

Dark Ages 48

Chapter 48 - Mystery Draw

With more than 50,000 crystal nuclei, it is not cost-effective to buy one-star quenching agent, and it is also not cost-effective to buy one-star weapon armor. The number is too small.

Moreover, these things currently do not help him to improve his strength. One star quench body medicine, unless it is an enhanced version of the medicine, even a more powerful medicine can have effect.

“Buy other stuff first ...” Qin Tiange looked at the lottery area and finally decided to buy some other useful stuff first.

For example, a white phosphorus incendiary bomb and a one-star plasma bomb, this thing is very expensive. The price of one hundred brain crystals is too expensive.

Gritting his teeth, Qin Tiange finally bought twenty white phosphorus incendiary bombs, one with four hundred crystal nuclei, and twenty or eight thousand crystal nuclei disappeared.

Then came plasma bombs. He bought fifteen fiercely, cost 7,500 brain crystals, and 15,500 crystal nuclei were missing at once, which really made his heart bleed.

“One-star wide-blade knife: sharp, iron-cut, such as mud, the exchange price is one hundred crystal nuclei, one-star armor, two hundred crystal nuclei ...” Qin Tiange cursed, heartily bought ten one-star wide blades The sword, ten sets of one-star protective armor, cost another three thousand.

Electromagnetic pulse sniper rifle: one star, equipped with one hundred power generation plasma bullets, exchanged for two thousand crystal cores, one plasma bullet and one crystal core.

Seeing this, Qin Tiange scolded a black shop, but had to buy an electromagnetic pulse sniper rifle. In addition to the one hundred power generation slurry bullets, he also purchased five hundred power generation slurry bullets, which was 2,500 crystals. The nuclear disappeared again.

Heartache, very heartache!

Qi Qin Tiange cursed secretly: “Wait for me to get these technologies and see if I can exchange your money?”

He has a fire in his heart. This weapon is very powerful and good, but the exchange price is too expensive. Most people can't afford these things, let alone advanced things are more expensive.

Qi Qin Tiange's blood dripped into his heart, and he secretly vowed to get these high-tech technologies, so that he would not have to purchase weapons and equipment at such a huge cost.

This exchange method, even if you kill all the zombies and mutants around the world, you will not necessarily be able to exchange for more advanced and powerful weapons and equipment.

The only way is to buy the building technology. Only science and technology are the primary productive forces of mankind. With these technologies and technologies, we can become the basis for human survival in the last days.

Then he exchanged some medicines, such as trauma repair medicine, a three hundred crystal nucleus, a bone fracture repair medicament, and a five hundred crystal nucleus.

Zong Linlin always exchanged it, and even spent him more than 20,000 crystal nuclei, all of a sudden went to half of the harvest, it is false that it is not distressed.

The remaining thirty thousand crystal nuclei, Qin Tiange took a look. There was no exchange for the time being, and he immediately turned his eyes to that mysterious area.

Lottery, he heard people say it in the previous life, but never tried it, because the legacy stone tablets of the previous life were occupied by the great forces, even if you want to buy things are things that the great forces put on the market.

Don't talk about redemption and lottery, even if it is close to the heritage stele, once you break into it, it will be the end of the killing.

This life is different. After rebirth, Qin Tiange has a huge advantage that others don't have. For example, he now occupies this temporary heritage stone by himself.

The twenty-five days of frantic squeezing out the value of the group of students and gaining huge gains for him, now it is time for him to splurge.

In the lottery area, there is a large turntable, square, with ten mysterious black boxes, these boxes are used for lottery.

Qin Tiange found that in each round of the lottery, the first lottery was one hundred crystal nuclei, the second two hundred, the third one thousand, and so on.

“Black, too dark!” Qin Tiange could not help cursing, the mysterious lottery was even darker.

The first lottery, one tenth chance, nothing is clear, it may be an empty box. And there are ten boxes on the big roulette. I do n't know if there is anything in it. This is the mysterious lottery.

This thing is playing heartbeat and unknown, mysterious lottery is drawing unknown things. Ten boxes, you can draw once, and then enter the next round of draw, there will be ten new boxes in the next round.

If you want to open these ten boxes, it's OK, but the price of the ten lottery is doubled up, and the tenth time is 10,000 crystal nuclei.

“Draw, I don't believe I have bad luck, what better luck than rebirth?” Qin Tiange gritted his teeth and immediately decided to draw.

Since some people in the previous life reported that many advanced things were drawn, there must be good things in them. The lottery draws luck, but what could be more fortunate than his rebirth?

“Start!”

Qi Qin Tiange's face was calm, and he directly reached out and pressed it. The one-hundred crystal nucleus started the first lottery. Instantly, the big roulette wheel slowly turned, and the speed became faster and faster.

“Stop ...” shouted, the spinning square roulette stopped abruptly, and a red frame was fixed on a black box.

Suddenly, the box opened, Qin Tiange looked nervous, and looked at the opened box with a stunned heart, something appeared in it, making him jump.

“Shit!” Qin Tiange was ecstatic, but the smile was stiff there the next moment, because the contents of the box turned out to be a one-star quench body medicine.

What kind of mood is it that the medicine of ten crystal nuclei cost one hundred crystal nuclei to obtain?

“Black quotient, black quotient!” Qin Tiange growled, almost unable to suppress the anger in his heart.

However, I still fetched things honestly, looking at the remaining nine black boxes, gritted my teeth and continued to launch a lottery. Two hundred crystal nuclei were gone

The second lottery, one of nine, no I know what’s in it, maybe nothing?

Ding!

The roulette stopped, the box slowly opened, and the inside was empty, making Qin Tiange’s face dark like the bottom of a pot.

“It’s dark enough, I won’t believe it!”

Qin Tiange turned his face and did not start the third lottery, but entered the next round of the lottery, watching the roulette wheel full of expectations.

He glared at the ten new black boxes that appeared, waiting inwardly, he really didn’t believe that his luck as a rebirth would be so bad?

Ding...

“empty...”

“A bottle of insect repellent ...”

“Still empty ...”

Xuan changed the lottery six times in a row. Except for getting a bottle of insect repellent, everything was empty. As a result, Qin Tiange wanted to cry without tears, and there was an urge to smash this heritage stone stele.

Unfortunately, he couldn’t do it. He could only confess that he was unlucky with heartache. He took seven times to get only a one-star quencher potion. How many crystal nuclei have spent?

“I don’t believe this time is still empty. Am I bad luck?” Qin Tiange looked somber and stared at the ten new boxes that appeared.

These ten boxes require one hundred for the first extraction. If there is nothing in it, then he is really tragedy. Nothing can be obtained. It can take 10,000 crystal nuclei to open all of them.

“On!”

With a roar of gnashing his teeth, Qin Tiange opened the first lottery of this round. Ten boxes quickly turned, and as the red box slowly stopped, it was fixed on one of the black boxes.

“Yes, be sure to hit!”

Qi Qin Tiange looked tense, pinched his fist, and looked at the slowly opening black box full of hope and anticipation, revealing the inside.
