

Dark Ages 40

Chapter 40 - Burn the zombies, kill them all

The wielding steel knife fluttered, flesh flew, the spear was stabbed, and it penetrated through the forehead of a zombie.

In front of the seventh pit, Qin Tiange and others frantically slashed around the pit, one after the other zombies snarled and rushed up, stepping on the same kind of body, and more and more.

Squinting at the seventh big pit is about to be filled by the zombies coming from behind, Qin Tiange Mulu murderous, knowing that the time is up. "Ignite!"

With a loud shout, as more than a dozen boys threw torches, everyone immediately retreated and burst into a bang, and five big pits immediately ignited a raging fire that engulfed the surging zombies.

There were seven large pits, many flammable materials were lost, and a lot of gasoline and diesel were dropped. Mars immediately ignited a raging fire and the smoke billowed.

Crackling!

In front of the urn, countless zombies were burned, and there was a crackling sound in the pit. Many zombies were burnt black, and the outflow of corpse oil caused a more violent fire. Even the zombies in the pit were completely swallowed by flames.

The scene was appalling. Seven large pits, more than five hundred zombies, were engulfed by the fire. The fire was fierce, and the flames rose more than four meters high.

Roar!

Zombies didn't understand the fear at all, still pouring in from the gap, rushing into the sea of fire frantically, and rushed towards this side.

Soon, the seventh large pit was full, and some zombies rushed across the sea of fire, rushing towards Qin Tiange and others, making a roar of bloodthirsty.

"Steel crossbow, shoot!"

Qi Qin Tiange calmly looked at some zombies who rushed across the sea of fire and issued a shooting order.

Qiu Liuyu and others had long been prepared. When they heard the order, they immediately lifted the steel crossbow, pulled the trigger, and a sharp steel arrow whistled, rushing through the zombies that came over.

Despite the shooting of steel crossbow, more and more zombies rushed to the front. More than 70 knife and shield hands such as Moda immediately raised the shield and smashed it. The steel knife slashed, and flesh flew for a while.

There were rows of rifles like forests, sharp flashes, fierce assassinations, and only one zombie fell, and more zombies came over. As a last resort, Qin Tiange and others fought and retreated.

On the football field, the killing sound became a film, the corpses roared, and the two sides killed each other.

The sword shield was ahead, the spear was behind, and the steel crossbow was in battle. This team match was the most skilled play in Qin Tiange's previous life.

In previous life, although he did not have his own power, at least he joined a power and led a team to fight, so he has rich experience.

At this moment, leading a group of students to hack and kill zombies in this way is extremely powerful in terms of efficiency and security.

The sea of flames burned and blocked most of the zombies, but because the zombies filled the pit later, more and more zombies stormed the sea of fire and slaughtered them in front of everyone.

The slaughter was still going on, and Qin Tiange waved the bone-breaking sword, slashing one zombie after another. Fortunately, he knew the trade-offs and devoted himself to improving these people, otherwise he wouldn't say that he had achieved the goals he set for himself, and he was incapable of dealing with thousands of zombies.

The Tatar Sea tactics are the most terrifying, not to mention the fact that there is no fear and no painful zombies, such as the tide is coming in and rushing.

Waving a knife, slashing, and then slashing with a knife, everyone is used to it. Moda's sword shield hand seems to have formed a habit. He lifts the shield on the top of the machine and slashes with a knife.

Behind the puppet, the spear was sharp and screamed and pierced. The two teams cooperated to kill more and more zombies.

Even if zombies rushed, under the danger, a steel arrow behind penetrated those zombies at once and resolved the danger.

This is the three-echelon fighting method. The sword shield hand is facing the pressure in the front, the middle man is rushing to resolve some of the danger, and the steel crossbowman in the end guarantees the safety of the people in front.

Sometimes, Liu Yan had to admire Qin Tiange as a calm person, not scared by countless zombies, but orderly ordered the team to retreat while killing.

Time passed little by little, from noon to 2 pm, and finally no zombies rushed over.

On the football field, corpses were piled up in the mountains, and some undead zombies were slashed by several boys or shot by girls.

After an hour of fighting, more than 700 zombies were slashed. Except for the zombies that were burnt to death in the beginning, the rest were hacked by their own hands.

Victory in the battle, Moda and others looked slightly tired with excitement, but they seemed very calm, and took the initiative to alert them to prevent accidents.

And Liu Yan took all the girls, without telling them, have begun to clean the battlefield, dig brain crystals, and collect steel arrows.

The whole team started to have a little tacit understanding, or they were used to it, without Qin Tiange's order to order them to do it, they were already orderly and busy.

This is a good phenomenon, but Qin Tiange didn't bother, but came to a few big pits and stared at the piles of scorched black bodies in the big pits.

Roar...

In the big pit, some black corpses were still wriggling and did not die. Immediately, Yang Xiaolin led the spear team and pierced the heads of the zombies, killing them.

Even if they were immobile zombies, they were very careful to make up a shot and pierce their heads. Then they began to dig down and dig their brains, move the corpses, and prepare to continue to blame.

At seven large pits, more than 500 zombies were killed in the full foot pit, most of which were burned to death by fire, and a few that were not dead were replenished.

After the clean-up was completed, Qin Tiange set off again, attracting thousands of zombies at once, no more, no more, there might be casualties in the team, and the hunting speed could not keep up.

The sky was getting darker and darker, and everyone speeded up the hacking, again and again, and attracted five times. When the zombies were cleared for the last time, it was dark.

The speed of the crowd was very fast. All the zombies in the seven large pits were cleaned up. After digging out all the brain crystals, they were not managed.

Outside of the gap, Qin Tiange slashed the two zombies dangling with a knife, looked at the sky, and knew that he could only be here today, and the whole day's battle was considered to be over.

"Get here today and get ready to evacuate!" Listening to his words, Moda and others breathed a sigh of relief, and they are really tired today. Just look at the corpses piled up on the football field. They have slashed and killed thousands of zombies from noon to one afternoon.

After Xu said a retreat, Qin Tiange came to Liu Yan, where they piled up a large number of crystal nuclei, which were collected by them in large numbers.

A rough estimate is that at least there are more than 4,000 and close to 5,000. Sure enough, Liu Yan came up and whispered a data.

"Tian Ge, there are a total of 4,883 brain crystals here, I don't know if there are any omissions." When she spoke, she carefully looked at Qin Tian Ge. She was still aggrieved and still remembered being scolded by this man. .

Qi Qin Tiange didn't say much, put away all the brain crystals, and ordered everyone to leave first and go back to rest, while he himself came to the heritage stone stele.

“In addition to the previous harvest, I have 5,800 brain crystals in my body. This harvest was just the next day in the last days. It seems that my initial investment is right.”

I looked at the departing people, Qin Tiange thought secretly, not to mention how excited he was, but he did not show it in front of the crowd.

Thousands of brain crystals, he did not dare to think about it at the beginning of the previous life. Now, after the rebirth comes back, he has a huge advantage and has achieved great success.

He calmed his boiling thoughts, Qin Tiange calmed down and began to think about what to exchange.

He is first of all a star-quenching agent. This thing must be indispensable. Moreover, he intends to mention the strength of Moda, Liu Ye and others, because time is running out.

Moreover, he also has to improve his strength. At present, he has just increased by 50 times. Only 50 people have the strength, which is still very weak.

Exchanged the quenching agent, one ten brain crystals, and two hundred quenching agents, Qin Tiange's calm heart couldn't help but beating violently.

“Should you draw?”

Subsequently, he looked very hesitant, staring at an area on the light curtain, a mysterious area, not a redemption, but a lottery.

Qi Qin Tiange was a little hesitant and wanted to draw in his heart, but did not act. Because one hundred brain crystals are drawn at a time, and if you are unlucky, you may get garbage or even nothing.

However, if you are lucky, you may get good things, such as treasures that are more than one star, even some powerful and rare advanced abilities, etc., can be obtained from the lottery.

Unfortunately, the probability of drawing a lottery is too low. In the end, Qin Tiange temporarily abandoned this idea and felt that he would wait until the fifth day to draw a lottery.

“Wait a minute!”

After licking his lips, Qin Tiange continued to exchange, fully redeemed four white phosphorus incendiary bombs. After looking at some things, he bought a larger storage space bracelet with a bite of his teeth, with a space of 1,000 cubic meters. Others Can only give up reluctantly and turned back.

He did not continue to redeem, but accumulated, waiting for more brain crystals in the next time, and then another crazy sweep.
