

## Daily Life 2201

Chapter 2201 - 2201: Using cultivation science to explain the system

System ability user-this wasn't a new term for Wang Ling. As a web novelist, father Wang had written a lot of works about the system flow, and online literature could be considered to have completely understood the system flow.

As for Wang Ling's knowledge that the system really did exist in the real world, it had to start with uncle little black that odd Zhuo knew.

Back then, Wang Ling had affably punished uncle little Black's laboratory a little, which had instantly made him obedient.

It could be said that uncle little black was the developer of the system style that Wang Ling knew in the real world. However, the system in the real world actually wasn't that amazing; it mainly relied on big data calculations to figure out the user's psychological state, and in a sense, it gave the user an incentive to improve their various abilities.

From the perspective of modern cultivation science, Wang Ling felt that half of this was in the scope of scientific calculations and psychology, while the other half was metaphysics in the true sense.

In those years, the various systems developed by uncle black involved some ancient secret techniques. These secret techniques were the main reasons for the system users to grow in various abilities after they completed specific tasks.

He could also grow purely by cultivating ancient secret techniques. Uncle black had put on a system-type shell, which only made these forbidden secret techniques not as terrifying.

Furthermore, it was also very entertaining.

Wang Ling's eyes swept over the interview group that old Huang had shown him. It was a group of a thousand people, and there were currently nearly eight hundred people in it.

There were more than 600 people online.

If some social -terrorist lurkers were included, the number of online users would probably be more than a hundred.

Lotus sun was a little surprised. there are so many people auditioning for ran ran? ” she asked.

this is only one of the interview groups. As far as I know, there are at least three more.

“It’s mainly because the company’s terms and conditions are quite generous,” old Huang said with a smile. “In addition to the five insurances and one housing Fund, the monthly salary is 50000 spirit stones, and that’s after tax. You work five days a week and get a month’s annual leave, and the reward is also increased according to the difficulty of the mission. The higher the difficulty, the higher the reward.”

“The conditions are indeed not bad.” Lotus sun sighed.

Unless it was a senior employee who had been promoted after working for Huaguo water curtain group for many years, it would be very difficult to offer such a salary.

The bigger the group, the more employees they would have to support. They would definitely divide the salary according to the gradient. It was rare to see such a rich and generous company.

As a result, Lotus sun had expected many people to come for the interview. the universe infinite group.

Lotus sun silently memorized the name of this company, feeling that it was somewhat familiar. then, I wish you a smooth interview!

Lotus sun and Wang Ling raised their teacups together and clinked their cups with old yellow’s.

Old yellow was so happy that it couldn’t close its mouth. Meeting friends always made people unconsciously excited, ” “Oh right, I’ve wanted to ask you two since we were in the game world, what’s your relationship?”

Upon hearing this, Lotus sun almost choked on her tea.

She hurriedly put down her teacup, and perhaps afraid that Wang Ling would be embarrassed, she blushed and said, "It's just a normal relationship between classmates!"

"Oh, I see."

Old yellow revealed a meaningful smile.

maybe they're just a little better than normal classmates. In fact, they're closer than normal.

Lotus sun added.

"Oh, I see."

Old yellow raised his eyebrows and looked skeptical. There was a playful expression in his smile.

The girl's attitude was already very clear.

But when he saw that Wang Ling was still in high spirits and immersed in thought, he immediately understood the relationship between this pair of beautiful people in front of him.

So it's a woman chasing a man, separated by layers?

However, the man seemed to be a piece of wood and had no intention of being enlightened.

As a practitioner who had drawn a lot of comic content, Huang was very familiar with this kind of script.

Of course, the understanding of emotions was not limited to the plot of the comic. Huang also had his own understanding. Although he felt that he was still single and had no right to lecture the two young people in front of him, he could still give some appropriate hints.

you can't rush it. Some things will happen slowly. Old yellow looked at Lotus sun and consoled her.

Lotus sun nodded, blushing.

Wang Ling was the only one who was still mindlessly eating his crispy noodle snack.

“Student Wang, What are you looking at? why are you so engrossed? I don't think there's much to see in my group, right?” Old Huang asked as he looked at Wang Ling, who was fiddling with his phone.

At that moment, Wang Ling returned old Huang's phone, and old Huang was surprised to find that this interview group, which had almost become a friend group, had actually turned on the [ everyone muted ] mode.

Following that, a new group announcement appeared in front of old yellow. This was a public interview mission for all interview groups!

Operation mission-capture the illegal alien smuggling organization, polyhedron!
