

D. School 87

Chapter 87 - champion

“Later I met Herman-Weir at the Princeton Institute for Advanced Studies. He is one of the few experts in the world who is proficient in both number theory and quantum physics. He welcomed me to the Princeton Institute for Advanced Studies and hoped that I would become a A bird. He was disappointed, I have always been a stubborn frog ... Waier left Princeton thick, Yang Zhenning came from Chicago to Princeton, and succeeded him as another leading bird, Yang Mills regulated field Theory provides a model framework for all known particles and their interactions ... Wyeth is also a frog ... “Dyson does n’t feel that he has commented on many technologies in the twentieth century. Mathematicians and physicists who have written heavy pens in history.

“Okay, you can give a speech on this topic! But don’t you think it’s time to eat now?” Witten patted his stomach. Dyson spoke too long. He was a bit hungry. Living.

“Good idea! I’ll think about it!” Dyson nodded and ended the speech. He stood up and led everyone towards the dining table. When he was almost by the chair, he turned to pat Lu Qiujian. Shoulder, “Now there are many frogs in the scientific community, but there are few birds. I hope you can be a bird and find new swamps for these frogs, instead of only seeing yourself around like frogs Scenery! You are still very young now, it is entirely possible! “

Witten and Thurston also heard Dyson ’s commendation for Lv Qiujian, and they also gave him an encouraging look. Professor Nan also said softly in his ear in Chinese, “In addition to a few people such as Yang Zhenning, Most Chinese scientists can only be frogs in Dyson ’s mouth, and I hope you can become a bird. “

Is really Alexander! But to complete your plan, it is really not enough to be a frog! This is not only their expectations, but also their own goals. Lu Qiujian replied with a smile, “Thank you for your encouragement, I think I will try to work hard! I hope I can get your help in the future!”

“Of course, we have received the help of countless predecessors in our academic career. Naturally, we will also provide you with the ability to help your talents with outstanding talents, let you take a few detours!”, Dyson seems to have misunderstood his meaning. “You will return to China in a few months. After graduation, you want to go back here or go to other places in the United States. Despite the opening, I think we have some face, but I think there is nothing more suitable for you here. Place 1 “

“I think that as long as he submits the application, Shirley will definitely approve it in the first place! It won’t need your help at all!” Witten made a joke, but any university in the mathematics department will not refuse to solve it. The man who Poincaré guessed?

“Thank you, Mr. Dyson, if I have a definite plan for my future before graduation, I will send you an email!” Although I am unlikely to continue to come to the United States, Dyson’s influence is not limited to the United States. In one place, if you have his recommendation letter and your own achievements, you can say that any famous school in the world can go!

Dyson nodded to answer this matter, and then greeted the waiter to start serving. While waving their knives and forks to divide the tender steaks, everyone said some new interesting things in the mathematical world, even with Lu Qiuqian. Rarely seen.

After all, Dyson and others were older. After eating, they went back to rest. Lu Qiuqian and Professor Nan slowly walked back together, and we can see that Professor Nan is very interested today and kept encouraging. With Lu Qiuqian, he finally said with emotion, “I have been away from home for so long, and I want to go back! Now there are more and more talented young people in China. If I go back to teach, will I not be lonely?”

“Oh? Are you planning to return to China?” Lu Qiuqian is very supportive of his decision. His future plans must be completed in the country, so the stronger the domestic scientist, the happier he is. Professor Nan can be in the Princeton Mathematics Department As a professor, it proves that he is already one of the top people in the world of mathematics. If he goes back, he will certainly be able to provide more help to himself. “Just go to our Beijing Normal University! Presumably Professor Zhang will also welcome you Yes, shall I call him? “

“Oh, I don’t need you to worry, I don’t have no foundation in China!” Professor Nan said proudly, and his classmates have now become the backbone of major schools, and I want to go back to use Lu Qiuqian help? Even if you do n’t contact those classmates, which school does not welcome you by virtue of your status as a professor in the Princeton Department of Mathematics? Perhaps I feel that my words were a little tough, and Professor Nan explained again, “I am also in contact with Professor Zhang. If you go to speak, I am afraid he might think I was out of sight?”

“Oh, then I will be waiting for you at Peking University!”, Lu Qiuqian scratched his head embarrassedly.

After a week of rest, the game restarted. Neither Cornell nor Columbia could cause any trouble for Princeton, but the University of Penn also chased it very closely After that, if they can beat Princeton in the final game, there is still a chance to qualify.

However, after more than ten matches in Princeton today, the cooperation between players has become more and more tacit, and what is more rare is that they have more and more confidence in victory. It is not an easy thing for Penn to want to beat them.

“Think about how we were blocked from the championship last year? Was it the last game defeated by Penn? Did you plan to repeat this tragedy this year?” Coach Thompson roared in the locker room to inspire their fighting spirit .

“No! We will double the humiliation last year to them!”, Patrice responded loudly.

After the game started, these players did not disappoint coach Thompson. At the beginning, they regained the upper hand with their brave fighting spirit. Under Lu Qiujian’s tandem, their offense was like Mercury. Jian, it will be easily broken, if you hit him, he will always find Kongdang to send wonderful assists.

When the game reached thirty-two minutes, even the most optimistic Penn players would not think that they still had the chance to win, and the opposing coaches began to replace their main players and announced their surrender.

As the final whistle sounded, the players on Princeton’s bench immediately rushed into the field frantically. After many years, they became the champion of the Ivy League again!
