

Dark Ages 50

Chapter 50 - Brain Domain Development Pharmacy

A piece of old paper, with the breath of ancient vicissitudes, gives a very simple temperament, with a mysterious atmosphere, some notes are recorded on it.

“What is this?” Qin Tiange was curious.

Looking up, I saw the ancient leather roll, which recorded the message: “The development of the brain domain can open up the biological brain as much as possible and gain incredible power.”

“Brain Domain Development?”

When I saw this passage, Qin Tiange’s face turned wild, and his heart was like a stormy sea. The shock was so great that it turned out to be a piece of information about brain domain development.

He was terrified, looked carefully and seriously, and soon discovered the mystery of the information recorded in it.

It turned out that on this ancient skin, there was a piece of information about the development of medicine in the brain domain. This is a recipe for the medicine in the brain domain.

Murmur!

Qin Tiange could not help but swallowed a spit, his eyebrows trembled, and the corners of his mouth were twitching. Obviously at this moment, he was quite excited and couldn’t even suppress the excitement.

Good things, absolutely good things, priceless treasure!

This brain domain develops a pharmaceutical formula that tells how to configure and extract this magical medicament, and even records detailed steps, which is definitely a priceless treasure.

What is brain domain development? The human science community generally believes that the human brain development rate is less than 10%, and the highest development rumor is that Einstein and other super scientists have developed the brain domain to 10%. I don’t know if it is correct.

But it is enough to prove that the development of brain domain is definitely one of the most mysterious evolution of human beings and even living beings. There is such a formula for brain domain development medicine right now. Can Qin Tiange be excited?

This recipe lists the one-to-ten-star brain-domain development medicament production scheme, which is extremely detailed and truly a priceless treasure.

With this thing, Qin Tiange must be able to rely on the pharmacist’s inherited knowledge and add this pharmaceutical formula to formulate a brain domain to develop a pharmaceutical to develop his own brain.

Once the human brain is developed, what will it be like? Some people say that as long as the human brain is 100% developed, then this person is an out-of-the-box god.

In the previous life, the humans with the highest brain domain development were the three first emperor-level powerhouses. It is rumored that their brain domain development reached an astonishing 30%, with incredible power.

“Good stuff, good stuff!” Qin Tiange was so excited that he couldn’t help himself, and said unceasingly, “With this thing, I can definitely formulate a powerful brain-domain development potion.”

He discovered that one-star can develop 10% of human brain domains, and ten-star brain-development agents can theoretically develop 50% of brains. As long as a ten-star brain domain develops a medicament, it can immediately develop fifty percent of the brain.

How terrible is that? Not to mention ten stars, as long as this one-star potion is developed, everyone will definitely transform into a human being like Einstein immediately after drinking this potion.

Terror and scary!

If human beings really become as intelligent as Einstein one by one, how terrible is the whole human being as a whole? Just thinking about Qin Tiange himself felt terrified and could not help fighting a cold war.

Is this idea good? All humans have become as smart as Einstein, so what’s okay? However, the development of brain domain is a trend of future evolution. The inevitable result is that blocking is irresistible.

Then, only by advancing yourself and having more powerful forces can you survive in the big age and ensure your status and security.

Qin Tiange’s mind turned sharply, and he immediately knew the advantages and disadvantages. For the time being, this thing could not be revealed, otherwise it would cause endless trouble.

“Keep this recipe in mind ...” Soon, Qin Tiange remembered this priceless recipe seriously.

When he was born again in the previous life, his memory was very good, and it didn’t take long to remember this crazy formula of medicine.

I don’t know if it is an illusion. Qin Tiange suddenly felt that his thinking and consciousness seemed more agile. Perhaps it was because the pharmacist inherited the crystal, that thing was not just as simple as inheriting knowledge, it was also possible that he had developed his brain domain.

Regardless of this, Qin Tiange remembered all the knowledge and formulas for the development of medicaments in the brain domain, and immediately hid them carefully and put them in the corner of the space bracelet.

He worked hard to calm the boiling mood at the moment, calmed down for two minutes, and checked the number of crystal nuclei remaining on his body.

“There are still more than 10,000 brain crystals, and it took more than 20,000 crystal nuclei?” Qin Tiange was shocked and felt incredible about the consumption of his lottery.

I never thought that it would cost so much at a glance. There are more than 10,000 brain crystals left, but fortunately, the harvest is huge, otherwise the loss will be great.

Packed up, Qin Tiange continued a new round of lottery, which is a matter of luck. When you have good luck, you have good things, but if you have bad luck, you probably have nothing.

He didn't want to wait until he was lucky to draw a lottery, but luck is invisible and inaccessible, and, after today, this heritage stone disappeared.

I want to draw again next time, it is estimated that it will wait a month later.

Raffle, raffle, raffle!

Qin Tiange was crazy. Seeing that the sky was getting darker and darker, he had to draw crazy. Extracting the illusory fortune again and again, disappointed and angry again and again, the nucleus of the body was consumed at a rate visible to the naked eye.

“empty...”

“A plasma bomb? Not bad, good stuff.”

“Two-star electromagnetic light blade? Good thing!” Qin Tiange looked excitedly, looked at a metal handle that was pulled out, turned on the switch on the handle, and a hot electromagnetic light blade suddenly popped up.

This is an electromagnetic light blade, two-star level, cut iron like mud, needless to say This thing is absolutely terrible and terrifying war blade, can cut any two-star creatures and even break Samsung saint defense.

When excited, Qin Tiange continued to draw wildly, and was disappointed again and again, sometimes he got good things, such as white phosphorus bombs, and some very garbage, such as steel knives, very ordinary.

I watched what he pulled out, and he couldn't help dropping blood, and spent thousands of brain crystals, seeing that his inventory was consumed.

However, he can't take it anymore, because the time is up today, and he won't have to wait a month later if he doesn't need to, what time is it?

Qin Tiange smashed a lot of crystal nuclei madly, drawing prizes again and again, looking forward to getting a lucky favor and drawing a good thing.

It's a pity that until he got to the end and only 103 brain crystals were left on his body, he still didn't see any good things, either empty or garbage, and nothing that satisfied him at all.

“Last time!”

Qi Qin Tiange looked stiff, stretched out his hands and rubbed his face, took a deep breath, and gradually calmed down.

This is the last time. If there isn't, then we can only regret it. We will draw the prize when the next inheritance stele appears again.

“Start!”

Qi Qin Tiange threw out the last hundred crystal nuclei and started the last lottery. This time, it was really the last time. Only three crystal nuclei were left on his body.

With the square wheel roulette turning quickly, I don't know when to stop by myself, Qin Tiange's whole heart lifted up.

Ding ... click!

The black box slowly opened, and the slightest smoke erupted, revealing the internal conditions.

Qi Qin Tiange held back his heartbeat and looked at the completely opened black box. When he saw what was inside, he completely choked.
