

Dan God 311

[Chapter 0311 - The Illusionary Brilliant Furnace](#)

The Illusionary Brilliant Furnace

A furnace in his heart? Su Meiyao was baffled and Chen Xiang also didn't provide any further explanation.

But very soon, Su Meiyao understood what was going on, she could sense Chen Xiang releasing a powerful spiritual power, which was the mana, hidden deep within his consciousness. This mana was mystical in nature, it could let a human transform into bird or beast, and right now, Chen Xiang was attempting to create a furnace with this mana!

Chen Xiang had an understanding in the structure of the alchemical furnace. He manipulated the mana to create an invisible alchemical furnace and also drew some auxiliary alchemical spiritual formations. These spiritual formations were all rather common, which could be commonly seen in poor quality alchemical furnaces. Chen Xiang was drawing a formation for the first time, and that too using mana to draw. Chen Xiang, relying on his memory, quickly drew a few auxiliary alchemical spiritual formations, of course, nobody else could see it, only he could clearly sense them.

When Chen Xiang happened to learn the Transforming Technique from Long Xueyi, he needed to use mana to create some spirit patterns within his body, so that he could generate that bizarre power. Right now, he was applying the very same method on the alchemical furnace. He knew it would be a success.

No one knew what Chen Xiang was doing, only a few individuals with extremely powerful divine sense could sense a very peculiar divine sense on stage. Yet it was anything like divine sense. These contrasting feelings left even those powerful individuals feel bewildered and baffled.

"Nice." Chen Xiang slightly heaved a sigh. After he had released the mana, it had not dissipated. At his will and command, it started to solidify. Soon, an invisible alchemical furnace took shape having been forged out of mana.

Meanwhile, everyone else was looking at Chen Xiang as if they were looking at an idiot. It seemed as if he was opening the lid of furnace, but there was nothing in front of him. Everyone believed Chen Xiang had already lost his mind and gone completely crazy.

Watching this scene, the square burst into sighs. They all believed Chen Xiang had been hit hard by the loss and turned into an idiot. Watching him like this, Hua Xiangyue and Liu Menger both were heartbroken. They too believed Chen Xiang had fallen into a deep pit of despair and turned into an idiot. They almost wanted to fly out, but when they were just about to, both of them immediately stopped and stood up in shock.

Because after Chen Xiang had placed the herbs down, they were suspended in mid-air, as if there was truly an alchemical furnace there that no one but he could see.

Chen Xiang's alchemical furnace was completely invisible, which let everyone else to clearly watch the changes happening on the inside of the furnace. As Chen Xiang placed his both hands into the two fire entrances, flames began to writhe. In a spiral formation, the flames rotated down from below to above,

like two fire dragons meandering in circles. As they surged from the bottom to the top, burning down the herbs.

These flames were suddenly large, and then suddenly small, cautiously wrapping those herbs in a very harmonious and beautiful picturesque scene.

The alchemists on the stage were dumbstruck without any exception. Shockingly watching Chen Xiang and that invisible 'Alchemical Furnace' of his, they could not help but feel cold on the back of their neck as they witnessed this strange and miraculous scene in front of them.

Many people for the first time saw the process of alchemy, which allowed them to have a clear understanding how the herbs were successfully refined.

"How... how the hell is he doing this?" Hua Xiangyue said in surprise. She could sense an invisible and very strange power, seemingly divine sense yet not, right in front of Chen Xiang. She was sure Chen Xiang had used this strange divine sense to create an invisible alchemical furnace for alchemy.

This strange divine sense neither could be considered unusually strong, nor it could be considered very weak. It could closely entrap the violent flames released by Chen Xiang, without any heat leaking outside. When the herbs were being incinerated, the released Herbal Spirit Qi were even more violent, yet they could still not break away from the encasing divine sense.

"Pretty good brat, you made me admire you!" Su Meiyao praisingly said. When refining a dan, so long as those tyrannical Herbal Spirit Qi were not allowed to spill, the dans could still be refined even in a poor quality alchemical furnace ..

Among the few inferior spiritual formations drawn by Chen Xiang, some were there to suppress Herbal Spirit Qi, while some were useful in controlling the temperature. Chen Xiang named this alchemical furnace the 'Illusionary Brilliant Furnace'. Although it was rather a common quality furnace, it was still miles better to those ragged alchemical furnaces provided by Danxiang Taoyuan.

Everyone else blankly watched Chen Xiang refine the dans right in front of them. The audience could clearly see colorful Herbal Spirit Qi emerging out of the herbs as they were being burned. These Herbal Spirit Qis very violently rushed to the top, which was just next to the lid, many alchemist understood this with one glance.

Colorful Herbal Spirit Qi dancingly rose to the top, before tussling together with other Herbal Spirit Qis. But in the end, they had been suppressed by an formless power, which forced them to fuse into a green mist. Despite its delicate appearance, everyone could tell this thin mist was very tyrannical.

Although no one else could see the alchemical furnace, many could discern that this invisible alchemical furnace happened to have three layers. The uppermost layer was dedicated for the solidification of dan, a central layer was for the incineration of the herbs, and the bottommost layer from where the flames were released. It had a very common structure and almost everyone could notice this with a single glance.

The flames gradually turned smaller. Quite a bit of green powder suddenly emerged in the central layer, twinkling with green light. This green powder were precisely the herbal powder, the end result of refinement after those herbs were carefully baked by flames. After these herbal powders were gathered

together, an invisible power sucked them into the upper most layer, and started fusing them together with that tyrannical green Herbal Spirit Qi.

The instant they were being fused together, they turned even more tyrannical. The onlooking alchemists were gasping for breath. Although they were very clear on the fact this was the most difficult part, it was the first time they could actually see it happening in front of their eyes. This sort of feeling was very different from when they were examining it using their divine sense during alchemy.

These alchemists had been deeply shocked by Chen Xiang's skills. While the experts were recognizing the artistry, the layman were simply enjoying the show. These alchemists were very shocked, nevertheless, they were intently watching Chen Xiang refining the dan. When Chen Xiang was refining, even a little bit of the Herbal Spirit Qi or herbal powder had leaked. Not to mention, he had burned the herbs very thoroughly, which resulted in production of a lot more herbal powder than the usual, which was similarly true for the Herbal Spirit Qis.

But because of this, during the fusion of Herbal Spirit Qi with the herbal powder, it would turn even more tyrannical, which was not good for the solidification of dans. And right now, Chen Xiang had just entered the solidification process.

Liu Menger stared with her pretty eyes. She also knew how to refine a few low level dans. Seeing Chen Xiang use this kind of mystical ability, she could not help but feel admiration for him. The concern on her face had also disappeared, replaced by a sweet gentle smile.

"Xiangyue, you were right. This little rascal's potential is very big, you've unexpectedly managed to force him into using this killer move!" Liu Menger slightly smiled and said.

"I also had no idea that he could actually do this. I initially thought his furnace would not explode, and he would be able to use the tattered furnace till the end, he has truly surprised me!" Hua Xiangyue was also an alchemist. At the moment, she was not looking at Chen Xiang's invisible alchemical furnace, but rather the superb and perfect alchemy technique being executed by Chen Xiang.

Even those 6th level and 7th level Alchemists in the square almost had their eyes popped out. Not only had Chen Xiang actually suppressed that tyrannical Herbal Spirit Qi, but he also also divided it into ten parts!

Ten parts, that was basically ten dans! Ordinarily, six or seven Hundred Beasts Dans was the limit, and that was when the alchemist at their very best condition! No matter what one said, Chen Xiang's current state was far from that, and not to mention the alchemical furnace he had created, which made every other alchemist feel ashamed at themselves.

Ten groups of azure Herbal Spirit Qi group suddenly started spinning, while slowly converging. The flames in the central layer of alchemical furnace were sometimes smaller, sometimes larger. His control was quite subtle, along with the flames the ten azure cyclones would sometimes spin faster, sometimes slower, while Chen Xiang with a calm look hanging on his face, observed the changes happening inside the furnace.

There were still a lot of sand left inside the hourglass, yet the ten azure cyclones converged together, and suddenly disappeared as they turn into ten bright azure dans!

"Finished!" Chen Xiang loudly shouted, at this point almost half an hour was still left.

In the quiet square, his completely excited and confident voice suddenly echoed.

Chen Xiang had been successful Without using an alchemical furnace, he had successfully refine dans, moreover in just half an hour!

[Chapter 0312 - Brilliant](#)

Brilliant

Chen Xiang drew a tattered alchemical furnace, which then blasted apart during the alchemy. Yet even when everyone thought it was hopeless for him, even in the adverse circumstances, Chen Xiang had not only turned the tables, but also cleared the round with best result!

Mrs. Li, along with few other 7th level Alchemists, carefully inspected Chen Xiang's Hundred Beasts Dans. Each dan of his was of top quality, a lot better compared with the other alchemists on the stage, rendering those formerly gloating alchemists speechless. Chen Xiang was once again in the limelight. A low 5th level Alchemist, in all three rounds had been a cut above these 6th level Alchemists, leaving others the impression that those 6th level Alchemist were inferior compared to Chen Xiang.

"Top grade quality, really left this old man too far behind to catch up! Forget even considering doing something like this without an alchemical furnace, even if I had one it will still be difficult for me to do this!" An old man sighed in shame and said.

Other old alchemists nodded in agreement. No one even dared to suggest that Chen Xiang had cheated, because the entire process of refining the Hundred Beasts Dan was obvious to all, it was all clearly performed in front of their eyes.

The first time seeing the process of a dan refinement occurring with such clarity in front of them had opened the outlook for many people. Although Chen Xiang had only used half an hour, for many, it felt like they had just finished watching a long wonderful drama. As such, they didn't feel the passage of time. Everyone in succession were lamenting over this brilliant display of alchemy technique by Chen Xiang.

Seeing was one thing, and refining was altogether another. Although a successful method of refining top quality ten Hundred Beasts Dan was presented by Chen Xiang in front of these alchemists, it would rather be difficult for them to replicate the results. This would require perfect fire controlling skills, as well as exquisite control over divine sense. Not to mention the relevant experience, and of course, most importantly, the talent!

Now, there were only fifteen alchemists left in the high-rank tournament. The fourth round was also the final round. At this moment, Chen Xiang couldn't help but tense up along with everyone else. The participants have to yet again refine dans, but, the difficulty this time would obviously be a grade above from all previous rounds. Chen Xiang had been only familiar and successful with the Illusionary Brilliant Furnace just a moment ago, and that was also because he happened to be refining the Hundred Beasts Dan. If it was Building Foundation Dan or Elemental Spirit Dan, then it would have been rather difficult.

Now it was break period, Chen Xiang was not exhausted from the previous endeavour, the consumption of mana was very low. As long as it didn't dissipate, he could take it back and use it again with little consumption issues.

"Elder Brother Chen is too formidable! Hahaha, I knew it, he must've had some way! Then again, although I was already prepared for it, I was still surprised." Yun Xiaodao said while laughing.

"Refining the Hundred Beasts Dan for Younger Brother Chen was very easy. After returning, I will definitely give him few herbs for refining." Zhu Rong said while laughing and rubbing his hands, "If Younger Brother Chen can help me refine dans all day long, how good that would that be."

"Get the fuck out, how can Elder Brother Chen waste his time in helping you refine those shitty dans?" Yun Xiaodao said as he kicked Zhu Rong.

Xu Weilong frowned and said, "The next round is definitely going to be very difficult. Chen Xiang must have used quite a lot the divine sense to refine like that, perhaps he had almost consumed all of his divine sense for such a strenuous action"

At this time, the discussion in the square about the working principle of that move was still not showing any signs of abating...

"Dean, teacher doesn't seem to know how to use this kind of strange divine sense." Wu Kaiming said. Their teacher was the senior brother of Chen Xiang. Both of them had obtained the inheritance of that old madman, he speculated that move of Chen Xiang had been taught by the old madman.

"That stuff is more formidable compared to divine sense, it should be some altered form of divine sense. That explains why it had some features of divine sense, but not quite the same! Although it is possible to congeal divine sense and also enclose flames like things, there is no way it could be so stable! After young martial uncle had released it out, he could also take it back, without dispersing a bit!" Gu Dongchen could also not identify what in the world Chen Xiang had just used.

Only after cultivating Shinto could Chen Xiang possess mana. Those who cultivated Shinto were scarce in number, obviously no one else here knew what it was.

"Now do you realize the magical effects of mana? It can be said that you have used a type of transformation among the 72 Transformations. This kind of transformation is not transforming your own body, but rather releasing mana out of the body and then transforming it. If one could reach the highest state of mastery, they could create a dragon, or even an entire world!" Long Xueyi's words stunned Chen Xiang.

Creating an entire world, just how much mana would be required to accomplish that!?

"Hei hei, do not be so surprised. Maybe the world we are currently living in was created by a powerful individual using mana." Long Xueyi's words scared the hell out of Chen Xiang.

The world was very big, no one knew what strange things were out there! Chen Xiang now came to realize the formidability of Shinto. He now understood why dragons were so naturally powerful.

In the top floor of Danxiang Tower, Hua Xiangyue had to hold back the impulse to seek out Chen Xiang many times, she really wanted to know how Chen Xiang managed to achieve such a feat. Along with Liu

Menger, Hua Xiangyue had discussed in detail on the event but only managed to come to conclusion that Chen Xiang had a unique martial technique which allowed him to cultivate out this kind of strange divine sense.

"Xiangyue, what's the the next round going to be like?" Liu Menger asked. Chen Xiang had barely managed to arrive this step, and she didn't want to see Chen Xiang fail.

Hua Xiangyue mysteriously smiled, "Just wait a bit and you'll find out. This last round is his greatest test, I specially designed it for him. This will force him to give it all. Actually, just a while ago, I thought he will not be able to last till the end."

Chen Xiang looked at the fragments of the tattered alchemical furnace littered on the ground. When he had obtained the alchemical furnace, he felt furious. But now that he thought about it, if it wasn't for this, he may not have found out mana could be used in such a way. Although he was using this ability for the tournament, maybe this method could still be used in future.

Now that he knew mana could be used like this. He intended to take out some time in his schedule, and try to go one step further, and learn that said change from Long Xueyi.

After the break was over, everyone was looking forward to the details of the next round. They also wanted to see Chen Xiang using the transparent alchemical furnace for alchemy again. Especially the alchemists among the audience, they could learn a lot of things from watching that process again. Not to mention, it was also a lot more interesting than watching other alchemists using those tattered alchemical furnaces.

Chen Xiang was also a bit tensed while awaiting Mrs. Li's announcement on the details of the next round.

"The high-rank tournament's last and final round is about to begin! In this round, everyone will have to challenge the limits of their own alchemy, the participants will have to precisely use the alchemical furnace from before and refine three kinds of Low-Grade Profound Level Dans, and then based on those three differed low-grade profound level dans, the champion will be determined!" Mrs. Li's words made Chen Xiang's heart fall into an abyss.

Chen Xiang could currently only refine three kinds of low-grade profound level dans, but he only had only had the herbs for two of them. Those were the Hundred Beasts Dan and the Elemental Spirit Dan, but for the Building Foundation Dan he was lacking the Azure Profound Fruit. Last time when he went for the assessment for the 5th level Alchemist, it was provided by Liu Menger.

"Start your preparations, you've to use your own herbs. I think everyone had prepared the herbs before arriving here!" Mrs. Li said.

Chen Xiang was incessantly regretting, regretting the fact he didn't bring some Azure Profound Fruit when he was coming. If he could only refine two kinds of dan, he would lose. Although the Elemental Spirit Dan was very expensive, everyone else was going to be refining three different dans. Not to mention, the Hundred Beasts Dan was also the cheapest among the low-grade profound level dans.

"What to do!" Chen Xiang asked Su Meiyao and the others.

"Originally, I didn't want you to learn this alchemy technique early, but since your basics are very good, and your divine sense is also quite strong, so I'll teach you in advance!" Su Meiyao said.

"What technique?" Chen Xiang was delighted in his heart that there was still a way out of this.

"Do you think High-level alchemists, like Elder Dan, collect a large number of precious herbs in order to learn refining those high ranked dans. No, the herbs for the high ranked dan is even more rarer than the Elemental Spirit Dan herbs. After the alchemist achieves that level, they often have to refine unfamiliar dans. With this technique they have a fifty percent chance of success!" Su Meiyao said.

Chen Xiang was stunned, this was completely different from the alchemy he knew.

[Chapter 0313 - Refining Simulation Technique](#)

Refining Simulation Technique

In Chen Xiang's cognition, the more high level dan it was, the more it would be difficult to refine. The alchemist must try refining a dan many, many time before he learns refining it successfully. But according to Su Meiyao, alchemists at a certain level could have a 50% success rate at the start without ever refining a high-level dan!

This was very difficult for Chen Xiang to accept. Because even after he became familiar with refining the Elemental Spirit Dan and Building Foundation Dan, when he refined the Hundred Beasts Dan, he didn't have anywhere close to a 50% success rate at the start.

"Liu Menger is collecting the herbs for the alchemist by betting on these very odds. After all, it is Earth Level Dan. The herbs are even rarer than the ones required for the Building Foundation Dan, and their maturity period is extremely long. If we follow the most basic way of alchemy, just to collect all the herbs, the alchemists would have to spend tens of thousands of years. In light of this, even in hundred thousand years, there would not be a single person who can achieve the rank of Dan Ancestor." Su Meiyao once again explained.

Chen Xiang nodded his head. Before, he was also having some doubts on how these high-level alchemist could go so far. If one had to amasse so many herbs, that would be far too unrealistic, especially the herbs for those earth level and heaven level dans. These herbs couldn't just be found anytime you wanted them.

"This technique has very high requirements for divine sense and the perception of alchemy. When you use this technique, you'll enter a very peculiar state. And then in your mind, you will simulate the alchemy process. This alchemy technique is called 'Refining Simulation Technique' and many high-level alchemist need to master it. Generally, one begins to learn this method when they are refining Low-Grade Earth Level Dans. If you master this method, you'll at least be able to refine Middle-Grade Earth Level Dans."

Although this technique had a relatively common name, Chen Xiang was aware it was a very difficult technique to master. In this Refining Simulation Technique, the alchemist would have conduct the simulation of the alchemy process a few steps ahead of its real life equivalent while refining the dan. Within their mind, one would deduce what would happen in the near future and then adjust the alchemy process in advance for that particular refinement.

"You'll use this method to refine the Five Elements True Elemental Dan. There is still a bit time left, I'll teach you how to simulate in the meantime. For this technique, you need to be familiar with the characteristics features of the herbs and then rely on your perception! Your alchemy perception is lot more sensitive compared with other alchemists. Many times I've envied you because of this, which is also why I believe you are ready for it. Plus, you also cultivate Shinto, so your divine sense has already reached the level to cast the Refining Simulation Technique." Su Meiyao's voice turned serious, like a strict teacher teaching powerful and difficult technique.

Chen Xiang also listened very attentively like any faithful student should.

"I'll first describe the process of the Refining Simulation Technique in detail, pay attention..." Next, Su Meiyao quickly describe the process. Time was very pressing, but she had confidence in Chen Xiang, she was sure he could definitely master it in time. As long as Chen Xiang could take this step, he had the potential to become a Dan King.

Su Meiyao had seen a lot exceptionally talented Alchemists, but the alchemists who could take the last step along with her; were none. Everyone got struck in the afore-mentioned bottleneck, that was the so-called Refining Simulation Technique. Only she was able to completely master this step, allowing her to refine a few high level dans many times successfully.

While attentively listening to Su Meiyao, Chen Xiang was secretly marvelled at the complexity of the process. At the same time, he was also extremely excited, because there was a challenge in front of him which would allow him to break through the challenging bottleneck of alchemists in advance.

"That's it, that's all of my experience. I'm sharing it with others for the first time! You comprehend it yourself, you have Fire Spirit, so you'll be even more familiar with your own flame. This is also your advantage, plus you cultivate Shinto. With all this combined, you have larger chance to successfully master it than most." Su Meiyao thought it was an opportunity, since Chen Xiang wanted to become the champion of the tournament, and he also didn't have the alchemical furnace, the situation was very bad but also perfect for this sort of breakthrough. People tended to break past their limits under these pressured situations.

Which was also why when many people encounter a bottleneck, they would take some sort of risk in order to pass it. They would go fight with some powerful spirit beast, and breakthrough the bottleneck in course of the fight. When people fell into adverse situation, the likelihood of producing a miracle is far higher.

Chen Xiang past deeds were a clear example of this fact!

The tournament had not yet started, but Chen Xiang was already running the simulation of refining the True Elemental Dan in his mind. He closed his eyes, and in accordance with the method taught by Su Meiyao, breathed in a unique pattern which made him enter a state where he forgot everything, forgot himself and everything around him and achieved an unparalleled degree of focus. At this time, he felt he was inside a big white space. He sat cross-legged there, released the 'Illusionary Brilliant Furnace', and then began placing the herbs...

"Bang", Chen Xiang was suddenly awake with a jolt. His forehead was slightly drenched in sweat. Just a moment ago, it was as if he was in a dream, dreaming about refining the True Elemental Dan. But while refining the dan, an error occurred, which led to the furnace blasting into pieces.

"This won't do, a while ago you have completely fallen in your consciousness. You need to be awake, and let your own consciousness do the simulation of alchemy process! When you are applying it, you need to do alchemy, while running the simulation in your mind. Moreover, your simulation need to be a tad bit faster than the actual alchemy. During the simulation when you encounter the same problem in refining, you have to immediately adjust it in reality, while at the same time immediately run the simulation from the end of your adjustment." Su Meiyao explained.

Chen Xiang slightly sighed and said, "I understand, the technique is to deduce the problem we are going to encounter in the future during the refining! Suppose I'm in a fight, I'll be able to predict the actions of opposite party, and be ready for it in advance. If I'm going to be stabbed to death, I can prepare to either avoid or block the strike."

"Yes, the refining simulation is exactly this, it will let you predict the change going to occur in your alchemical furnace. Once there is a problem, you can immediately adjust to fix it and continue." Su Meiyao nodded and said.

This time, Chen Xiang didn't close his eyes, and once again ran the refining simulation. When he was running the refining simulation, he could increase the speed, because it was happening inside a world of his consciousness, where he could do as he wish. In just a few blinks, the Illusionary Brilliant Furnace appeared in Chen Xiang's mind along with the herbs already entirely processed. He placed them inside the alchemical furnace, and began refining the dan.

"The speed can be a little faster, but make sure you cross the t's and dot the i's. After the herbs are incinerated, how will the herbs will change? How the flame will release the Herbal Spirit Qi, and so forth! In short, you can not let any bit of details inside the alchemical furnace pass. So long as there is a bit of error, you can adjust in the reality but you need to perfectly replicate it first." Su Meiyao said.

Chen Xiang now knew why the 'Refining Simulation Technique' could allow the high level alchemists to have high success rates when refining unfamiliar high level dans. If he could grasp this technique, it was equivalent to encountering the situation in alchemical furnace beforehand, and he could adjust and even avoid the mistake.

This kind of method was very powerful, but the requirements for divine sense and perception were very high. Chen Xiang was almost unable to bear it, he felt very tired, his mind too exhausted.

"Preparation time is finished, let the round begin! When the sun rises tomorrow, that will be the end of this round." Mrs. Li said.

It was already late evening, Chen Xiang didn't expect they would get so much time until tomorrow morning. This was totally out of his and Su Meiyao's expectations.

"The time is actually not that much. No one can complete it quickly because they are all using those broken furnaces, Danxiang Taoyuan is definitely aware of this! After all, these alchemists had to refine three kinds of dan they are most adept in, the most expensive low-grade profound level dan. Not to

mention them having to use these broken furnaces, even if they have better furnaces they will need a long time." Bai Youyou said.

Many in the arena saw the time was far too long to remain waiting here, so they left one by one. They all thought they could just get up before tomorrow morning and see the results.

[Chapter 0314 - Learning And Applying At Hand](#)

Learning And Applying At Hand

Except for Chen Xiang, the rest of the remaining alchemists on the stage all took out some rare and precious spirit herbs, which could be identified by many among the audiences. Only Chen Xiang stood still.

Chen Xiang had actually started long ago, however, he was performing the simulation of the refining of the True Elemental Dan in his mind, because this was the dan he had most refined the most. He was also the most adept at it, which was why it was better to test run with it.

"Little rascal, go ask Mrs. Li, whether you can refine other dan for practicing, you have a lot of time now!" Su Meiyao said.

Although Chen Xiang was running the refining simulation of the True Elemental Dan in his mind, he could still divert his attention to do other stuff.

"Mrs. Li, can I refine other dans for practice?" Chen Xiang asked.

"There was nothing mentioned about this in this rules, if you are not worried about getting yourself tired or about squandering your time, you are allowed." Mrs. Li replied. Alchemists practicing before alchemy was common thing, and not to mention, he was going to be using his own time and resources, which was why it was allowed.

Chen Xiang wanted to practice, which made many who were preparing to leave immediately halt their footsteps. Chen Xiang refining dans was a pleasure to watch, they could watch dans in the transparent furnace as they were being formed, moreover, the process was very frequent and very beautiful. In particular, those Herbal Spirit Qi exuding colorful lights almost seemed like they were dancing.

"He is finished, this little rascal wanted me to take him back to the Extreme Martial Sect to get the Azure Profound Fruit, at that time, I had one on me and gave it to him." Liu Menger suddenly thought of this and then lightly stamped her foot. She was regretting her decision to not take Chen Xiang back to the Extreme Martial Sect, otherwise he would not be lacking the Azure Profound Fruit right now.

Liu Menger learned from Hua Xiangyue how Chen Xiang became 5th level Alchemist, she knew he could only refine the Building Foundation Dan, the Elemental Spirit Dan and the Hundred Beasts Dan. This accounted for three kinds of low-grade profound level dans, and during the assessment Chen Xiang had already used that lone Azure Profound Fruit from Liu Menger.

"I don't think he has the herbs for the Elemental Spirit Dan!" Liu Menger was extremely worried, she looked restless.

Hua Xiangyue was also a little surprised, "You gave him the Azure Profound Fruit? He's in trouble, if he don't have the Azure Profound Fruit, he can't refine the Building Foundation Dan! I hope he has the

herbs of Elemental Spirit Dan and the Hundred Beasts Dan upon him at least, maybe he could win by the virtue of these two dans."

"The Elemental Spirit Dan is much more difficult than the Hundred Beasts Dan, I don't know whether he can hold on or not. He should be trying to familiarize himself with that alchemy technique from before."

Chen Xiang was already running the refining simulation of True Elemental Dan in his mind, but he was only refining in his imagination. Of course, he was successful in the end but now it was time for the real stuff.

He quickly processed the herbs of the True Elemental Dans, thankfully he had a lot of these herbs on hand. And after he was finished processing the herbs, he released the Illusionary Brilliant Furnace, and then placed the herbs inside. At the same time, he had already begun running the simulation, moreover a step ahead. The shape and size of these herbs, the texture upon the herbs had all been simulated in his mind. Even the entire square, the environment all around him, along with the sounds from the audience had been simulated.

He placed both his hands upon the fire entrance, and began pouring the flames inside. While the simulation was a bit faster in his mind, he had already begun incinerating the herbs.

If no problem arose during the refining simulation in his mind, he would refine in accordance with the refining simulation. Temperature or everything else, everything would all be same as in the refining simulation.

Soon, Chen Xiang deeply felt the formidability of the Refining Simulation Technique. Unexpectedly, everything was exactly the same as expected. What happened inside the alchemical furnace was exactly the same as what he had simulated in his mind.

Chen Xiang was refining the True Elemental Dan, this was a most commonly used dan by many, nobody expected they would be able to see how it was being refined today.

The Herbal Spirit Qi of the True Elemental Dan were also colorful. After they had been incinerated by the flames, they rose to the top. Various colorful Herbal Spirit Qis sometimes intertwined, some repelled. The flames too were sometimes large and fierce, yet the next moment they were small and fine. Unexpectedly, sometimes the flames were not even present...

The various changes occurring inside the furnace were the same as the changes transpiring in the refining simulation running in Chen Xiang's mind. Even the various movements of those Herbal Spirit Qi were exactly the same.

At this point, Chen Xiang truly felt as if he was looking what was happening inside his own alchemical furnace early on. In reality, he was only refining the dan once, but for him it seemed he was experiencing the same thing twice, it was a very magical feeling.

The 7th level Alchemists all intently stared at Chen Xiang's transparent furnace. They wanted to have a look how Chen Xiang was refining the True Elemental Dan without using any Spirit Crystal Essence, but they could not notice anything out of the ordinary. This was because Chen Xiang had poured in a large amount of water attribute True Qi inside, which transformed into an invisible mist, wrapped around those herbal powder inside, rendering it impossible for anyone to see.

In less than half an hour, Chen Xiang had refined a set of True Elemental Dans. He had slowed down his speed in order to cooperate with the Refining Simulation Technique.

After he had finished refining one set, he continued refining. He wanted to familiarize himself with the Refining Simulation Technique. Only then could he run the refining simulation for more complex dans.

To everyone's dismay, Chen Xiang kept on refining the True Elemental Dans without stop. From the evening to the late night, he had been refining. He had almost refined thirty sets, moreover, each set of five dans, and as usual all of top-grade quality. His alchemy skills had already left many in deep admiration, some alchemists held an even deeper respect for Chen Xiang, which was apparent in their eyes.

"I knew it, little rascal, your talent is very good! You have already grasped this technique in such a short while. However, you should know, when refining the Five Elements True Elemental Dan, the difficulty will rise many times compared with the True Elemental Dan! At that time, the consumption of your divine sense and your power will also be a lot more." Su Meiyao praised before reminding Chen Xiang to not take his future task lightly.

"Next, refine the Hundred Beasts Dan, and then the Elemental Spirit Dan. Use the Refining Simulation Technique for these two dans, before finally refining the Five Elements True Elemental Dan!"

Although Su Meiyao didn't show any surprise on the surface, deep within her heart she was extremely shocked. In the past, she had taken many years in order to master this technique, although Chen Xiang had only ran the refining simulation for the dan he was most familiar with, there was no doubt he had already crossed the threshold because his refining in reality was exactly the same as the refining simulation! This was clear proof that Chen Xiang was beginning to master this technique.

Seeing Chen Xiang take out the herbs of Hundred Beasts Dan, everyone was suddenly excited. It was quite clear that Chen Xiang was now going to compete and finish his two other dans soon. However, he had already used a lot of time for practicing, and only about three hours were left before the sunrise.

Everyone was even more curious, which three kinds of low-grade profound level dans was Chen Xiang going to refine? This had always been a secret, even Mrs. Li was not aware of it! The invigilating alchemists had kept everything confidential.

A lot of people had already left the square, only a few people remained, majority of which were the alchemists.

Obviously, Yun Xiaodao and the others would stay, they all sat closely to the stage, watching the furnace exuding five color rays.

Lian Yingxiao was together with Gu Dongchen and Wu Kaiming. They were all very interested in the final results. After all, Chen Xiang was the young man they most admired.

"Dean Lian, you better control your son! I'm telling you, this brat fear nothing on heaven or on earth! If angered, he would even dare to slaughter the Emperor's son!" Gu Dongchen said. His tone was very serious, he was warning Lian Yingxiao that if one day, because of the wrongdoings of his son, if he made of move on Chen Xiang first, Gu Dongchen would definitely stand beside Chen Xiang.

"After returning I'll strictly discipline him. Even I'm afraid of Chen Xiang's Slaughter Qi! How the hell did this brat kill so many people at such a young age to possess such a frightening amount of Slaughter Qi?" Lian Yingxiao solemnly exclaimed and nodded, he didn't doubt Gu Dongchen's words for a second.

"Later, when you learn of everyone he killed like he was slaughtering cattle, it will definitely scare the hell out of you!" Gu Dongchen said while laughing. Everyone happened to believe that the Dean and the Elder of the Beast Martial Sect, as well as the those Nirvana Realm martial artists of the True Martial Sect, had all been killed by Gu Dongchen. But the fact was, it was all due to Chen Xiang.

Gu Dongchen could be regarded as Chen Xiang's scapegoat in this matter, but he carried it very honorably.

[Chapter 0315 - A Step Further](#)

A Step Further

Everyone has watched Chen Xiang refine Hundred Beasts Dan, but now specially in the evening they felt it was even more stunning. The colorful beautiful rays radiating from the transparent furnace were even more dazzling, it made the onlookers feel intoxicated.

Chen Xiang was running the refining simulation of Hundred Beasts Dan in his mind. Although the process was somewhat complex, but he could still see every fine detail in his mind, his refining simulation was exactly similar to his refining in reality.

In less than hour, Chen Xiang had successfully refined a set of Hundred Beasts Dan!

"Start refining the Elemental Spirit Dan!" Su Meiyao's tone turned a little grim, because the Elemental Spirit Dan was a lot more difficult to refine compared to the Hundred Beasts Dan, moreover, its requirement for divine sense was very high; most of all its alchemy process was quite a lot different compared with other common dans.

After watching Chen Xiang complete the refining of the Hundred Beasts Dan, everyone in the square cheered up, for everyone was extremely curious as to what second low-grade profound level dan was Chen Xiang going to refine.

Everyone saw Chen Xiang take out a spiral shaped white grass and a thumb-sized flower, once these two spirit herbs were taken out, many were discussing about it in succession, particularly the alchemists, because they had never seen those herbs.

Those 7th level Alchemists were also discussing in low voice, according to their knowledge, these herbs were not for refining common dans, it should be some unconventional dan.

"Qianqian, what is he refining?" Yao Haisheng asked, he knew Wu Qianqian had been learning alchemy from Elder Dan, not to mention she was very close with Chen Xiang, he guessed she should know about it.

Yun Xiaodao, Xu Weilong and the others all turned their heads and looked at Wu Qianqian, waiting for her reply.

Wu Qianqian has been skimming through the memory in her mind, but she did not find any information related to these two herbs, she slightly shook her head and replied, "I also have no idea."

"Dean, you are knowledgeable, do you recognize what is it?" Wu Kaiming asked.

"I don't know." Gu Dongchen also had a pondering look on his face, he was recalling all the herbs he knew in the past ten thousand years, he gazed at Lian Yingxiao next to him, "Dean Lian, you are a lunatic collector, do you know what it is?"

Lian Yingxiao shook his head and said, "I have no idea, it seems we should wait till the end for the announcement."

When everyone was in anticipation to know the answer, an arrogant yet unenthusiastic voice came over, "It is the Divine Spirit Flower and the Raising Soul Grass, these are the herbs for refining Elemental Spirit Dan!"

Hearing this voice, the entire square suddenly broke into argy-bargy in low and deep voices, to everyone's surprise, it was the Elemental Spirit Dan, rendering everyone to think of the Elemental Spirit Dan from before, which had once appeared in the Danxiang Tower, and then again in the auction. And finally sold at a hefty price of fifty million crystal stones.

"This is Yue Jianglin's voice! It seems that the Elemental Spirit Dan from the auction was refined by Chen Xiang, this guy had been screwed over completely, he must be fuming in anger." Gu Dongchen said while laughing.

Lian Yingxiao and Wu Kaiming too bursted into laughter, at the same time they were surprised that Chen Xiang could unexpectedly refine such a difficult dan, moreover, also could find such rare and precious herbs.

"Yue Jianglin, this guy still has not returned to give the Elemental Spirit Dan to his son, I presume he wanted to see whether or not he could find the person who screwed him off of his fifty million crystal stones." Hua Xiangyue said with a mischievous smile, Liu Menger too had a naughty smile hanging on her face, as they too were the participants in swindling Yue Jianglin.

Hua Xiangyue and Liu Menger heaved a sigh of relief, because Chen Xiang had the herbs of Elemental Spirit Dan, this meant that Chen Xiang still had the chance to win the first place.

Zhu Rong enviously looked at Chen Xiang, "So it was Younger Brother Chen's Elemental Spirit Dan, after returning I'm going to make sure to get a treat from our rich friend."

Fifty million crystal stones even for these family juniors was considered a fairly large sum, Yun Xiaodao and the others were making preparation for a big treat.

But they all didn't know that Chen Xiang had spent it entirely for buying the Dragon Soul.

Chen Xiang happened to be refining the Elemental Spirit Dan, realizing this the eyes of every alchemist lit up, for them it was a rare sight, because they would be able to clearly witness the entire refining process of the Elemental Spirit Dan, although they were not sure whether or not Chen Xiang would be able to last till the end and be successful.

Chen Xiang processed the herbs before placing them inside the furnace. This was his first time using the Illusionary Brilliant Furnace to refine such a difficult dan, and also his first time using the Refining

Simulation Technique, moreover, the deductions he would have to run in refining simulation would be much more.

Because when refining the Elemental Spirit Dan, the herbal Spirit Qi would need to assimilate with his divine sense, and the assimilated amount needs to be taken in count during the refining simulation. But as he had already refined the Elemental Spirit Dan in the past, it would not be very difficult for him, he could run the refining simulation according to his memory!

But, if he was refining those high level dans which he had never refined, it would be difficult for him to run the refining simulation, instead the most needed would be his sense of perception, his perception would show up while precepting during the refining simulation, then according to the error occurred in the refining simulation he could correct those errors in the reality.

This was the essence of the Refining Simulation Technique, it needed an extraordinary perception and powerful divine sense to support!

There were variety of aged auxiliary herbs, Chen Xiang needed to make an accurate estimation depending on the age of those herbs, only then could he carry out the refining simulation.

Everyone could see, after a large number of herbs were burned under the intense flames, one after another dazzling glows surged out. In the middle of the night it was extremely beautiful, Chen Xiang's transparent furnace was as if it was bearing a peerless treasure inside, making everyone marvel again and again, and making everyone in audience feel it was worth watching the tournament overnight.

At this point, a frown appeared on Chen Xiang's forehead, and he became extremely serious. Because he must pay attention to the situation inside the Illusionary Brilliant Furnace, he must control the flames, must use the divine sense to suppress those tyrannical Herbal Spirit Qis, must control the Illusionary Brilliant Furnace congealed out of the mana... and simultaneously he must do exactly same things in the refining simulation, which was quite taxing, and exactly for this the Refining Simulation Technique indeed had a very high requirements.

Presently for Chen Xiang it was like refining the Elemental Spirit Dan in two different furnaces at the same time, yet it was more difficult than to simultaneously refine in two furnaces, because in his mind he must precisely carry out the refining simulation, the visualization must be similar to that of reality, if some problem occurred in the simulation, then he would be have to make the following adjustments in reality, in his visualization he had to make sure he crossed the t's and dot the i's, otherwise if the visualization in itself was wrong, then it would lead to failure!

Therefore, in order to reduce the failure, the refining simulation could not be too fast, yet it needs to a bit faster than the reality!

Suddenly, Chen Xiang knit his eyebrows, the things he was expecting finally happened, because in the refining simulation of the Elemental Spirit Dan a problem appeared, which lead to an immediate failure, and the furnace happened to blew up!

The instant he found the problem, he quickly calmed down! The furnace blew up because he had allowed the Herbal Spirit Qis to assimilate too much with his divine sense, he immediately made the adjustment, and stopped those ownerless Herbal Spirit Qis from absorbing too much divine sense, this way, he rectified the problem arose during the refining simulation in his mind.

After he had successfully rectified the mistake, once again in Chen Xiang's mind appeared another furnace of Elemental Spirit Dan, and he once again began carrying out another refining simulation, but this refining simulation started from the point where he had rectified the mistake.

This allowed him to once again experience the fierceness of the Refining Simulation Technique, if the refining simulation was correct, he could know where he was making a mistake in advance, and then he could rectify it!

Other only thought that Chen Xiang was only concentrating in alchemy, and it was very difficult. However, nobody knew Chen Xiang was learning another alchemy technique! However, everyone watched him in relish, those alchemists watched him even more dumbfoundedly, because they could watch the refining of the legendary most difficult to refine Elemental Spirit Dan.

[Chapter 0316 - Potential](#)

Potential

Only those alchemists who had a certain basic knowledge were able to detect what made it difficult for the Elemental Spirit Dan to refine. They noticed that those rising dense Herbal Spirit Qis were absorbing something, and after absorbing their amount would increase by a lot, then they would once again be compressed by Chen Xiang, lest the Herbal Spirit Qis expand because of their increasing mass.

These Herbal Spirit Qis were also somewhat similar to the spiritual power, however, the spirit inside the herbs was, pure, uncontrolled yet very oppressive.

"So it was like this, this little rascal had truly opened my outlook, really made me admire him! No wonder, an honorable Empress like you will have a soft spot for this little rascal." Hua Xiangyue mischievously said with a smile, she had been staring at Chen Xiang's transparent alchemical furnace, she too was an alchemist, but she had not refined the Elemental Spirit Dan, so of course, she would intently observe the refining process.

Liu Menger tenderly scoffed and said, "Aren't you too?"

"Are you jealous? Worried that I'll steal him?" A charming smile appeared on Hua Xiangyue's face, as she replied while stroking the silky hairs draped over Liu Menger's bosom.

"If you can steal him, consider it your win." Liu Menger stuck out her tongue, her pretty eyes glistened with a complex look, while looking at Chen Xiang's serious and handsome face, she couldn't help but admit, she really liked this little rascal.

Bit by bit time slowly passed away. The originally glittering in colorful lights Illusionary brilliant Furnace of Chen Xiang, now after the fusion, the Herbal Spirit Qis turned into a dazzling white light, moreover, all the fused herbal powder and the Herbal Spirit Qis had been divided by Chen Xiang into three groups. Much to everyone's dismay Chen Xiang was going to refine three Elemental Spirit Dan, which once again scared the hell out of every other alchemists.

From the records, they remembered only one dan was possible from one set of herbs, however, Chen Xiang had subverted their knowledge, and was even refining three!

Everyone who knew about alchemy, knew if they wanted to refine many dans at once, they need to retain some of the Herbal Spirit Qi and herbal powder, and need powerful divine sense to suppress the instability which would occur during the solidification process of many dans, if during the solidification process, even one dan was unsuccessful, then the entire batch would fail.

In order to ensure success, many alchemists would chose to let out a part of Herbal Spirit Qi and herbal powder from the vent of the alchemical furnace, this way, although the dans would be less, at least they would be successful, they would not waste these precious herbs. This was also written in many textbooks of alchemy, and over time, alchemists happened to believe this was a matter of course.

But Chen Xiang rarely implemented this, that was why the dans he refined happened to be a lot in number, and also of top quality!

Inside the Illusionary Brilliant Furnace everything was happening same as Chen Xiang has visualized in his refining simulation, it was exactly the same, which made Chen Xiang even more familiar with a kind of foreseeing feeling, so long as he could grasp this feeling, it would then take him one step closer to mastering the Refining Simulation Technique, this superb alchemy technique.

Chen Xiang's refining three dans was also for the sake of increasing the price a bit, even if he failed in refining the Five Elements True Elemental Dan, he would still have the opportunity to win first, if he could refine the building Foundation Dans, he was sure he would be able to obtain victory.

If not for him not carrying the Azure Profound Fruit with him, he'd probably have finished the three low-grade profound level dans, moreover refining a set of four Building Foundation Dans would have scared a bunch of alchemists.

Now the dawn was just an hour away, and inside the transparent furnace of Chen Xiang, the three groups of mass of qis shining in white light, after a burst of violent jolt, suddenly started gathering together. The mass of qis started rotating insanelly as they slowly began to contract, before the prototype of dans appeared.

At this point everyone was watching anxiously, while in the simulation the refining of the three Elemental Spirit Dans had already been finished. He for the first time had refined three Elemental Spirit Dans, and only because he had learned the Refining Simulation Technique, he dared to try. This kind of success made him feel a kind of inexplicable joy.

The three Elemental Spirit Dans had been successfully refined. As Chen Xiang held them in his palm, upon his serious face a sliver of smile appeared, on the other hand the other fourteen alchemists on the stage felt a lot of pressure. Chen Xiang refining the unconventional Elemental Spirit Dan was totally out of their expectation, moreover, it was three at once, they had heard that during the auction, one Elemental Spirit Dan sold for 50 million crystal stones, if its value was calculated in accordance with this, they would definitely lose.

"Last time this little rascal could only refine two, not to mention he was using that powerful furnace of his to refine, now he had not even relied on any alchemical furnace, yet he has refined three dans! I've really squeezed out his potential." Hua Xiangyue's face was filled with a smug smile, she felt she had done a good thing, now her mood was as if she was guiding a proud disciple, and this disciple had also performed very amazingly.

Chen Xiang now felt very grateful to this seductress, Hua Xiangyue, he suddenly understood why Hua Xiangyue intentionally made him draw that tattered alchemical furnace, it was all deliberately done in order to make him get rid of his dependence on the Brilliant Flame Dragon Furnace.

Chen Xiang speculated the last two games had all been arranged by Hua Xiangyue, because during the last assessment, he felt that the secret of his Brilliant Flame Dragon Furnace had been exposed.

His speculation was not far from target, it was also because of this that he was having a kind of strange feeling.

"This brat is definitely going to refine the Building Foundation Dan, his swindling had made me suffer miserably!" Gu Dongchen wanted to cry but he had no tears, thinking of spending 20 million crystal stones to buy ten Building Foundation Dans, his heart once again secretly throbbed in pain.

"Brother Gu, you mean to say the ten Building Foundation Dans in the auction was his?" Lian Yingxiao asked, he was slightly shocked.

"Yes!" Gu Dongchen sighed and said.

"Strange, when you were bidding for the Building Foundation Dan, Liu Menger was increasing the price with you! Even when Yue Jianglin was bidding for Elemental Spirit Dan, Liu Menger was also competing! As far as I know, Liu Menger's apprentice Xue Xianxian is Chen Xiang's wife, among them..." Lian Yingxiao's word shocked Gu Dongchen.

Gu Dongchen clenched his fist and cursed, "This brat definitely must have instigated Liu Menger to increase the price, Liu Menger is a very proud woman, why can this brat break a deal with her?"

Wu Kaiming also felt it was highly likely, "Yue Xiangling had been swindled most miserably, Chen Xiang must have guessed Yue Xianglin will definitely buy the Elemental Spirit Dan, so he must have ask Liu Menger to continue increasing the price."

"I know Liu Menger the best, when I was pursuing her, she didn't even pay any attention to me, I have stalked her for thousands of years, it was still the same, she will never do such kind of things! Is it because of her beloved disciple?" Lian Yingxiao said.

Gu Dongchen and Wu Kaiming also could not understand, an honourable Empress, how could she mix in with their insidious young martial uncle, and do such wicked deeds? It should be known that Liu Menger was not lacking crystal stones or True Elemental Dans or any other thing, they had no choice but to ask about it later.

Lian Yingxiao was now even more shocked with Chen Xiang's ability, much to his dismay Chen Xiang was even able to move Liu Menger. In the past he had invited Liu Menger to his birthday, but Liu Menger never came.

"It seems I have to manage my Lotus Island's people, I can not allow them to offend Chen Xiang, this brat is too terrifying!" Lian Yingxiao muttered, because he knew Liu Menger's character, if Chen Xiang could make Liu Menger lower herself and do illegal things, then he could also ask Liu Menger to fight for him too.

[Chapter 0317 - Challenging The Limit](#)

Challenging The Limit

Show TL Note

Chen Xiang placed all the Hundred Beasts and Elemental Spirit Dans into a box, which had also been specially prepared by the Danxiang Taoyuan in order to prevent cheating.

After he finished refining the Elemental Spirit Dan, Chen Xiang closed his eyes to recover his strength and spirit he had consumed a while ago, because he had to next refine the Five Elements True Elemental Dan.

During the auction, he had bought two Five Color Profound Fruit, and later Elder Dan had given him Five Color Lotus Seed, Colorless Lingzhi and Five Leaf Grass, two of each.

In other words, he had two of each herb, but he could only refine a single set because he must keep the other set for planting.

Now, others once again began to speculate which low-grade profound level dan was Chen Xiang going to refine, many of them reckoned it was the Building Foundation Dan, in particular Yun Xiaodao, Zhu Rong and the others; they had all obtained a lot of Building Foundation Dans from Chen Xiang.

But, if he had the Azure Profound Fruit, then he would have already begun refining.

"Is he still going to refine? He doesn't have the Azure Profound Fruit. If he had it, he would have already begun refining the Building Foundation Dan. The Building Foundation Dan is even easier to refine compared to the Elemental Spirit Dan." Liu Menger doubtfully said.

Hua Xiangyue glancing at resting Chen Xiang, started frowning, her face was filled with an inexplicable seriousness, moreover, also a little surprise, it seemed as if she caught sight of something, but she could not confirm.

"What?" Liu Menger noticing Hua Xiangyue's complexion, suddenly asked.

"I'm not sure, I've to look again! Who the hell taught him these alchemy techniques, he unexpectedly arrived at this point." Hua Xiangyue shook her head and said.

Suddenly, she saw Chen Xiang came up with a lot of herbs, her pupil fiercely contracted, her tender body slightly shocked, her breathe turned extremely rapid, "Impossible, have this brat accomplished that step?"

Seeing the astonishing change in Hua Xiangyue's complexion, Liu Menger could tell Chen Xiang was definitely going to do something astonishing, she asked, "Isn't that the Five Color Profound Fruit he had bought in the auction? There are still some other herbs... are they the materials for the Five Elements True Elemental Dan!"

Hua Xiangyue took in a long deep breath, closed her pretty eyes, nodded her head, "Yes, that is Five Color Lotus Seed, Colorless Lingzhi, Five Leaf Grass! He certainly had not refined the Five Elements True Elemental Dan before, but now he wants to try..."

"What?!" Liu Menger was surprised, her complexion also took a turn, "He wants to refine a dan he had never refined; under this situation, does he... he know the Refining Simulation Technique that you spoke of?"

"En! That's why I'm suspicious, if he knew the Refining Simulation Technique, then he must have an alchemist with extraordinary alchemy techniques guiding him from the back!"

Some alchemist with good insight, with one glance recognized those dazzling five color herbs Chen Xiang had taken out, making a bunch of alchemist discuss in low voice.

Five Elements True Elemental Dan was the most favourite dan for geniuses possessing multiple veins, for martial artists with multiple veins it was greatly advantageous. Rumor had it, a Five Elements True Elemental Dan could allow a 1st level True Martial Realm martial artist to advance to 2nd level, such was the amount of True Qi contained inside it. Even the martial artists who didn't have multiple veins could still take it, because after the Five Elements True Elemental Dan had been congealed, it would produce a kind of very special kind of True Qi.

Chen Xiang speculated this unique True Qi was precisely the Universe True Qi, this kind of True Qi was indeed extremely mystical, it could very easily be assimilated into any kind attribute, such as, after his five elements True Qis were fused, it could be applied to the Azure Dragon Slaughtering Devil Blade, yet could release powerful wood attribute True Qi, and its strength would be several times before the fusion.

"In the auction the Five Color Profound Fruit definitely must have been bought by this brat." Lian Yingxiao said, at that time he was competing with Chen Xiang.

"The Five Elements True Elemental Dan is rather more expensive than Building Foundation Dan, it also comparatively sought-after thing in the auction, if taken a few of them, then it can make its user to breakthrough, it is also known as king dan among the low-grade profound level dans!" Gu Dongchen exclaimed.

The Five Elements True Elemental Dan's herbs weren't so rare as that of Elemental Spirit Dan, now and then they would appear in the Chenwu Mainland, because of this many alchemists rather had some understanding on the Five Elements True Elemental Dan.

Chen Xiang began processing the Five Elements True Elemental Dan's herbs, beside the four main herbs, there were still some other auxiliary herbs with more than three thousand years of age, generally the auxiliary herbs were Ginseng, Lingzhi like things with a large number of pure Spirit Qi contained in it.

Chen Xiang processed the herbs a little slowly, not as proficiently as before, everybody could tell he was not familiar with the herbs, other couldn't help but doubt whether or not he had refined the Five Elements True Elemental Dan.

One must know the herbs of the Five Elements True Elemental Dan were as precious and rare as the herbs of the Building Foundation Dan, but the difficulty to refine it was same as the Elemental Spirit Dan. With one set of herbs the number of dans which could be refined was similar to the Hundred Beasts Dan, six or seven. If Chen Xiang could successfully refine the Five Elements True Elemental Dan, there was no doubt he would be getting first.

At this time, one after another, all the other alchemists on the stage finished refining, all these alchemists had refined the Hundred Beasts Dan, their alchemical furnaces were very simple and crude, the success rate of refining the Hundred Beasts Dan was rather high, and then refined some unconventional dans, some of which were costlier while some were cheaper, they were not like Chen Xiang who could take out so many rare and precious herbs to refine some noble low-grade profound level dans.

These alchemists were indeed in 6th level, they could all successfully finished, and not one of them had their furnace explode, or any failure, after all they had refined a massive amount of dans, all of them had certain strength.

Only Chen Xiang was not finished, he had not refined the final low-grade profound level dan, and the time was pressing, it would very soon be over.

They could unexpectedly watch someone refine the Five Elements True Elemental Dan, which made these alchemist's hearts throb rapidly with emotions, they could not control themselves, yet all of them didn't know; Chen Xiang was refining the Five Elements True Elemental Dan for the very first time, he was under a huge amount of pressure.

The alchemists on stage naturally didn't want Chen Xiang to be successful, otherwise they would not have the opportunity to win.

"This little rascal is truly going to refine the Five Elements True Elemental Dan for the first time, he is really daring, if he is successful, then he would have grasped the essence of Refining Simulation Technique!" Hua Xiangyue frowned, when she had to learn the Refining Simulation Technique, she had to suffer a lot of bitterness, while Chen Xiang had not even reached thirty, he had already started learning, she felt very jealous of Chen Xiang's talent.

When Chen Xiang was resting a while ago, he had been carefully listening to Su Meiyao describing the essentials of refining the Five Elements True Elemental Dan, only now was she finished speaking, and now, he was also finished processing the herbs.

He was slowly processing the herbs, it was all to meticulously observe those herbs using his divine sense, he must thoroughly understand these herbs, only then could he carry out an accurate refining simulation, now he felt it was just about enough, he slightly took a deep breath, and released the Illusionary Brilliant Furnace.

Watching Chen Xiang stopped processing the herbs, everyone knew he was ready, everyone holding their breath, watched carefully, they were worried they would miss some details, because this kind of seen was rarely seen, maybe in their life they could only see it once.

Hua Xiangyue and Liu Menger were also very tensed, if Chen Xiang had truly master the Refining Simulation Technique, such kind of talent was very heaven defying.

The same was true for Su Meiyao, Bai Youyou and Long Xueyi, all of them were a little tensed.

The entire square was suddenly enveloped in a very stifling and tensed atmosphere, making it difficult to breathe.

[Chapter 0318 - The Magical Effect Of Mana](#)

The Magical Effect Of Mana

Show TL Note

After placing the herbs inside the Illusionary Brilliant Furnace, Chen Xiang immediately released the flames. At the same time, he had also released all of his divine sense to wrap the alchemical furnace in order to sense the tiniest bit of changes taking place inside it. As these changes passed into his mind, he also began carrying out the refining simulation; with his brain operating to the utmost, he executed various calculations which was very taxing to his mind.

Not long after carrying out the refining simulation in his mind, a problem had already appeared. Because the flames were too big, they were not uniform, and hence it led to the burning of the auxiliary herbs into ashes. Even the main herbs weren't spared, they too were not uniformly heated, and soon half of the herbs were about to be destroyed.

After knowing this kind of error was going to take place, Chen Xiang quickly adjusted the flames in accordance to the error in the refining simulation. His reaction was needed to be extremely quick; if it was even a little bit slower, it would then lead to failure.

After the adjustment, he successfully modified the refining simulation from the point where the error took place. Meanwhile, in accordance with the present situation, he once again ran the refining simulation in order to predict what would happen next and have enough time to carry out the adjustments. By rectifying dangerous errors, Chen Xiang was able to avoid the tragedies that took place in the refining simulation.

Chen Xiang had only started for a short while, but he had already encountered dozens of problems, all of which he had rectified at the most critical point, making him feel extremely tired. At this point, he also felt a slight headache; it was his first time refining the Five Elements True Elemental Dan, so during the refining simulation, there were too many aspects involved. Because of that, he could not help but increase his speed of deduction, and exactly for this, in terms of the mental aspect, the Refining Simulation Technique had very high requirements.

In the transparent alchemical furnace, the five-colored auras were even more dazzling, as if there was a small sun in front of audience's eyes. This made it difficult for everyone to watch what was happening at the center of the dazzling lights.

Presently, the sky was still dark, yet when the light emitted from Chen Xiang's alchemy illuminated the whole square, it was as if it was still daytime. What made everyone feel surprised the most was the fact that the aura unexpectedly made everyone feel extremely comfortable; it had a kind of inexplicable warmth.

The main ingredients of the Five Elements True Elemental Dan were highly resistant to heat; they were required to be burned for a long duration. In addition, those auxiliary herbs were too susceptible to the heat, so they could not be heated too much; this was the most crucial point which should be duly noted while refining the Five Elements True Elemental Dan.

However, this was not the difficult point for Chen Xiang because he had the Heavenly Sun Fire Spirit. In a very short time, he had already incinerated the four main herbs, and this process had also occurred at

the very same moment when the auxiliary herbs were incinerated into herbal powder. Then he mixed them together with the herbal powder of the main ingredients.

Suddenly, Chen Xiang's body slightly shook while his body was drenched in sweat. In the refining simulation, the furnace happened to have exploded when he was fusing the five different attributed True Qi; the divine sense he had released was not strong enough, leading to irrational movements of the tyrannical Herbal Spirit Qis. The Herbal Spirit Qis broke out of their restraints, causing them to become uncontrollable, and thereby causing the destruction of the whole alchemical furnace.

At this point, Chen Xiang felt that he didn't have enough divine sense left for use because he had to maintain the Illusionary Brilliant Furnace too! Just when he thought it was over for him, he immediately released the Mana which bounded those tyrannical Herbal Spirit Qi.

Without trying, one would never know about the final outcome! Much to Chen Xiang's surprise, the Mana was unexpectedly so powerful that in an instant, it suppressed those Herbal Spirit Qi and made them docile and obedient.

But he didn't continue to use Mana in alchemy, because he didn't completely understand the characteristics of Mana; it would be difficult to carry out the refining simulation without knowing all the characteristics of Mana. As such, he could only continue to use divine sense. Although he knew that the Mana was definitely better than the divine sense in alchemy, at present, he couldn't try it with ease because the Five Elements True Elemental Dan was already halfway done; he could not take it lightly.

After crossing the hurdle, Chen Xiang heaved a sigh of relief. In his mind, he once again quickly ran the refining simulation as he continued suppressing those tyrannical Herbal Spirit Qi with his divine sense.

Now he must use the appropriate flames to refine the various Herbal Spirit Qis and herbal powders to completely fuse them together.

The Five Elements True Elemental Dan was rather different from the previously refined dans. When refining other dans, the Herbal Spirit Qis released from the various herbs, although they repelled each other, had the same attribute. But as for the Five Elements True Elemental Dan he was refining, it had five attributes which were mutually exclusive. That was why it was even harder to fuse them.

When Chen Xiang was running the refining simulation, he encountered endless problems because the flames had to be extremely precise, and so he also continued to adjust, ran new refining simulation, then adjust once again. Afterwards, he would begin a new refining simulation...

Such continuous cycle was quite taxing for him, evidently represented by the veins on his forehead which had already started bulging. He was now experiencing an excruciating headache, yet he must continue to endure. If not, then maybe because of the pain, he might make a mistake in the refining simulation and lose everything.

"This brat had really learned the Refining Simulation Technique! Who in hell is his teacher? But from the looks of it, he must be using it for an unfamiliar dan for the first time, I hope he can endure till the end!" Hua Xiangyue, from Chen Xiang's expressions, was sure that Chen Xiang was suffering in agony from making those continuous adjustments and running new refining simulations one after the other. His skill seemed to be dull and dry; if one is not familiar with the process, then one would only feel a headache.

It was Chen Xiang's first time experiencing such consumption of his spirit, but still had to continue the adjustments and the refining simulations again and again. Of course he could no longer endure; he had already spent too much of his divine sense, and he was not used to it.

Chen Xiang felt time was passing very slowly; he could not wait to end this painful and tedious process at once. At this point, the sky was already a little bright, but the audience hadn't even noticed it because the light released from Chen Xiang's alchemical furnace were extremely dazzling.

Chen Xiang had no idea how long had passed; he just kept on doing those two things over and over again...

Suddenly, Chen Xiang's mind was jolted because the visualized furnace in his mind had suddenly lost its aura; only the flickering flames were left in the furnace, and the rest of the things were completely transparent!

Seeing this, Chen Xiang knew he was halfway done, now he could finally end the painful journey!

Everyone had just adjusted to those dazzling auras, but the sudden disappearance of the aura left only darkness in front of their eyes; only a weak, flickering fire light originating from the furnace was left.

After the Herbal Spirit Qis of five attributes had been fused, they had turned invisible and colorless. No matter how good their eyes were, it was difficult to see and Chen Xiang too could only feel.

Regardless if it was the herbal powder or the Herbal Spirit Qi, all had disappeared. Neither too big nor too small flames were only burning at the central layer of the transparent alchemical furnace. At this time, Chen Xiang knew that it was time to congeal the dan.

During the refining simulation in his mind, he once again perceived the explosion of the furnace because his divine sense wasn't adequate. In the moment of desperation, he once again released the mystical mana like last time, and using the mana, he squeezed the invisible herbal powder and the Herbal Spirit Qi together. He fused them in an instant, and at the same time, he quickly used the Mana to divide that large transparent mass of Qi into ten parts before finally withdrawing the mana.

After realizing the mystical effects of Mana, Chen Xiang was brimming in happiness, because using mana instead of divine sense was a lot better. Even if he had adequate divine sense, it would still take him some time to finish, but with mana, it was finished in an instant.

Ten transparent cyclones started rotating in varying speed as he continued to run the refining simulation in his mind. Even if he had arrived at the last step, he had still encountered a series of errors; because during the solidification of dan, he must use his divine sense to uniformly squeeze those cyclone and congeal the dan out of these cyclones.

In a short while, the furnace had already exploded a dozen of times in his mind, but in timely moments, he had quickly rectified those problems in reality. Because of which, nothing had happened in reality.

Dawn has already arrived, and the sunlight shone upon the square. Mrs. Li also had no idea if Chen Xiang was finished refining or not, but according to the rules, she must call a stop to the tournament.

"Finished!" Chen Xiang suddenly drew a long deep breathe, then laid down on the ground facing the sky; he was too tired to even move.

As the sunlight shone upon the transparent alchemical furnace, the ten exquisite dans suddenly glittered with a faint gloss. Everyone with good eyesight realized that Chen Xiang had finished refining the Five Elements True Elemental Dan!

Edited By: Moxie

Sorry for the delay, still travelling around. So there is delay in translating. For consistent release you have to wait till 31st of Jan.

With regards,

Ash

Chen Xiang retracted the Illusionary Brilliant Furnace; from his face, it was quite clear that he was completely exhausted. He quickly swallowed a few True Elemental Dan to replenish himself, lest he found himself in an unexpected situation.

A Five Elements True Elemental Dan was worth at least a million crystal stones; ten would be worth ten millions or so. In addition, there were also three Elemental Spirit Dans and ten Hundred Beasts Dans. With such amount, Chen Xiang winning the tournament was already irrefutable.

Although those 7th level old alchemists and Mrs. Li had seen Chen Xiang refine the three different low-grade profound level dans with their own eyes, they still had to check it. As a matter of fact, they even more wished to have a look at the dan refined by Chen Xiang.

After Chen Xiang's True Qis of the five elements had been fused, they would turn into the invisible and colorless Universe True Qi. The same was true for the Five Elements True Elemental Dans; they looked completely transparent and were only the size of a thumb, however, the True Qi they contained was extremely huge in quantity.

"This little rascal has succeeded; he had already crossed the first threshold of the Refining Simulation Technique. He will definitely become a high-level alchemist, it is just a matter of time." Hua Xiangyue said, her tone was filled with emotion.

There was no need to check, Chen Xiang was directly declared as the winner. Although the other alchemists felt unhappy, they had no choice but to concede. The total value of dans refined by Chen Xiang was definitely the top, and if they went to argue, they would only bring disgrace upon themselves.

The first prize was the ten drops of ten thousand years old Spirit Milk. Since Chen Xiang currently didn't know the true use of ten thousand years old Spirit Milk, he didn't put it in his mind. He wanted to be the winner just for the fame!

When he previously walked up to the high rank tournament stage, the 6th level Alchemists on the stage didn't take him seriously; even among the audiences, many believed that he was just a low 5th level Alchemist whose defeat was already inevitable. But now, he had actually become the winner of the

tournament, moreover, he had won very beautifully. His alchemy technique was not only superb, he had even portrayed it very vividly. His amazing skills had shook everyone's heart again and again; from now on, he would become a legend of the Danxiang Taoyuan Grand Meeting!

Under the stage, Yun Xiaodao, Zhu Rong and the others were all cheering for Chen Xiang. They felt lucky to be friends with an alchemist who had an immeasurable future. At the very least, they didn't need to be worried about searching an alchemist to refine a few dans for themselves.

"The winner of the high-rank tournament is Chen Xiang. This marks the end of the alchemy tournament, but the Grand Meeting will continue..." On the stage, Mrs. Li gave a speech, while Chen Xiang, after obtaining the Spirit Milk, sat down on the ground to quickly adjust his state. For many years he had often encounter various types of dangers, and because of that, he had developed this prudent habit.

"Chen Xiang, I'm a disciple of the Free Immortal Sea, have you ever killed a disciple of our Free Immortal Sea?" A participant on the stage loudly asked, causing quite an uproar among the audiences. The Free Immortal Sea currently had a very good reputation because they had been claiming that they were a lot stronger than the Extreme Martial Sect.

Chen Xiang offending the Free Immortal Sea was nothing surprising, but no one had thought that the Free Immortal Sea would sought after Chen Xiang now.

Nevertheless, Chen Xiang kept his eyes shut and calmly said, "Yes, so what? Since they wanted to kill me, killing them in return is also normal!"

"Humph, in the Black Tortoise Mysterious Realm, haven't you also crippled more than thirty True Martial Disciples of our Free Immortal Sea?" A middle-aged alchemist of Free Immortal Sea once again asked.

"Why are you asking a rhetorical question! Whatever you want to say, just say it directly!" Chen Xiang was obviously not afraid of the Free Immortal Sea since he had the Extreme Martial Sect behind him.

"Then follow me to the Free Immortal Sea to accept our punishment!" The middle-aged man coldly replied.

Chen Xiang opened his eyes and started laughing, "What if I say no, what are you going to do?" While speaking, the smile on his face disappeared as his complexion had rather become gloomy and terrifying. God knows when an insidious Slaughter Qi covered the entire square, making everyone feel extremely frightened.

"Chen Xiang, between you and our True Martial Sect, there is still unsettled business. We will settle it today!" An old man fearlessly walked up to the front and said.

"Our Beast Martial Sect has also been tolerating you for a long time, Chen Xiang, today you have to clear everything in front of so many people." A man from the Beast Martial Sect shouted.

The sky was bright and many people had started arriving. At present, there were a lot of people as well as various other sects in the square.

Chen Xiang sneered, "Clear? Everything has long been cleared, it's just you could not accept it, that's all! If those guys had not messed with me first, I wouldn't have bothered to waste my strength. This world

follows the law of the jungle. For they thought I was weak and tried to bully me, so I, in order to protect myself, did what a normal person would do."

Mrs. Li was a little nervous. Much to her dismay, all the sects which had grievances with Chen Xiang had come here.

"Indeed it's the law of the jungle. In my eyes, you are just an ant, isn't that right? Can't I casually pinch you?" A sneer came before a middle-aged man garbed in white robe from god knows from where flew up here. He landed in front of Chen Xiang, and just as he appeared, an oppressive pressure was released by him, suppressing the Slaughter Qi released by Chen Xiang.

Meanwhile, the True Martial Sect's Dean, Tang Yichao, also appeared behind the white-robed middle aged man and angrily glared at Chen Xiang.

Chen Xiang, with just a single glance, sensed that the white-robed middle-aged man was a Nirvana Realm martial artist; he speculated that he was the Free Immortal Sea's Dean or else why would Tang Yichao stand behind him?

Dean level characters had appeared, and their appearance was all just to attack Chen Xiang. Everyone felt very powerless; despite how much of a genius Chen Xiang was, he was still an ant in front of them.

"Whoever dares to attack Chen Xiang, I'll destroy his whole sect, I'll not spare even the fowls and dogs!" A majestic and overbearing sound came, startling everyone. Perhaps only the Dean of the Extreme Martial Sect, Gu Dongchen, could speak such words.

Many had not seen Gu Dongchen, but they all recognized the bald, Wu Kaiming. Noticing Wu Kaiming following a strapping young man, everyone guessed that he was Gu Dongchen!

"Xiao Ziliang, it's really you! So you have founded the Free Immortal Sea! I truly don't know where all your courage is coming from. You even dare to clamor with our Extreme Martial Sect!" Gu Dongchen sneered at the white robed middle-aged man.

Xiao Ziliang! Information about him soon appeared in Chen Xiang's mind. Shocked immediately overwhelmed him, and it was also similarly true for everyone else. Xiao Ziliang was a character of Huang Jintian's era! He was also an Extreme Martial Sect's disciple who had once fought with Huang Jintian for the Dean's position.

"Little Gu, I'm not afraid of you, you are still too tender!" Xiao Ziliang was two generations older than Gu Dongchen; he was naturally not afraid. However, in this world, the strength didn't come from one's seniority. In the end, it all comes down to whose fists were bigger. Not to mention Xiao Ziliang had himself left the Extreme Martial Sect, he didn't have a tinsy-winsy relation with the Extreme Martial Sect.

"Hahaha... do you dare to fight with me?" Gu Dongchen said with a laugh before a golden light emerged out from his body. He released a domineering and oppressive pressure, such that Xiao Ziliang and Tang Yichao could not help but step back a little. At the same, everyone else on the square collapsed on the ground, they had been completely deterred by Gu Dongchen's strength. They all felt they that were not even as good as ants.

Chen Xiang, who was behind Gu Dongchen, also felt extremely uncomfortable; he felt that, at this point, Gu Dongchen had finally revealed all of his strength.

[Chapter 0320 - Disdaining the World](#)

Disdaining the World

Translated By: Ash

Edited By: Moxie

Last time in the Southern Wasteland, the Beast Martial Sect and the Proud Sword Sect both acted against Chen Xiang. However, the materialization of Perishing Golden Body by Gu Dongchen made the Deans realize that he was a Nirvana Realm martial artist who had crossed seven tribulations, and that was why Proud Sword Sect's Yue Jianglin had to furiously leave at that time.

"This guy has crossed the eighth tribulation, that's the disdaining the world aura! If he can cross the ninth tribulation, then he can break the space and ascend to the Heavenly Realm, that's why it can be said that he is strongest in the Mortal World." Su Meiyao was also taken aback; she could not help but marvel in astonishment.

Above the tower, two beauties were also itching for action, but just as they were about to move, they were incomparably surprised.

"Is that the disdaining the world aura obtained after crossing the eighth tribulation? Very formidable!" Liu Menger, thinking of the seventh tribulation she would be crossing sooner or later, could not help but lightly sigh. For every Nirvana Realm martial artist, crossing a tribulation was extremely terrifying.

"Menger, you are not weak, the seventh tribulation should not be problem for you! When I was as strong as you, I was able to cross the seventh tribulation with ease." Hua Xiangyue said.

If Cheng Xiang knew that Hua Xiangyue had crossed the seventh tribulation, he would certainly be dumbfounded. He already knew Hua Xiangyue was hiding a lot of secrets, but he couldn't ask anything to her.

Now everyone understood why the Extreme Martial Sect was so strong. Not only was its Dean too overbearing, he was also valiant. He could shelter his own disciple from bullying.

"Little Gu... you, you have actually arrived at this step already!" Xiao Ziliang had a solemn expression as his eyes carried a trace of fear; he had truly underestimated Gu Dongchen.

Tang Yichao was even more frightened. Last time, when Gu Dongchen had revealed he had crossed the seventh tribulation, it scared the hell out of him. However, he would have never expected that Gu Dongchen was still concealing his strength.

"Xiao Ziliang, not to mention my grandmaster, you can't even compare with me! If my master is here, with just a single finger, he can pinch you to death!" Gu Dongchen proudly said; the aura he released had completely suppressed Xiao Ziliang, to the point where he couldn't even utter a single word. At this moment, he was in tremendous amount of pain.

Gu Dongchen's master was also one of the legendary Deans of the Extreme Martial Sect. At a very young age, he had already ascended to the Heavenly Realm. Indeed if he was here, he could have easily pinched Xiao Ziliang to death with just one of his fingers.

"Dean, this is my business, I want to solve it myself! I also don't want them to continue to pester me. Today, we must settle everything." Chen Xiang suddenly said.

If this continued, the Extreme Martial Sect's conflicts with the other sects would definitely escalate. Although Chen Xiang was not worried about the Extreme Martial Sect and the other sects, he was worried about the Great Battle of the Three Realms. Gu Dongchen was indeed strong; if it was one-on-one, he was invincible in the Chenwu Mainland. However, if these Deans attacked together, it would be difficult to say.

Since Gu Dongchen was the strongest in the Chenwu Mainland, once the Great Battle of the Three Realms broke out, his strength would play a crucial role in resisting those powerful devils.

"Good!" Gu Dongchen immediately retracted his imposing manner. Suddenly, everyone felt extremely relaxed. Underneath the stage, everyone secretly decided that, in the future, wherever they saw this guy, they would immediately run far away from him; the feeling they just had was extremely uncomfortable.

Now, Xiao Ziliang also didn't dare to be so arrogant. At present, he had only crossed seven tribulation; he certainly could not compare to Gu Dongchen who had already crossed eight tribulations. Although he was a character from Huang Jintian's era, he was still worried that he would die while crossing the tribulation. Because of that, he had forcefully suppressed his strength and didn't dare to advance. Unless he had the absolute certainty, he would vanish in a puff of smoke while crossing the tribulation.

"Good, now that's a true man! Since you want it to be like this, then we will use the most ancient way to settle our scores. How about it? Let's settle it with a fight." Xiao Ziliang said. He very much wanted Chen Xiang dead. There was such a good seedling in the Extreme Martial Sect, and if nurtured well, then in the future he would definitely become a legendary Dean of the Extreme Martial Sect. Moreover, Chen Xiang's way of conduct was also very appropriate for a Dean.

"Not a problem at all, but if it's not fair, I will not accept it!" Chen Xiang replied. He could not let anyone cheat him. Especially that it was about fighting, he was not afraid at all.

"Our Free Immortal Sea and the Beast Martial Sect, the True Martial Sect will each send a disciple with the same cultivation as you to fight with you. If you lose, you must accept some of our conditions. And if you won, then everything is settled between us." Xiao Ziliang said.

At this time, Yue Jianglin, who was hidden among the crowd, suddenly appeared and said, "Count our Proud Sword Sect in too!"

Gu Dongchen sneered, "Humph, four guys taking turns to fight one guy? Win, then everything is cleared, and if lost, then be forced to do your biddings? You're extremely shameless! Honorable Nirvana Realm martial artists, Deans of a major sect, are unexpectedly bullying an inexperienced brat like this. In the future, the lot of you should better not mention this to anyone in the Chenwu Mainland, lest you lose your prestige!"

Facing Gu Dongchen's cynicism, Xiao Ziliang and the others blushed in shame.

"Yes, it was your disciples who attacked us first. If you want it to be fair, then if Chen Xiang won, you must give him an apology." Wu Kaiming said.

Chen Xiang said, "Is an apology worth something? If I win, you must compensate me. Each losing sect must give me 100 million, how about it? If you cannot bear to compensate, then don't talk anything about settling the scores!"

Quite ruthless! Gu Dongchen and Wu Kaiming, in their hearts, secretly praised Chen Xiang.

The winner is right, and the losers are wrong. Although it seemed to be rather simple, it was the only way to settle the differences. Moreover, both sides could win.

A fight was eventually going to happen; even if the crowd underneath the stage could not dare to cheer, they were all secretly excited in their heart. Chen Xiang was not only amazing in alchemy, he was also very strong. The Extreme Martial Sect's disciples were not oblivious to this. Those who had fought with Chen Xiang didn't have a very good end.

If Chen Xiang lost, he had to agree to some of the conditions of those sects; it was nothing but a kind of compensation. This was very much similar to a gambling.

"Are you happy!" Gu Dongchen coldly said. Currently, the Beast Martial Sect didn't have any Dean, however, they still had the Elders who had also arrived at the stage. Chen Xiang was an alchemist; if he lost, then they could make him pay with some dans. That was rather more cost-effective.

"No problem! My Free Immortal Sea agrees." Xiao Ziliang said. 100 million for him was nothing; they just want a bit of face. They want Chen Xiang to admit he was in the wrong. Although it was the Free Immortal Sea who was truly in the wrong, they just didn't want to admit, because it would very well damage their overall prestige.

The Proud Sword Sect, the True Martial Sect and the Beast Martial Sect also readily agreed.

Lian Yingxiao smiled. Liu Menger and Hua Xiangyue also started smiling. Weren't they simply seeking death in fighting with Chen Xiang? They were all very clear how powerful Chen Xiang was.

"Menger, look, how can such a lively scene be happening without me!?" Hua Xiangyue naughtily smiled before flying out of the window. In the blink of an eye, she swept over to the arena.

Seeing such a stunning figure on the stage, all the males were suddenly gasping for breath. Hua Xiangyue rarely made appearances, but she was known to be the first beauty of the Danxiang Taoyuan.

"You want to fight here?" Hua Xiangyue asked with a voice carrying a sliver of anger. It was her property, and someone was casually making trouble on it. This was equivalent to looking down on her. Certainly, she would be very angry.
