

## Dark Ages 49

Chapter 49 - 10 Star Pharmacist Legacy

Click!

The black box opened, revealing the inside. Inside the box, a transparent crystal was lying quietly, emitting a hazy light.

“This is it?” Qin Tiange was a joy first, then a moment later, he picked up the crystal, looked more and more shocked, and finally fell into ecstasy.

He recognized the origin of this thing. He had seen it in his memory of previous lives. At that time, someone put it up for auction, which spurred all major forces in China.

This thing has a name called Heritage Crystal!

Yes, it is the inheritance crystal, which contains some kind of inheritance knowledge, it may be some knowledge, maybe some powerful and advanced skills inheritance, or even some powerful methods.

Now, seeing this crystal, Qin Tiange can't help being excited. This is an inheritance crystal. It has inheritance knowledge, so no matter what it is, it is a huge gain.

The inheritance crystal allows people to easily acquire the knowledge inside, just like a thing that instills knowledge. As long as you hold the first drop of blood from the inheritance crystal, and then face the position of your eyebrow, you can absorb the stored knowledge inside.

“Great, is it an inheritance crystal?” Qin Tiange looked red, staring at the inheritance crystal on his palm, feeling his heart pounding.

This is a good thing. He didn't even hesitate to drop the blood directly. After seeing that drop of blood was quickly absorbed by the crystal, he resisted the excitement of holding the crystal with his hands against the position of his eyebrow and began to accept the heritage.

Suddenly, a torrent of torrents sprang up from the inside of the heritage crystal, rushing like a sea, and rushing into the head of Qin Tiange.

“Ah ...” The flood of information came too suddenly, causing Qin Tiange to be too late to react, his head banged, and he screamed, and fell to the ground.

There is pain, endless pain, and the transmission of information requires strong will to avoid harm. Most people are not steadfast in will, and even those with weak consciousness will be shocked into fools when they contact these torrents of inheritance.

Fortunately, Qin Tiange was born again. The eight-star powerhouse in the previous life has worked hard for fifteen years in the last days. His willpower has long been firm as steel. Although he was caught by surprise, he quickly responded.

Gritted his teeth and insisted that the torrent of information in the inheritance crystal seemed a little big, beyond his imagination, and it took ten minutes to inculcate to complete this inheritance.

Purr ... purr!

Qi Qin Tiange was pale, lying on the ground and breathing heavily, and the whole person was wet with sweat. Recalling what happened to Fang Cai, he couldn't help fighting a cold war, it was too sudden.

Inheritance of information, he has never experienced it, there was no such opportunity in previous lives, and now it's almost a bad thing when he comes into contact with it. Fortunately, he carried it over.

After a long while, the pain in his head diminished, Qin Tiange slowly got up, shook his drowsy head, shook his head unconsciously with a grin, and felt that he was a little bit too excited and over-excited.

"Let me see, what exactly is stored in this inherited crystal?" With curiosity, Qin Tiange thought about it and carefully thought about the myriad of knowledge that suddenly came out of his head.

That was a huge and shocking knowledge, and it was so stuffed into his head that it became his thing.

Soon, Qin Tiange understands what has been passed down this time. It is a shocking thing. It is an extremely precious inheritance of knowledge.

"This is a pharmacist inheritance crystal?" Qin Tiange shocked, then exulted.

He looked at the knowledge he had obtained and found that it was a pharmacist's inheritance crystal, which contained many knowledge about pharmacist's inheritance of making pharmacist, distinguishing medicinal materials, configuring pharmacy, and so on.

This is a complete pharmacist heritage, and he was shocked and ecstatic to discover that in this heritage there is knowledge of pharmaceuticals from one to ten stars, various types of pharmaceutical preparation methods, refining methods and so on.

Priceless!

"Developed ..." This is Qin Tiange's first thought. He is developed and truly developed. How precious and powerful is the ten-star pharmacist's inheritance crystal this time?

Let's put it this way, now that he has acquired the ten-star pharmacist inheritance, as long as Qin Tiange eats the knowledge in the inheritance into his own things in the future, he is a living ten-star pharmacist.

Ten Star Pharmacist, you can make all kinds of medicines with one star to ten stars. As long as there are materials and medicinal materials, you can formulate the desired medicine.

This is the most precious. Think of the one-star quenching agent, the exchange price is ten brain crystals, and according to the inherited knowledge of Qin Tiange, the cost of making this medicine is only one brain crystal.

"Value, too value!" Qin Tiange almost jumped up with excitement, and finally calmed down his inner excitement and calmed down.

He knew that from then on, there was no need to exchange medicine. Because as long as he absorbs the inherited information and knowledge of this pharmacist, he can prepare all kinds of medicines he wants.

Not only can you use it yourself, your forces can use it, and you can even release it for sale. This is an excellent opportunity to make a fortune.

The puppet pharmacist is definitely a rich man. In previous lives, Qin Tiange has heard that some major forces have the profession of pharmacists, but they are strictly controlled and cannot come out at all.

Now, with the ten-star pharmacist heritage, Qin Tiange can say that he is also a powerful pharmacist in the future. com true pharmacist.

“Hey, continue ...” licked his lips, Qin Tiange laughed and continued to draw.

I won a ten-star pharmacist’s heritage. The previous waste and waste are completely worthless, and I will continue to the next lottery.

He started to believe that there are good things in the lottery area, and indeed there are good things. The ten-star inheritance crystal can be drawn out. What else can’t be done?

Ding!

It’s a pity that in the next lottery, nine times out of ten were empty, or a normal steel knife or armor was won.

Every time I draw a lottery, Qin Tiange can’t help convulsing, looking at the fruit knife just drawn, it is really a fruit knife.

“Did you make a mistake?” Raising the fruit knife, Qin Tiange twitched his face, cursing, “What is the use of this thing to kill the zombies?”

Lost it at will, Qin Tiange was fierce and continued the next draw. He was like a gambler, betting with red eyes, he didn’t know to stop, he just wanted to get something better.

I am not satisfied to get a ten-star pharmacist’s inheritance crystal. Perhaps this is the greed of human beings. Qin Tiange, the rebirth, cannot be exempted from the rule.

Sad, sad!

He was ruthless this time. He opened four black boxes in a row and spent more than two thousand crystal nuclei. The first three were empty when the fourth black box was opened.

“bingo!”

The next moment, Qin Tiange screamed a surprise, looking at the slowly opening black box, something was revealed inside, and he was hit again.

What it is?

With curiosity and excitement, Qin Tiange took up the thing, it looked like a piece of parchment, it was very old, and it was a little broken. He was really afraid of being an ordinary junk product. .
