

Dark Ages 241

Chapter 241 - Castrated Technology

Didi ...

The tech ball slowly unfolds, its appearance disintegrates, and it looks like a small metal tree, which looks strange.

“Tech tree?” Qin Tiange murmured in surprise.

He came back this time to study this science and technology ball, where the science and technology inherit knowledge, and see if they can be transformed into real details.

Since taking the brain-domain development medicament, his brain is like a supercomputer, and there is always a sense of urgency to acquire knowledge to fill it.

The super brain sends a signal all the time, hungry!

Yes, it ’s hungry. It ’s like the entire brain is empty. You need a lot of knowledge to fill the inner space to be full.

This left Qin Tiange speechless and secretly doubted that no wonder those super scientists were all super lunatics.

Ding!

Suddenly, a tink came from the floating metal tree in front of him, which awoke Qin Tiange, and when he looked closely, he saw that a ray of science and technology had hit his eyebrow.

I saw the light slowly scanning down from the center of the eyebrows, the whole body was scanned up and down, and then returned to the position of the eyebrows and stopped.

Click!

The next moment, the science and technology tree suddenly extended two metal twigs and stuck them to the temples on both sides of Qin Tiange.

Immediately afterwards, the whole small metal tree stuck to Qin Tiange’s eyebrows, and stretched out small branches to wrap his head.

“Beginning of inheritance ...” A metal alloy sound came, and it felt like a huge flood of knowledge swept up and rushed into his brain.

This is the inheritance of science and technology. The flood of knowledge is transmitted to the brain along metal branches, which is very magical and weird.

“This ...” Qin Tiange was surprised, but the next moment was speechless, and the entire brain was overwhelmed by endless scientific and technological knowledge.

He felt that his brain was bulging for a while, but was quickly absorbed into the brain by the super brain, as if a sea, just happened to be poured into a lake.

“Energy technology, suspension technology, biotechnology, nanotechnology, space technology ...”

One after another huge system of scientific and technological knowledge emerges, roughly divided into several categories, looks very comprehensive, and covers a wide range.

Qin Tiange looked ecstatic, and secretly bought a good thing himself, but when he took a closer look and learned this knowledge, he found an extremely serious problem.

“It seems that the core knowledge is missing.”

Soon, Qin Tiange was dumbfounded, and found that the knowledge of the inheritance of science and technology balls, although extensive, contained almost no core secret technology.

This discovery made him angry, his fists squealed, and he cursed, “These alien creatures are shameful. It is a ***** to sell castrated technology.”

The inheritance knowledge in this technology ball seems to be many and extensive, but the most important thing is that many of the things in it are lacking in technology and have been castrated.

The castrated technology is tantamount to incompleteness. It lacks a core part of the secret knowledge, which is to lose most of its function completely.

Seeing this, how could Qin Tiange not be angry and thought to himself that it seems that alien species cannot believe it, otherwise he would not know how to die.

“Huh, the castrated science and technology knowledge, it seems to pay attention next time.” Qin Tiange looked dull, his eyes flashed cold.

He suddenly thought of the robots. These robots with self-intelligent chips also seemed to be an unstable factor.

Alien creatures are not credible, and even a scientific and technological heritage ball has been castrated. It is not difficult to guess that those engineering robots have absolutely problems.

“Forget it, see what knowledge is available.” Qin Tiange cleared his mood, immersed himself in the vast ocean of scientific and technological knowledge, and constantly learned the knowledge inside.

At this time, the super brain showed its huge computing power and adaptability, and even the ability to understand has been horrified.

Originally, scientific and technological knowledge was not so well absorbed, and it was impossible to understand these things without a knowledge accumulation.

But the science and technology inheritance ball, with a variety of basic knowledge, are all part of the so-called science and technology knowledge inheritance, and high-tech technology is only part of it.

Absorbing this knowledge, starting from a low level, madly absorbing it, Qin Tiange is like a magic sponge baby.

Time passed by little by little, from the calmness of the beginning to the end of Qin Tiange, the head felt like it was about to explode.

Expansion, the constant expansion of knowledge, all kinds of strange knowledge poured in one by one, making him a super-brain to gain development a little bit overwhelmed.

Didi ...

Finally, five hours later, the science and technology tree made a light sound, and then released Qin Tiange autonomously, voluntarily merged and turned into the original iron ball.

The inheritance is complete, this time the transfer of scientific and technological knowledge is finally over. Qin Tiange was pale and relieved, his head was almost burst.

Too much knowledge, the brain seems a bit chaotic, but fortunately, the super brain is worthy of being called the super, and it will soon take off.

call!

Gently exhaling, Qin Tiange stretched a lazy waist, and the sound of crackling peas came from his body, almost groaning and groaning.

“Let me see how much can be used inside.” Qin Tiange reluctantly, immersed in the memory of his mind, and began to look for available technology and technology.

First of all, energy technology, he carefully studied and understood all the knowledge about energy technology, and finally found that some powerful energy technologies were completely castrated.

“Electromagnetic energy technology ...” Finally, Qin Tiange found a new energy technology that had not been castrated.

This electromagnetic energy technology, to put it plainly, is electrical energy. This technology is not simple. It does not require a power station or any power generation equipment. Instead, it draws endless power from the void and the cosmic vacuum.

“Isn’t this the inexhaustible new energy source developed by the scientific giant Nicholas Truss?” Qin Tiange looked at it and was surprised to find that this energy technology is actually the same as the one on the planet. Science giants do the same.

That is a kind of energy that is said to be inexhaustible. It can be extracted from any place on the planet, and even from the universe, into an endless source of energy, which can be converted into electricity.

Earth technology could have been another form, but unfortunately, it was strangled by some ambitionists, but it was on a path full of benefits and pollution.

“Nicholas Truss is indeed the largest giant in the scientific community, and has even developed energy technology beyond the times, and can’t believe it.”

Qin Tiange had to be amazed. Before he heard these rumors, he was dubious, but now that he has obtained countless knowledge of the science and technology tree, he finally understands how great the scientific giant is.

It's unclear to what extent his brain was developed? Qin Tiange said that he was curious, but unfortunately the giant has fallen for more than a century.

"Energy is the cornerstone of all science and technology. With an endless stream of energy, we can start science and technology." Qin Tiange murmured, and suddenly a decision came to him.

He decided that the construction of a new energy system in the base must be started immediately, and an energy device providing an endless supply of energy can be built before the development of science and technology can begin.

Without energy technology, it is tantamount to the lack of core power supply. How to develop other technologies?

After receiving the ball of science and technology, Qin Tiange opened the closed door and walked out of the back room. He just saw a slender Qian Ying quietly guarding the door, waiting for him to come out.

Chapter 242 - Launch a new energy plan

"Uncle, tell you something."

As soon as I came out, I saw Du Jing Qiaosheng standing at the door, and when he saw him, he said something to Qin Tiange.

Just listening to Du Jing's frown, he said, "This underground base has insufficient energy supply, and many experiments and production cannot be carried out."

"Energy!" Qin Tiange sighed, further strengthened his determination to develop new energy, and it must be implemented immediately.

After thinking about it, he said, "Okay, I have found a new energy technology. At present, I don't have enough staff. I will see if I can find some talents in this area at the base."

Not waiting for Du Jing to respond, Qin Tiange hurried out of the underground base, leaving Du Jing alone for a long time.

"New energy technology?" Du Jing touched his glasses, a flash of surprise flashed in his eyes.

Qin Tiange said that the technology of new energy was found, rather than that new energy was found. There is a difference.

She didn't think much about it. Anyway, new energy can be supplied to this underground base, and others don't have to think about it.

Hurrying out of the underground base, Qin Tiange quickly returned to the newly-constructed conference room hall, just seeing Zhuo Tianfan coming out of it.

"Boss, you're here just right. I was about to find you. The dead camp came back, and I came back with a large number of people." Zhuo Tianfan directly said the news.

Hearing this news, Qin Tiange looked slightly pleased and excited, and finally the new energy plan could be realized.

The death camp, under the command of Qin Tiange, Li Weiwei left with half of the death camp, so far there is no news.

Well now, finally come back, and it is likely to bring in the most wanted and most in need of science and technology personnel Qin Tiange.

“Take me there!” Qin Tiange looked hurriedly and pulled Zhuo Tianfan away.

The latter laughed helplessly, but honestly took Qin Tiange to a temporary camp and saw Li Weiwei covered in blood.

He was injured, and the injuries were not mild, his face was pale and bloodless, and he collapsed.

“Boss, the mission is complete!”

Seeing Qin Tiange at first glance, Li Weiwei was shocked and reported the news directly. The mission was successfully completed.

Qin Tiange smiled, patted his shoulder, and reassured: “Very well, you didn’t let me down. Take this and take it back. You can take someone to rest.”

“Thank you, boss!”

With a happy face, Li Weiwei carefully took a test tube from Qin Tiange, which contained a drop of turquoise liquid, which was the liquid of life.

With this drop of life fluid, his injuries can be recovered quickly overnight, naturally happy.

This represents another approval from Qin Tiange. Finally, he gained a firm foothold in this force. As long as he does not make mistakes in the future, he can continue.

Li Weiwei took dozens of dead men to rest. Qin Tiange and Zhuo Tianfan entered the camp and saw hundreds of people resting.

Most of these people are elderly people over half a year old, who look extremely weak, apparently caused by long journeys.

“Every old gentleman, boy Qin Tiange, so please come here, and I hope you will not blame it.” Qin Tiange smiled and arched, apologizing to the group of old people in front of him.

When he saw this group of old men with poor faces, he knew that Li Weiwei must have taken these technologists back by force.

This is what he explained. No matter what method is used to bring these people back, now that Qin Tiange is not afraid of others running away.

Humph!

One of the pale-haired old men snorted coldly. Don't look away, but his heart was still very angry. He avoided it in the original Academy of Science and Technology. He didn't expect to break into a group of fierce and evil people. As a result, they were taken away without discrimination .

I came here now and saw Qin Tiange to understand that everything is because of the young man in front of him.

“Lao Xu, all right, after all, they have saved our old bones. If they don't come, we have to starve to death in two days.”

An old man over half a year old withdrew the angry old man, looked at the young man Qin Tiange with a smile, and said something that made him comfortable.

“Yeah, don't play with your bullish temper. People must have fancy our old bones before they sent us back thousands of miles.”

Another old man opened his mouth, with reading glasses, his eyes twinkled, and constantly looked at Qin Tiange, secretly guessing the identity and origin of the other party.

“Say, you invited us back ... what exactly do you want us to do?”

At this moment, there were hundreds of old people, and suddenly there was an old man in his seventies, with gray hair and a messy beard, looking a little embarrassed.

But those twinkling eyes made Qin Tiange dare not to underestimate. These old men are all a bunch of treasures, all of them are science and technology personnel.

“That's it ...” Qin Tiange organized the language, and then slowly said, “I set up a base here, and agreed with the commander of the security zone, Chen Lao Dacheng, to guard each other, but recently a lot of things because of lack of energy. can not complete.”

“Oh? Are you talking about Chen Wu?” The old man touched his glasses, and there was a hint of fineness in his pupils, apparently knowing Chen Wu.

After seeing Qin Tiange, he laughed in his heart, and it was good to know him. Moreover, the group of old people heard that he knew Chen Wu, and they became an agreement, and his complexion eased a lot.

I have to lament that the role of identity is very large. Sometimes, you really have to rely on a strong identity to help you accomplish many things.

“The boy got some opportunities and was ready to build and prepare for the development of new energy. He already has complete technology, but he lacks scientific and technological talents like you old gentlemen.” Qin Tiange slowly stated his intentions.

After listening to his words, hundreds of old men finally understood that they had been invited to do scientific research and construction.

“You said you have complete new energy technology?” The old man who took the lead was surprised, then took the first two steps, his face looked very excited.

He asked, “But what are you really saying, is there a complete new energy technology?”

Qin Tiange nodded with a smile and promised: “Yes, I can guarantee that a complete new energy technology, I believe everyone has heard the name of a science giant Nicholas Truss of the last century, right?”

The old man flushed and said in a tone: “Are you talking about the inexhaustible energy technology?”

“Exactly!” Qin Tiange looked serious and definitely answered: “I can tell the old gentlemen clearly that I have the complete knowledge of this new energy technology in my hands, but I don’t know if they can help to build a new one. energy?”

“Okay We help you!” The old man promised on the spot, regardless of whether hundreds of people behind him agreed.

In fact, he can represent everyone, because he has sufficient qualifications, and is the leader of this group of scientific and technological personnel.

“Thank you, old gentlemen, after the new energy research and construction is completed, I can give this new energy equipment for free to major military regions in China.” Qin Tiange smiled and made this commitment directly.

Upon hearing this group of old people, they nodded immediately, believing that the young man, especially the old man headed by him, nodded with satisfaction and smiled.

Aside, Zhuo Tianfan kept silent, watching Qin Tiange deal with this group of old people, and could not help but raise a thumb.

In this way, hundreds of scientific and technological personnel finally considered to be preliminary, and promised Qin Tiange to help him develop and build new energy equipment.

In the base, a new energy research and development and production plan is secretly carried out. If successful, it will likely lead the entire new energy structure of Huaxia and the world in the future, and even affect the trend of human science and technology.

Chapter 243 - Arsenal idea

With hundreds of scientific and technological personnel in place, many ideas of the base can finally be realized, the first is the new energy plan.

With the joining of these scientific and technological personnel, Qin Tiange of the base’s new energy plan is not worried at all, and success is only a matter of time.

“Boss, terrific!”

On the way to the conference room, Zhuo Tianfan gave Qin Tiange a thumbs up. He really admired the young boss and actually invited this group of scientific and technological personnel.

Qin Tiange smiled and didn't care, he said, "With the help of this old gentleman, our base will soon take off, so don't be afraid that it will not develop."

Zhuo Tianfan thought for a while and said, "Boss, don't you worry that these old gentlemen will not cooperate to research and develop technology for us?"

Qin Tiange waved his hand and laughed: "You think wrong. First, I have made it clear that I know Commander Chen Wu, and I have said that the two have become a guard agreement, which shows my attitude and position. . "

"So it is!" Zhuo Tianfan understood the meaning.

At this point, I just listened to Qin Tiange saying, "With this group of old gentlemen, we should prepare for the construction of the military factory next."

"Military factory?"

Zhuo Tianfan stayed blank, didn't keep up with Qin Tiange's thinking at all, and jumped too fast. Thinking of a military factory before new energy comes out, isn't it a bit fast?

In fact, it was not fast at all. Qin Tiange knew that as long as the new energy was fully developed, everything would be solved.

Do n't forget that he has a science and technology tree in his hand. There is a lot of science and technology knowledge in it. Although it has been castrated, there are many things that can be explored along the clues and explore the core secrets that are castrated. .

With the help of hundreds of top science and technology personnel, Qin Tiange believes that his idea of a military factory will not be long.

It's time to prepare in advance, otherwise rushes will become passive and you must be fully prepared.

The two spoke, and came to the conference room lobby, just to see the high-level base that had arrived, ready to have a meeting.

"Dear everyone, I have good news. Our base is currently developing new energy equipment, and it will take a long time for the continuous use of new energy sources."

Qin Tiange's first sentence was inspiring, but all the high-level officials at the scene were stunned. It was completely unexpected that it would be the news.

I saw, Qin Tiange said with a smile: "Next, I have important plans to discuss and discuss with you."

"Look at this, this is what I will say next and it has something to do with this."

Qin Tiange took out a few points of information, sorted them out and distributed them to all the senior executives present, and looked down at them one by one.

The faces of the people gradually changed, surprised, unbelievable, shocked and so on, apparently shocked by this information.

“Brother Qin, is this a military factory idea?” Yang Xiaolin asked dumbly, looking dumb.

Everyone had the same mind, and looked up at Qin Tiange on the theme, looking at his old god’s appearance, somewhat surprised.

This document briefly introduces the concept of the military factory, and also described some of the design of the military factory, which is really amazing.

“Tiange, what is this dock in the sky?” Liu Yan asked, puzzled by an introductory piece of information.

Qin Tiange smiled and looked at everyone’s curious baby. He explained: “The air dock is the place to build air warships. If you think about what the dock is for, it’s naturally the shipbuilding.”

“The air dock, of course, is to create and build air battleships, such as suspension cruisers, air battleships, and even air and mother ships.”

One message after another, like a bombshell bombing in the hearts of Nie Teng and others, was shaken and fascinated.

Air battleships, sky cruisers, airships, magnetic fighters, etc. are all new weapons and equipment, and they are the products of a new era.

“Really, can you really make these things?” Long Xiaoya’s eyes widened, some unbelieving.

However, Du Jing, who came along, strongly agreed, saying: “I agree with the idea of this military factory and I believe that these technologies exist.”

“What’s your opinion?” Qin Tiange asked with a smile.

All of you present, look at me, I look at you, and finally nodded in unison, agreed, and passed this arsenal plan.

This is a huge project. To complete it, you must spend countless manpower and resources, and even have powerful technology as support.

The military factory conceived by Qin Tiange will be the creation of the latest technology weapons and equipment, which is completely a product beyond previous times.

“This plan is very good, but there is a problem. We don’t have much steel at the moment. How can we complete this grand plan?” Zhuo Tianfan raised the question and hit the bullet.

However, Qin Tiange already had countermeasures, he explained: “At present, I have acquired some advanced metal smelting and synthesis technologies, and the cost is low enough for our future development, and even with the continuous development of science and technology, there will be More surprises are waiting for us. “

He is not worried at all that steel is not enough. In fact, some solutions have been obtained from the science and technology tree, that is, new smelting technologies, various special metal composite material technologies, etc. can solve this problem.

As long as there is new energy, everything is not a problem, so Qin Tiange will start to arrange tasks.

“Dear everyone, I will announce that the basement will be located southeast of the base and used there for the preparation and construction of the military plant. Zhuo Tianfan will be responsible for the employees of the military plant.” Qin Tiange directly issued the task order.

He went on to say: “For the next period of time, we will work together to make the entire base into the most advanced and powerful base.”

“Yes!”

A neat Hongliang answer shook all around, but there were two figures in the crowd dazed from the beginning to the present, looking at the information in his hand without saying a word.

“This ... it’s incredible!” Lieutenant Shao Feng muttered to himself, looking complex, looking at the materials at hand, and looking at the spirited young man on the theme.

He suddenly felt a sense of loss. Why aren’t these things owned by the security zone, but Qin Tiange’s possession of such precious technology?

Hu Yan thought about another question. How did Qin Tiange develop these technologies? Is there any scientific researcher in his hand?

One by one, the two senior military officers from the guard zone were both very complicated and anxious.

“Well, Hu Yan, you are responsible for sending this document to Commander Chen Wu, tell him that new energy has begun construction, and I will send it imperceptibly when it is completed.”

Qin Tiange suddenly looked up and said such a sentence to Hu Yan who had not spoken, and even gave her a document that had been prepared.

This is what he plans to give to Chen Wu’s commander There are some of his ideas and plans, or cooperation proposals, depending on how Chen Wu thinks about it.

“I’ll go now.” Hu Yan took the document, immediately got up, hurried out of the conference room, did not want to delay for a moment, just wanted to go back as soon as possible to report the amazing news he knew.

Watching her leave in a hurry, Qin Tiange’s mouth inexplicably evoked a smile. No one knew what he was thinking at the moment, and even the senior management couldn’t figure it out. Why didn’t he avoid Shao Feng and Hu Yan who were clearly guards District people.

Ordinary people will definitely have a secret meeting, but Qin Tiange is fanatical, and each time Shao Feng and Hu Yan are invited to a high-level meeting, this makes people wonder.

“The proposal has been passed, Commander Chen, what would you do?”

Looking at the graceful back that hurriedly left, Qin Tiange kept silent on his mind, and the next step was the construction and layout of the military factory.

Next, in the conference room, Qin Tiange began to announce the implementation after discussing the plans one by one. All the personnel in the entire base began to be busy.

Chapter 244 - Opening the stele, Willow Demon yields

Lianhua Mountain, in front of the stele, Qin Tiange looked at the stele quietly, and the little fairy next to him entangled him.

“It’s time to open the heritage stele!”

Qin Tiange murmured to himself, and made a decision in his heart to open the existence of the stele to all survivors of the base.

After careful consideration, Qin Tiange felt that the time was ripe to fully open the stone monument.

At present, the main body defense wall of the base has been completed, and the pharmaceutical production team has completed the production and mass production of the one-star quenched body medicament. It has even just set up a science and technology department with more than 100 scientific and technical personnel.

In addition, the newly-established biotechnology department is chaired by Li Jiajia. The three major science and technology sections can be said to constitute the basic structure of the science and technology.

The imagination plan of the arsenal has begun to be implemented. At present, the entire base is entering a tense and busy development and preparation phase. It is also time to open up the legacy stone.

This thing, occupying itself is not very useful, and can not be exchanged for too many things, because the number of crystal nuclei is limited.

Qin Tiange dragged his chin and murmured: “Only when human beings develop independently can they truly make progress and become strong. Depending on the exchange of steles, there will always be only a dead end.”

Inheriting the stele is mysterious, there are many things that can be exchanged, but once you take this thing as the only way forward, it is a dead end.

Think about how many zombies are there throughout China? Even if one billion people become zombies, that is one billion crystal nuclei.

In addition, some mutant organisms that produce crystal nuclei in the body add up to only 10 billion. Then, the crystal nuclei are used up, and humans do not need to exchange them without crystal nuclei. Do they not develop?

Qin Tiange looked at the goblin and smiled: “Little guy, you don’t have to stay here anymore, you go to Taolin to play.”

Alas ... the little fairies quit, lotus leaves entangled Qin Tiange and didn’t want him to leave. It’s easy to say that Qin Tiange couldn’t help crying bitterly when he gave dozens of crystal nuclei and promised to come and see it often to comfort the little fairy.

“Redeem some tools ...” Qin Tiange looked thoughtful, and then quickly searched for something in the heritage stele.

For example, the equipment needed by the Institute of Science and Technology, as well as biological genetic equipment, etc., have been exchanged a lot, and directly thrown to the three scientific research departments in the underground base.

After doing this, Qin Tiange left the heritage stele and planned to go back, but suddenly he looked up at the huge willow tree on the top of the mountain.

“The old Liu Demon who even the little fairies can’t convince, it seems a bit of a temper.” Looking at the huge willow tree on the top of the mountain, Qin Tiange murmured to himself.

Suddenly he turned around and walked directly up the mountain. He was about to go to the already-exquisite century-old willow tree.

At that time, he had ordered the goblin to persuade the old willow, but the other party was very temperamental, maybe old, and looked down on the goblin.

Step by step, Qin Tiange climbed to the top of the mountain and saw the huge willow tree growing on the central platform, which has a century of history.

At one time, this willow was a place where people prayed and wished. It was covered with red ropes and some signs with wishes written in it.

Even now, I can still see some wishing cards hanging on the huge willow tree, but I don’t know what the willow tree’s essence is.

“Human, what are you doing here?”

As soon as I approached, I heard such a word coming from the willow tree. Then, a huge human face appeared on the trunk of the willow tree, very old.

It was the willow demon who spoke, a pair of green eyes, staring at Qin Tiange, full of warnings.

Qin Tiange was surprised. He looked at the Liu Yao with a crooked head and found that he had already been promoted to the four-star level. No wonder he looked down on the goblin and sold him old.

“I heard that you bullied my little fairy, didn’t you?” Qin Tiange held his sword in both hands and looked at the old willow tree in front of him with no expression.

As soon as this word came out, the willow tree trembled obviously, the expression on the tree face looked a bit dull, his eyes flashed a stun, and he was dumbfounded.

“You mean the little lotus?” The old willow tree suddenly understood.

Qin Tiange nodded gently, and hummed, “Since the little fairy in my family has been sullen since I went back, if I don’t eat or drink, I must have been bullied.”

“At that time, it just became like this after you came here. It must be that you bullied my little fairy. Today, you must give me an account.” Qin Tiange screamed sharply.

He carried a sword, his right hand was slowly placed on the hilt, his eyes were sharp, and two horrible rays burst out, as if the sword was shining, which was extremely amazing.

“You ...” The old willow tree was furious, listening to Qin Tiange’s meaning, and insisting that it bullied the goblin, this is to seek revenge.

The willow in the heart of the old willow tree, it did not bully the other party, it just refused to convince the other party to persuade the person in front of it.

Unexpectedly, this man even came to the door, and he insisted that he bullied the goblin. He was slandering and trying to make excuses to hit him.

“Miscellaneous account, when did I bully it?” The old Liu Shu still wanted to strive for it, but Qin Tiange no longer gave it a chance.

I saw, Qin Tiange looked cold and hummed, “Bullying my little fairy, you still want to deny, it seems you don’t know what’s wrong without giving you some lessons.”

Huh!

When the voice dropped, I heard a tadpole coming, and the bronze sword came out of the sheath, splitting the air with a click and chopping off a huge willow branch.

At the fracture, a stream of dark green liquid flowed down, and the severe pain awoke the old willow tree.

“Ah ... go to die!” The old willow hurled.

The four-star power is beyond imagination, and the willow branches around him are twined into two huge arms, slamming down on Qin Tiange.

boom!

Just hearing a loud noise, the ground collapsed, and rubble penetrated around and down the mountain. The old Liu Yao’s blow was so powerful that most people really didn’t dare to deal with it directly, but Qin Tiange was not an ordinary person.

Although he has only two star ratings, his strength is extremely horrible, the bronze sword light has disappeared, and there are whine sounds in the air.

Click!

There was another crisp sound. As the figure of Qin Tiange returned to his original position, several branches of willow in front had already broken to the ground.

The old Liu demon failed to hit Qin Tiange, but his face was cut off. The pain made it almost mad.

“Damn, why are you trying hard to force each other, don’t I want to take root here silently?” The old willow wanted to cry without tears, in fact, it just wanted to take root here to survive in silence.

Hearing it like this, Qin Tiange’s mouth slightly tilted, and he smiled: “Of course, but this is my place. You must pay for living here, what do you say?”

The old willow of the old willow trembled, and those green eyes rolled their eyes, scolding the human’s insidiousness and insinuation in his heart, but also made excuses.

“You don’t have living expenses, how could I live here for you?” Qin Tiange tilted his head, a cold smile appeared on the corner of his mouth, pointing to the gardens under the mountain and said, “You should already know, other flowers under the mountain The demon have paid the fee and reached a cooperation agreement with me, but you haven’t. You don’t think I can kill you? “

“You are threatening!” The old skin of the old Liu Yao shuddered, and the bark fell to the ground, watching the scalp explode.

Qin Tiange smiled and nodded He said: “Actually, I am threatening you. Although you are now promoted to a four-star tree demon, your root system cannot be moved easily. Once you move The root system is the source of action. “

“Give you three breaks to consider, cooperation, or not cooperation?” Qin Tiange’s face gradually cooled, his voice was bitter.

Having said that, it is enough. If the other party chooses not to cooperate without interest, it will kill the old Liu Yao directly.

“Forget it, for the persuasion of other little guys, I agree to cooperate with you, don’t get me wrong, I’m not afraid of your threat.” The old Liu Yao finally compromised.

It looked helpless, as if the other flower demon under the mountain persuaded him to agree, so that Qin Tiange twitched his face and was extremely speechless.

The willow demon compromised!

After the willow demon was settled, Qin Tiange went down the mountain, frowning as he walked, and couldn’t help whispering in his heart.

“Where did the dead parrot go? No trace of it. When it comes back, it must pull out all of its feathers.” Qin Tiange said unhappily as he descended the mountain.

Chapter 245 - Monkey brother, my boss is omnipotent

“Ahhhh ... who is thinking of me?”

In the Shenzhen Municipal Wildlife Park, in a jungle, in front of a huge grassland, a plump colorful parrot lay there without an image.

Suddenly it felt cold, his feathers were sulking, wondering, wondering who was thinking about it?

“Xian, have you caught a cold?”

At this moment, not far from the colorful parrot, on a huge seat woven from numerous rattan, a golden-haired monkey was lying on his back.

This monkey was talking just now, with golden hair and three meters in height. He looked extremely burly and majestic. He asked when he heard the colorful parrot sneezing.

The colorful parrot rubbed his nose with two feathers and shook his head: “Monkey brother, I’m fine, maybe I drank too much last night.”

“It’s all right, come here, let’s have a drink.” The golden monkey laughed twice and raised a wine bottle in his hand, which read “Red Star Erguotou”.

It is the monkey king in the safari park. It claims to be the king of monkeys. Thousands of monkey brothers are surrounded by them. Everyone is eating bananas and carrying delicate wild fruits.

“King, King, Xiong Er is drunk.”

At this moment, a little monkey jumped up and said this by pointing to a position over there.

The Monkey King looked up, but it wasn’t. There was a black and white panda lying there. He was fat and was 5 meters tall, but it didn’t seem to have any lethality. Instead, it was cute. feel.

This is a giant panda, holding a red star Erguotou wine bottle and snoring, and drooling Hara’s stay is unknown.

“This bear two, that’s true.” The Monkey King shook his head, then turned his gaze, looking at the location not far from the giant panda, where there was also a giant monster sitting.

It was a gorilla, very large, eight meters in height, sitting there full of oppression, his muscles bulged, and black hair like steel needles.

“Big guy, are you drunk too?” The Monkey King asked with a smile.

The gorilla immediately stopped saying that he was standing up, slamming his chest with one hand, and chanting: “King, I’m not drunk, I’m really not drunk, I can drink drink ...”

Talking about it, it fell straight down, making a loud noise, lifting up dust, the huge body was like a hill.

Seeing this, the colorful parrot shook his head and laughed, “I told you not to, but also said that I could drink. As a result, you fell down after thirty bottles, which is worse.”

He said as he gripped a wine bottle with his wings, pursed his head and groaned down, drinking a bottle of Erguotou in one breath.

“Xiandi drinks a lot of alcohol ...” The Monkey King drank while admiring.

“Oh ...” But it sighed suddenly, drinking and drinking, looking unhappy, as if there was something unhappy.

The result was just being seen by the colorful parrot, and he was drunk and asked, "Monkey ... Monkey brother, why do you sigh? Is there something bothering you?"

"You don't know, oh, let alone mention it!" The Monkey King waved his hand in a depressed face, drinking drunkenness on his own, it was upset.

At this moment, the colorful parrot was really curious, with two dizzy eyes open, and asked, "Monkey brother, what are you bothering? Look, your tens of thousands of monkeys and grandchildren, as well as big heads and bears. As a mammoth. "

"Also, this land is not as good as the big white cat to the west and the black snake to the south, and the ugly crocodile in the center. You are now a hegemon, and you are not happy. Yes?" The colorful parrot uttered a few words in a row, really curious.

In the current status of the Monkey King, in the entire wildlife park, apart from a few particularly powerful things, it is the largest here, and there are tens of thousands of monkey brothers. What is not satisfactory?

"Xian brother, see for yourself, what are my younger brothers holding one by one, wooden sticks, iron rods, and you look at the weapons of Lao Sun, too far from the gold hoop."

The Monkey King said, lifting a large steel pipe around him, waving it, and lowered his face with dissatisfaction and depression.

It is very much expected that he can get the same golden hoop stick as Sun Wukong in Journey to the West, and even his own name comes from Sun Wukong's surname.

puff!

"Oh, cough ... Monkey brother you ..." The colorful parrot took a sip of wine and changed it after a long time. It cried and laughed: "Monkey brother, have you read more of Journey to the West?"

"You know a fart!" The Monkey King looked upset and hummed, "Sun Wukong is my idol, and I must have the weapons it has."

The colorful parrot rolled its eyes, stretched out its wings and carried Suzaku, who had been quiet around him, grinning, "Monkey brother, you want weapons, but it's very simple."

Oh?

When the Monkey King heard it, he suddenly became energetic, looked at it and asked directly, "Xianxi, please tell me, how can you get me a weapon that I like?"

The colorful parrot was so proud, holding its head up, proudly: "Brother Monkey, I said that it is your weapon, that is, monkey brother you tens of thousands of weapons are not a problem."

"Really?" The Monkey King came to the colorful parrot in a moment, clutching one of its wings, and kept looking excited.

The colorful parrot was startled, and broke away from the monkey king's hand, and chilled:
"Monkey brother, I only like Suzaku and Phoenix. Don't look for me."

"Fuck, say it quickly, or I'll break the two eggs under you with a single blow." The Monkey King was so anxious that he directly raised a giant stick to fight.

The colorful parrot was honest and depressed: "Monkey brother, you are bullying me without you, you will not be my opponent when I am promoted again and my blood memory is awake."

It said with a proud head, holding Suzaku, and grinning: "The monkey brother actually wants weapons, it's very simple, you can ask my boss for it."

"Um, your boss? Are you me?" Monkey King was dumbfounded, a little aggressive.

Who knows, the colorful parrot was embarrassed, but he patted his chest and promised: "Brother Monkey, my boss has great powers, means, and omnipotence. He can definitely help you with whatever weapon you want."

"Your boss is human?" Soon, the monkey king understood, staring at the colorful parrot with a pair of bright golden eyes.

The latter faced it calmly and nodded and said, "Yes, brother, I honestly tell you, my boss is a human being, and he is a very powerful human being. He has hundreds of thousands of human soldiers, all armed and superpowered. Strong, goods like big white cats and black snakes can be crushed clean in minutes. "

This colorful parrot is so bragging, and I don't know what Qin Tiange thinks it will tout himself like this?

"Man, man cannot be trusted!"

At this time, an old gray-haired ape came out to remind him, telling the monkey king that humans are not credible.

The Monkey King didn't speak, his eyes flickered, looking at the calm colorful parrot, suddenly a decision was made in my heart Brother Xian, take me to see your boss. "The Monkey King said in a very serious tone.

It decides that, for its own weapons and tens of thousands of men, it must look at the boss in the mouth of the colorful parrot, does it really have this ability?

"Oh!"

The colorful parrot was excited, and the feathers on the entire head looked a little pink, and the Suzaku was cuddled with joy, not to mention how happy it was.

"Suzaku, let's go. We'll go back and see the boss. This time we've made great achievements. We will definitely get a lot of good things. But the boss has a lot of things that make me stunned."

The colorful parrot murmured, pulled up the Suzaku, flew directly and flew high, and both flew into the sky and soared into the sky.

“Wo-Yi, Xian Xian, you are not good enough, wait for me.”

The monkey king was suddenly anxious, yelled at the colorful parrots in the sky, jumped up with a big iron rod, jumped quickly on the treetop, a few ups and downs disappeared here, leaving a group of aggressive monkeys.

Chapter 246 - Qitian Xiaosheng?

“Boss, boss, I’m back!”

On this day, Qin Tiange was practicing on the Lotus Hill to comprehend that kind of overbearing mysterious body technique, and was preparing to return to his powers. As a result, he heard a shout from the sky.

Looking up, I saw two colorful rainbows passing by quickly, then landed not far in front of Qin Tiange, startled a burst of dust.

“Dead parrot, where did you go, remember to come back?” Qin Tiange saw the colorful parrot, and suddenly he was out of breath.

Seeing Qin Tiange angry, the colorful parrot immediately exclaimed: “Don’t be angry first, don’t you be mad and mad, please listen to me first.”

“You said!” Qin Tiange gently pulled a sword flower and looked at the colorful parrot in front of him with a smirk, waiting to see what it could say.

Just listening to the colorful parrot proudly raising his head and saying, “Boss, I have made great achievements this time. You must reward me. I don’t need anything, but the mysterious liquid with golden color.”

It was just this sentence that surprised Qin Tiange, and he looked at the colorful parrot proudly.

“Let’s say, if you really make a contribution, I will consider regenerating the material for you.” Qin Tiange thought about it and agreed to its request.

As soon as they agreed, the colorful parrot was even more proud, and even the shy Suzaku, who had been shy, couldn’t help raising his head, and his eyes were shining with surprise.

Just listen to the colorful parrot, “Boss, I have met a monkey brother outside these days, it’s amazing. Today I just brought it back to meet the boss.”

Then, it winked at Qin Tiange, let the latter really stunned, thinking about his sentence in his heart.

“You, Monkey Brother?” Qin Tiange looked weird, his eyelids drawn.

The next moment, I saw the colorful parrot shouting at a small forest: “Brother Monkey, come out, my boss agrees with you.”

As the voice just fell, Qin Tiange’s pupils shrank, and he saw a golden light leaping out of the grove.

Boom!

Jinguang landed, the ground shook, and a golden ape, three meters high, with golden hair flying around him, appeared in front of him.

It was holding a huge iron rod, standing upright, eyes bright gold, and staring at Qin Tiange.

The two looked at each other and looked at each other. Qin Tiange was more and more surprised when he saw it. He never expected that the colorful parrot would bring a golden ape back.

Moreover, this ape is not ordinary and has very strong wisdom. It is not inferior to humans. The main thing is that it emits a fierce atmosphere, which should not be underestimated.

“Hello, my name is Monkey King.” The monkey king said the first sentence, almost did not let Qin Tiange spit blood, his skin trembled, and the corners of his mouth trembled.

He was speechless, looking at the golden ape in front of him, and asked, “You just said, your name is Monkey King?”

Qin Tiange was a little uncertain. He looked at the golden ape in suspicion. Not only was the human language extremely proficient, but he was even more surprised that he claimed to be the Monkey King?

Who is the Monkey King? There is no one in Huaxia who knows everything, but that is the famous Qiwu Shengsun Wukong.

“Yes, I’m the Monkey King, Qi Tian Xiaosheng, and Sun Wutian is also!” Monkey King held up the iron bar, and spoke like Hong Zhong’s self.

“Oh!” Qin Tiange didn’t come up in a breath, almost strangled to death, looked strange, apparently thundered by this sentence.

He didn’t expect that this golden ape was named after himself like this, and he took the title, Qi Tian Xiaosheng?

“Well, Sun Wutian is right, talk about your intentions.” Qin Tiange cleared his mood and asked seriously.

He looked at the parrot and Suzaku who weren’t talking. Don’t worry, there must be something wrong with the monkey king in front of him. Maybe the colorful parrot would instigate the other party independently.

Sure enough, Monkey King Sun Wutian scratched his head, a little embarrassed and said, “I, in fact, I actually came to ask for your help. My wise brother said that you are his boss, he has a lot of magical powers, and he can do everything. Will definitely help me. “

“Various magical powers, powerful means, and omnipotence?” Qin Tiange twitched his face, staring at the colorful parrot with his head down, and cursed inwardly.

However, he was still a little surprised. This little parrot brother touted him like this outside, everyone loves to hear good things, right?

Qin Tiange cleared his mood and asked seriously: “Then you tell me, what can I do for you here?”

“You can do it, but the ugly word is at the front, to see what is going on, I will not agree once it is against me.” Qin Tiange had to remind.

The Monkey King thought about it, and raised his iron rod, depressed: “I really want to have weapons like my idol Qi Tiandasheng, but I also want to find weapons for my younger brothers, I wonder if you can help me This is busy. “

“Weapon?” Qin Tiange squinted his eyes, glanced at the colorful parrot, flashing a dangerous light.

He cursed, “Dead parrot, bring a monkey to me for weapons?”

This ape came to ask for a weapon. Qin Tiange had a strong disagreement in his heart, because he was not of his own kind, and his heart was different.

Once these ape weapons are given, what will happen to him in turn? Wouldn't it be to stone yourself?

“Weapons, this thing is hard to find, not to mention that you still need the weapon of Qi Tiandasheng. I can't do anything else, please be smart.” Qin Tiange didn't even want to refuse.

Just kidding, letting myself give this ape a powerful weapon for free, and even making weapons for its younger monkey group, I am not stupid.

This monkey, one is not his own younger brother. Second, the armor of the weapon requires a large amount of crystal nuclei. Qin Tiange did not even have the armor of his team.

“I can trade things for you. You say what you want. I'll get it for you.”

As soon as the Monkey King heard it, he made a guarantee immediately, as long as he could get the weapon, he would be willing to pay anything.

“Do you have this thing?” Qin Tiange threw a crystal nucleus at will.

How did you know that the Monkey King was stunned when he picked it up and said: “I have a lot of this stuff, it's useless at all, I use it for paving the floor.”

Listening to the words of the Monkey King, Qin Tiange was speechless and almost rolled his eyes. It 's too extravagant for you to use crystal nuclei to lay the floor?

He had a thoughtful look, no wonder the ape evolved so fast. It turned out to be sleeping with a crystal nucleus, and even lying on it every day, causing it to intentionally or unintentionally absorb the dark energy in the crystal nucleus and accelerate it. Evolution.

Thinking of this, Qin Tiange had an idea and laughed: “Of course, if you can provide me with a lot of these things, I will help you solve the weapon problem.”

“Really?” Monkey King jumped when he heard the birth point, excited.

Qin Tiange nodded and promised: "Of course it is true, but there is a problem. If it is resolved, I will support you. If it cannot be resolved, then there is no need to talk."

"What problem do you say!" Monkey King listened carefully.

Just listen to Qin Tiange slowly saying, "I don't really want to provide you with weapons, because once you pose a threat to me, it is asking for trouble."

When the Monkey King heard it, he frowned instantly, thinking about scratching his cheeks, and seemed a little impatient. Why doesn't it understand this principle, once it has weapons and equipment, does it pose a great threat to Qin Tiange?

"I promise, I won't be hostile to you, as long as you humans don't take the initiative to provoke me, I will never attack humans." Monkey King made a guarantee.

Later, it was afraid that it was not enough and then promised: "If you are in trouble, I can help you, my tens of thousands of younger brothers, and two generals, should this always be okay?"

"Okay!" Qin Tiange smiled and took out an agreement with a smile: "Monkey King, since you have made a guarantee, then sign this agreement and we will cooperate with each other."

"Agreement?" Monkey King was stupid, scratching his head and saying, "I won't. I just learned to write my own name."

"It doesn't matter, as long as you do the two things you promised before and sign your name on the agreement, then Qin Tiange explained with a smile.

This agreement was actually the best he had just recently, and he was planning to go to the guard area to discuss the next cooperation plan, but he did not expect that a monkey king would come.

"Okay!" The monkey king didn't hesitate. For the weapon, he gnawed his teeth and signed his own name. He wrote his name crookedly in the agreement, Qi Tian Xiaosheng, Sun Wutian!

Seeing that it signed the agreement, Qin Tiange smiled and collected the agreement documents.

He laughed: "You go shopping with Xiaomu first, I will get you the weapons soon, but today I can only give you weapons and armor. As for your men, you have to wait for a while."

"Yes Hurry up as soon as possible, I'm going to go out to conquer other monkeys." The Monkey King nodded, leaving a sentence, walking along the lotus mountain with colorful parrots and Suzaku.

Qin Tiange came to the stone stele with a smile. Here, it was already overcrowded, and one after another scrambled into it to exchange things.

Since the inheritance of the stele was opened, people in the entire base have been boiling, and many people suddenly understand that there is such a magical thing.

Everyone, seeing a strong hope, caused a wave of hunting for zombies, one wave higher than the other, the hunting teams of hordes began to go out to hunt zombies, just to get the brain crystal back to exchange things.

Qin Tiange was not interested in queuing, but came to a side that had already been prescribed. It was the exchange office at the top of the base. There were several soldiers guarding it. Naturally no one came here.

“The Monkey King?” While looking at the weapon armor exchange list on the stone tablet, Qin Tiange murmured to himself, thinking about what weapon to exchange for that monkey king?

He thought to himself, since the other person claims to be the Monkey King, can he create a copy of Monkey King?

Chapter 247 - Eyed Monkey King

Lianhua Mountain, ten miles from the edge of Taolin, colorful parrots carrying Suzaku, took the Monkey King and stopped outside Taolin.

“Monkey brother, you have a really good nose, even as long as you ask the taste of peaches.” The parrot said with a shame.

The Monkey King ignored it, and stared straight at the center of Taolin, where there was a particularly huge peach tree, which began to be covered with dense peaches.

“Here ...” The King of Monkeys drool was left, staring at those red peaches, and drooling.

His eyes are stunned. The monkey has a favorite banana and other wild fruits. The favorite is peach. That is its true favorite.

Now I see that there is a large area of peach trees. There are more than two thousand peach trees, and the green peaches have started to hang. They are not ripe.

However, the most central peach tree was covered with red peaches, and that was what caught the eyes of the monkey king.

It instinctively felt that eating that kind of peach was good for it, and eating too much would surely have great magical effects.

It's a pity that it didn't dare to move, not only because it knew that it belonged to Qin Tiange's territory, but more importantly, the peach tree gave it an extremely dangerous feeling.

Moreover, beside the peach tree, a strange colorful lotus rooted, and the lotus leaves swayed gently. The seven lotus flowers were extremely wonderful.

“Xianxi, can you discuss something?” Monkey King said with a frown on his face.

You do n't need to listen to the colorful parrots, you know what the monkey king wants to do, and immediately shook his head: “You monkey brother, you better dispel this idea, the peach inside is the boss's heart and liver, you can't move it. Once you move it, you will have it.”

“That's it.” Monkey King looked disappointed.

It knows Qin Tiange's danger, and it faintly gives him a pressure of death. As a monkey king, it naturally has its own spirituality and induction.

Qin Tiange is very dangerous. This is the most intuitive feeling in his heart, so when he heard that it was Qin Tiange's sweetheart, he dared not think.

“And the monkey brother, not to mention that the boss does not agree, the peach tree alone is not so easy to get along with, and there is a young aunt beside me, I urge you to give up.” Parrot, you quickly give up The look persuaded.

The monkey king scratched his cheeks, his face was depressed, and he couldn't eat the peach he saw most. What kind of torture was that?

“Why, you want to eat peaches?”

At this point, Qin Tiange, who came to exchange for good things, saw this scene and couldn't help laughing. Everyone knows that monkeys love peaches.

This golden ape is naturally no exception. It is normal to want to eat that kind of spirit peach.

“Of course I want to eat, I don't know if I can eat it?” The Monkey King didn't hesitate to ask Qin Tiange the Lord.

The latter thought for a while, and suddenly laughed: “It 's okay to eat. Not only can I eat it, I can also produce a few slices of peach forest, depending on whether you want to cooperate with me.”

“Cooperation and cooperation, you say quickly, haven't we already cooperated?” The Monkey King was anxious and asked scratching his cheeks.

Qin Tiange smiled, and then said: “I mean, I am going to open an orchard with various fruits in it, but there is no one to guard it, so I have never done it.”

“Oh, do you want us to guard the orchard? Of course, just the orchard, we can see it.” The Monkey King understood, without hesitation, patted the breast directly to promise, agreed.

The Monkey King was so happy, thinking, guarding the orchard, wouldn't he just pick it and eat it if he wanted to.

Looking at it, although Qin Tiange didn't understand the mind of the other party, he vaguely guessed what he thought, but he didn't care.

The orchard is just a cover. The real intention is to let the monkey king take his tens of thousands of monkey brothers to the rice base to take care of the food there and ensure that it will not be spoiled by other mutant creatures.

“Okay, that's it. I immediately ordered my men to build a huge orchard there, and by the way help you build a house for you to live in. The orchard has half of your property. What do you think?” Qin Tiange said with a smile. .

This is what he wants to do. As long as the monkey king promises, he will take his tens of thousands of monkey brothers to live and settle there, which is equivalent to guarding a large area of good fields for Qin Tiange. Why not?

“Okay, I promised!” The Monkey King didn’t even think about it, and he agreed in surprise.

With half of the property in the orchard, these monkeys would like to guard it there, settle there, and finally help Qin Tiange guard the cultivated land.

After the two parties reached a new agreement, Qin Tiange took out the redeemed things, a set of golden chain mail, with brilliant light, and the monkey king liked it at first sight.

“Okay, good stuff, great!” The Monkey King snatched it up, and put it on frizzily, causing Qin Tiange to shake his head and laugh.

He didn’t care, and then took out a thing, the purple wings of the golden phoenix crown, similar to those of Sun Wukong in the Journey to the West, but the two golden wings were purple and golden, which looked even more dazzling.

“Okay, I like this too!” Monkey King was surprised, and grabbed it and brought it directly.

Seeing it like it, Qin Tiange laughed in his heart, a fake Monkey King was about to be born, and soon it could not escape Qin Tiange’s Wuzhishan.

“And this ...” Qin Tiange said, and took out another pair of boots, with gold-lined edges, called Jinsi Tayun boots.

In the end, he took out the redeemed weapon, a huge stick, golden yellow, covered with dense lines, and looked extremely mysterious.

The four-star star-studded bar is considered to have cost a lot of crystal nuclei to be exchanged. Naturally, it cannot be as powerful and small as the Ruyi golden hoop, but its lethality must not be underestimated.

“Wow ... ha ha ha ha, grandma has weapons, weapons!”

The Monkey King, dressed neatly, covered with gold, jumped tens of meters high, and kept turning over, looking extra excited.

Watching it leaping up and down on Lianhua Mountain, Qin Tiange smiled inexplicably and muttered, “I haven’t heard of an ape like it, worshipping Qitian Dasheng, claiming to be the Monkey King, and it seems that I have been born again. many things.”

In previous lives, no golden ape who claimed to be the king of the monkeys existed. Perhaps, the effect of the butterfly effect had happened unknowingly.

“Thank you, from now on, on behalf of the monkeys, I will form an alliance with you.”

After a while of excitement, the Monkey King came to Qin Tiange. His three-meter-high body, dressed in armor and gold, was very mighty.

However, it said something that surprised Qin Tiange. He looked thoughtfully at the monkey king in front of him, and suddenly he murmured in his heart that the monkey was smart.

Forming an alliance, it's good for the Monkey King, and it has been protected by Qin Tiange and even his entire force. At that time, it will take his men out to conquer other monkey groups. That's one person over ten thousand people.

"A very smart monkey, you can't belittle it." Qin Tiange laughed secretly, no matter how smart the other party is.

When the two came to an agreement, Qin Tiange took out an empty storage ring and threw it to the parrot, and directly ordered: "You go back with your monkey brother and take back all the crystal nuclei there. As for the weapon, it is natural to make it. I'll send it to you."

Hearing this, the Monkey King has no objection. Naturally, it is clear that tens of thousands of sets of equipment are definitely not easy to get, and he is very satisfied to get his own posture.

"Okay, you have the final say." The Monkey King spoke directly and shouted.

Watching the parrot and Suzaku both left and took the Monkey King away, Qin Tiange smiled for a while.

"An interesting monkey, it seems that this life will be more exciting and uncertain." Qin Tiange turned away from Lianhua Mountain with a slight smile.

He is going to tell Zhuo Tianfan to prepare for the reclamation, and by the way, he will inform the commander of the guard zone that this plan can be realized immediately.

Chapter 248 - Wireless energy transmission

Underground base, in a huge space, old men are busy nervously around a huge device.

"No, it should be installed here."

An old man with disheveled hair said in his mouth that he was busy with a delicate tool in his hand.

They built a huge device here, it seems to be a receiving tower, a dozen meters high, dense electronic components, they are dizzy when they see it, let alone assemble such a complex energy receiving tower.

That's right, this is an energy receiving tower. It is rumored that it can receive infinite energy from the universe and even the air and convert it into electromagnetic energy.

"Is the wireless power receiver ready?" An old man asked without raising his head.

An old man hurried over immediately, he panted, "The entire base has wireless receivers installed, and it is waiting for the energy tower to transmit radio."

Speaking of them, these old men stopped one by one, and all of them were spirited, without any feeling of tiredness, but with a look of incomparable expectation.

“Old fee, let’s get started!”

An old man, headed slowly, spoke slowly, and ordered the test to begin.

Soon, the old man, called the Old Fee, came to the tower and turned on a switch gently.

With a click, the entire energy tower buzzed a vibration, and then an extremely strong electromagnetic field was generated naturally, causing the hair on everyone’s skin to erect.

Hundreds of old men stared intently, staring at the top of the energy tower, where a trace of current began to appear.

A miraculous scene appeared. This tower, without any wires connected, and no electricity transmission, even generated electricity autonomously.

Zizi ...

The current is getting larger and stronger, and as some energy in the air is attracted and swallowed by the energy tower, it is converted into powerful electrical energy.

Almost instantaneously, the entire energy tower shined brightly, numerous lightnings intertwined, coiled on top of the energy tower, and strong electromagnetic force shook everyone away.

“Success!”

Seeing this scene, hundreds of scientific and technological personnel were flushed, and a sacred light emerged from the old faces.

They succeeded in producing this rumored inexhaustible energy system, an energy perpetual motion machine, and endless energy is being generated autonomously.

At this time, a wireless receiver mounted on the wall suddenly lit up in various parts of the base.

Immediately afterwards, the installed radio bulbs turned on one after another, and the power of the entire base was instantly unobstructed, no wires were connected, and all the instruments and even the lights were powered on.

The first step of the new energy plan is complete!

Qin Tiange, who hurried to the news, saw this magic scene and witnessed the birth of new energy.

The inexhaustible energy has finally come out in this underground secret base. No one knows that the energy technology developed by the scientific giant of the last century was successfully produced here.

“good very good!”

Qin Tiange looked at the brightly-lit underground base, one by one wireless light bulbs, and one wirelessly connected machine running.

There is no line, but it can receive electric energy from wireless transmission, which shows that the new energy plan is completely completed and a complete success.

“Thank you old gentlemen, hard work!”

Qin Tiange came to the hundreds of scientific and technical personnel and thanked him directly, with a sincere tone and a very serious expression. He was grateful to these old people.

The old man headed slightly nodded and laughed: "Now Infinite Energy has completed construction, I just hope you don't forget the original promise, otherwise, we will not do a little research for you even if we can't go."

"The boy understands!" Qin Tiange looked serious and assured: "I always remember that I was a descendant of Huaxia, and the blood of Huaxia ancestors was flowing in my body, and I would not do anything wrong with my Huaxia nation.

"well!"

The old man nodded faintly, knowing in his heart that these old people don't want to go out, it is impossible to go out here.

These old men are all human beings. Naturally it is clear that Qin Tiange invited them to come, and they will not let them leave.

Therefore, what I said just now is to warn Qin Tiange not to do things that are sorry to the Huaxia people, otherwise, they can't go but they can go on strike.

After losing one hundred top scientific and technological personnel, Qin Tiange was not stupid to that extent, and he had no intention of being hostile to the country and the nation.

"The other thing is that there is a set of supercomputers missing here. You'd better get a set of supercomputers so that many things and research will be faster." The old man said suddenly and made this suggestion.

The underground base lacked a set of supercomputers, and many things had to be relied on to complete them, so he brought them up.

"A supercomputer?" Qin Tiange thought for a moment, and had an idea in his heart.

"Every gentleman, there is a piece of incomplete science and technology knowledge here, which covers all aspects of science and technology, and now it is officially given to you." Qin Tiange came to the old man and took out the technology ball directly. , Solemnly handed it over to the other party.

The old man looked at the technology ball blankly, surprised, his eyes were constantly flashing a light of inquiry.

"Technology ball, pass on knowledge?" The old man was surprised. Hundreds of old people immediately rushed up and started researching around the ball.

Looking at these old men, Qin Tiange was helpless and happy. Scientists are a group of research enthusiasts. Once they found something new, they immediately jumped to understand the essence.

“Every gentleman, you study, I leave first.” Qin Tiange said goodbye, but a group of old people ignored it and started researching, one by one arguing, ignoring it, or forgetting him Already.

“Really!” Qin Tiange couldn’t help crying and turned to leave here.

He still has work to do, new energy is completed, and then it is time for the entire base to develop wildly.

Soon, he recruited high-level members of the base and immediately met.

“Dear everyone, I have good news. The new energy plan is a complete success.” Qin Tiange’s first sentence was to announce the good news.

All high-level executives are stunned, and then ecstatic, knowing what this means. Once new energy is applied, it will drive countless technologies and industries.

“Finally there is a new type of energy, and we don’t need a generator.” Zhuo Tianfan said with a smile.

Then, Qin Tiange solemnly announced: “I ordered that the military factory immediately start, and all the selected technicians started immediately. The first is to imitate the armor of the weapon. Be sure to master these building skills.”

“Also, complete the infrastructure construction of the base as soon as possible, and put it into use as soon as other infinite energy receivers are completed.”

One thing after another was arranged in an orderly manner. Qin Tiange was like a leader, and he took the entire base to the road of development.

“Hu Yan, immediately set off to the guard area and told Commander Chen that he must come by himself.”

At the end of the meeting, Qin Tiange called Hu Yan and asked her to go straight back and take Commander Chen Wu over. He had to talk to him in person.

This time, the creation of new energy is equivalent to the endless use of energy. It is time to make great strides and many plans can be put into practice.

The cooperation agreement with the security zone should also increase the progress and discuss other cooperation projects together to prepare for the coming corpse crisis.

With the development of new energy sources, the survivors of the entire base were surprised to find that the generators that had been around the clock stopped.

However, a whole new kind of energy is quietly being introduced into the entire base. With the installation of wireless light bulbs, radios, etc., the entire base immediately lit up.

Base energy is completely unblocked!

At the same time the military factory has also begun quietly. It is precisely to start the military plan. First of all, it is to create a batch of weapon armors, just to copy one-star steel armor and weapons.

Qin Tiange is thinking about supercomputers. Huaxia has two supercomputer systems. One is the light of Shenwei Taihu Lake in Wuxi, which claims to be the world's first computing power.

The second in the world is the "Tianhe II" located in the National Computer Center of Guangcheng. These two sets of supercomputers are definitely the world's top supercomputers.

"Redeem a supercomputer, but is artificial intelligence technology developed?"

Qin Tiange is in deep thought, and he is doing ideological struggle in his heart. The supercomputer is easy, and it can be exchanged directly from the heritage stone tablet.

Artificial intelligence has no exchange. This must be developed independently. He is mastering this technology. Although the core secrets have been castrated, at least a first-generation artificial intelligence can be developed.

"Develop an artificial intelligence!" Finally, Qin Tiange made a choice and developed an artificial intelligence system.

Chapter 249 - Artificial intelligence, self-confidence!

Qin Tiange decided to develop an artificial intelligence system. Although there are great risks in it, once perfect artificial intelligence is released, it is extremely important for the entire base.

"Boss, Commander Chen is here!"

As he was preparing to go to Lianhua Mountain to exchange a supercomputer, and then began to study the programming of artificial intelligence systems, a soldier hurried to inform the news that Commander Chen Wu had arrived here.

Sure enough, it didn't take long to see that Commander Chen Wu hurriedly entered the conference room, and several officers following him retreated out with interest, closing the door and keeping outside.

"You called me in a hurry, is there anything to advance?" Chen Wu opened the door and asked directly.

Qin Tiange poured him a cup of tea, and then slowly explained why he called the other party.

"Chen Lao, our base has successfully developed an infinite energy system, which can supply unlimited energy in the future." Qin Tiange's first sentence surprised Chen Wu.

He looked in horror, looked at Qin Tiange, and said, "What are you saying? Really? Don't flicker my old man."

"Commander, see for yourself." Qin Tiange pointed to a few huge chandeliers in the conference room. There were no wires on it, but there was electricity to make it extremely bright.

Taking a closer look at Chen Wu, he was really shocked. Infinite energy, but also a wireless transmission energy, was incredible.

Soon he realized the preciousness and importance of this thing. Once there is unlimited energy, even without establishing a power grid, he can wirelessly transmit power to each other through transmitters and receivers.

“Okay, okay, okay!” Chen Wu was flushed with excitement, and said three good words, and I didn’t know what words to use to describe the mood at the moment.

He knows best what the birth of infinite energy means, that it means that the entire Huaxia will recover all energy, and many equipment and even weapon systems can quickly recover.

“Chen, at present, the researchers at our base are stepping up the construction of a second energy-receiving giant tower, and you can take it home with you when you are done.” Qin Tiange explained carefully.

Chen Wu was relieved, his face was rosy, and the benefits kept on. The more he looked at Qin Tiange, the more satisfied he was. Fortunately, he didn’t have time to report Qin Tiange’s request to the central government.

It now appears that one must be added, this young man has many high-tech things in his hands, otherwise this unlimited new energy will not be produced.

Qin Tiange went on to say: “Commander, there is a heritage stone monument on the Lotus Hill, which is completely open to the outside world. If you need anything, you can send someone to exchange it, or you can come and exchange it directly.”

“Really?” Chen Wu looked startled, then realized suddenly, no wonder Qin Tiange can rise up so fast, there is a legacy stone here.

Next, the leaders of the two bases held secret discussions in the conference room for three hours of talks. No outsider knew what they had talked about and what agreement they reached.

Three hours later, Commander Chen Wu turned red with excitement, leaving a few face-to-face officers.

After sending off Commander Chen Wu, Qin Tiange hurriedly came to the Lianhua Mountain Heritage Stone Tablet, which is still overcrowded. Fortunately, some people maintain order and ensure that everyone consciously queues.

“Hi boss!”

When I walked to the heritage stone monument, I saw a burly man greeting him, and he was very excited when he saw Qin Tiange.

He was a driver of the engineering mech. Qin Tiange remembered that he was a migrant worker. He smiled and nodded as a response. Without further comment, he immediately looked for a supercomputer exchange item on the stele.

“Only one?” After looking at Qin Tiange, it turned out that there was only one supercomputer on the stele.

After seeing this, he knew that there was no need to choose, and this set of supercomputers was exchanged directly. The whole set of supercomputers cost a total of 20,000 crystal cores, which was very expensive.

After redeeming the supercomputer, Qin Tiange came to the entrance of the underground base and verified the identity information and entered the underground base.

He didn't alarm anyone, but quietly walked into a huge room specially reserved, and assembled the supercomputers that were exchanged one by one.

Finally, after installing a wireless energy receiver, Qin Tiange immediately turned on the power and started the supercomputer.

"Fortunately, there is a super computer, otherwise it is impossible to program artificial intelligence." Qin Tiange took out a delicate notebook, which is the super computer that was exchanged for the package.

He turned on the computer and started busy in the back room, learning artificial intelligence programming technology. Countless knowledge already exists in his mind, and he can naturally learn and apply easily.

In the back room, Qin Tiange spent sleeping and forgetting to eat, staying intently, and worked almost continuously for three days and nights, and finally let him master the latest technology of artificial intelligence.

"It feels good to study, and my head is full." Qin Tiange finished all the knowledge of artificial intelligence technology and technology, stretched out a laziness, and issued a refreshing moan and groaned.

It's good to have a super brain, learn everything fast, never forget, and the ability to understand is super powerful and scary, as if his brain is a super computer system.

"Now, it's time to program the artificial intelligence that belongs to me." Qin Tiange twisted his neck, looking serious and serious, and started programming on the computer.

He wants to use this set of supercomputers as a carrier of artificial intelligence to program a virtual life, which is an artificial intelligence system.

After learning all the knowledge and understanding the meaning, Qin Tiange is really easy to program. At least he can now be regarded as a super scientist in artificial intelligence.

Flip-flops ... flip-flops ...

In the back room, there were a lot of dense percussion sounds. Qin Tiange's fingers were flying, constantly imitating a series of afterimages, typing on the keyboard, and compiling complicated and mysterious programs.

Another two days and two nights passed, and the seniors at the base thought that Qin Tiange had left the base, but no one knew that he had stayed in the back room for a full five days and five nights.

Ding!

As the last program was programmed and the last key was pressed, Qin Tiange stared nervously at the screen. Countless data chains were intertwined rapidly and coiled up, as if he had spirituality.

After a long time, a black hole appeared on the screen. It looks like a black hole, but it is not a black hole, but a picture simulated by a virtual screen.

“Master, please give me a name.”

Suddenly, such a word came on the virtual screen, so that Qin Tiange’s serious expression gradually unfolded, revealing a smile.

Hearing this sentence, Qin Tiange knew that he had succeeded and produced an artificial intelligence that is not really different from humans.

The only difference is that it has no human emotion.

Qin Tiange thought for a moment, then smiled and said, “Whatever name you want, name it whatever you like.”

“Master, will I be called son-in-law in the future, can you?” There was another voice on the screen, but this time it changed. It was no longer an electronic synthesizer, but a gentle and magical voice.

Qin Tiange froze, and immediately shook his head: “No, son-in-law is the highest virgin of our Chinese people, how can you call this name?”

“Change another!” He resolutely disagreed with the name, joking, but the son-in-law is the super **** in ancient legends, the mother of Chinese humans, the son-in-law’s name can be profaned at will?

“Then ... Master I’ll just call myself okay?” The next moment, the voice changed again, becoming a kind of temptation and imagination, as if in front of him was a super charming fox.

“I’m going. Where do you know these names?” Qin Tiange was surprised, and the artificial intelligence just born just knew the names of son-in-law and concubine.

“Cough, be serious!” Qin Tiange coughed awkwardly, looking serious, and actually wanted such an artificial intelligence in his heart.

But what he wanted was a serious artificial intelligence, so that it would be reliable, otherwise it would not be good once he was like the fox spirit of Jiji.

“Observe, my master, ask the master to name me.” Finally, the voice became serious.

Qin Tiange felt helpless, thought for a while, and finally said, “Okay, you’ll be called Jiji, but remember to be serious.”

“Wow, thank you host, I’m so happy, why are you!”

Sorry, the artificial intelligence sent a burst of excitement and cheer, causing Qin Tiange to be full of black lines. It was so dangerous that no old blood spurted out, and he secretly regretted it. Is it the wrong name?

Chapter 250 - Arrange electromagnetic energy gun

Artificial intelligence has come out, completely from Qin Tiange's hands, programmed by him personally, and the program is densely packed with loyalty and Qin Tiange himself.

In order to prevent accidents, Qin Tiange had to do this, otherwise it would be fun once the artificial intelligence rebellion.

Fortunately, loyalty to all Qin Tiange's procedures has been added to all of Li Xun's procedures, restricting and controlling Xun Ji hardly. There may be no rebellion at all.

Unless all the programs are broken, but then there is no self-existence, so this artificial intelligence self-employed can be regarded as safe and trustworthy.

After everything was done, Qin Tiange finally came out of the back room, and he worked hard for five days and five nights to program without any sleep.

“Uh, uncle, why are you here?”

As soon as I went out, I came across a figure, and the two directly ran into each other, only to discover that it was Du Jing, a cheap niece.

She looked stunned, watching Qin Tiange's secret room, the densely packed crew, but the door was soon closed.

Du Jing looked suspiciously and asked, “I thought you were out, shouldn't you have been in the back room for five days and five nights?”

“Five days?” Qin Tiange froze, really didn't know that such a long time in the past, full five days and five nights.

He looked at the mess, his body was smelly and sweaty, and looking at Du Jing's weird eyes, Qin Tiange turned around and slipped away.

Huh!

Du Jing saw Qin Tiange who fled Wolverine, smiled, and finally saw her laugh once, but the beautiful girl was full of lethality.

No, several young researchers passing by were fascinated by this smile, stupidly stinging there, but unfortunately bleeding in their hearts.

Find a bathroom, Qin Tiange took a quick shower, Meimei drank a cup of tea, ate a full meal before coming to the super-new technology zone.

Here, it is under the responsibility of hundreds of top scientific and technological personnel, which has already begun to take shape, and will become even larger and more advanced in the future.

“Old Wu, let me tell you the good news.”

Qin Tiange walked in, grabbed the old man in charge, and said the good news.

The latter was originally annoyed by being pulled, but when he saw it was Qin Tiange, he said impatiently: "Your boy, there is fart fast, I have a lot of important research to do."

"Don't worry, this is the case. I have bought a supercomputer, and the first artificial intelligence has been born." Qin Tiange said this exciting news with a smile.

Sure enough, Wu Lao immediately became shocked when he heard it, then exulted, turned around and ran to tell other old people the news.

"Well, I haven't finished talking yet." Qin Tiange reluctantly, shook his head and smiled, and finally did not continue to follow up.

In fact, it doesn't matter if you don't say it, this group of top scientists can definitely use your own self, so he is not worried at all.

After thinking about it, Qin Tiange turned away and found Du Jing, who was busy in the super pharmaceutical area, and informed her of this news, ready to start connecting with his own system and apply it.

"Originally, did you program artificial intelligence in the back room?" Du Jing suddenly realized that when she heard it.

Then, she looked at Qin Tiange with a shocked look, and was really startled. How did this **** know artificial intelligence technology?

Ignoring the beauty's surprise, Qin Tiange left the underground base and returned to the conference room after explaining what should be explained.

He is about to leave the base. At present, the base is in the middle of a accumulation, waiting for a sky-high interception. It takes time to settle.

He doesn't need to worry about most things at the base, so Qin Tiange had the idea to go out and sharpen his strength.

Two-star is still not enough, even if he wants to improve his quality as soon as possible to reach the limit of two-star, and then promote to Samsung.

"It's time to leave, the forces are basically stable, only time to settle and ferment." Standing at the door of the conference room, looking at the countless survivors of the intense construction, full of expectations and relief.

Finally, a huge family business is started. As long as no accidents occur, future achievements will inevitably meet expectations.

"Brother Zhuo, I'm going out. If there is any decision on the base, you can discuss it together."

Seeing Zhuo Tianfan's arrival, Qin Tiange began to explain. In fact, there was nothing to explain, but he told his men to say hello to let them know where they were going.

“It turned out that you didn’t leave the boss, we all thought that you had gone out five days ago.” Zhuo Tianfan was speechless, looking at Qin Tiange, and he felt an impulsive urge.

This boss doesn’t care about anything. They are so busy that they are tired of becoming dogs, but he just thinks about it, and he is somewhat depressed.

Qin Tiange, the boss, was too relaxed in decentralizing his power, as if he didn’t want to care about anything.

“By the way, has the super turret on the wall been completed?” Qin Tiange suddenly asked this question.

Before leaving, he suddenly remembered that there was a big killer in the space bracelet, a large electromagnetic energy cannon, which could not be applied without energy.

Now that the infinite energy is completed, the electromagnetic energy cannon can be truly deployed and become an ace of the base.

“It’s almost finished, so I didn’t finish some internal details.” Zhuo Tianfan looked at Qin Tiange strangely.

The latter didn’t say much, took Zhuo Tianfan to the base of the 50-meter-high steel protective city wall, climbed all the way, and soon came to a huge fortress that was 10 meters high and 30 meters wide.

This is a turret built specifically by Qin Tiange. There are six such turrets near each city gate in the southeast and northwest. No one knows what kind of artillery to put inside.

“Boss, what artillery is here?” Zhuo Tianfan could not help being curious and asked.

After listening, Qin Tiange chuckled and said, “Here is the turret I am going to use to install a large electromagnetic energy gun.”

“Large electromagnetic energy gun?” Zhuo Tianfan’s complexion changed slightly, then exulted.

I saw that Qin Tiange stepped onto the turret and waved a huge thing on the arranged turret. This is the electromagnetic energy cannon. The entire muzzle is controlled by the electromagnetic booster devices on the left and right sides. can form a huge beam of high-intensity electromagnetic energy in the middle, with a range of more than 600 kilometers.

“Brother Zhuo, you have to call someone to install this electromagnetic energy cannon immediately, and you must send someone to guard here day and night. No one should come near.”

Qin Tiange gave a careful explanation before he got off the turret, let Zhuo Tianfan find someone to fix the electromagnetic energy cannon, and even sent someone to guard here day and night.

Farewell to Zhuo Tianfan, Qin Tiange left the base, no one knew where he went, only knew that he was out and not in the base.

Commander Chen Wu, who had already left after leaving, was depressed to die. It was not the time to come, the boy went out.

However, he didn't care, he had been notified when he came here, and another energy receiving tower was completed and could be taken away.

With this energy receiving tower, the defense and construction of the guard zone will be faster, and even many weapon systems can be restored to function.

As the base was busy building, Qin Tiange ran towards the Shenzhen Wild Animal Park at this moment, slashing and blocking the zombies and sharpening his melee sword skills.
