

## D. School 571

### Chapter 571 - Times have changed

This is my country! Liang Xiao stood on the hill and chatted with the mayor of Jingle City, Liu Haitao, and his heart was full of excitement. A world-leading factory is about to be completed under his own hands. What a sense of accomplishment! But the loud shouting from the side disturbed his good mood.

“What’s wrong there?” Liu Haitao is also very unhappy now. As long as the factory can be successfully completed and started, this will become the largest investment project in Jingle City’s history. With such solid achievements, he will be able to reach a higher level. Now, whoever is causing trouble at this juncture is more serious than killing his father.

The two big brothers were unhappy, and someone immediately went to ask about the situation; it was still the people of the city government who moved fast. Someone came to Liu Haitao and whispered a few words. He hesitated for a moment and looked at Liang Xiao, “Director Liang, factory The people at the door were the employees of Neon Zejuan Co., Ltd. They said you infringed on their patent? What’s going on? “

Liang Xiao is now the deputy director of the Research Center of Chang’an Nonferrous Metals Company. He heard two words, “Mayor Liu, this is a joke! Which big company in our industry dares to take its leading technology Take the patent registration? This line relies on technology to eat, as long as the technology is in your own hands, it is much more insurable than the patent! On the contrary, when the patent is registered, it is prone to leaks! Then Juan Co., Ltd. did not register the technology of their bottom. Patent! How can we infringe their patents? Even if there is technical overlap, they can’t produce patent documents! “

“It turns out that this is not the explanation of Director Liang, I still can’t figure out the doorway here!” Liu Haitao knew that dealing with these professionals was the most taboo and not pretending to understand, but frankly admitted that his own shortcomings are more likely to win the favor of others, Drive them away and continue to discuss the issue of planning! “

“I can’t see a few words with them. I’m afraid they are not willing to go!” Liang smiled. “I’ll go and see what they want to do?”

“Then I’ll follow along.” Liu Haitao made a look at the police chief who followed, and the police chief hesitated and nodded firmly.

“What are the two of you doing?” Walked beside them. After a while, Liang Xiaocai asked Shi Shiran.

“Are you the person in charge of this factory?” Kojima Kenji looked up and down and asked Liang Xiao with some hesitation. Is this age too young?

“I’m mainly responsible for technical work. I heard that you have slandered our company for infringing your patents? I want to ask you which patents have you registered again?” Liang asked with a smile.

“This ...” Kojima Kenji suddenly got stuck. Whether it is the ore ratio or the purifier formula, they are locked in the safe in the office of Qianbingwei. That will be used to register the patent. As soon as Liang Xiao ’s problem arises, he will know that he has met a colleague; but now that there is no way to look back, he said bitterly, “The technology of Zeju Corporation is the most advanced in the world. , The samples you brought out some time ago are very similar to the products we are developing. This can’t help but make us doubt! “

“Then there is no evidence? What should you do if there is no evidence! Don’t block it at the door of our factory.” Liang Xiao waved disgustedly, intending to drive them away like a fly.

Kojima Kojima grabbed the iron fence of the gate and made a situation where I would not be killed. “I request to visit your company! You must have used the technology we are developing!”

The neon people used this kind of habitual tricks. The average person is really right. “What can you see when you go in?” Liang Xiao shook his head helplessly. The production line is not unusual for them. The key lies in The formula of ore mix and chemical agents such as purifiers, these are not just a look at the door!

Since he wants to see it, let him take a look. Appropriate display of strength is also a good way to put pressure on competitors. Liang Xiao looked at Kojima Kojima, “It is okay to enter, but we must obey our arrangements!”

“No problem!” Kenji Kojima and Aichi Hirata nodded quickly. As long as they can go in, the guys they bring can come in handy, maybe they can get something useful!

They followed Liang into the factory. “The suit was taken off, the tie was loosened, and everything from the camera to the recorder was left! Put on our special uniforms!” Liang Xiao ordered a series of orders when he came to the dressing room.

“Isn’t the tie necessary?” Kojima Ken’s eyes flickered.

“Hey, you guys! Is it really not memorable to be a person? How many years ago did you want to use it?” Liang Xiao said with a sneer. The employees of a neon company were visiting competitors’ experiments. When in the room, pretend to look down and immerse the end of the tie in a certain key solution, so as to obtain a sample of this solution before stealing the other party’s technology; there is such a case in front, how could Liang Xiao not guard against him?

That’s all. No matter how thick Kojima’s face is, there is no way to persevere. They take off their coats, untie their ties, put down their mobile phones, cameras and other equipment. Put on work clothes and enter the workshop.

This scene reminded him of the earliest scene when he followed Zejuan Bingwei to visit the factory in the United States. In the future, his colleagues in Huaguo also entered the factory of Zejuan under their supervision. Now, it is their turn to accept the surveillance of Hua Guo!

Times have changed! Entering the factory and looking at the busy production line, Kojima Koji expressed his emotions; with his professional qualities, he already knew that the production efficiency of this factory has far exceeded that of Zeju Corporation.

Kojima Kenji silently followed Liang Xiao. Looking at the production links one after another, he saw that this factory is above the volume of both the production and the quality of the product. However, because he can’t get the most critical solution ratio, he is completely confused about the secret of the other party to improve production efficiency.

Although Yan Tianyi from the side secretly brought in professional equipment, the work clothes Liang Xiao prepared for them were one-piece. To remove the equipment, he could only open the zipper on the back, but this completely exposed.

Looking back, Kojima Kojima’s face became darker. Three years ago, Chang’an Nonferrous Metals Company could only do the low-end market, but now they have far surpassed themselves.

Times have changed! Kojima Koji expressed his emotions again. The visit is not over yet, but he already knows that this technology cannot be mastered in a short time! Then the good life of Juanjuan is coming to an end!

Chapter 572 - blackmail

“I’m going to the bathroom!” If you go on like this, you will finish the visit! Aida Hiroshi couldn’t help but resorted to alternative means, and he planned to take out the equipment in the bathroom.

“The bathroom is a bit hard to find. I will take you there!” A tall staff member approached him and showed a simple smile.

Xiang Tianyan twitched at a glance, the other party’s defense is really tight! But now it is not easy to refuse, so I have to bite the bullet and thank, “It’s really troublesome!”

“No trouble, no trouble, I want to go to the bathroom too!” The staff took Aida Hiroshi to the outside with a smile.

Went to the bathroom for a while, entered the cubicle, and took out the equipment in the shortest time, now it seems that this is the only way to do it! However, after waiting for the bathroom, Ada Hiroshi froze, and their bathroom was just a simple chest-high partition wall covered with cement. There was no independent space at all!

“I’m so sorry! The bathroom was originally planned well, but now I decided to expand the factory, so I will cover it with a simple one!” The staff untied their belts and began to drain.

The plan was shattered, and Aida Yan walked helplessly to the urinal; listening to the strong impact sound from the side, he couldn’t help glancing at it, and suddenly lost his little caterpillar from his crotch.

But now the zipper has been unzipped, Aida Yan pointed at the urinal with a scalp, and turned her head to stare at the slogan on the front wall, praying that the other party would not look over.

“Urine is outside, it means that you are short!” This slogan made Ada Yan regretting why he had to learn Chinese! His right hand shook, and a few drops of dark yellow liquid suddenly dropped on his feet.

Back to the workshop, Aida Hiroshi's head couldn't be lifted, but whenever he heard the whispers and laughter of the staff member and others, he would think it was a mockery of his little caterpillar!

"Okay, can you watch all of it! Do you think the technology of Zeju Corporation can reach our level?" Liang Xiao's fat face looked so disgusting to Kojima Kojima

"It's not unusual. Give us a little time, and we can make better technology than you!" Kojima Kojima said that he didn't believe it. The breakthrough in the field of rare earth metal smelting was burned by money. Under such circumstances. How much can Juan Co., Ltd. give him to burn? Moreover, while they are burning money, Changan Nonferrous Metals will not stand still. If they are ready to burn results, Changan Nonferrous Metals Corporation has introduced more advanced technologies. They can only cut the belly together!

"Then we will wait and see!" Liang looked at him with a smile. If the technology is so easy to break through, how can Changan Nonferrous Metals Company spend such a lot of energy, let alone say, he has reduced by two in recent times Ten pounds of fat.

The party in the room has already reached the exit of the workshop. Liang Xiao stopped and brought them to the door of the factory, "Okay, I won't keep you for dinner! Why should I go! I'm waiting for your new technology!"

After the door closed, Liang Xiao went to Liu Haitao to discuss the planned things, leaving Kojima Kojima and Xiang Tianyan at the door.

"Ai Tianjun, have you got anything?" Kojima Kojima pinned his last hope on this professional, if he had any gains, he wouldn't accept any mockery.

"Kojima Jun! I'm so sorry!" Aichi Tiantian directly bowed at 90 degrees, "The other party looked really tight, I didn't find a chance!"

"Baga!" Kenji Kojima blurted out, and rushed forward. He just wants to stay away from this place now! This action is so depressing!

"Kojima-Kun! Kojima-Kun!" A few steps later, Yan Tian also hurried to catch up.

"What are you still doing with me!" Kenji Kojima doesn't want to see him at all now!

“Kojima, I think we are in trouble!” Aida said bitterly.

“Yes, Zejuan Co., Ltd. has encountered the biggest trouble since its establishment!” Kojima Kenji muttered to himself.

“I’m not talking about this, I’m talking about our troubles now!” Ai Tianyan pointed to the road ahead, here and there are all kinds of construction machinery besides the large trucks that transport goods; oh, yes There are also cars parked alongside the Jingle City Government.

“Well? What’s wrong now?” Kojima Kojima is not yet clear.

“Did you not show up? We are still in an unopened area. There are no taxis or public transportation! How can we go to the city now?” Ai Tianyan looked back at the factory, “Maybe we Can I borrow a car from the factory? “

“Even if I go back, I shouldn’t beg for them to whisper!” Kenji Kojima snorted. Continue to move forward, Ai Tianyan had no choice but to keep up.

Walked less than two kilometers, the middle-aged man who had been in the laboratory for a long time and lacked exercise could not stand it, he said breathlessly. “Xian Tianjun, have you brought the money? Let’s see if we can stop a truck to take us back?”

“I brought it!” Aichi Hida hurriedly opened her wallet, but only turned up a bunch of yen RMB is nothing! He touched his head awkwardly and said, “Maybe people here know the yen!”

“Fuck! You want to swindle labor with the money! You are still here to stay!” The first truck driver stopped was taking a sip and got on the bus and walked away. The exhaust of the car sprayed his face.

It didn’t get better until the fourth car. After holding the banknote for a long time, he nodded, “It seems true!”

Can’t really be more real! The two of them burst into tears, so they were ready to pull forward to pull the door, but they were stopped by the driver. “Pay the fare before you get in the car! I think

you will have ten of them each!” The driver flicked his hand. Natsume Soseki (Avatar above 1,000 yen.)

“Nani! The fare of 10,000 yen per person!” The two suddenly exploded. Are you an airplane or a yacht? “You are extortion!”

“Love sitting or not! Give money if you want to get in the car! Stay here if you don’t want to get in the car!” The driver looked at the weather and said happily, “Yeah, it looks like it will rain! I’m still going home Collect your clothes! “

The two of them looked at the sky, and a thick cloud of black clouds was floating towards this side, “Kojima, it seems that it is too late to call the city staff to pick us up!”

“Give him money, let’s get in the car!” At the order of Kojima Kojima, Aida Hiroshi counted twenty banknotes and handed it over, and then prepared to pull the door again.

#### Chapter 573 - struggle

“In the end, those two little devils spent 30,000 yen to catch a hitchhiker, and now they have returned to the hotel to rest! It seems that it is still a bit unsuccessful!” Changan Nonferrous Metals Company’s factory just accompanied Xiang Tianyan just now. The staff who went to the toilet together happily reported to Liang Xiaohui.

“Continue to arrange people to stare at them, and I will go to the meeting to emphasize the principle of confidentiality! It is not easy for our company to train a qualified technician, it would be a pity if we can’t stand the temptation!” Liang Xiao ordered.

“You can rest assured! Not only our own company’s people are staring at this, but even the relevant departments have people in it! Even the neon intelligence department may not be able to steal anything, let alone a district. A business investigation company! “They have checked the identity of Ai Tianyanyi.

In the next few days, Kojima Kenji and Aida Hiroshi were divided into two roads. They continued to go to the Jingle City Government to seek opportunities. They rented a car all the way and wandered around the factory, trying to buy one or two technicians. But after being busy for a few days, there is still no gain, but in desperation, he can only return to the neon.

“President! Changan Non-Ferrous Metals Co., Ltd. is tightly guarded and the local government has obstructed in many ways. We ... We really did not find a suitable opportunity to disappoint you!” Kojima Kenji bowed at twenty-nine degrees, his head dared not lift up .

“It seems that we can only think of other ways!” Zeng Qianbing has actually thought of the possible consequences, but he was still very depressed to hear these from Kenji Kojima. He got up and turned around in the office for a long time. , “Kojima, sit down! I will contact the Wayne Group and the Salman Group. Now is the time for us to work together to deal with this huge crisis!”

“Hey, I’ll go to the laboratory to continue research!” Kojima Kojima returned to the company just after getting off the plane, and he didn’t even return home, “Your Excellency! Zeju Co., Ltd. has experienced crisis again and again since its establishment , We have passed through safely with our efforts! I believe we can finally reverse the situation this time! “

“Kojima, please!” Then Qian Bingwei bowed deeply, “I will go to unite the Wayne Group and the Salman Group. First, apply pressure to Changan Nonferrous Metals Company to slow down their expansion. ; Please, you and your colleagues in the laboratory must show the spirit of the Showa boys to overcome this great crisis! “

“Hi!” After the war, the neon people born during the Showa era created one economic miracle after another with the spirit of being active and hardworking. Let Neon Xun rebuild his homeland from the post-war ruins and lead the neon economy to flourish. Although their economic exhibition was interrupted by the United States after the Plaza Agreement, this spirit of non-confidence is still engraved on Kojima Koji In the bones of this generation, he didn’t say much from the president’s office. Entered the laboratory and began intensive research work.

Wen Qianbingwei has contacted the Wayne Group, Salman Group, and other companies in the United States and India that have greater influence in this field, and began to use video conferencing to discuss countermeasures.

“Mr. Wayne, Mr. Salman, Mr. Tata ...” Then Juan Qianbingwei greeted the peers who appeared on the video, there was no lack of differences between them before, but now only Together, “Have you all received the latest news from Changan Nonferrous Metals?”

“This is the worst news I have received in the last ten years!” On the display, a handsome white middle-aged man frowned, “My laboratory is completely clueless about the production technology of this new product! According to estimates. I am afraid it will take a year plus hundreds of millions of dollars in funding to make a difference! “

“At this time, the market has already been swallowed up by Changan Nonferrous Metals Corporation!” Salman of the Salman Group interjected, he is a white-skinned Kshatriya.

“We must prevent Changan Nonferrous Metals’ products from entering the international market!” The owner of a small business also joined the discussion.

“What way?” Wayne shrugged and thumped the table hard. “As long as Chang’an Non-Ferrous Metals Co. lowers the price, those buyers will definitely rush to these Chinese people like a dog who sees bones!”

“Dear Sirs, I have a way to temporarily postpone the expansion of Changan Nonferrous Metals Company! It just needs the cooperation of all of us!” Zhe Qianbing said slowly.

“Oh? What’s the matter? Would you like to come up with your unique purifier formula and share it with you? Your purifier plus our ore ratio may make good things!” Wayne leaned forward. Asked, the secret of their two companies pressing the bottom of the box when these two technologies are in decibels.

“Combine the technical backbones of several of our companies and come up with their own secrets. Conducting research in the same laboratory can indeed improve research! But where is this laboratory? Neon? Rice or India? “Quan Qianbingwei asked back,” I’m afraid that no one will feel at ease there? “

Wayne thumped again and sat back again, Salman shrugged. These secrets are the foundation of their company’s survival, and how can it be easily shown, “So do you have any other options?”

“Raw materials!” Silent for a while Then Qian Qianbingwei spit out a word, “As far as I know, the raw material reserves of this species in China are not much! As long as we control their imports Channels, Changan Nonferrous Metals Company cannot expand its production capacity in a short period of time! Their existing production capacity can only meet domestic demand. It is impossible to export! This has earned us time, in this time we carry out research, or Cooperation! Hurry to complete the technical update before they enter the international market, so that it is possible to continue to survive! “

“They have purchased several new mines in Congo, and now the raw materials are being continuously transported to China! And those other mining groups are also watching. As long as the market changes slightly, they will go to those Chinese!” Wayne said coldly.

“We can increase the purchase price and eat all the production capacity of those mineral groups!” This will definitely increase the cost of their company, but now he can only drink even poisonous wine. “As for Congo, I think Mr. Wayne will have a way!”

“I have a little influence on the White House, but I can only delay their mining and transportation a little bit! There is no way more!” Wayne seems to have agreed to his strategy.

Chapter 574 - Bottom draw

“So can we start talking about share allocation?” Salman said. Since the three big brothers have agreed to this plan, other small companies can only follow. ??? 1 ??? s.

“I’m responsible for delaying the delivery of Congolese minerals, so my share should be reduced!” This business is not a profitable one, and Wayne took it out first.

“Zejuan Co., Ltd. is willing to bear 25%.” Zheqian Bingwei threw out his own price tag, which is slightly less than their product’s share in the global market.

“The Salman Group is willing to bear 20%!” Salman Xun measured the share he should bear based on the insurance price of Qianbingbingwei. Because of the geographical location closer to the mine, he paid a price. It’s less than the one with thousands of soldiers!

“10% of the Wayne Group! Congo ’s mineral production has recently risen dramatically, and it is approaching 18% of the international market!” The implication is that his contribution is greater than that of Zeju Corporation!

“Then the rest is your business!” Then Qian Qianbing turned his attention to other companies. The heads of those companies looked dignified, and their financial strength was not as strong as these three companies. They bought too many unnecessary minerals. They are no small pressure! And they may not be able to make technological breakthroughs before these three companies. This mineral is likely to rot in their own hands.

“President Tsuchiya, how much share does your company intend to take?” After seeing a long time no one responded, Juan Qianbing took the initiative to speak, and he set his sights on another neon company.

“Your volume! You have some problems with the funds recently. I’m afraid ... I’m afraid I can only bear a 5 percent share!” Tsuchiya Hiroki, the president of Tsuchiya Trading Co., wiped his forehead and said tremblingly.

“Oh? Is it because your order with Mitsui Co., Ltd. occupies too much liquidity?” Then Qian Qianbingwei said with a smile, “If this is the case, we will be happy to do it. You solve the problem!”

It 's not as good as my appointment with the manager of Ikegami, Mitsui Co., Ltd. Let 's discuss and give us this order, which has some capabilities from Tsuchiya Co., Ltd.? “

With this statement, Tsuchiya Hiroshi's mood fell to the bottom of the valley, and other company bosses who wanted to find an excuse to reduce their share also quickly shut their mouths!

“Oh? What's the contract? Mr. Juan, I don't know if I am qualified to participate in a copy?” Wayne said aside; in his view, this incident is both a threat and an opportunity. If used well, these small companies will now give up a new batch of market share, so he never wants these small companies to escape.

“It depends on whether President Tsuchiya is willing to stand in the same camp as us and assume his due responsibilities!” Then threatened Hongbinguo. At the same time, he turned his head and turned his attention to the heads of other companies that did not subscribe for shares. His eyes were met, and those people bowed their heads.

“I ... our Tsuchiya trading company is willing to bear ... to take a 7 percent share!” Tsuchiya Bosi gritted his teeth. Once the contract was signed, if their company's research progress could not keep up, it would only go bankrupt.

“I think eight percent seems to be more appropriate!” However, Juan Qianbing was not satisfied. This time, he directly took charge of Tsuchiya Boji, “Mr. Wayne, Mr. Salman, what do you think?”

“Tsuchiya Corporation is strong, and a strong company should assume more important responsibilities!” Salman said lightly, he was also happy to see other colleagues fall.

Accept their conditions, these companies will lose a lot of liquidity, if they can not obtain a new generation of smelting technology, they will fall in two or three years! But it is not to accept their terms. The combination of these three Big Macs will make them lose all their orders at once, and it will not last for one year anyway! Under the threat of these three companies, they have no choice. Although he knew that this was a glass of poisonous wine, he could only drink with his teeth clenched, and he subscribed for his share according to the standard of Tsuchiya Corporation.

“Very good, then Mr. Zui Juan and Mr. Salman, I will be able to join together and negotiate with those mining groups! I hope there will be a good result!” Wayne applauded. He paid for this agreement. The cost is minimal.

“Mr. Wayne, don’t forget Congo’s problem!” Zou Qianbingwei reminded that the neon does not affect Africa’s ability, so Wayne will take advantage of this.

“Leave it to me!” Wayne gave a meaningful smile. Although it is not the time when United Fruit Company can subvert a country. But it is easy to add a little trouble to others.

Half a month later, Liu Guangming, chairman of Changan Nonferrous Metals Co., received bad news, “Chairman, there is a warlord rebellion on the Congo side. The area of the rebellion is close to the mine, and the rebels have cut off the railways that transport the ore! Probably delayed arrival in Hong Kong! “

“I see our factory ICBC is about to expand! Now there is such a problem there must be a ghost behind it!” Liu Guangming leaned on the chair and rubbed his temple, “through other channels What about buying minerals? “

“Yesterday, the negotiations between the mining group and the Wayne Group, Salman Group and Zejuan Co., Ltd. are nearing completion. The Wayne Group will pay 8.75% higher than the market price to buy the production of these companies in the next two years. Share. I’m afraid there is not much left for us! Even if there is a fish that missed the net, the price will be ridiculously high! “Secretary Hui reported.

“It’s a good move to get paid!” Liu Guangming now hates those people who were mining and exporting rare earth mines! If it weren’t for them, how could Chang’an Nonferrous Metals Company be in such an embarrassing situation!

He waved his hand to signal the secretary to go out, then dialed Lu Qiujian’s phone and chatted for more than ten minutes. He put down the phone and laughed twice, “Sure enough, there are Mi Guo people standing behind to make trouble!”

“... Professor Lu has told me that the situation of the Congolese rebellion is not very great. The Congolese government will soon be able to rebel, but it may be half a year after the road is restored! That is to say, in the past six months In time, we will lose the largest place for importing raw materials! At the same time, we still cannot rule out the possibility that the country will make a trick again at that time! The National Mining Group will not be able to expect it in the short term! The domestic mineral products are not enough! Everyone talks See, how should we respond to this crisis! “Liu Guangming excused me from looking at the others in the conference room!

Chapter 575 - solve it completely

“The three companies Zhejian Co., Wayne Group and Salman Group jointly threatened those small and medium-sized companies to accept unfair share distribution, which has made small and

medium-sized companies such as Tsuchiya Corporation and Tata Nonferrous Metals very dissatisfied!” Changan Nonferrous Metals The marketing department of the metal company is also not eating, and the inside story of the meeting led by Juan Co., Ltd. has also been dug out by them. Duan Yunfeng, who was newly promoted to become the vice president, said, “The R & D strength of these companies is far better than The large companies such as Shangwe and Zejuan Co., Ltd., the ore they eat is far beyond the existing smelting capacity. Not only are they not useful, but they also spend a lot of money on storage and transportation! “

Everyone listened quietly, and some people who responded quickly had guessed Duan Yunfeng ’s strategy, “They have n’t had much working capital already. With such an additional expenditure, it is estimated that it will not be able to bear it in a long time. ! At that time, these ores can only become a burden. ← Baidu search → [x] “

After introducing the background, Duan Yunfeng threw his own strategy, “Our current production capacity is not much left after meeting domestic demand, so we simply release the remaining products at a substantial price reduction to the international market! Soon after that, there will be a large number of products of the same quality and the same price for sale! Press the price of the international market severely! Let their profit margin drop sharply, so that their financial situation will deteriorate even more! Propose a mineral acquisition to those small companies that will not be able to sustain it! At that time, they may not be able to ignore the threat of Zejuan Co., Ltd., and they can only transfer the ore to us at a low price! Let them save it for us for a while now. ! “

“But there are two problems since this!” Duan Yunfeng’s words just fell, and someone pointed out the loopholes in this plan. “First, our new factory expansion is already under construction! And this plan will take time to reach the factory. What will they do if they refuse to sell the ore after the expansion is completed? Will the new factory be idle? Secondly, there is not much left over from our products provided to Xi and the plan, I am afraid it is not enough to affect the market in the international market! “

“I will talk about the second question first!” Duan Yunfeng seemed confident. “Although we have not released many products, the scale of the factory expansion is obvious! As long as the factory can be successfully constructed, those companies that are not in urgent need will temporarily stop the big Buy, wait and see! Demand in the market is reduced, but the supply has not changed, then the price of the product will naturally fall! “

“But if Nozaki Co., Ltd. also unites them to limit production?” The person who laughed before asking the question. “In order to protect their interests, those large companies will certainly impose a production-limiting share on those small companies, so that the financial situation of these small and medium-sized companies will only deteriorate faster! This is really a high move! “

“We have accumulated a lot of ore in the early stage for the expansion of the new factory, and now there are two large cargo ships that have arrived in the Indian Ocean. The port will be delivered soon, so the ore consumption in the last six months It ’s not too big a problem! We have the capital to wait for these small companies to go bankrupt! “The head of the procurement department took out a bunch of reports and handed them to the attendees.

“The foundation for the expansion of the factory is about to start. I was thinking about simply doing it alone! But now it seems that it should be a special event!” Liu Guangming also agreed with Duan Yunfeng’s strategy. Ask for help from Professor Lu and let them bring some big leaders to attend the groundbreaking ceremony for us; the people in the propaganda department should also do a good job of cooperating and contact the domestic and foreign media as much as possible to create momentum for us! We have companies that have partnerships to issue invitations! There are companies that have not cooperated with us but have needs for our products, so please all come! Let them see our strength! Make the noise louder it is good!”

“Yes! Make sure to complete the task!” The heads of the Propaganda Department and the Outreach Department responded loudly, and finally it was their turn! These two people quickly made a long list in their hearts. It seems that this time Chairman Liu wanted to turn the simple foundation laying ceremony into a global industry summit!

Next everyone discussed the details of the plan with great interest. For example, which company, Tata Nonferrous Metals and Tsuchiya Co., Ltd., will not be the first to support it? Which leader should be invited for the groundbreaking ceremony? Is it possible for Professor Lu to invite Qin Feng? Who should send the invitation letter to? Would you like to invite Zeju Corporation and Wayne Group?

“You guys!” Seeing that their discussions are getting more and more intense, the head of the technology center Guo Zhenyu couldn’t help but he raised his voice and said, “I say you guys! Can I say a few words?”

The biggest reason why Changan Non-Ferrous Metals Co., Ltd. will achieve a major turnaround is that the research and development centers of Guo Zhenyu and Liang Xiao have developed a new generation of chemical smelting technology. Even if he wants to speak, Liu Guangming will not dare to despise it, and everyone is gradually quiet Down, Liu Guangming said kindly, “Professor Guo, please speak!”

“Everyone. Don’t you think the strategy we are discussing is too passive?” Guo Zhenyu supported glasses Although I don’t understand business, I still heard from our general paragraph that our plan is very good To a large extent, it will be affected by the international market, and can the international market really change according to our expectations? “

No one can guarantee this. It can only be said that there is a great possibility. Liu Guangming asked hesitantly, “Lao Guo, what do you mean?”

“In the field of high-tech competition, there is no new generation of technology that cannot be solved! If there is, then a new generation of technology!” Guo Zhenyu said confidently, “Now the biggest problem we encounter is the lack of mineral raw materials! Foreign Rich mines are monopolized by other companies. There are only poor mines lacking mining value in China and the remaining \*\*\*\* from previous smelting! “

Isn’t this obvious? Can you make ore out of thin air? As if guessing their minds, Guo Zhenyu continued, “I can’t make up the ore, but we can improve the smelting technology. If we can use lean or even \*\*\*\* to smelt products of equal or even higher quality! Then roll What is the point of their resource blockade? “

“After the success of the new smelting technology, our R & D center did not take a long vacation! After a few days of rest, we invested in new research! The goal of the research is the comprehensive utilization of lean ore smelting and ore! There are already some eyebrows ! Just give us time and money! Whether it is Zejuan Co., Ltd. or Wayne Group, I can completely destroy them! “Guo Zhenyu punched \*\*\*\* the table!

Chapter 576 - Fight with us

“Already have eyebrows?” Liu Guangming looked at Guo Zhenyu in surprise, ha ha ha, he went to Beijing Normal University Sangu Maolu to invite him out really no effort! In just a few years, the R & D center of Changan Nonferrous Metals Co., Ltd. walked to the forefront of the world under his leadership!

Liu Guangming was deeply proud of his original courage, Duan Yunfeng, Guan Yanqing and other company executives also asked Guo Zhenyu’s latest progress, “Director Guo, what is the situation now?”

“Xiaoliang, let’s tell everyone!” Guo Zhenyu still prefers to stay quietly in the room, so he gave Liang Xiao the opportunity to speak.

Liang Xiao was familiar with Guo Zhenyu’s personality, so he didn’t say anything. He reached out to the microphone in front of him. “Leaders, let me introduce you to the latest research progress of the R & D center.”

“Chairman Liu has just said that the most dà problem that our company is currently facing is the shortage of ore raw materials! Foreign rich mines have been monopolized by Zejuan Co., Ltd., Wayne Group and Salman Group! Low-grade poor mines! These poor mines I went to see in abandoned mines together with Professor Guo. They were thrown around as waste products, rock, mud, etc. These ores are muddy, rocky, and sandy. Weng also contains more than 50% crystal water. Before entering the grinding, it is a big deal to remove the crystal water. After entering the process, it is also difficult to combine, extract, purify, remove impurities, and control quality. Difficult.”

“Liang Xiaoxian introduced the background.

“Those things that were mined by the mining companies that were previously mined as mud stones are very low in taste, but the total amount is very large! Only the abandoned mine we have seen, the metals contained in those poor mines can reach us After the expansion, the output of the factory for one year! And there are more than ten abandoned mines of the same size in the region! If it is expanded to the whole country, it will be more! At that time, Professor Guo and I were distressed, I thought if it was How good it is to extract the metal from these scrap mines! “Liang Xiao’s lyrical aroused a laugh at the scene.

“Choosing these poor mines as raw materials has several advantages. First, it can break the monopoly of foreign mining groups on ore raw materials, and their prices will be completely destroyed. Second, the cost of these poor mines is very low. Professor Guo and I asked the local The government. These open-pit ores have caused serious pollution. When it rains, there is sewage with various harmful elements. The local government spends a lot of money every year on pollution control, listen Saying that we are interested in these poor mines, they just want us to pull them away, it seems that even the freight is willing to help us out! And there is a railway connection between the location of these mines and Chang’an, transportation is very biàn! This can greatly save our costs! “Said Liang Xiao, took out a stack of tables and posted them one by one,” This is our preliminary cost analysis results, you can take a look, according to our calculations, if this technology can be developed Success. Our cost will be reduced to one-tenth of what it is now, which is much less than the new technology that will be put into production! “

“Huh? Is it wrong?” Liu Guangming looked at the form. Where did Liang Xiao’s tenth come from? How is it different from his calculation?

“You may have only calculated our income from smelting metals!” Liang Xiaodan replied calmly, “The latest technology developed by our R & D center is not only pure smelting of rare earth metals, but also includes all kinds of waste gas generated in the smelting process, Comprehensive utilization of waste water and waste residue! The whole technology can be called comprehensive and efficient development and utilization of ultra-low grade minerals! “

The rise of Liang Xiao said that he stood up and walked to the whiteboard in front of the conference table, picked up the oily strokes, and said, “The mine we use, what we want to extract. Its content is

relatively small, even if it is rich, it is itself The tailings and waste ore of iron ore were initially considered to be of no use value. Something was discarded everywhere. The ultra-low grade ore targeted by this project can not be used anymore, lost the place and polluted the environment. Do n't send any transportation fees. “

“According to our previous results, we are confident that the comprehensive metal recovery rate of ore will be increased to 95%, and currently the world's most advanced technology is only 86%; we have only extracted needs from minerals. The remaining rare earth metals are discarded as waste products. Using the new method can not only increase the output of the original metal, but also recover other trace metals in the slag. All that can be recovered have to be recovered. Take us in Jingle For existing factories in the city, after using a comprehensive and efficient development method, hundreds of kilograms of gold, silver, indium, germanium and other associated products can be added every year. “Liang Xiao said at this time that the red light was all over,” hundreds of kilograms of gold And other precious metals do n't sound like much, but once they are sold, at least all the manpower expenses of this factory will be covered! “

Liang Xiao drew a chimney on the whiteboard and continued, “The exhaust gas from the factory still has many useful substances. We added a closed chemical reaction system to it to recover and process the effective substances in the exhaust gas. After the exhaust gas will become completely harmless gas, we will no longer have to worry about the villagers blocking the door! “

“The waste water is the same! The waste water contains a lot of heavy metal elements and acid-base liquids These are a small number after a year of recycling, and the profit of waste gas recycling It 's no problem earning your shipping costs! “

“Finally, there is waste slag. To build a \*\*\*\*\* yard to store the waste slag, and the related equipment and facilities of the \*\*\*\*\* yard, the cost is too exaggerated! We can use these \*\*\*\*\* to burn cement, make bricks, make fertilizer, and build roads. Change the pattern! Now that real estate is developing rapidly, there is a huge demand for various building materials in the market, and our products do not have to worry about sales! Slag can increase our income! According to our preliminary calculations, the \*\*\*\*\* is made Bricks and cement are sold, and the annual profit can almost smooth the R & D expenses! “

“Metal recycling has offset manpower expenditures. Waste gas and waste water can earn transportation costs! Waste residue is enough to support research and development costs! After these three major items are eliminated, how much of our production cost can be left?” Liang Xiao asked, everyone for a while. Without saying a word, he snapped the whiteboard in the end, “We have all reduced the cost to this point! What are they doing with us, the Wayne Group and the Salman Group!”

“Now that we have a clue! Let’s do it!” Liu Guangming believed in Guo Zhenyu, coupled with the high profit temptation of efficient comprehensive development and utilization, he decided decisively, “At present, the output of our existing factories is in addition to Xiang Xihe In addition to the financial assistance that is scheduled to be delivered to the previous period of time, there is still a lot left! We will use all the funds from this part of the product sales for technology research and development. Professor Guo and Xiaoliang, you go down and report a research and development budget. I ’ll help you coordinate how much capital, how many people, and what new equipment needs to be purchased. Please be sure to develop the new technology in the shortest time! “

“No problem, the general direction of the new method is already there, and the rest is just some procedural testing work!” Let us sacrifice the exclusion method and try the recipes one by one, and we will always get the most efficient solution! Professor Guo seemed confident about his professional affairs. He seemed to have seen the first prize of the National Science Progress Award in the new year before beckoning to himself.

“By the way, does the new technology have any special requirements for the factory?” Liu Guangming asked. “If there are any, we may have to adjust the plan for expanding the factory!”

“Almost no need, our new technology is not substantially different from the previous production method, just add a lot of ancillary facilities, I have seen the planning plan of the new factory, only need to do a few fine-tuning at a few nodes “Really!” Guo Zhenyu replied, “Oh, yes, the current site is probably smaller, I suggest to ask Jingle City for another piece of land for the construction of waste residue building materials factory! Also, wait until the building materials factory is completed, we The road in front of the factory should not be enough. You can suggest that the local government widen this road! “

“Haha! This is a good thing! Mayor Liu will definitely agree!” Liu Guangming knows which of his own has regarded the new factory as his core achievement. He will never hesitate in these little things.

“The groundbreaking ceremony was still carried out according to the original plan! However, the new technology research and development will not be disclosed for the time being.” Liu Guangming also began to ruin, “I want to see Zejuan Co., Ltd. They took out with confidence When it comes to new technologies, what kind of reaction will we see when we throw out efficient comprehensive development and utilization schemes! “

“Hundreds of millions of dollars of funding is just like this! Presumably, the old guy who has a thousand soldiers will vomit blood and three liters?” Duan Yunfeng and others laughed as if they had seen this scene.

“Do you have any questions?” Liu Guangming looked around. Then hòu got up, “So the meeting is now adjourned, and the office will send the minutes of this meeting to your OA system later, then everyone will work in accordance with the resolution of this meeting! Be sure to fight the next battle! I go Contact Professor Lu! “

At this time, Lu Qiujian was in Xihe’s publicity department in the urban area of Chang’an, surrounded by Da Liu, Xia Jia and others, watching several workers wearing the badges of the old wave network company busy in front of the computer. With.

After being busy for a while, Shen Cangyue, the leading department manager of Jiulang Company, got up and said respectfully, “Professor Lu, the head office has passed the audit. Now we and the planned project form the first batch of Jilang Lang bib plus V account One, from now on you can send messages on the bib and interact with fans! “

That’s right. Now is the time when the old wave bib, which will occupy the most dà share of the Chinese bib market in the future, has just been launched. Lu Qiujian, who knows the huge influence of this emerging media, immediately ordered the publicity to contact the old wave after hearing this news. The company has registered a V account for Xihe Project.

Now the old wave bib is trying to expand the influence of the bib. When he heard that Xi and the plan had demand, he immediately sent staff to carry out door-to-door service. Not only did he not charge any fees, he also proposed to pay for them. A fee of not less than a single digit to obtain the exclusive rights of Xi and the plan on the bib. In other words, as long as Xihe’s official account does not go to other Weibo sites, you can get a large income.

This kind of money sent to your door will definitely not be unnecessary, and you don’t have to sell the ethics to promote soft articles for them. You can also get the official support of the old wave bib, why not do such a thing.

After completing all the formalities, Xia Jia, the head of Weibo, the propaganda department, was trained. After all the work was completed, Shen Cangyue refused to leave. Eyes have been turning around Lu Qiujian.

After waiting for a long time, she finally found the courage to walk to Lu Qiujian. “Professor Lu, don’t you know if you and other teachers in our project are interested in registering a personal plus V account?”

Lü Qiujian's influence is self-evident. Da Liu and Xia Jia in this office also have a lot of fans. It would be good news if they can all win the promotion of the old wave bib!

"Huh? Then help me register one!" Lu Qiujian remembered an old saying and propagated the idea position. If the right thoughts are not occupied, the wrong thoughts will be occupied; he has never seen some things that the big V used his influence to slander the scientific research work. It is better to let these people have the right to speak. In your own hands, see if those bibber users believe they believe in themselves!

"Okay! I'll contact the head office immediately!" Shen Cangyue was overjoyed and didn't expect to succeed so easily! She quickly called huà to report this good news to her superior.

Soon the discussions on account registration, data review, V-adding procedures and fees paid to Lu Qiujian, etc. ended, and Lu Qiujian's personal plus V account was born.

Immediately, the old wave company announced this major news to the bib users in various promotion channels of the bib website, "China's famous mathematician and physicist Nobel Prize in Physics, Fields Mathematics Award 1. Professor Lu Qiujian, the winner of the Wolf Prize in Mathematics and the head of the Xihe project, officially landed in the old wave bib! "Well, if a bib can only send 140 words, it is impossible to write so many titles. This bib It will be longer.

Lu Qiujian also sat in front of the computer and started to edit his first bib, "Hello everyone, this is Lu Qiujian, I will be here with @ 羲和计划 to inform you of the latest developments in Xi and the plan, as well as other sciences Knowledge."

Lu Qiujian also joined the old wave bib! This news spread quickly among many netizens; what are you waiting for, quickly pay attention! For a time, the number of fans of Lu Qiujian grew rapidly like a thermometer thrown into a steel-making furnace.

#### Chapter 578 - Male god

Less than ten minutes after this Weibo post was posted, it received 120,000 reposts and 140,000 comments. The number of fans is constantly refreshing the record of the growth rate of fans of the old wave bib. Two hundred thousand people followed Lu Qiujian, and it seems that there are signs of increasing speed.

Affected by Lu Qiujian, even the official Weibo with Xi and the plan also gained a large number of fans. Xia Jia's first bib has not been edited, and the number of fans on this account has jumped by five figures.

“Manager, my fans haven’t started implanting it yet! Why is it so much? Did you do it first?” A staff member in the office of the old wave bib raised his head from the computer and asked.

Implanting fans for highly influential celebrities can obtain a considerable number of fans in a very short period of time, thereby attracting more attention from bib users. This is already a popular promotion method for the old wave bib. After the news that Qiu Jian had settled in the old wave bib, the staff of the promotion department came up with the plan in the shortest time. In addition to publishing this good news in all promotion channels, fans were implanted for Lu Qiuqian’s big V account. It is also part of the plan.

“No! Isn’t you responsible for planting fans? Why, you haven’t started the operation yet?” The manager took a sigh of relief. If so, then the rate of fan growth is too exaggerated!

“Then I am implanting according to plan now or not?” He is a bit uncertain. This growth rate is already exaggerated. Will it be counter-productive if he implants fans again?

“Wait first! Wait until Professor Lu’s fan growth rate declines!” The manager quickly stopped, and he was also curious how much Lu Qiuqian’s true fans could reach.

Watching him climb all the way on the fan list of the old wave bib, Lu Qiuqian was also very excited. Taking advantage of his interest, he sent a second Weibo, and he released a concept drawing of a recyclable rocket. The Xihe plan has set a research and development schedule for recyclable rockets. The first launch may be carried out as soon as next year. Humanity is expected to achieve relatively cheap space travel within ten years! “

Fans who have been refreshed on his Weibo page for a long time once again set off a retweet frenzy. They have attached their own comments to forward this microblog of Lu Qiuqian to their fan circles, including many other big-name V people who have long been famous.

“Ahhhhhhhhhhhhh! So I still have time to go to space for a honeymoon! It’s so romantic to think about!” A youth idol star forwarded comments and attached a photo of the starry sky.

“Can I sign up now? I applied to be the first group of tourists to enter space!” Commented Hua Guo’s current most famous driver and youth novel writer.

“Congratulations to Professor Lu and the mobile game members of the Xihe planning team! In addition, I would like to ask, Professor Lu, there will be no Chinese men’s football next year’s

World Cup! Is it possible for you to participate in the 2014 Brazil World Cup qualifier?” This fan Also matched with a tearful expression.

“” Avatar “has been officially released! Director Cameron should be idle? When will” Three Body “start shooting?” A masculine actor asked, it seems that she also wanted to participate in this very much Go to the movie.

“Congratulations to Professor Lv Qiujian and Xihe Planning Team for another major contribution to the development of Huaguo Technology!” This is a message from the official bib account of another scientific research institution.

“Don’t be ridiculous! How can we accomplish this kind of technology that Chinese people haven’t realized with the bureaucracy of Chinese scientific research institutions? I think it’s just a means of Xi and planning to defraud funds?” A lawyer said ironically, but hò Without waiting for Lu Qiujian to reply, he was scolded by countless fans as a dog. He still had hundreds of thousands of fans before posting this comment, but after this comment, fans immediately began to decline rapidly.

Lying trough, this rhythm is wrong! I did n’t scold government fans the more I used to? what is it today? He quickly regretted deleting the comment. But it was too late. Someone had forwarded screenshots of his comments. One week later, his fans were almost one-tenth of the previous ones, and most of them were zombie fans who bought them for money.

At that time, Lu Qiujian had accumulated millions of fans and became the most famous celebrity fan, and he has never given up this position since then.

Of course, these are the future things. Now more and more reposts are being made, and the comments during the transfer are gradually becoming crooked. A female netizen reposted, “Beng Bang Biao! People don’t look at the design of these rocket \*\*\*\*\* horses Picture! People want to see Professor Lu’s recent photos! Don’t you think Professor Lu is so handsome in the advertisement? “

“→ \_ → + 10086! I saw Natalie’s eyes in the advertisement was wrong! She must have liked Professor Lu! I heard that she would also participate in the shooting of” Three Body “! Sisters! Professor Lu belongs to Hua National. She must not be abducted! “

“Rightmost +63325! Professor Lu is not only handsome in the advertisement! The stadium is so fascinating that people don’t want it!” This one immediately posted a photo of Lu Qiu built during the Olympics, “Ha ha ha, I went back then You filmed it on the spot, you envy it! “

“Slay to show off the party! I come to show the original CDs I have collected! My friends bought them for me from the UK!” Said to kill others. However, this guy brought out more high-end display props, “Professor Lu’s bass is also very popular! Hawking’s voice is cute!”

Then there are more and more people showing up at various high-ends. Passing in low-key, I wouldn’t say this photo was taken when I watched the NCAA game! Look at the two people in the distance behind me? Is it like Professor Lu and Anthony? “

“Poor, I only have a signed version of” When Humans Start to Look Up at the Starry Sky “!”

However, the summary of a girl with a bib account called Mushu girl made the fans crazy. “Playing basketball can win the NCAA championship! Playing football easily won the Triple Crown! Needless to say academically, there is only one in human history who has won both the Fields Award and the Nobel Prize! I will also write books and play Beth! Where is this tyrant! It’s an almighty male god! No! I want to have a monkey for him! “

Although the word male was born for the first time, it did not affect the understanding of this term by many netizens, and it quickly became the standard name for female bib users to Lu Qiuqian.

But Lu Qiuqian didn’t know anything about these at this time. Now he has launched his own account and is currently in contact with Liu Guangming. “Well, I understand, I will help you contact Secretary Qin!”

Chapter 579 - wedding?

“Director Wang, is Secretary Qin busy now?” Hanging Guo Zhenyu’s phone, Lu Qiuqian looked at the time. Now Qin Feng should be busy, so he dialed Wang Yang’s phone number.

“Professor Lu, if someone asks, I will definitely say that Secretary Qin has no time, but I will go to help you with your question!” He said that he quietly slipped to Qin Feng who was in a meeting without hanging up the phone. He whispered a few words, and Qin Feng took the phone from the venue and answered the phone, “Xiao Lu, is there anything I need to solve?”

“That’s it! Recently, there have been some situations in the international market ... Several foreign companies have jointly controlled the share of rare earth minerals, and the political situation in the Congo has encountered turbulence ... So Chang’an Chairman Liu of the Metal Company intends to increase the scale of the foundation laying ceremony ... I do n’t know if you have time to attend?” “Lu Qiuqian didn’t turn around, Barbara said the matter again.

Qin Feng listened silently over the phone and waited for Lu Qiuqian to say something softly. "Well, I know. I will ask Wang Yang to check the latest schedule. If I can spare time, I will go." A trip! "Qin Feng didn't ask them what the original plan was to lay the foundation. What he could go to was the greatest support for Changan Nonferrous Metals Company. Of course, the time had to be decided by him.

"Okay, thank you Secretary Qin!" After speaking, Lu Qiuqian quietly waited for Qin Feng to hang up the phone, but after a while, the beep sound of the hang up didn't ring.

"Xiao Lu!" Just when he thought that the phone was broken, Qin Feng's voice rang again, "I said when are you going to have a wedding? I'm still waiting to eat your wedding candy!"

Ok? Why did you suddenly ask about this? Lu Qiuqian is a little puzzled. You are all elders, and you have to worry about these petty things? What is the actual cause? Lu Qiuqian quickly passed the latest things and quickly found the answer. It turned out that "Three Body" was about to start shooting!

The last time he saw Natalie must have been reported to Qin Feng. He may not like this kind of thing, but it is also not appropriate to use this as a reason to punish Lu Qiuqian, because after all Xi and the plan are inseparable from him. ! In addition, the investigation has ruled out that Natalie may be connected with the intelligence services of the United States or Israel. Then this matter is just a matter of personal style! However, this matter is not a good thing after all. If it is exposed by some unscrupulous people, it is probably not conducive to Lu Qiuqian to continue to preside over Xi and the plan. So Qin Feng reminded Lu Qiuqian in this way.

It's really troublesome! Hey, it seems that the contact with Natalie will be more cautious in the future! Lu Qiuqian scratched his head depressedly, "We just got the certificate a while ago, and we didn't plan to make a big deal for the wedding. I just wanted to invite the relatives of the two parties and a few classmates. You report! "

"Xiao Lu, this is your fault! What should I say about this big event in life?" Qin Feng also made a joke, "You are a billionaire! There is no shortage of money for those weddings. ! "

It's me and you are not married. I like it. Mao must follow your aesthetics! Lu Qiuqian vomited in his heart, he pushed away again. "Recent research is at a critical juncture. I do n't have time to worry about it, so I'll just do it!"

But at this level, Qin Feng still refused to let go, "These things have been done by others! You have no shortage of people, I can't lend you Wang Yang? It's not just me who wants to attend your

wedding! Even if you do n't have time to send an inscription, it 's indispensable! And the elders are also asking about your marriage. He said that he has prepared an interesting gift for you. Ca n't you let them down! ” Said.

Okay, if I persist, it will be all right and everything will come out. Hey, people can't help themselves in rivers and lakes! Lv Qiujian breathed a breath. “Don't dare to bother Brother Wang, I'll arrange it myself! Anyway, my parents are also at home, so these things let them go to do the job!” At first, they comforted them and asked them not to agree. Do it, and the result is now back again, why is this really necessary! Lu Qiujian is now particularly frustrated.

“I think this matter will be finalized this morning! My schedule is not very tight next month, so I will choose a time next month!” Qin Feng took the lead directly for him, “As for the wedding location, Chang'an Is there a wellness center in the suburbs? Where is the place good, and there are not many people in usual times. The place is set here! The master of ceremonies will host these. I let Xiao Wang find you a few from the court station. By the way, let the court station make a documentary for you. By then, this will be precious historical data! ..... “

Dear, did you get such a big move when you got married? Otherwise, you can just lend me the Forbidden City! Lu Qiu couldn't keep talking, can you become a middle-aged woman in an instant!

In fact, he also knows that the reason why Qin Feng wanted to make things more quiet was to persuade him to take it away. On the other hand, he wanted Natalie to retreat from difficulties, but this feeling of being arranged was really uncomfortable. ! Shouldn't marriage be something for both yourself and Xia Xiao? For Mao to grieve himself to entertain others!

“Don't be so troublesome?” Lu Qiujian resisted weakly.

“I want it! I'm still in the meeting, so I won't talk to you first. I will ask Wang Yang to sort out a plan and a list of guests that need to be invited. You can make adjustments based on these adjustments!” Hang up the phone.

Hey Lv Qiujian sighed again, it seems that he will suffer sometime! The baby is bitter, and the baby hasn't said it yet. Except for Xia Xiao and himself, I'm afraid anyone will regard this as a lifetime glory! But they just wanted to happily finish the meal with their family, and then take a moment to find a quiet spot to spend two days in the world of two people! This glory that outsiders like is not the result they both want!

He went back to the office listlessly, and continued to watch other people busy, and his mind was completely messed up with no idea what to think; Xia Jia was a female, and he was sensitive to find

out what was wrong with him, and could n't help but ask, "Professor Lu, you What happened here?"

"It's okay, the wedding is really a headache!" Lu Qiujian didn't pay attention to blurting for a moment.

"You are getting married!" Xia Jia couldn't help shouting, and immediately attracted the attention of all the staff. The middle-aged people and Kiki rushed to him. "When is the wedding going? Remember to invite us!"

"Go all, go!" Lu Qiujian responded listlessly.

#### Chapter 580 - Nervous preparation

Pay attention to the starting point of reading, get the first-hand news of 515 red envelopes, students who have not grabbed red envelopes after the New Year, this time can show their skills.

Qin Feng attaches great importance to the expansion project of Changan Nonferrous Metals Company, and it will not take long for Wang Yang to come back and call, "Professor Lu, Secretary Qin will have time next month on the 2nd. It will be on that day! By the way, I will send the wedding proposal to your mailbox later! "

We are still good friends without saying the last sentence! Lv Qiujian hung up the phone after two depressing calls, and called Liu Guangming in the backhand, "Secretary Qin said, he will have the time next month, you will lay the foundation The ceremony will be on that day! "

"Next month? Fortunately, it's okay, time is too late, I will arrange for people to go!" Liu Guangming breathed a long sigh of relief, if the time is too short to convene guests from around the world, it won't be worth it!

"Well, okay, things are done for you! It's all up to you next!" Lu Qiujian said sullenly.

"Thank you Professor Lu! By the way, are you going to take a plane with us then?" Liu Guangming heard Lu Qiujian's unpleasant tone, and quickly tried out carefully.

"I'm going by train! Don't worry about me! I'll be there on time!" This is also an important cooperative unit of Xihe plan. Since Qin Feng has gone, of course, Lu Qiujian has no reason not to go! But I am real I do n't want to see him! I 'm afraid he will think so in the whole country! If anyone else encounters such a good thing, he will not be crazy!

“That’s good, wait for Jingle City, I will pick up the wind and wash the dust for you!” Liu Guangming hung up the phone after hearing the beep on the phone, he couldn’t care more about why Lu Qiujian was in a bad mood, and immediately dialed The office director’s call, “You immediately summoned the company’s middle and above leaders to the office, there is an emergency meeting now!”

“The time for the groundbreaking ceremony is set?” After getting a positive answer, the office director was busy immediately. After half an hour, all the leaders in the company came to the office.

“Tell everyone a piece of good news! Secretary Elder Qin Feng of the Elders of Hua Guo will also participate in the groundbreaking ceremony of our company’s factory expansion project! The time is scheduled to be on the 2nd of next month! This is the most glorious page of Changan Nonferrous Metals Company since its establishment ! All departments must play a 12-point spirit and do a good job in preparations for the groundbreaking ceremony! “Liu Guangming said with great enthusiasm. With this opportunity, coupled with his two years of political achievements, he will enter the head office when the time comes A vice chairman is not a problem at all! It is not impossible to be the chairman directly if you are lucky!

“The invitation letter has been prepared, just wait to add the final date! We have already prepared the list of Yao Qin’s units and submitted them to the leaders for review!” The outreach department first reported the report, “This time in addition to Xi and plan leaders, In addition to domestic counterparts, companies with purchasing needs from all over the world will be invited to participate, including the German company Schroeder. This company is a cooperative unit of the European Space Agency; the spae company of the United States, Canada’s

“I will go to Jingle City and Mayor Liu to adjust the original ceremony plan as soon as the meeting is over!” Said Duan Yunfeng, who was in charge of coordination with the manager’s office.

“The old section is hard! Find someone to book a ticket first! If time is tight, you will go first! The meeting minutes will be sent to you later!” Liu Guangming was very satisfied with his work attitude.

“The factory’s tour route has been planned! The tour process and personnel training plan have been formulated to ensure that the itchiness of the gate will not reveal the technology!” Liang Xiao said confidently, after Aida and Yanji Kojima That matter, he was a little more sure about the job!

“We have now approached some of the best event companies in Jiangsu Province, nearby Modu, and Jiangnan Province. They have submitted event plans in accordance with our requirements, and

bidding can be conducted as soon as possible!” Said Guan Yanqing, who is in charge of event organization .

“As of now, we have sent invitations to various media and news agencies such as the Chaoyangtai, Dazhong Daily, Science and Technology Daily, Jiulang.com, Agence France-Presse, and YMCA. Most of them accepted the invitation. I believe. After Secretary Qin will participate in the news of this store, more media will take the initiative to participate! “The propaganda department responsible for interfacing with the media reported,” Our department also borrowed special machines from Changan TV station and Photographers, I believe this video material will become one of the most valuable assets in the history of Changan Nonferrous Metals Company! “

“The laboratory in Jingle City is ready for use! I will be fully prepared when the groundbreaking ceremony!” There are a lot of dangerous chemicals in the laboratory, these must be cleaned in advance! Wait for Qin When the wind comes to visit. In most cases, just choose a few safe items to do it!

“Our department”

“I have tentatively planned three plans for the souvenir of the groundbreaking ceremony”

Various departments reported their work with enthusiasm, and Liu Guangming listened intently. At this time, Duan Yunfeng was ready to leave. “Chairman Liu. I will go first. When I arrive at Jingle City, I will be the first Report to you! “

“Go to the airport!” Quickly ran downstairs to sit in his car. He told the driver that his phone rang without waiting for the car to start, “Duan Duan, I have called every airline! Today is really a bit late, and all flights to Jingle have already taken off!” And there are no flights to Jinling and Gusu next to me! Do I want to buy you a train ticket now? “

“Why are you so nervous! You should buy the train ticket first! I’ll think of a way!” Duan Yunfeng’s brow suddenly wrinkled, hung up, and immediately flipped the phone back.

Hmm? This person seems to be useful, “Hey, is it Colonel Zhang? I am an old section of Changan Nonferrous Metals! I received it last time you came to our company to buy metal materials! Do you remember?”

“Why don’t you remember! You helped us solve a big problem last time. This metal raw material is very useful in some projects! Why, what can I do for you to call so late?” Military It’s

straightforward, without too much greetings, just ask This is the case! Our company has a central leader in the expansion of the factory in Jingle City, and it will also participate in the product quality and output after the factory is completed. You are indispensable! “Said Yunfeng Duan for a long time, throwing his own purpose,” Colonel Zhang, I heard that you have a good relationship with the Chang’an Military Region? Could you please ask if there is a military aircraft in Feijingle City or nearby nearby tonight? Okay, I’ll trouble you! “

I hope everything goes well! Duan Yunfeng began to enter anxiously waiting.
