

## D. School 711

### Chapter 711 - National celebration

How much can I grab a red envelope for the Spring Festival? A few dozens of dollars, only a little bit of bad luck! But that's not all it gets from the financial market! This will bring about a few percent or even severalfold increase in deposits!

what? You said that the stock market is risky, and you need to be cautious when entering the market? Please, how much money do I have? Haven't you seen that Professor Lu has put out billions of funds to invest in it? Are you smarter than Professor Lu?

Therefore, under the command of Lv Qiujian, the people of the Chinese nation repeated the miracle of the launch of the Huaihai Battle by the small cart. Disappeared without a trace!

"Haha! Rising up!" Fan Yihang looked at the data on the computer in a high-level office building in Lujiazui, Modu, and couldn't help jumping out of the cell with excitement! Colleagues on the side showed a tacit smile to him, it seems that he is not the only one who is busy grabbing red envelopes during work hours!

"Shout what shout! Have you finished your work? Has this month's performance been completed? I pay you to let you ... stocks come during work hours?" The general manager slammed the door and rushed to Fan Yihang In front of him, he glanced at the page that he hadn't had time to close.

Fan Yihang said that we could not speak, and the colleagues on the side quickly made the illusion of working hard! The manager sprayed more and more, and finally pointed to Fan Yihang's face, "..... Is your IQ still learning stocks? Don't lose all your pants! I tell you, this month's performance is not completed You just get out of my way! "

"Go away! I have earned 20,000 yuan for this moment!" There is a coffee shop downstairs, and the internet speed is very fast, I hope it can catch up with the next wave of quotes! Fan Yihang's long-lasting anger finally broke out, "When this wave of market is over, I just took the money to go on holiday! Who is willing to be your grandson here?"

"Little Red Guy! Long skills! Wait a minute ... what did you just say? This time you earn 20,000?" The general manager immediately heard this number and his attitude immediately became 180 degrees. Turning, he knew Fan Yihang's family and knew that he could not invest much money to invest in the stock market. Since he can earn 20,000 yuan, wouldn't he earn more if he kept up with this wave of market?

“Xiao Fan! Don’t be angry! You have worked hard during this time, and I am planning to give you a few days of paid leave for you to take a rest!” The general manager embraced Fan Yihang’s shoulder and said insincere words, eyes From time to time float to the computer screen! However, his age is a bit older, he usually only pays attention to how to tie carrots to his subordinates, and is completely out of the way for online stocks. In desperation, he has no choice but to please, “Xiaofan! How do you earn 20,000 Block? How much did it cost? “

“Not much, only two hundred thousand!” Fan Yihang said angrily, “Can you still lose money after following Professor Lu? Can you let it go, I have to refresh and see if Professor Lu has released the information again!”

“Professor Lu Qiujian?” This is God of Wealth! Is there any fake news he released? The general manager was so sweaty in anxiety, why didn’t he learn the skill of online stock trading in the first place! This time Jinshan is in front of him but he has no ability to get it! It is so painful!

“Hey, Xiaofan, do me a favor? I will transfer my deposit to you, and you will also help me operate it? Earn me and invite you to eat!” He lowered his voice, “I will be promoted to the next time One considers you! “

“Thanks! Are you planning to fire me? I’ll leave now!” Fan Yihang said as he was about to get up.

The general manager quickly pressed his shoulders, “Don’t!” He now completely regards the other party as a little \*\*\*\* of wealth, which will let him go, “10%! If you make money, you will get 10% profit!” My deposit can be more than ten times yours! Is n’t it good to earn two copies of the same operation? ”The general manager just knelt down and begged!

On the one hand, he was afraid to miss Lv Qiujian’s information, on the one hand, the general manager’s conditions did attract him! Fan Yihang took a bad breath and accepted the deposit of the general manager, and began a new round of refreshing! The general manager turned into a clerk at this moment, and turned around next to Fan Yihang, serving him tea and sending cigarettes to light the fire. If outsiders saw it, I might think that Fan Yihang was the young owner of this company, and the general manager was his horse. Aberdeen?

“Master, strengthen the output! Pastor, pay attention to the soldiers’ milk! There is not much money there!” Lu Qiujian constantly issued various orders in the base, he divided the entire team into several parts, the attacking trader It’s the mage, the soldiers responsible for defending against the enemy’s attacks, and the priest naturally responsible for allocating funds to support them!

For a time, this base suddenly turned into an Internet cafe. People who didn't know the truth came in and thought which big guild was playing boss or PK with other guilds!

In fact, it's almost the same. There are rewards for defeating the boss, and you can reap countless profits if you repel the rice! Such a name as Lv Qiujian was very liked by these young traders. Even with their nervousness, they gradually relaxed, and slowly forgot that the top leaders of China are watching them behind! One by one is immersed in the happy fight, and from time to time, some people are too deep into the slogan "for the tribe"! On the other side, someone immediately shouted back unwillingly for the alliance! “

“The second news came out! Professor Lu has refreshed the news again!” Numerous people shouted excitedly at the same time, and then quickly built several times, and carried out a new round of operations according to the instructions of Lu Qiujian!

The main force is the state-owned financial institutions of China, and the auxiliary party has hundreds of millions of Chinese people. The combination of the two is invincible. Under the command of Lv Qiujian, the two parties have rarely joined together and faced together. Attack of the common enemy! Repel the attack from the United States again and again!

Inside the financial war headquarters of the United States! The financial geniuses who initially looked relaxed and high-pitched lowered their high heads, and their faces became darker and darker! They did not expect that China could raise new funds through this method! For a time they were helpless! The first few waves of attack cost them hundreds of billions of dollars!

At the same time, foreign netizens who came in over the wall discovered the grand occasion on the bib! So they began to wonder, can we also use this opportunity to make some money?

The news spread quickly, and netizens from all over the world began to participate in this grand red envelope grabbing activity! Even the Americans are no exception!

Chapter 712 - Prestige for 1 person

“Jason, today is the trading day. How do you have time to get out for coffee? Should n't you be busy on the New York Stock Exchange now?” Harvard graduate Kenneth called Jason Norman in the cafe across the distance To greet, this impolite behavior caused a lot of attention from other customers.

“Kenneth, you're still the same!” Jason Norman, who knew the character of his old friend, shook his head helplessly. He hadn't seen him for several years, and he hadn't changed at all.

“Cry when you are sad, laugh when you are happy, and naturally shout loudly when you see old friends!” Kenneth knew that his behavior was not in accordance with social etiquette, but he had no intention of changing, or that someone like him in the art industry should be some personality, “By the way, you haven’t told me why you have time to ask me for coffee?”

“Now the entire financial session of the United States is planning a big operation, and my fish is not eligible for admission, so I have a holiday!” Jason shrugged.

“Come on! You are all billionaires! Will you still be ineligible to participate?” Kenneth’s expression did not believe.

“I’m a billionaire!” Jason gave a reserved smile. “But compared to those people, my assets are nothing at all!” He answered Kenneth’s question without forgetting to fly fast on his mobile phone. Moving around, for them as financial practitioners, timely understanding of information is a necessary quality.

“Wow! Sounds cool! But haven’t you always followed those big crocodiles? Why didn’t you go hitchhiking this time?” Although the visitor hasn’t seen him for a long time, he often contacts online. Relatively clear.

“I like to hitchhike, but I’m not interested in this train destined for hell!” Jason shook his head, and his eyes changed subtly, and he seemed to be falling into long-term memories.

“Why?” Kenneth kept asking like a curious baby. “I have also seen photos of Washington Airport. I can’t imagine who can beat their union?”

“Kenneth, do you know how I earned my first pot of gold?” Jason didn’t answer the question.

“Yeah, when you were at Harvard, you shorted the stock of Luther Technology! Soon afterwards, the Luther Technology Company broke the scandal of making fake accounts. As a result, the stock fell sharply, and you made a fortune! An incident later became a classic case of Harvard Business School! How can I not remember this legendary thing?” Kenneth spit out a long line of speech like a machine gun.

“Yes! Because of this opportunity, I have the capital to step into Wall Street!” Jason could not help raising his chin slightly, “but you are not curious about what I did because I heard someone talk about my proud past.” Is such a judgment made? “

Kenneth nodded again and again, Jason held his hands in front of his chest, and told him a story from more than ten years ago, “These things are all from an NCAA game. At that time, I was the bench control of the Harvard Crimson team. Ball guard! Because the main guard Elliott was played by the Princeton Tigers point guard! I was able to play, and the first sentence of the opponent after the game let me know the reason why Elliott played abnormally! “

“What did he say?” Kenneth asked eagerly.

Jason took a sip of coffee slowly before he began to answer Kenneth ’s doubts, “He said to me,“ You are a business school student? What do you think of the latest data released by Luther Technology? I think they must be fake. By the way, these data simply do not comply with Benford’s law! “”

At this point, Jason couldn’t help laughing, and he could not believe that this was the most advanced and most irresistible \*\*\*\*\* he had heard in his life! “Later I learned that he conveyed to Elliott an idea that would allow him to write an article published in a first-class journal! How can we concentrate on the game in this situation? “

“Later, you listened to his advice, and then planned the business operation with him? Then you were a big success? By the way, where is the Princeton student who told you these now? Is it also on Wall Street?” Kenneth felt himself Listening to a legendary story, if it is written as a novel, it will definitely sell well?

“No, there are three people involved in this operation. In addition to us, there is another Princeton student who is now the vice president of Congo!” Jason’s eyes flashed a bit of desolation. “Here Of the three, I am the worst now! “

“Vice President!” Kenneth couldn’t help but open his mouth, if the billionaires are bad, what is this scum like me? “You haven’t told me who that person is? Also, what does this matter have to do with your not participating in the actions of the Wall Street Crocodile?”

“That person is the Nobel Laureate of China Lu Qiuqian!” Jason said the name that made him miss him very much. If Lu Qiuqian stayed in the United States and entered Wall Street, he would have to participate in his company anyway. If this is true, I am afraid that your assets are far more than this number?

“Now American financiers are planning to launch a financial war against China, but I know that with the financial strength of China and the ability of Professor Lu Qiujian, they simply cannot win! Why did I put my hard-earned money in vain? What about waste?” “Jason finally made the relationship clear.” And Simmons of the Renaissance company, who worked with Professor Lu Qiujian, also made the same choice as me! “

One person’s prestige even scared a billionaire and a billionaire even dare not have the idea of attacking him! What a powerful existence this man is! Kenneth couldn’t help but speak out.

“However, he is only a scientist and not a financier! Why do you fear him so much?” Literary and art worker Kenneth did not know the scientific world.

“Finance is ultimately a game of mathematics! In the field of mathematics, Professor Lu Qiujian is undoubtedly the first person in the world! The strategy he originally formulated for Luther Technology Company is a wonderful existence that I can’t surpass so far!” God, You give me this talent I have long become the richest man in the country! Will never be a scientist! Jason snarled in his heart, “Mr. Simmons is probably the person who knows him best in the US Financial Times? Since he has quit, how dare I insist ...”

Jason’s voice came to an abrupt halt, and he stood up suddenly, “Sorry, Kenneth, I suddenly have an urgent matter to deal with! Today’s party is here first!” After he finished, he rushed out of the cafe.

“Hey! Hello!” He cried out when he walked away, “Your coffee hasn’t paid!” Oh my god, drinking coffee with a billionaire would require me to pay!

Chapter 713 - Capital knows no borders

“Gosh, drinking coffee with a billionaire would require me to pay the bill! What’s wrong with this world! Is it because of this that he would become a billionaire, and should I work hard for that stupid boss?” Ken Nice spat out weakly.

“Kevin! Come back to the company ... I don’t care who you are dating! This is the biggest business since our company was founded! Just take this opportunity, a hundred-foot yacht, Manhattan Apartment! Whatever you want! Are you afraid that no chicks are posted? “Jason kept calling all the way,” ... Sheryl, triple the salary, come back immediately, to The company helped me find an overseas student who is proficient in Chinese, and another computer hacker! ..... Nick, clear all the bonds from the company, exchange it for cash, and hit my account! Quick! It must be done in the shortest time ... No matter how much loss I have, I only know that this opportunity is the biggest loss in my life! “

Running through five red lights all the way, he threw the driver a banknote and asked him to meet the police. Jason Norman hurried to his office! At this time, other major members of the company also rushed from all over New York, and their faces were full of desire for money, “Jason, will there be a big action this time?”

“Yes! This is my best chance since I shorted Luther Technology!” Jason dropped the phone on the table. “Come and see this! The Chinese have made their counterattack!”

Everyone immediately put their heads together and looked at Jason’s mobile phone screen without blinking. I saw a screenshot of the webpage above, “Sorry, Jason, I do n’t understand Chinese, can you tell me this is Any news?”

“Professor Lu Qiujian! It was the genius who took me to sniper the Luther Technology Company. He was also the creator of the algorithm used by the Renaissance company for more than ten years!” Jason briefly introduced Lu Qiujian’s identity, “He is now His war plan is constantly being released on China’s Weibo platform! We should seize this opportunity and follow his steps to make money from the financial market! “

“But Jason, China is now facing financiers from the whole country, as well as oil sovereign funds in the Middle East, and consortia around the world such as Neon. Can they hold up? Why do you think Lu Qiujian would be The last winner? “Some people don’t agree with him.

“Kevin, this is the difference between us! Why am I now a billionaire and you need to work for me?” Jason sneered. “That’s because I have more vision than you!”

“Nick! Tell me, is your work done? How much money is on my account now?” Jason hesitated to see several partners, and immediately turned his attention to his financial officer.

“There is still time to sell some bonds. I have helped you raise \$ 12.38 million in funds! Jason, you lost at least \$ 50 million in this transaction!” Finance Officer Nick kindly reminded.

“50 million dollars? It’s no big deal! I believe I can make those losses back today!” Jason said as if he had lost 50 million cents instead of 50 million, “Shelly, hacker and translator Did you find it? “

“They’re here soon!” Xie Lier quickly looked at her phone, “up to ten minutes!”

“Very good, when this operation is over, I will give you a month’s paid vacation. You can travel to any place in the world at my own expense! By the way, you can also bring your boyfriend! Jason snapped his fingers, “Guys, now get up and prepare for action!”

“As for you!” Jason turned his attention to his partner again. “You can choose to join now, or you can wait! But if you wait for the action and then join, then the amount of dividends is not the same as before! “

“Jason, let’s wait and see!” These partners were a little hesitant. They didn’t contact Lu Qiujian like Jason Norman, and they didn’t believe that the Chinese government could defeat the powerful US financial company. Cooperation with national consortia.

“Anyway! I’ve given you the chance anyway!” Jason shrugged. The students and hackers who had gasped for a while had arrived, and Jason immediately greeted him. Just do one thing for me to ensure that I can get the message from this bib account as soon as possible! Then translate it into English and tell me! “

Although it is now possible to log in directly to Lu Qiujian’s bib page, Jason doesn’t know how long this situation can last, so he specifically looked for hackers just in case.

“No, no problem!” The high price of a thousand dollars directly smashed the two men. The hackers packed up their devices and the international students quickly opened the dictionary on their mobile phones and prepared.

Not long after they were busy, Lv Qiujian issued a new bib, and international students quickly translated it, “Mr. Norman, Professor Lv gave a new investment option, its content is ...”

“What are you waiting for? Put all our funds in immediately!” At this moment, Jason had already contacted the related agency and got the maximum leverage he could get.

After all the work is done the market is really starting to change in the direction they expect. Under super high leverage, Jason’s assets have undergone changes that everyone envy.

“Jason, are you doing this well? Are you doing the opposite of Millikan?” After a while, the partners had understood Jason Norman’s intentions and were also aware of Lu Qiujian’s strength. Start building confidence.

“As a citizen of the United States of America, I followed the Constitution of the United States, paid taxes according to regulations, provided employment opportunities for hundreds of Americans, and donated to several charities for a long time! I think the White House should give me a medal of exemplary citizenship! I think I ’ve done enough for Michael! ”Jason said carelessly.“ Does the US Constitution require me not to participate in this financial war? I make money with my eyes and capital! No one can accuse me. ! “

“Jason is right! Capital knows no borders, if Milican will eventually win, then my money will not cause them to fail! And if they fail, we reserve some assets for Milician, let Milician ’s Losses are reduced! So why don’t we follow Jason together? “The partners disagreed, and some people began to tend to make money with Jason.

“Then what do you think you should do for me?” Jason immediately revealed the capitalist’s usual gesture.

Chapter 714 - Enemy against the world

“Jason! Are we not old friends anymore? We just don’t have a keen eye for you, a slower brain than you, and need more time to think!” The partner immediately started complimenting him.

“Yes, we are old friends! Old friends for more than ten years!” Jason seemed to laugh, “but business is business, or you can also find someone to operate like me! I have not registered a patent for this ! “

“Come on! With this time to find someone, I do n’t know how many opportunities I will miss. The hesitation just now has cost me too much! I do n’t want to make any more mistakes! Jason, just do what you said! The funds are all given to you, and you pay the commission, you help me operate! “Jinshan Yin Hai is in front of you, who can bear the guts to reorganize the team? Someone immediately expressed obedience, and then others no longer hesitated, Jason immediately had more funds in hand to participate in this red envelope grabbing activity.

In the United States, in the neon, and in Europe, it was not just Jason who found this shortcut to wealth, many netizens also received news from various sources that Lu Qiu Jian was making big profits on the bib! They don’t care what kind of impact their actions will have on their country. Only the US dollars, Japanese yen and Euros in their pockets are true! So the whole world began to follow the command of Lu Qiu Jian.

“Your Excellency the President! We are under increasing pressure!” Lu Qiu Jian’s hand was completely beyond their expectations, and these capitalists really taught the power of the people’s war, and they began to find it hard in the ocean Way out, “We must take measures!”

“Call Zac Markberg! Call Ai-Williams! Call Kevin Strom! Call ...” Trump repeated the non-death No, Twitter, Instagram, etc., the names of all the mainstream social network owners in the country, “Tell them, delete any news related to Lu Qiujian immediately!”

He tried to use this method to eliminate Lv Qiujian’s influence on Europe and the United States. Unfortunately, he had never heard an old saying, “The wisdom of the people is endless!”

These sites can set keywords to delete messages, but as soon as the pronouns, screenshots and other means are used, they are a bit blind! Have to spend a lot of manpower to manually check! However, this method still does not work, netizens will always come up with various methods to avoid their investigation, and there are too many people who send messages! They deleted a message, and immediately ten messages popped out.

In the end, due to pressure from the White House and Wall Street, these social networks also announced that due to heavy traffic, they had to shut down the server for maintenance. Please wait patiently for reopening!

The Americans also felt a rare blockade, and almost everyone guessed that before the end of the war, they didn’t have to think about going to these sites again.

If it is usual, countless people will immediately flock to the streets to protest against the gross interference of the right of the American government to the people’s right to know! But at this time they simply can’t take care of these, these websites can’t go on, they immediately look for new channels to get news! The government of the United States can’t shut down all the Internet?

Some people even started making cross-border calls, asking for help from friends in other countries, and letting their friends in foreign countries inform themselves of the news they received through telephone, msn and other tools.

Jason has already prepared hackers there, and he is even less afraid of these means! After all, it is the information age now, and it is too difficult to block the spread of information! No matter how difficult the situation is, a satyr can find the H website, and the desire for money also drives people to rack up their brains and fight with their own network monitoring departments!

On the big screens of the US financial warfare base and the Hua Guo combat center, various data flowed at the same time, but the look of the big screen was completely different on both sides. Qin Feng and others smiled, while Trump and others had black faces. The bottom of the pot is average!

Lu Qiuqian analyzed the data quickly and issued instructions to the traders in China. While constantly updating new instructions on his bib, people around the world were buying and selling according to his instructions! Wall Street financial predators and Middle East oil sovereign funds are now equivalent to enemies around the world!

These netizens who have made money are particularly emotional, and they have not forgotten who brought wealth to themselves, so the reward function of the bib comes in handy. The number of rewards and the total amount of rewards under Lu Qiuqian's bib are horrible. The speed is constantly increasing! Even Americans, neon people, and Europeans have newly registered accounts and come here to reward.

"Sorry Professor Lu, I haven't figured out how to use this payment system! But I have a few bitcoins here. Can I use these to express my gratitude to you?"

"Lv Qiuqian sama, I can't do rewards, but I have a secret photo of my sister here, do you need it?"

"When the market is over! I will travel to Hua Guo. If I don't see you, I will donate to the charity of Hua Guo!" People from all over the world asked Lu Qiuqian in various ways. Express your gratitude! At least at this moment, Lu Qiuqian is in the heart of these people more respectable than God!

"This is a war that can't see hope of victory!" Soros said in the American Financial War Center, his total assets have been shrinking continuously in the past few days since the war began. Going forward, he probably needs to spend the last stage of his life in a nursing home in a welfare institution! Live with those old people who have nothing to do with the bottom! Fighting for a piece of bread that is not so hard, it is even more uncomfortable than killing him!

"Our financial strength can overwhelm the Chinese government, but we can't fight the world!" Janet Yellen has to admit that they have no chance!

"If you withdraw now, it seems that you can still reserve a little money for your old age?" Someone began to plan for the future with a wry smile!

"Do you think Lv Qiuqian will let us withdraw safely?" Trump adjusted his clothes. "I think my presidency should be over! Anyone who wants to be president will go for it!"

He knew that after the incident, he would usher in anger of countless people-especially those who are not strong in network technology and did not receive the latest news immediately, and he did not

intend to sit in this most tortured seat! Fortunately, his own assets are not used here, he can still go back to be his billionaire!

## Chapter 715 - Victory

“The other party’s funds are showing abnormal trends! Now it seems that they are planning to evacuate!” There was a very exciting news from the underground base of Huaguo Jingcheng!

Qin Feng shook twice, almost fell to the ground, but fortunately supported by Lin Qianjun on the side! During this time, in addition to the necessary work, he spent most of his time here focusing on this war related to the lifeline of China! No rest at all! Lu Kunqi and others next to him are almost the same! The whole face is tired.

Like Qin Feng, they have shortened their schedules as much as possible, so that the Chinese found that the frequency of leaders appearing on the whole hour of news in the recent period seems to have been greatly reduced! But they don’t have time to care about these. They have been busy with Lu Qiuqian’s bid recently!

“Come and come, go and go! When we are the back garden of their home? Can we go? Let’s leave the money!” Lu Qiuqian is probably the most spiritual person in the base, right? His workload is the biggest, but these days have passed, his face is still radiant.

“Yes! Don’t give them a lesson! It’s time to bargain when they get injured!” Lu Kunqi’s words drew everyone’s lips for a while, and the family property of the American financial predators and Middle Eastern tyrants involved in this war at least fell. After 80%, for these people, it is even more uncomfortable than killing them! It is not easy to survive this crisis, how can there be the ability to revenge China again? And as long as Lu Qiu was built, they would not dare to make such mistakes again by giving them a few guts!

If their ideas let Lu Qiuqian know, I am afraid he will only say the last sentence lightly, then is there still 20% of the funds? They must all be left!

“Secretary Qin, the overall situation is now set! You should go to rest for a while! You haven’t rested for many days!” Lin Qianjun persuaded in a whisper, someone else said something similar!

“Haha! I used to worry that I couldn’t sleep, but now I’m too happy to sleep!” Qin Feng waved his hand and rejected Lin Qianjun. “Speaking of hard work, Professor Lu has worked harder than us! I’ll wait until all the work is finished. have a rest!”

“Secretary Qin, can’t you compare with Professor Lu! People have played professional games in those days!” Lin Qianjun politely persuaded him that he didn’t mention that Lu Qiuqian was younger, which is more sensitive to politicians. Others followed the persuasion and finally persuaded Qin Feng and Lv Kunqi.

In the next few days, the financial predators of the United States found that it was not easy for them to withdraw their pension funds even if they wanted to withdraw a little. The army commanded by Lu Qiuqian stuck to them, like a pack of wolves. A group of pigs fled in embarrassment, torn off a piece of flesh from their opponents without paying attention.

In a hurry, they sent good news to Hua Guo through various channels, but did not receive any reply! What a joke, when you came, you were holding the idea of completely defeating the Chinese economy! If your goals are really achieved, will China beg you to let them go?

of course not! So why do you think that under the current situation, the Chinese Congress has spared you generously? Reporting complaints with virtue is not our fine tradition! What we pay attention to is to complain directly! You originally wanted us to fall into the economic crisis, so now you go bankrupt!

It is not just the Americans who have suffered huge losses. The oil sovereign funds in the Middle East, neon tycoons, and their European counterparts have also been severely hit! In addition to this, not all of China’s internal stockholders have received a bumper harvest from this crisis! There are also some elites who did not believe that China could defeat the United States from the beginning!

While following the pace of the United States, they vigorously preached on the bib that the country will be defeated, but now these accounts have not been spoken for a long time!

Some of them lost their family property to the rooftop under the counterattack of Lu Qiuqian, and some were found to have an unreasonable relationship with overseas foundations. They were invited to drink tea by the relevant departments!

When they came out, they did not complain about the relevant authorities’ imprisonment in accordance with the law, but blamed them for acting so slowly? If they were caught early, they would not have time to invest, so that their family property could still be reserved! You ... you just don’t care about the interests of the people!

Pearl City has almost become the region with the most losses. The long-term worship of the United States and the United Kingdom has made them disdain to understand the achievements of China

after decades of development. In their memory, China should be the poor. country! Huanran didn't know how powerful China is now!

So when they found that the United States was defeated in the counterattack of China, and they continued to shrink with their own property, they could not believe their eyes! It is also unacceptable that some people have chosen to settle themselves, while others are mentally disturbed by the cruel facts.

With the completion of the last transaction, this battle finally ended with the victory of China and the peoples of the world! From the base in the underground of the capital to the office building of the magic city, from the cafes in Paris to the Starbucks in the United States, from the neon apartments to the farms in Australia ... cheers can be heard everywhere!

Only Wall Street, the White House and many predatory offices are dead! In just a few days They have evaporated their wealth in trillions! The wealth accumulated by many people throughout their lives has vanished.

"We are not without gains! The people of China suddenly obtained so much extra wealth, and a large amount of capital poured into China, which will definitely cause serious inflation in a short period of time!" The economic adviser of the White House held back for a long time That's how it said.

"Honey, are you a pig? You cut your legs and made bacon for the wolf to eat, and then happily told us that it would make the wolf obese! Oh, maybe it will cause high blood pressure and high blood fat. Wait for the relapsed illness! You are really a genius strategist! "Janet Yellen couldn't help but sarcasm!

At the same time, in the capital city of China, Lu Kunqi and Lu Qiujian also discussed this issue, "Xiao Lu, suddenly the masses have so much disposable funds that is not entirely a good thing!" The Prime Minister of a country, he also understands that the funds in the hands of the public exceed the products available in the market, which will cause inflation.

"Perhaps we can use these funds to invest in the exploration of space!" And Lu Qiujian already had his own plans for the use of these funds.

Chapter 716 - Space age

"Haha, these need you to tell them! As for the profits made by the national funds, I plan to invest in infrastructure!" Lu Kunqi also arranged for the use of this part of the funds, "In this case, it is still the same Keeping an export-oriented economy is not enough, so we have to strengthen the internal

circulation of the economy! With this money, it is just right to strengthen the infrastructure of central and western China again! “

“Cheap electricity allows us to build a cheaper and more convenient transportation system! Let those people in remote areas really integrate into modern life!” After decades of construction, the transportation aorta of China has been relatively perfect, and now It’s time to build capillaries. According to Lu Kunqi’s plan, he wants everyone in townships and counties to use the convenient transportation network to reach nearby cities in a short period of time, which greatly enhances the mobility of people.

Those who can only eat in the mountains in the past can also walk out of the mountains and bathe in the light of modern civilization, thus changing the old ideas and changing the fate of the next generation! Lu Kunqi said in a guilty tone, “For so many years of reform and opening up, we really owe too much to these people! Now is the time for them to get what they deserve!”

“This is a difficult and long-term job! But it is also a job we must do!” Qin Feng also came to them at this time, and said solemnly, the power and the extremely cheap ones that stretched between the mountains Transportation costs will bring the flames of modern civilization to remote areas and eliminate ignorance. “In an era when we have been able to reach the moon, it is a shame for all of us in power to live like this! It’s time! “

Lu Qiujian also agreed with him, how many Grothendieck, how many Edward-Witten, how many Lionel Messi are buried in the reckless mountains ... Those who have extraordinary talents Children have no chance to receive a good education, which is not only their personal loss, but also the regret of China, with the world ’s largest population base (not counting India, how many real people are there in India?), If all children are allowed With a good education, what powerful fighting power will this nation break out of?

Lu Qiujian believes that after the completion of Lu Kunqi’s plan, China will usher in a blowout era of talents. He is not very old now and can wait until that day.

“Don’t say this! Xiao Lu’s next space exploration plan needs much money? I am afraid it is not enough to raise funds from the people? I can also allocate some to you here!” This more than ten years of experience told Qin Feng and Lu Kunqi, As long as it is an investment for Lu Qiujian, there will be absolutely no overpayment!

“We plan to land on Mars next! Mars is more suitable for establishing permanent bases than the moon! At the same time, we also plan to develop asteroid mining technology, new spacecraft technology ...” Lv Qiujian simply said the next The goal, “We do need the state to provide some of

the start-up funds first, but I still hope that more people can participate in the space program, so that more people can enjoy the benefits of space exploration!”

“I planned it this way! The funds for the new space exploration program will come from two parts, one is government funds and the other is private funds!” Lu Qiujian threw out his own plan, “I want more people to support space exploration Plan, let them benefit from this plan is the best way! “

“From the discovery of the Xihe plan to the present, our plan is generally profitable! The benefits of tablets, new batteries, superconducting materials, fusion power stations, etc. have exceeded the government’s investment in us! Then we Why can’t we absorb private funds and then give them dividends? Of course, such dividends don’t necessarily have a lot, and they don’t necessarily cash out soon! But as long as there are, you can attract more people to invest in them! “Lv Qiujian They said a lot in one breath, “their participation will not only bring us more funds, but more importantly, it will attract more people to pay attention to space and interest in space! This is even more important than funds!”

“Well, as you wrote in the book, only when people start to look up at the starry sky, they will discover the mystery!” Qin Feng and Lu Kunqi also strongly agreed with his plan, “You can follow your first Ways to do it, if the funds obtained can not meet the needs of the plan, we will help you again! “

The people in the base gradually dispersed, after all, they are older! After these days of intense work, I can finally go back and get a good night’s sleep! I believe they will sleep soundly, right?

However, Lu Qiujian still didn’t feel tired. He came out of the base and returned to his room in the capital. He leaned on the bedside and took out his tablet computer. Then he started to log in to his bib account.

Wow, so many rewards! Lu Qiujian couldn’t help but widen his eyes. The total amount of rewards accumulated during this period has reached a surprising number!

Puff, look at it again. Lu Qiujian couldn’t help but laugh, his private mailbox is full of advertisements for financial products and fund securities recommended to him by countless investment institutions! It is estimated that the total amount of his reward was sent, and Lu Qiujian quickly cut off a picture and sent it to the bib, “Hey, I only heard that Bill Gates received an email that taught him how to make money. I think today I have met people who want to teach me to invest! “

“Guan Gong plays a big sword in front of him!”

“Confucius speaking in front of Confucius!”

“Talking in front of Deadpool!”

“Kato Hawk shows the golden finger in front of me!” Netizens have started to spit joy. Even the image of these companies has suffered a lot.

“Okay, don’t say this! I want to ask you now, how do you spend the money you have earned these days? If not, why don’t you listen to my suggestions?” The news of the plan to start absorbing private funds was released, and he also threw a lottery to increase his appeal.

“After becoming an investor in the China Space Program, you can enjoy various rights in addition to dividends. For example, according to our estimates, the moon travel project can be opened within this year! And the first group of travelers will be from Choose from the investors! We will draw three lucky people from the investors. These three lucky people can take their partners to the moon and become the first group of moon tourists! “

“In addition, the construction of the Mars base has also entered the final preparation stage, and it will become a reality in the near future; similarly, when Mars travel becomes a reality, the first tourists will also be selected from these people!”

Chapter 717 - Humans are divided into 2 types

“You can take your lover in a spacesuit to walk on the moon and taste the wheat, carrots, string beans and strawberries produced by the moon! By the way, we also planted a laurel tree in the base. I believe it will not take long for you. You can snuggle up under the laurel tree to tell your true feelings for each other! “Lu Qiujian released photos of the moon base one after another. Now the base is no longer just a cold metal color, vegetables, wheat and strawberries have stained the moon. A touch of color.

“Ah, this strawberry looks delicious! I decided to sign up! Does anyone want to go to the moon with me to pick strawberries!” Sure enough, eating goods is the core force that promotes human progress, and there are immediately eating girls. Can’t help tempting to express his willingness to invest the profits he has made into the space exploration program.

“I want to ask if I accidentally hit the American flag during a walk on the moon, would it cause diplomatic problems?” Someone started spoofing.

“Then you have to find the flag of the United States before talking about it!” This conspiracy theorist at first glance still doubts the authenticity of the people of the United States on the moon, “In addition, you can take some antiques and bury them in the moon soil, then It can be claimed since ancient times! “

“It’s really a good idea! My family has a set of mahogany chairs from the Ming Dynasty. If you don’t give it to you, would you say this was the space capsule used by ten thousand households?” Someone started to tease.

“I think there will definitely be a lot of people investing in the space program? I have won only one bottle at a time since I was a big draw. I really have no confidence in my luck! But I would like to ask about the number of tickets for my own moon travel. Money? I plan to set the goal of honeymoon trip to the moon! I do n’t know if the money you make with you these days is enough, can Professor Lu reveal some information to us? ”This one is a local tyrant.

“Trench! Did you find someone to marry? How do you think about me? Although I am also a man, we can go to the Netherlands to register!” A bunch of begging for thighs immediately appeared!

“At the time, the Americans Tito, the South Africans Shuttleworth, the Americans Olsen, the Iranian-Americans Ansari, the Hungarian-Americans Shimoni, the Americans Garriott, and the Canadian Lalibote boarded The cost of space may range from 20 million US dollars to 35 million US dollars! But our costs are much lower than them, although the specific figures have not yet come out, but I want to exchange these dollars for the same amount of RMB It should be almost the same! “Lu Qiujian made a point out in advance. Although this number is still unattainable for ordinary people, it is much cheaper than the price paid by the group of space tourists before! This is also the result of the development of China’s space technology. The new space technology has greatly reduced the cost of landing on the moon.

“In addition, this is just the price for domestic tourists. For foreign tourists, we will still adopt the previous Lucia NASA charging standards! And we will also control the allocation of places to ensure that the number of foreign tourists will not exceed three-points of Chinese tourists. One of them! “Anyway, the price is here, you love it or not, you have the ability to go up yourself!

“By the way, the official language used at the moon base is Chinese. We will not waste time equipping them with foreigners, so foreign tourists who want to land on the moon must first pass the Chinese Level 6 exam!” Songs are the subject of listening tests.

Lu Qiujian's plan is very popular, which has heralded the beginning of reform and opening up, and the various preferential treatments for foreigners in order to attract foreign investment have been declared ended!

"Twenty million to thirty-five million yuan? This price is not expensive! Professor Toru's blessing, I should have earned money during this time and should be able to cover the cost of this trip. Professor Lu I can sign up with you now No? "The local tyrant just came out and asked again.

"Then the official website of Xihe will release the registration start time! When the registration time comes, you only need to provide your personal ID card, the health certificate of the relevant department, and the bank asset certificate to register! But I need to advance To say one thing, space travel has higher requirements on the body! Even if you pass the review, if you do not persevere in the later training, you still cannot go to the moon! This is also for your safety! "Lu Qiujian explained.

"By the way, the friends in the lottery can choose to go to the moon by themselves, or they can choose to transfer the quota. Of course, the transfer must pass our review!" Lv Qiujian released another benefit.

"The two places are at least 40 million! And some people will definitely pay a high price in order to become the first batch of tourists to land on the moon? I will send it if I win!" Someone immediately got up.

"It's silly to transfer, is it the glory of being the first group of lunar tourists? Can this money be replaced? Anyway, if I win the prize, it won't be transferred! Also, I'm still single. If I win the prize, will anyone be willing to be me? 'S girlfriend? "

Amidst the joy, Lu Qiujian timely released the rules, sample contracts, and various instructions for investing in China's space exploration program was quickly warmly welcomed by the Chinese. In a short period of time, I had enough funds to realize the Mars landing plan, which also made Lu Kunqi worried about the inflation problem.

In addition to these retail investors, big capitalists such as Li Shufu, Wang Chuanfu, and Ren Zhenfei who had obtained numerous profits from the cooperation with Lu Qiujian also took action and took the initiative to find Lu Qiujian to request investment! In the same way, they followed the footsteps of Lv Qiujian in the financial war a while ago and have gained a lot!

In Wang Chuanfu 's words, "We are talking about preparing for a global purchase, but I did n't expect this to be a more suitable opportunity! As long as I follow Professor Lu, I 'm definitely not going to lose money! I plan to invest all my private property ! "

At the same time, the media of the United States have used a sad tone to report on China 's plan to absorb private investment into space. "... Since humans came out of Africa millions of years ago, a long period of time has passed. Development has created a brilliant civilization; and today, humanity has finally split into two kinds, one is the Chinese who have begun to enter the space age, and the other is still playing with each family on a small planet Others in the game; Chinese people have already stepped out of the cradle and into space, ushering in a new splendor of human civilization! While others have not grown up, they shrink like a baby in a warm cradle; this situation makes us feel Happy and sad ... "

#### Chapter 718 - Big purchase

"Bordeaux, France, Bordeaux, France, the most famous wine castle in Bordeaux, France, the Lafite estate closed down, the boss Rothschild, the financial market investment owed 35 billion yuan, and took his little aunt away. We have no way,

Holding red wine for wages, the original price is more than 1,000, more than 2,000, more than 3,000 red wine ... 200 "

Well, this hasn't actually happened. No one is selling red wine on the streets of Bordeaux, but the Rothschild family, the owner of the Lafite estate, can't hold on.

This family reached its peak in the middle and late nineteenth century, but made several fatal mistakes and encountered several disasters of extinction, and it has since collapsed. They first judged that the development of the rice country was wrong and withdrew most of the investment from the rice country. As a result, these investments disappeared in the fire of the First World War.

After World War I, they encountered Hitler's rise to power and suffered another devastation before they were completely restored. Then, the investment in Eastern Europe was confiscated by the Red Empire and they became state-owned by World War II.

In the 1960s, large banks in Europe and the United States, such as Morgan Stanley, Goldman Sachs, and Union Bank of Switzerland, listed on the stock exchanges to obtain large amounts of development funds. The Rothschild family still stays in the 19th century family workshop. Their best years in these years are only more than 100 million US dollars in profits! Less than 1% of Goldman Sachs!

However, more unfortunately, the heads of this generation once again made the wrong decision. They stood on the side of the United States in the financial war between the United States and China. The consequence of this stupid decision was to let this stretch for hundreds of years. The family lost its last wealth! Their pitiful wealth disappeared in this war without even splashing a spray.

The families that suffered losses in this war are not just theirs. The Rockefeller, Morgan, Mellon, etc. families that have left a glorious record in modern history have also suffered a huge blow in this war! There are also oil sovereign funds in the Middle East, neon consortia, and financial predators in continental Europe, who have felt the horror of the cold winter, but their strength is much richer than that of the Rothschild family today, and they have not fallen into bankruptcy. Situation! However, in the future, if they do not have a suitable strategy, then they will not be far behind the Rothschilds.

On the contrary, the new wealthy people of China have made a good harvest in this battle. Now that the war is over, they began to sprinkle money all over the world and take advantage of the fire to take over the industries of these bankrupt families! The Rothschild family's Lafite winery has become an industry that many people want to get.

"Dong Wang, don't you mean investing all your spare money in Professor Lu's space program? Why are you coming to Bordeaux now?" Wang Chuanfu met an old acquaintance as soon as he flew the plane, and Li Shufu with him at the New Battery Association.

"Yes, this investment is very cost-effective anyway! I plan to take my family to a trip when the moon trip is opened. Do you want to go with Li Dong? As for Lafite Winery? I still have some spare money. "Yes!" Wang Chuanfu said domineeringly, but neither for him nor for Li Shufu. The money to buy Lafite is really nothing.

"Well, Professor Lu will never suffer a loss! I do n't value that dividend, it 's enough to give us priority in technology transfer!" Obviously he also got the sweetness from the new battery technology, "As for the sign Of course I want to go on a month trip, but I do n't know if this old bone can stand up! "

From the perspective of a businessman, traveling to the moon will inevitably be a big news. If you can squeeze into the first group of people, it will be of great benefit to the promotion of your company! So they refused to let this opportunity pass, and had made up their minds that they would have to grab the first batch of moon landings even at a higher cost.

If I can win a prize or auction to get the quota, it is naturally best. If I can't get it, I'll find someone who has already qualified to buy it. I can give them tens of millions of cash and send two more tickets to the moon. They have no reason not to transfer?

"Old Li!" Wang Chuanfu's words suddenly became cordial, "I have understood the truth for so many years in the meeting. Many times, if we suppress the unhealthy internal competition and unify the outside world, you will reap higher profits! You are Don't you have this idea? "

"Why not? At that time, iron ore was caught by foreign companies. The competition of internal iron and steel companies in China severely slaughtered us! And rare earth mines under the operation of Liu Dong applauded those ore suppliers. Between! "Li Shufu said, of course, their new battery federation did not take advantage of foreign companies.

"So you see, since we all want to take Lafite Castle, if no one would let go, the cheapest one would be the Rothschild family!" Wang Chuanfu said his purpose, "then I thought it might be better We unite and take down this winery as a welfare industry in the club! We each have a share, better than snatching it? "

"Haha! Now James Rothschild is about to cry!" More than half of the people who came to this auction are Chinese, I am afraid there will be no unity between them. Too many Chinese do not give face! Since then, Rothschild would be impossible to shoot a high price!

Sure enough, in the second day of the auction, the rich Chinese people saw that they were holding cards together, and cancelled their plans to participate in the auction; while the rich people in Europe and the United States had just been ransacked, and they did n't have much money. Use it here! So they finally got this first-class winery at a very low price.

Of course, they came to Europe not just to buy wine. In addition, many companies with high technological content suffered a huge blow in this war. Hua Guo happened to be able to buy at a low price, thus gaining countless cravings Long-term technology! Despite the obstruction of governments, they did not achieve all their goals! But now these benefits are enough to satisfy the Chinese businessmen!

This is a grand looting that has been accumulated over the past 100 years in the Western world. Many wise Westerners began to realize that after this supplement, the Chinese people's technological level began to truly surpass the West! And they have no way to do this, they can only watch as they are caught up by, overtaken by Hua Guo, and then far away!

Do you really want to live in a world dominated by Chinese people in the future? what should we do?

#### Chapter 719 - Lunar trip

“Hello, your data review has been passed! You only need to pay a deposit of 2 million US dollars to enter the ranking process! Now there are a total of 187 people in front of you, it is expected that you will be in September to November next year. It ’s on the moon! “Said the customer service staff of the Space Travel Management Committee, a subsidiary of Xihe, who said politely on the phone.

“Hey, why does \*\*\*\* only need to pay a deposit of 2 million yuan, but I have to pay 2 million US dollars?” The well-known star of the entertainment industry asked indignantly.

“According to the information, you have joined Canadian citizenship ten years ago! And that gentleman is a Chinese citizenship! I believe you have read our charge description! The prices for nationals and foreign friends are different! So Your travel expenses are higher than that of the gentleman! “The customer service staff still explained gently.

“Why!” The star gave his agent a fierce glance, “Why do two prices appear for the same trip? You are an infringement of consumer rights!” Only double the price to reach the moon, he felt uncomfortable for a while.

“First of all, the Xihe plan was completed with taxes from Chinese nationals! In other words, Chinese nationals made a monthly contribution to the construction of the lunar base, and they should and must enjoy preferential treatment! Second, expatriates on the moon will It will increase the intensity of our work ... “Customer service has not stated clearly, but everyone must understand that aerospace is a highly sensitive area. Putting domestic people up and foreigners up, the treatment is definitely different!

“Okay, I will hit the deposit on your account on time!” The celebrity replied depressively, hung up the phone and started scolding his agent, “I blame you, I changed you at first Now that you have Canadian citizenship, look! This is the result! “

“You don’t have to worry, we don’t have to deal with them in the future?” The agent replied sweatingly. He knew that his encouragement would cause hundreds of millions of yuan in losses.

“Do you really understand it or not?” This savvy star has realized that this is a bad sign. “In the past few years, our country needs to attract foreign investment, so we provide a lot of foreigners or foreigners. Secretly preferential treatment! In addition, foreign countries are indeed more developed than us, so there will be so many people choose to join the nationality of foreign countries! But now China is vaguely showing signs of becoming the world ’s top power! It will be gradually cancelled.

This kind of preferential treatment? The trip to the moon is just the beginning! I believe there will be more inequalities in front of us in the future! “

“It’s easy to join Canadian citizenship! You just need to throw money! But, tell me what you want to do if you want to change back to Chinese citizenship! Can you change it back for me!” He finally couldn’t help but yell and yell, everyone knows Chinese nationality is one of the most difficult nationalities to obtain in the world. When he thinks of his second half of life and his children to continue to live with Canadian nationality, he feels very worried.

At the same time, rich people from other countries in the world who are interested in lunar travel have also protested the discrimination against foreign consumers of the Chinese national team, but the Space Travel Management Committee is completely unimpressed! It is still to give them a few reasons to pass them on, you love come or not, anyway, we are almost ready to receive people who are queuing now! If you do n’t like us, you can go elsewhere!

Um, I am embarrassed, it seems that I have forgotten the family who can do lunar trips now! But it doesn’t matter, can you continue to wait! Maybe that day Nasa and the European Space Agency have made a similar project!

In desperation, they had to hold their noses to accept the harsh terms of the Space Travel Management Committee, paid several times the deposit of the Chinese and began to line up, and during this period they tried to listen to Zhou Tianwang’s album to practice listening and exercise! Prepare for the final assessment! There is Cameron, the director of the “Three Body” series, who was an explorer who crossed the Mariana Trench and was interested in traveling to the moon! It is said that he is still thinking about continuing to work with Lu Qiujian to shoot a new film on the moon!

After several months of preparation, the first batch of selected winners came to the China Launch Center together with other lucky people who had paid a lot of money to prepare for the moon landing trip.

“The thought of leaving the earth soon! It’s really exciting!” He Chushi, who became the first group of lunar tourists through the lottery, said excitedly while sitting in the capsule.

“Husband, I now feel that I am the happiest woman in the world!” Who else can choose his honeymoon location on the moon?

The other Li Shufu and Cameron were all excited and unable to add, or Yi Meng came out to say a few words before appeasing their excitement.

The rocket was successfully launched, gradually getting out of gravity and entering space. They quickly took out their mobile phones, tablets, cameras and other equipment for a while. These pictures were quickly passed back to the earth through a special line on the platform of the neck. Aroused the envy of countless people.

After a long flight, the spacecraft finally landed at the landing site near the base of Guanghan Palace. With the help of ground staff and Yi Meng, these tourists stepped out of the capsule and entered the moon base!

“Okay You can take off the spacesuit when you are inside the base! We have prepared all the food made from the raw materials produced by the moon base. Please fill your stomach before proceeding to the next round of activities. Let’s guide them to the restaurant. “We prepared dumplings made of wheat grown on the moon and pork raised on the moon base. There are moon strawberries after the meal ... yeah, The wireless network password of the base is, you can go to the circle of friends to print pictures! “

The last sentence aroused the unanimous praise of He Chushi and others! This service is simply too intimate. What’s the point of not being able to immediately show up in the circle of friends when traveling?

So when the food was served, the flash in the cafeteria turned on; after a network delay of 2.67 seconds, these fresh and hot food maps once again caused all kinds of envy and jealousy.

Just as these people were having fun on the moon, an official representative from France also came to Zhongbeihai to negotiate with Qin Feng, who wanted to bring the controllable nuclear fusion power plant back to France!

After several rounds of repetition, fierce bargaining and concessions, and fierce internal debates, the governments of China and France finally reached a consensus on matters related to controllable fusion power plants.

Chapter 720 - Repay others with one's way

“... Let’s take a look at the last and most important clause!” The negotiator of China slowly opened the thick stack of documents in front of him. “These clauses must be accepted by you, I No changes will be made! “

“First, the site selection of the nuclear fusion power station must be approved by us! Second, the design and construction of the power station must be completed by us! Third, most of the raw

materials of the power station must be imported from China. These materials include but are not limited to steel , Coils, paint .... Ninth, after the completion of the power station, all key departments must be responsible by Chinese people! The personnel arrangements of the power station must be approved by us! ... Thirteenth, all operations must be When our personnel are present, all parameters must also be controlled by our personnel; fourteenth, maintenance components must only be purchased from our designated products ... 27th, our staff is in France In the event of a legal dispute, your handling method must be approved by us ... 39th, you must ensure that the power produced by the power station is used for civil purposes only, not for military use. Found that we have the right to stop production immediately ... Forty-seventh, you must not disclose all information about the nuclear fusion power station to any third party ... Sixty-seventh, your government must stop Asylum for the following organizations and individuals, this name The list includes but is not limited to ... 74th, your government must sever military cooperation with the following areas ... “The negotiators read page by page, the more the French representative looked It’s getting darker.

In the end, the document did not end until Article 250. After listening, the French negotiators said ironically, “This is the first time I have participated in such harsh negotiations!”

“Such negotiations have gone through too much in our history!” The Chinese negotiators said with emotion, “The technical blockade of the Paris Coordinating Committee on our country has almost run through the entire history of our country since its establishment! This has filled our technological development. It ’s hard, but from now on, we seem to be grateful to this committee. It is their persecution that forced us to become self-reliant and accumulate today ’s technology step by step! ”

French negotiators are speechless, let ’s see what kind of monster you have blocked! Countless companies in Europe and the United States have lost the huge market of China, resulting in insufficient funds for the development of new technologies, thus losing the opportunity to grow and develop! However, with its decades of hard work, Huaguo has caught up step by step, and with their strong production capacity, they have made any field they enter into cabbage prices! Those fragile western companies were defeated by them. This is the result of the Paris Coordination Committee and the Wassenaar Agreement.

“You can not accept these terms! We can also terminate this negotiation! Maybe it won’t take long for you to develop your own fusion technology!” Another negotiator from Huaguo shrugged indifferently. Now this technology This is the only one in the world, there is no semicolon, you love to buy it or not!

“Can’t the terms be changed again? We feel that some of these terms conflict with our country’s laws, such as the first ...” The French negotiators also wanted to save some face.

“These are non-negotiable! You can only choose to accept or not!” Before he finished, the negotiators in China did not hesitate to interrupt him; now French environmentalists are talking about nuclear fission power plants. The protests are becoming more and more fierce. They refuse to give up the protests and refuse to give up electricity, which is very difficult for the French government! And the high-end technology of using power generation has not yet become a reality, and the pollution-free nuclear fusion power station has become the only choice of the French government.

“It’s really ... really ...” French negotiators were excited to commit high blood pressure, trembling and not even speaking clearly. Such a clause was only for the part they imposed on others. Son, I did n’t expect it to be my weak side now! This feeling is really suffocating 1

You feel suffocated! That’s how we walked back in those days. We endured the anger in our hearts, turned these anger and humiliation into motivation, and struggled day and night in the laboratory. Only then did we have the situation today! You want to take away our achievements easily, how can it be so easy!

“Mr. Le Pen! You see, these things are not the first time, and will continue to happen in the future! Since the United States has accepted our request in the rocket shaker technology before! Why can’t you compare the rocket shaker technology? How important is the concession at the nuclear power station, which is countless times? “Seeing that the atmosphere was a little tense, another Chinese negotiator came out to round the field.

The case he said happened seven years ago! The rocket must withstand the vibration table to simulate the vibration of various frequencies before launching into the sky, so the large vibration table is an essential tool for rocket detection.

Many years ago, the United States banned the export of vibrating tables of more than nine tons to Huaguo, but the fact is that Huaguo developed vibrating tables of more than 20 tons as early as possible, and later it captured 50 tons and 70. Tons of difficulties!

In 2013, the US had to buy a 50-ton shaker from Hua Guo. Because Rice can’t make it by itself, Lucia uses a 20-ton shaker made by Hua Guo , so it can only be purchased from Hua Guo. In addition, when purchasing, Mifang must sign a series of mandatory documents as it is now. Except that military hard bars are not allowed, all operations must be performed while Chinese personnel are present. Maintenance components must also be purchased only from the products formulated by the Chinese side. The representative of Mifang said ironically, “This is the first time I have signed the buyer’s position.”

In the end, the French delegation accepted these terms as helplessly as the delegation of the United States. Who made them unable to realize the urgent need for this technology now?

“I think the media must regard me as Charles-Enzier in the carriage of the Compiegne Forest in 1940?” The head of the French delegation said helplessly when he signed.

In 1940, General Shire-Nzige signed a truce agreement with Germany in a carriage in the forest of Redon de Compiegne, and gave half of the French arch to Germany! These harsh terms have been criticized by the French!

The head of the French delegation realized at the time of signing what kind of blame he would greet after returning home, but he had no choice at all! At that time, France could still use the help of the Allies to be ashamed five years later, but now? Does the French still have the strength to put these inequalities back on the Chinese? I’m afraid the most optimistic people in the delegation don’t believe it?
