

## Daily Life 2141

### Chapter 2141 The False And Real World (1/86)

If someone else had said this, Shouchong would have thought that this person was most likely suffering from some sort of hysteria. No matter how bold his thoughts were, he wouldn't have come up with such an outrageous deduction.

But if this person was Wang Ming, the situation would be quite different. This man had the help of the divine brain, and was already on a completely different level.

Perhaps he could really see things that outsiders couldn't see.

"So, what evidence do you have?" Shouchong asked.

"I see a layer of gray fog wrapped around the world of the itinerant immortal child's Dharma Ring."

"But this is just a virtual game... how can there be a wall in the game..."

"I know."

Shouchong was astonished.

The wall of spirit consciousness was a real thing, equivalent to an array. It was set up with great care and secrecy, and had the effect of shielding the soul and twisting the will of the mind.

An external force could be used to destroy the basic components of the wall of spirit consciousness, but this wasn't a realistic choice and was equivalent to starting a war.

That was why Wang Ming had thought of a roundabout way, which was to use this wall-breaker operation to let the Mixiu nation's local cultivators, whose minds were being controlled, have a true self-understanding, which would then affect the equipment of the wall of spirit consciousness.

When more mixiu cultivators awakened their true minds, the wall of spirit consciousness would have to put in more power to suppress it, and when the core couldn't withstand it, it would naturally collapse directly from the inside.

No matter how sophisticated a cultivation scientific instrument was, without Wang Ling's Heavenly Dao great enlightenment spell, its load capacity was ultimately limited.

And the mixiu cultivators who had awakened their true minds were like walking high-memory-consuming software. As the software was opened more and more, its collapse was naturally only a hair's breadth away.

But now Wang Ming suspected that there was a wall of spirit consciousness in the game world of the itinerant immortal child's dharmic ring... In Shouchong's opinion, this was a little inconceivable

This was a game designed by Bai Qiao. As a game developer, how could there be a wall? !

People from the war sect had participated in the entire development phase.

If there was a wall... didn't this just happen to prove that there was a mole inside the war sect? ?

This wasn't right either..

This was the war sect.

Where the big shots gathered, it wasn't so easy to find a mole.

In this world, it was the least likely place to find a mole. One was the war sect, and the other was sixty.

Although the specifications were different, they were all places full of hidden dragons and Crouching Tigers.

"Who set up the wall?"

“It’s still unclear.”

Wang Ming frowned.

From his current judgment, the gray fog surrounding the itinerant immortal child’s Dharma Ring game world was extraordinary.

It was something similar to the wall of spirit consciousness, but its specifications far exceeded that of the wall itself.

There was no doubt about it.

This higher-level “Wall of spirit consciousness” was definitely not the work of anyone on Earth, and there was a high possibility that it was the work of that Qiao Yanyuan.

“Has it already begun... since the closed beta...”

Wang Ming quickly thought of a possibility.

He thought of the black screen incident that had suddenly appeared during the closed beta of the loose immortal child’s Dharmic ring.

It was a bug that even the authorities couldn’t properly explain, and Bai Qiao had also classified that incident as a code conflict error. After all, it was impossible to be completely bug-free in the programming process of game software, there might even be more bugs appearing at the same time after one was fixed..

But now, Wang Ming felt as if his mind had been enlightened and he had thought everything through.

After all, the loose immortal child Dharmic ring was built according to the rules of cultivation, and it was an abnormally strict cultivation world. It wasn’t impossible for Bai Zhe’s faction, Qiao Yanyuan’s faction, to start setting things up in the inner circle.

So in the vast world of the loose immortal child's Dharmic ring, it was among the players! A mole had already been planted!

"I didn't expect there to be such a way to invade Earth..."

When Shouchong thought of this, he was also so scared that his forehead was covered in sweat. He was shocked. "Then, what's their purpose?"

"On one hand, they're using this method to spy on Earth, and on the other hand, they want to use this method to hold the players trapped in the game world hostage," Wang Ming analyzed.

After all, Wang Ling was still on Earth.

Whether it was Bai Zhe in his moonlight dragon form or the self-proclaimed omniscient and omnipotent tomb God who had already inherited the outer god Orthodoxy, neither of them could spy on earth from the outside.

It could be said that the method used to infiltrate Earth from the game world was indeed quite creative.

But no matter how much they thought about it, they probably hadn't expected that even if that man, who was like a cheat, had entered the game world now and his primordial spirit had left his body, he would still be able to cheat in the game world..

"Ling Ling will break the gray fog."

Wang Ming said at this moment.

He had good reason to believe that Wang Ling had probably noticed the strange situation in the world of the itinerant immortal child's Dharma Ring a long time ago.

..

The world of the itinerant immortal child's Dharma Ring was shrouded in an unknown gray fog, and Wang Ling had already noticed it from the moment he had entered the game.

At first, he had thought that this was the setting of the map in the game, as if many games would give him a map range.

The seemingly boundless ocean actually had borders in the game world. When a player sailed an immortal boat to the border, they couldn't take another step forward.

But soon, Wang Ling sensed that something wasn't right.

Because this layer of black fog couldn't be transformed into data code in Wang Ling's eyes.

Yes, in the game world of the Loose Immortal Child Dharmic Ring, Wang Ling was actually forced into a debuff state. After all, this was the game world, and his king's eye couldn't be directly brought in.

Without the help of the king's eye, everything would be very troublesome.

But he couldn't use the king's eye.

That didn't mean that he couldn't summon other eyes.

In his God Eye Display Cabinet, there was a pair of eyes that were specifically used when the primordial spirit left the body or entered the virtual space.

Eye number 04: virtual and real primordial spirit magic eye. It was black and brown in color and looked no different from a normal human eye, but if you looked closely, you would see that there was a gear shape around the pupil.

Yes.

Even if Wang Ling couldn't use the king's eye at the moment,.

He could still use eye number 04 to analyze the illusion and reality of this game world.

The function of eye number 04 was very simple.

It was to see through all illusions.

After activating eye number 04's ability, Wang Ling saw that everything around him had turned into codes composed of various characters, as well as 0 and 1, even Lotus Sun and Old Huang.

When Eye Number 04 was activated, they had all turned into ice-cold code symbols.

The only thing that hadn't dissipated was the gray fog in the sky..

Logically speaking, it was impossible for a virtual game world to have real things that didn't belong to the code.

But the appearance of this layer of gray fog meant that the nature of the game had changed.

It affected the virtual world. Not only would it block the connection between the players in the game and the outside world, but it would also swallow the virtual world step by step, gradually assimilating it into reality.

In other words..

Not long after.

When the density of the gray fog increased a little more, all the players in the itinerant immortal child's Dharmic ring would become real people, and not just simple data.

In other words...

When a player died in the itinerant immortal child's Dharmic ring, it might directly affect the real world.

Wang Ling hadn't expected Bai Zhe and Qiao Yanyuan to be so creative.

They had thought of invading earth in this way.

And it was obvious that they had been plotting this for a long time.

But the only thing they had missed was that.

Wang Ling had also entered this world.

The role of the gray fog was to affect the players in the entire game world and make them real.

This also meant that Wang Ling himself would gradually become real.

He had already been tricked by the game, but in the end, Bai Zhe and Qiao Yanyuan had actually tried to strengthen him?

Wang Ling hadn't expected it.

There was actually such a good thing..

Chapter 2142 2,138, Gray Fog Erosion (1/86)

In the causality base, Shouchong still had doubts about the existence of this layer of gray fog and Bai Zhe's purpose.

"I don't know if there's a way to extract and analyze the substance of this layer of gray fog. It might be useful for our research," Shouchong said.

He did not know how Bai Zhe had managed to implant this layer of non-virtual gray fog into the virtual game world, nor did he know what the real face of this layer of gray fog was.

But with his rigorous understanding of modern cultivation science and his spirit of exploration, he still hoped to extract some of the gray fog and use it for component research.

He was very clear that this thing was very dangerous.

But he had a feeling that this layer of gray fog might be useful for Blackstone and the talisman seals that would follow.

“Is this the last battle?” Shouchong asked, his emotions very complicated,

the last battle he was talking about was the Battle of Destiny that Wang Ling had predicted, and it was unavoidable. All cultivators on Earth couldn’t ignore it.

This was the Battle of the fates of modern human cultivators, and it was precisely because of this that everyone had to work together to deal with the invasion from the outside world.

“It’s not clear whether this is the last battle, but whether we can win this battle completely depends on whether some of the leaders of the cultivation countries can let go of their own stubbornness and prejudice. “They should truly think for the sake of all human cultivators, and not rely on their own supremacy and focus on themselves so that no one else can become their imaginary enemy.”

Wang Ming said, “If this kind of paranoia-like stubbornness can not be changed in the end because of the selfishness of some of the leaders, even without this Battle of Destiny, modern human cultivators will ultimately be destroyed by their own hands.”

Wang Ming’s words could be said to be very heavy.

The entire karma base sank into silence and thought.

But it was indeed something worth thinking about.

“Let’s hope it can change for the better,” Shouchong sighed.

He wasn’t an optimist, but he felt that no matter how difficult it was, as long as everyone had the same goal, there was always a way to solve it.

Modern human cultivation civilization has not reached the level of high-level civilization, looking at the entire universe is as small as a drop in the ocean.

The existence of the eternal black stone is incredible enough.

There are also outer-god palaces, cosmic pupils, God's brain, as well as all kinds of eternal beings and unknown things. When Shouchong learned of these things, he did not know that modern scientific and cultivation civilizations, compared to the past, had it been an improvement or a setback.

Everything was indescribable and incomprehensible.

But no matter how incomprehensible it was, someone had to find the right path.

"Lingling will find a way."

Wang Ming's attitude was very clear.

He had trusted Wang Ling from the start.

And he could only trust Wang Ling.

He believed that director Wang wouldn't let him down.

Moreover, he was just like Shouchong; he was a little interested in the essence of the gray fog. This kind of mysterious object that could be created directly from the virtual game world without anyone knowing was very similar to a method only foreign gods had.

Wang Ming himself wasn't a cultivator and didn't know cultivation, but he had seen it many times, so he had his own guesses.

"Logically speaking, it should be impossible for Bai Zhe not to notice that Ling Zhenren is also in the game world."

Shouchong was suspicious. "This game isn't authenticated by real name?"

"That's right. But Ling Ling and Miss Rong aren't old enough after all, and there's a time limit, but in order to ensure that the wall-breaker's movements are accurate, the two of them used me and factor to register their real names."

”...”

When he heard this, Shouchong came to a sudden realization. He finally understood why Bai Zhe had dared to set up this layer of gray fog with such fanfare even though he knew that Wang Ling was also in the game world.

It turned out that he felt that there was no threat in this virtual world, which was why he had been so bold!

But in the end, God was better than man.

..

On the other side, when Wang Ling realized that the erosion of this faint layer of gray fog would materialize all the players in the game world of the itinerant fairy child's dharma ring,.

He had already started his own chess game in his heart; he was just an ordinary high school student.

He hadn't experienced much in the world, and had only casually saved the Earth a few times.

But even so, he knew that he had to take the initiative no matter what.

The Great Dao was impermanent, and the Heavenly Dao was reincarnated. The loser would eventually pick up the stone and throw it at his own feet.

To be honest, after a few rounds of sparring with Bai Zhe, Wang Ling found that Bai Zhe had indeed improved a lot and become more patient, he was no longer the boorish man who would charge forward once he gained strength, thinking that he was invincible in the world, and then get beaten up by Wang Ling in a fancy way.

He had now learned to test Bai Zhe, and the way he attacked was very novel, so he could be considered a pretty good opponent.

But sometimes, there was a relationship of restraint between the universes.

Wang Ling wasn't deliberately targeting Bai Zhe, but the principle that enemies had a narrow path was indeed very metaphysical at times.

It was a strange gray fog that could turn the virtual world into the real world.

This made Wang Ling think of his king's eye's "Eight-figure pupil technique."

It was the technique he had used before, "There are some and there are none, but the virtual and the real can be created together," which could turn reality into an illusion and turn the illusion into reality.

This ability was too terrifying, and Wang Ling had only used it a few times in total; the last time he had used it was in chapter 1520.

The reason why the essence of this gray fog was higher than the wall of spiritual awareness wasn't just because it could immerse a trapped player in the world and make them think that it was all just a game.

At the same time, it could turn virtual reality into reality; this was what was so terrifying about the erosion of the gray fog.

Wang Ling judged that this was most likely the tomb God's method; it was too similar to an external God.

Bai Zhefang had merely provided a space medium that could turn the gray fog into reality.

Since it was already confirmed that this was an item of an avatar, Wang Ling already knew what it was.

The gray fog was clearly not that thick at the moment. This was Bai Zhe's way of stalling for time, waiting for more players to come online and join the loose immortal child's magical ring in the game world.

Apart from cultivator mi xiu, who was in charge of coordinating the entry of the cloud into the game world, Heavenly Dao Cloud was also in charge.

The total number of players who had entered the closed beta without deleting files had already exceeded ten million.

In comparison to the entire modern cultivation world, this number of players might not be worth mentioning, but Bai Qiao had strictly screened these ten million players, and a considerable portion of them were the mainstays of the modern cultivation world.

If even these people were trapped, and irreversible damage occurred, it would inevitably affect the real world.

Wang Ling had considered such an impact, so it was impossible for him to let Bai Zhe's plan succeed.

But for now, in order to avoid alerting the enemy unnecessarily, he could only pretend that he was completely unaware and that he was addicted to the game world

In any case...

Stable development was definitely the top priority right now.

Chapter 2143 2,139, The Role Of The Director (1/86)

As a director, how to direct an excellent work depends on the creativity and content of the screenplay, and the actors' interpretation and interpretation of the script directly determine the upper limit of the work.

As an inexperienced and ordinary high school student, director Wang was not a director after all, he did not know the director, and he did not know how to choose actors.

Even the script had been arranged according to the current situation after a quick calculation.

Wang Ling only had a rough outline of the outcome of the final interpretation in his mind. In short, he was quite confident in himself.

Because although he didn't know much, he knew a little about everything.

On the other hand...

He knew Bai Zhe too well..

He had been exterminated several times by him, but not completely, and had survived by relying on a remnant of his will.

At the very best, Wang Ling could sense a tenacity in Bai Zhe.

As long as this guy's logical thinking was a little more normal, and he didn't think of doing evil everywhere, he might be a rare "Talent" in the history of human cultivators.

Now, they had already gone from fighting openly in the beginning to fighting each other behind the scenes.

Qiao Yanyuan was indeed very strong, but at best he was just a chess piece under the banner of Bai Zhe and the graveyard God Coalition army.

Wang Ling himself wasn't afraid. Bai Zhe had a lot of strange and talented people, but he also had talented people.

Moreover, a large part of them had been secretly nurtured by Wang Ling after he had chosen them.

For example, Qin Zong, Xiang Yi, Li Xian, Zhang Zicao... These visitors from the outside world and the eternal ones.

For a closer look, there were Odd Zhuo, grenade-throwing senior immortal, Immortal Toya, Cailian Zhenren, and Lightning Dharmaraja, all of whom he had met on the internet back then. Now, all of them had become core members of the battle sect.

Closer to them were Fang Xing, Super Chen, hero Guo, and so on... his classmates.

Although Super Chen and hero Guo's realms were low, they were in fact quite talented. Under his script, they had personally customized a mentor on the path of cultivation. When it came to the Battle of the fates., wang Ling felt that the two of them might be able to play their respective roles.

But now, in the world of the loose immortal child's Dharmic ring, Wang Ling's gaze was fixed on Lotus Sun once again.

To be honest, Wang Ling had actually intended to support Lotus Sun, but this was mixed with a feeling that he still didn't quite understand.

At first, Wang Ling had thought that it was an inescapable fate.

After the yin-yang Death Tribulation had happened, Wang Ling gradually accepted reality... and tacitly allowed Lotus Sun to know his true strength..

Now, Wang Ling consoled himself that the reason for everything was to "Repay the favor."

After all, Lotus Sun and Old Master Sun had been very good to him, at least when it came to crispy noodle snacks. It could be said that they had fulfilled all his fantasies about how to eat crispy noodle snacks.

As for Huaguo Water Curtain Group, in fact, it wasn't a pill group in Wang Ling's eyes.

In fact, it was more like a stable source of crispy noodle snacks.

..

After Wang Ling's operation, Floating Cloud Town's town rating had been upgraded from [ Ding Shang ] to [ Bing Xia ] .

It was inconceivable for a novice village town to be directly upgraded. Just as the previous analysis had said, there was no need for the novice village to make such an investment, the maintenance and upgrading of the town was a problem.

Unless there was a way to use the demon energy of the surrounding cave abodes as a labor force for resource extraction, this idea was only a theoretical possibility in the eyes of many players.

In the novice stage, who could single-handedly take on the power of the hundred-cave demon lord in the early stages of the demon spirit counting money?

No!

From the moment the itinerant fairy child's dharma ring was created in the game world, countless people had tried to accumulate strength in the novice stage in an attempt to directly take control of the novice village and the surrounding demon clan's cave abodes. In the end, they had all failed!

So Wang Ling's move was a record-breaking move!

The instant the system's world announcement was released, almost all of the game players were shaken; they couldn't believe that such a terrifying player actually existed in this world.

So was this person really a newcomer?

It couldn't be a newcomer, right?

If he was a newcomer, how could he be so skilled?

Perhaps some big shot player had opened an alternate account?

For a time, many people had different opinions.

In the entire world of loose immortal child's Dharmic ring, almost everyone's eyes were focused on the small novice village of floating cloud town.

At this moment, although Wang Ling was in Floating Cloud Town, he wasn't going anywhere.

The area on his map that had been lit up before was just a small spot around floating cloud town and the demon clan's cave abode around it.

Apart from that, the location of his loser hometown was also dark because the starting point of his script was floating cloud town, and he had never gone home before.

But he could see that there was a special home mark there.

And now.

Wang Ling saw that this dark map had been directly lit up, and the players from all over the world were like bright torches, approaching floating cloud town with curiosity and curiosity.

As the person in charge of floating cloud town's military power and a general, Wang Ling could directly see that his town had been locked down by many players.

They were coming from all over the world to explore and satisfy their curiosity, and even though Wang Ling wasn't going anywhere, his dark map was gradually lit up by all the major players.

When the players slowly broke through the dark areas, the visual impact was self-evident.

"It looks like a lot of people have noticed us; they're approaching Floating Cloud Town!" Old Huang was excited as well. He looked at the shared map that Lotus Sun had shown him and witnessed this shocking scene together.

At that moment, Lotus Sun's eyes were also red, and she was touched from the bottom of her heart. No matter what purpose these players had come for, at this moment, as they converged on floating cloud town.., made Lotus Sun feel the smoke and fire of this virtual world.

Especially when the players were marching toward a common goal and slowly lighting up the entire dark world, she seemed to see the cohesive force that came from the heart..

After wiping away the tears that couldn't help rolling due to her excitement, lotus sun quickly calmed down.

She knew that it wasn't time to celebrate yet.

Most of the players who had gathered here were curious and eager to explore.

And there would be no shortage of "Wolong" who wanted to defect to this place, as well as intruders with malicious intent toward floating cloud town..

One hand to capture talents.

The other to prevent intruders.

Both were the key at the moment.

Only children could make choices.

She wanted them all!

Chapter 2144 2,140 -- There Were More Than Three People (1/86)

In order to ensure that the wall-breaker operation could be carried out accurately, Wang Ming had planned to send Wang Ling and Lotus Sun into the game world of Loose Immortal Child's Dharmic ring to assist him.

He was the initiator and commander-in-chief of this plan, and President Qi had given him full authority, giving him a place to put his skills to use.

But in fact, although Wang Ming had already found Wang Ling and Lotus Sun to enter the game world, the higher-ups knew nothing about Wang Ming's use of people.

They had no way of knowing who Wang Ming had actually sent in.

Although they didn't suspect people and didn't use them, as long as they were prepared, it was an inherent strategy since Huaxiu's founding. Huaxiu cultivators would never hang themselves on a tree.

It was the right thing to do to prepare for a rainy day.

It wasn't that they didn't trust Wang Ming, but if anything happened to the "Ling Rong team," the higher-ups still hoped that there would be other teams to assist Mr. Hidden Fox.

That was the situation, so Wang Ming's team wasn't the only support team in the wall-breaker plan.

The highest-level decision-making unit in Huaxiu Alliance, which consisted of the ten generals as the main members, had practically used all their abilities to find the people they trusted and entered the world of the itinerant immortal child's Dharma Ring.

But they knew nothing about each other, and all of them thought that they were the only team supporting Mr. Hidden Fox.

Wang Ming wasn't completely ignorant of this move; he was the commander in chief, and he had the support of the divine brain.

This behind-the-scenes operation couldn't be hidden from him, but sometimes it was also very important to play dumb.

In Wang Ming's opinion, it was actually meaningless for the others to enter the game world since Wang Ling was already there. In addition, the ten generals had also prepared a support team... the names and faces..., Wang Ming was too familiar with them.

Wasn't this just looking for people from the war sect? !

Wang Ming didn't know whether to laugh or cry.

The ten generals probably didn't know who the boss behind the war sect was..

The boss was already in the game!

But since he had already come, Wang Ming naturally couldn't stop him; he just pretended that he didn't know.

It could only be said that the war sect's little friends were really busy. On one hand, they had to listen to the behind-the-scenes boss' command to investigate the clues leading to Bai Zhe's Tomb God Coalition army's Secret Invasion of Earth, and on the other hand, they had to listen to Huaxiu Alliance's orders to carry out the mission.

On one side was the boss, and on the other was a superior leader. Since neither side could be offended, it was very important whether they could learn the "Great doppelganger spell" or not.

It could be said that the "Great doppelganger spell" was a compulsory Heavenly Dao spell course for core members of war sect. Even if they couldn't directly create a real doppelganger with absolute wisdom like Wang Ling., and it wouldn't directly disintegrate because of external damage.

Under normal circumstances, it was still possible to copy and paste a copy of themselves.

Therefore, a large portion of core members of the war sect who participated in the game of the itinerant immortal child's Dharmic ring world used their doppelgangers to carry out missions instead of their main bodies.

In other words, even if they were trapped in the gray fog, they didn't have to worry about not being able to get out.

The mind of the doppelganger was controlled by the main body. At that time, as long as the doppelganger was removed, as long as the layer of gray fog had not materialized their doppelganger, the characters stuck in the game world would forcefully log off.

Of course, there were also people who were too lazy to use doppelgangers and directly used the main body to go up.

That was Qin Zong and Xiang Yi.

They had just completed their plan to secretly protect Wang Muyu when they received new orders.

Right now, the entire situation in the sea forbidden zone was in a state of anxiety. Since cracking the wall of spiritual sense had become their priority task, the two of them immediately decided to switch to the game world of the loose immortal child's magical ring.

The two of them were also very experienced. As children of planes who had come from other worlds, the two of them more or less had a certain degree of experience in analyzing the situation.

Since they felt that they couldn't fight, there was no need to continue wasting time.

Moreover, the fundamental reason they had stayed in the war sect was so that they could move around and learn more from Wang Ling.

Although Wang Ming hadn't told them about Wang Ling's participation in the Wall Breaker Plan, Qin Zong had his own way of judging it.

Before participating in the game, Qin Zong had prepared a six-sided die.

Three of the faces were drawn with a check, while the other three faces were marked with an X.

At that moment, Xiang Yi held his sniper rifle, as if he already knew what Qin Zong was going to do.

The corners of his mouth twitched. He felt that this was something he had often done when he was young in exams, when he encountered multiple choice questions or judgment questions that he didn't know how to do.

It wasn't certain if others could throw this, but when Qin Zong threw this, it was like throwing a freaking stone to ask for directions!

"Did Ling Zhenren participate in the wall breaker operation?"

After Qin Zong asked the first question, he rolled the dice, and the side facing up was a tick.

Then came the second question.

"Did Ling Zhenren participate with Miss Lotus Sun?"

Tick

“Is Ling Zhenren also invincible in the game?”

Tick

“Apart from Ling Zhenren, Miss Rong, me and Xiang Yi, is there anyone else participating in the wall breaker operation?”

” ... ”

“Are all the people involved in the battle sect?”

” ... ”

” ... ”

“I see...”

Seeing this, Qin Zong nodded slightly, feeling as if he had instantly understood everything.

” ... ”

The corners of Xiang Yi’s mouth twitched as he watched, and he silently ridiculed Qin Zong. He had never thought that Qin Zong would actually have this kind of operation.

Then, before entering the game, Qin Zong launched another round of throwing.

It was mainly to confirm which game class Wang Ling and Lotus Sun had chosen to ensure that Xiang Yi wouldn’t bump into them.

“So that’s how it is. Ling Zhenren chose trash, while Miss Rong chose ancient heavy armor cultivators,”Qin Zong said.

He directly eliminated these two classes and planned to choose from the remaining people.

Xiang Yi's goal was very clear, and he directly chose a mechanic.

As a sniper, the advantage of choosing the mechanic class was that it could directly lock onto the technology city. Although the coordinates of birth were different for every player, it was precisely because of the mechanism of binding the city.., that allowed many players to increase the probability of meeting each other.

After all, they were all in the same map, so the probability of meeting each other was much higher than the probability of meeting each other at random coordinates in the world.

But in reality, it wasn't that easy to operate.

The future city of the wandering immortal child's Dharma Ring World was the largest known map in the entire game world. It had an area of about 50,000 floating cloud towns. Although it was labeled as a town, it was like a small country.

At the same time, this was the only Class A novice village in the world of the wandering immortal child's dharma ring.

It was a modern mechanized world that could be conquered, but it was extremely difficult. The patrolling robots on the streets were all at the level of Hundred Cave Demon Lord, which made many novice players feel intimidated, they gave up on the idea of forming a team to cause trouble during the novice stage.

"I knew you would choose this. I have no choice. I'll go with you. I'll also choose a mechanic."

Qin Zong said.

He had guessed Xiang Yi's choice.

The two of them were not used to being partners in the beginning, but now they had a tacit understanding, which made Xiang Yi used to having such a magical koi by his side at all times.

“This map is very big. Even if we choose the same place, we might not be able to meet each other,” Xiang Yi said.

“It’s okay. After we go in, there will always be a way,” Qin Zong replied. He was always so confident.

Thus, after the two of them entered the game world together, a magical scene appeared.

Xiang Yi discovered that there was a newbie player who looked very similar to Qin Zong beside him. He had joined the game at the same time.

“Qin... Zong?” He called out tentatively.

Then, he saw this player looking back at him and revealing his signature smile, “It’s me.”

At that moment, Xiang Yi was almost petrified. He could not help but swear, “F \* ck! You can even bring your koi attributes directly into the virtual gaming world! Aren’t you just hacking in place? !”

Chapter 2145 2,141, Koi’s Game Style (1/86)

The Science and Technology City of the Dharma Circle world was filled with a sense of the future, and when Qin Zong and Xiang Yi appeared here as game characters, they also felt a sense of familiarity.

The base of this science and technology city was obviously modified from the mechanical city in the ring of nothingness, and Wang Ming had successfully received the blessing of the divine brain from that battle.

They stood in an unfamiliar neighborhood, surrounded by the faint smell of engine oil, and the eye-catching neon lights shone in the night. The degree of reduction was astonishing.

Although the base was in the machine city, Bai Qiao had obviously expanded and improved on that foundation. Just this kind of environment alone made it so that players could enter the game without operating anything, and could even treat it as a vacation.

But now, Qin Zong and Xiang Yi both knew that this was not the time to play.

Compared to the mechanical city's clearly divided slums and the heart of the city of the rich and powerful, the technology city of the loose immortals' circle was obviously more governed by law. There were mechanical eyes everywhere. This would prevent some players from obstructing the game world, and punish them in time.

The concentration of players in the mechanical city was the densest, and it was also the easiest to bump into other players' maps in the novice village. In order to prevent players from fighting each other for treasures, the mechanism of the mechanical eyes was created.

If there were any illegal activities within the technology city, the character's profile picture would be rated according to the illegal index.

The lowest one-star wanted, the highest five-star wanted.

Among them, the treatment of a five-star wanted was unimaginable. According to the game mechanism of the loose immortals' dharma ring, once a player reached a five-star wanted, the entire search area would be extended to places outside of the technology city.

The technology city would send a large number of robot-eye policemen to places outside of the technology city to search for the five-star wanted players. Moreover, it would be an all-round search by land, sea, and air.

Not only would the robot-eye policemen from the technology city be sent, but all the cities that were allied with the technology city would also send a certain number of people to participate in this encirclement.

In other words, players with a five-star bounty were truly wanted by the world of the wandering fairy. Other than hiding in a dangerous field map, there was almost no chance of survival.

Once they were caught, they would be executed on the spot, losing all their equipment and returning to the rebirth point.

The entire capture time would last for a full seven days. Under such a high-intensity intensive search, any player would be intimidated.

However, similarly, if any player could successfully survive these seven days, they would receive unimaginable bountiful rewards from the game world! There was also a random orange equipment that had three special effects: permanent binding, no drop from death, and no wear and tear!

“So, has anyone succeeded before?”

Looking at the mechanical eyes by the street, Xiang Yi felt that this was an almost impossible mission.

While he and Qin Zong were standing there, they had already seen dozens of mechanical eyes pass by them. It was too crowded..

Once they became the target of a five-star bounty, they would not even be able to escape from the technology city, let alone survive for seven days.

After all, if they really wanted to survive these seven days, they would have to first think of a way to escape and find a way to survive outside. If they were inside the technology city, with the density of these mechanical eyes, they would not be caught by you in a minute.

“As far as I know, no one has succeeded so far. But after all, the rewards are generous. There will always be people who seek death.” Qin Zong patted Xiang Yi on the shoulder and gestured for him to follow him.

He did not directly do the beginner’s quest because he felt that the reward from the beginner’s quest was completely unnecessary. It was purely a waste of time.

The Koi played the game like the Koi played.

“What are you going to do now?”

“I’m the support, and you’re the DPS. Since You’re the DPS, the most important thing now is to get you a weapon.” At this moment, Qin Zong, who was walking to a weapons shop, said as he looked through the bulletproof glass window at the dazzling array of guns inside.

Yes, he wanted to get Xiang Yi a sniper rifle in the game world.

“How is it? Do You Like It?”Qin Zong asked.

“These guns don’t look very smart.”

“Then let’s take a look again. There’s no need to rush.”

” ...”

Xiang Yi scratched his head, he smiled awkwardly, “But I still don’t understand. Even if I like it, you can’t afford it. I just looked at that kind of weapon shop. Even the worst sniper rifle costs 100,000 taels of silver. That’s not even counting the ammunition.”

“As long as I want to buy it, there’s always a way,”said Qin Zong. His face still had that harmless smile.

Xiang Yi had seen this kind of confidence too many times.

Although he had already seen how Lucky Qin Zong was.

But this was the game world. Even if his koi attribute could be brought into the game world, this was a novice village! How could a newborn novice carry more than 100,000 taels of silver with him? !

Qin Zong was already used to having doubts about himself. However, the reason why he could be so calm was naturally because he had his own connections.

This was the experience that Qin Zong had gained from being a koi for so many years.

When he passed by a weapons store, Qin Zong discovered that this weapons store actually had an activity to test the precision of firearms. This was originally a method used by the owner to attract customers in order to attract business, however, Qin Zong discovered a glimmer of business opportunity on this basis.

He hurriedly pulled Xiang Yi over.

Xiang Yi still didn't understand what Qin Zong was going to do when he heard Qin Zong take a step forward and volunteer to say to the owner, "Boss, is your gun accurate?"

"The accuracy is all adjusted, what do you think?" The owner revealed a disdainful look.

"How about this, I'll be your target. If you miss, give me a gun."

"You want to be a live target?" The boss laughed, "Fine! Just the gun on the counter, if you can dodge it, I'll give you one for free!"

Who would have thought that the boss would agree to it directly.

Xiang Yi was stunned by the high degree of freedom in the game world of the wandering fairy child dharma ring. Such a conversation should not happen, but Qin Zong's request was actually agreed to by the boss as an NPC.

In fact, this was also the owner's own judgment.

After all, Qin Zong's level was not high, and his goal was only to attract business. Therefore, it did not conflict with his goal. Moreover, if he really shot Qin Zong, Qin Zong would definitely die and be resurrected at the Rebirth Point.

He did not suffer any losses.

For A Level 1 player, even if his gun only grazed a little, it would be fatal.

However, Qin Zong was not afraid at all.

He walked straight into the shooting range of this weapon shop and stood at a ten-meter target position.

The Smile of the owner of this weapon shop became even more rampant. "Everyone! Since this little brother has volunteered to be a target, I naturally have no reason to reject his request! Everyone, take a good look at how accurate my weapon is!"

As he spoke, he took out the sniper rifle in front of him and aimed it at Qin Zong.

It was only a distance of ten meters! There was no need for a magnifying glass at all. It was really too difficult to miss this position!

However, the corner of Xiang Yi's mouth was already twitching.

Because based on his previous behavior, he seemed to have already guessed something.

Bang!

A clear gunshot rang out. A 12.7 mm sniper rifle bullet shot out from the muzzle, emitting blue flames.

Qin Zong crossed his arms and stood firmly on the spot.

In the end, the sniper rifle's bullet accurately landed below Qin Zong's earlobe, leaving a hole in the wall of the weapons store..

Chapter 2146 2,142, Infinite Defense (1/86)

Ever since Qin Zong had gotten used to his koi attribute, he had been developing it based on his luck. Bullets were ineffective against Qin Zong. If he hadn't been suppressed by luck., the trajectory of the bullet would deviate from its trajectory once it got close to him.

The people who shot at him would also be known as the "Master of human body drawing".

Qin Zong had used the mechanism to run through many large and small wars in the universe. During the war, he was unarmed and did not wear any protective gear. He directly rushed to the front.

People thought that he was here to die, but who knew that this was the strongest meat shield that was extremely lucky. He directly rushed to the front and changed the trajectory of all the bullets aimed at him.

Would the precision-guided nuclear bomb work on Qin Zong?

Such a large-scale weapon of mass destruction was useless even if it missed. The shock wave from the nuclear warhead was very strong, and there was also a strong radiation.

Even if it did not fall on the top of the head, it would vaporize if it was a little closer.

But when it met Qin Zong, even the precision-guided weapon would fail.

Perhaps everyone had the same experience. When they were playing football, they would occasionally kick the football high, but when the football fell, it would still hit their head.

Therefore, even if it was a nuclear warhead, they would be helpless when it came to Qin Zong.

Those who tried to use a nuclear bomb on Qin Zong in the past had all made “Mistakes” with very low probability after the nuclear bomb was shot out and landed in their own base.

In the weapons shop of the science and Technology City, the boss opened his mouth wide, and the people around him were also stupefied. No one had expected such a close distance.

The boss could actually miss with a sniper rifle..

The barrel of the sniper rifle was nearly two meters long..

In other words, the actual shooting range was less than ten meters.

In the end, this bullet was close to Qin Zong’s earlobe.

“Boss, do you mean what you said?” Qin Zong looked at the boss calmly and said.

“Impossible! Absolutely Impossible!” The boss didn’t believe it. “Let’s do it again! Do you dare? As long as I don’t hit it, you can choose a weapon! But if I hit it, you can’t take any of it away!”

Qin Zong’s original purpose was to give Xiang Yi an initial weapon, but apparently, the boss of the weapons shop was completely obsessed with it.

Normal people knew that the owner of the weapon shop was trying to renege on his promise. However, Qin Zong immediately laughed when he heard that. At the same time, his eyes were shining brightly.

—— there was actually such a good thing!

The key point was that after the first bullet, more and more people gathered around the weapon shop. There were npcs and many other players. Everyone was attracted by this strange bet.

Only Xiang Yi's mouth twitched as he watched. He covered his face and smiled bitterly. He had a helpless expression on his face.

He had to give in to Qin Zong. He really respected him!

The koi carp really could do whatever it wanted!

Therefore, half an hour later, Qin Zong robbed the entire weapon shop according to the bet with the boss

The wall of the weapon shop was riddled with holes by the boss. In the end, not a single bullet hit.

With so many weapons on him, there was no space in his backpack.

Therefore, Qin Zong had to negotiate with the boss, "How about this, Boss? I only want this sniper rifle. As for the rest of the weapons, you can spend some money to recycle my weapons."

"..."the boss wanted to cry but had no tears.

As the boss of the weapon shop, he was actually reduced to the point where he had to recycle his own weapons.

In the end, Qin Zong and Xiang Yi, the duo, received a total of two million taels of silver and a blue-quality sniper rifle at the start of the game in the technology city.

This was the best sniper rifle they could find in this weapons shop at the moment. Overall, it was enough for Xiang Yi to use for a while.

In any case, this was only a weapon that was overused in the early stages. The blue-quality was already very good.

Xiang Yi smiled bitterly. “I didn’t expect that even though we didn’t complete any beginner missions, the starting capital was actually two million. How Do I plan to use this money?”

Yes, Xiang Yi had already called Qin Zong brother, so he directly changed the title... Qin Zong was older than him to begin with, and with this series of operations, Xiang Yi couldn’t help but admire him.

No Wonder Qin Zong had always refused his request to spar with him..

It wasn’t that he didn’t want to fight with him, but that he was giving him a way out.

It wasn’t that he couldn’t beat Qin Zong, it was that he might not be able to hit Qin Zong at all!

Moreover, to deal with Qin Zong, it was obviously unrealistic to use the nine Suns godly sword to snipe him from a distance. If it was a close-range fight, he might still have a chance to agree..

However, after seeing Qin Zong’s wave of lucky maneuvers, Xiang Yi felt that he had given up on resisting. He had completely given up on the idea of sparring with Qin Zong.

However, just as Xiang Yi had analyzed, the two newbie players, who had not even completed their newbie quests, immediately received a blue-quality sniper rifle and 2,000,000 silver coins at the start.

With a huge sum of money on them, and their own levels were not high enough, it was very easy for them to be targeted directly.

When they walked out of the weapons store, Qin Zong and Xiang Yi felt that many players had already focused their attention on them. Although the public areas in the technology city were safe enough, there were also blind spots.

For example, the interior of some buildings were not within the range of the robot-eyed police. As long as they walked in, it was very likely that they would be targeted by some players who wanted to rob them.

Unless they spent their entire lives in the public area and received the protection of the robot-eyed police, once they lost the protection of the robot-eyed police, they would be in danger of being robbed at all times.

Many people thought that they were targeting two fat sheep, but in fact, this was also within Qin Zong's expectations.

Everyone understood the principle of a tall tree attracting the wind.

He chose to trade with the boss in the weapons shop and let the boss "Cheaply" retrieve the weapons that he won. He was fighting to make some players with evil intentions target his own purposes.

Xiang Yi and Qin Zong also joined forces for a while. At this time, the two of them almost had the same tacit understanding. Xiang Yi cooperated with Qin Zong the entire time, knowing that it might be very dangerous if there were no mechanical eyes around, still followed Qin Zong into a building.

Soon, they were spotted by a group of players who thought they had an opportunity to follow the two men into the building and switch weapons.

They were still legal citizens on the street, but the moment they entered the building, they became bandits!

"Everyone, surround these two fat sheep! Don't let any of them go!" One of them shouted.

Unexpectedly, he found that Xiang Yi and Qin Zong were not hiding at all..

Instead, he sighed and said to Xiang Yi, "Are you confident? The two of us will surround the ten of them."

Xiang Yi said, "I'm not sure, but we can try."

Qin Zong said, "Kill them all."

Xiang Yi said, "Is it alright?"

"It's fine. I called the police right after I came in. They started it first. The robotic eye police has made a judgment that we have unlimited rights to defend in this building."

Qin Zong curled the corners of his lips and said with a smile, "In other words, it's fine even if we kill them all."

Chapter 2147 2,143, Two Human-Shaped Cheats (1/66)

This was the game world. It was normal for two level 1 newbies with huge amounts of cash to attract the attention of a lot of people when they were walking in a crowded map.

However, two level 1 players facing the Siege of a total of ten players who were ahead of them in terms of levels and claiming that they had surrounded the ten players in turn was a little ridiculous!

The person in the lead would never believe that Qin Zong would actually say such arrogant words in front of them.

"The lowest level player here is also level 6. Do you know what this means?" The person in the lead laughed. He was not a mechanic, but a level 12 sword immortal, obviously, he had come here from another map.

The ten people here formed a small team with him as the leader. During the newbie period, they would find a big brother who was familiar with the experience to take the lead. This way, they would be able to avoid many detours.

Therefore, it was not strange for such a level 12 sword immortal player to appear in this ten-man team. It was just that the other party had not made a move yet, so Qin Zong could not tell what faction the other party was from.

In the game world of the Wandering Immortal's magic ring, although there were only 10 main classes, each class was actually divided into many different ways of playing.

For example, the Sword Immortal class had a fast-attack sword immortal class that focused on agility. It focused on attack speed and movement speed, and ate the agility of the character.

There was also a violent sword immortal class. As the name implied, it focused all the attribute points on strength. Even the equipment was prioritized on the equipment that added strength to the attribute points. This way, the damage output could be maximized, moreover, when he added strength, his HP and burden would also increase to a certain extent. It was very suitable for him to be used as a part-time character in the early stages to collect materials.

"You're only level 12. I don't think it's very high." Qin Zong shrugged and smiled helplessly.

He had never been afraid.

Just as this sword immortal player had said, in their ten-man team, the lowest level was five levels ahead of them.

This also meant that even if Xiang Yi had a blue-attribute sniper rifle, if the bullet did not hit his head, he would not be able to kill the level five player with just one shot.

Moreover, the other side had a lot of people, so they could replenish each other's potions and heal each other. This formed an endless cycle.

Therefore, although Qin Zong had boasted that he would kill all ten of them, he still had to pay attention to tactical thinking.

Fortunately, among these ten people, only this level-12 player was a sword immortal, and the rest were only mechanics. So, as long as he could grasp this sword immortal's background, he would have confidence.

"You have two million on you now. How about this, I'm not heartless. You keep 100,000 and give the rest to us. I can be more peaceful and not attack you."

As the sword immortal player said this, he had already put his hand on the hilt of his sword. “Of course, if you don’t Listen... Don’t blame me for not being polite...”

As soon as he finished speaking, the spirit sword in his hand had already faintly flashed. He did not attack first purely because he was afraid of the mechanical eye. Although there were no other buildings in the building, if the fighting noise was too big, they would not be able to escape in time, in the end, it would still attract the mechanical eye and raise the criminal star level.

If he could rely on negotiation and get this money with some skill, why not?

This sword immortal player was an experienced player. He wouldn’t make the first move, but he could use deterrence.

For example, at this moment..

What he used

-- spirit-sealing sword technique!

A blue sword light streaked across Qin Zong and Xiang Yi’s eyes, finally converging into a blue eight trigrams seal that fell from above their heads.

“So it’s a sealed sword immortal...”seeing this, Xiang Yi instantly came to a realization.

This was currently a popular faction within the itinerant immortal children’s Dharmic rings. As the name implied, a sealed sword immortal was a sword immortal who did not follow the conventional path. Their attacks and speed were not as fast as the traditional sword immortal path, the distribution of attributes was usually 4 wisdom, 1 lucky bonus, or 5 wisdom.

This was a support-type faction, but it was very popular. As long as there were teammates to cooperate with, it was a shining class.

Now Qin Zong and Xiang Yi understood why this level 12 sword immortal would come to the mechanical city to find nine players to be his underlings. He was in charge of sealing, so as long as the nine underlings of the mechanic took advantage of the time when the opponent was sealed., they could focus their fire on them. It was simple and crude, without any mistakes.

However, this was under the premise that the seal could hit..

The sealing mechanism in the wandering immortal's magical ring, other than the bonus from the player's own attribute points and skill proficiency, was also crucial. The higher the level difference, the higher the player's level, the sealing rate of high-level players would also increase to a certain extent for low-level players.

Therefore, once this spirit-sealing sword technique was used, Qin Zong and Xiang Yi had a rough idea.

So it wasn't a traditional sword immortal that focused on strength and agility..

It was actually a sealing-type!

Xiang Yi covered his face, feeling sorry for this sword immortal player. You played sealing with a koi carp... then this wasn't a proper act of courting death..

Thus, as expected, when the sealing disc fell from the sky and was about to approach Qin Zong's head, a string of Miss Notification Lights immediately appeared on Qin Zong's head.

This meant that the level 12 Sword Immortal's Seal had missed.

"It seems that your luck is pretty good today. Even this seal didn't seal you." This sword immortal player was also very surprised. There was an error rate for seals. With his skill proficiency and attribute points..., in addition to the difference in level between him and Qin Zong and Xiang Yi, the seal's hit rate would be 65%

Once it hit, Qin Zong and Xiang Yi would not be able to leave the coordinates for the next 30 seconds, and they would not be able to use any skills.

Therefore, seeing that his first shot did not hit the target, the sword immortal player immediately became excited. This time, he used four consecutive shots and summoned four sealing spell plates to wrap around Qin Zong's body.

The probability of each of the four magic discs was 65% . There was bound to be one who could hit the target!

The result was still greatly beyond the expectations of this sword immortal player. Because after four consecutive shots, all of them were still miss!

“F \* ck... What the hell!”This sword immortal player was puzzled.

But in the next second, there was a bang!

The sound of a sniper rifle shooting pierced through the ears of everyone here. Accompanied by an ear-piercing gunshot, a level 9 mechanic in the ten-player team was directly sent flying!

There was a bullet hole between his eyebrows, and his head was directly shot!

Such a tricky position could be said to be a heart attack!

Even though there was an astonishing level gap, it still dealt a heavy blow to this player. No one thought that Xiang Yi would actually choose to shoot at this time!

In this situation where he did not find a good sniper angle, and also did not have a scope... this was fine?

The crowd had yet to react.

In the end, there was another bang! The sound of a sniper rifle!

The second level-8 mechanic was sent flying like a scarecrow. Then, he turned into a particle and disappeared in front of everyone’s eyes.

Two bullets were fired, and two of them left in a row. The bullets did not miss!

However, this time, someone noticed Xiang Yi’s actions. He did not use the usual sniper method..

“It’s a blind sniper!”Someone exclaimed.

Chapter 2148 2,144, Four Symbols Horde (1/86)

When the second player was eliminated with a headshot, the sealed sword immortal began to realize that the two level 1 players he had encountered were not ordinary Level 1 players, but two human-shaped cheats that walked on their own.

Based on his intuition, when he was Level 1, he had completed the headshot with a cavity swing and a blind snipe. If the possibility of a software cheater was excluded, then it proved that this player’s identity in real life was a sniper who could skillfully operate a sniper rifle.

This was a human flesh physical cheat. Otherwise, such accuracy would not have been possible.

In the game world of the Loose Immortal Child’s Dharma Ring, there had always been strict checks on cheating, so it was basically impossible for there to be a software cheat to strictly maintain the fair order of the game world, this was also one of the main points that many players admired the loose immortal child’s Dharma Ring.

As an old sword immortal player, this level 12 sealed sword immortal was only Li Ziyue’s alternate account. He had seen many high-end players, it was not surprising that many old players could play ridiculously at low levels in the game world.

Li Ziyue could find 10,000 reasons to convince himself that Xiang Yi might be a walking physical cheat, but he could not figure out what was going on with this Qin Zong..

This could not be a cheat, right?

It was purely a matter of probability!

The problem was that his sealing type sword immortal’s sealing spell had a 65% chance of being sealed. It was actually a miss five times in a row!

What the F \* ck!

What was even more ridiculous was that Li Ziyue even realized that his mana was almost running out... sealing type spells had a huge consumption rate to begin with, even though Li Ziyue had used

the passive skill “Calm and collected”, as long as the sealing hit, he would be able to return 60% of the mana cost of the skill.

But the problem was that he did not hit even once!

Li Ziyue was almost about to cry. Seeing the people around him being sniped one by one, the bossy and arrogant smile on his face was no longer there.

He knew that he had kicked an iron plate. A sealing sword immortal with full intelligence. Although it was not to the extent that it did not have any lethality, under such circumstances, Li Ziyue still did not dare to directly attack Xiang Yi and Qin Zong.

These two people were too strange. They did not seem to be the actions of a newbie player. Therefore, Li Ziyue was also thinking whether Qin Zong and Xiang Yi still had an extra account.

If he attacked now, there was a possibility that he would be retaliated later on.

Although the game world was big, there were many tools in the hands of big-shot players. It was too easy to mobilize their forces to find a person. Pinching a person was like pinching an ant.

“Wait! We’re not fighting anymore! Everyone Stop!” In a moment of desperation, Li Ziyue made a decision. He shouted to the other players around him who were already frightened to put down their weapons.

Even so, this decision was clearly too late. Because while Li Ziyue was thinking, Xiang Yi had shot down another three people, and... all of them had their heads shot off.

In other words, Li Ziyue’s original team of ten people now only had five left.

Seeing that Li Ziyue had the intention to take the initiative to show goodwill, Qin Zong also signaled Xiang Yi to stop the act of shooting their heads off.

The shooting feel and recoil of this sniper rifle was too realistic, and there was not much difference between it and reality. Xiang Yi quite enjoyed the feeling of having his head shot off.

“What’s wrong? Didn’t you say that you’re going to kill us all?”Qin Zong crossed his arms and raised his eyebrows.

He and Xiang Yi were both people who had seen the big scene. Their postures made Li Ziyue’s face sweat, which made him believe that these two people were definitely not novice players! Moreover, there must be a super account behind them!

“Admitting defeat in time was originally a way to stop the damage. It’s my fault for not recognizing Mount Tai. Two Big Brothers, you have a super account, right? It’s a misunderstanding! It’s all a misunderstanding!”

Li Ziyue smiled apologetically and said, “This is the game world after all. The strong prey on the weak. Seeing you guys walking down the street with a huge sum of money, who wouldn’t have a little bit of a side view?”

What he said was true. Hearing this, Qin Zong and Xiang Yi looked at each other in dismay.

Then, Qin Zong looked at Li Ziyue and asked, “Just like what you said, normal people would have some side view towards us, but it seems a little wrong for you guys to rob me alone.”

“The two of you may not know this, but this is the rule of the mechanical city. “You may have just come into contact with this class, but I have a major player who is a mechanic, so I’m more or less familiar with the map and the unwritten rules between the players here.”

Li Ziyue said, “There are indeed many people who want to rob you, but there are rules. As a civilized society, we must use the methods of civilized people to rob. “If we fail to rob you, there will be other people who will target you later.”

“How is the order determined?”Qin Zong asked.

“This is very simple. Just roll the dice. Three dice, the big points will be given priority. This continues the set of rules for team dungeons.”

“No wonder. I said that there is killing intent outside, but they didn’t attack us. The reason is because of this.”Xiang Yi couldn’t help but whisper when he heard this.

He asked Li Ziye, “You probably didn’t come up with the rules of this machine city, did you?”

“It was first created by a guild called four divisions, and then it continued,” Li Ziye said in full detail.

Four divisions.

Qin Zong repeated this name.

It sounded a little familiar.

He quickly recalled it in his mind.

He had heard grenade-throwing senior immortal talk about this sect before.

And it really existed in the real world.

This was a branch of the Wuji Sword sect founded by Sword Immortal Fan Rui back in the day. It was called the four symbols sect, and the founder of the four symbols sect was actually sword immortal fan Rui’s grand-disciple, and most of these grand-disciples were evil sword God’s disciples.

With such a crooked master, his disciples were naturally no better. Now, the four symbols sect were all sky-ranked S-rank wanted criminals.

Evil Sword God was still serving his sentence in Songhai city’s first prison. Before this, the four divisions had also issued a notice to Songhai city’s first prison, saying that they would directly break out of the prison to rescue evil sword God. However, there was still no sign of him.

Therefore, Qin Zong and Xiang Yi were both thinking about a problem.

That was, was it possible that the guild called the four divisions in the game was established by the members of the four divisions who were on the run.

Because their behavior patterns were really similar, but unfortunately, Qin Zong and Xiang Yi didn't have any evidence at the moment.

Of course, they couldn't rule out the possibility that the fans of four symbols horde would establish a guild in the game.

That's right. Although four symbols horde did many evil deeds, they still had fans. Moreover, this kind of organization symbolized rebellion and distortion, and could usually attract a group of diehard fans who were willing to spend money and cover for them.

Previously, the international cultivation police department suspected that it was these fans who had covered for the members of the four symbols horde that had been unable to capture them.

"Then how about this? I think the two gods should cooperate?" At this time., li Ziyue said, "You guys pretend to be robbed by me. This way, the others won't be watching you. You Don't have to hand over the money. Just temporarily hand over that blue sniper rifle to us for safekeeping."

"That's too fake." Qin Zong sighed.

He knew Li Ziyue's plan.

However, he and Xiang Yi were both veterans. How could they be deceived so easily.

At this moment, Qin Zong patted Xiang Yi on the shoulder and said to Li Ziyue, "Look, what level is my friend?"

"F \* ck! Why is he already level 7?"

"If I kill five of you, won't I directly level up?"

Killing someone above his level directly increased Xiang Yi's character's experience as well.

And this was not the most ridiculous part.

That was because Li Ziyue realized that Qin Zong had also leveled up.

Li Ziyue was greatly shocked. “How did you also reach level 5...”

Qin Zong: “I got some experience from the side, so I reached level 5.”

Li Ziyue:”...”

Qin Zong spread out his hands. “So in this situation, you can’t make any demands on us. It should be us telling you what to do.”

Li Ziyue:”...”

Chapter 2149 2,145: Peak Experts In The Game World (1/86)

In front of a massive secret realm altar, many players from guilds had gathered here. The corpse of a 300-meter-long black dragon had been dumped before everyone’s eyes. The blood that protruded from its mouth had turned into a lake of blood, its body was like a mountain. After struggling for a moment, it finally died.

This was the level 65 Black Dragon Grotto’s secret land recommended by the wandering fairy’s magical ring. There was no level restriction for entering the dungeon, but there was a compulsory killing mechanism. Players below level 55 who entered the dungeon would receive five times the damage of the dungeon monster and increase the probability of an abnormal state by one time..

Therefore, the players gathered here were all at least level 55 and above.

The Giant Black Dragon was the dungeon’s BOSS. After several guilds and hundreds of players besieged it, the black dragon finally fell.

The giant black dragon’s corpse fell in front of everyone. The feeling of shock was self-evident. It gave the monks who had never seen a dragon in modern times the feeling of slaying a dragon.

According to the previous challenge rules, after everyone worked together to kill the giant BOSS, the guild leaders of the few large guilds would be the representatives to roll the dice.

As usual, three dice. Those with more dice points could first touch the black dragon's corpse, and the system would distribute the treasure chests according to the number of players in the dungeon.

After the guild leaders had chosen the treasure chests, they could return to the Guild and let the members who participated in this dungeon continue to roll the dice. They would then click on the treasure chests in order and randomly obtain an item from the treasure chests.

The level 65 Black Dragon Cave is a rare high-difficulty dungeon in the game world, with a difficulty rating of 15 stars.

Survival difficulty:

Reward Index:

Boss difficulty:

In the face of such a dungeon, it is still difficult to rely on the strength of a single guild at this stage, because any guild can not find so many players above level 55 in the game.

Therefore, at this stage of the game, the cooperative challenge between guilds had become the only choice for challenging a high-difficulty dungeon.

A flying elephant covered in armor had its huge tusks curled up like a horn, a muscular man with a huge sword on his back laughed loudly after rolling the dice. "I'm sorry, everyone. This time, the first one to choose a chest seems to be me, four elephants."

His luck was extremely good. He directly threw the final dice, throwing out 18 points. The probability of such a leopard point was very low. When the other guild leaders saw this, they could not help but shake their heads and sigh.

This was the result of the system's judgement. It was impossible to cheat. Hence, they were very helpless.

When the other guild leaders threw the dice and saw that no one else threw out another 18 points, the man riding the armored flying elephant commanded his mount to cross the Blood Lake and fly towards the Black Dragon's corpse.

"This Mighty Warrior, why is his luck so good every time?" Many of the guild leaders were suspicious when they saw this scene. Their guilds and the four divisions had already cleared several dungeons. Although they had successfully killed the final boss every time.., although the process was difficult, every time, the four divisions' Guild leader, Mighty Warrior, would be the first to retrieve the treasure chest.

The crucial point was that the system would decide the number of points. The loose immortal was famous for checking cheats. Hence, it was unrealistic to say that it was cheating.

"Let's recruit talents quickly. As long as we don't cooperate with them in the future," one of the guild leaders said. He was riding a white horse with wings. The horse's mane looked very smooth, the horse's entire body was covered in silver patterns. It looked extraordinary.

He was the guild leader of the White Horse Guild, Li Bai.

Practically all of the White Horse Guild were star observing Daoist players.

Star observing Daoist was an important member that was essential to dungeon raiding. Most of the star observing Daoist's class skills were related to perception. In order to improve their survivability in high-difficulty dungeons, star observing players were usually needed to scout the path and clear the mines, eliminate the danger ahead.

"AH, but now without them, just relying on a few of us to challenge the Black Dragon Cave is impossible." Another guild leader sighed.

The president of the Yamano-murakami Guild, Mang Shan.

As the name suggests, he is a country bumpkin, which is one of the most suitable professions for beginners. He has thick skin and can choose to bring a spirit beast as his partner in the crucial opening.

Class skills were related to spirit beast taming.

A high-level country bumpkin player could even directly tame spirit beasts that appeared in a high-difficulty dungeon to become their own battle force. Although they could not bring the spirit beast out of the dungeon..., it was indeed the key to increasing their battle force in a disguised way.

At the same time, these tamed Dungeon Spirit Beasts could also be used as Tool Beasts to scout the way together with the stargazing Daoist's class skills. This was precisely why the two guild leaders of the White Horse Guild and the Mountain Country Bumpkin Guild had a very close relationship.

One could provide combat power and a meat shield, while the other could be used to scout the path, sense, and avoid risks. This seemingly perfect combination, however, was ineffective when facing a high-difficulty dungeon.

They relied on the four divisions guild, which was their last resort.

After all, the current guild leader of the four divisions guild, Xiong Wu, was a representative player of the Violent Sword Immortal faction. He could provide a huge amount of damage output.

Moreover, under Xiong Wu's guidance, Snow Tiger, the Vice Guild Leader of the Four Titans Guild, completed the faction transition and became the most popular sealed sword immortal.

Xiong Wu had practically created the most popular factions for the sword immortal class. This made everyone present feel very impressed.

The most important thing was that Xiong Wu's Luck was ridiculously good. Every time he opened a treasure chest, he would be given priority. Just what kind of mechanism was this? This made the guild leaders present very depressed.

The current predicament they were in was that they had no choice but to rely on the violent damage output and sealing abilities provided by the sword immortal players from the four divisions. Moreover, they would not be able to get rid of them in the short term.

In the past few days, other than the four divisions, the other guild leaders had actually been saving up for themselves. They had been thinking about whether they could get rid of the four divisions and form a separate battle to challenge the Black Dragon Cave.

However, the truth was that they had failed all along.

Even if they had gone through a lot of trouble to get to the final boss stage, without the violent damage output of the four divisions guild leader's greatsword, their damage would still be slightly lower.

Even though this was a game world, the scene of a single guild dominating the world was not what the other guild leaders wanted to see. The Sword Immortal class was originally an ordinary class, but now, it had almost been played out by the four divisions guild leaders.

Moreover, most of the sword immortal players would choose to join the four divisions. White Horse Guild leader Li Bai felt that this was a very bad atmosphere.

"This four divisions was originally not a good organization in the real world, but now it has become famous here. Isn't this deliberately trying to whitewash the four divisions?" Li Bai sighed.

His impression of the four divisions wasn't very good to begin with, because he knew about the history of the limitless sword sect in the real world. This was a branch sword sect created by that Evil Sword Immortal, Evil Sword God.

Who Was Evil Sword God?

He was an arrogant person who betrayed his master and destroyed his ancestors. Even the disciples of the four divisions mass that he established were all evil. In the end, someone created a guild like the four divisions Mass in the game world, even the guild leader's name was engraved with the names of those wanted criminals.

This made Li Bai very suspicious. The people behind the manipulation of the game account might really be members of the four divisions mass in the real world.

Unfortunately, he had no evidence.

Moreover, if he directly expressed his opinion, he might even be criticized by others, thinking that he could not afford to play and directly isolating him.

“Since the two guild leaders are so troubled, have you ever thought of taking the initiative to seek cooperation?”

Just as Li Bai and Mang Shan were having a headache, a player with six bangs appeared in front of them. This person bowed and bowed politely.

What surprised the two of them the most was that they actually discovered that this player was only level 30!

“Oh my god... Level 30... Ghost, how did you survive until here?”

Mang Shan felt that it was unbelievable.

Previously, there were actually low-level players in the guild who mingled in the party to gain experience. Li Bai and Mang Shan did not object, even though they would usually die before they could make it to the middle of the dungeon.

After all, players below level 55 would have a compulsory punishment mechanism. They would receive five times the damage of the dungeon monsters and double the probability of an abnormal state.

Those who could make it to the final stage below level 55 were truly talented.

Li Bai looked at the information of the person who had come.

This was still a member of his White Horse Guild, but the class he had chosen was not the stargazing priest, but a rare sealer.

The sealer was widely recognized as one of the most difficult initial classes. This was because he needed to collect the keys to the game world and open the ancient scroll that he had brought with him. His HP was also very low, and he had to run around to open the ancient scroll, it was very easy to die.

Therefore, very few people chose this class.

Therefore, in the eyes of many people, the sealer class itself had a mysterious veil.

“I was just lucky. I only used a little bit of positioning skills.”

This person smiled, bowed and said, “If the two presidents lack talent, I think it’s better to take the initiative to seek cooperation. I’m here to protect floating cloud town. The two presidents, perhaps you can go to floating cloud town to take a look.”

Chapter 2150 2,146, Lovers’scaler (1/86)

Li Bai glanced at the player ID of the sealer from his own guild.

ID: Guoguo

He did not have any doubts about Guoguo’s words, although he could not be familiar with every player in every guild, however, since he could enter his own white horse guild, it meant that this person had at least passed through the various checks of the three Hall Masters and the Vice Guild leaders of the Guild before he could join the White Horse Guild.

In addition, the name of this place in floating cloud town sounded particularly familiar to Li Bai.

“I remember this place is very familiar. Where have I heard of it before?”Li Bai rubbed his chin as he pondered.

“It’s that place nearby where the hundred-cave demon lord was directly taken down,”said Mang Shan, the Guild Master of Mountain Village. He was obviously also paying attention to floating cloud town.

Wang Ling had single-handedly killed the Hundred Cave Demon Lord near Floating Cloud Town at Level 1. This had been announced in the World Channel, and all the players in the game had seen that sparkling name.

To many people, it was inconceivable that a hundred cave demon lord near a novice village had been directly taken down.

So the veteran players quickly thought of two possibilities: either a bored big shot had run off to do this in a novice map, but the probability of this guess being correct was very low, this was because

the time cost and benefits of doing this were completely out of proportion to the players above level 30.

For the players above level 30, it was already very tiring to fight in a team dungeon every day.

The second possibility was that an old player might have opened a beginner's account nearby and thoroughly researched the hundred cave demon lord, directly killing the Hundred Cave Demon Lord in the beginner's stage.

The next most likely operation was to borrow the hundred-cave demon lord's demon lord token to obtain the control rights of the demons, allowing the demons to work and build the town for themselves.

The possibility of this guess was higher than the first one, and it had been verified so far.

Because both Li Bai and Mang Shan had seen the sparkling second system announcement.

In the announcement, the system showed that floating cloud town had completed its town upgrade!

From killing the hundred cave demon lord to leveling up in the town, it had all happened within a day!

Therefore, there might really be big-shot players with small accounts there..

After passing through the Black Dragon Cave Dungeon, Li Bai and Mang Shan, who were originally displeased with the four divisions, felt that they had discovered a brand new path of Alliance after being reminded by this "Guozi" player.

"Guozi, do you know something by recommending us to go?" Li Bai got off his mount and patted Guozi's shoulder.

"Of course." Guozi nodded repeatedly. "I also know the class of the person who killed the hundred-cave demon master."

"What Class?"

These were all undisclosed information, which made Li Bai and Mang Shan very curious.

They pulled Pot aside and used the three-person team private chat channel to communicate.

Pot did not hide anything and said bluntly, “Trash.”

“What? Trash? Did I hear wrong? This class... can also kill Hundred Cave Demon Master in the Beginner Stage?” Mang Shan was almost doubting his own ears after hearing it.

In his opinion, this was completely impossible because trash was a late-stage class, and the room for manipulation was too low in the early stage. At the same time, it was also one of the classes that did not recommend novice players to enter the game in the early stage.

Due to too many accidents, his attributes and abilities were not outstanding. It was very easy for him to die continuously in the beginner stage.

“Not necessarily, Mang Shan. Although Trash’s operation is not easy, if he is a big shot player, he might be able to perform a miracle.”

After Li Bai heard this, although he was also surprised, he was calmer than Mang Shan.

He calmly analyzed, “To be able to choose trash to start, it means that this brother already has a considerable level of understanding of all the major classes. If he can get a high-level cultivation method at the start, then the experience will be different.”

“Get a high-level cultivation technique at the start? is that possible?”

“It’s impossible for other classes, but the probability of trash is a little higher.” The class balance of the itinerant fairy’s magical ring was here. Didn’t someone else evaluate it? Although Trash’s accident rate was high, compared to other classes, the probability of triggering a hidden quest was also higher. Moreover...”

Li Bai frowned slightly and said, “This class can be played as an itinerant. This is also a big mechanism for trash players. He can learn full-class skills.”

“So that’s how it is... a full-time expert!”When Mang Shan heard this, he couldn’t help being enlightened.

After thinking it over, they instantly felt how awesome that trash player from floating cloud town was.

But the truth was that this was Wang Ling’s first time playing Bai Qiao’s game.

After understanding the situation, Li Bai and Mang Shan hurriedly thanked Guozi.

“Thank you, Guozi! After you enter the dungeon, look for us directly. We’ll take you to level up.”

They said this.

This wasn’t a polite greeting, but a promise that was kept. Li Bai and Mang Shan’s players had good reputation. This was also the reason why Guozi had taken a fancy to them.

“That’s easy to say. In that case, guild leaders, I Won’t disturb you. I don’t have a mount, so you guys should hurry over. According to what I know, there are quite a few players who have gone to floating cloud town to seek cooperation,”Guozi said.

“Alright! Understood!”

They replied.

Then, after exchanging a glance, they very tacitly took out the teleportation scroll in their robes and tossed it into the sky. They immediately activated the teleportation array, intending to directly teleport to a location closest to floating cloud town, then, they rode their mounts and flew over.

They had even directly used teleportation scrolls..

This thing was a rare item in the game world of the itinerant fairy’s dharma ring. All magic treasures related to teleportation abilities were very valuable in the game world.

Whether it was a limited number of times magical treasure or an unlimited number of times magical treasure, a space magical treasure that could be used unlimited times could be sold for a sky-high price!

After the two of them left, another sealed gamer named “Lu” approached the pot. “You’re just going to let them pass?”

It was a female gamer who looked like she was still a couple with the pot. She went forward and used her fingers to fondle the pot’s bangs.

“There’s nothing I can do. Shifu is short of people. I observed them for a long time before recommending them,” Guozi said with a sigh.

Probably even Li Bai and Mang Shan wouldn’t have thought that this player named Guozi was Odd Zhuo, the famous city hero in the real world..

Guozi was his game alias, which was very reasonable and appropriate.

As for “Lu,” it was naturally Liangzi Nine Temples, who had directly taken the word gong and removed the treasure cap as his game ID.

“So what do you want to do next?” Liangzi Nine Temples asked.

Odd Zhuo chuckled and looked at Xiong Wu, who was sharing the treasure chest with the four symbols army. “What do you think will happen if I trick the four symbols army again?”

“This person doesn’t look like he’s going to cooperate. If we can’t come to an agreement, he might directly choose to attack and wipe out Wang Ling and Rongrong.”

“Yeah, you’re right.”

Odd Zhuo nodded meaningfully. “But what I want is for them to attack...”

At this point, he walked straight over to Xiong Wu and started to repeat what he had done with Li Bai and Anli floating cloud town.

At the same time, the guild ids that he and Liangzi nine temples belonged to were also changed at the same time, turning them into “Members of the four symbols guild”..

No one had expected that Odd Zhuo and Liangzi nine temples weren’t just players in the world of loose immortals’ dharma rings.

At the same time, they were also gms with certain operating rights..
