monitoring system working properly? Is the emergency experiment termination system safe? Is the escape channel for personnel

unobstructed? ...” Lv Qiujian’s voice began to accelerate, and the tone increased Come more and more excited.

“everything is normal!”

“No problem at all!”

“All preparations have been made!”

“All channels are kept clear and have been tested by the exercise! No matter what happens We can guarantee the safety of personnel!”

The answer of the staff of the project team is also getting louder. More and more decisively, they knew that the results of their work on the racetrack could be tested immediately! They are either anxious or anxious, but more still have confidence in the successful completion of this experiment!

“So good, there is one last question!” Lv Qiujian looked at Wei Yunyue, “Is the physical and mental state of all test-related personnel in good condition? Do you have the requirements to complete this test?”

“The physical examination reports and psychological assessment reports of all staff members are here. I have eliminated six staff members who have certain problems. Now all staff members maintain physical and mental health and can start the experiment at any time!” Wei Yunyue’s calm answer Road.

Lu Qiujian looked at the reaction device in front of him and the people around him. From 2002, he began to make plans to six years now, from contact with Qin Feng to more than three years now, from the establishment of Xihe plan to nearly two years now, from entering This base is close to a year! After experiencing countless ups and downs, he finally waited for the most exciting moment!

“I announced that the first ignition experiment of the experimental and controllable nuclear fusion reaction device of Xihe Plan Suiren No. 1 is now started!” He announced loudly!

Chapter 523 - Light up the sun

The staff at the scene did not know how long they had prepared for this ignition test. They had practiced countless times in advance. After hearing Lu Qiujian’s order, they immediately began to be busy in an orderly manner.

“Everything in the power supply system is normal, ready for energy delivery!”

“Everything is normal for the laser transmitter, preparation for charging is in progress, and it is expected to be completed in 20 minutes!”

“The plasma is ready!”

“Magnetic field starts!”

Various voices of issuing orders and reporting progress in the laboratory one after another. On the monitor, the signal of the completion of the preparation work lights up accordingly.

“We are about to ignite the sun!” Ma Yang stood beside Lu Qiujian, his eyes flashing with excitement, murmured to himself.

“Just igniting is not enough! We not only need to obtain a sustained and stable energy output, but also make the total output greater than the total energy input during the experiment!” Lu Qiujian replied with his arms.

Speaking of controlled nuclear fusion research for so many years, no country’s reaction device can achieve the goal of output energy greater than input energy! To give a simple example, all their previous work was done at a loss-making business, throwing a hundred dollars into the bank, but after a while, it turned out to be fifty dollars!

In many experiments in the past, they may have lost two million joules of energy in order to ignite the fusion material, but the total amount of output energy obtained by nuclear fusion was only a few hundred thousand joules! Obviously, this level of technology cannot be commercialized. If you want to rely on the current level of technology for nuclear fusion power generation, it is like trying to make money from the stock market, and you are guaranteed to lose all your pants!

So the first thing Lu Qiujian has to solve at present is this problem. As of now, neither the TFR Tokmark device of the United States, the Eastern Super Ring of China, nor the United Ring of Europe have achieved this goal; as for the country of the United States Ignition device, they have this possibility in theory, but so far their reaction device has not been built yet! If this experiment is successful, Flint One will become the world ’s first fusion device to achieve an output energy

greater than the input energy, which will be a milestone in the process of controlled nuclear fusion research.

All the signal lights on the monitor representing the completion of the preparation work are on. Lu Qiuqian took a deep breath and issued the most critical command, "Ignition begins!"

Before this, this one is 225 meters long and 132 meters wide. The world's largest laser fusion machine with the size of more than three football fields has been fully charged and is ready to be launched at any time.

At the order of Lu Qiuqian, the staff of the ignition group pressed the button. More than two hundred laser emitters of the ignition device aimed at the fuel ball containing deuterium and tritium atoms. The laser then carried out the atoms at a temperature close to the center of the sun. heating. Immediately within one billionth of a second. The laser beam was completely irradiated on the surface of the fuel ball as planned, causing the outermost layer of the fuel ball to explode. The remaining part of the fuel ball containing deuterium and tritium atoms was driven by a strong implosion, and the internal fuel was compressed instantly. A shock wave is formed, which further heats the fuel in the central area, leading to sustainable combustion, which in turn generates tremendous energy.

This fuel ball, under the irradiation of laser light, has released endless light like the sun that has provided humanity with millions of years of warmth since ancient times. Huge energy burst out!

Despite the thick outer wall of the reaction device, Lu Qiuqian seemed to feel the high temperature inside the reaction device, and the surface of her skin felt a burst of heat.

"Beep!" Monitor, the signal light indicating successful ignition lights up, and then the staff begins to report the latest situation, "Ignition completed successfully, the reaction device began to achieve energy output!"

"The plasma temperature has risen to 42 million degrees! It has exceeded the records of all other known reaction devices!" An exciting voice sounded!

"The energy output is very stable, the average current reaches 1.5 megaamperes, and it has lasted a hundred seconds!" The current data also reached the international advanced level!

"Haha!" Ma Yang, who is always speechless and poor at expressing feelings, is now operating her fingers on her tablet quickly, her mouth wide open. Laugh like a fool!

Calculated on the computer for a long time, he finally hit a punch on the screen, no matter how painful his hand was, he shouted loudly. "I knew it! I knew this experiment would succeed!"

"Facts have proved! Those profit-oriented laboratories in capitalist countries can't be compared with us! This experiment just proved the superiority of our system!" Blonde Li Yan once again broke out the revolutionary optimism, ruthlessly criticized the country where his parents were born.

At this time, the other staff members were keeping their posts and staring at their work attentively, but their mouths showed a subconscious smile, thinking that this beautiful start made them very optimistic about the success of this experiment.

"The fuel ball is about to run out. This experiment is expected to end in ten seconds!" A voice sounded in the laboratory, bringing Ma Yang and others back to reality! "... Seven, six, five, four, three, two, one! The energy spheres are all exhausted, the first ignition test of the experimental controlled nuclear fusion reaction device of Xi and Plan Suiren No. 1 This is the end, everything is going well now! "

"All departments carry out the finishing work in accordance with the test plan! The data group immediately completes the test data collation work and immediately submits the test report!" Lv Qiujian quickly issued an order!

"Yes!" The staff immediately began another round of intense work according to the original plan. They needed to verify and sort out the various data collected in this experiment as soon as possible, check the status of each equipment after the experiment, and analyze this Problems in the course of the second test ...

"Professor Lu! The results of the first round of data have come out! Several major data have been verified and analyzed!" A staff member hurriedly stood up, restrained his excitement, and submitted a report to Lu Qiujian In hand.

"How is the result?" Ma Yang and Li Yan stretched their necks at the same time, looking at the report in Lu Qiujian's hands.

Other staff in the laboratory heard this, and turned their eyes to the direction of Lu Qiujian, while holding their breath, fearing that he would not hear what he was going to say.

Lu Qiujian looked at the report solemnly, then took the microphone and cleared his throat, “You guys, I will report to you the Xi and Project Sui ren No. 1 experimental controllable nuclear fusion reaction device for the first time. The result of the test ... “

Chapter 524 - Big breakthrough

Lv Qiujian paused for a while. After watching these hard-working staff for a long time, a smile appeared on the corner of his mouth, and he began to read the results in the report aloud with a passionate tone, “This experiment successfully achieved 50 million ultra-high temperatures. The long-pulse plasma discharge lasts for 203 seconds, both of which exceed the world records previously created by the neon JT-60 device and the European Union! “

The clap of applause interrupted Lv Qiujian’s speech. Those ordinary staff who were gentle and polite at this time threw away the usual gentleness to the side, cheering loudly and waving their excitement! This reminded Lu Qiujian of his Bayern locker room after winning the championship in Istanbul. Compared to that time, the only difference now is Champagne!

Press down with both hands and wait until everyone is quiet. Lv Qiujian read on, “More importantly, this experiment successfully completed the goal that the output energy is greater than the input energy! The ignition goal was not reached. This experiment was carried out in total Joule’s energy input, and the Firren No. 1 experimental controllable fusion reaction device released a total of ... Joule’s energy, the output energy far exceeds the input energy, which is also For the first time since the launch of controlled nuclear fusion research experiments! Today, it is destined to be remembered in the annals of human civilization! You are the creators of this great moment! “

“Aoao ” cheers wave after wave, the staff present understand the great significance of this data, only when the output is much greater than the input, the commercial application of controllable fusion has value! Achieving this goal means that humanity has taken another solid step towards the realization of controlled nuclear fusion! In a sense, this is not a great achievement for the first atomic bomb test!

Even the importance of this experiment is even greater than that great experiment, because before the mushroom cloud in Lop Nur was raised, many countries such as the United States and the Red Empire had achieved this goal, and now, the world can export The controllable nuclear fusion device whose energy is greater than the input energy is only this once!

After reading these important data, Lv Qiujian never intended to interrupt their celebration, “Well, you can go to each person’s tablet for other data! Now, except for the necessary left-behind staff. Go to the meeting room to celebrate! “

As the microphone spread to every corner of the laboratory, the cheering gradually dissipated; Ma Yang on the side picked up his tablet computer whose screen had just been cracked by him, and quickly browsed the experiment he had just received. The data said, "Let's celebrate first. When I finish reading these data first! I always feel that this experiment and my previous calculations are slightly different. I don't know where the problem is!"

"I also want to check the loss of the reaction device after the end of this experiment! We have summarized a total of 17 possible situations before. If I don't understand what kinds of things are happening now, I am afraid I have no intention of celebrating! "Li Yan is also preparing to check the experimental device before leaving the monitoring room.

"Facts have proved that our team's previous calculation of plasma is completely correct! If this algorithm is effective, why not start a larger-scale simulation now?" Li Long looked excited. Yes, the sense of accomplishment here is far from comparable to earning hundreds of millions of dollars in the financial market! Since Lu Qiuqian worked so hard to create opportunities for him, how can he waste time now?

"Yes, the work at hand is not finished yet! Let's put the celebrations aside!" The other staff also echoed, and they gradually regained their calmness and began to get busy in their respective positions.

"I said, I made this experiment plan by myself! Now that the experiment is over, do we really need so many people?" Lu Qiuqian smiled and clapped his hands, "If you are so happy, if everyone does not Celebrate it well. I 'm afraid it will be suffocated? I 've arranged for the staff to be ready in the meeting room! Champagne and smokeless fireworks are everything! Now listen to my order, everyone except the staff at hand will leave immediately Lab, go to the meeting room! "

Hearing Lu Qiuqian's words, the staff began to hesitate. On the one hand, they really wanted to celebrate, on the other hand, it seemed that these newly received data were more attractive to them.

"Let's go, let's go!" Li Yan also figured it out. The next job really does not require so many people. They have worked hard for such a long time, and it is time to celebrate. "The result of this experiment is the top secret. Now I won't let you vent it. When you go out, you can't help but ask someone to say if it's a leak?"

After finishing his first talk of putting down the tablet in his hand, he took Ma Yang 's arm and walked towards the exit of the laboratory; then Li Long hesitated for a while. Well, the mood is a little too exciting now, and I can't calm down to do calculations, let's celebrate first!

With these people set an example, other staff members have also laid down their work and followed them to Lu Qiuqian's pre-arranged celebration place!

The large meeting room where project meetings are usually held. This fashion spot is full of festive colors. Balloons, bunting, pastries, champagne, and other celebration supplies are all available. Some lively people picked up the smokeless fireworks and started to launch. The sky of paper scraps spilled over the Zhenge conference room. Others began to pick up champagne and fight back. At this time, Lu Qiuqian was too lazy to avoid, letting the victory champagne wet his white coat ...

The celebration lasted for a long time. After everyone was excited and finally calmed down, Lu Qiuqian stepped onto the stage and said, "Now I say two things, the first is that since this test was successful, it is the turn Recognition of everyone's hard work! You do n't need to envy the tablet team some time ago, your reward will only be higher than them! The second thing, although this experiment was successful, but the application of controlled nuclear fusion is still It's very far away, I hope everyone will make persistent efforts in the next work! Strive to achieve our final goal as soon as possible! I have finished speaking, let's continue to celebrate! "

Came off the stage and Lu Qiuqian quietly left the meeting room. Now these staff members can take a break for a while, but he will continue to be busy.

Came to his office, Lu Qiuqian picked up the red phone on the table, dialed a number, and then said, "I am Lu Qiuqian, the general manager of Xi and the plan, please help me transfer to Comrade Qin Feng!"

After a while, the voice of Qin Feng rang over the phone, "Hey, I am Qin Feng, Xiao Lu, what are you doing?"

Chapter 525 - Ask for money

"Head of the report!" Lu Qiuqian also changed the more formal title at this time, "The first ignition test of the Xihe Project Suiren No. 1 experimental controllable nuclear fusion reaction device was successfully completed! The experimental results fully reached the expected goal! "

"Good! Very good! You rushed to Beijing in the shortest time! I will propose to the elders that you make a special report to the elders!" Qin Feng has also understood the significance of this experiment before this Now, I heard how successful the experiment was.

"Then let me ask Lieutenant General Li to help me contact the military aircraft?" Lu Qiuqian immediately replied that since the experiment was successful, it is time to maximize the benefits of this good thing.

“No no no! You still take your train!” Qin Feng quickly stopped, now he thinks that Lu Qiujian’s safety is more important than his own, how can he be willing to let him take a plane to save a little time? “The elders’ schedule has already been scheduled. It ’s not something you can do immediately if you want to make time to listen to your report! You do n’t have to be too anxious. You just can use this time on the train to think about it. Want to report what to say! “

“I understand! I will prepare!” Lu Qiujian also understood Qin Feng’s suggestion. It is now the end of the year, and the budget for the next year will soon come out. Now let him report to the elders. , The meaning of which is self-evident.

“I will arrange for someone to pick you up when I arrive at the Jingcheng Railway Station!” Qin Feng hung up the phone after a few words. Then he slapped it on the table with excitement and slap. This kid was so beautiful! Now it seems that what he said before is expected to achieve controlled nuclear fusion during his term of office is completely boastless!

“Director, what happened?” This slap scared the staff outside the house enough, and someone immediately knocked on the door and shouted.

“It’s okay, don’t worry about me! Wang Yang, you come in!” Qin Feng rubbed some painful palms, and immediately resumed his serious expression.

With a bang, Wang Yang pushed open the door and walked in (cough, actually the secretary should have been replaced at this time, but who made this a book friend! Just let him continue playing!) “The chief. You calls me?”

“Well, you are going to help me report to the elder elder immediately. He said that Director Xi and the plan Lu Qiujian are about to go to the capital soon. When he arrives in the capital, he will report to the elders immediately. Very important work. Please He and other members of the Presbyterian League must take the time! Also, you can contact Director Lu ’s staff to see when he will leave. When the Jingcheng Railway Station comes, you will help me pick him up! ”Qin Feng ordered Road.

Wang Yang listened to his small notebook for a hundred years, and waited for Qin Feng to finish his book. “Yes, I will do it now!”

“Huh? Comrade Qin Feng said that Xiao Lu was going to report to Beijing to work? But I still have to visit the old revolutionary base area tomorrow?” The elder whispered, but he soon raised his

eyebrows, “Ah, that’s not the case! Call the office Hall, change my schedule for these two days, I will stay in Beijing to listen to Xiao Lu’s report! “

Immediately, the relevant departments began to be busy, and it was not an easy task to coordinate the schedule of all the elders in such a short time and bring them all to Beijing!

And now. Lv Qiujian had come out of the base and drove quickly to Chang’an Railway Station under the guard of Bai Yaoran. The train station was also busy preparing for the start of the special train. The dispatch department scratched his hair and began to coordinate the trains along the line. Driving schedule; hey, today there will be many people scolding the mother because the train is late!

Lv Qiujian sat in his special train and began to prepare the content of this report. How can I get more funds and resources from them?

As the general manager of a project, the ability to ask for money even exceeds the scientific research ability. At this point, those European and American counterparts seem to do much better than the scientists in China! No funding. No matter how good the idea is, it cannot be implemented. Xi and the plan now have a lot of funds, but they are not satisfactory to Lu Qiujian. Moreover, Xi and the plan not only require money, but also require many other institutions. stand by. In this regard, the performance and support of the cooperative units in the past two years have not been very satisfactory. Now we can take advantage of this opportunity to solve these two things together!

“Director Lv, the leader asked me to pick you up!” As soon as he got off the train, Wang Yang greeted him and took him directly to the car parked in the station. “I will take you to rest first. The elders will listen to you tomorrow. Report! “

“Thank you!” Lv Qiujian thanked softly. Fortunately, there was no one here. If someone lets Qin Feng’s secretary come to pick him up, it is estimated that some brothers in Beijing will blow up again tomorrow.

One night off, led by Wang Yang early the next morning, Lu Qiu built to bring the core of the power of China, and soon after entering the small conference room, the elders who held the supreme power of China arrived one after another.

“Xiao Lu, let’s talk about the situation of this experiment!” The elder elder didn’t have too many courtesies and went directly to the topic.

“Okay!” Lu Qiujian turned on the projector. The process and results of this experiment were clearly presented on the projection screen. “This experiment started on time at 14:30 pm on the 18th of this month. After the hard work of all the staff, this experiment successfully achieved the expected purpose, successfully achieved a 50 million-degree ultra-high temperature long pulse plasma discharge, lasting up to 203 seconds, and the total output energy reached ...” Lu Qiujian reported the experimental results in detail.

In order to avoid them not understanding the great significance, Lu Qiujian also specifically explained patiently, “... The results of this experiment have exceeded the records of all other controllable nuclear fusion reaction devices in the world. It is human. A milestone breakthrough in the research process of controlled nuclear fusion ...”

“So, is it not far from the application of controlled nuclear fusion?” The elder could not help asking.

“It can’t be said that if you want to commercialize it, the stable output time must reach at least 3000 seconds, and now we can only reach 203 seconds, we still have a long way to go!” Lu Qiujian replied, then Other elders threw their questions one after another, and Lu Qiujian answered them one by one.

The results reported were very satisfying to them. According to the plan node table submitted by Lu Qiujian before, it is the first large node to realize the output energy is greater than the input energy.

The question was over. The elder looked at Lu Qiujian and asked, “So what support do you need next?”

“I need more funds, more resources!”

Chapter 526 - alma mater

“Oh, you made hundreds of millions of dollars some time ago! Why do you need money!” The elder said with a smile, he didn’t seem to be angry because of Lu Qiujian’s request.

Indeed, in such a short period of time, let China’s controllable nuclear fusion research level surpass Europe and the United States, ranking the world’s leading position, this money makes him feel worth the money! Not to mention the tablet computer patent auction, which had been in full swing some time ago. He thought that Xi and the plan could only spend money for a long time. Moreover, after acquiring local and neighboring markets in Africa for several Chinese companies such as Chinese companies, it will create many new jobs, pay more profits and taxes, and directly promote the development of high-tech in China. The economic benefits that this can bring must not be ignored.

“You said at the time, the profits created by Xihe plan itself will still be allocated by the project itself!” Can you not use this part of the money to block me!

“Xiao Lu! The international economic situation is tense this year, and the state’s funds are not ample! Everyone is asking for money. Where do you say I should find money for you?” The Prime Minister also quipped.

“I’m just the staff of Xihe plan. This kind of national event is not something I can participate in!” !

“I made a detailed budget here, which lists the goals Xi and plan to accomplish next year, as well as the funds and resources needed to achieve this goal!” To make a big pie, let them feel that the money is worth it. This work has been completed by Lu Qiu Jian before. For these leaders who are determined to lead the great rejuvenation of China, the controlled nuclear fusion is Hard to refuse flatbread.

The next step is to tell them what support they need to complete this piece of cake. This is what Lu Qiu Jian is doing now. With the cake, the detailed steps to realize the cake are also available! As long as these two tasks are done carefully. If conditions permit, why should they not give money?

Lu Qiu Jian’s strategy has been recognized by them. What’s more important is that he has used his actions and successes to tell people in the past few years that he will never disappoint those who trust him. From the Nobel Prize to the two Olympic champions, and this successful experiment.

“Well, this plan is very meticulous, what do you think?” The elders turned their attention to the other people in the meeting, now in this case. Even if some people have other ideas that will not be exposed, they have also expressed their support for Lu Qiu Jian, among which the elders, Qin Feng and Lu Kunqi are the most determined.

Think about it for a reason. Qin Feng, as the first senior official to contact Lu Qiu Jian, is now directly in charge of Xi and the plan. Lu Qiu Jian’s success will definitely be imprinted on him. It is duty-bound to build and support; at the same time, Xi and the plan are officially launched during the term of the elders. If they succeed in the future, he will have a contribution to him; If the plan is successful, it will be good for him.

The elders made a summary after everyone expressed their opinions. “Well, several of us expressed support for your plan in principle, but you have to arrange for the necessary procedures!”

Just have this sentence! Now that all of you, the most powerful people in China, have expressed their support, then the green light will definitely follow! Lv Qiujian quickly got up and thanked, “Thank you for your support, I will not live up to your expectations.”

“Well, then come here today! I will go to the field to inspect and work, and I will not leave you to eat!” The arrival of Lu Qiujian disrupted their schedule, and it is time to adjust! The elder took the lead and the others left. Only Qin Feng and Lu Kunqi were left.

“Tell me when I’m going through the formalities, I will let Wang Yang take your people to do it!” Qin Feng said with a smile, he is also a step by step person, knowing the truth that the king is good at seeing the little ghosts. When Wang Yang came out, they ran out of procedures to save a lot of trouble.

“Thank you!” Lu Qiujian is naturally grateful for this. He is not afraid of others making things difficult, but it is always good to save some trouble and save some time!

“Well, I will go to Guozijian to give a class to the provincial and ministerial cadre training class! Let’s go first! Next time I go to Chang’an, let’s see you again!” He also left the meeting room after talking, and now only him is left in the meeting room It’s two with Lu Kunqi.

What’s the matter? Lu Qiujian smiled and turned around to look at this future assistant. Lu Kunqi asked, “Xiao Lu, how many days do you intend to stay in Beijing this time? What are the arrangements?”

“It’s a rare trip to Beijing. I will stay here for a few more days! I have already arranged the work on the base. The main work at present is to summarize this test and prepare for the next repeat test!” Lu Qiujian replied It just happened that the award ceremony of the New Mathematics Discovery Awards hosted by Beijing Normal University was coming soon. I am definitely going to be there; in addition, I plan to go to the famous schools in Beijing to see and help Xi and plan Dig a few good seedlings back! “

“Coincidentally, my lover also graduated from Peking University, and now teaches at Peking University!” Lu Kunqi smiled, “If you have time tomorrow, go to work at my lover’s office and find her, and then go to my house for a light meal.” ! “

“This ... won’t bother you?” Lu Qiujian asked a little later.

“No, I also want to talk to you about Xi and the plan by the way. I just read the plan you listed, but there are a lot of work that I need to cooperate with! We will discuss and discuss how to carry out the work more smoothly. Go on! “Lü Kunqi said the truth. He is now a member of the government, and the allocation of resources does have a lot to do with him.

“Then I’m welcome! Tomorrow I will go to Mr. Chen’s office on time!” Lu Qiu Jian knew that his wife’s surname was Chen, and he was a teacher at the English Department of Beijing Normal University.

After consultation, Lu Kunqi also left the conference room. Lu Qiu Jian came out from here, boarded the car with a happy mood, and started to drive to Beijing Normal University.

It is still the familiar office building of the Department of Mathematics. The door of Professor Zhang ’s office is still the familiar Assistant Liu. When he saw Lu Qiu Jian, he immediately smiled and opened a flower, “Hey, Professor Lu, you are here, Please come inside, Professor Zhang just said you! “

Chapter 527 - I do n’t know Taishan

“I thought you wouldn’t be able to participate this year! I haven’t been able to call you these days! I’m worried about how to explain to those mathematicians! Now I’m relieved to see you coming!” Qiu Jian, Professor Zhang hurriedly came over and said with a smile.

“There was a very important experiment some time ago, so the mobile phone has not been turned on!” Lu Qiu Jian said vaguely, “The specific time schedule for coming to Beijing this time is also uncertain, so I did not say hello to you in advance!” He also did not know when the elders will meet him and how long the meeting will last.

“It’s good to come!” Professor Zhang also often participates in highly confidential work, so he did not ask, and immediately turned the topic aside, “Are you here to participate in the award ceremony? Is there any other arrangement? ? “

“The award ceremony is definitely to be attended! I also want to talk more with those mathematicians!” The ten questions he asked before will promote his plan to varying degrees, and those who are in this ten In the process of solving this problem, it is very beneficial to communicate with mathematicians who have made great achievements. “I have n’t had time to pay attention to this awards ceremony recently. I do n’t know which mathematicians will come to our school?”

Professor Zhang, who listened to the four words of “our school”, was very happy and got up and picked up a stack of documents from his desk. He said with emotion, “This time, there are a lot of

masters. The specific list is on [Here](#)! Almost half of the people in Princeton's math circle are here. I am afraid that the job of receiving them will be handed over to you and Professor Nan! “

“Responsible!” Lu Qiujian took a look at the list and saw many masters who had taught himself, such as Thurston, Wiles, Witten and others, “When will they go to Beijing?” I will pick them up at the airport! “For these mathematicians who have helped themselves, Lu Qiujian will not spare time.

“Noon the day after tomorrow! You will be with the school's convoy at that time!” Professor Zhang said, “Are you staying in a hotel or your own house in these two days? The house of Beijing Normal University has been kept for you!”

“It's better to stay in a hotel! It's more convenient for everyone to stay together and communicate!” It will be difficult for me to want to go abroad in the future, and I should seize this opportunity to communicate more with them.

After talking about the awards ceremony, Lu Qiujian talked about another task of his own, “Yes, I have to ask my alma mater to help me this time! The talent gap between Xi and the plan is getting bigger and bigger recently. You see the school now has What good seedlings can you introduce a few! Mainly mathematics, physics, computer, laser technology ... these areas! “

“Hey!” Professor Zhang had a toothache for a while, he instantly thought of a very bad thing, Ye Chu and some of them are about to graduate soon! “Wouldn't you take away some of your students this time? The school is very optimistic about them! I plan to let them go abroad for a lap and then stay at school to teach!”

“A few of them I definitely want!” Otherwise, what would you do to train them? I do n't have a good habit of making wedding dresses for others. “But it also depends on their personal choices. After all, they are willing to do it. If they are willing to stay in school or go to other departments, I ca n't help it?” Say, but to draw them under his door, Lu Qiujian is still very confident.

“Hey, I knew I couldn't keep it!” Professor Zhang sighed. For him, there is nothing more pitiful than watching talents slip away from their own eyes, “So, I will go back and say a word to the principal, let him inform each department to organize a talent exchange activity, when the time comes Talk to them! “

“Then thank you! By the way, do you want to add foreign schools? For example, Shuimu University, Aerospace University ... The graduates of these schools are still very good!” Since coming here , Might as well make the movement bigger! Although Xihe also has its own stable recruitment channels, Lu Qiujian is not willing to let go of any opportunity to attract talents.

“You have to be insane!” Professor Zhang pointed at Lv Qiujian and smiled, “Hey. Who made you a student who went out of our school, and if something happened, your alma mater wouldn’t help you? Well, as long as I heard that you are going to recruit people, those school students will definitely come! “

Lv Qiujian is now a well-known signboard in the domestic scientific community. Coupled with Xi and the huge funds and generous treatment, it is extremely attractive to those who are interested in scientific research. Professor Zhang is not at all Worried about not coming!

“Then thank you!” After the matter was finished, it was not too early. Lu Qiujian took the opportunity to invite Professor Zhang to dine together. Professor Zhang did not shy away, and called several familiar teachers to Lu Qiujian; this meal was extremely happy.

Woke up the next day, first went to Beijing Normal University to see the preparation of the award ceremony with Professor Zhang, and chatted with several mathematicians who arrived in Beijing early. Soon it was time for Lu Kunqi to make an appointment.

After they said goodbye to Professor Zhang, Lu Qiujian came to the office building of the English Department of Peking University; his face can now be used as a pass at Peking University. After a little inquiries, he asked the office of Lu Kunqi ’s lover Chen.

Walked outside the office and saw that the door was unlocked. In addition to Mr. Chen, there were two men and a woman; the girl looked like twenty-three. One of the men is about fifty years old, and his belly is slightly arrogant. He seems to be an official, and the other is in his thirties, like the secretary of the official.

“Mr. Chen, my daughter’s performance in this postgraduate examination is not bad. It should be able to reach the admission line of our school. I will trouble you more in the future!” The official-looking man said with a smile.

Now the written test is over The interview is not yet here. Is this the place to come? Lu Qiujian understood their intention, um, should I come back later?

After a little hesitation, Mr. Chen inside said again, “As long as she can pass the interview, I will definitely teach with my heart!”

“That’s good, that’s good!” The man seemed to think that Mr. Chen seemed to speak better, and took the opportunity to invite him. “Mr. Chen, look, it’s coming off work now! Or should we go out for a meal together? Your lover is also called? “

“Not today, I have already arranged!” Teacher Chen rejected his proposal.

“What about tomorrow?” The other party refused to give up.

“No need, my lover is very busy, I am afraid there is no time.” Teacher Chen refused again.

When the other party repeatedly invited, Mr. Chen always refused. For a time, the other party became a little hot. “What kind of job does your lover do? My mayor can find time? Is he still busy with me?”

Chapter 528 - Plan ahead

Laughing, Lv Qiujian at the door couldn’t help laughing, today is an eye-opener! Everyone in Jia Yucun remembers to find Zhang Huguan! You walked to the streets of the city level in the capital, and the places like dogs brought out your style of turtles, didn’t you find death?

And how does this secretary work! Did n’t you inquire about Mr. Chen ’s background before coming? Hey, I must be scolded by the leader when I go back.

“Ms. Chen, are you off work now?” Lu Qiujian estimated that Mrs. Chen was impatient to consume with them, so he walked in directly, without looking at the three people, and walked directly to Mrs. Chen’s desk Said.

“Oh, Professor Lu, welcome!” Mr. Chen didn’t make up, he stood up politely and shook hands with Lu Qiujian, “Come on, please wait a moment, I’ll pack things up, and it will be okay!”

“Eh, I said ...” Seeing someone was going to take Mr. Chen away, the mayor was not happy, and turned around to say something to Lu Qiujian, but what his secretary seemed to notice , Quickly pulled his arm behind.

“Oh, I’m afraid you don’t know yet, Mr. Chen’s lover ...” Lv Qiujian glanced and found that Mr. Chen did not mean to stop, so she revealed her background, “It is Lv Kunqi, You said he is a little bit busier than you? “

“Lv ... Lv ruling ?!” The mayor’s face changed, and his words began to tremble. He turned back and glared fiercely at his secretary, quickly squeezing a smile that was even uglier than crying. Apologize to Teacher Chen one after another.

“Okay, I’m leaving now. That’s the sentence. If your girl’s daughter has been interviewed, I’ll have no problem here! Just eat whatever you want!” She finished with the bag and Lu Qiu At the office, “Xiao Lu, my lover is already on the way home, what kind of food do you like to eat? I will show you two hands when I go back!”

Looking at them as they disappeared, the mayor, who stood at the door of the office, recovered for a long time, “What is this man’s origin? Why should Lu’s ruling lover cook for him personally?”

“Dad! You usually know to eat, drink and drink! You don’t pay attention to the news at all!” The mayor Qian Jin is now embarrassed and can’t look up. I have talked to him many times before I came here. Do n’t bring his style in remote urban areas to the capital. It ’s still a joke like this, “That ’s Professor Lu Qiujian! Academicians of the two academies, our country The first Nobel Prize winner! People often see several elder scientists! “

“This ... is this too young?” The mayor didn’t close his mouth for a long time. Hey, they all say Crouching Tiger, Hidden Dragon in Beijing, but I didn’t expect that I would kick two iron plates as soon as I came! Paralysis, how did this little Zhao’s secretary work? None of these things helped me inquire clearly. Go back and get rid of him quickly!

This incident did not cause any trouble to the two people. On the way back, Lu Qiujian was interested in chatting with Teacher Chen about the pitch and rhythm in the translation of English poetry! Some of his views have been highly recognized by Mr. Chen.

She said to Lu Kunqi as soon as she returned home, “Unexpectedly, Professor Lu has such a high level of attainment in the translation of English poetry. If I were to see him, he wouldn’t study mathematics. Physics, with this knowledge, can be used in English at Peking University Mix a professor! “

“Little Lu is not only good at English! People also speak German, French, Russian, neon ... I’m afraid there are more languages than the elders!” Lu Kunqi smiled and welcomed Lu Qiujian.

After entering the house, Mrs. Chen and the nanny went to prepare dinner together. Lu Qiujian and Lu Kunqi sat on the sofa and chatted casually. After dinner, he took Lu Qiujian to the study. Chen knew that they had something to say. After delivering the tea, he retreated consciously, leaving the space to them.

“Since I came to Beijing, I’ve always wanted to talk to you about Xi and the plan! But time hasn’t happened, and now I finally find a chance!” Lu Kunqi said straight away.

Lv Qiujian knew that what he said to go to the capital means that he entered the elders group. If from the job division, he and Lu Kunqi’s business scope do have a lot of overlap, the other party’s invitation did not meet his expectations. “Actually, I want to visit you too. You can support us in the previous work.”

“All should be!” Lu Kunqi said with a smile, then he asked in detail the problems encountered in the process of Xi and the plan, and Lu Qiujian also answered them one by one; Lu Kunqi wrote down the difficulties that Lu Qiujian said one by one, and put forward his own suggestions and solutions.

“If the Xihe plan can be completed smoothly and on time. Then our next national strategy should be adjusted a lot!” Lü Kunqi stood up and walked around the study room twice. “We can no longer be constrained by oil in terms of energy. Imported, domestic oil production can fully meet the needs of chemical industry; thermal power plants can also shut down a large number or directly converted into nuclear fusion power plants, so that the problem of air pollution can be greatly resolved. “

“With sufficient and low power supply. The production costs of various products in our country will drop significantly, and it will be in a very advantageous position in international competition! At the same time, it will strongly promote China’s opening of the fourth industrial revolution. Process ...
“Lü Kunqi couldn’t help but think of the future.

“But this will also cause a lot of problems!” Lu Qiujian couldn’t help but remind Any technological revolution will touch the interests of the original interest class. With controlled nuclear fusion, our old energy industry What should practitioners arrange? “

“Yeah, this is really a headache!” Lu Kunqi sighed. He is also a person who has gone through the laid-off era and knows the seriousness of this matter. “From now on, we need to be more cautious in facing the approval of the construction of new thermal power plants, and it is not appropriate to sign longer when negotiating oil purchases with foreign countries. Contract ... “

“We will try our best to get a satisfactory answer to domestic problems, and we will find a way to purchase oil! But once the news of our country’s controllable nuclear fusion technology leaks out, the international situation may become very serious. “The consideration of economic issues is over, and it is now the international political situation.

“At that time, the United States will definitely not be willing to monopolize this technology. I am afraid that various economic, political, and even military means will exert pressure on us?” Lu Qiujian couldn’t help saying.

Lu Kun nodded silently, seeming to agree with Lu Qiujian’s view, “The military strength and political influence of the United States cannot be easily counterbalanced at present!”

“The key is time! As long as you can withstand the first round of pressure, the situation will become better and better in the future!” Lu Qiujian seemed to think of something, and a smile appeared on the corner of his mouth.

Chapter 529 - Spicy hot for 7 yuan

Beijing City, the International Trade Zone, is densely covered with the most expensive office buildings in China; any company that can have an office here is an outstanding presence that has a huge influence on an industry.

The monthly rent per square meter of the office here is almost higher than the average monthly salary in Beijing, so these companies have very high requirements for their employees. Suits, leather shoes, ties, and badges are the most basic. A large company occupying an entire office building in this prime location welcomed a young man wearing a T-shirt and sports shoes.

“Mr. Ye, welcome to the Shengshi Group. I am the general manager of the Shengshi Group.” However, the general manager of this company did not feel dissatisfied with his dress. He respectfully welcomed him into the office. The gold collars outside attracted curiosity.

“Who the ***** is this? President Sheng still picks him up at the door? Who is his son? But the second generation won’t do this?” The eyes of those who can work here are vicious. Seeing that Ye Chu’s clothes are not worth a few dollars.

“Maybe! Doesn’t it mean that some people always like to play pigs and eat tigers?” Some people retorted, “Most people will be qualified to let President Sheng pick him up?”

“Did you read more online novels?” The well-informed person immediately revealed the answer, “Have you not watched the Olympic Games? Just came in that assistant coach of the China Men’s Basketball Team and the Olympic Men’s Football Team!”

“Assistant coach?” Others were even more puzzled. “Are you looking for him to advertise for our company? But if you want to advertise, isn’t it better to find Yao Ming and their athletes?”

“I don’t know, I will sit here if I can understand?” The person who said Ye Chu’s identity did not understand why he came here.

“Mr. Ye, how is your analysis going?” In the office of the general manager, General Manager Sheng asked after making tea for Ye Chu himself.

“Well, it’s done! According to my analysis of the data you gave me, your company’s funding can be greatly reduced in many links!” Ye Chu opened his laptop. “But these are just my conclusions from the technical level. Whether it can really be reduced depends on the specific situation of your company!”

“Understand!” General Manager Sheng nodded quickly. In fact, the data he gave to Ye Chu was not necessarily accurate. After all, as a company, there must be a lot of data that should not be published. These had to be recorded under a different name, and it would be reasonable to not be able to cut them by then!

“This is the result of my analysis! According to my calculations, your company has serious overspending problems in these links; there are also several projects, from the data change curve. Their profitability is very low, And there is no hope of growth; on the contrary, the following three projects are just at the stage of rising profits ...” Ye Chu pointed to the chart on the computer and explained to General Manager Sheng in detail.

Sure enough, there was something different. General Manager Sheng said that Ye Chu nodded again and again. His data analysis just hit several major problems existing in the company; except that there are two projects for the benefit of his own backing, so it leads to profitability. Outside of this low level, several other issues have captured the company’s key points.

These questions had only a vague impression before me. It is not certain where the cause lies. Now this data analysis makes my eyes shine, and I immediately understand the problem! If the rectification is carried out in accordance with the direction given by Ye Chu, his company can save at least 200 million yuan in capital every year!

After more than an hour of detailed explanation, General Manager Sheng has made up his mind. Now it seems that the company’s financial director can’t stay. I trust him so much to see what he is doing behind his back and wait to find the right one. Manpower, you must send you into the game! Several new plans submitted by the three departments should also be hacked. Transfer the extra funds to several projects in the second department, as well as the southern market ...

After the explanation, Ye Chu handed over a USB flash drive, “Okay, the analysis results and process are in it! My work is done!”

“Thank you so much!” After saying that General Manager Sheng Sheng beckoned, the secretary hurriedly came in from outside the door and handed in a respectful respectfully. General Manager Sheng took it to Ye Chu with his own hands. You accept! “

Ye Chu looked at the number on the cheque, “Well? Why is it three million? It seems to be more than before?”

“Not much at all! Comparing with the benefits Mr. Ye brought us. What is this little money!” General Manager Sheng said with a laugh, seeing Ye Chu didn’t push away and put the check in his arms. He tentatively asked, “I heard that Mr. Ye is about to graduate? I do n’t know what I plan to do in the future? If I do n’t want to abandon my little temple, I might as well consider considering the Sheng Family Group? You can rest assured, I must ... “

Ye Chu shook his hand and refused after he said, “This is fine! This time, it was really embarrassing to evade my friend’s introduction. On the other hand, I wanted to earn some pocket money from work-study programs. Thank you for your kind love. It ’s just that I ’m not going to enter the business world! “

Work-study program! These four words heard General Manager Sheng’s mouth twitching If Beckenbauer sees the current situation, I am afraid he will make the same expression as him?

Rejecting the retention of General Manager Sheng, Ye Chu left the office straight away; after returning from the elevator, the secretary couldn’t help but say to General Manager Sheng, “It’s less than a week’s work, and take three dozen pages of reports and take three Millions! This money is too good to earn? “Woo, woo, my annual salary of hundreds of thousands can be raised even in this office building. I did not expect that it will be a week for people to work hard for several years. The rewards for work-study!

“Oh, you can find a few people in the whole capital and even the whole country within a week, which can help us find so many problems through data analysis only?” Mr. Sheng said lightly.

Everyone knows the allusion of spicy hot for seven yuan, but how many people think about the personal qualities of the protagonist of this matter, and what work did they do before they took spicy hot? If you do n’t know anything, just ask the girl to eat hot and spicy. It ’s strange not to be splashed with chili oil!

Ye Chu was able to get a reward of 3 million because he has the ability to find the key to the problem from the complicated data and can solve the key problems for the Sheng Group!

“Hey, I don’t know which guy this guy will enter in the future!” Mr. Sheng lamented that he couldn’t get this talent.

Chapter 530 - 1 cloud piercing arrow

“Mei Mei, didn’t your mother let me buy a house in Beijing? Now I have enough money! Shouldn’t she interfere with us again?” After coming out of the office, Ye Chu immediately called her girlfriend to rejoice.

“Then will you stay in Beijing in the future?” The girlfriend over the phone asked in surprise, “So we can stay together often after you graduate!”

“Well ... this!” Ye Chu suddenly got stuck, and the joy of making a lot of money also disappeared. He scratched his head. “Maybe, Mei Mei, my teacher has come to Beijing these two days! I heard that he I plan to recruit another group of people to Chang’an, I think I can’t bear this opportunity anyway! “

There was no talk for a long time there, just when Ye Chu was going to see if the phone was broken, a faint voice came from the end of the phone, “Well, anyway, I have been in the peak of sports in recent years. Participating in various competitions all over the world, I do n’t have time to accompany you. Going to Chang’an is just a matter of buying an extra ticket! “

“Thank you! Thank you! Meimei, I knew you would support me!” The dark clouds that shone over Ye Chu’s head disappeared instantly, “You can rest assured! Even in Chang’an, I will be with you online. ! “

After finishing his girlfriend, Ye Chu whistled and returned to the school. As soon as he entered the dormitory, he was taken aback by the scene in front of him. Xiang Zhen and Wang Wen went into a suit and combed their hair in front of the mirror. The tie screamed while whispering, “I analyzed through the mathematical formula of the random swimming model and found that based on the traditional style, men’s tie knots can only be wrapped up to 8 times, with a total of 85 different system methods. After setting some parameter constraints for the mathematical formula from the aesthetic angle of the tie knot, etc., the result is finally 10 practical ways to play, but why these perfect practical ways I tested are in my hand Is the effect so ugly? “

“I said, don’t you? It’s our teacher who interviewed? Don’t you need to be so formal?” Ye Chu, who has always disliked formal clothes, opened his mouth.

“Ye Chu, because we are interviewing our teachers, we need to be more cautious!” Xiang Zhen seemed very satisfied with his image, and turned back from the mirror and said, “With our strength. Passing the interview is sure Thing, but you do n’t want others to say that we went through the back door? So from the beginning, we should face this interview as seriously as everyone else! ”

“Ah ... what you said seems reasonable!” Ye Chu pondered for a while, and then rushed out of the door again, “I hurried to buy a suit!”

Two hours later. After completely changing his personal status, Ye Chu returned to the dormitory. Wang Wen ’s first reaction was to stare at his tie for a long time, “Well, it ’s the seventh way I calculated, but why you play this better than me. Is n’t it pretty? You also want me to hit one? “

“This is what I asked the salesperson in the suit shop to help me fight. I will know this!” Ye Chu looked sympathetically at the group of fabrics hanging on Wang Wen’s neck. He was also an internationally renowned brand, and he was fooled by him. A temperament of five yuan was spread out.

“Then what will you do tomorrow? Go find her to help you tie it up? Also bring me together?” Wang Wen pitifully pleaded.

“It’s just a night of effort!” Ye Chu cut out, carefully took off his suit jacket and hung it on the hanger, and then lay straight on the bed, “I’ll sleep with a tie!”

alright, you win! Wang Wenfu sighed for a long time, then looked at Xiangzhen seriously, “Tomorrow I only have to pin my hopes on you!”

“As long as you don’t think my department is unsightly! I said Xiaoye! We haven’t eaten dinner yet! Are you going to wear a white shirt and tie to go to the school cafeteria to eat?” Xiang Zhen looked at Ye Chu with a smile. Wearing Armani suit, go to the school cafeteria to eat rice bowl. Tomorrow ... Oh no, I’m afraid he will become a celebrity in the school BBS tonight!

“Go, go, who is afraid!” Ye Chu got up halfway and lay back again. He was not afraid of being famous, but if the people in the school cafeteria came and went, if there was a little chili oil on his white shirt But it’s all over. “Ah, forget it. You can buy me some fruits and come back for dinner!

Don't have cherry watermelon, just give me two bananas and two apples!" In order to avoid contamination of your clothes. He also deliberately avoided the succulent variety.

Early the next morning, Ye Chu woke up and rushed to the mirror to see his shirt and tie. Fortunately, everything except the shirt wrinkled because of sleep disturbances.

Wiped his face in a hurry. After arranging his shirt and putting on his jacket, Ye Chu instantly completed the transformation of a lazy college student into a salesman of a world-renowned insurance company.

Looking over there, Xiang Zhen has also fastened his tie for Wang Wen; so, three freshly baked insurance company new employees stood on their chests and took their resumes to Lu Qiujian and walked to the interview place they said in advance.

"No! So many people!" When they arrived outside the interview site, the three opened their mouths. The school temporarily vacated the interview hall to form a long line, and the three people took a look. For a moment, even if it's a person for five minutes, I'm afraid it will take several hours to get their turn.

"Don't look at who our teacher is? With his and Xihe plan's appeal, as long as the words are released, the outstanding graduates in the whole Beijing city and even the whole country will probably come in a swarm?" After all, Xiang Zhen was in the team. I ordered a few people, "Well, that's not Gu Jiayue of Shuimu University. I had participated in IMO with us at the time. I heard that I went to the Paris Normal University after finishing my undergraduate studies. Now I have come to join in the fun; , Did you both read the article he published in the teacher-run journal last time? Also Qiao Yiwei, a doctor from our college, and Zhao Juyu from Nankai University ... "

Being in the same small circle, there are only a few top rookies in the circle, glancing at the real, almost all the new generation of mathematics geniuses in China are concentrated here. In addition, there seem to be some rookies in physics and computers. It's just that after all, he didn't recognize a few.

"Cut, isn't it just a few of them! I'm afraid of whoever was in the real competition!" Wang Wen pulled his tie and walked behind the team.

"When I was young, I listened to my grandfather's storytelling. I always heard which heroes have high prestige. Until now, I really understood what it means to wear a cloud arrow and meet thousands of soldiers!" Ye Chu looked at that long. Said the team.
