

## Dark Ages 47

### Chapter 47 - Getting rich

“Ten Ge, all brain crystals are here today.”

At the market center, Liu Yan stood up with a lot of fragrant sweat, and a pair of hands covered with black blood wiped the beads of sweat slightly, while reporting to Qin Tiange the brain crystal obtained on this day.

In front of her, there are piles of brain crystals piled up, which are all today's gains. Everyone is hunting wildly. In the last day, Qin Tiange savagely let everyone wildly hunt and kill zombies to maximize the benefits.

Salamander took a breath and wiped the disgusting black \*\*\*\* mucus on her hand. She went on to say: “The specific number of brain crystals here is 13,456, and the error will not be too much.”

I heard her say, Qin Tiange nodded with satisfaction, didn't pay attention to these details, and directly collected the huge brain crystal in front of her, so happy that she could hardly find the north.

“All people are free.”

I lost a sentence, Qin Tiange left in a hurry, and returned to school. As for Liu Ye and Moda, they did not care what they did.

Looking at the back of his departure, Liu Ye could see God, he was stunned for a while, and his heart was mixed. This is the fifth day, that is, after today, they do n't have to listen to Qin Tiange. arranged.

They no longer need to help him hunt the zombies, Moda and others are also silent.

“I want to go home and see.” Moda held the steel knife, felt the \*\*\*\* armor on her body, turned directly, and walked in one direction of the town to go home.

的 Some of the students here live in small towns, and some live in nearby villages, homes, do they still have homes?

The group of students are at a loss. They hunted the zombies wildly for five days, gained strength, gained courage, and understood a lot of things that survived in the last days.

Now, the five days Qin Tiange said have passed. At this time, they thought of their home, their loved ones, one by one in their hearts, and they wanted to go back to see them.

Everyone went together in twos and threes, and went home to see. The girls were no exception. Only Liu Ye was left alone, and Long Xiaoya was beside them. The two were silent.

Because their home is not in a small town, Liu Ye is not a native, so he came here to teach. Long Xiaoya is also not a native. She is a Miao girl. After graduation, she was assigned to teach internships here.

“Oh, I want to go home and see.” Long Xiaoya looked at the sky and muttered to herself.

Tamarix is not good looking, his mood is low, and he sighs: “The world has changed. Zombies cannibalize everywhere. Even countless animals have become terrible mutants. Can we go back?”

Yes, the world has changed and the end is here. Can their loved ones survive? The hope is slim. Even if they worry no more, it is useless even if they miss home again, because the world is full of zombies.

For these people, Qin Tiange has not continued to pay attention, and five days are about to be completed. He no longer needs these people to hunt and kill zombies.

Today, it is the time when the heritage stone disappears. He has returned to the school football stadium, standing in front of the heritage stone, lowering his head and shaking his shoulders constantly.

Hehehehehe ...

On the football field, there was a steady stream of uncontrollable laughter, which made people feel terrified when they heard it, and they laughed too scary.

Qin Tiange was laughing, suppressing the extremely excited mood in his heart, still laughing unconsciously, the laughter was terrifying.

“Developed, developed!” He muttered, his mouth grinning to the sky.

He can’t help but be excited. This time the harvest is too big. After a few days of crazy hunting, the number of crystal nuclei obtained is very huge and amazing.

Great harvest, great harvest, great joy!

In short, Qin Tiange felt that he was getting rich and the plan was realized. When he was born again, within five days, he had done what others could not do, completed his initial plan, and ended perfectly.

“Hehehe ... hahahaha ...” In the end, Qin Tiange laughed wildly.

He looked at the crystal nuclei in the space bracelet, and made a horrifying laugh. The entire space bracelet was full of crystal nuclei, and there was no trace of void.

10,000, 20,000, 30,000, 40,000 or more?

In fact, the number of nucleus crystals was not carefully calculated at all, but they were roughly calculated when Liu Yan collected them, and he didn’t know how much.

But there are at least more than 50,000 one-star brain crystals. This is the huge benefit he has gained in the past five days. It would have been impossible to obtain so many people, so one hundred people killed more than 50,000 zombies?

However, he relented and exchanged a lot of white phosphorus incendiary bombs. This amazingly lethal bomb was the main reason for this huge gain.

Moreover, the traps lead to killing monsters, and the team’s overall cooperation with hunting is the most direct factor for him to kill tens of thousands of zombies in just five days.

“Brother is rich, buy buy buy, I want to shop crazy ...” After forcing himself to calm down, Qin Tiange began a crazy sweep.

I have money, so I naturally want to buy good things. Although only a temporary heritage stele is in front of it, the highest thing is one star, but he can't hold many valuable things he knows.

For example, at present, Qin Tiange is staring at a redemption item. The one-star hardening medicine is listed above. Other medicines, such as the medicine to restore skin trauma, are available, but there is no medicine to restore the internal injury. It is a more advanced medicine. .

Nowadays, there are more than 50,000 brain crystals on his body. How many Qin Tiange can buy one-star quenching medicine? Only five thousand, only five thousand.

“Five thousand, it seems that I'm still very poor.” Qin Tiange froze for a while, unacceptable.

He is still a poor ghost can only buy 5,000 pieces of one-star quenching potion, which is a bit tragedy.

The original excitement was gone, and some were just the complicated and entangled mood now, thinking that he was a rich man. As a result, he was beaten to heaven, let alone a complicated mood.

Qin Tiange frowned slightly and murmured, “Can it be difficult, we can only buy these potions, and we cannot make them ourselves?”

He thought back to the previous life, it seemed that those powerful forces had all sold such one-star quenched body medicine, and even more advanced medicine, such as two-star pill washing medicine. “

For these things, in the previous life, the one-star hardening medicine on the market was twenty brain crystals. Many people thought that it was a big force and then sold it, but at this moment Qin Tiange suddenly realized that something was wrong.

He quickly searched, looking for the answer in the various exchange information of inheriting the stele.

It's a pity, after searching for a long time, I still can't find any medicine making method, even the one-star weapon armor manufacturing technology is not available, it can only be exchanged.

tragedy!

Qi Qin Tiange was very uncomfortable. The brain crystal he obtained was only enough to buy five thousand one-star hardening medicaments. It was gone at once, and the one-star weapon armor was even worse. He could not buy many sets, at most five hundred.

“Wo Ri, can I only buy two thousand one-star potions and two hundred sets of one-star armor weapons?” Qin Tiange was extremely reconciled.

I lived for five days and got the huge number of crystal nuclei I wanted, but in the end I found that I was still a dead poor, but I could n't buy more if I wanted to buy more.

“Maybe, only that mysterious draw can surprise me ...”

Quickly, Qin Tiange thoughtfully looked at a corner on the light screen of the inheritance stone monument, which was a lottery area, a mysterious lottery.
