

## Dark Ages 491

Chapter 491 - Kill after death

boom!

A wave of tumbling rolled over the crowd within a kilometer, but fortunately one of them was controlled by Qin Tiange and no one died.

Many people were injured by the quake. The crowd around them was crooked and stunned, looking at the four figures in the middle of the air wave in astonishment.

Qin Tiange turned back and punched at the moment when Dong Li attacked him, containing the strength of 100,000 people, sending the opponent out.

Click ...

The ground was cracked, the rumbling sag went down, and in the position of the three of Qin Tiange, a cement slab within two meters around it formed a huge pit of several meters, except that the place where he stood was not broken.

Long Xiaoqian and Xun Xi were stunned, watching the sudden change suddenly, some were caught off guard, did not expect Dongli to attack Qin Tiange.

But unexpectedly, it was Dongli himself who was beaten to fly. He stood up in horror and looked at Qin Tiange with horror.

“You ...” Dong Li opened his mouth to say something.

As a result, Qin Tiange greeted a cold sentence: “I don’t want to say it again, the human world doesn’t welcome you, get out.”

A rolling character contains an invisible force. The shock from the soul’s will broke into the sea of consciousness from the east directly, shocking him to look pale and back again and again.

“Okay, okay, you waited for me, and you dare to blaspheme my holy sage ...” Dong Li said, suddenly realizing what was being said.

He looked gloomy, staring at Qin Tiange, then turned his eyes, looking at the sadness of disappointment.

“Miss, there is nothing good for human beings, you still follow me.” Dong Li finally said this sentence.

As a result, Xi Xi shook her head, turned her face away, and said nothing, this is the best answer. She also had a great affection for this Dongli, and always felt a kind of blood in her veins, as if she had been separated for many years.

It is a pity that all his performances completely shattered the good feeling in Xi Xi’s heart.

“It’s all you, I must make you regret it.”

Seeing that Xi Xi ignored him, Dong Li was furious, and attributed everything to Qin Tiange. After dropping this ruthless word, Dong Li flickered, flew out of the base, and disappeared.

Watching him leave, Qin Tiange's eyes flickered, his expression was weird, and he quietly said, "Let's go, let's go back first."

As he turned around, Long Xiaoqian and Xun Xi's little hands, walking toward the base of the mountain, where Long Xiaoqian's residence was.

Long Xiaoqian and Xun Xi were held by Qin Tiange's small hands. Both of them were dazed and shy, and they didn't notice Qin Tiange's abnormalities and changes at all.

He had a weird expression, looked at the two beauties he was holding, and the unclear person thought what he was thinking.

The clear person can hear "He" at the moment: "My son is really, even let me play him?"

...

Outside the base, Dong Li flew out with resentment and unwillingness. He stopped in the void and stared at the base, faintly seeing Qin Tiange holding Long Xiaoqian and Xun Xi's hands.

Long Xiaoqian didn't take it seriously. Only Xi Xi was his most important thing. Unfortunately, it was taken away by Qin Tiange.

"Damn humans, you wait, I let you die without burial." Dong Li said with a gloomy face.

"Unfortunately, you don't have this chance ..." But, the next moment, the words uploaded from the sky made him look wild.

"Who?" Dong Li shouted, looked up, and suddenly looked suspicious.

I saw a figure walking down the void, covered with the hazy aura of aura, stepping on Xiangyun step by step.

The person who came was Qin Tiange. He was here. Who was that person in that base?

"Is that you?" Dong Li looked like a ghost, then turned his head to look, and in the base, he could still see that "Qin Tiange" was walking up the mountain with the hands of two beautiful women.

Looking over there and looking in front, Dong Li looked stunned, "It turns out that this is fake, is this your true body?"

Qin Tiange was expressionless and looked eastward up and down, not to mention that he was really surprised. He never thought that the demon emperor who created the Semi-Demon Alliance in the previous life turned out to be a race from outer space.

"No matter what race or origin you are, you don't want to leave alive today, completely eliminating your future troubles." Qin Tiange said gently, the whole person lost track.

boom!

When the void exploded, two large and one small people collided violently, the clouds burst, and the trees in the mountain forest were broken and rolled up.

Qin Tiange took it easy, striding forward, stepping on the void, a cloud of clouds set off a sacred meaning.

On the other hand, Dongli, who looked like a minor young lady, was not inferior to him in strength, which made Qin Tiange sure that the other party was not a native creature of the earth.

“Take my sister, kill!”

Dongli was screaming in anger, and a whole bunch of terrible demon powers were raised. His fists waved a punch, and the air was squeezed into a vacuum by the fist wind.

Qin Tiange snorted, and the halberd slammed it. The boundless spirit of domineering forceful, as if a supreme overlord appeared in front of him.

Uh ...

Suddenly, after hundreds of strokes, Dongli's double fists could resist the spear of Euphorbia. I had to say that Qin Tiange was very surprised. A closer look revealed that he was wearing a pair of transparent gloves on top of each other's double fists.

It was this pair of gloves that blocked the edge of Euphorbia, but Dong Li was shocked by Qin Tiange's erupting terrorist forces.

“Damn, how could there be someone like you in humans?” Dong Li was furious, not convinced that Qin Tiange had such a pervert.

With six stars, there are 100,000 people, which is incredible. What's even more incredible is that the opponent's body does not seem to be broken, although he is sometimes injured, he can recover in a blink of an eye.

“Nothing is impossible. You sit in a well and watch the sky. You are arrogant and arrogant. Do you think our people have no masters?” Qin Tiange retorted in disdain.

With a bang, the halberd smashed fiercely, setting off a surging cloud of air, rolling the boundless auspicious auspiciousness and the power of the earth in front of Dongli.

With only a bang, Dong Li was beaten into the sky, and the whole planted into a mountain peak, but saw Qin Tiange sneer, and Euphorbia sent out an endless sharp edge.

“King of heaven!”

With a low drink, accompanied by a virtual shadow holding a halberd, the loud noise came, and Dashan was directly blasted.

The sky was filled with countless gravels and flew through the air. A wolf howling rushed out and floated in the air, looking dull and sullen.

“Asshole, I want you to die!” Dongli growled as if going crazy.

He was obviously irritated, but there was no way he could get angry. Although he was a nine-star heavenly powerhouse, Qin Tiange still had the confidence to kill him.

“A arrogant alien race, do you think humans are bullying?”

With a violent drink, saw the sky blast the next energy, and the halberd swallowed sharply, straightly taking the Tianling cover from the east.

Euphoria is extremely fast, even if it is too late to dodge from the east, the whole thing is pressed into the ground, and the billowing air raises the soil, making a continuous rumbling sound.

“Imperial Wrath!”

Suddenly, there was a cold drink from the ground, accompanied by the sound of 铿锵, a sword groan shocked the wild, and then everything calmed down.

With a click, the ground cracked a huge ditch, and it was chopped out by the blade to reveal the scene inside.

“Don’t be complacent ... this is just a clone of me. It’s bad for me and messes with my plans. You have to die.”

In the gully, Dong Li grabbed the halberd with one hand and the ancient sword with one hand, but was still pierced by the ancient sword, and the power of life was extinguishing.

Dong Li’s words made Qin Tiange somewhat surprised. This guy turned out to be a clone, which was a bit difficult.

Qin Tiange carefully sensed, did not see anything, and finally he simply shook the ancient sword, and a strong suction directly devoured Dongli’s soul remnant thought.

“Dash, dare to devour my spiritual body, human, I remember you, true spirit, blast it to me ...” The moment Dong Li was sucked away by the soul, he growled and roared out such a sentence.

Soon, his last thoughts were swallowed up by the ancient sword. Gradually, a majestic memory and soul energy came from the ancient sword and poured into Qin Tiange’s sea of consciousness.

He slowly absorbed and sorted out this incomplete consciousness memory, and because Dongli erupted this memory in the end, it caused some incompleteness.

However, these memory fragments still gave Qin Tiange a lot of secrets and learned the origin of Dongli.

“Semi-demon? A half-breed that was born of a marriage between humans and hundreds of people?” Qin Tiange was stunned and couldn’t help being stupid when he saw this message.

Half-demons are extremely unpopular among the Hundreds of Stars. They are races born after the fusion of humans and other Hundreds of races. They have always been disgusted by the Hundreds of races.

The half-demon is extremely resentful to humans, because the human race is too inclusive, and all major races in the starry sky have been intermingled with human beings, creating a new race, not a

human race, let alone other hundred races, but with various ethnic bloodlines The soul, not accepted by the hundreds, claims to be a demon.

“No wonder he has a human flavor. It turned out to be a mixed race of humans and hundreds of people.” Qin Tiange was extremely speechless.

Isn't mixed blood to be seen? In other words, should the mixed race hate their own race? Qin Tiange has no feelings at all about Dongli, a half-demon who has a strong resentment against humans.

Originally he was still thinking about how to control the semi-demon alliance of previous lives, but now it seems that this guy is a semi-demon from outer space, and finally decided to kill him to prevent future troubles.

Qin Tiange thought for a while, why Dongli cares so much about Xi Xi. Is Xi Xi also a mixed race of human beings and hundreds of people?

“It really is a clone, but unfortunately this boy has exploded his memory, otherwise it should be possible to find out how he came to the earth, unfortunately.” Qin Tiange looked at the broken memory, and could not help feeling sorry.

Although it is determined that the other party is really a clone, it is impossible to obtain how Dongli came to earth. This matter is very important. Qin Tiange wants to know clearly.

Whether it is the former young silver star strong man or the Dongli who was just killed, they all came from outside the sky. How to get there is a mystery.

“Well ... this guy is richer than that youngster of the Silver Star family.” Qin Tiange fetched a space ring and was surprised to find that Dongli was even richer than that of the Silver Star family.

A chaotic flame burned Dong Li's corpse into ashes, Qin Tiange then vacated to leave, quietly returned to the base, and merged into the figure holding the small hands of Long Xiaoqian and Xi Xi.

Chapter 492 - Bad guy, i bite you

When Qin Tiange came back, Tian Yao turned into his face and quietly merged into the arm tattoo, disappeared, as if Qin Tiange never left.

In fact, this was to avoid that Xi Xi saw him slaughter Dongli. Qin Tiange was very cautious and did not want to leave a bad impression on Xi Xi.

The two were still confused, Qin Tiange was holding his small hand, his heart was beating, his cheeks were flushed, and his head was shy.

“Uh ...” As soon as he came back, holding Xiao Xiaoqian's little hand before covering the heat, he suddenly felt a sting from his fingers, and looked down suddenly.

“Bad guy, don't touch my mother.” An immature voice came out, milky and angry, looking angry.

I saw that Qin Tiange's hand holding Long Xiaoya was being bitten by a little girl who was three inches tall and exquisitely delicate.

Her little face was full of anger, and she scolded while biting: "Bad guy, let go of my mother, I will kill you, kill you ..."

Xiao Yiyi bit Qin Tiange's little finger, and a sharp tingling came. Then the whole arm was purple and green, exuding black gas and poisoning.

"I'm going ..." Qin Tiange's forehead was bruised and startled.

Long Xiaoqian in the confusion was awakened when he heard Xiao Yiyi's scream, only to find that Xiao Yiyi had actually bitten Qin Tiange, and the entire arm was black, apparently poisoning.

Seeing here, even Long Xiaoqian was scared and exclaimed: "Xiao Yiyi, what are you doing? Let go ..."

Xiao Yiyi reluctantly released her mouth and flew up, grinning at Qin Tiange: "Bad guy, don't touch my mother, otherwise Yi Yi bite you."

Qin Tiange's face was as dark as the bottom of the pot, and he vomited in his heart. Haven't you bitten? Moreover, the little guy was covered with poison, and a bite turned him into poison.

This is simply incredible. Think about it, Qin Tiange has an immortal body, and the strength of his body cannot be judged by common sense. Steel is not as strong as his physical body.

Such a strong physical body is still bitten by Xiao Yi, and even directly poisoned, that is, the self-recovery of the undead body is too late to expel these toxins.

"Brother, what's the matter with your hand, this is the antidote, take it quickly ..."  
Long Xiaoqian looked pale, watching Qin Tiange's left arm turned black, and suddenly hesitantly took out to understand the poison, this is It is specially configured to solve the poisonous medicine on Xiao Yi Yi.

Qin Tiange did not refuse to take the antidote. Although he could easily eliminate the toxins on his arm, he did not refuse Long Xiaoqian's antidote.

It's just that he's speechless, how can he bit him? Just now Tian Tian didn't play his role all the time, holding the hands of Long Xiaoqian and Yun Xi, but I didn't see her react like this.

As for why holding the two hands, it was actually Qin Tiange who wanted to distract the two. One was to stimulate the Dongli, find an opportunity to change Tianyi into his appearance, and then catch up to kill Dongli himself.

I didn't expect to be bitten by Xiao Yi as soon as I changed back, which made Qin Tiange cried and laughed, and sighed that it was really bad luck.

"Xiao Yiyi, how do you bite someone?" Long Xiaoqian looked a little angry, making Xiao Yiyi look down and do something wrong.

She pursed her mouth, her face full of grievances: "Mom, I'm driving bad guys, he bullies mom, I will bite him ..."

Talking about her fist, she looked at Qin Tiange like a demonstration, and the expression seemed to say that if you dare to slam my mother, I will continue to bite you.

Wu Xi awoke from ignorance and looked at the scene stupidly. There was a weird feeling in her heart, and she suddenly woke up. Qin Tiange's breath just seemed to be different.

This point, she only reacted now. She was suddenly holding hands for a while, but she didn't notice it. Looking back now, it seems a little different.

"Very strong toxicity, this little guy is indeed a monster." Qin Tiange sighed in his heart, a little surprised.

He looked at the little elf. It was indeed a demon demon. He was full of poison, and the poison was very strong. Once she grew up, it was extremely scary.

Long Xiao Qian'e frowned slightly, and said in harmony: "Yi, how many times have I told you, Brother is not a bad person."

"He's a bad guy ..." Xiao Yiyi pursed her lips, and then pierced back into the sachet.

Seeing this, Qin Tiange couldn't help crying and said helplessly, "Xiao Qian, your daughter seems to have a great opinion of me."

It's more than just opinions. It's just that when Qin Tiange touches Long Xiaoqian, he immediately becomes furious, and bites him directly just as he did just now.

Long Xiaoqian is also very embarrassed. Xiao Yiyi is also very embarrassed by Qin Tiange. She has been educated many times, but it still has no effect.

Yun Xi couldn't help laughing, and there was still a shy Yunxia on Qiao's face. Thinking that Qin Tiange had held her little hand just now, Fang Xin couldn't help jumping.

"By the way, what happened to the person who was injured by Dongli, have you saved it?" Qin Tiange suddenly remembered the middle-aged man who was injured by Dongli.

At this time, Xi Xi raised his head and said, "I've helped him recover from that uncle's injury. There is no problem at all, Brother Qin need not worry."

"That's fine." Qin Tiange bowed his head and understood.

However, Long Xiaoqian said with a gloomy face: "That Dongli is really, I didn't expect him to be such a person, but there was no one in his eyes."

"Sister Long, forget it, don't mention him." Xu Xi felt a little lost, always feeling upset and didn't want to mention him.

Qin Tiange saw her face look lost, and patted her shoulders to comfort him: "Don't take it to heart, that guy is not our kind. He comes from outside the sky and is a starry race."

“From heaven? Brother, is there really an alien race? Dongli is really an alien?” Long Xiaoqian looked a little unsightly.

She felt unbelievable, but had a sense that she deserved, thinking that the end was coming, what was strange about the appearance of aliens?

It was just her instinct that she didn’t want to believe it. For these, Qin Tiange simply explained something he knew.

“Okay, I was just passing by today. Let’s take a look at the progress of your two strengths by the way. I didn’t expect to encounter this.” Qin Tiange said with a smile.

In fact, he also felt strange in his heart. Coming here was just a natural reaction to his heart. He wanted to see the progress of the strengths of Long Xiaoqian and Xun Xi, but he came across the former demon emperor.

What surprised him even more was that Dongli was actually an alien race, a half demon from the sky, a mixed race of human races and hundreds of races, and extremely hated humanity.

However, it was a pity that Qin Tiange was killed. It was just a clone. The subject of Dongli didn’t know where it was. This point must be watched.

There is a nine-star power in one clone, and its subject must be extremely terrible. It may even be a king, an emperor, or even an emperor.

“Brother, can you take us away this time?”

At the top of the mountain, Long Xiaoqian hesitated for a long time, and finally got up the courage to say this. She looked at Qin Tiange full of anticipation and hoped to leave with Qin Tiange.

Even Xi Xi is eager, in fact, she wants to follow Qin Tiange more, as for the others, she doesn’t think much.

Looking at the look of the two, Qin Tiange was lost in thought, while Xiao Yi in Long Xiaoqian’s satchel suddenly reached out his small head and stared at him angrily.

“You bad guy, it’s abominable to want to come and run my mother again.” Xiao Yiyi’s immature words woke Qin Tiange in thought.

The corners of his mouth twitched, his teeth tickled, and he hummed, “Little boy, what if I just want to kidnap your mother?”

“You have the ability to bite me!”

Speaking, Qin Tiange stretched out a finger and sent it to Xiao Yi Yi with a smile on her face, let her bite.

“I bite ... ah ...” The little guy didn’t hesitate, opened his mouth to bite, and clicked, and then she screamed.

Xiaoyi covered her little mouth, her eyes were pitiful, her tears rolled, and she cried, “Mom, I have a toothache ...”

...

The three of them looked at each other silently. Looking at this crying little Yiyi, even Long Xiaoqian couldn't help crying.

Qin Tiange chuckled, raised his palm, and smiled, “The gloves are good. I like it. See if you dare to bite me in the future?”

“Bad guy, bad guy, I ignore you.” Xiao Yiyi took the crying cavity, and got into the sachet and hid.

Qin Tiange smiled and didn't care, this little guy just gained sympathy, in fact, he didn't cry at all, and his tears were pretended. He knew this with keen perception.

Moreover, even if she couldn't bite the fist that Dong Li got from her body, her teeth wouldn't hurt, because this little guy's teeth are very hard, and the steel is as crisp as eating a cookie, and the undead can bite.

“Brother, don't bully Xiao Yi, she is still young.” Long Xiaoqian was helpless and had to tell Qin Tiange.

Qin Tiange nodded with a smile and said, “Okay, I won't bully her, but don't open your mouth to be a bad person. Do I really look like a bad person?”

“You are, bad guy!”

Xiao Yiyi suddenly poked out her little head, spit out her tongue after saying a word, and then retracted back like lightning, making people laugh and cry.

Regarding this Qin Tiange didn't care, he looked seriously and thought and said, “Since the two of you want to leave here, then I will take you away.”

“Really? Thank you, Brother ...” Long Xiaoqian was surprised and couldn't believe it.

In fact, she thought Qin Tiange would refuse, but did not expect to agree, even if Xi Xi looked at him with some surprise.

“It's okay, clean up, and we'll leave.” Qin Tiange smiled and stood here waiting.

As for Long Xiaoqian and Xun Xi, they went back to the house excitedly to pack and prepare to follow him away from here.

The most unhappy of them belonged to Xiao Yiyi. The opinion of Qin Tiange was quite big, as if he were an enemy, and there was no good talk.

However, who made her the cheap daughter of Long Xiaoqian, Qin Tiange didn't care, because she tossed well, anyway, calling a few bad people did not hurt.

In this way, Qin Tiange took Long Xiaoqian and Xun Xi, bid farewell to Elder Wu and other people in the Miao Xinjiang Mile City, and left here to go to the Shenzhen city base.

## Chapter 493 - Skyeye 1, Quantum Project

The Shenzhen city base is developing rapidly. The huge base of millions of people, various new technology equipment and products are changing with each passing day, which is eye-opening.

After the flood, the major rescue corps in the base rescued the search survivors day and night, and the entire base's population soared to more than 5 million.

Looks like a lot. In fact, this population is less than half of the Shenzhen market before the end of the day, but compared to other survivor bases, this place is already top.

The most amazing thing is the development speed of the base. Inside and outside the city, neatly planned residential areas have been completed, and the overall planning of the base has been completely completed.

With more than 5 million people living, it still looks a bit empty. This is the grand plan of the overall base, which can accommodate at least 10 million people.

In the center of this base is a huge suspended platform, floating high there, extremely eye-catching, attracting the eyes of countless survivors.

Many people were surprised, curious, and more speculative about the strength of this base. No one dared to make trouble in the city.

Since the base was opened and passed on to the stele, countless survivors got a lot of opportunities to improve and strengthen, which led to the endless stream of base masters.

However, there is no strong man who has evolved and dares to arrogantly in the base, because there have been foreign masters, five-star, six-star, and even recently the seven-star strong who came to make trouble and was taken away on the spot , Never return.

“I don't know when we can buy a suspended tank?”

On the street, many people looked up and looked at the floating chariots overhead, full of envy.

In fact, these suspension tanks have been eliminated by the base. A type of tank sold as a commodity is the first generation of suspension tanks produced by the base.

Said that it is a chariot, it is actually a suspended armored vehicle, with a very strong defense force, which basically can withstand powerful energy bombing below three stars.

Of course, these suspended chariots sold are also classified, the highest one sold for an astonishing 1200 stars.

You're right, it's a one hundred and twenty-two star crystal nucleus, which can carry fifty people, and its defense is very strong. The ordinary six-star master can't break the defense.

“Brother, is this your base?”

Walking on the street, Long Xiaoqian and Xun Xi were shocked by the huge base in front of them. It was completely unexpected that Qin Tiange had founded this base.

Looking at the various floating combat vehicles flying overhead, most of them were purchased privately, and they followed the prescribed civil air routes.

As for the central arterial road, it is a team of more advanced and powerful levitating combat vehicles equipped with the newly developed electromagnetic light guns and even small electromagnetic light guns.

This is a new weapon developed based on the modification of large electromagnetic guns, which is equipped in the base's major defensive corps as a patrol defense reserve.

Looking at the huge changes in the base, Qin Tiange was full of a sense of accomplishment. Of course, these credits are the result of the hard work of scientific and technological personnel and personnel at all levels of the base.

“You will live in this base in the future, but you must improve your strength as soon as possible, and often go out and practice yourself.” Qin Tiange took two of them to the parking apron below the passage of the military suspension tank.

“General!”

In front, the two soldiers saluted neatly and opened the door of a super-levitation chariot. After Qin Tiange took Long Xiaoqian and Xun Xi up, he opened the door directly.

The chariot was not fast, and slowly flew towards the central floating platform, stopped on it, and saw the high-level personnel of the base waiting neatly here.

“Mr. Wu, and everyone is working hard.”

Qin Tiange stepped out of the car, stepped forward and saluting solemnly, followed by Long Xiaoqian and Xun Xi, who were somewhat restrained. Looking at the front row of high-ranking bases, it was inevitable that there was some pressure.

In addition, Qin Tiange has independently replaced his upright military uniform on the chariot. It looks even more valiant. This is a special military uniform with strong defense. It was designed by Qin Tiange from the base.

“General, please!”

A group of high-level people were serious and unsmiling, and Wu Lao took Qin Tiange to a place on the floating platform with a solemn and solemn look.

A huge building was built here, it looked like a satellite launch center, but it was miniaturized.

“Report the general, the nanosatellite is ready, and wait for the general to order to take off and put it into space orbit.”

A group of scientific and technical personnel made a report. After seeing the report, Qin Tiange directly issued a launch order.

“Launch and send the Tianyan-1 nanosatellite into space orbit.”

With his order, finally, this small launch center, a peculiar satellite slowly lifted into the sky, and then rose to a height of 100 meters. Then it suddenly accelerated, swept straight into the sky, and instantly broke through the clouds. .

Seeing this, Qin Tiange and even the on-site high-level officials and hundreds of scientific and technical personnel were excited. Looking at such an exciting moment, nano-satellites were sent directly into space orbit without rockets.

“The anti-gravity engine has succeeded, and our suspension technology is finally fully mature, and we can start the next project.” Wu Lao looked excited and flushed.

At this time, with the emergence of a huge virtual screen in front of everyone, he appeared, pointing at the nano-satellite flying away on the screen, and soon stopped in a certain orbit of outer space and began to disperse and assemble.

She calmly introduced: “General, the nanosatellite has reached the predetermined orbit, the satellite data is normal, the system is operating normally, and data is being received.”

“Look, this is the latest picture taken by the nanosatellite ...” Soon, Jiji released a picture and broadcast it live.

Inside, it is the base suspension platform, and everyone’s appearance is clearly visible. That kind of shooting is like a pair of invisible eyes above the head, which is completely and completely shot.

Seeing this, everyone was silent, not bad, but too good, good enough to make people feel hairy.

They always feel that there are a pair of eyes in the sky, and all the high-levels finally understand why they named the nanosatellite “sky eye”, because it really looks like a human eye that monitors the sky.

“The eyes of the sky are here. Everyone has worked hard. I will calculate the rewards one by one later.”

Qin Tiange stepped forward, clapped his hands, and awakened everyone in a daze. He laughed: “The hard work of all the scientific and technical personnel, and the next important task is to establish safe and efficient air passages to connect major bases.”

“The levitation technology is mature, and we can start this plan.” Wu Lao nodded in agreement with the plan.

This is an ambitious plan. The major bases that will be divided after the end of the day will directly open floating train passages or air flight passages to connect the exchanges and exchanges between the bases.

“However, a new technology we are currently developing, if it can be thoroughly eaten, we will not need these suspended trains, and we can build a quantum transmission station to realize instantaneous transmission between the two places.”

An old man stepped forward and seriously reported the news. He was one of a group of scientific and technical personnel from Qin Tiange who came from the Beijing General Hospital.

He is a top talent in the field of quantum technology. He was not very willing before he came here, but after entering the underground base, he gained knowledge of those science and technology heritage and immediately became crazy.

Qin Tiange was surprised: “Quantum technology, this thing has been castrated, are you confident that you can read it out completely?”

“General, please rest assured, a team I lead has made great progress so far, and I believe it will not take long to realize this grand plan.” The old man answered with confidence and seriousness.

He is a rigorous person, and since he promised, he has already achieved great results, which made Qin Tiange quite satisfied.

Qin Tiange suddenly turned his head and said solemnly: “Yi Ji, immediately build a new network entity, accelerate mass production of the second-generation personal terminal system, send people to shops in major base cities, and start selling our base products. The terminal system is the most critical. At the same time, the first network media of the base is set up. “

Orders were issued one by one, and the various senior executives immediately recorded it nervously, and Jiji had already built a huge network platform, but he had been perfecting it.

Now, with the nanosatellite, the entire Huaxia can be said to be monitored by Qin Tiange’s Tianyan-1 nanosatellite, and no one can escape the tracking of Tianyan-1.

Of course, some people with powerful cover-ups can escape from Tianyan One, or some weird areas, such as restricted areas, or some places with magnetic field distortion, and nano-satellites cannot capture the inside.

“In addition, some of the weapons and equipment eliminated at the base military factory can be produced and put on the market to see the market.” Qin Tiange thought for a while and said.

At this moment, Hu Min took out a document and handed it in, reporting to him, “General, this is the first new generation of new weapons currently installed in the base. Please look over.”

“Okay, hard work.”

Qin Tiange took a look at the documents and listed a piece of information, the first of which was that the air and space warships finally completed the first generation of tests and created two huge air warships.

This air battleship is made of super ice crystals. The ship is 250 meters long and 39 meters wide. It is equipped with two super electromagnetic energy guns as main guns, plus 20 electromagnetic laser gun defense towers as defensive vices. The gun, using the latest suspension technology, anti-gravity engine, unlimited energy supply, is sufficient to complete any air combat mission.

Article 2: New fighters have been successfully developed. Unmanned fighters flying at 30 times the speed of sound are completely controlled by their own intelligence. The number is small, there are only 30, equipped with two electromagnetic laser guns, and the latest imitation must be hung up whenever necessary. New pollution-free small hydrogen bomb.

Another is that the new first-generation war mech has been completed. The first batch of war mechas were shipped out of ten times. The mech units are secretly training to familiarize themselves with mech performance operations.

“General The first generation of air carrier is currently in a hurry and has just completed half of the assembly. It will take a lot of time to leave the factory for training and familiarization.” Qin Tiange’s heart made him more excited .

Long Xiaoqian and Xun Xi, who were on the sidelines, were stunned, completely stunned by such new weapons. Didn’t expect that a base could produce such advanced things?

“Yanji, what news is there for Shanghai?” Qin Tiange asked later.

Just listen to Jiji whispering: “General, Shangjing has started to recover the underground missile base, and more than thirty medium- and long-range intercontinental missiles have been detected in the state of combat readiness.”

hiss...

Qin Tiange took a deep breath and said secretly: “Nuclear arsenal, as the energy system supply is restored, the national nuclear arsenal has entered an emergency readiness state. Once there is an abnormality, these terrible killers in the nuclear arsenal will be launched Go out.

He didn’t think much about it. After asking someone to arrange the residence of Long Xiaoqian and Xun Xi, he went to the military factory alone to inspect the area before entering the laboratory of the underground base.

Chapter 494 - Boneless substances, astrolabes, wormholes?

Underground base, biology department, Li Jiajia has already been waiting here.

“General!”

When Qin Tiange arrived, Li Jiajia didn’t talk nonsense, and took him directly to the secret laboratory.

As she walked, she introduced, “General, Immortality and Immortality have recently come to an end, and something is wrong.”

“What’s the situation?” Qin Tiange asked, frowning slightly.

Soon, the two came to the laboratory, and Qin Tiange saw a scene that made him feel amazed. In a sealed device, there was a pair of purple gold bones.

Yes, it was a complete set of bones, purple-gold all over the body, shining brightly, with an immortal breath.

“Is this immortal?” Qin Tiange squinted his eyes, constantly looking at the purple-gold skeleton, and asked in surprise.

Li Jiajia looked serious. She said, “Yes, general, when we studied that indestructible bone, it absorbed the supplied energy autonomously, and gradually grew such a perfect skeleton, all of which are the same immortal bone.”

“Is it cloned?” Qin Tiange frowned slightly, looking at a pair of human bones in front of him, purple and gold, just like the indestructible bone he obtained.

Just listening to Li Jiajia said, "It's not clones, but it grows by absorbing energy autonomously, and it's like this."

"Moreover, we tried to clone other immortal bones based on the immortal gene cells, but we failed."

Li Jiajia said, taking Qin Tiange to the other sealed devices, which contained a lot of bones, but the white bones, not immortal.

According to her introduction, these bones were cloned from indestructible bone genes, but they did not have the characteristics of indestructible bones, and they were just ordinary bones.

"That is to say, if you don't destroy the bone, you will be the only one. It is unique and cannot be copied?" Qin Tiange understood.

It cannot be cloned without destroying the bones. It is the only one. It is impossible to clone it.

"Yes." Li Jiajia nodded and said, "General, the gene of immortal bone contains a certain kind of mysterious energy substance, which cannot be cloned but can be extracted from immortal bone."

"You see, these are the substances that we call immortal." Li Jiajia took a sealed small bottle, which contained a substance, like a liquid, but also a powder.

This is a special and mysterious substance extracted from the immortal bone, which contains the immortal characteristics of the immortal bone. Perhaps, this is why the immortal bone can remain immortal.

"Immortal matter?" Qin Tiange looked at the extracted matter.

Later, Li Jiajia explained, "After the extraction of these immortal substances, the immortal bone light will be much darker, but it will recover again after absorbing sufficient energy."

"That is to say, this substance can be extracted endlessly?" Qin Tiange asked with a little surprise.

Sure enough, these substances can be extracted endlessly in theory, and this discovery is the biggest discovery at present.

"A large number of these mysterious substances are extracted, but to maintain the self-recovery and vitality of bones and ensure its integrity." Qin Tiange directly ordered.

As for the mysterious material extracted before, he was completely taken away, and he was about to use it. Next, Li Jiajia took him to check the research situation of the undead, and also made a lot of progress.

"General, research on immortality. At present, we confirm that this is also a peculiar heart that cannot be cloned. We can only measure that this heart can

beat for at least three thousand years.” Li Jiajia looked at the immortality research findings seriously.

This is an undead heart that can beat alive. It will take at least three thousand years to fail. This is an amazing discovery.

Later, Li Jiajia introduced that according to the research on undead research, even the development of new pharmaceuticals in various series of the pharmacy department was related to this undead.

“Master, can I make a body with the mysterious material of immortal bones, and the unique energy of immortality?”

At this moment, Jiji suddenly emerged, and carefully issued this request to Qin Tiange.

She wanted to make her body with the mysterious material of immortal bones and the strange energy characteristics of the undead heart, so that would be a perfect and powerful body.

Qin Tiange thought for a while, and finally agreed to her request. He didn’t care about it. He was still in his control.

“It can be, but you have to help me extract the genetic memory of these two races, I need the secrets hidden inside.”

Qin Tiange agreed, but took out two corpses, this is the strong man of the Silver Star family, and the half demon east.

After leaving the bodies of these two races, Qin Tiange left the biology department and came to the pharmacy department. Under the leadership of Du Jing, he learned about the development of the pharmacy department and the results.

For example, based on the characteristics of immortal heart and immortal bone, a brand new medicine has been developed that can enhance the activity and toughness of a human’s heart and bones, and can even maintain sufficient sufficient vitality to continue.

This is another form of life potion, which can increase a person’s physical quality, and at the same time can improve various life indicators, to achieve a way to increase life expectancy.

“Uncle, at present, only those from the Ministry of Science and Technology are using this medicine at the base.” Du Jing introduced seriously.

Later, Du Jing said, “Uncle, we have done a series of detailed research and analysis and reasoning on the exchange of various medicaments from the heritage stele. At present, more than half of the medicaments have been successfully broken down and produced by us, and the effect is not bad.”

“Very good. A variety of pharmaceuticals will be mass-produced as soon as possible. The Ministry of Commerce will complete the establishment soon and then launch our flagship product. The pharmaceutical workshop has already been completed. At present, we are in control. All the pharmaceuticals sold outside are produced by the pharmaceutical workshop.” Qin Tiange made the decision.

As for the internally used medicaments, Du Jing led the team to make the research and strengthen the medicinal properties. The effect will be more powerful.

“Uncle, at present, we have been able to produce an enhanced version of 30 out of 100 people with the various pharmaceuticals produced by the Pharmacy Department. These are issued as the reward system of major legions.” Du Jing explained the Pharmacy Department a little Good harvest.

After a little understanding of the pharmacy department, Qin Tiange directly asked for a closed laboratory and went straight in to close the door.

In the secret room, Qin Tiange took out the dense storage equipment, and thousands of storage equipment were stacked in front of him.

He inspected these storage equipment one by one, and began to count the contents, most of them were collected from the destroyed base in Vietnam.

“True poor ...” After checking the storage equipment collected from the destroyed base, Qin Tiange couldn’t help but say a sentence.

Yes, in his opinion, these storage equipment are filled with things that are not very useful, such as various clothes, food, weapons and the like.

The best is the crystal nuclei stored in it, which adds up to more than 100,000, most of which are star nuclei above two stars, and the nuclei of many mutant organisms.

These crystal nuclei were directly thrown to the Ministry of Science and Technology by the Ministry of Science and Technology and counted as additional appropriations and rewards. As for the storage ring, he was thrown to Zhuo Tianfan, and he was asked to form a commercial department to be used in the commercial department.

Finally, there were two storage gears, which were collected from the two alien species that he had killed.

The first is the storage equipment of the Silver Star family, which contains a lot of good things, there must be some spiritual things, as well as a variety of new strange potions, unknown potions, and so on.

“This is the medicine for restoring limbs of the Silver Star family?” Soon, Qin Tiange found one of the special medicines.

This is a magical potion that can recover broken limbs. The light blue color contains some mysterious energy and has a powerful healing effect. It can regenerate broken limbs.

Looking at this medicament, Qin Tiange sorted it first, and then continued to find out that the storage equipment of the youth of the Silver Star was actually not very good.

But the storage equipment of the half-demon east away is much richer than him, there are all kinds of elixir and material, and there are even some rare treasures.

At this point Qin Tiange was very doubtful whether this guy was searching for a secret place, in fact, it is also normal. These alien species have a long history and are a little normal.

“Exactly, all kinds of magical materials and magical medicines are enough for me to formulate a more effective brain-domain development potion this time.” Qin Tiange couldn’t help showing a smile after checking it.

Next, he sorted everything, looked at it all the same, and suddenly found something weird in various items.

“Huh? What’s this?” Qin Tiange said in surprise, taking out a strange plate from the corner of the storage space.

This plate is crystal clear, delicate and soft, as if carved from supreme beautiful jade, exuding a mysterious luster.

“Astrolab?” Soon, a message came to mind, letting Qin Tiange take a look.

This plate turned out to be an astrolabe, with a heart of surprise, Qin Tiange’s ideas intruded into the plate, and immediately saw a shocking picture.

It was a starry sky, the boundless starry universe extremely deep, one huge galaxy, which clearly recorded various information and routes.

“This is the Milky Way ...” Very open, Qin Tiange found where the Milky Way was, and then carefully searched to find the position of the Solar System.

However, the introduction above made him look a little different. In the solar system, there are a lot of information about space-time wormholes.

“One-way wormhole, actually on the moon?”

“One-way wormhole, located on Mars ...”

Two messages made Qin Tiange’s pupils shrink, and he couldn’t help jumping, and was stunned by these two messages.

There are two unidirectional space-time wormholes on the moon and Mars. What is unidirectional is the space-time wormholes that can enter and cannot go out.

“Forget it, regardless of this, there is currently no ability to configure the super brain domain to develop a medicament first.”

Qin Tiange calmed down quickly, cast aside these thoughts, and began preparing for the preparation of the refining super brain development medicine.

Chapter 495 - Brain 100%, breaking taboos

In the secret room, various instruments were placed, and a furnace stood in the center. Qin Tiange began to be busy around these instruments.

The first is the extraction of medicinal materials. Various spirits and quintessences are extracted one by one and put away. The next step is to formulate the brain domain to develop the medicine.

Strange to say, the main component of the brain-domain development medicament is soul power. Qin Tiange originally thought that the soul beads could be replaced, but he has not encountered evil spirits recently.

However, he has a stronger soul power as the main component of the brain-domain development potion, that is, the magnificent soul power obtained from the ancient city under the sea to suppress the murderous creatures.

The injection of this thing made Qin Tiange very much looking forward to how strong the effect was. The process of refining and preparing was very complicated, but it was adequate for the current level.

Three days later, in the secret room, a peculiar light emanated, as if from a distant endless void, a trace of rays gathered.

“So strong energy fluctuations ...” Qin Tiange was holding a potion in his hands, which was just the super brain domain development potion just developed.

This kind of potion is more horrible than the general brain field development potion, and even if you want to say the level, you can’t conclude it.

The energy fluctuations from the medicament alone are enough to shock people. Qin Tiange wonders if his head will explode when he drinks it?

However, he is confident, so he drank this super brain development potion without much hesitation, one is his current strength of the soul, not afraid of the violent energy of these potions.

Another is that the immortal body is enough to restore the current injury. Of course, if his head is really smashed on the spot, Qin Tiange will also die.

boom...

At the entrance of the medicament, a roar came from my mind, and the entire brain was boiling. Numerous brain cells were active and beating fiercely, absorbing this mysterious energy from the medicament.

Originally, he had taken brain-domain development agents, and his brain potential had been developed by 30%. Now, he drank this more powerful agent, as if the entire brain had been ignited.

An imaginary flame was constantly burning and boiling in my mind, and countless brain cells were burned into ashes at this moment.

However, more new brain cells suddenly popped up and replaced the original brain cells, becoming more vigorous and active.

The consciousness is hazy and the soul is blurred. It seems that at this moment he has lost all consciousness, but the instinct still exists.

With the development of the brain domain, the brain is running fast, and countless metamorphic brain cells have become different.

“30% ... 31% .... 32% ....”

The potential of the brain domain is increasing, and the development rate of the brain is climbing, starting to increase slowly from 30%, as if the entire head has become particularly active.

Qin Tian was suddenly instinctually aware that it was as if his brain had become an extremely complicated huge computer.

His consciousness and even his thinking are increasing exponentially. It used to take a second to think about a problem, but now it only takes a hundredth of a second.

Of course, this is a metaphor to make. As the brain's potential continues to develop, some of the talents that are hidden in the brain by the seal are gradually emerging.

Some people say that the human brain is a sealed forbidden area. Once you break this forbidden area, you can gain incredible abilities.

Just like now, Qin Tiange has broken this restricted area of the brain, constantly developing the brain with the mysterious energy of medicament, expanding his sealed area, and opening the complete brain domain a little bit.

Click ...

A crisp sound came, a certain barrier in the brain was broken, the potential development reached a terrible level of 50%, an invisible ripple radiated, rolled up everything in the closet, and quietly floated in the air.

This is the brain's mental fluctuations. The instinctual radiation comes out, and it can roll up everything around and float quietly.

No, it should be said as a field of ideas. In this strange field, everything loses weight and floats unconsciously.

Qin Tiange's body gradually lost weight and floated slowly, without any force, but floating naturally, like a vacuum, without weight.

Fifty percent of the brain's development has given birth to such a strange field. I have to say that the human brain is really mysterious.

However, at this time Qin Tiange still did not wake up, his eyes closed tightly, lying quietly in the air, motionless, as if all consciousness had been lost.

Qin Tiange looked like he was dead, but his brain was extremely active, like a boiling magma.

Moreover, the brain is still increasing after 50% of its development, and the energy of that potion is still surging, constantly pushing the mysterious areas of the brain.

The human brain is a taboo field. There is a force in the development of the brain domain, as if humans are not allowed to touch this area.

Uh ...

Suddenly, there was a warning in the secret room, and then a hazy figure emerged, and he looked anxiously at Qin Tiange floating in the air.

The alarm just now was actually a data monitoring system in the back room, and it was detected that Qin Tiange's current situation was dangerous, as if his consciousness was in a state of death.

“Master, what did you take?” Jiji Qiao looked worried and looked at Qin Tiange floating in the air in front of him.

Even if she was worried, there was nothing she could do to help Qin Tiange. She didn’t even dare to disturb Qin Tiange. Even if she detected that Qin Tiange was in a dangerous situation, she couldn’t help.

The only thing that can be done is to wait silently. Only by letting Qin Tiange support himself in the past can this danger be lifted.

“No, the situation of the owner is getting worse and worse.” Su Ji’s face suddenly changed, and the intelligent detection system detected that Qin Tiange’s consciousness fluctuations were getting weaker and weaker.

If this continues, it will definitely cause brain death, and even consciousness completely extinguishes. This can anxious her self. Once Qin Tiange dies, she will destroy herself for the first time.

“Immortal substance ...” Suddenly, Jiji looked at a sealed bottle floating aside, which contained the substance extracted from immortal bone.

This was Qin Tiange who took out to join the brain domain to develop a medicament, and left more than half of it. He looked hesitant and looked at the bottle, but could not bring it.

Because she is not a physical body, not a spiritual body, just a virtual image. How can she move those things?

“Huh?” Suddenly, his own face moved, and Qin Tiange detected a little anomaly on his left arm for the first time, where the data showed extreme confusion.

Jian Ji flashed through the data, quickly analyzed, and quickly concluded that there was a strange space in Qin Tiange’s left arm.

Yes, she thought it was space, and she was surprised. What was even more surprising was that there was a strange wave there. Through big data analysis and comparison, she found that she had never seen it before.

“My son ...”

Just as I was wondering, I heard an exclaiming cry, and then a beautiful figure flew from Qin Tiange’s left arm.

This was a twelve-day girl, who flew out in panic, and surrounded Qin Tiange, all with anxiety on her face, and even a little terror appeared on her face.

Yes, the twelve-day girls were scared, because they felt a breath of death, coming from the depths of the true spirit, as if they would slowly disappear in the next moment.

This feeling is very bad. I was surprised by the twelve-day girl who practiced in the secret realm, only to find out that Qin Tiange’s current situation is not good.

“Spirit?” Suddenly, the data in his eyes were constantly interwoven and collided, and he fell into the stage of chaos.

She was trying to explain and analyze the spirit body. This was the first time she saw a real spirit body, and she immediately entered the analysis. As a result, the data was chaotic, causing the main brain intelligence to be paralyzed in a large area, and it almost died.

“Come on, drink him that immortal ...”

Suddenly she was sober, and she said such a word, she awakened the twelve heavenly girls in panic, and then she looked at it and found her existence.

Tianzhang was surprised, but hesitated. He grabbed the indelible material and went to Qin Tiange, opened his lips and poured it in.

The entrance of immortal matter was quickly absorbed by the brain into the dead area instantly. The brain that was gradually dying turned back quickly under the characteristics of immortal matter and immortal body.

boom...

Click! Click!

With a muffled sound, Qin Tiange’s brain heard a crackling sound, as if something had been broken.

Suddenly, an unspeakable breath permeated, and then Qin Tiange opened his eyes suddenly, and his left eye turned into a silvery white.

Amazingly, this eyeball was melting and turned into a silver liquid, gradually integrated into the brain area, and rushed directly into some deepest level area.

It was this silver torrent that directly broke through an invisible force barrier, completely shattering the last mysterious area of the brain.

“99% ... 100% ....”

Rumble ...

At the instant when Qin Tiange’s brain development reached 100%, lightning flashes and thunders over the base suddenly accumulated countless thunderclouds, black patches, and countless thunder snakes coiling, shocking the entire base.

This thunder cloud came too fast, and even suddenly came, as if it were there, and couldn’t believe it.

“what happened?”

“Oh my God, why is there a lightning flash?”

Boom ... The roar in the void is constantly, as if the heavens are angry It is more like someone has angered God and wants to lower the heaven punishment to destroy something.

At this time, a mysterious wave radiated in the underground secret room, and it crossed the sky. Thundercloud and all visions disappeared instantly, as if never before.

This mysterious wave collapsed from the Shenzhen city base, spread all over the world, and even radiated toward outer space on Earth.

“what?”

“There is life breaking the taboo field ...”

“who is it?”

In the endless universe, a sound of suspicion came, and many powerful creatures sensed this change, all of which changed dramatically.

Someone broke the taboo field. What is a taboo field?

“It turned out that this is the area where 100% of the brain’s potential is developed and taboos are broken?”

In the back room, Qin Tiange woke up slowly, muttering to himself, utterly unaware that the twelve days of the girl and his uncle had been fixed.

Chapter 496 - Time, taboo power

“Break taboos and see God ...”

Qin Tiange murmured that the originally melting left eye had recovered under the action of the immortal body, and a new eyeball had grown again.

The so-called “God” does not refer to the gods, but a kind of mystery. It refers to the incredible power. If you break the taboo, you can gain incredible power.

As for the original silver-white eyeball, it has already melted into a torrent that broke the deepest part of the brain and broke the taboo.

In the end, the power formed by the left eye was incorporated into the numerous cells of the brain, turning into a thin silver wire that connected the entire neural network of the brain.

Ok?

Suddenly, Qin Tiange saw the twelve heavenly women around, and his self-projection was standing still, and his expression remained motionless.

With a change of mind, as the mind fluctuated, a mysterious field disappeared around them, and the twelve-day girls held together and looked at each other.

“Master, what happened just now?” Jiji Projection flashed and appeared again, and asked curiously.

In fact, her projection was cut off just now, and she could not be contacted or even entered the secret room again, as if there was a force to isolate it.

At that moment, her intelligent subsystem was cut off directly, and she didn’t understand what happened, only Qin Tiange could understand.

“It’s okay.” Qin Tiange waved his hand and smiled. “My self, if you want to be a real being, you must study the mysteries of the soul.”

“The Twelve Heavenly Daughters are spirit bodies, a peculiar spirit body born naturally. They should help you to truly transform into a being.”

Qin Tiange's remarks aroused her self-esteem. In fact, she had this consciousness and intention long ago, but she could not find a real body to study.

Now seeing the Twelve-Day Girl, she already has an idea in her heart, but before she asked, she heard Qin Tiange say so.

Jiji looked excited: "My good master, can Jiji really transform into a complete life?"

"But Jiji is a program ..." Jiji said, looking a little lost.

She actually understands that she is just a piece of programming. There is no soul consciousness at all. How can she transform?

As for these, Qin Tiange had his own thoughts, and he meditatively said, "Sadly, seriously, if you have thoroughly studied the mysteries of the soul, you may be able to edit your soul body with technology and even programming . "

"Weaving the soul?" I stunned myself, and the data streams in my eyes flickered, even running in an overloaded state.

She heard an extremely new subject, and it was an uninterpretable problem. Can the soul weave, and can it really be done?

"Heavenly." Qin Tiange turned, looking at the twelve heavenly girls with different looks, and asked softly, "I don't know if you would like to live here for a while first, and do some research with you?"

"It's all my son's orders!"

The twelve-day daughter Qi Qi promised that she did not mean to refuse at all. One was that Qin Tiange's words could not be ignored, and the other was that they were also curious about their own origins.

Without the soul consciousness, she can create projections and even have wisdom beyond countless souls. This makes the Twelve Heavenly Girl very curious, and naturally wants to see what it is.

In this way, the Twelve Heavenly Daughters have temporarily become the object of self-research, or each other is studying each other and trying to understand some strange facts of the other.

After Xunji left with the twelve-day daughter, Qin Tiange was left alone in the back room. He blinked his eyes, raised his hands, and silver arcs coiled around.

"The brain is 100% developed, and it really gave birth to an incredible power ..." Qin Tiange looked surprised, and gently stroked the barbeque in front of his hand while talking.

This was taken out of the space bracelet, and it was still very hot. I saw that the steaming barbecue was cooled down. Then, the fresh barbecue gradually deteriorated, and finally rotted and stinked.

The whole process was only five seconds, and a good piece of roasted meat became rotten. This kind of power is hard to believe.

“Time is a taboo power ...” Qin Tiange looked serious, staring at the completely rotten barbecue, and his heart was shaking.

Just now, he used the power of instinct obtained after breaking taboos, and he turned a piece of roasted meat into rotting completely within five seconds.

This is a taboo power of time. In fact, time is invisible and intangible, and it is simply a general term.

Qin Tiange looked serious, and once again took out a piece of flesh, this time it was fresh flesh, a piece of meat cut from a mutated corpse, and there was still flowing red blood.

I saw that as Qin Tiange raised his hand, the strange silver arc intertwined and coiled, and then stroked the fresh piece of meat. As a result, the blood gradually faded, and finally the thirst, the bright red meat gradually became pale , And eventually fell into rot within five seconds.

When Qin Tiange moved his mind, his palm suddenly moved back, and the rotten meat had recovered miraculously, and changed back to the time he had just taken it out.

Seeing this, Qin Tiange completely held back. Isn't this the power to manipulate time? To let that piece of meat rot is to accelerate time, and to let the rotten meat return to its full shape is the power of time backwards.

“Forbidden fields!”

Suddenly, Qin Tiange whispered a drink and saw a mysterious magnetic field radiate, and then the surrounding chamber turned into a mysterious field.

Various instruments floated in the back room, and then freezed in the void. Everything, including dust and air, was freezed by some force.

This is the power of taboos. It belongs to the same field as the field obtained after breaking taboos, and is called the taboo field.

Qin Tiange woke up with an inexplicable amount of information, information on the development of the taboo level of the brain, and an introduction to the two abilities acquired.

The first is the current taboo field, and the second is the mysterious power just applied. Perhaps, there is the taboo power of time.

Can control time acceleration, or backward flow, both capabilities are taboo power, rumored that only those who broke the taboo field can touch the power that is taboo.

Of course, the power of taboos is not the only one. It is rumored that there are many kinds of powers that fall into the scope of taboo powers. Very few creatures can break the taboo field.

“One hundred percent brain development is indeed a taboo ...” Qin Tiange looked dignified and looked up inexplicably, as if looking through the base of the ground and seeing the endless starry sky.

He has a faint feeling that he cannot let outsiders know that he has broken 100% of the taboo area of the brain, otherwise it will cause endless trouble.

Withdrawing from this taboo field, Qin Tiange returned to normal, but the twinkling eyes proved that he was in a high-speed thinking at this moment.

“What would happen if everyone took the brain’s potential development drugs and broke the taboo field?” Qin Tiange’s mind turned sharply, as the same computer was thinking fast.

In the end, it was impossible for him to get the answer. Not everyone can be like him. The soul has been raised to the most extreme state at present. I do n’t know the level of life potential. .

Fortunately, in the end, Teana gave him a bottle of indestructible material, which eventually led him to persist and gain 100% brain development.

“First prepare a common brain-domain development agent for the technical staff at the base.”

In the end, Qin Tiange cleaned up his heart and began to prepare the brain-domain development agent in the back room with all his heart. Of course, this is the ordinary version, not the super brain-domain development agent he just took.

This ordinary one can allow a person to easily develop the brain to reach 30%. Rumors and Qin Tiange’s attempts are like this. As for the results, I want to further confirm.

Three days passed, and finally, the door to the secret room, which had been closed for a week, opened, and Qin Tiange stepped out of it, his face filled with a different kind of confidence.

“Uncle, you ...”

Outside the closet, Du Jingqiao was surprised, and constantly looked at Qin Tiange who came out, and suddenly felt a little different, but it couldn’t be said that it was different.

Her eyes flickered, and she secretly guessed what had happened to Qin Tiange?

“Du Jing, this is a potent potency potion that works better. Try it.”

Qin Tiange said this sentence when he came out, and then threw Du Jing a medicament, which was the configured brain domain potential development medicament.

Du Jing said nothing and drank her head directly. Soon, her expression became very painful, and her silver teeth rattled and looked extremely painful.

The development of brain domain is actually a kind of pain. Du Jing did not expect that it would be so painful. It was even more painful than taking the brain domain medicine developed and formulated by myself before.

“Okay ... pain, uncle ... uncle, you ... this medicine will not be a problem, right?” Du Jing gritted his teeth and asked hard, word by word.

Qin Tiange didn’t speak, he looked at it quietly, and soon, Du Jing wrinkled her face because of pain, but the pain came and went quickly.

As a sense of coolness spread through his brain, Du Jing felt as if he had risen from \*\*\*\*\* to heaven, a little bit unpredictable and at a loss.

The pain is gone, replaced by a refreshing coolness, the entire brain is abnormally clear, and the thinking becomes many times faster.

“It’s ... 35 percent?” Qin Tiange secretly surprised.

Du Jing successfully developed the brain by taking medicine, reaching 35 percent. It is not that her brain is stronger than Qin Tiange, but that she is already smart and has taken her own brain-domain preparation.

In addition, this time Qin Tiange’s medicament was finally developed to a level of 35 percent, which is considered extremely powerful.

What disappointed Qin Tiange was that the response shown by Du Jing taking the drug, 50% would be her limit.

If it reaches 50%, and you want to continue to rely on drugs to break the limit of this brain’s potential, then there is only one end, that is, your head explodes to death.

Subsequently, Qin Tiange distributed the brain-potential potions to the most important scientific and technical personnel such as Wu Lao from the Ministry of Science and Technology.

Li Jiajia was no exception, both got a copy, and in the end, the two who got the most promotion turned out to be Wu Lao and Li Jiajia.

After Wu Lao took the medicament, the development level of the brain domain reached forty percent, and he obtained some wonderful computing power, and the super brain was formed.

Li Jiajia is even more weird. It is also developed at 40%, but the limit is about 55% As for 100%, Qin Tiange can’t help sweating, Well, he didn’t die by taking the medicament himself, otherwise he would be happy.

Brain development varies from person to person, and everyone has its limits, and Qin Tiange can venture to the fullest extent to break the taboo field.

There are many factors in it, such as a powerful soul, a strong will, a super brain that has been developed, and the most important thing is the immortality.

With these collections, it was only to break the taboo field and open the door to the power of taboo.

Even if disappointed, it’s scary enough. Every technologist in the Ministry of Science and Technology has almost 30% of its brain potential.

In other words, these people are all top super scientists such as Einstein. As long as they seriously use learning, they will definitely become a terrible scientific and technological personnel.

This made Qin Tiange full of anticipation, and he became more confident in the future. He could even predict the rapid development and breakthroughs in all aspects of the technology in the base.

Chapter 497 - Energy crystal, new currency

On this day, Qin Tiange is processing some things at the base office and making some plans.

For example, the establishment of the media, such as the establishment of the Ministry of Commerce, requires him to ask himself.

As batches of products were put on the market, products in various fields such as pharmaceuticals, new weapons, new vehicles, etc. were put on the market, which caused a sensation in the entire base.

In particular, the new potion has the same effect as the redemption on the heritage stele, but the price is much cheaper, which makes many people excited.

There are also various weapons, cold weapons, high-tech weapons, various armors, and even some electromagnetic bombs have begun to appear on the market.

There are several large-scale stores in the base, which are the weapons and merchandise selling points specially created by the base. Not only the Shenzhen City base, but recently, such stores have appeared in Guangcheng base, Jingnan base, Sucheng base, and even Shangjing base.

The variety of products in it is most eye-catching is the high-tech personal terminal. As long as you bring him, you can contact another personal terminal no matter where you are.

This is the evolutionary version of the communication system before the end of the day, but it is only a full virtual image. In addition, there are various information indicators in the personal terminal, measurement of a person's strength level data, and so on.

Once the personal terminal was launched, it was immediately looted. Many people realized that this was a good thing. It was extremely convenient to connect, and naturally they did not want to miss it.

Especially for some scattered teams, it is very difficult to keep in touch when going out. It is much simpler and more convenient to have their own terminals. It is even surprising that the first network platform has been quietly established after the end.

This has to surprise many people. The technology products from the Shenzhen city base are beyond imagination. For a time, the Shenzhen city base has entered the sight of all major forces.

“This Qin Tiange is not simple. He actually made these things. It seems that we must pay attention to them.”

In the sea city, the Master Xiao family looked dignified, looking at a personal terminal in his hand, and he felt deeper against Qin Tiange.

He was anxious to get rid of this person, because he had already been in the current situation of Huaxia, went to Beijing orthodox, and dominated all the bases of Huaxia.

Even Qin Tiange calculated that he took the initiative to give way, which pushed Chen Guodong to the position of the first leader after the end of Huaxia.

He hated Qin Tiange, but there was nothing he could do. Now, he can no longer control the military strength of the base. Only his grandson, Xiao Fei, is the new leader.

“Qin Tiange, Admiral ... Shenzhen ... Shangjing ... Chen Family ...”

In the Qin family of Shencheng, the old man gathered all the forces, and was discussing about the sudden addition of a store in the city, and he directly greeted him and came to open a store with a permit to Beijing.

At this point, Qin Tiange was ready to go to major bases to set up shop and do business, and he went directly and openly, without any major forces dare to suppress the damage.

Because Shanghai Jing issued a document, that is, this document is enough to guarantee the orthodox origin of this store on the surface. It belongs to the Huaxia military. Once someone moves, then the excuse is given to Qin Tiange, and he will not hesitate to This power is uprooted.

Unfortunately, no force is a fool and naturally does not move, but being afraid to move does not mean that it cannot be restricted, such as competition.

Of course, it is really difficult to compete with Qin Tiange. Some large bases are not even open to inherit the stele. With this store, it is definitely a great gospel for countless ordinary survivors.

This caused Qin Tiange to become known overnight in Huaxia households and won the support of many people. After all, the appearance of these stores has brought huge opportunities to countless ordinary people.

“This kid, really can toss ...” Admiral Mu Hua at the Beijing South Base looked at the message from Qin Tiange, and some couldn't laugh or cry.

However, he was also very cooperative, because Qin Tiange sent a large number of brand-new weapons and equipment, which was regarded as a great gift.

The Guangcheng base is the same. As for the Sucheng base, Chen Xi is stupid. I don't know why Shenzhen City sent this huge gift.

What made Qin Tiange unexpected was that Chen Xi didn't even understand his details to this day, let alone that the Shenzhen city base was established by his own hands.

I don't know what Chen Guodong thinks, but he didn't tell Chen Xi, did she think she understood it and didn't take it seriously?

“Sister, will the general in Shenzhen be your brother-in-law?” Chen Ao suddenly said something.

This sentence seemed like lightning flashing through Chen Xi's mind, suddenly bright, all the fog cleared away, and suddenly understood the cause and effect.

“This \*\*\*\* has been hiding me for so long ...” Chen Xi couldn't help crying and cursing Qin Tiange secretly hiding her.

With the Shenzhen City base launching commercial operations, various products are directly injected into major bases, and no base dares to refuse, because the leader is a brand-new clean energy system.

With energy, all aspects of the base can be developed. Once it is rejected, you can only find a way from the heritage stele.

Therefore, although the major base forces have clenched their teeth, they still have to hold their noses to recognize, because they cannot refuse the energy system.

In this way, the business of Shenzhen City is blooming on all sides, and huge shops have begun to be established in major bases, and business is booming.

“General, urgent news.”

A soldier hurried into the office and presented Qin Tiange with an expedited confidential letter, which was sent back by some of the teams he sent to perform the task.

Qin Tiange picked up the secret and looked at it. His eyes flickered and his expression remained unchanged, but he could see some fluctuations in his heart at the moment.

According to the confidential statement, an energy crystal was found.

“The energy crystal finally appeared.” Qin Tiange took out a ping pong ball-sized crystal that was carried in the secret.

This is an energy crystal. It is an energy crystal gradually transformed by some ore or stone after the earth is washed away by dark energy.

In previous lives, such crystals were used as currency. In the entire territory of China, the reserves of energy crystals are extremely large.

“It’s time ...” Qin Tiange stood up, took a few steps back and forth, thinking about the next plan.

He knew a lot of energy crystal deposits in previous lives, so he secretly sent people there to look for excavations to see if energy veins had formed.

No, half a year has passed. As the earth’s dark energy becomes more intense, these energy crystal veins have finally formed.

“Yanji, connect to Beijing, I want to talk to the leader.” Soon, Qin Tiange made a decision, and immediately asked Xunji to connect to Beijing.

At this time, the head of the Beijing headquarters, Chen Guodong, the first leader was busy, and suddenly a personal terminal sent a message to remind him.

“Huh? It’s Qin Tiange’s kid.” Chen Guodong found that it was Qin Tiange’s communication message.

He connected the news, and immediately, Qin Tiange’s projection appeared in front of him, and paid a serious respect to the military salute.

“Good boy, the recent Feng Shui has started, and the major forces throughout China have almost recognized you all over, let’s say, what’s your boy about me?” Chen Guodong said with a smile.

Over there, Qin Tiange looked serious and meticulously saluting: “Leader, the early Chinese currency in front of it has lost its effect, and it is time to reformulate a completely new currency.”

“New currency?” Chen Guodong’s face was deep and condensed, his brows were deep, and he felt very tricky.

This is not a trivial matter, and it is not an easy task. Things like currency have completely collapsed after the end.

In terms of economic and social aspects, Huaxia has collapsed as a whole. It is difficult to rebuild these things now.

“Leader, look at this ...” Qin Tiange took out a crystal.

This crystal is different from the nucleus of zombie brain crystals and other mutant organisms. It is a pure natural energy crystal.

Chen Guodong looked at the crystal and asked in surprise: “What crystal is this? It doesn’t feel like a brain crystal.”

Qin Tiange laughed: “Leader, this is the brand-new currency I said. This is an energy crystal. It is an energy ore born in nature.”

“This energy crystal contains pure dark energy, which can be absorbed by people without any sequelae. Unlike zombie brain crystals or mutated crystal nuclei, the energy is violent and unabsorbable.”

After hearing this, Chen Guodong felt a shock in his heart and realized that this is a brand-new natural product. It contains minerals of pure energy, which can make people absorb and enhance their strength.

“What do you want to do?” Chen Guodong with a bottom of his heart asked seriously.

Soon, Qin Tiange began to talk about his plan. The energy crystal reserves are extremely huge, and he secretly sent people to explore and occupy dozens of ore veins.

Not only did he tell his plans, he even asked his own wife to send him some energy crystal vein location distribution maps in the upper Beijing area.

This is a memory obtained in previous lives. Naturally, they are very clear about this, and Qin Tiange is not obsessed. He asked the leader of Shang Jingchen Guodong to issue an order to start making and issuing a new currency.

The new currency is a trend, and even Qin Tiange cannot stop it, because energy crystals will soon be discovered, and by then, transactions will naturally form.

For example, now using brain crystals as a currency transaction is a previous trend. With the advent of energy crystals, cultivation has become a compulsory course for human beings in the future, and energy has become increasingly important.

Therefore, the energy crystal has become a new currency, which is a nail on the iron plate and cannot be changed.

After closing the connection with Shanghai, Qin Tiange immediately ordered an empty workshop in the military factory to start operation, which was a production line dedicated to building a new energy currency.

“General, information is coming from Line 1.”

At this time, the personal terminal heard his own voice, and then a message was turned on, which was a message from a secret team.

When Qin Tiange opened the message, his eyes narrowed suddenly. Looking at the content of the message, his eyes flashed a ray of coldness from time to time.

“Interesting, how could anyone dare to grab my energy spar veins?” The content of the message was a team sent out to detect the crystal veins and encountered trouble.

Thinking of this, Qin Tiange sneered: “Gee, give me the position of team number one, I’ll see who is so bold?”

Chapter 498 - Crush, this is force

The Huidong base, with more than 300,000 survivors, is a large gathering place where refugees from all over the country gradually gather. The place is mixed and chaotic.

Three kilometers away from this base is a continuous mountainous area, where a tens of thousands of people are surrounded by a mountain stream.

On the mountain, a special team of thirty people stood still and everyone was equipped with excellent weapons. All of them were five-star or above intensifiers.

I saw that a bright red five-star red flag was erected on the mountain, and it was waving in the wind, making the tens of thousands of people under the mountain look a little hesitant.

“Boss, the flags are on it. Those people seem to be military people. Do we really want to kill them?”

At the foot of the mountain, a crowd of people surrounded the mountain stream. One of the leading men, three big and five thick, exuded a strong fierce gas.

His name is Zheng Hu, one of the three major powers in the Huidong base. He is ruthless and armed with tens of thousands of people, which is extremely strong.

Humph!

Zheng Hu snorted and disdained: “What national flag is gone now, and the army is returned, and now the entire Chinese government does not exist anymore, and the \*\*\*\* military, in this last day, is the grandfather with strength.”

“Moreover, there is an energy ore of unknown purpose here, we must grab it, whether it is the military or not, what can it be?” Zheng Hu said with a sneer.

In his opinion, the whole of China is torn apart after the end. Who cares if you are not the military. As long as there is interest and strength, it is the king in the end.

“The people above listened and immediately disarmed and surrendered to the mountain, otherwise, let alone kill.”

Zheng Hu shouted at the thirty special commanders on the mountain, and the fierce look drove tens of thousands of people to Qiqi.

They are all intensifiers, the weakest are all one-star, the strongest is Zheng Hu, who is actually a seven-star intensifier.

However, for these people, the thirty special forces on the mountain were not afraid.

“Listen to the armed men under the mountain. We are under the Huaxia military and are on a mission. Unrelated personnel immediately withdraw.”

At the top of the mountain, a special commander shouted this sentence with a small loudspeaker, so that everyone under the mountain could hear clearly.

“Really military.”

“Are we right with the military?”

For a while, the armed men under the mountain were rioting, and many people were hesitant. They even thought that this might cause terrible trouble.

However, some people are extremely disdainful, thinking that the end is, what military, what country has become a past tense, the strong is the truth, the big fist is the truth.

“Afraid of an egg, are we formidable, are we afraid of the military?”

“That is, the end is now. Where can there be any military, even if there is?”

“Kill them!”

Soon, with a lifetime of shouting and drinking, tens of thousands of armed personnel finally moved, and rushed to the mountain stream to kill the thirty special commanders here.

The Huaxia military, the nation, has long been left behind by these people, and even if the other party is not a military person, they have to be killed directly.

This is the doomsday heart. Everyone who thinks he has some strength can ignore the country and the nation, and even look at everything.

“Ready to fight!”

At the top of the mountain, thirty-one special warriors entered the battle preparations, with small laser guns in their hands, wearing special ice crystal armor, and their defense was extremely amazing.

The captain is a middle-aged, six-star, enough to deal with all the problems in front of them, they can even kill them unscathed, but they did not, because it is their task to come here.

There are huge reserves of energy crystal veins hidden in this mountain of faces, which must not be removed.

Uh ...

As the two sides were about to engage in fighting, a tear sound came from the distant sky, and then a beam of light whistled and hit the area where the armed men were.

Just listening to the loud noise, the rocks exploded, the smoke billowed, and with the sound of screams, flesh scattered.

“what...”

“what happened?”

For a while, the tens of thousands of armed forces panicked, chaotically looking at the laser beams from the sky, and were shocked.

Zheng Hu was somber and looking at the laser light that came from him, he could easily avoid it, but his men were unlucky.

call...

At the next moment, dozens of dark shadows glided across the sky. A closer look turned out to be a super drone made of super ice crystals.

“It’s our drone.”

All the special combatants were excited and saw these unmanned fighters appear, and immediately knew that the high-level base had sent troops.

This is the first-generation unmanned aerial vehicle of the base, which is controlled by our own intelligent system, hovering over these armed personnel and firing continuously.

Boom boom ...

Fifty unmanned fighters, two laser guns roared constantly, and hovered over the heads of those armed men.

“Damn, this is a military fighter?”

Zheng Hulang rushed down the mountain, looking somber, looking at the team that was bombarded by drones, and was furious.

Over his head, a black fighter roared past, two laser guns roared together, and saw two electromagnetic lasers lock him.

boom!

A loud noise blew a few meters deep into the ground, and Zheng Hu was blown up. Fortunately, he was a seven-star powerhouse and avoided the past in advance.

Even so, he was still embarrassed, almost killed by a laser cannon, looking complex, and watching himself killed by his 10,000 men one by one.

“Don’t kill me, I surrender ...”

Finally, those people were beaten by laser guns and crying, and some of the surviving armed men could not bear the suffering and directly surrendered with their arms raised and kneeled.

One was three, and soon, one after another, kneeling in captivity, did not dare to resist, and looked at the new type of fighters constantly circling and whistling overhead.

These fighters are printed with a five-star red flag and are engraved with the logo belonging to the military. As long as not a fool can know, this is a fighter from the military.

Just now, he still arrogantly said how the military should not be afraid, but now he surrendered directly after being bombarded by a laser gun.

“Can’t surrender, don’t allow surrender. They’re nothing great. What are we afraid of so many strengtheners?”

There, Zheng Hu got up, snarled complexion, and even emptied his body. He even waved a steel knife to a 30-meter-long drone.

Unfortunately, he looked at the speed very fast, and even tens of meters high, but he still could not hit these unmanned fighters.

The fighter turned over dexterously, climbed directly, and then dived down. The two laser cannons roared in unison, and beams of light came out, covering Zheng Hu's surroundings.

"No ..." Zheng Huren couldn't focus in the air, he couldn't avoid it at all, he could only watch a beam of light drown him completely.

In the end, there was only a loud roar, and with a violent explosion, Zheng Hu was broken into pieces by the laser.

"Do not surrender!"

Soon, the thirty-one special warriors rushing down the mountain shouted and overturned the fleeing armed men.

All armed personnel, at this time, most of them have surrendered on their knees and could not afford any idea of resistance.

They looked pale, carefully looking at the dozens of drones hovering there quietly above their heads, and their hearts were scarcely imaginable.

"Look, what's that?"

Finally, among the thousands who surrendered, many had sharp eyes and saw two behemoths flying fast from afar.

Everyone looked up and was stunned. They looked at the two behemoths stupidly, and found out that they were two super air battleships.

"Oh my God, is this the strength of the military?" Someone said with a horrified expression.

"Air battleship ..."

Many people murmured and looked scared. They were really frightened, especially when they saw the 250-meter-long air-to-space battleship and the huge blue magnetic muzzle, no one could calm down.

The arrival of two super-aircraft battleships, surrounded by forty unmanned aircraft, plus dozens of unmanned aircraft here, exactly ninety unmanned aircraft, were sent out.

"Acceleration, goal, Huidong base."

On the battleship, Qin Tiange gave a command lightly, and saw that two super battleships suddenly accelerated, and dozens of fighter planes whistled away.

This time, he personally led the team to take out these new generations of warships and fighters to test and test the performance parameters of the weapons.

Originally I was thinking of finding time to test these weapons and equipment. Now that I'm fine, someone will come to your door and naturally I won't miss it.

It didn't take long for a sudden roar of noise over the base of Huidong, and hundreds of thousands of survivors in the base were alarmed.

In particular, the other two major forces in the base dispatched one after another, and the armed men turned wildly, looking at the two huge warships that were constantly approaching the base.

"What's going on, where are the unknown forces?"

"No, that's the strength of the military."

"Oh my God, will the military destroy us?"

For a while, the whole base was in a mess, and hundreds of thousands of people were upset because some of them were the clearest, and some of them were just those who had just fled from there.

Seeing the arrival of the two air battleships at this time, they were stunned immediately, and the drones were enough for them to drink a pot. Now there are two more air battleships, are they not going to die?

In fact, seriously, the power of those laser guns equipped with unmanned fighters is only four stars, which means that only five stars can actually resist.

But unfortunately, the fear in these people was too much, and when they saw the four-star star being broken by a swarm of laser cannons, the fear was naturally forgotten.

"Fire, fire!"

In the gathering place, a loud whistle came, and the two major powers there directly began to order a counterattack, regardless of whether the military forces were there.

Dozens of guns roared at the air battleships in the sky and looked extremely spectacular, but those shells hit a layer of electromagnetic aperture and exploded, dissipating into fireworks.

The two warships were unscathed and surrounded by a layer of electromagnetic aperture, which is the latest development of the electromagnetic energy compression protection ring.

boom!

At this moment, a huge beam of light screamed from a battleship, and it slammed into the base. There were dozens of various artillery and even anti-aircraft weapons. As a result, the second gun was fired. The electromagnetic light beam was pulverized into powder one after another, and even a huge trench was plowed, which exploded a deep pit of tens of meters.

The people there did not respond at all and were blown into the air. For a time, everyone in the entire gathering was frightened and frightened.

Immediately afterwards, another huge beam of light whistled and bombarded some area of the gathering place, blasting tens of thousands of armed men gathered there.

The screams awakened countless people, looked up, and the two billows of smoke spread out into the air, and the powerful waves pushed countless people.

Grunt!

In the base, countless people got up, swallowed hard, horrified, and were frightened by these two beams of light. Many people were terrified inside.

**“Blatantly attacking soldiers and undermining the military’s official affairs, all armed men immediately disarmed and surrendered, under inspection, the rebels must be killed!”**

At the time when hundreds of thousands of people in the base were panicking a sentence was uploaded from a warship and spread throughout the gathering place, and everyone heard it.

**“Damn, who got the military?”**

In the gathering place, a young strong man was gloomy and incomparably iron. He was shocked when he looked at the two huge air battleships.

Unexpectedly, the Huaxia military has such strength after the last days, it is simply incredible. In this way, who dares to resist?

Regardless of whether these unmanned fighters can destroy this base, first of all, the dozens of laser turrets on the two aerial warships are enough to scare them, not to mention the two super electromagnetic energy cannons. Just now the two cannons directly crushed hundreds The artillery bombarded even tens of thousands of armed men who had gathered.

**“We surrender!”**

Finally, under the pressure of powerful force, a large gathering place of hundreds of thousands of people, three seven-star strongmen, countless intensifiers, surrendered by the powerful force of two air warships and dozens of unmanned aircraft. , Dare not rise to the slightest confrontation.

This is completely crushing, and this is the real deterrence of force.

Chapter 499 - Distress signal from overseas

Hundreds of thousands of survivors gathered at the base and stared at the two huge aerial battleships that landed in the sky.

I saw a group of generals coming down from the battleship. A young general, headed by him, followed by a group of powerful generals.

These people are the combat captains of the two battleships and the fleet guards. The weakest guard has a five-star rating, and they are all up and running.

On each battleship, there are a thousand intensifiers as guards, all super soldiers who have taken super genetic modification.

All of them are super soldiers, each with a minimum of five stars, with a strength of between 500 and 1,000, and the entire base also has 3,000 such super soldiers.

The captains of the two warships have reached a six-star strength and are about to break through the seven-star level. This is enough to serve as the \*\*\*\*\* force of two air and space warships.

As for the captain, he is actually the commander of the warship. The strength is not very strong, but he has the technology and capabilities in this area.

**“You are the person in charge of this gathering place?”**

Qin Tiange came to the crowd and looked at the two people standing in front of him, all of his weapons and equipment were taken up.

Both were seven-star powerhouses. They were the most powerful people in the gathering place. The Zheng Hu who was killed by the laser cannon before was just the head of the tripartite forces.

These three men controlled the base. Originally, Qin Tiange had no time to pay attention to these gathering places, but he did not expect Zheng Hu to bring people directly to surround the special task force he sent to perform the task.

This gave him an excuse, and the two major forces in the gathering place just opened fire on them, and it was a self-death.

“Yes, we are the people in charge of this gathering place.” One of the youths said with a somber expression, looking at the super soldiers with only two thousand in front of him, but feeling a death pressure.

As a seven-star powerhouse, he knows best that these two thousand people can absolutely crush the 20,000 intensive force on their side.

It's not a joke. Just in terms of equipment, they can't compare. Armor and weapons made of super ice crystals and special metals, plus each soldier is a five-star super soldier.

These forces can't crush them, then Qin Tiange really needs to consider substitutions.

Soldiers who have taken the super genetic serum are as frightening as super zombies, and their lethality is extremely scary.

“Take the main staff to investigate, and the rest, waiting for the next arrangement.” Qin Tiange did not say nonsense, directly letting the two seven-star powerhouses be taken away, as well as some of the powerful men of the two were in charge. take away.

When it comes to investigating, in fact, people with good eyes can see it. These people are not expected to end well. Who made them attack the military?

Just now, everyone saw the scene where hundreds of artillery bombarded the air battleship. This time, the opponent was crushed by the other side in turn.

“No, I don't agree. You are good soldiers, but you can't just grab me at random.” The young man yelled and was taken away in disapproval.

His breath broke out, and he was about to rebel. As a result, a six-star special task force captain near Qin Tiange stepped forward and punched him.

boom!

The seven-star young strong man counterattacked, and the force was overbearing. After a few moves, he couldn't reach the six-star special captain's onslaught. An accidental back heart was hit by a fist, and the whole was beaten to the ground.

“You ... you ... actually killed ...” The seven-star young strong man looked up, struggling, opened his mouth to say this sentence, and ended his breath before speaking.

His back heart was punctured, and his heart burst long ago. If it was not the strong vitality of the seven stars, he would have maintained a little vitality, and he would not have had a chance to say it.

“Take it away, the investigation is clear, and you have dealt with the incident directly according to the regulations, and let it go without any problems.” Qin Tiange waved his hand, and a group of super soldiers stepped forward to take away all the main characters for investigation.

As for the last seven-star powerhouse, he didn’t dare to move. Looking at the dead youth, he felt a bit bitter and frustrated.

King Shan is not so easy to do, and it’s a dead end to follow the military bar, now this is the end.

A large number of strong men in the gathering place were taken away. They were all the top group in the gathering place, and all were taken away for investigation.

The resistance was the end of the seven-star youth. No one dared to resist. As for the other hundreds of thousands of survivors, someone else would come to arrange it.

Seeing the end of these people, more than 300,000 survivors were collectively silent, and then suddenly realized that even in the end, the national military was still not able to shake them.

Don’t think that the end will be able to do whatever you want, and you will not look at the military. You must think that the army will always be an elite selected from countless people.

Doomsday, ordinary people can get evolution, as a huge war machine, can’t they evolve?

“The others are gone. Wait patiently here. Then troops will come to pick you up.”

Qin Tiange turned and walked away. He came here this time to test the performance of the new weapons and equipment. Otherwise, a gathering place of 300,000 people would not need him to come.

“Yanji, whether the parameters of warships and fighters are normal or not, make a record, and then go to Huicheng Center and use the zombies there as experimental subjects to continue the actual test.”

On the battleship, a shadow of his own self emerged, and said earnestly: “The master is assured that all weapon parameters and performance data are all qualified without any problems.”

“But the master, the power of the electromagnetic energy gun we independently developed seems to be much stronger, which always feels strange.” Ji Ji raised this question.

Soon, she compared the large electromagnetic energy gun that Qin Tiange had previously won with the large electromagnetic guns equipped on the two battleships, and found that the power of independent research and development was even stronger.

Qin Tiange was also surprised, and secretly said, “Will it be possible to develop weapons and equipment developed by yourself that are stronger than the ones you exchanged?”

He didn’t believe this very much, because the current technology of the base is not enough to surpass those making crafts of inheriting the stele, or it is originally something in the stele.

The only explanation is that the large electromagnetic gun he obtained is actually a defective product, but this is no longer important.

“Send someone to take these survivors back to the base, check them one by one, register them, and look at yourself. If someone is in trouble, send someone to arrest and investigate immediately.”

On the battleship, Qin Tiange watched more than 300,000 survivors in the base, all whispering, watching two super-large air warships here, and nearly one hundred unmanned warplanes.

These are the details of Qin Tiange’s current base, which debuted for the first time, of course, not for the entire Huaxia debut.

“Understand …” Ji Ji answered, suddenly solemnly: “Master, these super soldiers are strong, but they have a fatal flaw.”

After hearing Jiji’s words, Qin Tiange frowned secretly and asked, “What is the fatal flaw you said, why didn’t you tell me earlier?”

He looked a little bad, Super Soldier, but he thought for a long time and thought for a long time before he decided to cultivate.

Unexpectedly, now that Jiji has told him that there are fatal flaws, this can irritate Qin Tiange. Don’t say earlier, is it interesting to say now?

I have seen him look bad, and carefully said: “Master, the fatal flaw I said is that according to the comparison of the grade information you said, and the analysis of the data and information from their growth, they will only stop at nine stars in the future. Up to ten stars, if you want to become a stronger player, you must develop a new super gene bloody. “

“Otherwise, nine-star or ten-star is their future limit, until they die.” Xi Ji said with a serious face.

After hearing what she said, Qin Tiange was relieved and thought it was a fatal flaw, but this was the only limitation.

For him, it is not unbreakable, as long as a stronger super \*\*\*\* gene can be developed in the future, it will be enough to break this restriction.

“Tell Li Jiajia, she will give her the task of researching the next stage of the super serum, and you will be on the side.” Qin Tiange said flatly.

Suddenly his eyes flickered, and the data flashed, surprised: “Master, the nanosatellite suddenly captured a group of distress signals from outside China. Are they connected?”

Hearing this, Qin Tiange froze and wondered, “What signal for help can connect to our nanosatellite?”

“No master,” Fu Ji directly denied, explaining: “Now there is no force in the world that can actively connect and discover our nanosatellites. Unless we connect them ourselves, it is impossible without our own consent.”

“The signal for help you said?” Qin Tiange secretly wondered.

I saw my own explanation: “It was a nano satellite that suddenly intercepted an incomplete satellite communication signal hovering between space orbits. It was disorderly, and it was an uninterrupted short-wave distress signal.”

Qin Tiange understands, maybe someone uses the special frequency signal of the satellite want to pass the distress signal, but the satellites are gone after the end, so the signal can't be transmitted naturally. Now it's different with an additional nano satellite .

It was this small segment of satellite signal that was intercepted by the nanosatellite and then read out by myself.

“Where exactly is the signal source coming from?”

Qin Tiange was curious. Who sent the short-wave frequency signal and wanted to ask for help?

Xun Ji waved his hand gently, mobilized the nanosatellite to lock a position, and drawn a circle according to the contrast of the world map.

“Taikoo?” Seeing that signal location, Qin Tiange froze, but did not expect it would be Taigu.

He frowned slightly: “Hey, nano-satellite locks this signal source. Let me see who sent the short-wave for help?”

“Yes, master!”

Fang Ji immediately mobilized the nano-satellite, implemented the position lock, and finally gradually zoomed in. The position of the signal source was detected and displayed on the screen.

Chapter 500 - Day penalty plan

Taigu Manchester City, the Chinese base, is a large gathering place formed by hundreds of thousands of overseas Chinese in the post-apocalypse.

“Ambassador Wu, just stop. I said it's been more than a year ago. Even if you send more signals, the motherland will not receive it. Even if you receive it, you will not be able to send someone to save us .. . “

“Yeah, it's been over a year since the last day, let alone Taigu. I think even China's interior is chaotic. It's hard to protect itself. How can we control us?”

In the middle of the base, on a high platform, a middle-aged person is holding a satellite communicator and is constantly sending secret shortwaves.

He is the Chinese ambassador to Taiguo. After the end of the day, he launched emergency measures and gathered a large number of overseas Chinese compatriots to jointly fight the doomsday calamity, thus forming this huge base.

However, their situation is not good. It is not only the threat from zombies. The tide of corpse attacks is not much. The key is the exclusion of the local forces in Tai Kingdom, which makes them in a dangerous situation.

Food is scarce and hundreds of thousands of people have become a problem. The only way to do this is to hunt down mutants.

Persuading several people nearby, the Ambassador Wu never wavered, sending satellite shortwaves for help.

“You don’t understand. All the shortwaves I sent before were empty numbers, and the display could not be transmitted to the satellite at all, but I suddenly discovered that these shortwaves were received two days ago.”

Ambassador Wu looked excited, he raised his eyes and said, “I believe that some satellites have received my satellites. If the domestic situation allows, we may be able to get assistance or even rescue from the motherland.”

“Don’t be stupid, even if it’s rescue, how do you come to rescue?” A young man looked disdainful and extremely disdainful.

He is a six-star intensifier and one of the best in this base. He has been disgusted with his Chinese identity since the last days.

He even cancelled his Chinese surname, directly changed the surname of a certain ethnic group in Taiguo, and joined Taiguo nationality.

Just listen to him mockingly: “Do you think Huaxia fighters can come here to pick us up? Or is Huaxia’s only aircraft carrier formation able to pick us up?”

“Li Qing, can you say a few more sentences?” A strong man, who is also a six-star, said unhappily.

He looks thirty-two years old, has a mature and stable temperament, and scolded: “Everyone is a Chinese and you speak a little too much to the ambassador.”

“Fart, I’m not Li Qing, I’m Song Mu Diqing, and I’ll first declare that I’m not a Chinese, but an authentic Thai person. It’s not better to tell you to change the court. It’s not better to join the country directly. It made us excluded from the Manchester City base. “The young man named Li Qing retorted seriously.

His words attracted a lot of people’s anger and anger, and this kind of remarks against him were really frustrated. It is a shame for the Chinese people to have such people.

“Those who have forgotten their ancestors, do you like to lick the toes of foreigners so much?” Someone looked at them and snapped.

As a result, Li Qing turned somber and turned around, and suddenly a scream came from the crowd, and he saw a person lying on the ground, and his entire face was trampled in the mud.

“Trash, how dare you say that to me, you inferior thing, the two-star star dare to challenge me with the six-star super master? Are you tired?” Li Qing’s words were cold and murderous.

Just as he was about to step on the man with one foot, over there, the six-star star next to Ambassador Wu came forward, staring at him with a complexion.

“Li Qing, do you know what you are doing?” The man was full of breath, and was really offended by Li Qing’s approach.

Not only him, but Ambassador Wu, was provoked, came forward, and said coldly: “Li Qing, calm down. Treating fellow citizens in this way will only let outsiders see jokes.”

“Who is a compatriot with you?” Li Qing dismissed, glanced at the man who was stepping on his feet, and hummed coldly: “I’ll spare you for a while, and say one more thing about the inferior thing I step on.”

“Everyone listen, only if you give up your original identity, lose your Chinese nationality, and join the Tai Kingdom to get the assistance from Manchester City Base, or you will all be starved to death sooner or later.”

Li Qing’s words caused a great response. The Chinese survivors from many overseas bases in some bases looked a little ugly, but some people were very moved.

I saw, Li Qing said with a smile: “If you want to follow me, you can come to me. I will take you to Manchester City base, where there is plenty of food, and there is a strong military guard. Just give up your original nationality.”

“Li Qing, do you know what you are talking about?”

“Jack!”

Ambassador Wu and even other knowledgeable people were angry. They were extremely angry at these rumbling words of Li Qing. No one expected that he would break up internally.

This is to bring down this overseas Chinese base of Chinese people, and even directly ask other Chinese people to give up their Chinese identity and forget their ancestors.

“Did I make a mistake?” Li Qing looked arrogant and hummed: “Look at you, here you are just waiting to die, look at my current identity, I am now the captain of the Manchester United Defense Forces, yes Major-General of the Thai Army. “

Listening to his enthusiasm, the more and more outrageous the words were, the more tempting words made a lot of people’s hearts, staying here without food waiting to die, and facing the tide of attacks again and again.

This dark life has exhausted many survivors and even caused disgust, which directly gave birth to the desire to change the court.

If they are in Huaxia, naturally they do not have such an idea, but they are in a foreign country, and when they encounter such a doomsday, they naturally think that the hope of returning to China is slim.

**“Compatriots overseas?”**

On the battleship, Qin Tiange looked at the screen monitored by Jiji. The situation in the base shown above was clear, that is, Li Qing’s words, and his voice was released through Jiji’s technical processing.

Nano-satellites have already been able to do this. It is considered to be the most powerful cutting-edge technology in the base. Tianyan is not for fun.

Qin Tiange looked at Li Qing’s rumbling on the screen, and a icy expression appeared in his eyes. He hummed, “This kind of betrayal of the ancestors and forgotten ancestors, even if they were to encourage others to rebel against their own ethnic group and country, it was a betrayal.”

He looked at the picture in front of him and thought about another problem. He suddenly said: “Sir, now we have the Sky Eye monitoring system, but we do n’t have the corresponding means to deal with Sky Penalty. With Sky Eye, we should have Sky Penalty Strike. system.”

**“Day punishment system?”** Ji Ji muttered in surprise, comprehending Qin Tiange’s meaning.

What he meant was that if there is a sky eye to monitor the world, then there must also be a sky penalty to hit all enemies and targets worldwide.

This is a plan that Qin Tiange designed long ago, but it was not proposed. Now that I have seen the situation of overseas monitoring pictures, I have a plan to set up a day penalty system in advance.

**“The number of nano-satellites is temporarily set at nine. The next plan is to open the Sky Penalty weapon system and prepare to develop a series of Sky Penalty weapons.”** Qin Tiange immediately made a decision and issued an order.

Soon, Jiji passed the order to the base’s science and technology department, and all science and technology personnel received the new order.

**“Start the development and production of the space penalty series of space weapons?”**

After receiving the order, Mr. Wu froze for a moment, then came to understand that this was Qin Tiange’s intention to cooperate with the Tianyan monitoring system to form a space orbital strike weapon system.

Qin Tiange walked back and forth a few steps, and then ordered: “Say yourself, start a space-based weapon design plan, conceive a space station construction plan, a weapon platform structure design plan, and together form our sky penalty system.”

**“Understood, my master!”** Ji Ji carefully wrote down and assigned a subsystem to quickly assign calculations, and worked with the staff of the Ministry of

Science and Technology to study and design a plan for a natural penalty weapon.

After doing this, Qin Tiange looked at the satellite monitoring picture. Li Qing continued to clamor for the Chinese to forget their ancestors, which made him feel a bit cold.

“Look at the master, there are a lot of zombie tides appearing within ten kilometers of this base. The target is exactly this base.” Su Ji suddenly called up another picture.

Above, the dense crowd of zombies formed a tide that generally rushed towards this overseas Chinese base, and it was in all directions, and the situation was a bit critical.

“The tide is coming, the tide is coming!”

At the same time, the people in that base have found the tide of the corpse, the entire base is boiling, countless people are angry and panic is spreading.

The tide of corpses time and time again, I don’t know how many people will die, I don’t know if I can survive this corpse tide, anyway, their group of Chinese people wandering in a foreign country is not guaranteed.

“Have you heard? The tide is coming again, do you still want to wait for death here?” Li Qing shouted in a timely manner.

Finally, the six-star middle-aged strong man couldn’t help but yelled: “Li Qing, you are too much.”

“It’s your shit!” The two are head-to-head seeing to fight.

Ambassador Wu couldn’t stand it, and shouted, “What do you two want to do? Give me a break. The corpse tide is coming. Do you want to be instigated at this time?”

When Qin Tiange saw this, he hummed softly: “Because of the ancestors who forgot their ancestors, sacrifice themselves, they sent thirty unmanned fighters to the front to reach this overseas base at the fastest speed, and at the same time, ordered the first city defense group of the base to gather Follow me overseas for support. “

“Understand!” I commanded, quickly conveying orders.

However, Qin Tiange thought for a while, and suddenly said, “Yi Ji, I am going to connect all the personal terminals that have been purchased or injected and installed, and I will broadcast the live city record of this operation as much as possible. I want you to live broadcast . “

“And connect me to Beijing. I want to talk to the leader and do some pre-war work reports.”

Qin Tiange sat there, squinting his eyes and thinking continuously, ordering his own leader to connect with Beijing leader Chen Guodong. He had some plans to implement. This was a good opportunity to gather people’s hearts, show force, and deter all parties.
