

# THE DARK AGES

## Chapter 15 - Vice-Chancellor?

Campus cleanup plan begins ...

According to the teacher Liu Yan, this middle school has 1,800 teachers and students, which is the only junior high school in the town.

Where they are, there are two teaching buildings, eight floors, but only six floors are used. The seventh and eight floors are vacant. Each floor has nine classrooms. The third floor is almost completely cleaned, and the next is the third floor. Layer above.

“Qing 剿 zombies on the fourth floor, the first four people who killed the most rewarded a one-star hardened potion, start now!”

In the corridor on the third floor, Qin Tiange looked at a group of junior high school students who were excited and excited. Under the strong temptation of the quenching medicine, he started the campus cleanup plan.

He took the lead, Chen Xi walked to the right with a steel knife, and on the left was a burly third-year boy named Moda, carrying a steel knife that Qin Tiange didn't use. He was the first person to respond to him at the time. .

人 This person is a bully on the campus. Now he is the most obedient person in this group to Qin Tiange. He is the boss to call him.

“Boss, I must take the third.” Moda looked excited and said confidently.

He is talking about the third, this first is of course Qin Tiange, and the second is the beautiful Chen Xi on the side, letting him laugh secretly after listening, is a good guy, promising.

A group of people killed and killed on the fourth floor. The boys in the front took the lead, and the girls in the back were led by Liu Yan to dig out the brains of the zombies that were killed.

In fact, they also want to kill the enemy. After all, they have twice the strength of adult men, so they all want to show it, but digging the crystal nuclei requires them to do it.

In this way, Qin Tiange led a group of helpers with big sticks of radish to start the campus cleanup zombies program.

On the fourth floor, the zombies were surging, smelling a strong smell of human flesh and blood, rushing towards the stairs on the fourth floor, blocking the place.

As soon as Xun came up, Qin Tiange came forward with a knife, and under the sharp wound of the broken bone tang knife, no zombies could support a knife.

上 “Go up, kill the zombies on the fourth floor.”

After slaying seven or eight zombies, Qin Tiange screamed, and a large group of junior high school boys flew immediately, killing them with a stick, especially Moda, headed by a steel knife, which flew flesh and blood, extremely brave.

Later, Liu Ye and a group of girls quickly came forward, digging the brain crystals with sharp things, one by one changed his face, although still a little pale and disgusting, but at least much better than the previous time, this is the death pressure under the doomsday Growth.

Flapping!

In front of him, a shadow cast a knife and slashed with a steel knife. Two consecutive stabs resulted in two zombies. Chen Xi's strength is extremely

horrible. Since taking the enhanced version of the quenching agent, the whole person has changed.

What she drank was an enhanced version of the medicament dissolved with a star crystal nucleus. The effect was as powerful as Qin Tiange's first drink, and her physical fitness was improved ten times.

"It seems that the mutated crystal nucleus is better than the ordinary crystal nucleus." Qin Tiange murmured secretly as he looked at Chen Xi, who started the killing.

Actually, he didn't know at all whether the mutant crystal nuclei could achieve better results. Fortunately, his attempts were correct and the effects were better and more powerful.

Now he naturally wants to use mutated crystal nuclei to promote those hardened medicaments, and even later higher medicaments will need to mutate nucleus to promote and take. Now, for a total of twenty-five times the physical fitness, how terrible is that?

If it wasn't for his promotion, it is likely that he couldn't hold down the chick Chen Xi, which made him feel a sense of urgency and he must speed up the promotion.

After feeling the pressure, Qin Tiange's face suddenly changed, and he said, "Speed up, don't mess up, and don't get bitten or scratched, otherwise you can only be dug your head."

After hearing this, a group of boys chilled together, but the power of feeding milk broke out, and the baton was beaten fiercely with a bang on the heads of the zombies. The three of them joined forces to kill one zombie after another.

The cypress stick was broken, and immediately picked up the stool in the classroom and smashed it. The adult man doubled his strength, leaving them in a state of extreme excitement and killing the zombies.

Even Liu Yan who was behind was too busy with a group of girls. After digging here, a large number of zombies were killed in front.

I watched these people who were originally students, friends, and classmates turned into zombies, and after being killed, they were dug out of their brains, and they felt sad and heartbroken at the same time.

Each of these people did not want to become such a zombie themselves, maybe they were dug by the brain after being killed by their current companions, and the scene felt cold.

“Kill!”

On the fourth-floor corridor, shouting and screaming, and roar intertwined, Qin Tiange frowned. He stepped forward in two steps, slapping a fan on the loudest man’s face.

With a crackling clapping, the boy was beaten and forced to look at Qin Tiange stupidly. He didn’t understand why the boss beat him. He wanted to cry if he was wronged.

“What shouts?” Qin Tiange rebuked: “Kill zombies, kill zombies, what shouts do you want to attract more zombies, or even mutants?”

At this moment, the group of junior high school boys who cried loudly collectively lost their voices, and no one dared to speak. They just waved the stick stool silently and hit the zombies with only a dull beating.

They held their breath and couldn’t shout, then they smashed and killed these disgusting zombies.

Seeing this, Qin Tiange was satisfied. With such a reprimand, the effect of killing the zombies has accelerated a lot. Except for the necessary rescue, he did not need to do so at other times.

“Quick, everyone dig!”

Behind him, Liu Yan's forehead was dripping with sweat and he was too busy. He dug up brain crystals and gathered them in front of Qin Tiange. The latter waved into a space bracelet.

This scene brightens the eyes of a group of boys and girls present, magic? Spell? Cultivation? One by one, these thoughts came out in the heads of these junior high school students, and my heart became even more excited.

There are nine classrooms on the fourth floor, and there are about thirty to forty students in a class. Even if most of them become zombies, there are more than two hundred and three hundred zombies.

The kill was two hours. Thirty-nine students who had strengthened their bodies. Among them, boys were fighting, girls were digging their brains. Twenty-three boys, plus Chen Xi, the beauty strong, and Qin Tiange. After joining the battle, he quickly cleared the zombies on the fourth floor.

"Miss Liu?"

After killing the zombies on the fourth floor, the boys on the sidelines of a break suddenly heard a voice, and then found that the door to the classroom office on the fourth floor was open.

He walked out of a middle-aged man carefully, with glasses, and looked very decent.

"Vice principal?" Liu Ye was digging a brain crystal. He heard someone cry and looked up immediately. He was surprised to see that the middle-aged man who came out was the vice principal of this school.

Qin Tiange, who was looking at the situation from a distance, noticed that there was movement here, and immediately came over, looking at the middle-aged man constantly.

When I walked to the office door, there were more than a dozen people hiding in the corner. Three adults, one man and two women, the man looked about thirty years old, and the two women were twenty-seven or eighteen years old. He has a good figure and can see it.

These three adults should be teachers. UU reads [www.uukanshu.com](http://www.uukanshu.com) and the other eleven are students. It is surprising that there are many female students and their clothes are disheveled. They look pale and horrified. Anxious.

“His name is Li Yuchun, and he is the vice principal of our school.” Liu Yan saw Qin Tiange coming over and explained in a whisper.

Li Yuchun also found Qin Tiange, or saw a large group of students present, the girls were digging the heads of those terrible zombies, scaring the vice principal’s face pale.

“You, what are you doing?” Li Yuchun asked calmly.

Qi Qin Tiange looked at his face, a flash of disdain flashed in his heart, ignored him, and went directly to the pile of brain crystals collected by Liu Yan, and waved away.

These brain crystals, with a total of 303, are definitely a big income, or there are many people and powerful people, and using these people to help themselves can achieve that five-day plan.

“Rested, go ahead, go up to the fifth floor and kill the zombies!”

Ten minutes later, everyone was well rested. On the fifth floor stairs, the boys guarding them were already nervous because zombies began to come down on the fifth floor.

When I saw Qin Tiange talking, all the boys were immediately shaken, picked up new chairs, or some boys simply opened some steel bars or used weapons.

All of a sudden, everyone was on the fifth floor again. This situation stunned the deputy headmaster and everyone hiding in the office.

他们 “They, are they killing zombies?” Li Yuchun’s expression changed, his eyes stared at Qin Tiange leading a group of boys, followed by Liu Ye and a group of girls to collect brain crystals in the back.

That scene, why is it a bit out of harmony? Is this the world they know, the students they know?

And who is the young man who is taking the lead?
