

Dark Ages 97

Chapter 97 - military helicopter

Buzz buzz ...

Yuan Yuankong, a huge shock came, which caused a lot of repercussions. Many zombies on the ground were alarmed, one by one instinctively looking up at the sky.

Here, on the top floor of the Weiner Hotel, Qin Tiange hurried to the edge of the top floor with the boy and looked at the direction of the sound.

“Brother Qin, we found three gunships and are heading here.”

Moda looked serious, handed the telescope over, and told the discovery that three armed helicopters were flying in the distance.

I heard Qin Tiange was surprised when he heard the news. He even encountered three armed helicopters, and it was really surprising.

I picked up the telescope, Qin Tiange saw three black spots on the distant sky. In fact, he could see without a telescope with his eyesight, but the telescope could increase his range of sight.

Sure enough, he saw three gunship helicopters, all painted with camouflage paint, showing a zigzag shape, driving in this direction, not fast or slow.

Wu Qin Tiange also saw that each armed helicopter was hung with a small missile, which was a new type of air-to-air missile of the Tianyan type, and one was hung with ten.

“Wang Feng, let’s take a look, which part of the armed helicopter is this?” Qin Tiange lowered his telescope and asked two young soldiers Wang Feng who came to the side.

The two came forward, looked with a telescope, a flash of surprise flashed on their faces, and then looked slightly agitated, and naturally knew what kind of helicopter the army belonged to.

“That is a special helicopter for armed special police.” Wang Feng directly confirmed.

His comrades nodded in the same way, affirming, “Yes, that’s the special-purpose anti-terrorist armed helicopter used for special tasks.”

Qin Tiange actually had speculations. It was more certain to hear the two of them. It should be the Shenzhen Special Police Corps out to perform the task.

However, I just don’t know what the mission of these three helicopter gunships is, is it to save people or something else? From Qin Tiange’s point of view, saving people is impossible, and it is likely to be other tasks.

Buzz buzz ...

Soon, three gunships appeared, and the loud noise caused a slight commotion in the zombies on the ground, roaring fiercely.

Looking at the three armed helicopters approaching, Qin Tiange thought in his mind, secretly: "If I have such an armed helicopter now, it would be more convenient."

The idea is very good, but unfortunately it is unrealistic and even more impossible. As for robbing? Just kidding, although Qin Tiange is not a good person, he will definitely not confront the national army at this time.

Moreover, it is impossible for the other party to attack them, and it is a fool's act to proactively provoke the military forces. Even, he still needs to rely on the strength of the military to survive and continue to grow his team.

"They're here ..." Moda and others looked nervous and excited.

I was nervous because it was not clear who the people on the three helicopter gunships were, or who they were, would they be arrested, in fact they were worried that they were superfluous.

Now it's the end of the day, the country and the military have already taken care of themselves. Where can I have the mood to manage others?

"Captain, find out!"

At this time, someone found the situation on the top floor of the hotel on the helicopter and immediately reported the situation through the intercom.

They also found Qin Tiange and others on the top floor of the hotel, a lot of them, attracted the attention of these three helicopters and immediately paid attention.

"The number of survivors found is unknown. It is estimated that there can be one or two hundred people."

On the helicopter, a female special police officer observed with a sniper rifle and saw Qin Tiange's group of people on the top floor and immediately reported in detail.

Twenty-three helicopter gunships have a special police unit with 33 people and three snipers. They are watching the three helicopters with sniper rifles.

The helicopter slowly pulled up and suddenly circled around the Wiener Hotel. The loud noise made Moda and others nervous and vigilant.

Especially when they saw the missiles hanging on the helicopter, they had some drumming in their hearts. Wouldn't there be several missiles to shoot them suddenly?

At the scene, the only thing I didn't worry about was Qin Tiange himself. With no expression on his face, he looked at the three helicopters flying around the top floor of the hotel. He didn't know what he was thinking.

In fact, he was sneering in his heart and secretly said, "Better don't rust your brain and attack us, then I will have an excuse to grab the helicopter."

If the special police team on the opposite side knew his thoughts, he must have come to try a few sniper bullets, and even tried two missiles, even thinking of stealing their helicopter?

I also dare to think about it, but it also depends on the actions of the other party. If it is really against him, Qin Tiange does not care who you are and threatens his life, then he will do it all.

“Captain, do we want to distribute leaflets?”

After a while on the helicopter, after observing for a while, a young male special police officer asked. In fact, they were upset when they saw Qin Tiange and others gathered on the top of the building, setting up strange steel shields and carrying steel knives one by one.

Yes, I ’m very upset. They are special police. This group of people are alert and alert to them, as if they are preparing for the enemy. Can they feel good?

“This group of people is definitely not a good thing. The end is coming, the country is suffering a lot, and they are turned upside down, one by one, they have become unforgiving, as if they were all beasts in human skin.”

A special policewoman looked at the crowd on the top of the building in disgust, and her face of resentment must have encountered bad things, so she thought so.

For the thoughts and thoughts of these players, the captain is the most serious, but the middle-aged captain looks serious, staring at the maverick in the crowd on the top of the building.

The young man looked like the leader of this group of people. With his calm expression, there was no slight surprise or strange light in his eyes, as if he was not seeing a helicopter gunship, but something ordinary.

“This group of people is not simple.” This is his direct feeling at the moment, the group of people is not simple.

He always felt that if they landed like this, they would likely fall into a passive state and not even be able to control the audience. It just made him unbelievable A group of ordinary people would bring him a kind of Feeling threatened by the strong enemy, he was vigilant, and seriously looked at the group, especially Qin Tiange, the young man.

“Fly over and sprinkle the flyer.”

Finally, the captain ordered the three helicopters to fly over immediately. One of them rose, pulled away, and locked this side by a long distance.

The remaining two helicopters flew fast, passing over everyone’s head, only to see the cabin door open, and spilling sky-paper from the two helicopters.

“What’s this?” Liu Ye reached out to catch a piece of paper falling down, and looked down curiously.

Qi Qin Tiange grabbed one, read it, printed a few lines on it, and some introductions.

“A security zone established in the Shenzhen City Security Zone?” Qin Tiange muttered. The above description is the security zone established by the military police in the Shenzhen City Security Zone. There are specific routes above, calling on survivors to gather there.

This leaflet also lists some benefits. For example, as long as the survivors are there, they can receive some basic rations for free, which is good.

Qin Tiange remembers the previous Shenzhen City Police District. At the beginning, it really established a protective area, gathering a large number of survivors to resist the doomsday zombies and countless mutant creatures.

“Look, helicopter, really a gunship!”

“It’s the government that sent the army to save us!”

When he heard the movement, Qin Tiange frowned slightly, turned around and saw that a large group of people rushed to the top floor and looked at the three armed helicopters hovering above them. They looked excited and shouted, looking extremely excited.

When I saw the gunship at first glance, these people thought that the government had sent them to rescue them. Unfortunately, these people were disappointed.
