

D. School 70

Chapter 70 - 5 Tiger Broken Door Knife and Shaolin

“Hello, Shirley!”, Richard hadn’t realized anything yet, and he greeted easily with the phone.

“Richard, have you received the fax?” The Tillman at the end of the phone was very serious, “I think you better take a look at it!”

“What happened?” Richard Levin pointed to the fax machine. The assistant quickly took the fax over. Richard glanced aside quickly, and his face suddenly became dignified. “Sherry, I I want to take a look at this fax seriously, I will call you later! “

After he finished speaking, he hung up the phone and read it word by word. When he saw the long list of signatures at the end of the open letter, his face was darker than Jordan.

“Ferig, you come to my office! By the way, call your students together!”, Ferrig, who was preparing to continue to inquire about the progress of the thesis review after work, was called to his office by the department head. .

Fortunately, they have been by his side for two days. The two of them somehow knocked on the head of the department head ’s office, wondering if he had learned of the upcoming publication of the paper to congratulate himself?

“Look at this!” There was no greetings, no coffee, and even they were not allowed to sit down. When they first came in, there was a snap, and a fax was photographed on the desk by the head of the department.

“What happened?”, Ferriger faintly filled with anxiety in his heart, and asked with a smile, but the head of the department stared at him with a black face.

Ferriger was afraid to stare at him, and quickly picked up the fax and looked at it, what? ! The sweat on my forehead at the beginning of a Ferrige came out. Wasn’t the plagiarism of his own thesis? You are so full of Princeton that you can stand up and do something!

Let’s look at it again. When I saw that Lu Qiujian was an exchange student from Beijing Normal University to Princeton, he wanted to cry without tears. Originally, he only wanted to bully the five

tigers with the majesty of the Huashan School. 'S disciple, he didn't expect that person suddenly became the heir to Shaolin's heirs. Nima was too ugly! I knew that this paper was the work of Princeton, so I won't be moved anyway!

"Sherry Tillman, William Timothy-Galls, Andrew Wyeth, Edward Witten, Charles Feferman, William Thurston ..." A series of names made him dizzy, let alone Philip Griffith, who was most afraid of him behind him. The emphasis on intellectual property is famous all over the country.

"Seventeen Fields Prize winners and three Wolf Prize winners protested to us at the same time!", The head of the department is now eager to eat Ferrig. He stands up and growls, "Your behavior today Let the glory of the Yale Mathematics Department be destroyed for a hundred years! What other faces of the Yale Mathematics Department will publish articles and attend academic conferences! "

"But ... but this is indeed the result of my own research!", Ferrig is still hard-mouthed. At this stage of the matter, it is too late to recognize the planting, it is better to die than to die.

"Is the evidence enough?", The dean knocked on the screenshots of the emails on the fax, "I always hoped that the Yale Mathematics Department would be famous, but I never thought it would be in this form!"

Although the United States is the first in the world's paper fraud rankings, but the plagiarism of red fruits like Ferrig is rare, it is conceivable that after this happens, professors of the Yale Mathematics Department will resign, those geniuses I won't apply to this school again, at least I can't turn over this department within five years.

"Otto! You explain to me what's going on!", With a bang, the office door was kicked open, and the always handsome Richard Levin broke in angrily, holding it in his hand With a familiar fax.

"Oh, it seems that you have also received it, which saved me a lot of effort!", Richard Levin also saw the fax on the desk.

"Mr. Principal, I'm asking Ferrig about what happened!" Otto quickly got up and replied, he can still care about the principal's face with his academic status, but such a big problem on his territory, this Let him look up.

"Oh? This is Professor Ferrig? Then the other one is our genius mathematician?", Levine looked at the trembling two and asked coldly.

“Mr. Principal, listen to my explanation, I’m all bewitched ...”, Ferrig now can’t care about anything else, just want to relieve himself of some responsibilities.

Fak, it seems to be true! Before coming, Levin still had hope in his heart, and now he heard Ferrig did n’t make a move, and suddenly he almost fainted in the dark; Yale was able to get so many donations relying on its own nearly 300 years of accumulation Fame ’s behavior will undoubtedly ruin the reputation of the school And the consequence of the reputation is that at least the donation of nearly 100 million US dollars is reduced, which makes me explain to the board!

Now that his 1 / 10,000th fantasy has been broken, the next step is to study how to restore Yale’s face. Levin said coldly, “I will submit my resignation today!”, And left the office. Ferrighe, who was crying without tears, and Otto who was lying and shot.

“Sherry, I’m so sorry for this happening!” Back to the principal’s office, Levine immediately dialed the phone. The key now is to get the forgiveness of Princeton first, so he put his attitude very low, use A sincere tone said, “This incident not only hurt Princeton, but also humiliated Yale’s glory for three hundred years. Here I am in my own name to you and all the members of the Princeton Mathematics Department, especially the Lu Mr. solemnly apologizes! “

“I also believe that no one’s behavior is not Yale’s advice!”, Tillman heard the pleading in his words, and said comfortingly.

“So Shirley, how do we deal with this matter next?” What he is thinking now is to promise what conditions can be used to block the matter inside the two schools without letting outsiders know and use Chinese dialect He said that he wanted to cover the lid, and only then could Yale’s reputation be protected.

“I think first these two plagiarists must apologize publicly!”, Tillman’s next words ruthlessly broke his hope, and Tillman has now figured out the weight of this article, which is precisely through this Things are a good opportunity to increase Princeton’s exposure! She will not miss it.
