

D. School 591

Chapter 591 - The most luxurious guest lineup in history

“Teacher, Mother! I wish you two white-headed winged ducks and wings!” As his students, Ye Chu, Xiang Zhen and Wang Wen also took special leave today to rush to the scene and become the first congratulatory party Guest, Ye Chu has not forgotten to bring his little girl Xie, they are also a pair of bridesmaids and groomsmen in this wedding.

“Come on, eat candy!” Xia Xiao smiled and grabbed a handful of candy and passed on, not forgetting to care about them. “When will Xiaoye and Xiaoxia plan to have a wedding? Xiaoxiang and Xiaowang will also come on!”

“Thank you Master!” Xizizi took over the candy, “then we will first clean up and then come out to help!” Their task today is very heavy, not much time wasted.

Ye Chu and others were escorted away, and new guests were welcomed. This time Lu Qiuqian’s attitude is to be respectful. “Hello Teacher Wang! Also trouble you to take a long trip!”

Previously, Lu Qiuqian attended the middle school mathematics teacher, and now President Wang is almost unable to smile, bringing out such students is really too face-lifting! A few years ago, I went to the Nobel Prize Gala Dinner, and today I can participate in his return ceremony. I heard that I can still see Qin Feng tomorrow. Looking at the whole country, can that teacher have such glory?

He pulled a young man from behind, “Xiao Lu, do you remember him? I brought him rashly this time, are you out of sight?”

“Isn’t this Zhang Yiyi’s classmate? Is studying at Beijing Normal University going well?” The one in front of him was the dropout student he met in the restaurant when he returned home last time. He introduced it to his alma mater and continued Passion for mathematics, and achieved good results in the second year’s international Olympic competition, was able to recruit specially to study in the Department of Mathematics of Beijing Normal University, can also be called Lu Qiuqian’s student.

“Thank you Professor Lu for your concern, I am very good at Peking University, and Professor Zhang takes care of me too!” Zhang Yiyi Gong replied respectfully. He thanked Lu Qiuqian in his heart, if not for his help, I am afraid that he is still working in a small restaurant? “When I graduate, come to Xihe and plan to fight for you!”

“You don’t have to do it deliberately. If you can make higher achievements in mathematics, then it is also a good choice to become a mathematician!” With Ye Chu and others. Xihe plan is not so lacking in mathematics, “Professor Zhang once told me about you, and I was wondering if I would introduce you to Princeton! This time, Professor Thurston will also come over , Then you guys have a good exchange! “

Zhang Yiyi went in with a lot of gratitude, and then Lu Qiuqian welcomed the representative of the Changan local official, “Hello, Deputy Mayor Xu, all the hard work!”

“It should be! Professor Lu is married, as a half host, how can I not attend! This is the dog, Tianyi. Tianyi, say hello to Professor Lu!” Vice Mayor Xu did not have any point in front of Lu Qiuqian Shelf.

“Professor Lu! I wish you and Ms. Xia a hundred years of good harmony!” Xu Tianyi lost the momentum of the day and handed a beautifully wrapped gift in both hands. “Different gifts are not respectable.”

“Thank you! Xiaoye, take Vice Mayor Xu to rest!” Lu Qiuqian took it directly without a condom, and Ye Chu took them both into the courtyard.

“Hi, Lu! It’s been a long time!” The handsome and handsome Tao Zhexuan became the first foreign friend to visit. He led his girlfriend quickly, “This is my girlfriend Laura, I want to ask you Are the best man and bridesmaid still missing? What do you think of us? “

“Wow. When you last met, you also introduced her as your student. I didn’t expect to become a girlfriend now!” It’s really enviable. The teacher who overthrew the student is all scum!

The endless stream of guests appeared accordingly. Soon the arrival of a white old man attracted countless spotlights, “Mr. Beckenbauer, I am very honored to be able to attend my wedding!”

“Lu, if not at the end of the league now, I would like to bring Bayern team congratulations to you!” Beckenbauer shook hands with Lu Qiuqian enthusiastically. Bayern’s poor record this season made him miss the young man in front of him even more. People, if he still stays in the Bayern formation, Bayern may have broken the Real Madrid European Champions League record of five consecutive championships, right?

“Ms. Xia is still so charming! There was no change at all when we met a few years ago. The carving knife of the years seems to have lost its effect on your face!” Sent to Xia Xiao in a sonnet-like tone Praise Beckenbauer took out a gift from a hundred people, with a set of jewels with the mark of Bayern made by top European masters.

It seems to be taking the same flight. Beckenbauer was all guests from far away from Europe, including Professor Luft built at the University of Munich, Professor Luft and his old classmate Dietrich. There are also Dr. Evans, Dr. Lafayette of Cern, Nobel Prize winners Higgs and Engle, and Braut failed to make a trip because of his physical condition; in addition, Brian, a guitarist of Queens and PhD in Astronomy at Imperial College -The appearance of May also murdered many reporters’ films.

The European guest group was followed by a delegation from the United States. Masters from Princeton came together. Professor Nan and Professor Zhang accompanied Professor Wyeth, Professor Thurston, His Excellency De Ligne, and Phillips and others. Over here.

“Professors, you are welcome to come to my wedding, your journey is hard, please rest inside!” Lu Qiujian quickly launched Zhang Yiyi, who has been waiting here for a long time, to serve as an ***** The opportunity to win their favor depends on Zhang Yiyi himself.

“Haha! Lu, is this your wife? I have to say you are a lucky guy!” Cameron offered a bear hug and watched Xia Xiao shake his head. “It’s a shame, the role of the movie has already been determined. ! Or I will definitely convince Lu to agree to your role! “

Lu Qiujian looked backwards when he saw his conditioned reflex. Fortunately, he did n’t see Natalie. The genius was a little relieved. “Cameron, I look forward to the film’s early appearance!”

“No problem! With half a billion dollars, nothing can’t be done!” Cameron patted his chest.

The reporter who was focusing on the film suddenly heard a breath of air. Was some big man who came more than Cameron coming?

“Gosh! Jobs, Bill Gates and Bezos are here too!” A reporter could not help but exclaim, “Nobel winner, the world’s top mathematician, the Hollywood gold director, plus the world’s richest man ! Is there a more powerful wedding guest lineup than this? “

Chapter 592 - Big names always play last

“When your wedding is going on tomorrow, I plan to take this video for you.” Jobs raised the ipad in his hand. “To be honest, it’s more fun to get this than a mobile phone!”

“As long as you are not too heavy, you can do this!” The duration of the wedding is not short, if you can hold the ipad to shoot the whole process, I can count on you.

“Lv, this is a gift I prepared for you!” Bill Gates was more reliable than Jobs. He opened the box and showed a rusty copper mirror inside, “My assistant said it was a Tang Dynasty. The bronze mirror that the princess used when she was married. He said that the mirror symbolizes perfect happiness. I hope you will like this gift! “

“Thank you very much!” Xia Xiao seems to like this gift very much, but Lu Qiujian is tangled. It stands to reason that cultural relics of this level are generally not very good to become personal collections, right? Hey, no matter, anyway, her parents also know how to maintain cultural relics, and besides, I would come to the museum and find it uninteresting.

Ren Zhenfei, who was behind, was quite depressed to see this scene. I knew I liked them and asked someone to buy it! Finding some cultural relics in China is not a problem for him!

“Beautiful Ms. Xia, you really look like a distinguished princess today!” Bezos of Amazon sent the praise to Xia Xiao, “I have read every one of your comics, the mysterious oriental style really makes People are fascinated, I think the American people will love it too! Are you interested in handing over your work to me? “

No matter what you do, you must be diligent or stolen. What purpose do you have? Sure enough, after complimenting Xia Xiao, Bezos turned to Lv Qiujian, “Lv, you know that my Blue Origin company is also conducting research on recyclable rockets. I think we seem to have some in-depth exchanges, and our research is also very needed That kind of new product from Chang’an Nonferrous Metals Corporation! Do you think we will find some time to chat? “

“Recyclable rocket technology is confidential! As for rare earth metals, Chairman Liu of Chang’an Nonferrous Metals Company will also come to my wedding. I think you can go talk to him!” Lv Qiujian left the question to others. Bezos shrugged unsatisfied. Entered the yard with Gates and others.

Say Cao Cao Cao Cao arrived. After Bezos, Liu Guangming walked over with Guo Zhenyu, Liang Xiao and others. After some greetings, he also entered the yard; Liang Xiao looked back at them from time to time, hey, it seemed like a good marriage! Should I go find a girl too?

“Professor Lu! I am pleased to you two!” The regular researcher from the Purple Mountain Observatory who hosted the China Dark Matter Detection Satellite Program also arrived. He was followed by a distinguished girl It ’s Qi Yunxing at our observatory, you must know her already? ”

“Can’t you remember! Xiao Qi, thank you for the gift you gave me!” The girl who gave her a star did not expect to look so beautiful! Lu Qiu Jian glanced behind him. I found that Ma Yang was staring at Qi Yunxing blankly; yes, I will create an opportunity for you. As for whether you can live with it or not, it will depend on your efforts. All right!”

“Ah?” Ma Yang flushed with a blush, stuttering, “Chang ... Chang Researcher, Xiao ... Xiao Qi, I ... I’ll take you in?”

Researcher Chang and Qi Yunxing followed him toward the hospital. Ma Yang repeatedly asked to talk to Qi Yunxing, but did not know what to say! Hey, I heard Ye Chu said that his girlfriend was picked up by Professor Lu! Should I also consult Professor Lu?

Qi Yunxing took the initiative to speak while tangled. “Mr. Ma, what are you doing?”

“I am currently serving as an assistant to Professor Lu! It mainly helps Professor Lu to deal with some theoretical refinement work!” She took the initiative to speak to me! Ma Yang was dizzy now, as if walking in cotton, deep and shallow, the whole person floated.

“Are you younger than thirty? Can you be Professor Lu’s assistant at such a young age? It’s amazing!” Qi Yunxing said in worship.

She praised me! Ma Yang’s blood pressure was higher at this time, and there was a itch in his nostrils, and he seemed to be excited to have nosebleeds; he quickly took a breath, “This is nothing! Compared with Professor Lu, we are still far away. “Hey, I’m afraid I can’t reach the level of Professor Lu in my life? But can he help him participate in such a great project, he is destined to be in the history book?

One thought so far. Ma Yang regained a little confidence and chatted with Qi Yunxing about their research. Researcher Chang is certainly happy with this, and he takes a step back slightly to leave room for the conversation to the young people.

Suddenly heard a noise coming from behind. When they looked back, Qin Feng was leading his wife to Lu Qiu Jian and Xia Xiao. “Xiao Lu, aren’t we coming late?”

Teacher Yuan stepped forward and supported Xia Xiao's shoulders, looking around, "Oh, hey, the bride is so beautiful today! Xiao Lu, you must not bully Xiao Xia in the future, otherwise I may find you in trouble!"

Come, these two people look at Xia Xiao more than they look at me! The arrival of these two people set off a boom at the scene, and the reporters who filmed on the side couldn't help but whispered quietly Secretary Qin really valued Professor Lu! The wedding is held tomorrow, I thought he would arrive tomorrow! I didn't expect to come today, and bring my wife! No one seemed to be worth it in the past! "

"I'm afraid that in the future, the British prince will not be so beautiful today! Although the British prince's wedding scene will always have guests from the political world, and may also have celebrities in the economic and entertainment circles, there will certainly not be so many Nobel Prizes Fields Medal winner! From the perspective of Professor Lu 's wedding guests and their status, it 's probably not too much to say that this wedding is the first wedding in history? "

"That's it!" Someone immediately agreed! "There are so many great people who can be invited, more than those luxury wedding scenes that only know how to burn money! What about luxury yachts and private jets? Bill Gates completely suppressed the appearance! The star show is comparable to the card. Mellon was in person? Celebrity painting and calligraphy are comparable to these academic masters? Not to mention that Secretary Qin and his wife are going to give them both! "Compared with his wedding, Beckham and Victoria's wedding was completely different. The grade is up!

Some clumsy people have already started to send photos of the scene to the scarf with their mobile phones! Today this wedding is destined to become the focus of the entire network.

Chapter 593 - Bib brush screen

The old wave bib also sent special staff to stay outside the gate of the nursing home, and transmitted the situation on the spot to the bib platform in real time; in order to obtain this opportunity, they did not pay a small price, only relying on the fees they paid, Lu Qiujian could The wedding was done without spending a penny; but the old wave company felt that the money was simply worth it!

After the first picture was uploaded, the traffic of Jiulang Weibo skyrocketed. For a while, the webpage was stuck, and Jiulang Company quickly started a temporary server to make the website function normally.

"Woo, see the male god's wedding feeling very tangled! Both want to bless them and feel unwilling!" Every photo has been uploaded, you will receive countless reposts and comments.

When the guests visited here, the reposting reached a peak; both the white-collar workers in the office building and the students in the classroom were secretly using computers and mobile phone clients to quickly refresh the web page and share comments. The latest news.

“Finally, some guests came to the door! Who are these young people? Begging their identity!” Ye Chu and others asked when they appeared.

“This sister is a bit familiar! It seems to be Xie Limei of the national track and field team! I lean, the man next to him is holding her arm! Is Xie sister also in love? Ooooooooo, it’s so shocked!”

“Have you not watched the Olympic Games? Xie Meizi is next to the National Men’s Basketball and Olympic Men’s Football Assistant Coach Ye Chu! It is said that he is a student of Professor Lu! The other two beside him should have been in Lu like him. Do you study under the professor? “

“Xiang Zhen, the gold medal winner of the International Olympic Mathematics Competition that year! Wang Wen, who participated in the same year as him, also won the championship! They are all students of the Department of Mathematics of Beijing Normal University!” ‘S identity was soon out of eight!

“Hey, who is this uncle? Why are you still bringing the children to the wedding. Are you going to rub the rice?” When President Wang appeared, he caused another gossip.

However, someone quickly turned over the photos of Lu Qiu Jian at the Nobel dinner, “I saw Mu You, this is the teacher of Professor Lu in high school!”

Deputy Mayor Xu is a public figure. It didn’t take long for people to be recognized, and even Xu Tianyi brushed his face! He attracted envy of his friendly friends.

When Tao Zhexuan played, he caused the first wave of climax. “Wow, this guy is so handsome! There are girlfriends for the gods and handsome guys! God is so unfair!”

“That was Tao Zhexuan, who won the Fields Medal with Professor Lu, and a mathematical genius with an IQ of more than 200!” Tao Zhexuan’s details were dug out and made many people feel sad, just look handsome. So much easier to use than us!

“Beckenbauer is here too! He must miss Professor Lu’s time at the Allianz Arena now? Hey, there will be a home game for Bayern tonight, will they make a special response?” Some people speculated.

By night, his guess had hit! A large wedding photo of Lu Qiujiang and Xia Xiao is playing on the big screen of the Allianz Stadium. Admitted fans held up banners of various blessings, turning the entire stadium into a sea of celebration. After Schweinsteiger received Ram’s pass and broke the goal, the two immediately rushed to the sidelines to lift the jersey, revealing the blessings to Lu Qiujiang and Xia Xiao on the underwear first, this behavior should have eaten one The card was yellow, but when the referee saw what they had written, they smiled and let them go, even the head coach of the other party did not protest.

His guess also aroused the interest of many bib users. They quickly went to the website of the unit where Lu Qiujiang studied and worked before to find relevant information. On Princeton’s official website and bib account, President Shirley Tillman personally blessed the Princeton University’s contact alumni on behalf of the school; the same is true of Peking University and Munich University.

The training ground of the Princeton Tigers. The new players used the basketballs to put out the initials l and x of the names of Lv Qiujiang and Xia Xiao, linked by a heart-shaped symbol in the middle.

Cern’s congratulations were particularly striking, they showed a large graffiti on the collider. The content of the graffiti is a scene of Lu Qiujiang and Xia Xiao exchanging rings. Surrounding them are the alienation symbols representing dark matter and the Higgs boson; those colleagues who worked together with Lu Qiujiang once collided Machine as a carrier, using his artistic talents to divide Lu Qiujiang to send a special gift!

Even the National Academy of Sciences of America, the Nobel Prize Committee and other institutions are not alone. They have issued blessings to Lu Qiujiang on their official media platforms. Apart from paying tribute to Lu Qiujiang, there may also be a rare encounter with the wedding of a Nobel Prize winner! The previous Nobel Prize winners have either been married for many years, or have no time to concentrate on scientific research! Not many people like Lu Qiujiang got married after winning the prize.

In addition, the opponents who played against Lu Qiujiang in the game also sent him blessings on their Twitter! C Luo posted a photo of him holding a high-numbered book in his face, “Professor Lu. May God bless you and the beautiful lady Xia! By the way, can you tell me what your free kick formula is? What’s the matter? I haven’t figured it out after studying it for several years! “

Messi posted a photo of the London Olympics Professor Lu's happy wedding! ps, you should concentrate on research. Don't take part in the next Olympics! I really do n't want to hear that the future is yours! “

James said, “Lv, sign a short-term contract with the Cavaliers in the playoffs next year! Let's play brother basketball!” Bryant quietly commented below: despise you guy with a thigh! Lu, Los Angeles is the city that really suits you!

Hahahaha, when these two people's remarks were forwarded to the old wave bib by screenshots, all the netizens who saw these two messages laughed! What are you two doing?

The old wave bib has been lively for a whole day, and the old wave company successively allocated several batches of temporary servers so as not to cause the website to go down! It wasn't until the exhausted staff at night that they dragged their tired bodies off to work. In order to maintain the normal operation of the website, they are almost exhausted when they are tired!

Hey, it was such a craze just today when the guests visited, what kind of scene should it be when the formal wedding is tomorrow! The working man in the old wave bib fell into painful and happy troubles.

Chapter 594 - Snooker

“It's finally nobody!” Lu Qiujian said to Xia Xiao, “It's almost time to come. I'll take you to the room to rest! You're tired after standing all day!” “

“It's really bad for my feet! I didn't expect marriage to be so tired!” He said this kind of mouth, but his face was full of smiles, exuding a sense of happiness. “You don't need to rest for a while?”

“I've been a professional athlete! What is this hard work? I'll go talk to them again! Several professors in Princeton have had some very good articles recently, which are very inspiring to me!” There are also many things that other people can discuss and discuss.

“Okay, I'll lie down for an hour first, and then come down! I haven't seen Teacher Yuan for a long time, and I want to talk to her too!” The relationship between the two of them was pretty good.

Xia Xiao was sent to the room prepared for the two of them, and she whispered with her until she fell asleep. Lu Qiujian left the room lightly and came to the place where everyone gathered.

The facilities of this sanatorium are still very complete. The swimming pool, gym, chess room, bowling, billiards, video games and other entertainment facilities are all available. For this wedding, Wang Yang did not arrange a professional accompanying person; he likes to play chess. There are active national players here; like fitness, there are professional fitness coaches here; like drinking tea, there are not only tea ceremony masters, but also a variety of special treasures and famous tea ... plus these people are usually busy, now I can relax, and the organizers are so attentive, everyone is having fun.

Professor Wyeth sits on the side of the chessboard, and is curious to learn the game of Go with Gu Li. Professor Thurston, Professor Peraps, and Viscount Deligne serve as his think tank. In terms of language, everyone is arguing fiercely about where is the best choice.

Bill Gates was pleasantly surprised to find their Microsoft x-box here. This made him feel very respectful, and had to pull Steve Jobs to play games with him, but Steve Jobs had no interest at all. Finally, it was Beckenbauer who saw live football in the game console and sat down to play against him! Of course he chose the Bayern Munich club, and these two crappy gamers had a hard fight. In the end, Bill Gates had the upper hand. He chose Real Madrid to beat Bayern by one goal. Beckenbauer, who refused to accept the defeat, immediately demanded another fight.

Bill Gates moaned and pondered, "Football seems to be fun! Do I want to buy a football team to play? It seems that Paul is very happy playing the nba team?" He remembered his own Paul Allen, entrepreneurial partner and owner of the Trail Blazers.

Is it a mistake for me to sit down and play games with him this time? The cold sweat on Beckenbauer's forehead suddenly appeared. Abramovich was enough to toss the Premier League players. If the world's richest man entered the football world, when will Bayern win the European Championship again?

Having greeted these people, Lu Qiujian continued on. Soon the crowd in front of and outside the snooker table attracted his attention; hey, what are these young people doing? I saw Ma Yang holding the cue and looked at the situation on the table with his eyebrows closed. Xu Tianyi on the side looked at Qi Yunxing beside Ma Yang proudly.

It seems that it was a situation just for the sake of jealousy! Lu Qiujian walked over curiously for a while; there were various entertainment facilities in the base, the horse sample room also liked playing snooker, and the level was quite good; but Xu Tianyi played significantly more time than him. In addition, he is very easy to find professional masters in Changan City to teach and teach skills, so Ma Yang's form is very bad.

This shot Xu Tianyi made a snooker again and again, the white ball was gently attached to the edge of the library, and there was a yellow ball in front of it. It's not easy to hit the red ball at the far end; Ma Yang observed around the table for a long time before he hesitantly leaned down to prepare for the urgency.

"The angle is not enough, go three degrees to the left again!" Lu Qiujian couldn't help but come out to help his cronies! "Yes. That's it, the strength can be slightly greater!" After observing this period of time, he already knew the elasticity and friction coefficient of this table.

Sure enough, after Ma Yang's batting this time, the white main ball flicked two banks and gently rubbed the red ball at the far end. The red ball rolled slowly and fell into the bag in Xu Tianyi's unwilling gaze. This shot not only solved snooker, but also successfully obtained the initiative; then in the reminder of Lu Qiujian from time to time, Ma Yang became more and more courageous. Quickly defeated and won the game.

Xu Tianyi dared not say anything. But the coach Snooker who was in charge of the guidance next to it was a little bit itchy. As a professional player, he naturally understood what the vision shown by Lu Qiujian just now represented. He summoned up the courage and invited, "Professor Lu, it looks like you are playing well too! Should we both play a game?"

"Yes! Professor Lu! Show us a hand!" A group of young people next to them collectively coaxed, how can such a good show be missed?

"I haven't hit it before!" Lu Qiujian sucked his mouth.

"Isn't it called yet? Then I can die directly!" Ma Yang put the club directly into Lu Qiujian's hands, and then ran the net worth to swing the ball. "Professor Lu, you're on!"

Lu Qiujian stood at the table with his club, and after some deliberation, the professional player took the lead to kick the ball. The white main ball gently knocked on the edge of the red ball pile, and then returned to the top, hiding in the colored ball Behind.

"Should I play? Is it a red ball and a colored ball, right?" Lu Qiujian was ready to hit the ball.

"Yes, the black ball has the highest score! If you hit the black ball every time you hit a ball and finally clear the stage, the highest score is 147 points!" Ma Yang looked at Lu Qiujian when he saw Lu Qiujian When holding the pole, he couldn't help but open his mouth wide, "Professor Lu! You ... are you going to play like this?"

Everyone is absolutely amazing I saw Lu Qiuqian holding his right hand at the bottom of the club with one hand, just like playing a big gun, aiming the club head at the white ball and going to hit the ball!

“Why? Snooker still has requirements for the posture of the grip?” I just think it’s so easy! I bowed and greeted all day today, and I really don’t want to go down and play again!

“This really isn’t there!” The professional player classmates held back for a long time before holding out a word! He has never seen anyone play like this in his long billiard career! But seeing that he had no trembling head, he took another breath, and Professor Lu’s wrist strength was really terrible!

Standing on the edge of the table from a distance, the head stretched back and forth twice and then shot suddenly, the white ball rushed towards the red ball pile like a shell!

Chapter 595 - 147 fastest in history

Poof, Xu Tianyi couldn’t help laughing when he saw Lu Qiu build a shot! Snooker pays attention to fine positioning, and in game terms, micromanipulation is the key! This is not the black eight on the broken ball table on the street, but it also brings miracles! It turns out that Professor Lu is just a theoretical expert, and actually playing football is not popular!

The professional players and students on the side also shook their heads slightly. Hey, just now he heard Ma Yang’s instructions so precise and in place. I thought this is a master! The result is the first shot! It seems that I won this game, but I have to give others a face, and it will be too ugly to let him lose a few shots later! He often plays well with the big boss. He thinks of him while getting up and preparing to take a shot for Lu Qiuqian.

Huh? He walked two steps and stopped. He saw that although the white cue ball walked on the table like a bullet, the moving route did not hit any colored balls. After eating a few libraries in a row, it was an incredible The angle hit the red ball that he peeled off when he kicked off, and the red ball slowly rolled into the pocket of the bottom corner!

This is a perfect attack! But even Rocket O’Sullivan will not attack in this form! Eating Wuku’s offensive red ball, whoever just kicks the ball will play like this! This must be blindfolded, right?

“Oh, good luck!” Lu Qiuqian walked to the left side of the table, still using the awkward one-handed way of holding the stick, and continued to slam the black ball!

Hello, the two **** are so close together, and the angle of the bottom bag is so good! You still need to use so much energy, what kind of trouble is this! However, the next scene left them stunned again. After the white ball hit the black ball into the bag again, it slammed into the pile of red balls. The red ball blasted out, and the one in the lower left corner just rolled to Bag mouth.

Perfect blowball! Ominous premonitions swell in the hearts of professional players. Will I still have the chance to play again in this round? With such a loose ball shape, I can clear the platform smoothly even if I go up. If the two shots were not covered just now, I am afraid I will kneel!

“9 points ... 16 points ... 17 points ...” Ma Yang said loudly while flipping the score on the scoreboard. This is more powerful than watching the live broadcast of the court! Even fancy billiards players may not be able to play Professor Lu’s skills!

“122 points! 125 points! 129 points! 134 points! 140 points! 147 points!” In Ma Yang’s excited report, the red ball mixed with the black ball kept dropping, and 15 red **** were played. Another six colored balls, everyone around the table witnessed a magical 147 points!

“Four minutes and twenty-seven seconds!” Ma Yang slammed the stopwatch on his phone and asked aloud, “What is the fastest record of one hundred and forty-seven minutes?”

“In the 1997 Snooker World Championships. Rocket O’Sullivan completed a single shot of 147 points in five minutes and twenty seconds. This record has not been broken so far!” The professional player murmured with wide eyes. Ooo, I was scored 147 points by an amateur player who cleared the table with one stroke.

Hey, but it seems nothing! Since people can win Kobe and James by playing basketball. Playing football can win Messi and Ronaldinho. It seems normal that I won by playing snooker! If I send the news of this game to the bib, maybe I will be able to be red! He quickly adjusted his mind and shook his head regretfully, saying, “Professor Lu, you have set a new world record, but unfortunately this is not an official competition and cannot be recorded! It is a pity!”

“It’s nothing, I’m just playing!” This kind of undisturbed movement that is closely related to mathematics and physics is too easy for him! Lu Qiujian returned the club to Ma Yang, “Okay. Let me go over there! You guys keep playing!”

“It’s crazy!” The professional player kneeled directly! What would O’Sullivan count if he were to give me his skills? What did Hendry count? Unify snooker, all champions are just around the corner! Thinking of it here, he secretly rejoiced. Fortunately, this profession is a scientist, and it is unlikely to participate in the snooker game. Or where else can we live?

“Haha! I got it! I got a video of this game!” Ye Chu waved his cell phone excitedly next to him. He opened the video and put the cell phone in front of everyone. Lu Qiujian’s magical shot again weighed again Now in front of everyone.

“Really ... it’s incredible!” Everyone stared at the strange but unprecedented shot with a stunned look. When the video ended, seven or eight hands grabbed the phone at the same time!

“Turn on Bluetooth. Pass me a copy!”

“And me and me! I want to post it online!”

“Oh, you stepped on my foot!”

“Don’t rob, don’t rob! One by one, I’ll pass it on to you!” Ye Chu immediately hid his phone in his arms. Don’t break my phone, there are photos of me and Mei Mei!

Everyone gathered around Ye Chu, took out their mobile phones, and other devices, and copied the videos to their devices one by one, and then couldn’t wait to open the Tudou, Youku, and other websites to start uploading.

Once the upload review was completed, they immediately forwarded the video to their various social accounts. Which professional player not only uploaded it on the old wave Weibo, but also sent it to their Twitter account, the topic is “The master is in the private sector.” , I was awarded the fastest score in history by Professor Lu Qiujian! “

Lu Qiujian has been the hottest vocabulary on the bib these two days! At the sight of this title, countless people immediately clicked in, and ... knelt through the entire video!

“Mom just asked me why I was kneeling in front of the computer. I said I was watching Professor Lu’s snooker game!”

“Nothing, my knee is broken!”

“The floor is broken!”

“Today there is another idiom in the Chinese dictionary Guan Gong plays a big knife in front of him, and Professor Lu hits snooker in front of him!”

“Don’t be sad, don’t blame you for your bad skills, just blame you for the evil spirits!”

Looking at the rapidly growing number of fans, professional players now only have a smirk! He happily switched the page to Twitter. There are far fewer people forwarding comments here, but all of them are top figures in the snooker world.

“-! Ding, are you sure this is not a special effects movie? How can this grip method be played so accurately?” Hengdeli commented.

“Gosh, I must be the hallucination caused by lack of sleep. I’m going to sleep for a while!” Rocket O’Sullivan made a dizzy expression.

“Did he sign up for that competition? Please tell me, I think I can voluntarily give up saving a ticket!” Mark Williams, now ranked No. 1 in the world, also feels powerless!

Chapter 596 - High IQ Groomsmen

“Terence, you are so handsome today!” Tao Zhexuan’s girlfriend Laura watched his eyes full of tenderness and implied a hint of envy, wondering what his future wedding would be like?

“Laura, we will get married when we return to the United States!” Affected by today’s atmosphere, Tao Zhexuan can’t wait to get married! However, it seems that his wedding may not have such a scenery today!

“Mei Mei, do you think when we both took care of the matter?” When the other pair came to the opposite, it was Ye Chu’s turn to beg Xie Limei.

“Wait for me to win the championship next year’s Olympics!” Xie Limei seems determined to have two Olympic gold medals in hand, and she has no regrets about her career!

“Okay! Then I’ll start preparing when I look back? Do you like Chinese or Western style weddings? Would you like to take wedding photos there? We will travel to the Maldives or Tahiti for our honeymoon ...” Uh, I can’t seem to go abroad! Ye Chuhan quickly changed his mind, “But I think

these two places are too vulgar, let's go to the Nalati prairie! I will take you to ride a horse in the sea of flowers, watching the stars back to back at night “

“I'm saying you guys are good! Always show love in front of the two bachelors of Dietrich and me!” The next Ma Yang was stimulated. He tied his tie and hooked Dietrich's shoulder. “It's almost time Now, let's go out! “

“Let's go!” Lv Qiujian also completed the final preparations with the help of a makeup artist. He walked out of the dressing room with a huge group of groomsmen, and just walked into the auditorium. The flashing light flashed everyone's eyes!

The media that struggled to get the right to broadcast all sent photos of the best man to their respective online platforms, which were then quickly forwarded to the bib.

“Are you finally going to start! The goddess is so handsome today!” Fans who have been waiting for a long time have started crazy reposting.

“Ahhhh! I want to grab a marriage. Is it still too late to start? Is there someone to form a group?” Someone started to get mad.

“Take me one! You get the security guard's attention, I'll go in and drag the goddess away!”

“Cough, I remind you, Qin Feng is the one who presided over the wedding today! So what kind of security standards does the wedding look like today? Everyone can imagine! Do you want me to cancel my bib account now to ensure safety?”

“It's not reconciling! Male god. I don't care about the name, you just let me give you a monkey!”

“Why, who told me who are the four guys in the best man? How can there be crooked nuts? But is this guy handsome?”

“If I remember correctly. That crooked nut is Professor Luit's classmate Dietrich at the University of Munich! He first discovered the first set of data for the Higgs boson! I was on the official website of cern. I have seen his photos! “Insiders soon came out of Dietrich's background.” He and Prof. Lu are both students of Prof. Xuft. Now he has graduated, as if at the Mark-Planck Institute Continue to work on the research of high-energy physics! “

“Mark-Planck Institute? Is that the most handsome physicist Planck ever?” Someone posted a picture of Planck’s handsome and handsome when he was young, why did he have to be young? Everyone can search for photos of Planck’s old age, and then you can see how the handsome guy was carved into the miraculous by the carving knife of the years!

“I don’t think Professor Lu is worse than Planck! Don’t distort the floor! Let’s talk about who the other groomsmen are!” Someone put the topic back on track.

“Everyone knows Ye Chu? I used to be the assistant coach of the Olympic team and the men’s basketball team, and the appearance rate is quite high! I won the doctorate of the Department of Mathematics of Beijing Normal University before the age of 25, and now follow The professor works in Xihe Project! “

“The man next to him is Ma Yang, a Ph.D. at the Massachusetts Institute of Technology, and he has also gained great popularity in the International Olympic Physics Competition when he was young. He is a genius-like theoretical physicist!” Ma Yang, who rarely appeared in front of the public, was also released. “It is said that his IQ is as high as 186!”

“Kneel! Ask him if he has the IQ that is second only to Professor Lv in the wedding?” Hearing this number, everyone immediately admired.

“Oh, I’m afraid it’s far from being right? You also saw it yesterday. There are many high-intelligence merchants present! Bill Gates has an IQ of up to 160. Although they can’t keep up with Mayang, they are all our only The existence that I can look forward to! In addition, Lord Virgin de Ligne is the winner of the Fields Prize and the Wolf Prize, like Professor Lu, and he has made outstanding contributions in the work of Hodge Theory and Wey’s Conjecture. Each item needs a very high IQ. Although there is no specific data, I think he is probably smarter than Ma Yang!

“There is a powerful rebuttal.

“I saw Perelman’s figure yesterday! It is said that the IQ of this Lucia mathematician turned out to be 220! The genius of the cliff!” Someone added.

“Don’t talk about all the guests present! Even in the best man group, he is not the one with the highest IQ! Don’t forget. There is another Tao Zhexuan in the best man group!”

“Well, what is the IQ of this Tao Zhexuan?”

“230! This IQ is higher than Perelman!” The answer was revealed, which made everyone feel a sense of powerlessness. Is this a wedding or an alien party in “Black Man”?

The average IQ value for humans is which is within the normal range. 110-120 is above average, 120-130 is excellent. More than 130 is excellent; ordinary talents beyond 130 are rare to see, and monsters with IQs 186 and 230 appear one after another in the best man group!

“Although there is no specific data, but can win the gold medal of the International Olympic Mathematics Competition, can enter the Mark-Planck Institute to work. He is engaged in theoretical physics research with high IQ requirements! Presumably Ye Chu and Dietrich Will the IQ be less than 160? “

“ $160 + 160 + 186 + 230/4 = 184$! The average IQ of Professor Lu’s best man reached 184! This is just a guess at the bottom of the floor! I bet that in the history of mankind, I can never find an average IQ higher than this best man It’s even higher! “Someone quickly calculated the average IQ of this best man group with no friends! There is no doubt that this will be the world record of intention again!

“The most amazing thing is to let so many high IQ geniuses serve as best man, and do n’t worry about being robbed by them! We, Professor Lu, really exist! Who can tell me what the IQ data of Professor Lu is? How much? Will it make us feel collapsed? “

Chapter 597 - Stunning performance lineup

The huge groomsmen group was in place, and the bridesmaid group over Xia Xiao was served by Tao Zhexuan’s girlfriend Laura, Ye Chu’s girlfriend Xie Limei and Xia Xiao’s own girlfriends.

Before the official start of the wedding ceremony, some of the guests present strongly urged to perform on stage. Of course, this festive and lively event will certainly not be refused. The man with the instrument took the stage.

“Wait, am I right? The guitarist of the wedding band looks like Brian May of Queens! Ahhh! Bassist John Deacon is here too! The drummer seems to be Pink Buddha. Nick Mason of Lloyd! “A veteran rock fan found the highlights in the new photos.” These three are all superstars from the top ten rock bands of the 20th century! How did Professor Lu bring them in? what!”

“Since you know Brian May, then you must know that he is also a Ph.D. in astronomy at Imperial College! Are people from the same academic circle, it’s weird that the two have an intersection? Don’t forget that he had collaborated with Professor Lu on the record. Yes! Nick Mason also played the role of drummer on that album! And it is said that the bass used by Professor Lu was loaned to

him by John Deaken, and the level of bass of Professor Lu is really good! Engaged in academics to play the team will also become a superstar? “Someone immediately dug out their relationship.

“Everyone guess what they will perform? Which classic” We Are the Champions “, or” Bohemian Rhapsody “, or” we-will-rock-you “?” Someone asked excitedly. “Will the live performance video be uploaded later?”

“How do these three songs look like they are not suitable for a live performance at a wedding! I think it should be” you’re-my-best-d “? This classic confession written by John Deakin to his beloved wife It ’s perfect to use the track here! “Someone said firmly.

The video was sent up in the midst of many calls. Netizens could n’t wait to open it. I saw Brian May holding the guitar, John Dickon playing bass, and Nick Masson playing drums in a rhythmic sense.鏢.

what. How is the position in front of the microphone empty? Where did the lead singer go? Could it be ... There was a sudden burst of applause in the video, and in the applause, Lu Qiuqian in full costume stepped onto the stage. Standing behind the microphone, the familiar melody sounded. Lv Qiuqian sang the classic confession of John Deacon for his beloved wife on the wedding stage.

“You put a golden ring on my fingertips, you bring me love that I have never felt before, ... when I am hungry you are my bread, you are my sheltered harbor in the storm You are my anchor in the ocean of life, but the most important thing is: you are my best friend. Whenever I need confidence and encouragement, whenever I am tired and weak, you always support me resolutely.

Even if you search the whole world, you are still the only one I need! ... “

The voice of Lv Qiuqian’s tender feelings sounded, and her soft eyes fell on the most beautiful man on the scene today. Under the accompaniment of three rock superstars, she used music to express her love for Xia Xiao.

In his singing, Xia Xiao remembered that he had met Lu Qiuqian for the first time on the street. He suddenly left and returned suddenly with a gift; the two of them were telling you no one by the side of the street. The unique skills of the comic master! Then he encouraged himself to contribute to the neon; the silent confession of Christmas ...

From the street side of the capital to Neuschwanstein in Germany, from the wild grasslands of Africa to the solemn lecture hall of the neon Tokyo University ... Lv Qiuqian spent countless

wonderful times with her, and today, I finally want Cheng Wei and his wife! In the singing, I recalled the past. Xia Xiao desperately suppressed his excitement, and did not let tears stain his makeup.

The guests off the stage were also immersed in the wonderful singing. Others might just think that Lu Qiujian sang well. But Teacher Yuan beside Qin Feng is different! Others are professional. Her hands on her knees beat with the singing voice, and at the same time sing along with Lu Qiujian softly.

At the end of the song, Qin Feng couldn't help but turned his head and whispered, "Why, this song is so good? I think you listen so fascinated?"

"Professor Lu really has a golden voice!" Teacher Yuan was half relieved and half regretful. "The rhythm of his breath is different from any existing singing genre, but he can turn the melody and present it perfectly. It is enough for him to go to the Central Conservatory of Music as a professor because of this new breathing method! "

"Ha. That's not enough!" Qin Feng suddenly understood why she had regrets in her tone. The central government said nothing would put Lu Qiujian as a teacher at the Conservatory of Music. This is too wasteful!

"Hey, I mean that!" Although I don't know the truth about Xi and the plan. But now that the central government attaches importance to Lu Qiujian, she knows that her ideas cannot be realized anyway. She said that she stood up, "After hearing such a good song, I want to sing too! I will go with them Discuss it! "

Teacher Yuan walked over to the stage and whispered to Lu Qiujian who had just come off the stage. Lu Qiujian nodded quickly! Not to mention her identity as Mrs. Qin Feng and her close relationship with Xia Xiao, from a musical point of view, she is also the most powerful singer of her generation in Hua Guo! With such an excellent songwriter to perform for his wedding, how could he refuse?

Seeing Teacher Yuan on stage, those foreign guests are even better! All domestic guests are stunned! Since Qin Feng became an elder, this man has made a lot of sacrifices for his career The concerts have been less open! Today, he took the initiative to take the stage for Lu Qiujian's wedding! Qin Feng also attaches great importance to this young man! They raised their opinion of Lu Qiujian already high in their hearts.

“Fuyun scattered, the bright moon shines; the reunion is happy, drunk now ...” Of course, the wedding scene must choose a happy and happy track. Teacher Yuan took out the first song of the Republican singer, which was later sung by countless people. The classic song “Hua Hao Yue Yuan Yuan”, this song with good wishes for love can’t be better placed here.

“... Both pairs are right, kindness and love; this warm breeze blows towards the good flowers, tenderness and sweetness fills the world.” This song “Hua Hao Yue Yuan” was sung by her atmosphere, with delicate and gentle rounds, But she didn’t have the bitterness of her, which showed her excellent singing skills.

When the video of this tune was transmitted to the bib, the netizens who saw it were shocked!

Chapter 598 - After the wedding

“Wait, I am dazzling! This is the next mother-in-law! The mother-in-law sang for Prof. Lu’s wedding! This ... the whole country, no, not even the whole world will have that wedding. Is it worth today? “

“Just now Brian May’s appearance has been amazing! After all, the people who are in a higher position in the music scene are now a group of old people such as mj and Dylan. It is not easy to move them! I think there are more powerful characters behind! “

Everyone was sincerely amazed again by the specifications of this wedding. The wedding continued and the gossip on the scarf continued.

“Breaking news, it is said that Beckenbauer and Bill Gates lost the game yesterday. The gate classmates seem to want to buy a team to play!” This may be the guest’s vest.

“Lying trough, Abu has made the entire Premier League crazy. Bill Gates is added to European football. This is about to turn the sky! Can I imagine Messi and Ronaldo wearing the same team jersey game? Will Professor Lu’s wedding cause a revolution that will completely change the situation in European football? “

“Everyone, I helped Professor Lu and Ms. Xia think of a wedding oath and sent it out to everyone! It seems that the two of them are wearing Han suits today, and Professor Lu also said last time that he does not believe in Christianity, then is the wedding oath? Can it be changed to the traditional religious version of China? “

“What are you doing! What are you doing? Haha! Hurry! Don’t be a eunuch!”

“Okay, here I am, I changed the priest who presided over the wedding to a monk, and the wedding oath to a Buddhist version! Please have Dade hang the beads and walk to the two newcomers, draw a ***** on the chest, yes The bridegroom recites the mantra: Tanyue, you must respect the woman Tanyue next to you. Carrying the three treasures of grace, doing joyful and secret matters, no matter whether you are old, sick or dead. Ru Zen does not move as he always consecrates until he sits down. Can you hold on? A: The disciple can hold it! Ask the bride again, Li Cheng. What do you think of this? “

“Uh, I seem to have found something wrong? Xiangrui Yuxian, the house is safe, and pure hand copying is invalid!”

“I rely on it, don’t you come out to add chaos to the prince, the big happy event!”

With the enthusiasm of tens of millions of bib netizens, Lv Qiu Jian was modernized and revised in accordance with the ancient Chinese wedding etiquettes verified by the masters of Chinese Studies at the Chinese Academy of Social Sciences under the attention of global guests. Started his own wedding ceremony.

The atmosphere of the wedding is solemn and joyful, and the atmosphere is full of sincerity. Those foreign guests took out their digital devices and recorded this rare scene in their mobile phones and tablets!

This is especially the most exaggerated performance of Cameron. He directly brought his royal photographer Moro Fiori, and let the biggest favorite of this year’s Oscar Best Photography Award personally control the camera and recorded the event. A wedding where oriental classical style and modern style blend perfectly. After that, he also edited it into a short video and uploaded it to youtube. It was a wave of clicks! The enthusiastic response from the film critics also made the Oscar committee quite a headache. Should I make this short film shortlisted for the Oscar Best Documentary Award or the Best Short Film Award?

Cameron reposted the video on his Twitter account. At the same time, I made an advertisement for the upcoming “Three Body”, “You can see that Lu performed very well in the camera. I can’t wait to see his performance in” Three Body “! “

The wedding reached its climax when Qin Feng read the testimony, “Is this saying that in ancient times it was equivalent to the emperor giving marriage! I thought of a certain drama!”

“Tatar powder is thick! To be compared, I should take my style of the Tang Dynasty’s prosperity!”

“Go thick +10086! What a swollen festive thing ran out of such a disgusting thing!”

Fortunately, a new scene has drawn their attention from this matter. The wedding ceremony has been completed. Now it is Lu Qiujian’s and Xia Xiao’s turn to toast the guests who are present! The huge best man group finally came in handy, Tao Zhexuan, Ye Chu, Ma Yang and Dietrich shouldered the important task of wine replacement.

“Betting and betting, let’s guess who of these best man would get drunk first? I think it should be Tao Zhexuan. Looking at his gentle manner, shouldn’t he be able to drink a bar?”

“I think it should be Dietrich? Foreigners don’t have to drink Maotai! Said Professor Lu used Maotai as a special offer for the state banquet? I don’t know how it tastes? The saliva is flowing!”

However, the results disappointed them. Ma Yang, who rarely drinks, became the first best man to fall. Then there was Ye Chu, the two players who were optimistically insisted until the end.

Dietrich was still unexplained by the end of the toast. He came to Lu Qiujian and asked, “Lu. This wine is really good! Are there many boxes that can send me a few boxes to bring me back to Germany?”

Wang Yang, next to him, kneeled directly when he heard this! Lying trough, this is Maotai, the state banquet, limited every year! How much effort should I make to get these wines? There are just a few boxes as soon as you open your mouth. Do you want as much beer as you want at the roadside barbecue booth?

Until the night came, the wedding was finally over! The bride and groom were sent into the cave, and the guests dispersed themselves! Calm gradually returned to the bib.

The next day, Lu Qiujian and Xia Xiao began their honeymoon journey, of course, they cannot go abroad! But there are also many beautiful places in China that are worth visiting.

From the beautiful island of piano to the quiet ancient town of Zhenyuan sing along the grassy prairie, overlooking the snow in the hilltop restaurant of Changbai Mountain, and laze in the clear bottom of the Tuojiang River In front of the sun ... The comrades spent a sweet and leisurely half month.

However, both of them are unable to completely idle. Lv Qiujian 's experiment with a new type of controllable fusion device is to be hosted. Xia Xiao 's latest comics are to be updated, so two months later People will have to go back to Chang'an again and start busy work.

The train stopped at Chang'an Station, and Qin Feng called immediately after turning on the cell phone that had been closed for a long time. His tone was very serious. "Xiao Lu! Have you watched today's news! The Americans have released a big News! "

"I haven't had time to read it! On that website? I'll take a look!" After receiving Qin Feng's reply, Lu Qiujian hung up the phone and started logging in to the webpage.

Soon, he saw this so-called big news on the headline of this website! It turned out to be this! No wonder Qin Feng's tone will be so serious, so the pressure of the Chinese government will indeed be much greater!

Chapter 599 - Shale gas revolution

"Shale Gas Revolution! The gorgeous turn of the US energy structure! ", The website's most striking position is so impressively written that such a surprising headline, even the recently popular Lv Qiujian wedding news was overwhelmed by this article below.

What is shale gas? In professional terms, it is biogenic or thermal natural gas that is stored in organic-rich mud shale and its interlayers mainly in the form of adsorption and free; in the words that are more acceptable to everyone, it is that oil and gas are caused by The shale is generated and then transferred to sandstone, limestone and other reservoirs to be preserved. Those stored in the mezzanine are oil and natural gas that have been mined for more than 100 years and provide direct power for human industrial processes.

Now, after a long time of exploitation, those oil and gas that are located in the interlayer and are more convenient for mining have already been explored by humans! According to the reserves that have been explored so far, the blood circulation cannot be used for decades, and the proven oil reserves cannot meet human needs! So people began to wonder, since there is oil in the interlayers of shale, is there oil and natural gas in the shales that make up these interlayers?

This is like putting flour in a cloth pocket. After pouring the flour out and patting the noodle pocket, there will always be a lot of flour sticking to the cloth pocket. If you accumulate less, this is also a big gain.

For this reason, experts in related fields have explored shale oil and gas, and they are surprised to find that there are really a lot of oil and natural gas stored in the shale, which is sufficient for human use for many years in the future. Mined, then the energy crisis facing mankind can go backwards again! However, due to the dense structure of shale, it has become extremely difficult to extract shale oil and gas. With the current exploration of oil and natural gas to meet human needs, many countries lack increased investment in shale oil and gas exploration technology!

However, there will always be some people walking in front of others! Like most technological breakthroughs since the last century. This shale gas revolution is still erupting in the United States! In 1997, the hydraulic fracturing stimulation technology was completed; in 1999, the multiple fracturing stimulation technology was mature; in 2002, the horizontal well drilling technology was invented; in 2005, the horizontal well staged fracturing technology directly led to the explosion of shale gas production efficiency!

This series of technological advances has directly increased the shale gas production in the United States from 2.2 billion cubic meters in 1999 to 5.6 billion cubic meters in 2008. In just ten years, production has increased more than 25 times.

The consequence of the shale gas revolution is to make the rice people's dependence on traditional energy sources such as oil and coal greatly reduced, and the proportion of natural gas in the total energy consumption of the country has risen rapidly.

From the perspective of energy security, the Americans have richer energy reserves, and their dependence on overseas oil has been greatly weakened. They now only need to import oil from several core countries such as Canada, Saudi Arabia, and Mexico to meet the basic domestic needs. Demand! No longer need to get involved in the more sensitive oil country, the national energy security has been effectively guaranteed.

From the perspective of international politics, the Americans can be said to be free from the influence of OPEC. They no longer need to burn countless dollars on the deserts of the Middle East because of oil. They can use more relaxed methods to deal with the problems in the Middle East. In the future, the withdrawal of the US from Iraq and the planning of color revolutions in several Middle Eastern countries can be said to have been affected by the shale gas revolution. If not, they are unlikely to hope that the Middle East will become chaotic in the future.

But what is the relationship between these and the Chinese state? This is why Qin Feng asked Lu Qiujian to read this article! Hua Guo is a country where the demand for overseas oil is higher than that of Rice. Hua Guo has now become the largest buyer in the international crude oil market! As long as there are oil anywhere in the world, Chinese people can almost be seen. In order to ensure domestic energy security, China consumes a lot of money, and it seems to be very handicapped in

the handling of international affairs. From time to time, it has to be forced to accept certain Malicious extortion of the country!

In this article, I listed a few cases of China's loss in overseas oil procurement to illustrate how painful it is that energy is controlled by people! The article seems quite normal until here, reflecting the author's outstanding professional quality and a sincere patriotic heart.

However, the next article took a 180-degree turn. Start to question the technology development strategy of Hua Guo! Point the spear at Lu Qiujian! Compared with the illusory space exploration plan, it seems that this shale gas exploitation technology should be more invested by China.

According to the latest survey data, Huaguo has nearly 100 billion cubic meters of shale gas and more than 15 billion tons of shale oil reserves. If the funds of Xihe Project are used for the development of shale oil and gas technology, with the successful experience of the American people, it is presumed that it will not take long to master this advanced technology!

By that time, China's energy security can no longer be controlled by others, and relying solely on domestic reserves can meet demand! Although Xihe plan also plays a very important role in the long run, is the matter in front of you the most urgent? If China's energy security is not guaranteed, what if it can successfully land on the moon?

Finally, the author used a very sensational tone to call for Lu Qiujian to temporarily cut the funds for Xi and the plan, and handed over these funds to the shale oil and gas production technology research department. Just to say one thing, Professor Lu. Please slow down, wait for the people of China!

If it is a direct attack on Lu Qiujian's research. Many senior netizens have not responded to this article because of his repeated qualifications and plans for Nobel Prize winners in the past two years. However, taking the shale gas revolution of the United States as an entry point, the author of this article did not question the great significance of Lu Qiujian's professional skills and Xi and plan, he just used this article to create a point of view: space exploration is certainly important, But the immediate threat needs to be resolved as soon as possible!

Space exploration technology is too far away from ordinary people, and oil and natural gas are inseparable from almost everyone. When you think of mature shale oil and gas exploration technology, you can save a lot of money by refueling every month! So many netizens have joined in supporting this article.

No wonder Qin Feng will have a headache! In the face of such articles, it is really not a good rebuttal, we can't tell netizens that some of the plans are actually to study controlled nuclear fusion!

Chapter 600 - Steam engine and waterwheel

But the shale gas revolution of the Americans was not completed in an instant! It took more than ten years of accumulation from 1997 to the present to have the current output of 56 billion cubic meters; why the author of this article does not talk about it lately, rather than writing such a masterpiece at this time. What?

In addition to the last few lyrics, this article is a serious and boring professional discussion. How does this article that does not have much news and entertainment value appear in the most striking position of this website? Moreover, as soon as this article came out, it attracted the attention of many bibs. It quickly spread throughout the entire bib. Even Lu Qiujiang's bib account also appeared a group of people who said that they were full of blood and those who were bad. Idle users have left messages to ask him to postpone the progress of China's space exploration program. Some people are persuasive, but some people have begun to speak out, saying directly that Lu Qiujiang is occupying so much money for his reputation and wasting it. Chinese people's hard-earned money.

If Lu Qiujiang, who has seen many internet events in later generations, can't guess what's wrong with it, then he might as well just go and buy a piece of tofu and kill him!

Closing his eyes and leaning on a chair, he filtered the information he had collected in his mind. Lv Qiujiang picked up the phone and dialed Qin Feng's number. "Secretary Qin, I have seen this."

"Well, what's the idea? We have been following the shale gas revolution in the United States for a long time. What do you think about this technology?" Qin Feng asked slowly.

"Secretary Qin, shale gas mining technology and controlled nuclear fusion are not at the same level! Although the application technology of shale gas mining is now very mature! Controlled nuclear fusion still has a long way to go! But, The prospects of these two technologies are completely different! "Lu Qiujiang replied confidently, " This is like the situation when the steam engine was just invented. The steam engine was first used to pump water, and the water truck is in a certain way. The field and the purpose of the steam engine also overlap! At that time, some people may choose the waterwheel and give up the steam engine from the aspects of reliability and so on! But we all know that the steam engine will eventually unify the world! "

"Controlled nuclear fusion and shale gas are technologies of two eras. Shale gas mining still does not deviate from the scope of traditional energy. It is still the use of solar energy stored in the geological period! It is energy from solar radiation." In the final analysis, natural gas also Good, or oil. They all use solar radiation energy accumulated over hundreds of millions of years. "This

category of energy utilization has no essential difference from the chopping firewood and cooking in rural areas. It is only the primary use of energy! The controlled nuclear fusion is different. This is It is based on the deeper human knowledge of the material world! From a long-term perspective, controlled nuclear fusion will surely replace traditional energy sources such as oil, coal, and natural gas like steam engines instead of waterwheels! If this process requires hundreds of years of transformation Time, we may still hesitate, but now for more than ten years, controlled nuclear fusion can be successfully achieved! I really do n't see any good tangles! “

“The central government's support for the Xihe plan has never been shaken!” Qin Feng quickly repeated his support for Lu Qiujian. He did not give up the Xihe plan for reasons of publicity or personally. He was controllable in the sense of publicity Nuclear fusion is indeed a hope that will enable China to achieve a great revival. Speaking privately, Xi and the plan were initiated by him. Even if the other elders had to give up Xi and the plan, he had to stick to it.

“Now the trouble is how to explain to the public! You have also seen that the response of this article is not weak. If we don't do any reaction, we will fall into passiveness, but we cannot disclose the true purpose of Xi and the plan! Some headaches! “Qin Feng sighed.

“Secretary Qin, IMHO, I am afraid that this article is not so simple!” Lv Qiujian directly expressed his conjecture. “First, this article has detailed data and a rigorous argumentation process. This is not what ordinary people can do. Yes, I guess this author should be the authority in this field! Secondly, such an article will appear in such an important position. And after it was published, it quickly aroused widespread public attention. If there is no one in it Promote it, I do n't believe it! “

“Huh?” Qin Feng felt awkward in his heart. He did not lack experience in political struggles, but was sensitive to the lack of young people like Lu Qiujian on the Internet! As a reminder, he guessed that the hidden forces after the incident were inseparable. “So we still have to investigate from those people whose interests will be lost after the realization of controlled nuclear fusion?”

“These are not things I can care about! I'm only responsible for producing results within the agreed time!” Lv Qiujian didn't want to blend in these things, “but I believe that as long as someone does it, I'm sure Will leave clues! “

“I understand!” Qin Feng's tone became somber. Is it possible to ignore the overall interests of the country for the benefit of some small hills? Such reminder by Lu Qiujian. He immediately understood that this article is for controlled nuclear fusion! These people want to use this method to reduce Lu Qiujian's research funding. This will affect the research progress of Xi and the plan, so that they can eat the benefits of a few more years. Of course, if Xi and the plan are affected by this without disease, it will be better!

Take a few deep breaths After the mood calms down, Qin Feng reassures, “Xiao Lv, you don’t need to worry, you have to believe the central superstar! Xihe plan will not be affected in any way, you continue to do research with confidence! Leave it to me! I will report to the elders immediately! Be sure to get the black hand behind the scenes! “

In fact, Lu Qiujian had already expected these things. At the beginning of the Xihe plan, some signs appeared, and then quiet for a while. Presumably they were not optimistic about the progress of Xihe plan! I just didn’t expect Lu Qiujian to produce results one after another. Seeing that controlled nuclear fusion is no longer an unreachable product, they were finally anxious! Only then did he resort to such a means, this time it was just the first wave of offensive, and there must have been many ambush behind him.

Even for those attacks, Lu Qiujian guessed that there is no difference. Professional things are left to professional people to do, and Qin Feng does the political struggle! It’s justified to bring out the controlled nuclear fusion as soon as possible!

Without saying a few words, Qin Feng hurriedly hung up the phone. This news really made him unhappy! Qin Feng turned around in the office a few times, and suddenly slapped on the table with a slap, “This group of beetles!”
