Chapter 82 - Will you participate in the draft

“Because Princeton’s math is stronger than Harvard, it is the world’s first, and there are world-leading mathematicians such as Professor Wyeth, Professor Gals, Professor Thurston, etc. If you want to study mathematics, there is no comparison in China. There is a better place in Beijing Normal University, and you can’t find a better place in the world than Princeton! “, Lu Qiujian did not forget to exaggerate his alma mater,” As for the difference in education between the two countries, this problem is too big. And I only stayed in Princeton for more than half a year, which is not suitable for an in-depth evaluation; I only elaborate on the fact that the majority of the students around me in Princeton are from middle-class families, and Beijing Normal University can still see many families. Poor students, of course, the proportion of these students is declining year by year, but it is always higher than the data of Princeton! “

“Oh? Did you say that the education model of Huaguo is easier for the young people to come forward?”, This was the first time I heard this opinion when I interviewed other overseas students who always praised the free educational atmosphere abroad and emphasized quality education. Ah, Zhou Wei couldn’t help asking.

“I just elaborate on a piece of data that I have learned. As for the social significance hidden behind the data, I will not comment on it. After all, I am only a mathematics student and not a sociologist!”, Lu Qiujian pushed the topic off .

How can you keep your hands young like those old foxes? Zhou Wei smiled reluctantly and then asked, “I heard that you like playing basketball in your spare time, and you joined the Princeton school team. Why do you like basketball?”

“I need a good body to study better. It happened that my roommate was from the school basketball team, so I also played with him!” Lu Qiujian certainly would not relieve himself by using sports to relieve him. Say the headache.

“Did you ever think about what kind of achievements will be achieved in this year’s NCAA?” Feng Hongqi finally found the century of interjection and quickly asked what he was most concerned about.

“From the current record, entering the March Championship is sure!”, The University of Pennsylvania, the most threatening Princeton in the Ivy League, has now fallen behind them by two wins, even if they can beat Princeton in the next game. They have lost consecutively, and it is

almost impossible. It can be said that Princeton has basically locked the Ivy League champion. “As far as the championship can go, I can only say that I will try my best to play every game!”

“According to data from the NBA Draft Forecast website-Nba-Draft, if you participate in the draft this year, you will definitely be in the top five! Will you participate in the draft this year?” Feng Hongqi just asked, Li Xiao and Zhou Wei They also raised their ears. They are not very clear about how powerful the mathematicians are, but how much sensation the Chinese enter into the NBA will have a look at Yao Ming.

“It’s still in the regular season, and it’s a little too early to say that this topic hasn’t been finished. Let’s consider this issue after all the games are over!”

“Then do you want to be a mathematician or a basketball star in the future?” Li Xiao couldn’t help asking.

“Now I can study mathematics while playing basketball. At least at the present stage, there is no conflict between the two. As for the future, who can say clearly, the future is more anticipated because of uncertainty!”, Hey, Whether you are math or basketball is not my goal!

It seems that he thought this interview too simple, and asked a few questions. Li Xiao and Zhou Wei found that Lu Qiujian was completely different from the image of the mathematician they had imagined before, not only a little depressed.

“It’s almost time, why don’t we go for a meal together!” The professional qualities of the three reporters were pretty good. At least they didn’t ask anything about the mentally retarded and nasty, so Lu Qiujian sent an invitation .

Of course, the three of them would not refuse this opportunity to improve their relationship with Lu Qiujian. A group of people came to the restaurant where Professor Nan invited the guests last time and ate and drank lively. Under Lu Qiujian ’s speech offensive, the three of them Soon he and Lu Qiujian became brothers and sisters until they became a bit drunk, and then they went back to each other.

This way, the evaluation of yourself in the media might be more positive? Now they can only spread their fame to the country through them, which can be regarded as helping them to prestige. To complete their own plans, in addition to professional knowledge, there is no great reputation without influential!

In the next few days, Li Xiao and Zhou Wei and Feng Hongqi teamed up to interview Lu Qiuqian's daily life. Morning exercises, noon and afternoon class studies, daily exercises after class, and even back to the dormitory in the evening Did not let go of the study. In addition to the fact that they could not enter the classroom during the class to make them feel a little sorry, others were very satisfied; even coach Thompson gave Lu Qiuqian a face and allowed them to visit the training of the Princeton Tigers, which made Feng Hongqi overjoyed Out of consideration for prestige, Lv Qiuqian also introduced them to contact a group of super bulls such as Professor Wyeth, Professor Nan, and Professor Gauls. These people naturally praised Lv Qiuqian. The three of them have also done a solid job recently, and they have a clear understanding of the status of these people in academia. This is even more powerful than the academicians of the Chinese Academy of Sciences!

A young man from China, through his own efforts and talents, has achieved world-renowned results and won the unanimous affirmation of the world's best mathematicians. This is the news that audiences and readers like to see!

Before coming, Li Xiao thought about the most short news. Now it seems that the accumulated material and the influence of this news are enough to make a special report. With so many news points, I think the leaders will agree. ?

The same is true for Zhou Wei. Originally, only the first half of the report was planned. Now it seems that it is enough to make a series of reports for serialization. If you maintain a good relationship with him, let yourself be his counterpart reporter. The salary is not a problem at all!

And Feng Hongqi thought that the football reporters always said that Socrates not only played the ball well, but also had a Ph.D. Now it seems that Lu Qiuqian is a bit worse than his achievements! After going back, you can have a good blow.

A few days passed quickly. Before leaving, the three of them handed over gifts one after another. Seeing Lu Qiuqian's resignation, he said hurriedly, "It's almost New Year's Eve, it's time to pray for an early year, but don't quit!"

Lv Qiuqian thanked him while receiving the gift, and when they left, they looked at the slowly falling sky of snowflakes. Hey, it was time for New Year's Eve.
