

D. School 631

Chapter 631 - Elder's call

“To tell the truth, every time the teacher said that he was talking with Professor Lu in Princeton, I always thought he was bragging! I didn’t expect it to be true!” In the office building of the mathematics department of a certain college in Modu, two students from time to time Looking towards the office inside the corridor, one of them said enviously. [www.520xs.la so many beautiful novels]

“For the time being, when Professor Hu went to Princeton as an exchange scholar, Professor Lu just happened to be an exchange student there. The size of Princeton is not large, there are fewer Chinese, and it is not surprising that the two have a certain intersection!” Another student replied Tao said, “I just didn’t expect it to be so many years. Professor Lu remembers Professor Hu!”

“Yes, the gap between Professor Hu and Professor Lu’s status in academia is probably greater than the age difference between the two of them?” The person who said at the beginning echoed, “And I saw when Professor Lu came in just now The attitude was extremely kind, and he paid Professor Hu the initiative! There is no such arrogance in our imagination! “

“In his current status, it doesn’t matter if he is arrogant or not!” He sighed aloud. Hey, also at the age of 278, he can only follow Professor Hu’s studies, but everyone has already looked up. The existence of, the gap between this person and the person is really big!

“Hush, don’t talk, Professor Lu came out!” Hearing the footsteps, he quickly stopped the words of his classmates, and at the same time guessed in his heart, maybe Professor Lu came to say hello this time?

“Go away! The local dishes in our school hotel are still very authentic! This time I must have two drinks with Professor Lu!” However, the result was beyond his expectations, and Professor Hu was so full of light that he brought Lu Qiu Jian walked out of the office and whispered when passing by the two of them, “Go to the principal’s office and say that I have left Professor Lu to eat! Please ask him to come to the school hotel as soon as possible!”

“Come on, I guess Professor Hu’s retirement application will be rejected again!” Today’s students are no longer the greenhouse flowers in the ivory tower. [www.520xs.la Chaoduo nice novel] They are very clear that with the help of Professor Hu and Lu Qiujian, the school will definitely not let him retire early!

“This is a good thing for us!” The more valued the teacher is, the more resources will be obtained from the school, which is naturally good for these students.

“I’ll call now!” He touched his phone from his pocket and started dialing, if we could say a few words with Professor Lu in a moment! The teacher is eating inside, and he must greet him outside. Maybe Professor Lu asked about the teacher’s current situation, he would let himself go in and chat with Professor Lu! What should I discuss with Professor Lu at that time? Is it partial differential or topology?

However, his hopes were destined to be shattered. Lu Qiuqian and Hu and his party were stopped as soon as they walked downstairs; a middle-aged man of ordinary appearance walked to Lu Qiuqian. !

“Are you?” Lu Qiuqian glanced at Bai Yaoran, and he saw that his mouth shape was compared to a famous surname. Lu Qiuqian immediately understood the identity of the person coming.

“I’m Lang Fei from the elder’s office.” The person replied politely, showing a little pride in his unit.

“Oh, it turns out to be Director Lang! I’m glad to meet you!” Lu Qiuqian reached out and gave him a soft grip. The other party has come here, definitely for a purpose, he asked directly, “I don’t know what I can do for you?”

“This is it!” Lang Fei glanced at Professor Hu. He subconsciously stepped back a few steps to leave room for the two to talk. “You know, the elders are very concerned about you. I wanted to As you saw above, it’s just that your work is very busy. The elders are older and unsuitable to travel around, so it’s a pity until now; now I heard that you have come to Modu, our staff serving the elders I would like to invite you to meet and chat with the elders! “

“Thank you for your care! When I received the Fields Medal, I received a call from the elder. After returning home, I always wanted to come to thank you, but unfortunately there was no suitable opportunity! But I’m afraid to disturb the elders’ cleanliness! “Since the other party’s words are so polite, Lu Qiuqian doesn’t mind sending a few compliments! Moreover, although the elders have retired, they still have a say in some major issues. It is not unfavorable to meet and exchange with him. Lu Qiuqian immediately responded. “I don’t know when I can go to the door?”

“I know you are going to attend the premiere the day after tomorrow, or I will pick you up at the hotel tomorrow morning?” Lang Fei was also very clear about his schedule.

“Okay, I was waiting for a big drive at the hotel early in the morning!” Lu Qiujiang nodded and agreed.

“Then I won’t disturb you!” Lang Fei immediately waved goodbye, and when he disappeared in the car, Professor Hu walked back to Lu Qiujiang again, thinking in silence, which was probably the same as Qian Xuesen’s treatment. Is that right? The little guy I met in Princeton a few years ago has unconsciously become the most influential person in the Chinese scientific community!

The presence of staff in the office of the elders has made Professor Hu know more about Lu Qiujiang’s status today, and he feels even better with him! See? No one, the elders have to take the initiative to invite anyone who praises my virtue! He directly wanted to hold a banquet in the hall, so that everyone in the school could see his relationship with Lu Qiujiang. After dinner, Professor Hu refused to keep him, and Lu Qiujiang returned to the hotel. I started to think about what was appropriate when I met with the elders tomorrow and what to prepare for the premiere. I didn’t sleep until late at night.

Early the next morning, Lang Fei came to the hotel to pick up Lu Qiujiang and went round and round to a building that didn’t look too inconspicuous in appearance. Entering it, the elder was already waiting in the living room.

Seeing that Lu Qiujiang came in, he stood up tremblingly and read two poems, “I am now ‘stood by the foot and greeted the guests, and my eyes are faint and short of books.’ Anyway, I want to see you anyway! “

“You are humble! People all over the country are wishing you health and longevity. I think you are still in good health!” Lu Qiujiang quickly helped him to sit down. The elders really love poetry! But these two sentences from Lu You’s “Autumn Xing” are really suitable for use here! The versatility of the elders is indeed not blown!

“Well, if I didn’t care about these things before! But now I really want to live a few more years!” The elder said, looking at Lu Qiujiang.

Chapter 632 - Premiere

As the predecessor’s elder, Xi and the plan must pass him! On these major issues related to the future of the country, these older politicians still have a great say! So Lu Qiujiang is very clear in what he meant by wanting to see controlled nuclear fusion become reality as soon as possible. [www.520xs.la is a lot of beautiful novels]. www. Update quickly.

“Please rest assured! The current research is progressing smoothly! In the past few years, we have continuously broken through several major bottlenecks, and now the dawn is already in sight!” Some equipment that should not be there, so Lu Qiujian returned to his question.

“Well, I heard that!” The elder nodded slowly. “Your new battery technology will greatly change the current pattern of the energy, automobile and digital industries. With this technology alone, We have invested so much money before that there is no white ‘flower’! “

“This is also the result of Xi and many cooperating units of the plan working together. I will not implement this technology so early in my words!” Lu Qiujian said modestly.

The elder shook his head, “Without humility, the Americans, neon people, and Europeans did not come up with something, and achieved% ± 79 in your hands, m.! This is the manifestation of ability!”

Here he smiled, “And the different strategies adopted for tablet and battery technology prove that you are not only excellent in scientific research, but also first-class in business and political mind! Oh, I think this kind of cooperation is very good. It can promote the development of domestic related industries and ensure a certain degree of competitiveness, but will not let foreigners take advantage of excessive internal competition! Someone has found me in the past few days. I want to use this technology. I took a slice of the soup and I was scolded back! You can rest assured that I support you at this point! “

“Thank you for your concern!” Now Qin Feng and he have recognized their plan, and the elders will not object there, with the support of these people. Lu Qiujian no longer needs to worry about the troubles he may suffer!

Then the elder asked curiously about the latest research situation of Xi and the plan. Lu Qiujian nodded while answering him! Obviously, Lu Qiujian’s progress is quite satisfactory.

“Hey, think about it. I used to think about dropping out and going to universities to do research! But world affairs often don’t go according to people’s wishes! Now I hear you talking about the things in these studies, which is really enviable!” Elder ‘S eyes reveal a trace of nostalgia.

After all, the elder is very old, and his ‘strength’ is no less powerful than it was at the beginning. He did n’t say long before he became sleepy. So Lu Qiujian quickly got up and said goodbye! “Xiao Lang, help me send Professor Lu!” He beckoned and told Lang Fei, “Leave my phone to Xiao Lu. If Xiao Lu comes by phone in the future, he must tell me the first time!”

“Thank you! I will definitely report the latest research developments to you in a timely manner!” The results of this visit are not small! Lu Qiuqian left with satisfaction.

After seeing the old man in his old age, Lu Qiuqian hurried to the hotel to meet a middle-aged man with ‘skills’, “Hey, Cameron! Are you ready?”

“I have never seen an investor like you, think about it. How many times have you been here since the project was prepared?” Cameron said pretending to be angry when he met.

“Professional things are” handed over “to professional people! I am the authority in physics and mathematics, and you are the authority in the movie! All I can do is give you the most space! I believe you can All things are done! “Lv Qiuqian put on a certain high hat. Of course, these are just talks. Although he rarely shows up in the crew, the professionals he looks for are always staring at the crew.

“Haha! Let me take you to meet a few friends!” Cameron was extremely helpful. He began to introduce the guests to Lu Qiuqian. In addition to the starring of the film, there were representatives of the American cooperation company, Representatives of issuing companies, theater companies, etc.

“Professor Lu, I watched the sample! It was so shocking! I thought the” Avatar “super level is already the limit that mankind can reach at present. I did not expect the” Three Body “to perform better!” The 20th century Fox’s vice president greeted him enthusiastically, “You must have adopted new special effects production technology? Don’t know if we have the opportunity to cooperate in this field?”

“It’s just some small improvements!” Make such a science fiction blockbuster. Stunts are definitely indispensable! As long as it is related to technology, Lv Qiuqian can always get a surprising improvement here, “If you are interested, you can talk to my economic man, he is now responsible for these things!”

Lu Qiuqian introduced Liu Yuzhou to him. Liu Yuzhou has returned to China now to deal with similar things only for him. Lu Qiuqian did not have many commercial activities in his ordinary days. But once he shot it, it was a big deal; even with him, he became a hot figure, especially during the period when the “Three Body” plan was announced, he experienced many temptations and confusions.

After some excitement, the first day of the world premiere of the first part of “Three Body” was officially kicked off in the largest movie theater in Modu. Lu Qiuqian brought all the creative staff to the press conference. The reporters suddenly boiled.

“Director Cameron, how do you evaluate Professor Lu’s acting in the film? Will an amateur actor play such an important role as” color “cause trouble to you?” The first question is that some people are afraid of the world. Chaos not at all! “Cameron waved his hands exaggeratedly.” You know, Professor Lu plays a talented physicist! And in this day and age, are there any more talented physicists than Professor Lu? Professor Lu’s performance of “color” is enough to perfectly interpret this role “color”! Later, you can see Professor Lu’s style on the screen! “

“Professor Lu, why did you choose Brian May as the singer of the theme song of the film? This is a story of Chinese background. Shouldn’t you choose a Chinese singer to sing?” Another reporter said.

“As we all know,” Three Body “is a science fiction story that takes place in the background of the universe! Of all the big-name singers in the world, Mr. Brian May has the deepest knowledge of the universe!” They are doctors of astronomy at Imperial College. ! “So Mr. Bryan-May sings the theme song is perfect!”

“Professor Lu, is the scientific fantasy in the film achievable?”

“Good question!” Lu Qiuqian picked up a book from the table. “I have a detailed discussion about the scientific knowledge in this film”;

Chapter 633 - Global rave

“” Physics in Three Body “?” The reporters saw that the title of the book was not only a “spirit”, but the last book “When I Came to Look at the Starry Sky” was sold in hundreds of countries around the world, affecting a whole generation Young man, now Lu Qiuqian has come up with a new work, and it seems to be written for this movie special “gate”, it seems that he really attaches great importance to this movie!

“Yes! I did write such a book for this film special” gate “! I think this movie truly represents the future of human society in some way! Of course, I don’t mean human In the future, we will encounter such terrible opponents as the three-body! It is the description of the future of humanity after the rapid development of new technologies such as nuclear fusion technology and space navigation technology. “Lu Qiuqian talked with a sample book, It will be listed simultaneously with the movie, and all consumers who have watched the movie worldwide can get the first batch of purchase opportunities through the movie ticket! “

“Hoo!” There was another exclamation in the group of reporters. Using this method, I am afraid that many viewers who did not plan to go to the movies before would go to the cinema because they want to buy this book! Think about the horrible sales of “When People Start to Look Up at the Starry Sky”, they have become extremely optimistic about the box office of this TV ~79, m. Ying. [Almost all the books I want to read are more stable and faster than the average novel website. There are no ads in the entire text. (\$ >>> Cotton and flower ‘sugar’ small ‘say’)]-79-

At the same time, in major cities around the world, the investors and distributors of this film have come up with various means to build momentum for the largest investment in the film in history.

In the China Theater in Los Angeles, the premiere of the United States is also held here. In addition to Hollywood stars such as Kevin Spicer and Kevin Becken who played important roles in the film, there are also LeBron James and Dwyane Wade and other NBA superstars who have just finished their away game with the Los Angeles Lakers.

“Yes, Lu and I have known each other for many years! Although the memories he brings to me are always so bad, we are indeed good friends! I’m definitely coming to support his video! His new book I’ll buy it too! “James, who has switched to the Miami Heat and embraced Wade’s big leg, talked.

Man, are you sure you can read such a book? The “wave” on the side looked at him straight and blankly, and his heart was sullen! But his mouth repeatedly agreed. “Yes, I have been looking forward to this movie for a long time! I do n’t think I ’ll watch it once, and wait for the premiere here. After returning to Miami, I will definitely go to the cinema and watch more. Several times! “

In New York, the billionaire West ‘Mongos’ also walked into the theater under the reporter ’s flash. “At the time, I heard that Lu was going to make a movie, and I strongly requested an investment in this project! When I saw the trailer, I knew that my investment would have huge profits again!”

In the auditorium of Princeton, principal Shirley Tillman and Andrew Wyeth, William Timothy-Galls, William Thurston, Edward Witten, Freeman Dyson and many others The students of Princeton gathered together, waiting for the moment when the legendary students of Princeton appeared on the screen!

“Yes, he is the coolest student ever in Princeton’s history!” A little girl wearing a Princeton school uniform swayed at the reporter’s microphone with her adoration to Lu Qiujian, “Filz Award, Nobel The winner of the Bell Award is not uncommon in Princeton ’s history, but ncaa ’s championship trophy is the only one! Now he has made another movie. This is simply incredible! ”

In London, Stephen Hawking's wheelchair slowly entered the theater, "I want to see which of his acting skills is better than mine! I think he may have walked ahead of me in the field of physics, but in the performing arts In one area, he still has a lot to learn from me! "

Hawking's answer caused a vomit from the reporters on the spot. Pro, do you really have anything like acting? But his words reminded us! Shall we go back and open a topic? Let's discuss who is the best acting scientist? Who has the highest level of scientific research among actors?

In Geneva, cern has become particularly lively today. Dr. Evans is correcting the mistakes of reporters, "No, no, no. This is by no means the first time Lü has appeared on the big screen. We made a documentary" Particle Mania "a few years ago, recording what we found The detailed passage of the Higgs boson, Lu takes a lot of space in this documentary! "

"Yes, the film crew did come to cern for field shooting! If it is a general film crew, we will definitely not allow entry, but who let this be a project invested by Lu? We have suffered a lot from him in the past few years. The discovery of Higgs bosons and dark matter has made cern a holy place in the world of high-energy physics! This is all his credit, and we cannot refuse his request! Now what I want to say is. And lhc science enthusiasts full of curiosity, go to the cinema! There you can see the secrets that cern has never exposed before! "Dr. Lafayette helped Lu Qiujian directly. .

In Munich, Beckenbauer took the entire Bayern Munich team to the scene of the German premiere. "Yes, of course I will miss Lu Zao Bayern Munich every minute. He is the greatest star in Bayern history. One! I think our opponents should be thankful that Lu's job is a scientist! Otherwise, the entire European football will have to live in the shadow of Bayern Munich for a long time! "

"I've read the original book of this book! It was Lv mailed to me as a birthday gift!" Kahn held a book whose cover has faded somewhat This is a very good , Very imaginative book! I can't wait to see the grand scene of the three-body civilization depicted in the book being destroyed again and again! "

In Tokyo, Fujian Yoshihiro and Inoue Takehiko were interviewed by reporters at the gate of the cinema. Fujian Yoshihiro said angrily, "No, I don't like that guy! Last time I was with him Playing mahjong, for eight full laps, I didn't even have one!

Oh, many reporters suddenly realized how I said that after Professor Lu came to Tokyo last time, your comic output suddenly increased. It turned out that it was because Mahjong lost all the money!

In France, Italy, Australia, and Brazil, in major cities around the world, “Three Body” related activities are booming, and countless audiences are drawn into the cinema, anxiously waiting for the movie to start.

“Cameron, how much do you think the global box office can get? Will it exceed” Avatar “?” In Modu, the reporters also asked the last question. ;

Chapter 634 - Hot Box Office

Genius remember love for a second ♂ go ÷ small? Say → net, to provide you with wonderful novel reading. [520novel.com 520xs.la is updated quickly, the website page is refreshing, there are few advertisements, no pop-ups, I like this kind of website the most, I must praise it]

“Why not? I believe that any audience who has watched this movie will indulge in the extremely magnificent scenes! Think about it, the civilization is destroyed again and again, and it is rebuilt again and again, 10,000 tons of ships Cut into pieces by nanowires ... all of this will make the audience return to the cinema again and again!” James Cameron replied with a shrug. Actually, he was not very confident before the film started shooting. Yes, because the current global film market still has some prejudices! If the protagonist is not a Hollywood superstar or a white man, the story does not happen in a Western background. It may be very difficult to get a high box office, but after seeing the special effects processed, he instantly feels that this is no longer a problem!

The same was true of Fox in the twentieth century. When they contacted the release, they did not intend to arrange large-scale filming in North America, but the final effect of the film made them quickly change their minds! If such a grand visual feast cannot be sold, what other movies can be sold? They immediately summoned all the theater companies in the United States, and they got almost all the 3D cinema schedules, and they planned to do a big job!

Not only the film schedule, they also contacted the Huaguo company and produced a large number of peripheral products in advance, such as the badge of the eto organization, the sword of Qin Shihuang, the model of the Red Bank base, the water drop pendant and so on! These products have also been shipped to cinema peripheral stores around the world, and official stores have been opened on major online platforms around the world, just waiting for the film to be screened before it starts to sell.

After answering the last question, Cameron and Lu Qiuqian brought the stars to the theater, and the film began to be screened. As the holder of the world’s highest box office record, Cameron knew exactly what the audience wanted. The rhythm of the film is in place.

At the beginning, he first used the suspense of scientists to suicide to arouse the curiosity of the audience, and then Lu Qiuqian’s appearance made the scene set off the first wave of climax!

“This is what a genius scientist should be! The scientists in the Hollywood movies used to be weak!” Numerous viewers couldn’t help but express emotion after seeing Lu Qiujiang’s performance.

After that, Wang Miao entered the three-body game world, and the grand and tragic destruction of the three-body civilization brought the audience an unprecedented visual experience, which made people tremble! This is what the universe civilization deserves! The previous films depicting alien civilization are simply weak!

Afterwards, eto emerged from the water, and the brilliant one became Shi Qiang. He wisely deceived the nuclear bomb girl. The process of formulating the Guzheng plan vividly interpreted the image of a keen-eyed and stubborn policeman.

“Old Jiang, you are going to be popular all over the world this time!” At the scene of the Beijing premiere, a bald man couldn’t help but say to Jiang Wen with a slightly jealous tone.

By the end of the film, the advanced technology of the three-body civilization has overwhelmed the audience. The sentence “You are all bugs” makes the audience deeply realize the power and indifference of the other party! Can humans really overcome such a civilization?

The flying locusts tell the audience, let’s see, this is the worm, their technology and our gap is far greater than our gap with the three-body civilization. Humans do their utmost to destroy them, use all kinds of poisons, spray them with airplanes, introduce and cultivate their natural enemies, search for and destroy their eggs, use genetic modification to sterilize them; burn them with fire, flood them with water, each Families have their killing spirits against each other, and every desk has weapons like this to kill them ... This long war is accompanied by the entire human civilization, and the outcome is still undecided, and the insects have not been exterminated, They still walk proudly between heaven and earth, and their number is not less than before humans appeared. The three-body man who sees humans as bugs seems to have forgotten the fact that bugs have never been truly defeated.

At the end of the film, a match was drawn in the dark and a light was lit. Although the three-body civilization is powerful, humans still have a chance!

The cast appeared slowly, the lights in the theater turned on again, but the audience was silent; the front-line creator turned nervously to look at them. What’s wrong?

Wow ... Fragmented applause sounded, and then quickly infected other audiences. All the audiences stood up and clapped hard; Cameron and Lu Qiujian quickly took the stage to call the curtain! After a curtain call, the applause dissipated gradually.

“” Dark Forest “!” Dark Forest “!” I don’t know who started it first, and then all the audience shouted in unison, they called for the production of the second part of “Three Body”.

“Mr. Cameron, have you heard the call of the audience? How about, will you continue to shoot the second film?” Lu Qiujian asked by chance.

“Of course!” Cameron waved his fists vigorously. “Now the top two in the global total box office list are” Avatar “and” Titanic “! I want to make the top five into my work!”

Aside from the vice president of 20th Century Fox, “Lv, James, we will support you with more strength!” The second part will have more Western characters appearing, which is more easily accepted by the Western world, plus The first part is foreshadowing, and the results of this part will undoubtedly be better.

“Regarding the role, how do you think South American dictator Rediaz let Maradona play? That guy’s global influence can’t be ignored!” Lu Qiujian suddenly thought out! This role seems suitable for Maradona to play?

Outside the cinema As soon as the tide fans came out of the screening room, they rushed to the surrounding shops, waving the banknotes in their hands and shouting out what they want. Three Body! Give me an eto badge! “

“You are all bugs! Give me two water drop pendants!”

“Don’t squeeze! I want the power bank that looks like a Red Bank base!”

“I think I’m afraid I can’t sleep tonight!” The vice president of 20th Century Fox looked at the crowd and murmured, “Today’s global box office will definitely be a surprising number!”

Not only him, but also creatives such as Cameron and entertainment reporters around the world are also concerned about what kind of miracle this film will create! After the staff is busy, the data of various countries are aggregated to calculate the total box office in the world; when everyone sees this number, they are shocked!

God, this is a new world record!

Chapter 635 - Return to calm

“After breaking the global box office record on the first day,” Three Body “has maintained a strong momentum and swept the global film market in the first week of the release!” The major media have placed this news in the most striking position. “The total box office of the Chinese market in the first week was 608 billion US dollars, or about 400 million yuan! This figure broke the” Avatar “first week box office record of 270 million yuan! At the same time, it also became the highest in the world after the country. box office!”

“In the North American market, the performance of” Three Body “is more than everyone expected. It took \$ 212 million in the first week! It broke the \$ 158.4 million in the first week created by Batman: The Dark Knight in 2008. recording!”

“French \$ 56.85 million, Germany \$ 53.4 million, United Kingdom 56.8 million, Russia 49.5 million, Spain 42.12 million, Australia 37.8 million, South Korea 34.5 million, neon 32.10 million!” Three Body “also performed well in overseas markets! Plus In markets such as Upper and South America, the global box office has exceeded US \$ 1 billion in the first week! Very promising to break the global box office record of US \$ 2.788 billion created by “Avatar”! “

“In addition to its strong performance in the movie market, the sales of peripheral products of” Three Body “are also hot. According to incomplete statistics, the total sales of peripheral products of” Three Body “in the world have reached 1.12 billion US dollars! It is “Physics in Three Body” written by Professor Lu Qiujiang! This book scientifically explains various scientific phenomena appearing in the film, from the composition of the universe to the prediction of the future world. An objective and vivid analysis was carried out! This book also quickly climbed to the top sellers list ... “

“According to reliable information!” Three Body 2: The Dark Forest “has now completed the project work, Professor Lu Qiujiang, 20th Century Fox, Huaguo Film Group, etc. have become the main investors, and James Cameron will still be the The director of the film! Major actors such as Jiang Wen will still appear in the second film; Luo Ji, Zhuang Yan, and other actors and actors are being screened intensely. “

“According to media reports in Argentina, Argentine football player Maradona received an invitation to audition with James Cameron! He may play the man who faces the wall in the second part!

“Yes. I received Cameron’s invitation to audition!” The lens was switched to Buenos Aires, Argentina. Maradona was interviewed by a reporter outside his villa. He waved his ticket and shouted. . “I will go to China for an audition! I will let you know that Diego is not only world-class in playing football! Acting in movies will also surprise everyone!”

“Congratulations! He finally found what he should do!” In Brazil. Bailey couldn’t help but feel a little lost after he heard the news, and shrugged and replied, “But I don’t think his acting skills can afford such a big investment! I’m not optimistic about the future box office of” Three Body 2 “!”

“Great! If Maradona’s acting skills reach the pass, then the role of Rediaz is his!” Since Bailey is not optimistic about Maradona, then Lu Qiuqian’s confidence in Maradona is even greater! He immediately conveyed his opinion to Cameron.

“No problem! His image and personality are quite similar to Rediaz, and he should be able to meet our requirements!” Cameron wrote down in the book, “Lu, are you leaving now?” We still have many things in the future! “

“I have been away from my laboratory for half a month! It is too long! So I have to go back!” Lu Qiuqian pushed Liu Yuzhou in front of him. “You can negotiate with him about the rest! He will report to me in time!”

“Okay!” After so long, Cameron has become familiar with Lu Qiuqian, knowing that there is nothing more important than scientific research in his mind! So in the past few days, I hurried to seize the opportunity to finalize the main issues. Now most of the rest are some details. It really does not matter if he is not there.

“Then I will say goodbye now! I wish you all the best for your next job!” Lu Qiuqian and Cameron shook hands to say goodbye and took a bus to Modu Railway Station; then they departed back to Chang’an.

For a long period of time, the media was full of news that the creators of “Three Body” participated in promotional activities around the world to promote the film, and the box office of the film was also promoted by various activities. Beyond the Titanic approach to Avatar.

But what makes people a little puzzled is that as the main investor of the film and the player of Ding Yi, an important character in the film. Lu Qiuqian never appeared in these activities. Even his account on the Weibo has not been updated for a long time! At the end of the year, the New Mathematics Discovery Awards Ceremony and the China Science and Technology Commendation

Conference at the beginning of the year, he went to chase down every occasion, and he still did not find him.

During this time, the only time he appeared in public was the scene of the first recyclable rocket test launch in China. This time he also hurriedly answered a few questions and left quietly after the experiment was successful!

Ever since. Many netizens are speculating about what Lu Qiujian was busy with, but unfortunately, no matter how the reporters who are supernatural in their daily life are going to inquire, they have not inquired the slightest useful news! I only know that Lu Qiujian probably stayed in the Xihe Project Research Base in Chang'an engaged in some crucial research, but the content of the research is unknown!

At the end of the year, the total box office of "Three Body" successfully reached 2.8 billion US dollars, surpassing "Avatar" as the most popular movie in history. Everyone thought he would appear at the grand celebration banquet! But the expectant reporters only saw his agent Liu Yuzhou at the celebration party.

When the reporters asked about the whereabouts of Lu Qiujian. Liu Yuzhou also just said the last sentence lightly, Professor Lu is engaged in research. No time to participate in business activities! As for the research project, it is never mentioned.

Only people at the highest level in China know about the whole country. The controlled nuclear fusion eye now hosted by Lu Qiujian has reached the most critical stage! With the continuous breakthrough of room temperature superconducting materials, laser technology and plasma technology! Controllable nuclear fusion has initially achieved the possibility!

And Lu Qiujian is now making this possibility a reality in the laboratory! At such a moment, where can he find time to make up for the excitement!

It seems to outsiders that Lu Qiujian's life has returned to peace, but Qin Feng they know how huge the waves are hidden under this peace.

Chapter 636 - Electric tank

"Liu Dong, can you add a little more to our share next month? The thing you are giving can't meet our factory's production needs at all!" Li Shufu asked with a bitter expression in Liu Guangming's office.

“Li Dong, I can’t help it!” Liu Guangming said, spreading his hands. “Our factory has this capacity now! You have several factories, if I give you more! Wang Dong should scold me again! I see In the past few months, you must insist on it until the factory expansion is completed! It will definitely increase your quota! “

“I said Liu Dong! You are not kind!” Li Shufu turned sideways and stared at Liu Guangming straight, “I have also visited your factory! According to my estimation, your output must be more than that. I have also been an industrial man for decades! From the scale of the production line, I can estimate the output at a glance! The current production is far from the total amount of the factories that you have assigned to us. ! “

“Li Dong, this metal smelting and automobile production are two different things! You can’t measure our output by the standards of automobile production!” Liu Guangming still argued.

“I can’t increase my money! Liu Dong, look at this! As long as you can come up with extra products! I will increase the price by 20% to buy!” Li Shufu threw his own conditions.

“It’s not money or money! There are really no extra products!” Liu Guangming was quite helpless. Li Shufu had been entangled with him for several days. It seems that this time it is really not so easy to pass!

“Why not?” Li Shufu was anxious after not talking for several days without any progress! “Dong Liu, you’re not real! Am I going to join Wang Dong and President Ren to come and find you together?”

“It’s worth it! I’m afraid you won’t do it! Come over and listen to me!” Liu Guangming shut the door and beckoned to Li Shufu. Li Shufu moved his ears in doubt, and Liu Guangming said to suppress his voice in a weak mosquito voice , “Li Dong. Don’t you think such a good battery, the country will use all of it for civilian use?”

“You mean?” Li Shufu was suddenly dumbfounded, his anger swept away. He sat back in his chair and asked hesitantly after a long time.

“I didn’t say anything!” Liu Guangming quickly denied. But the expression on his face was affirming Li Shufu’s guess!

“I get it!” Li Shufu stood up on the thigh. “Yes, I did it wrong this time! I am liable to Liu Dong! I will get out of the way and not disturb you! I will wait for you to go to Qiantang next time. It must be entertained! “

“This matter must be rotten to the stomach, absolutely not to be mentioned with anyone!” If it were not the only factory in the early days, how could this happen? Fortunately, military factories are under construction, and it will not take long to have enough shares to deal with them!

“I understand! I haven’t been to you here for a few days!” Li Shufu is also a person with a family and business, knowing how powerful it is. He dare not dare to leak these news out!

Li Shufu was sent away, and some guests came to visit! Although the other party was wearing a casual dress, the temperament that appeared all over his body reminded him of the word soldier! After the person came in, he sat down and said, “Chairman Liu, I am instructed to accept this month’s product!”

“Colonel Zhong, welcome, welcome! By the way, did you bring your documents!” Despite being an old acquaintance, Liu Guangming was still afraid to take care of the documents from the hands of the Colonel Zhong, and went out to hit a few more. Check by phone. Then I went back to the office again, “No problem, the things are ready! You can take someone to check it and let it go!”

Colonel Zhong led the convoy into the airport of the Changan Military Region. Soon, a transport plane flew into the sky under the ***** of the fighter!

After more than two hours of flight, the transport plane successfully landed in a desolate Gobi. Several military vehicles took the cargo from the aircraft, and then moved along the dry river all the way before finally disappearing into the mountains.

“How much did you come this time?” A researcher in a white coat took the checklist from Colonel Zhong’s military base deep in the mountain, and waited for Colonel Zhong to answer that he had read the numbers above clearly. Hey. Why is that again! Did n’t you ask you to ask for more? “

“Zhang Gong, that’s not bad for me! Now the production capacity is so much! It has to be used by so many battery factories! Liu Dong can’t pull it out! When I went, I heard that Li Shufu in Qiantang City had troubled him It’s been several days! Haven’t you got nothing? “Colonel Zhong explained.

“Let me say. Such advanced things should satisfy the use of our military first! Then consider civilian use!” Said the researcher known as Zhang Gong.

“This is not something that we people should discuss!” Colonel Zhong strictly guarded the duty of the soldiers and shook his head. “If you check, I will go to the tank test if there is no problem!”

Zhang Gong also routinely complained, and after the inspection, he got into his own laboratory and invested in the research! Colonel Zhong came to the new tank test site!

Arriving at the test site, I was seeing several novel tanks in the author’s various difficult sports! The movement of the tank is extremely sensitive, whether it is climbing, reversing or crossing the ravine, it is done very quickly. What is more rare is that these tanks have very little noise during the movement, and they are not as dark as the ordinary tanks. exhaust!

“Colonel! This electric tank is really awesome! The concealment is better than all our models! Not only has the power not dropped but also a certain increase! And without the fuel tank, the safety of the tank is greatly improved. “The improvement!” After the test, a captain drilled out of the tank and asked excitedly, “Which kind of battery was invented! I think I can remember first class!”

“This is not done by our people!” Colonel Zhong looked at Changan’s direction! Hey, it is a pity, if Professor Lu is willing to come to our graduate work, how good!

Scenes like this do n’t just happen here. In another secret experiment area, several staff members are installing batteries into a cannon that looks like a machine-sci-fi fan, and then refilling the shells! What makes people feel strange is that this shell is like a red cannon hundreds of years ago, just a round iron ball, the shell of a general shell, nothing at all!

“The shells are installed!”

“Energy is filled!”

“Ready to launch!”

With a cry, a red light on the cannon lit up!

Chapter 637 - Deep sea ghost

In the depths of the Pacific, a Los Angeles-class attack nuclear submarine of the American Army is cruising freely in the depths of the sea. This 110.3 meters long, 10.1 meters wide, 6927 tons underwater monster can run 32 knots underwater Speed! In this area, few submarines can catch up with it!

“Lieutenant Colonel! We are close to the waters of China! Should we move on?” First-class soldier George Carlson asked the submarine captain Bryan Grant.

“Go ahead!” Lieutenant Colonel Grant replied lazily, now he was thinking about how to spend his vacation in three days, and really miss those coquettish women in the bar outside the neon naval base! But it seems too bad to be too active, or the female high school student who dragged away with Billy last time has a taste! Especially her expression of crying helplessly underneath her is really bloody!

“But Captain! Will we meet the submarine of China?” George Carlson, who was newly dispatched to the submarine, asked hesitantly.

“George! Did you come here from the European theater?” Captain Grant explained patiently after getting a positive response. “You have to face Lucia’s submarines frequently in the European theater, so be wary! After all, Lucia ’s submarines are superior, and their captains are crazy! “

“But China is different! Let’s see where we are now! It’s very far from the coastline of China! So don’t worry about their air strikes and surface ships! We only need to pay attention to submarines!” Speaking of Grant boats here Long shrug, “But because of the distance, their conventional submarines are unlikely to appear in this sea area, and their nuclear submarines are famous for their loud noise! We will definitely detect them before they find us! We The speed is much faster than the submarine of Huaguo, and it will be too late to run at that time! “

The veterans of this submarine carelessly crashed into the territorial waters of China according to the command of the captain. It seems that they have not done such a thing before.

“Boy. You have a good ass!” Submarine Executive Major Billy Hellington walked over and patted George’s ass, then hooked his neck and said, “Welcome from the Atlantic to the Pacific! Living here for a long time You will find. The days are easier than the Atlantic! The opponents here and the Atlantic opponents are completely two levels! “

I hope so! The chiefs were so relaxed, and George’s heart slowly dropped. Yeah, conventional submarines in China can’t get here, and the noise of nuclear submarines is too loud, so what are you worried about?

The submarine moved forward slowly, and the sonar soldiers demanded the signal from the listener sonar, as usual, with nothing but the original sound deep in the sea.

“Look! Boy! This is the life of the Navy of the United States in the Pacific Ocean! It’s like a sponge in the Pacific Ocean. It’s not as high as the storm in the Atlantic Ocean!” Billy patted his **** again.

Major Hellington is really a good person. He is handsome, strong, yet friendly. Of course, it would be nice if he didn’t like to pat my **** so much! It seems that my service career in the Pacific Ocean will be very moist! George began to dream of his happy life in the future.

Suddenly, a loud noise came from the sonar soldier’s ear! His experienced face suddenly darkened and shouted with a trembling voice, “Colonel Grant! We are locked by the active sonar! I heard the sound of the active sonar signal hitting the submarine shell! What should we do now?”

The active sonar signal hits the submarine’s shell, which is like a fighter jet locked into the target by the enemy’s fire control radar, which means that he is not far from being destroyed on the battlefield!

“Damn! Did you pull your ear to that Tokyo bed!” Lieutenant Colonel Grant couldn’t help but scold, “Report the enemy’s position, distance and model!”

“Lieutenant Colonel. Our sonar didn’t search for the enemy’s signal!” The sonar soldiers were sweating, and there was no more terrifying thing on the battlefield than the enemy found himself while he didn’t find the enemy!

“This is impossible! The noise of the Chinese nuclear submarine can’t escape our sonar!” Captain Grant rescued the sonar soldier from his seat and quickly operated himself. However, except for the sonar impact sound that sounded regularly, there was no abnormal signal!

“Damn, does he want to force us out of the water?” Under the current international environment, no country will rush to sink a nuclear submarine, even if it enters its own waters without permission! So Captain Grant issued an order, “Turn the rudder, start with all your strength! Ready to return! Sonar soldiers continue to monitor! Report any abnormalities found to me at any time!” He intends to rush out with the speed advantage of the Los Angeles class!

“Lieutenant Colonel! At the same time, the front left and front right came with the sound of the active sonar! We are already surrounded! The other party has at least three submarines! But our sonar still can’t find where they are hiding! They are like ghosts! “

“Regardless of them, continue to turn the rudder forward!” Lieutenant Colonel Grant ordered sternly. He is now betting that the casino is afraid to actually launch a torpedo!

The crowd in the submarine rocked around for a while. The more than 100-meter-long behemoth underwent a difficult U-turn under the water and then increased horsepower to rush outward.

“Lieutenant Colonel! The position where the other party hit was replaced right in front! That submarine was just in front of us!” The sonar soldier’s voice began to tremble.

“Does that **** guy want to hit us?” Will he become the first chief of the US military’s nuclear submarine captured by the Chinese government? Grant unbuttoned the collar. Stare at the sonar fiercely!

“The other party is only one nautical mile away from us! I finally found it! The length is about 75 meters and the width is about 8 meters! According to the data comparison. The Song class submarine in China should be stopped in front of us!” The sonar crew was excited Shouted, “But his noise signal is much smaller than that of the Song class submarine in the database! Is this a new type of submarine in China!”

“How could a conventional submarine come to this sea area!” Grant shouted loudly, “Continue forward! Continue to charge towards it!” I don’t believe you dare not let go!

“Yes! All members are prepared for collision! 0.8 nautical miles from the impact! ... 0.7 nautical miles from the impact! ... 0.6 nautical miles from the impact! ... “The sergeant’s report was like the countdown signal of a time bomb, which made all submarine crew members hold their breath!”

Chapter 638 - The power of new batteries

“... Stop!” At the moment of approaching the critical distance! The sweaty Colonel Grant issued an order! After ascending, you can also pray for the Chinese navy to let itself go! But if it hits, I am afraid it will be more serious! At the last moment, he finally lost the courage to the Chinese navy! Helplessly issued an order, “Let’s float up!”

Being forced out of the water is the biggest shame for the divers! Can hear Grant’s order, up to executive officer Billy Hellington, down to George Carlson who just joined the submarine, no one was ashamed, Fan Er took a long breath! Thank you for Grant’s final decision!

If you can live, no one wants to die! The consequence of the impact is that they can't bear it anyway! "Lieutenant Colonel, shall we continue to leave after surfacing?" The soldiers after the robbery asked about the next step.

"No, stop after floating on the surface and open the boat door! I want to see what model the ghost was just now!" This floating has made Grant lose face, and he might be punished by his superiors when he returns! But if you can get information about your opponent's new submarine, you might be rewarded by your superiors!

"Yes, Lieutenant Colonel!" The submarine slowly ascended, and soon it rose to the surface. Lieutenant Colonel Grant could not wait to open the boat door, and greedily breathed a long-lost fresh air. He was drunk! Then Billy-Hillington and others also came out and stood on the bridge.

"Judging from the position just now, it may be there if they will also float!" Billy Hellington holding the telescope pointed far away.

"If it is a new type of submarine, I think the Chinese Navy might not ..." Before half of the words, Billy-Hillington closed his mouth and put his eyes close to the telescope, "I saw the periscope! The ship directly in front is about to pay the water!"

"So is the rear!"

"There is also a right front!" The two soldiers almost discovered the submarine that was about to float with his colleagues.

"Give me the camera!" Grant grabbed the camera from George's hand and pointed the lens directly in front of it, the submarine closest to it. "Come on baby, let me see what you look like!"

"God! How is it possible?" Grant stopped the operation as soon as the shutter was pressed twice. Unbelievably, he looked at the submarine with a very familiar shape not far away. "Isn't this model the Song class conventional submarine of China?"

"So are the other two ships!" Just a moment ago. Billy-Hillington has swept the telescope around, and has a panoramic view of these three almost identical submarines!

“How did they catch up with us? The data of the Song-class conventional submarine is kept in my mind! It may show some of the performance just now!” Grant took the telescope from Billy’s hand and almost pressed the eyepiece to his eye socket. in.

“When I was only one nautical mile away from the other party, I found that this submarine looks like the Song class! But the noise model is completely different from the Song class!” The tormented sonar soldier also interjected, “And If it is the Song class, I must have discovered them already! “

“Is it a new model of the Song class?” Grant asked suspiciously, but in an instant he overturned his guess. “But look at the shells of these submarines. They have been in service for some time!”

“This is China’s territorial waters, please leave immediately!” The submarine directly in front of this time heard a loud horn, and the Chinese soldiers on the bridge shouted in standard English.

“Go! We will get into trouble if we don’t go!” Billy-Hillington climbed down first! Then came the sonar soldiers and George! Grant stayed at the end. He glanced at the three submarines before he climbed slowly. Then this Los Angeles-class nuclear submarine slowly sailed out of China’s territorial waters under the supervision of three conventional submarines!

A few days later, at a naval base in China, all the officers and men of these three submarines received a warm welcome from the base. “You have given us a navy face this time! I have already reported your credit to your superiors. How long will you receive the award after making up! “

“Thank you, Chief! But I dare not take credit for it. This is the effect of the modified submarine. It is the same even if you change someone else!” Major Li Changgan, the leader of the submarine unit, replied.

“This time the weight of the battery has been reduced by one-third, but the stored energy has more than doubled! And the noise of the propeller and the main gear reduction gearbox processed by the new technology has been greatly reduced! The speed of underwater navigation is even more Great improvement! If we still can’t catch up with a Los Angeles class, then we do n’t have to be in the navy! ”Li Changgan gave all the credit to the reconstruction project.

At present, conventional submarine batteries are still dominated by lead-acid batteries. The specific energy of lead-acid batteries is about 35-45wh / kg. General conventional submarines require 1-2 hours of full speed submarine capability, or 3-7 days of low speed submergence capability. According to the estimation of a conventional submarine with a displacement of 1,500 tons, the battery usually costs about 50-100 tons.

With the new battery technology, the weight of the battery has dropped to 60 tons, but the energy contained allows them to have a full-speed navigation capability of 4-8 hours and a low-speed latent ability of 2 to 3 weeks! This is enough to expand its monitoring scope to the position reached by Colonel Grant's Los Angeles class.

The biggest noise source of the submarine is the propeller and the main engine reduction gear box, and the adjustment of these two parts makes the noise emitted by them decrease in amplitude, so until the Los Angeles class is surrounded, their sonar soldiers have not found it!

"Haha! Something is a good thing! But some people will use it!" The base commander patted Li Changqian's shoulder intimately. One copy! This will be an important basis for us to study the improvement work of the new submarine and the Los Angeles class! "

"Yes! Guarantee to complete the task!" Li Changqian immediately stood up and saluted.

"Lieutenant Colonel! Are you sure that you are hallucinating because you are taking more drugs?" Among the neon Rice Army Naval Base. Lieutenant Colonel Grant is also accepting inquiries from all parties!

"Absolutely not wrong! I still have photos taken at that time, judging from the style of the shell. They are definitely Song class conventional submarines!" Grant took out the camera and placed them in front of these people!

"Gosh! How is this possible?" The senior officials of the Naval Base of the US Army also fell silent.

Chapter 639 - The idiot Marburg

"Perhaps the Chinese people used new technology on this submarine! For example, the new type of battery!" Finally, someone broke the silence and put forward his own views.

"According to the usual practice, the more advanced and powerful technologies will be used in the military first!" Lieutenant Colonel Grant immediately said that he did not simply want to support the other party's views, but this can reduce his responsibility a lot. ! Look, it's not that our army is too incompetent, but the enemy is too powerful! Because of my innocence and insolence, I forced the Chinese to come up with their most advanced technology! I definitely have no merit!

“Report the information to the Pentagon!” The chief of the base made the decision, “Battery technology is not limited to submarines! I think we should be more vigilant about this country!”

A high-level message was sent from the neon Rice Army Base to the Pentagon in Arlington County, Virginia, southwest of Washington, DC, and then from there to the White House.

“Have you not come yet?” Admiral Michael Mullen, chairman of the Joint Chiefs of Staff, handed the document bag to the staff in the conference room, and then distributed it to the important White House officials.

“Your Excellency President is on the phone with Downing Street to discuss the latest situation in the Middle East! In recent years, oil has been sluggish, and their lives have not been easy!” The new Secretary of State Hillary Clinton said with a shrug.

“Their comfortable days have passed long enough!” Defense Secretary Robert Gates looked at the second secretary of state he met, damn, from Albright to Condoleezza Rice. To her! Three of the four most recent Secretary of State are women. Have all the men of Rice died?

With a clatter, the door of the conference room was opened. The 44th President of the United States, Ao Guanhai, walked in, and he came to the position of Shangshou. Picking up the large photo of the staff where he just put it from the seat, frowning and looking at it for a while, “Michael, can you tell me what’s so special about this photo that made me postpone the meeting with the neon representative to come here In a small meeting room? “

“This is a picture of the Song class conventional submarine currently in service in China!” Michael Mullen opened the projection. Pointing somewhere in the Pacific Ocean with a laser pointer, “It was just two days ago. A Los Angeles-class nuclear submarine under the jurisdiction of the Seventh Fleet stationed in Neon was forced out of the water by three Song-class submarines in this area! Lieutenant Colonel Grant, the highest commander of the submarine, took these photos! And immediately reported to the Pentagon! “

“Then what?” It was still an unknown look.

“Your Excellency, according to the information we have collected before! The speed of the Song class submarine can never keep up with the Los Angeles class. This extraordinary performance proves that China has begun a new round of military technological revolution! I think this Should pay attention to the White House! “Michael Mullen said.

“What kind of technological revolution? The results they have achieved are probably comparable to the technological level of the country many years ago?” Hillary Clinton asked.

Michael Mullen smiled awkwardly, “The answer is surprising. According to the professional analysis of intelligence personnel, the technology used by the Chinese on this submarine is likely to be a new battery technology! In this regard, we are still behind Status! “

“What? Are we behind? Are you saying that the technological level of the great United States of America lags behind that of China?” Ao Guanhai exaggeratedly surprised!

“Your Excellency! We are only behind China in the field of new batteries!” Michael Mullen emphasized.

“I may know this technology!” Hillary Clinton interjected, “Not long ago, automobile groups such as GM and Ford strongly protested China’s policy of prohibiting the export of new batteries. This decision violates the WTO’s principle of free trade! Michael, is this the new battery you are talking about? “

“Not exactly the same!” CIA Director Leon Panetta took a thick stack of documents from his briefcase and distributed them accordingly, “According to the information we got, the Chinese military used The new batteries and the new batteries they are currently preparing for use in electric cars, mobile phones, tablets, and laptops are all developed by Xihe project team! “

“We have not yet obtained samples and data of military batteries, but from the test results of these civilian batteries, their performance has far exceeded our imagination! According to the consistent performance of the Chinese military, their military The battery performance must be more powerful than civilian batteries! “Leon Panetta gave his analysis results.

“Xihe plan? It was the team led by Lu Lu from Princeton University? I remember how he looked! I was watching the Princeton Tigers and Marquette Golden Eagles game on the spot! That was a great guy! He was playing! “...” Ao Guanhai said turbulently.

“Your Excellency the President! Let’s talk about the business!” Michael Mullen couldn’t help interrupting his chatter. “What we are going to discuss now is the threat posed to China by the advancement of China’s military technology and how to deal with it.” ! Not a ncaa game! “

“Okay! You continue to say your opinion!” Ao Guanhai pouted, seeming to be unhappy that his conversation was interrupted is just this new type of battery. It will enable China’s submarine, tank,

electromagnetic gun, aircraft and many other important military technologies to be greatly improved! “Michael Mullen said seriously,” But this is not the most important! What makes people more headache is that since Xihe plan was established. They are constantly introducing new technologies, which have threatened the security of the United States in every field! We all now hold tablets invented by Xi and the planning team. Who knows if there are hidden backdoors in these computers? Not long ago, they successfully carried out experiments on recyclable rockets! This means that their already very advanced rocket technology has been greatly improved! Now they have made this incredible battery again! These changes started after Lu Qiuqian returned to China and became the person in charge of the Xihe plan! “

“I remember my predecessor Condoleezza Rice told me that before Lu Qiuqian returned to his country, the former president had held a special meeting to evaluate the driving effect he could bring to China Technology! Consultant John Marburg believes that he cannot pose a threat to Millikan! “Hillary said coldly.

“That idiot Marburg!” Curated Michael Mullen’s teeth.

Chapter 640 - What to do in the future?

“I think Professor Marburg’s judgment was not wrong! It’s just that Lu Qiuqian’s performance is incredible! Who can think of a theoretical physicist who can perform so well in the application field?” The current presidential science and technology consultant and John Holdren, director of the White House Office of Science and Technology Policy, stood up to defend his predecessor.

“But what’s the result now? It’s like this? We can only watch as China’s technology explodes amazing achievements again and again under his leadership?” Leon Panetta said dissatisfiedly, “ If he was still in Europe, we can take him to the United States in various ways! But now we have nothing to do with him! “

“And Xihe plan is really doing space exploration research as China has publicized it?” In the professional habit of intelligence personnel, Panetta also doubted the true purpose of Xihe plan.

“Is battery technology related to space exploration?” Aoguanhai turned his attention to Director Nasa Michael Douglas-Griffin, “Mr. Griffin, what do you think!”

“Battery technology is very widely used in space exploration. For example, satellites, space explorers, etc. can use this advanced technology!” After he shrugged, “We submitted a purchase application to Hua Guo, but they have not been I plan to sell the battery directly; so we are currently discussing whether we should import electric vehicles from Huaguo and then remove the battery for use! “

“That’s how the taxpayer’s money is wasted?” Ao Guanhai couldn’t help but say, “Can’t you get a sample of the battery and study it yourself?”

“Of course we tried!” Griffin shook his head helplessly. “Our researchers took the battery apart and studied it carefully. Other questions did not exceed our imagination. What kind of key metal materials are we trying to do? There are still various ways to copy! “

“It seems that the key to the breakthrough of China’s battery technology lies in this special metal material? Leon, is there a way to get the formula of this metal?” Everyone turned their attention to the head of the world’s most powerful intelligence department people.

Leon Panetta shook his head. “Since the introduction of this new type of battery, it has attracted our attention; the investigation found that this metal is only produced in the secret factory of Changan Nonferrous Metals Corporation! The confidentiality is very strict, we have tried many times! Intelligence personnel. Nothing!

“Intensify the investigation! Director Griffin, contact the relevant institutions of the whole country to conduct in-depth research on this metal! We must have this key technology in our hands!” Ao Guanhai ordered.

“According to our investigation. It seems that they are still producing another new material in this secret factory! It’s just that we always can’t find out the exact news!” Panetta added, frowning.

“It’s Xihe’s planned product again?” Hillary Clinton couldn’t help but ask, “It seems that Condoleezza’s insistence was wise! It was just misled by Marburg!”

“Now is not the time to struggle with past mistakes! Still think about what method to take to get this technology!” Michael Mullen pulled the focus of the discussion back.

“We will continue to increase research on this metal! Increase the budget and mobilize more staff! Contact the research institutes of the whole country!” Griffin explained in advance, “but the breakthrough in materials science is the most difficult, even if it is the same The composition and distribution ratio will be slightly different during the processing, and the performance will be greatly changed! Without knowing the specific production process of the Chinese, it is difficult for us to make the same finished product! “

“We will also mobilize more intelligence personnel to put the target on this secret factory, as well as Xi and the planned research base!” Leon Panetta said.

“We can make efforts through diplomatic channels! See if we can use some urgent needs of China. But we are not so valuable technology to deal with China! At the same time, it is proposed to China on the ground that it violates the principle of free trade. Protest! “Clinton made a suggestion from his position.” If China does not agree to our request, we will also restrict the export of certain high-tech technologies in retaliation! “

Panetta said nothing, and the technical blockade of the Chinese team Hua Guo has been going on for many years, but the country is still making progress under the strict blockade.

“Just do what you said!” Ao Guanhai’s words ended today’s meeting.

In the following days, in the news report, the United States made a series of attacks on China, which caused a climax of public knowledge on the bib; but in private, the United States came up with several technologies that they were about to phase out and tried to exchange with China. The latest battery technology! Of course, this unreasonable request was decisively rejected by the Chinese government.

“The Americans have become restless again! Since they withdrew their troops from the Middle East, they seem to have plans to return to Asia! I am afraid our pressure will be even greater in the next few years!” Qin Feng said to Lu Qiujian at the Changan base .

“The expected thing! After the launch of this technology, let’s not mention the improvement of military technology. Therefore, it poses a threat to the country! From the perspective of the civilian market, General Motors, Ford and other established companies. I am afraid it will also be strongly impacted! Who makes environmentalism very popular in Europe and the United States? Compared with traditional fuel cars, electric cars have much less pollution to nature. Once our products enter Europe and the United States The market is bound to be welcomed by these environmentalists! These big companies are not in a hurry! “Lu Qiujian said with a smile.” They have a strong influence on the White House. The dual pressure of the military and capitalists has appeared. Such a move is not surprising at all! “

“Well, Rice ’s return to Asia is something we had anticipated! Since the completion of the shale gas revolution, the dependence of the Middle East ’s oil on the Middle East has gradually declined, and our country has been sullenly developing over the years, and has gradually become the biggest rival of the North in the world. It was also our expectation that they made such a move! The new battery technology just gave them a reason! “Qin Feng said that he did not want Lu Qiujian to have too much pressure!

“This time the matter is not big! I believe the central government will be able to handle it smoothly!” Lu Qiujian’s eyes flashed after he finished speaking. It took a while to look straight at Qin Feng, “but it will be different after the news of the successful controlled nuclear fusion comes out! At that time, the United States will definitely take more intense measures. Are we ready to meet?”
