

Devil World 531

Chapter 531 – Railroad!

“Anything else?” Yue Zhong kept the vial in his storage ring, before asking Ou Ming. He was very certain that this genius in front of him had more surprises in store.

Ou Ming revealed a proud smile as he handed a green vial: “This is my new creation: the Ou Ming Ver. 3 Evolving Liquid. Administering this will cause a normal person to instantly become an Evolver. The main component is still the Snake Birth Fruit, but one single pink fruit mixed with other Mutant Plants’ sap can produce 20 such vials.

“Amazing!!” When Yue Zhong heard Ou Ming’s words, his eyes lit up and he could not help but praise Ou Ming.

Yue Zhong had established communications with Long Hai City for some time. When he left, the Snake Birth Fruit Tree had been consuming a large number of zombie corpses, and plenty flowers had already born fruit. Over a hundred green Snake Birth Fruits had also mutated to the pink variant.

The impact of this Ver 3 Evolving Liquid would play a huge part in strengthening the troops. As long as Yue Zhong could transport the 100 pink fruits over, there would be 2,000 such vials, allowing 2,000 people to become Evolvers.

Evolvers were not invincible, but compared to Enhancers, they had large advantages. Many Enhancers hoped to become Evolvers.

Ou Ming continued excitedly: “Furthermore, I’ve discovered that if a naturally awakened Evolver were to consume the Snake Birth Fruit, it would awaken a 2nd evolved attribute, gaining a huge boost. Naturally awakened Evolvers are truly the favored of the heavens.”

“Oh!” Yue Zhong’s heart skipped a beat. If this was the case, then he could make use of the fruit to give rise to more dual-attribute Evolvers.

The occurrence of natural Evolvers was extremely rare, a mere 1 in 10,000. Even Yue Zhong was not a natural Evolver. Those who awakened naturally were truly favored by the heavens and they would become good at what they do easily. They also had more potential to evolve compared to others.

Ou Ming took out a gold case and handed it to Yue Zhong: “These are 500 vials of the Ver 3. Enough to produce 500 Evolvers.

This time, when Ji Qing Wu and her party came, they had brought 25 Snake Birth Fruits, fully utilized in Ou Ming’s research. In the end, he produced 500 such vials.

Yue Zhong’s mood was greatly elevated, and he viewed Ou Ming more favorably: “Great! Ou Ming, you have done well this time. What would you like?”

Ou Ming’s face flashed with a feverish passion: “I need the corpse of a Type 3 Mutant Beast, fresh blood, blood essence, brains. The bodies of those new L4s, L3s, and Devourers as well. The best would be to include new or recent samples of any Mutant Plants, for our lab to have priority over them.

Since Yue Zhong had established 3 major bases, he naturally had research labs in all 3 as well. Each of these labs was running their own research into the Mutant Plants, Mutant Beasts, and zombies. Ou Ming was expressly requesting for first priority over the samples.

Yue Zhong nodded and promised: "Fine!"

Ou Ming had shown ample results to Yue Zhong, he naturally would adhere to this talent's requests.

Ou Ming regained his calm and waved Yue Zhong away somewhat impatiently: "Alright! You can go now. I still have experiments to get back to."

Yue Zhong was speechless towards Ou Ming's attitude. As the leader of Gui Ning City, Yan Zhou, and Bin Qi City, many people would clamor to speak to him. Ou Ming was actually disinterested. He was not to be blamed anyway since he was like this from the start.

Before the apocalypse, people of the research world viewed their field as the utmost priority, and most were crude or blunt. If it wasn't for the right backer, even with his talents, Ou Ming might not have been able to exercise his abilities, due to his poor communication style.

Yue Zhong chuckled lightly and shook his head before leaving.

Even with the weather forecast Liu Xiao Cha, after going through intense battles, Yue Zhong's army could not afford to launch another expansion mission.

Hence, over at the Guang Xi region, Yue Zhong tried to ramp up the production of ammunition, while deploying small troops out to clear the zombies in the surrounding areas.

Yue Zhong had only managed to deal with the zombies in those 3 cities, but in truth, there were over 4 million zombies still scattered around the 3 cities in the various settlements.

At the same time, after Yue Zhong had obtained the Ver. 3 Evolving Liquid, he could focus on establishing a form of economy and currency like that of Long Hai City. A dollar would be able to exchange for 1 jin of maize. Since he had conquered the 3 cities, Yue Zhong had obtained a huge amount of resources. He could take them out to sell, and drive the economy again.

Killing an ordinary zombie and bringing the corpse back to exchange gets one 1 dollar. Killing a Type 1 zombie would net 50 dollars. Type 2 zombies went for 500 dollars and Type 3 zombies were at 5,000 dollars. The exchange rate for a Type 4 zombie was 50,000 dollars.

The exchange rate for nucleus went for the following: Ordinary at 10 dollars. Type 2 at 1,000 dollars, Type 3 at 100,000 dollars, Type 4 at 1 million dollars. Type 5 Nuclei were worth a 10 million dollars.

Furthermore, Ou Ming Ver. 2 and Ver. 3 Evolving Liquids and Type 3 Mutant Beasts packed into cans were put up for sale. A Ver. 2 would require 500,000 dollars, and a Ver.3 required 10 million dollars. Type 3 Mutant Beast meat went for 1 million a can.

When the survivors in Yue Zhong's cities saw the items placed for sale, everyone went crazy. A few teams were formed, intending to take risks. Many became hunters, killing zombies and Mutants Beasts in exchange for cash.

What were Evolvers after all? They were the favored of the heavens and were experts at the pinnacle. The moment one became an Evolver, as long as the person wasn't trash, and the evolved attribute wasn't weak, it would be harder for them to lose in their fights. Furthermore, the person could learn a new skill during evolution and gained a huge amount of enhancements to their constitutions. Everyone wanted to become an Evolver, transforming into the doted children of the heavens.

Under the enticement of the prices, the various hunting teams went on a rampage, clearing plenty of zombies and Mutant Beasts, bringing the corpses back. This ensured a steady stream of nuclei and corpses landing in Yue Zhong's hands.

The Central Dollars that Yue Zhong issued soon became the recognized currency that everyone used. Military and government personnel also stopped doing barter trades and began dealing in the Central Dollar.

The Guang Xi region could be said to have finally embarked on some sign of society again. The bartering stage had been popular because nobody could trust the previous forms of government until Yue Zhong came into the picture.

If it had been earlier, not many would have accepted the new currency. People would just take it as toilet paper. However, since he had already conquered 3 cities, and obtained a huge amount of resources, his reputation and prestige were at an all-time high. Coupled with the allure of the Ver. 2 and Ver. 3 Evolving Liquids as well as Type 3 Beast Meat being priced with the currency, everyone would definitely take up the currency.

There was an additional point, which was that compared to barter, the survivors were more used to having a fixed price on items. Due to circumstances, they had no choice but to barter. Who would use the useless money from prior to the apocalypse anyway?

After issuing the currency and having stabilized the situation in Guang Xi, the region began to recover swiftly. The survivors were not as hopeless as before, and their eyes were filled with an expectant look for the future.

Yue Zhong continued to be at Guang Xi for a while longer, ensuring that things were truly in order, before taking a company of elite soldiers from the 2nd Brigade as they boarded the train back to Long Hai City.

On the rail tracks, a train chugged along, within, many soldiers dressed in the [Raven] combat uniform and Type 2 Mutant Beast hides sat.

At the front carriage, Yue Zhong, Ji Qing Wu, and Yao Yao were together.

Yao Yao was holding a handheld device as she played games, while Ji Qing Wu was reading a book.

Traveling on the tracks was risky, with unknown dangers, hence the train could only proceed at 20km/hour. There was the danger of getting derailed. Furthermore, there might be Mutant Beasts and high-level zombies along the way. It was a sort of exploration for Yue Zhong, to determine the potential problems.

Yue Zhong eyed Ji Qing Wu reading her book quietly, and her quiet but elegant aura caused a stir in his heart: "If I had known, I would have brought Yu Xin out."

For safety's sake, the speed of 20km/hour was a sort of torture to people like Yue Zhong who could not sit still. Plus, there was no form of entertainment on the train, and he was regretting not bringing Xin Jia Rou or Ning Yu Xin and the rest.

Ji Qing Wu was extremely beautiful, but she and Yue Zhong had not gotten past that barrier, and he could only look at this absolute beauty in front of him but not being able to do anything.

After hesitating, Yue Zhong took the initiative to strike up a conversation: "What're you reading?"

A slight smile appeared on Ji Qing Wu's lips as she replied: "Qiong Yao's Plum Blossom Scar".

Chapter 532 – Ji Qing Wu Heavily Injured!

Yue Zhong hardened his skin and continued to chat: "Plum Blossom Scar? An interesting novel."

Truthfully, Yue Zhong had never even seen the book nor read romance novels. Compared to reading, he would rather kill zombies and Mutant Beasts.

Ji Qing Wu laughed coquettishly, as she moved her hand away from the cover, revealing the name: "I'm just kidding, it's On War."

Yue Zhong heaved a sigh of relief. He had seen the book a few times before. Like this, at least he could have some topics to talk about. If it were some romance novel, then he would be grasping at straws.

All of a sudden, the train shuddered, and the sharp sound of brakes being slammed sounded. The train came to a halt.

Yue Zhong's eyes narrowed and he shot to the front of the train.

Ji Qing Wu and Yao Yao had also moved at the first moment, following closely behind Yue Zhong.

"What happened?" Yue Zhong immediately asked when he came to the carriage.

"Leader, there's a monster in front." The driver pointed and told Yue Zhong.

In front, about 200 metres away from the tracks, there was a group of Type 2 Ferocious Apes charging over, each of them towering at 4m.

A herd of Mutant Wild Boars and Mutant Cows were being chased by the Type 2 Ferocious Apes.

As those beasts were running, the tracks beneath their feet were twisted. They could no longer support the train on its journey.

Yue Zhong watched on helplessly, and sighed: "As expected, if we want to make use of the tracks, we have to clear the entire region of beasts and zombies, otherwise it will be impossible."

The tracks were truly convenient, but likewise, they were vulnerable and susceptible to damages. Yue Zhong would have to arrange for troops to protect the tracks to ensure the continued usage.

"Get down, and get rid of them." Yue Zhong eyed those Type 2 Mutant Beasts and ordered.

Under his orders, the squad of elite soldiers immediately got off and began to launch an assault towards the Mutant Wild Boars, Mutant Cows, and Type 2 Ferocious Apes.

This squad of soldiers were already all Evolvers, and each of them were at least above Level 40. Their combat prowess was strong.

A bright flash appeared from the hands of one of the soldiers, and he waved. A huge blade made out of wind appeared and sliced through the Mutant Beast horde, before lunging for one of the Type 2 Ferocious Ape's head, slicing it off in a huge shower of blade.

One of the soldier wielded a Bronze Bow, and with a radiating light from his hands, a number of bone arrows shot towards the horde of Mutant Beasts, piercing the beasts one by one.

Another soldier grabbed his huge mace with a savage expression and charged into the midst of the Mutant Beasts. He swung wildly and pummeling the heads of the Mutant Beasts in a cruel fashion.

Ji Qing Wu and Yao Yao also shot forwards, their aim being the group of Type 2 Ferocious Apes.

This time, there were about 10 Type 2 Ferocious Apes, and to Ji Qing Wu and Yao Yao who were high level Enhancers, only these Type 2 Mutant Beasts could provide them with enough experience.

Yue Zhong stood one side and watched as his subordinates slaughtered the Mutant Beasts, without indication of lending a helping hand.

These Mutant Beasts were too low leveled, Yue Zhong would not gain anything from killing them, hence he left them for his subordinates, empowering them.

These soldiers under Yue Zhong were truly efficient killing machines, finishing off the Mutant Beasts in a matter of minutes.

At this time, a huge shadow loomed over in the sky, as a huge bird with a wingspan of over 80m suddenly soared down, making a grab for the little loli Yao Yao.

"Level 95 Mutant Beast: Type 4 Flame Bird. Tyrant of the skies, extremely ferocious and terrifying."

"Careful!" Yue Zhong shouted out and activated his Shadow Steps and charged towards Yao Yao's direction.

Yao Yao had just caught a glimpse of the massive claw of the Type 4 Flame Bird, when Ji Qing Wu beside her lashed out with a kick, sending Yao Yao flying back 7 to 8 metres away.

At the next moment, the sharp claws of the Flame Bird pierced the chest of Ji Qing Wu, even through the Type 2 Ferocious Ape she was fighting, before flying towards the sky.

Ji Qing Wu's face instantly turned pale, as she coughed up a large amount of blood. There was a huge bloody wound in her chest as well.

"Big Sis Qing Wu!!! No!!!!" Seeing this, Yao Yao who was kicked away immediately screamed out in a heart-wrenching manner. Her expressionless face was contorted in fear.

Yao Yao had grown close to only Ji Qing Wu, and because of this, she had joined the Special Forces. In times of peace, she and Ji Qing Wu were as close as actual sisters, and Ji Qing Wu herself watched over

the growth of this little girl like an elder sister. She had also unhesitatingly sent Yao Yao out of harm's way, sacrificing herself. Yao Yao was afraid that she would lose this one person that was the closest to her and the one she looked up to the most. Even Yue Zhong who saved her could only place number 2.

"AHH YOU BEAST! WHAT HAVE YOU DONE TO MY WOMAN?!!" Yue Zhong saw Ji Qing Wu pierced with the claw of the Type 4 Flame Bird and his eyes turned bloodshot as he screamed. He immediately conjured out 2 Devil Flame jets, expending 100 Spirit and 30 Stamina. The jets propelled him like a cannon towards the body of the Type 4 Flame Bird.

At almost the same instant, Yue Zhong knocked into the body of the Type 4 Flame Bird, and he grabbed onto the feathers.

The Flame Bird flapped its wings, and it soared upwards with a terrifying gust of wind. It then shot towards the distance with a Mach 2 speed, disappearing from its original spot in a flash.

"What do we do? The leader had been brought away by the Type 4 Flame Bird!" One of the elite soldiers eyed the distance and frowned.

The captain sighed: "Quickly report to headquarters."

Yao Yao looked towards the distance and the pool of blood from Ji Qing Wu and kneeled down. She began crying profusely, as the tears flowed down her cheeks: "Wait for me Big Sis, I'll definitely come and find you! I'll find you... Yue Zhong, please, please save my sister. Please save my sister. I'll listen to you in the future!"

Yue Zhong was currently atop the body of the Flame Bird, and he was blanketed by the roaring winds. Fortunately for his 10 times strength, he held on steadfastly, otherwise he would have been blown off.

"Please don't die... Please don't die!! Heavens, as long as you're listening, save Qing Wu's life, I'll build a totem for you!" Yue Zhong continued to brave the winds as he slowly climbed downwards, praying hard for the first time.

Yue Zhong never believed in gods, only in himself. Even after he heard the voice of the one claiming to be 'God' at the start of the apocalypse, he continued to only believe in himself. Regardless of the situation, he would always find a way. However, this time he was really out of options. He could only beg in his prayers, hoping for a miracle.

The Flame Bird continued to fly through the air at its Mach 2 speed, and the opposing winds were as sharp as knives. Even with Yue Zhong's constitution, he came close to being blown off a few times. If he were to fall from such a height, only death awaits.

Yue Zhong continued to brave the winds as he climbed towards the claws. He looked at Ji Qing Wu and his eyes turned red.

In front of his eyes, Ji Qing Wu's entire chest had been penetrated, and the claw had also gone through her spine.

If it wasn't for her constitution exceeding a normal person, she would have died long ago. Even so, she was on the brink of death. Her blood continued to flow from her grievous wound, and when she saw Yue Zhong, she managed to stay awake, although her consciousness was fading.

"You...should not be...here....cough..." Ji Qing Wu's eyes flashed as she looked at Yue Zhong, barely managing a sentence before she coughed out more blood.

Tears flowed down involuntarily from Yue Zhong's eyes as he shouted out with some madness: "Don't speak! Don't speak! I want you to live! You must live on, you hear me, Ji Qing Wu?! You must not die! You cannot die! I like you, I love you!! Please, live on for me!! Please!!"

Yue Zhong had never spoken those words to any woman, and in truth, when he had first seen Ji Qing Wu, he was already enraptured by this beautiful woman who was full of confidence and grace, and her charming aura when she fought. He had always kept the feeling in his heart, and the constant flow of beautiful girls who had embraced him caused him to put the feeling aside. Until today, as he watched her about to die, he couldn't hold back anymore, and the usually fearless him began to feel afraid to the point that he was crying. Any other day, it would be extremely embarrassing.

Chapter 533 – Biological Armor!

Ji Qing Wu heard Yue Zhong's confession and the corners of her mouth lifted slightly. This was what she wanted to hear the most, and it was all she needed. Her lips trembled, as though she wanted to speak.

"Don't speak!! Please, don't say anything!! Look at me! I'll definitely save you!! I'll save you!!" Yue Zhong became anxious when he saw that Ji Qing Wu was struggling to speak, and stopped her frantically while trying to climb towards her.

The Yue Zhong now did not have the bearing of a cold, ruthless tyrant, nor was he the same leader that viewed survivors like ants. He was just a pitiful person struggling to save his loved one, trying his best to snatch back the ball from the death god's court.

Since Ji Qing Wu's spine had been pierced through together with her chest, her injuries were critical. Yue Zhong was worried that she might expend her energy to speak and lose her strength to hang on.

She had a smile on her face as she watched Yue Zhong struggle to reach her. Her heart was filled with a warm feeling, and she could see that this was Yue Zhong's true feelings for her. She coughed once more, and a mouthful of blood was expelled, before her eyes started to dim, no longer seeing Yue Zhong clearly.

"Yue Zhong!! I love you! Cough!" Just as Yue Zhong reached her, he heard her using her last breath to slowly speak those words, before coughing a mouthful of blood. Her body trembled slightly, then she went limp.

"Ah!!!! Don't die!! Don't die!! Don't die!!! Please, I'm begging you!!! Open your eyes, please!! Open your eyes!!" He was about 7m away from her. He used all his strength to drag himself towards her, and fumbled with his treasures. He poured the Life-Saving Grass, Ou Ming Ver. 1, Ver. 2, Ver. 3, the 13 recently ripened Purple Jade Fruits into her mouth. Even the Type 3 Blood Essence he had been keeping was not spared.

The countless valuable treasures entered Ji Qing Wu's mouth, causing her body to shudder slightly. Her body also became less cold.

"I need to calm down!! Be calm!! I will tear this beast apart. But Qing Wu cannot remain like this. What do I do?" He heaved a slight sigh of relief when he felt her body regaining some color. However, he was still at a loss on her situation.

The injuries to Ji Qing Wu's chest and abdomen were serious, and if Yue Zhong were to suffer such injuries, it was also unknown if he would survive them or not. Ji Qing Wu's Vitality and Endurance were all vastly below Yue Zhong, surviving would truly be hard to say.

"White Bones come out!" With a thought, White Bones stepped out of the nether hole in mid air, its huge hands grabbing on to the claw of the huge bird.

"Secure her body, don't let it move about." Yue Zhong pointed at Ji Qing Wu and ordered.

White Bones immediately shot out a few bone spikes, locking Ji Qing Wu's body in place.

Yue Zhong eyed Ji Qing Wu and gritted his teeth before climbing towards the head of the Type 4 Flame Bird. If he did not kill this beast, Ji Qing Wu would definitely die. Killing it might mean only a 1 in 10 chance of survival, but at least there was a chance.

Yue Zhong climbed up along the body of the monstrous bird before he expended 100 points of Spirit to conjure a Devil Flame Spear that was 8m long.

After evolving the skill to its Second Order stage, Yue Zhong's expenditure to form a spear shot up from 50 to 100 points. However, this new spear that required 100 points to prepare was at least 6 times mightier than the previous one.

The Type 4 Flame Bird seemed to have detected Yue Zhong's strong killing intent. It twisted its body in a bid to peck at him. The blow almost caused him to lose his grip. Yue Zhong grabbed the back of the Flame Bird tightly, and the Devil Flame Spear in his hands became a shooting star as it shot towards the head of the Flame Bird.

The resulting explosion was extremely gruesome. With such a terrifying strength of the Devil Flame, the combustion blasted a huge hole in the head of the Flame Bird, incinerating at least half its brains.

The Flame Bird might be a Type 4 Mutant Beast, but its strength laid in its Mach 2 speed. With that alone, as long as it managed to launch an attack, even Yue Zhong would be heavily injured. However, its defense was not as tough, and it was at most capable of defending against 12.7mm rounds.

"Congratulations on achieving Level 77...."

"Congratulations on achieving Level 78, you've gained 2 attribute points to be allocated."

The moment the Flame Bird's head was blasted by Yue Zhong, a huge orb of experience flowed into his body, causing him to instantly shoot up 2 levels until he reached Level 78.

At the same time, a Blue Treasure Box dropped out and fell downward.

Before it could plunge any further, White Bones fired out a small bone net to retrieve the Blue Treasure Box.

With the death of the Flame Bird, its massive body began to plunge towards the earth as well.

“Remove her from the claw! Bring her to me!” Yue Zhong ordered White Bones.

White Bones quickly removed Ji Qing Wu’s body from the claw, and at that moment a large amount of blood and some fleshy parts flowed out.

White Bones didn’t seem to notice and directly extended out its bone spike to deliver her to Yue Zhong.

Yue Zhong had already worn a parachute, and he grabbed Ji Qing Wu, waving his right hand and a transparent silk shot out, sticking to the body of Type 4 Flame Bird.

Yue Zhong hugged Ji Qing Wu tightly, as he gazed downwards with a calm look. When there was a distance of about 1.5km from the ground, he opened the parachute. At the same time, he activated the Gravity Manipulation, lowering the weight of himself and Ji Qing Wu by half.

The body of the Flame Bird plummet straight down, exploding in bits and pieces upon impact.

“This is an island?” Yue Zhong hugged Ji Qing Wu as he surveyed the surroundings, only to discover that the land he was about to land on was only about 1km wide, and there didn’t seem to be any greenery. It was as though it was like a coral reef in the middle of a sea.

Yue Zhong carried Ji Qing Wu as they landed gently on the island. He retrieved a blanket and placed Ji Qing Wu on it. Seeing the huge wound in her chest, he felt slightly helpless.

Although she had already taken in all those precious medicines and enhancements, her eyes were shut tight, and she was still in her coma.

“What should I do? Oh right! There’s still that!!” As he was about to wring his hands in exasperation, he remembered the corpse of the Type 4 Flame Bird. He went over and retrieved the nuclei that looked like a ball of flame condensed into a physical form, as well as the blood essence, that was fiery to the touch as well.

He came to Ji Qing Wu’s side, and with the extremely priceless Type 4 Flame Bird Blood Essence in his mouth, he bit it and broke it apart, before bringing his lips to hers. He then guided the flow of the energy towards her chest.

The blood essence from a Type 4 Mutant Beast was not ordinary, the moment it entered abdomen, it transformed into a warm energy source that began to nourish her body.

Nourished by the blood essence, Ji Qing Wu’s wounds stopped bleeding. However, the gaping hole and shredded organs were not something that could just repair instantly. These were wounds beyond the help of the blood essence.

A blood essence could enhance a person’s constitution and Vitality, but it could not regenerate body parts.

“What can I do!? Oh right! There’s still that!! Who knows, there might be something useful!” Yue Zhong eyed Ji Qing Wu’s pained expression and began to panic again, before he opened up the Blue Treasure Box dropped by the Flame Bird. With a bright flash, a strange humanoid equipment about 2m appeared in front of it. There were strange blue lines running around the machine like veins. There was also a huge gem right in the middle.

“Level 7 Treasure: Biological Armor Type 1. A cosmic warfare battle armor, providing high defense and allows the user to fight under extreme conditions. Provides enough oxygen. Also, possesses the ability to automatically heal the user. Requires Mutant Beast Nuclei to operate.”

“Level 7 Treasure! This is actually a Level 7 Treasure.” Yue Zhong was momentarily stunned when he saw the Biological Armor Type 1. It was the first time he came across a Level 7 Treasure. After all, he had fought so hard and the highest grade of equipment he ever got was his trusty and useful storage ring, which was a Level 6 Treasure. This Biological Armor was actually higher by a grade, it must truly be exceptional.

Yue Zhong reached out to touch the Biological Armor, and with a thought, the front gem opened up to reveal a slot, which was meant for the nuclei of Mutant Beasts.

Yue Zhong placed the Type 4 Flame Bird Nuclei into the compartment and closed the gem cover. The entire equipment shuddered, before coming to life.

“Open up!” Yue Zhong ordered the Biological Armor.

The Biological Armor opened up and Yue Zhong carefully placed Ji Qing Wu within it.

After the lid closed, it immediately began reparation works on her body.

“Restoration in progress! Calculating... The user is currently on the brink of death, in order to fully restore the user, it would take approximately 90 Earth days. During the restoration, the armor cannot be used in combat, and it would be in a sealed state.” A line of text appeared on the lid of the Biological Armor.

Chapter 534 – Type 5 Mutant Beast!

Seeing that line of information, Yue Zhong finally heaved a sigh of relief. He then began to survey his surroundings carefully.

“The island is moving!” As he looked around, he could feel it in his bones. Countless ripples were radiating outwards from the reef-like island beneath him.

“Could this island be an actual behemoth-type Sea Mutant Beast?” Yue Zhong’s heart turned cold as he looked at his feet.

“The Eyes of Perception must be targeted at a body part. To know for sure, I can only head to the edges of the island.”

He pondered for a while, before heading over to the corpse of the Type 4 Mutant Flame Bird and began to cut up its body.

It was by pure luck that Yue Zhong had been able to kill such a tyrannical Type 4 Mutant Beast. If it had been a frontal clash, he would have been instantly decimated by its speed. Even the Shield of Light and the Bronze Spiritual Bell would not have been of much use.

Unfortunately for the Type 4 Mutant Flame Bird, it belonged to the low-defence category of Mutant Beasts, that was how it was finished in one blow by Yue Zhong who had been grabbing onto its body.

Yue Zhong began to let the blood out of the corpse of the Flame Bird, pouring them into large containers before keeping them inside his storage ring. He separated the blood, brain pulp, brain matter, bone marrows and anything that he could squeeze out inside his storage ring. After that, he used his Crocodile Tooth Saw Blade to saw off those large talons.

The talons of the Flame Bird had easily pierced the Type 3 Mutant Beast Hide on Ji Qing Wu's body. That was actually incredible, considering that not even cannons can damage the hides of Type 3 Mutant Beasts.

The Flame Bird had an 80m-long wingspan, and its talons were at least a metre. Even the Black Tooth Blade and Crocodile Tooth Saw Blade that were among Yue Zhong's best weapons could not match the sharpness of the talon.

Yue Zhong intended to forge a sharp machete from the talons. Using it might not gain any enhancements from killing his enemies, but it would be a powerful weapon to utilize.

After harvesting all that he could from the corpse, he hesitated a little while, before carefully proceeding towards one direction to the edge of the island.

"Level 118 Mutant Beast: Type 5 Dragon Whale Beast. It is of the Overlord-Level of the Seas, and it is an incredibly terrifying Mutant Beast."

Yue Zhong had just taken a look and began to edge back carefully. He was afraid of being noticed by that Type 5 Mutant Beast.

In such a vast ocean where there was no end in sight, the moment this Type 5 Dragon Whale Beast entered the waters, Yue Zhong would be in trouble.

The water bodies of the Earth were larger than the land mass, and the marine biology in the waters would definitely be more diverse and larger. Under such circumstances, the threat of these marine creatures was at least a hundred times more dangerous than on land. If Yue Zhong were to enter the waters, he would immediately be in danger. This was because his trump card Devil Flame was of no use in the water.

Yue Zhong returned to the biological armor containing Ji Qing Wu to stand guard.

The Type 5 Dragon Whale Beast was an overlord within the seas, and only other Type 5 Mutant Beasts would dare provoke it. No lower-rank Beasts would be silly to get too close.

Yue Zhong stood like this on the 'island', not able to utilize any of his skills. He could only wait obediently on the behemoth's back with the biological armor on it while reading a book out of boredom.

Within Yue Zhong's ring, there was a large supply of water and food, more than enough to last him for a year.

After an indeterminate number of days, a huge wave suddenly swept towards the back of the Type 5 Dragon Whale Beast.

"What's going on?"

Before Yue Zhong had the chance to react, he was swept off the back of the Type 5 Dragon Whale Beast and plunged into the deep blue sea.

The biological armor Ji Qing Wu had always been bound to Yue Zhong's back with some spider silk.

The moment he entered the water, the biological armor followed suit.

Since Ji Qing Wu was inside the pod, Yue Zhong could not afford to put the pod into his storage ring so he kept her outside.

Upon submerging into the waters, he saw the beast which was at least a thousand meters long, with a jaw full of sharp teeth, currently engaged in a clash with a huge shark at least 800m long. Both titans were currently snapping at and biting each other viciously. With them at the center, the resulting waves of their clash were constantly rippling out, churning the waters.

"Level 113 Mutant Beast: Type 5 Mutant Tiger Shark. One of the kings in the waters, its nature is extremely aggressive."

Yue Zhong saw the beasts engaged in mutual slaughter and hurriedly allowed the waves to carry him away from the vicinity. If it was on land, then it was a different matter. However, since they were helpless in the waters, he didn't dare stay to play the fisherman. If he was not careful, he might end up being finished off by the 2 behemoths.

Right after he had floated about a hundred meters away, his position was locked on by a huge Mutant Shark, and it immediately swam towards him.

"Level 46 Mutant Beast: Mutant Shark. A water-type mutant beast."

Although Yue Zhong possessed a body that was 10 times more powerful than a person, he was unable to utilize his maximum potential in water. Even if his speed now exceeded the world champion prior to the apocalypse, he could not possibly out-swim the Mutant Shark.

In barely a few breaths, the Mutant Shark had reached Yue Zhong and was opening its jaws to chomp down on him.

Before he was about to be bitten, Yue Zhong hurriedly activated his Clone Technique, and an identical clone appeared in the waters.

Seeing the appearance of one more prey, the Mutant Shark was momentarily confused, before it went for the one closer to it, and snapped its jaws.

On that clone, there was some spider silk that Yue Zhong had laid beforehand. With a thought, he retracted the silk, pulling himself towards the jaws of the Mutant Shark.

The Mutant Shark saw another prey appear by its jaws and opened them to bite again.

Yue Zhong immediately cast his Gravity Manipulation, causing a 2-fold gravitational force to weigh down on the Mutant Shark. The beast instantly sunk slightly, and its jaws snapped on nothing.

Yue Zhong took the chance to get on the head of the Mutant Shark, wrapping his spider silk around its body. He then unleashed a single punch with all of his strength towards the head of the beast. The hammer-like blow caused the body of the Mutant Shark to shudder.

Because of that blow, the Mutant Shark writhed in pain, trying to shake Yue Zhong off its back.

His fingers dug into the head of the Mutant Shark like claws, while he wrapped his legs around the body. He then proceeded to pummel the Mutant Shark's head viciously.

Although it was difficult to unleash one's strength due to the resistance in water, Yue Zhong's constitution already exceeded a normal person by 10 times. His Strength had already exceeded even some Mutant Beasts, and his blows were a considerable threat.

After close to 100 blows, the Mutant Shark was punched silly and the spider silk was constantly wearing down the Stamina of the beast.

After struggling for a while, its body went limp helplessly, and it spat out some blood.

Yue Zhong quickly made use of the opportunity to add a point to his Tamer Technique, before casting it on the Mutant Shark.

Under the forceful suppression from the Level 4 Tamer Technique, the Mutant Shark which was not even at its Type 2 stage was brought under Yue Zhong's control smoothly.

He heaved a sigh of relief and patted its body. With a thought, it directly shot through the water towards the surface like a jet.

When they broke through the surface, Yue Zhong exhaled deeply. The fight with the Mutant Shark had taken 15 minutes. If it wasn't for his high Vitality, he would definitely not have been able to hang on.

Yue Zhong rode on the Mutant Shark before handing a Type 2 Nuclei to the shark and said: "From today, you're called Little Sharkie then."

The Mutant Shark gobbled up the nuclei and expressed its joy through their telepathic connection.

To Little Sharkie, a Type 2 Nuclei was the best form of nutrition. It was already a high-level Mutant Beast within the waters, once it digested the nuclei, it could possibly evolve to a Type 2 Mutant Beast at any time.

Yue Zhong gave an order to Little Sharkie: "Take me to the nearest land!"

Receiving his orders, Little Sharkie shot towards the north-east direction with its maximum speed. Although it had suffered when it was pummeled by Yue Zhong earlier, the Type 2 Nuclei was a sort of nourishment and it was already recovering.

Normal sharks could only swim at a speed of about 40km/hour, and it was only for a short time. Little Sharkie was a Mutant Beast and it was able to hit 60km/hour or maintain a speed of 40km/hour for at least 12 hours.

Little Sharkie swam for 12 hours straight before it finally brought Yue Zhong to land. It then leaped out of the water onto land, curling its body as if it was dead.

Only Yue Zhong knew that Little Sharkie was currently evolving towards its Type 2 stage.

Yue Zhong glanced at Little Sharkie, ordering White Bones to stand guard over it, while he carried Ji Qing Wu and the biological armor she was in towards the inner parts of the land.

Chapter 535 – Japan!

Yue Zhong came to a small town, only to discover that it was overrun with tall, wild grass. There were all sorts of abandoned vehicles, and not a single soul was in sight. There were only zombies in groups shambling about. On both sides of the streets, there were various stores with hiragana and katakana characters.

Yue Zhong realized where he was.

“This is Japan. Did we actually come this far?”

He looked around and strode towards the town. With his enhancement level and combat strength, killing 1000 zombies wasn't a problem anymore, it would just expend a huge amount of Stamina.

When Yue Zhong stepped into town, the huge group of zombies were attracted by his sounds and scent and began to shamble over.

He waved his huge Black Tooth Blade, slicing the zombies in front of him into 2. As they come forward, they would be casually dealt with.

Just as he was about to reach the center, there was the sound of glass breaking. 2 speedy shadows leaped out suddenly and rushed towards him.

The huge Black Tooth Blade slashed out twice in quick succession, as 2 cold blade beams caused the 2 S2s to be sliced apart, blood splattering everywhere. A Level 3 Skill Book: Agility Solidification appeared in Yue Zhong's hands.

Strength Solidification, Agility Solidification, such strengthening skill books appeared more commonly. In comparison, Devil Flame, Plant Manipulation, Ice Manipulation, etc, such skills that were powerful offensively were only dropped from hunting high-level Mutant Beasts or zombies. Even then, the chances were slim.

“Tasukete! Tasukete! (Help!)”

As Yue Zhong was waving his Black Tooth Blade about to slice the zombies, an anxious cry or help sounded from a supermarket.

“Human? Japanese?” Yue Zhong frowned and looked towards the direction. He saw a huge supermarket and up on the 2nd level, there was a young high school female student. Her hair was long and black, tied in a ponytail. Her eyes were bright and large, her bountiful chest threatening to burst out from her sailor-like uniform. She was currently screaming to get Yue Zhong’s attention.

“Should I save her? Ah, what the heck, having a local is better.”

Yue Zhong hesitated before walking over.

There were 5 S2s and 2 L2s as well as over a dozen other ordinary zombies gathered in front of the gate. They immediately pounced towards Yue Zhong when they saw him.

He waved his weapon about, easily taking care of them in a matter of seconds.

Within the supermarket, there were a dozen ordinary zombies that were once the employees roaming about. He took care of them and directly headed to the 2nd level, kicking the door wide open.

When the Japanese student saw him, her face revealed a pleasant look of surprise, as she bowed 90 degrees, and greeted him with respect: “Arigatou! Thank you!”

Yue Zhong eyed the student and asked directly: “Do you speak Chinese?”

Hearing his words, the female student immediately became flustered. It was obvious that she couldn’t.

He sighed lightly in his heart. Chinese was after all not English, which was the world’s most common language. If he hadn’t learned the Language Proficiency skill, it would have been a nightmare to communicate with the student.

Yue Zhong continued: “I’m Yue Zhong! I’m from China, what’s your name?”

The Japanese student replied: “I’m called Fujisaki Kaori! 2nd-year student at Sakura High. I’m 16 this year. Thank you very much for saving me, Yue-kun!”

“Why are you here?” He assessed her carefully, noting the Japanese katana beside her, and felt that it must be a system equipment.

Fujisaki Kaori looked at Yue Zhong with her huge eyes filled with reverence and idolization. “I was here to source for food. However, I wasn’t careful and allowed those S-types and L-types to surround me. Thankfully, Yue-kun appeared to save me, otherwise, I would have starved to death here. Yue-kun, you’re really strong! You can kill so many zombies so easily! It’s too amazing!”

The Japanese were respectful people, and their humble attitude and reverence for the strong were deep set in their bones. As long as there was strength, it didn’t matter what the other party was. Only the strong would earn the respect and veneration from the Japanese.

Fujisaki Kaori watched how fearlessly Yue Zhong had strolled into the crowd of zombies. He had crushed them like ants, and her heart had fluttered. She felt slightly attracted to him, after all, he had just saved her.

Heroes rescuing damsels in distress was a tradition that was almost a sure-fire way to win the heart of the fairer sex. It was so popular because it was extremely effective.

Fujisaki Kaori was silent for a while before she extended an invitation to Yue Zhong: "Yue-kun! Will you please come with me to our establishment?"

Yue Zhong looked at her expectant expression and guessed that she might be from a small establishment. Those small-time factions had no way of containing someone like him, if he were to rage, he could easily decimate one or two of such bases.

"Sure." He agreed, even though he was not of a favorable impression of the Japanese. However, he had no choice because of the foreign land, and he needed someone to guide.

"Come with me! I'll gift you something from the supermarket!" Yue Zhong turned and headed down.

Fujisaki Kaori followed him down.

He pointed to the entire supermarket and said: "Help yourself!"

"Thanks!" After expressing her thanks, Fujisaki Kaori ran and grabbed a huge haversack. Before stuffing it with all sorts of things. After filling it up, she then found a trolley, filling it up before pushing it out.

"This Fujisaki Kaori is pretty intelligent!" Yue Zhong eyed her actions and praised her silently.

Most people would not think of using the trolleys to collect and transport items. After all, one's mobility would be affected when using it. However, Fujisaki Kaori had done precisely so because she knew she had Yue Zhong around.

Soon, she carried her haversack and pushed the trolley in front of him.

"Let's go!" Yue Zhong eyed Fujisaki Kaori and turned around, not minding the trolley at all.

She was slightly disappointed and proceeded to push it herself, following behind Yue Zhong.

Along the way, many zombies tried to attack Yue Zhong, all he had to do was to slash out casually. The zombies didn't stand a chance, each and every one of them being sliced in two. None could get close enough.

"Strong!! He's even stronger than demons!" Fujisaki Kaori watched on as Yue Zhong continued to slaughter the zombies, and her heart trembled.

With her leading, Yue Zhong soon came to a small village in between 2 mountains.

"Kaori Onee-chan!!"

"Kaori Onee-chan, you're back!"

When Fujisaki Kaori returned to the village, a number of small kids from the ages of 9 to 13 came running out. Other than them, there were 2 other women that seemed above 30, as well as 3 other younger women of about 16 to 18.

There was a total of 15 kids that came running out. Every one of them was scrawny, and had visible signs of the conditions of the apocalypse. However, they had no signs of being mistreated and were still as innocent and boisterous as kids should be.

At this time, one 17 or 18-year-old young woman with freckles and an obese figure shot Fujisaki Kaori a look and barked: “Kaori! Who is this person? How can you bring a man back? Have you forgotten that all men are animals?”

Another one, who was shorter and had an ordinary face, looked at the Black Tooth Blade on Yue Zhong’s back with apprehension in her eyes and asked: “Kaori! Who is this?”

There was also a bespectacled and pretty but strict-looking Japanese lady who was assessing Yue Zhong through narrowed eyes. She kept silent.

The kids in the village were also curiously looking at Yue Zhong.

Fujisaki Kaori started to explain to the rest: “He is Yue Zhong, from China. He saved me from being trapped at the supermarket! Because of him, I was able to get all these!”

The freckled fatty immediately shout out in agitation when she heard Yue Zhong was from China: “What?! He’s Chinese?! Shit!! Fujisaki Kaori! How can you bring a Chinese here? This is Japan, we’re Japanese, this is not a place you can come to. Get the hell out!”

“Get out!! We don’t welcome you here!!”

“This is Japan, we don’t welcome the Chinese here! Get out!! Uotsuri Jima is ours!”

When they heard the shouts of the freckled fatty, the rest of the Japanese kids also began to jump up and down as they hollered at Yue Zhong.

Various Japanese right-wing forces had been rearing their heads in recent years and influenced much of the public opinion on a general hatred towards the Chinese.

As the kids began to shout, some even bent down to pick up stones and pebbles to pelt Yue Zhong.

“Bunch of unconscientious people!”

Yue Zhong’s eyes flashed coldly and shot forwards. He lashed out with his leg, kicking 5 of the kids, sending them flying about 7 to 8 metres backward. They all spat blood. He then lunged towards the freckled fatty and slapped her harshly across the face, causing her to tumble, and a few of her teeth to be knocked out. She also coughed up blood as a result.

Footnotes:

“Kaori Onee-chan!!”

Onee-chan: A term of address for older sisters in Japan

“This is Japan, we don’t welcome the Chinese here! Get out!! Uotsuri Jima is ours!”

Senkaku Islands – a source of conflict between China and Japan

https://en.wikipedia.org/wiki/Senkaku_Islands

Various Japanese right-wing forces had been rearing their heads in recent years, and influenced much of the public opinion on a general hatred towards the Chinese.

TN: Not sure how true this is, but I'm pretty sure both sides have their own stories to tell.

Chapter 536 – Xenophobia!

Yue Zhong pulled out his huge Black Tooth Blade and pointed it at those Japanese survivors. He barked out coldly: "All of you shall kneel! Those who don't, I'll slice your head off!"

"You dare hit me!! I'll kill you!!" The freckled fatty instantly charged over with a face contorted by fury.

"No!!" Fujisaki Kaori immediately screamed out.

Yue Zhong's eyes flashed coldly, and the Black Tooth Blade sliced through the air like a beam of light.

The head of the freckled fatty soared through the air as fresh blood splattered. Her headless corpse struggled a little before slumping to the ground.

After killing the freckled fatty, Yue Zhong's eyes turned even colder as he pointed at all the Japanese survivors and shouted out with a menacing and oppressive tone: "Get the fuck on the ground! Otherwise, you'll die!"

When they saw Yue Zhong killing the girl without hesitating, everyone stared in shock and fear, as though they had just seen a demon.

"Sorry!!"

"Sorry!! Forgive our offense!!"

"Sorry!! Please forgive us!!"

The pretty bespectacled girl was the first to get on the ground. The rest also hurriedly got on their knees in terror, as they began to plead for mercy.

"Please, Yue-kun! Please have mercy on us, don't kill anyone else! They didn't mean it!" Fujisaki Kaori also knelt and begged Yue Zhong.

Yue Zhong had kicked the Japanese kids and took the life of the freckled fatty without batting an eyelid. This was proof of his cold nature and not someone to be pushed around. They had been totally suppressed by his terrifying aura.

"Please use as you wish, but spare the kids!! They're innocent!" The 2 middle-aged women crawled over and pulled their clothes off, revealing their fair breasts. They hoped to use their bodies to appease Yue Zhong.

"I'm not interested in you!! Since you guys don't welcome, then you won't like the food that I had kindly provided. Let me burn them all!" He eyed the Japanese survivors coolly and pointed at the trolley. His Devil Flame immediately ignited the trolley, turning the trolley and its contents into cinders.

All the survivors looked at the burning items and their eyes flashed with an intense regret. A few of them began to wail. They were running out of supplies, otherwise, the weak Fujisaki Kaori would not have risked her life to search for food.

The small town might not pose a problem to Yue Zhong, but to those ordinary survivors, it was as terrifying as hell. A single S2 was enough to kill the entire village of survivors.

After turning the trolley into ash, his gaze landed on the haversack on Fujisaki Kaori's back.

She felt a chill down her spine and grabbed the bag tightly. She kneeled on the ground and began begging: "Yue-kun! Please! Let us have at least this bag. It's our only hope! As long as you leave this for us, I'm willing to spend the night with you! I'm a virgin, and I should be able to satisfy you..."

The pretty, bespectacled girl who had been kneeling rigidly also spoke up: "Yue-kun! I'm Ida Kyoko, 17 this year, I'm also a virgin. This time, it was our fault! Please be magnanimous and let us have this bag! I'm willing to join Kaori and let you have your way with us for a night!"

Without food, the entire town could not survive beyond a few more days. Ida Kyoko was also extremely clear and decided to use her body to exchange for the food.

Yue Zhong spoke coldly: "I need a map of this area. I also need someone to lead the way, to the nearest establishment. As long as you can provide this, I'll leave tomorrow, and the bag is yours."

He had no goodwill towards the Japanese, but he would not go on a massacre for no reason. Unless both sides were enemies, where he would not hesitate to rain hell and carnage upon his foes.

Ida Kyoko kneeled in front of Yue Zhong and spoke respectfully: "Yes! I have a map here. I also know where the location of the nearest survivor base is. Let me be your guide tomorrow Yue-kun. Please rest for the night here."

If he had not displayed his strength, they would have already chased him out. However, since he showed that he was willing to punish children, and killed the freckled fatty who had dared to assault him, they were filled with fear towards him. Naturally, they would not chase him out, for fear of him going crazy and killing them all.

"En!" He replied indifferently and began to walk into town.

After he left, the survivors stood up.

"Damn Chinese dog!! Lowlife Chinese scum. You dare kick the future elites of my Great Japan!! I'll not let you off! I'll make life a living hell for you!!"

A 13-year-old Japanese boy by the name of Ueda Koji with dyed blond hair stared hatefully at Yue Zhong's back, his eyes flashing viciously.

Ueda Koji looked at Ida Kyoko and Fujisaki Kaori and his face contorted in rage: "Kaori onee-chan is mine!! Kyoko onee-chan is also mine!! I'll not let you take them away, Chinese dog!!"

With these vile thoughts, Ueda Koji thought to find a chance to slip out of town.

Soon, it came to dinner time. The 2 Japanese housewives prepared a large wok of porridge, before separating in many bowls.

The Japanese children lined up to get their bowls, before slurping the porridge, wiping the bowls clean.

Yue Zhong watched this sullenly. In his country, his fellow countrymen had a lack of manners and the habit of queueing. Even the little rascals would frequently jump the line, and made use of their bodies to squeeze through or bully the weaker kids for food. These were all bad habits instilled in them by their parents. Only after Yue Zhong punished this behavior did it start to disappear. Seeing the orderly manner of the Japanese kids, he was slightly unhappy. After all, he was slightly nationalistic, and seeing the Japanese being better than the Chinese in any aspect caused him to feel sour.

“Yue-kun, this is yours.” Ida Kyoko served a plate to Yue Zhong.

It was a simple meal. There was soup, rice, as well as canned fish and vegetables. In this apocalypse, it was considered a sumptuous meal.

Many of the Japanese looked over, their mouths salivating. However, they sat still, not daring to move about. The Chinese in front of them had shown them how ruthless he could be, and they dared not provoke this man who killed without blinking.

“No need! You guys have it.” Yue Zhong declined their goodwill and pulled out his own canned Type 2 Beast meat, and began to devour it down.

The Type 3 Mutant Beast meat would boost his energy and replenish what he expended, so he would only save it for situations, where he might need to recover or save weaker survivors.

Ida Kyoko had also done so as a perfunctory gesture, she wasn’t really willing to let Yue Zhong have such precious food. When he declined, she brought the food back, and separated into 14 equal portions, giving the little kids to eat. Although it was just a little bit, the kids all had expressions of bliss on their faces.

Yue Zhong watched the actions of Ida Kyoko as well as the kids, and he thought silently: “What a scary race of people.”

Japan had been able to pick itself up and soar to economic greatness after World War 2. On one hand, it was because there was the assistance from America, on the other hand, which was more important, was that the Japanese were very united, and had an undying resolve no matter the obstacle.

The more he watched, the more depressed he got, and he decided to hoist the biological armor and walked into another room to rest.

When he left, all the Japanese survivors heaved a sigh of relief. His very presence exuded an overpowering pressure on them, making it hard for them to breathe. When he left, they could finally relax.

One of the housewives asked: “Kyoko, are you really going to lead him tomorrow?”

Ida Kyoko nodded “En! This Yue Zhong seems to be a man of his word, if I help him, he will keep his promise.”

The other housewife spoke: "I wonder what he wants with a larger survivor base? Why don't we all follow him? Maybe joining a larger survivor base would be easier for us all."

Right at this time, the sounds of motorbikes and cars came roaring from outside the village.

Hearing the commotion, the survivors all stepped out to take a look out of curiosity.

Only to see a whole bunch of men in tattered and mismatched clothes, each of them wielding weapons like baseball bats, knives, and blades. Ueda Koji was behind the leader, a burly man with a shaven head. He had a huge scar running down his face, and he had plenty of tattoos on his body.

Ueda Koji spoke respectfully to the scarred man: "Kuwata-oyabun, it's here."

The bald scarred man was called Kuwata Taro. He was the boss of this area, and had 60 soldiers under him, and was the king of about 300 survivors.

A 13-year-old Japanese boy by the name of Ueda Koji* with dyed blond hair stared hatefully at Yue Zhong's back, his eyes flashing viciously.

*Raws seem to suggest his name to be either Ryuki Koji or Ueda Koji.

Ueda Koji spoke respectfully to the scarred man: "Kuwata-oyabun*, it's here."

*Oyabun : a mafia/gang term for boss.

Chapter 537 – Blade Beam!

"Kill!!!" Kuwata Yutaro revealed a savage smile and waved his hands, leading his subordinates into the village.

The dozens of armed men charged into the village in a frenzy.

"Quick! Escape!!" Fujisaki Kaori immediately screamed when she saw those men.

After which, she led the kids towards the village.

The 2 housewives ran over towards the men, hoping to use their bodies to buy some time for the kids.

The subordinates of Kuwata Yutaro began to surround the 2 housewives, as they took off their pants and began to rape the 2 women while laughing in glee.

While the 2 women were surrounded by 10 men, the rest of the armed men charged towards the village while roaring with laughter.

"Kaori onee-chan!! Save me!!" All of a sudden, a 12-year-old boy tripped and fell, his face wearing a frightened expression as he shouted for Kaori.

"Hahahaha!! Die!" One of the thugs swung his blade down with a perverse look of madness, separating the kid's head in a shower of blood.

While it was true that the Japanese had a powerful will and fighting spirit, likewise, some had an intense side to them. Many had their own mental demons, which when unleashed, would cause them to be worse than beasts.

Those subordinates of Kuwata Yutaro were capable of all evils, and every one of them had no qualms committing acts of evil.

“Kenta!!” Fujisaki Kaori screamed out in misery when she witnessed the cruel and inhumane scene.

A 10-year-old girl fell as well, and she sobbed uncontrollably with snot and tears flowing out of her eyes and nose. She pleaded as she looked towards Ida Kyoko: “Onee-chan!! Save me!! Kyoko onee-chan, save me please!!”

3 of the burly thugs instantly surrounded that little girl and took off their pants before proceeding to press the girl underneath them. They basically allowed their primal but perverse nature to go wild.

Soon, the screams of pain mixed with the pants of excitement from the thugs filled the air. There was a disgusting tension in the air.

“Masako!! Masako-chan!! Animals!!” Ida Kyoko screamed out as she watched on helplessly. Her beautiful face was an expression of fury, her eyes bloodshot, and her hands were pale white from clenching too tight. However, she was extremely clear that even if she went back, she would just become a sacrifice, not doing any good.

“Yue Zhong!! There’s only him left! Only he can save us!!” Ida Kyoko came to a swift decision and thought of the only person in the village that could save them.

On the other side, Fujisaki Kaori was not stupid as well and brought the kids towards Yue Zhong’s location.

Ida Kyoko came to where Yue Zhong was staying and saw that he was leaning against the window, watching the events unfold quietly. He showed no intentions of lending a helping hand at all.

Yue Zhong watched the Japanese thugs killing and raping their own countrymen and there was a mix of emotions in him. There was fury, numbness, and a slight sense of gratification. He was furious because these brutes actually had no qualms killing their own people. Numb because he had seen so much of these types of scenarios since the apocalypse began. Each time a faction took over another, there would be such unrest and chaos. He had truly seen too much. And the slight gratification was because he silently thought that, even the Japanese were not saints, seems like there were enough perverts among them as well.

Ida Kyoko immediately knelt down in front of Yue Zhong and pleaded: “Yue-kun! Please lend a hand and save us!!”

If Yue Zhong did not do anything, the survivors would likely be wiped out, leaving at most the women to serve as sex slaves.

Yue Zhong’s eyes flashed with a look of ridicule: “I’m a hated Chinese of your Japanese people. Why should I save you guys? You should look for your own people to help.”

When the Japanese survivors had first seen Yue Zhong, they were immediately xenophobic. Yue Zhong was still fuming over their ungrateful attitude towards his goodwill.

He was the sort that was clear about his feelings, he would be nice to those who treat him well, and he would be ruthless to those who were his enemies.

Ida Kyoko raised her head to implore Yue Zhong with those mesmerizing eyes of hers. There was a resolute look in them: "Yue-kun, I would like to propose a deal. Please save these kids, after all, they're innocent. In exchange, I'll be willing to serve you as a maid from now on. From today onwards, whatever you ask of Kyoko, I'll do it."

Ida Kyoko wasn't an idiot. She knew those thugs outside were beyond control. They had no way of talking sense or logic with them. In comparison, although Yue Zhong was a foreigner, he was at least reasonable. In her eyes, there was a chance to negotiate with him.

"Kyoko!" Fujisaki Kaori heard those words and turned to look at her, her face pale and her mind blank. Although her abilities were the strongest among the villagers, her adaptability and reaction to situations were not Ida Kyoko's equal.

Yue Zhong stared at Ida Kyoko who was looking straight at him with a resolute gaze and replied coolly: "Remember all that you've said today. If you dare go back on your word, I have my means to make you regret it for life."

Ida Kyoko knelt in front of Yue Zhong and bowed deeply: "Yes!"

She had received an upbringing from the higher rungs of society and wore those thick old-fashioned glasses to hide her beauty.

"Haha! So many women!"

At this time, 13 men barged in. When they saw the 2 women in the room and those kids, the eyes of the men all lit up in excitement.

Fujisaki Kaori looked at one member of the group that had barged in, a look of disbelief flashing in her eyes and she exclaimed shrilly: "Koji!! It was you!! You betrayed us?! Why? Why did you betray us?"

Of the 13 men, one was precisely Ueda Koji.

Ueda Koji looked at Fujisaki Kaori and Ida Kyoko, his face contorted in madness: "Kaori onee-chan! Kyoko onee-chan!! I like you guys!! I want you to be my women!! What is that Chinese dog worth? Why is it that you 2 were smitten by him the moment he came? This Chinese dog are our Japan's enemies!! Why, why must you treat him so well, to the point of offering your bodies to him? Since it's like this, why can't I be your man?! Yutaro-oyabun has already promised me. As long as I lead them here, the 2 of you will be women from now on!"

Ida Kyoko looked at Ueda Koji, her eyes flashing with pity: "Koji! You have been deceived! They will not give us to you!"

The few subordinates of Kuwata Yutaro laughed at Ueda Koji with scorn and ridicule in their eyes.

With these 2 beauties, Kuwata Yutaro would definitely not leave them just for Ueda Koji to enjoy alone.

However, Ueda Koji didn't seem to discover anything amiss, looking at Kuwata Yutaro with an expectant look: "Kuwata-oyabun will not lie to me. Kuwata-oyabun, you can deal with the rest how you like. Kaori onee-chan and Kyoko onee-chan are mine. Please capture them for me."

Kuwata Yutaro's eyes flashed coldly, and he suddenly pulled out a sharp katana and sliced towards Ueda Koji, causing his body to be separated.

"Ah!!!" With blood splattering everywhere, and his legs separated from his body, Ueda Koji didn't die instantly, instead, he fell to the ground, screaming out. His face was hideous, his eyes filled with fear and disbelief.

Kuwata Yutaro looked at Ueda Koji and there were contempt and ridicule in his eyes: "I'm not lying to you. I will hand them to you. But since you're dead, then your women will be shared by the rest of us!"

He then turned to Yue Zhong and waved his hands, ordering out coldly: "Chop up that Chinese. I want him alive, and I will cook him and torture. Whoever can remove his limbs, after I'm done with these 2 women, that person will get to be 2nd."

"Kill!!"

The other 11 men that were surrounding the room instantly charged towards Yue Zhong with savage looks. 2 of them were Agility Enhancers of Level 7, their abilities stronger than the rest of the thugs.

Seeing the assault of the 11 thugs, the remaining kids immediately darted behind Yue Zhong, their faces filled with fright.

Each of the thugs wielded sharp katanas, and they looked positively terrifying.

Ida Kyoko couldn't help but scream out in warning: "Watch out!!"

These were 11 thugs encircling one man, she was afraid that once Yue Zhong was killed, they would all be at the mercy of Kuwata Yutaro, and their fates would be worse than death.

"Thrash!"

With that mild snort, a blade beam slashed out across the room. The 11 thugs were instantly sliced into pieces, blood splattering everywhere.

Witnessing such a horrifying scene, Kuwata Yutaro was shocked, his heart instantly plummeting.

Chapter 538: Dispute!

Kyoko, Kaori and the remaining kids were all shocked when they witnessed this. This sort of technique exceeded what was possible, and they were truly shaken.

Kyoko's eyes were filled with veneration: "Too terrifying! His technique had exceeded human limitations. Even a sword saint would not be able to block that blow. He's as terrifying as a demon!"

"AH!" Kuwata Yutaro was afraid, but he was known around these parts as a fierce thug after all. He forcefully suppressed his fear by shouting out loudly, charging at Yue Zhong with a fearsome killing intent.

"What a fast blade!" Kyoko was the chairman of the kendo club back in school, and knew about kendo. She could see that the move of Kuwata Yutaro was not simple, and if it was her facing him, she would

definitely not be able to defend against this strike, furthermore, it was backed by his strength of a Level 23 Enhancer.

Kuwata Yutaro had just run forwards a few steps and reached Yue Zhong, when suddenly, a blade flashed. Kuwata Yutaro's head was sent flying into the sky with a shower of warm blood. His headless corpse continued to stumble a few steps forwards before crashing to the ground.

Yue Zhong stepped forward and picked up the katana from the corpse of Kuwata Yutaro, and a flurry of information appeared in his mind: "Level 2 Treasure: Odachi. An incredibly sharp blade."

Yue Zhong threw the odachi over to Kyoko: "Take it! I can't be protecting you all the time. Only you can protect yourself!"

"Yes! I understand!" Kyoko picked up the odachi and bowed to Yue Zhong, before taking a few swings. Each and every move of hers was precise and purposeful.

"This girl definitely has some background."

Yue Zhong eyed Kyoko before turning around and walked out: "Come with me!"

Kaori and Kyoko followed behind Yue Zhong. They were joined by the remaining Japanese kids.

Outside, the remaining subordinates of Kuwata Yutaro were currently raping their captives indiscriminately. When they saw Yue Zhong and his group step out, they rushed over with looks of savagery.

Yue Zhong watched the incoming bandits indifferently and slashed out, slicing them all in two.

As the scene of carnage unfolded, Yue Zhong strolled through like a bloodthirsty devil, any bandit that got too close would be immediately sliced.

"Terrifying! He's like a demon! He's too strong!" Kaori stood behind Yue Zhong and watched as he dealt with the bandits, her heart filled with shock and reverence.

When the bandits had almost been wiped out, leaving a dozen behind, those remaining ones tried to make a break for it.

"Get the hell on the floor. Otherwise you'll die!"

Yue Zhong barked out coldly when he saw them running. He then shot forwards with a speed that exceeded a Type 2 Lightning, rushing towards the bandits.

In the dark of the night, a few of the escaping bandits were separated in two, as blood splattered everywhere, their innards spilling out of their corpses. It was a horrifying scene, and the screams rang out through the night.

"Don't kill me!! I surrender!"

"Don't kill me!!"

There were many cowards who feared death among the bandits as well. When they saw their comrades being slaughtered like pigs, they immediately got on the floor and begged Yue Zhong tearfully.

In that short carnage, all that was left of the bandit group was 9 people. The rest had become corpses.

The 9 of them knelt on the floor, their bodies trembling uncontrollably as they awaited Yue Zhong's judgement.

Along Kaori's path, she had seen the dead bodies of her fellow survivors. With every passing body, the fury in her heart intensified.

The housewives were naked, their bodies covered with spots of semen everywhere. Their eyes were opened wide, and their bodies were covered in bruises. They had no life left in them. There were also 4 other lolas of about 10 to 11, while they were not dead yet, they had been tortured till the point where they're on the brink of death. Their bodies were bruised, and there was blood everywhere. 6 of the boys were also covered in semen, their necks already snapped, and their faces full of fear even in death.

In the apocalypse, ration was precious. Girls and women would be used to satisfy desires, that was why they were likelier to survive. To the rotten bandits under Kuwata Yutaro, anyone else were just dispensable. They were cruel and vicious, and naturally would not allow the other boys to survive.

When Kaori saw the bandits lined up in front of Yue Zhong, she lost her cool and screamed: "Bastards!! Yue-kun!! Kill them!! KILL THESE FUCKING BEASTS!!"

Hearing her shrill screams, those men began to tremble even more. They looked fearfully at Yue Zhong and his long Black Tooth Blade.

"Shut up." Yue Zhong shot Kaori a cold look.

She felt like a bucket of cold water had been poured over her, and she immediately clammed up.

Yue Zhong ordered: "Kyoko, go tie them up!"

"Yes! Master!" She replied and found a few ropes before tying the captives seriously. She then escorted them to a small storehouse and locked them in.

Yue Zhong gazed at the remaining survivors, as he spoke indifferently: "My deal with Kyoko is completed, the rest is up to you."

After that, he went back to his room and rested.

If it were in China, Yue Zhong would definitely have slaughtered these thugs and used his resources to save the children. He would then train them and teach them how to survive in this cruel world.

However, this was Japan, to a deeply nationalistic person like Yue Zhong, it was a mercy that he didn't slaughter them all. He would naturally not lend a hand to the xenophobic Japanese survivors.

"Kako-chan!! Hang in there!! Hang in there!!"

"Nishi-chan, hang in there!!"

Inside a room, Kaori was currently applying all the precious medicine that they had on the 4 pitiful girls. The girls laid there, their bodies still defiled and covered with bruises and blood, and Kaori's tears would not stop flowing.

Those thugs who had followed Kuwata Yutaro were inhumane beasts, and scum among scum. They had lost all sense of rationality, and had vented their desires without care for the frail bodies of the girls, causing them to be broken.

Kaori looked at those pale and shivering children, who were teetering between life and death, and asked Kyoko frantically: "What do we do, Kyoko? What should we do?"

In this small village, the housewives had been the ones to call the shots. Kaori was just a pretty high school student. She was part of the gymnastics club in school, and had also learnt some karate. After the apocalypse happened, she had become an Enhancer by chance. However, her circumstances were vastly different from Yue Zhong, and she wasn't as strong. She did not dare take risks as well, hence her low level. Other than her status as an Enhancer and a beauty, she could not compare to Kyoko in terms of her intelligence and adaptability.

Kyoko looked at Kaori and the remaining children and frowned. She was extremely clear that once she was brought along with Yue Zhong tomorrow, the rest would not stand a chance out here. In fact, one of the reasons she decided to follow Yue Zhong was to rely on this expert in the future.

Kyoko pondered for a long while, before speaking softly: "Kaori, go plead with Master. Only he has the means to save Kako-chan and the rest."

When Kaori heard that, her eyes lit up, before turning crestfallen again: "Kyoko, he would not help us easily."

After this matter, Kaori had a good feel of Yue Zhong's character. The first meeting the villagers had with him turned antagonistic. Expecting him to help out without asking for anything was basically impossible.

Kyoko suggested: "Simple. Submit to him, accept him as your master. Then he would not abandon us without a care."

One of the boys of about 12 or 13, Kuramoto Kira, immediately opposed vehemently: "No way!! I oppose!! He's cruel and he's a Chinese, our hated enemy! I will definitely not accept him as our master. This is Japan, not China. We are the pride and glorious people of Japan, how can we submit to him? No, no way! He didn't even say he wanted us. We could handle our own problems in the past, we should continue doing so in the future!!"

The village had been fortunate, having found a huge source of rations right at the start of the apocalypse. Also, there had been a moral Enhancer who helped to clear the town, allowing them to stay here hidden. They had gone through much lesser hardships compared to survivors outside, and due to that, they had been blinded by the cruelty of the world.

"Kira-kun!" Kaori heard his words and faltered. This wasn't like ancient times, she too wasn't willing to become a maid.

As long as a modern person did not go through any sort of hardships, no one would be willing to recognize someone else as master. Especially with a Chinese man like Yue Zhong.

Kira held up a small kodachi and declared with confidence: "Kaori onee-chan! I, Kuramoto Kira, swear to work hard to become a hero to protect you guys! With this kodachi in my hands!"

The kodachi was a first class weapon. It had been picked up by Kira from one of the dead thugs. With it, he was suddenly filled with confidence. Although he acknowledged that he was not a match for Yue Zhong, he had the confidence to protect Kaori.

Chapter 539: Type 3 Liger Beast!

Kaori hesitated, before she looked towards Kyoko, imploring her to help with her intelligence and perspective.

Kyoko looked back and sighed: "Kaori! I'm not part of you guys already. You'll have to make the decision yourselves."

By now, the 3 Japanese boys had stood up and were wielding their kodachis. Their eyes flickered with an unwavering resolve, obviously not intending to pledge allegiance to Yue Zhong.

The 3 of them were only about 12 or 13, and under the education system, they were brought up to hate the Chinese. If it wasn't for the strength of Yue Zhong that was so frightening, they would try to assassinate him in the night.

Kira looked at Kaori and spoke loudly: "Kaori onee-chan! The Chinese have a good saying, one must be guarded towards those not of one's race. He would definitely not view us as equals and he might even use us as slaves or cannon fodder."

Hearing Kira's words, Kaori sunk into contemplation again.

"I'll be going!" Kyoko saw the 3 boys filled with hostility towards her, and left the room. She could tell that she was no longer welcomed.

Early the next morning, Yue Zhong brought out the remaining 9 thugs from the locked storehouse.

Yue Zhong approached one of the shorter man who looked about 26 or 27, with ordinary features and asked: "What's your name?"

The young man replied somewhat hesitatingly: "My name is Takeshi Honda! I'm 28 this year."

These thugs did not refrain from committing evil acts in the apocalyptic world. They had seen their fair share of things, and knew that this man in front of them was a truly strong expert. The Japanese revered the strong, and having witnessed Yue Zhong's might, they were both in fright and in awe.

Yue Zhong stared at Honda and questioned: "Where's the nearest radio broadcast station?"

"Radio station? Please let me think for a while!" His brain began to work, before his eye lit up and he responded: "Yama County. Honoki Station. There's a large survivor base in that vicinity. There should be a radio station there."

Yue Zhong then shot out a flurry of questions: "What is the faction ruling over there now? Who's the leader? How many survivors are there?...."

Honda thought hard before replying: "The ones governing Yama County should be the Shimazu clan. The current leader is Shimazu Yuji. There're over a 10,000 survivors there. They're considered the strongest faction, and no one dares provoke them."

When Yue Zhong heard that, his brows furrowed. If it were just a thousand-strong establishment, he could definitely charge by himself to suppress the faction and forcefully obtain the station.

However, a base of more than 10,000 survivors was bound to have a number of strong experts. Furthermore, Japan had plenty of thick forests, which would mean more diverse Mutant Beasts and Mutant Plants. There would definitely be plenty of experts.

Yue Zhong pondered before making a decision: "I just need the radio station anyway! Let's just see how it goes!"

Yue Zhong gave Honda an order: "From now on, you are the captain of this small team. This is my maid Ida Kyoko, her position is higher than yours. Now move out!"

"Yes! I got it!!" When Honda heard those words, he was overjoyed. He was originally just a small-time thug among the group of bandits. Now he had become a captain. Furthermore, following someone as strong as Yue Zhong wasn't too bad. With his strength, it was possible to trample over many obstacles.

In fact, any Enhancer above Level 30 could go around sourcing for survivors to form a small faction. Of course, expanding from there wasn't as easy.

Yue Zhong had always been a man of action, coming and going like the wind. He brought Honda and Kyoko, leaving Kaori and the rest of the children as he walked towards the direction of Yama County. He was not a nanny and had no obligation to look after those that had nothing to do with him.

Seeing Yue Zhong turn around without so much of a care, Kaori's gaze was complicated. She felt uncertain about the future of the village, and was slightly at a loss.

About 67% of Japan were forest areas. Other than the major cities, the rest were forests. Yue Zhong escorted the captives while being led by Honda through one particular forest.

All of a sudden, there was a mighty roar that resounded throughout the forest. Countless birds were alarmed and scattered to the skies.

The moment Honda and the rest heard the roar, their bodies shuddered, their faces full of shock.

Honda immediately exclaimed with fear: "Not good!!! It's a Liger Beast, a Type 3 Liger Beast! We should escape now! Otherwise we'll die."

"Type 3 Mutant Beasts?" When Yue Zhong heard it, his eyes lit up in excitement. He was now at a high level and he had already promoted his Devil Flame into its Second Order stage. Against a Type 3 Mutant Beast, he possessed some means to go against one. It was unlikely that he would be killed quickly. Hence he had the intention to hunt it.

Yue Zhong immediately gave a gun to Kyoko and ordered: "You guys stay here. Kyoko, this is for you, if anyone dares make a move on you, execute him immediately."

Seeing the gun in Kyoko's hands, Honda and the rest of his team all showed signs of greed and envy. The might of a gun was powerful, and some Evolvers could not withstand them still. The bunch of thugs were ordinary, with only 2 low-level Enhancers among them. They were definitely incapable of handling Kyoko.

After passing his instructions, Yue Zhong shot towards the direction of the roar, disappearing in a flash.

In his heart, only Kyoko had some value. The rest could die for all he cared. If the thugs were to run, it would at most be a bit of trouble.

Yue Zhong ran with his maximum speed, arriving near the source of the noise.

Hong!!

Hong!!

When Yue Zhong was approaching the area, sounds of huge explosions rang out.

"There're people!!" Yue Zhong's heart turned cold and he immediately became cautious. He hesitated before retrieving the Stealth skill book and immediately learnt it.

He was in a foreign land, Japan's advanced technology coupled with their xenophobia towards China meant that he was in a more dangerous situation compared to Vietnam.

After all, as long as Yue Zhong had continued to move in the direction of Guang Xi, he would be like a fish in waters. However, in Japan, he had no kin no friends, he didn't even know which direction he could move towards. It was infinitely more prudent to be careful, and turned everything at his disposal to something he could utilize.

Yue Zhong proceeded towards the sounds of explosions, before activating the skill. His entire body blended with the surroundings, without a sign of his aura nor killing intent.

The moment he activated Stealth, even if he were to meet an existence stronger than him by a few times, it would be hard for him to be discovered.

About a few hundred metres in front of him, there was a forest, and he could see a 3-m tall beast of over 15m in length. It had the head of a tiger and body of a lion. A layer of scales covered its body. Its tail was lengthy at 3m, and its eyes were as large as plates. The fearsome beast was currently engaged in a fierce battle with a bunch of people.

"Level 88 Mutant Beast: Type 3 Liger Beast. It has a terrifying body, and is an overlord within the jungles."

There were over 300 people, each of them wielding different firearms and weapons.

The group of people were all high level Enhancers, each of them possessing powerful offensive abilities, like the Ice Pick, Flame Arrows, Earth Spikes, Air Cannons, Gravity Lock, Plant Manipulation, Summon Beast, etc. All sorts of abilities were casted towards the Type 3 Liger Beast.

The 300 Enhancers were all working in tandem without any flaw in their teamwork. With their smooth cooperation, even Yue Zhong would be dead if he engaged them.

The Type 3 Liger Beast leaped with all its might, using its pure strength and power to break away from all the shackles. Even with the power of the various Gravity and Vacuum users, it still possessed a speed that exceeded a Type 2 Lightning.

However, because it was still slowed down considerably, with the numerous abilities being casted on it, parts of its scales were chipped away. There was no considerable damage dealt to it however, but the attacks served to enrage it further.

The Type 3 Liger Beast pounced into the midst of some of the humans, and caused one Enhancer to be trapped under its paws. With a bite, the Enhancer had his throat ripped out. The Type 3 Liger Beast then swept its powerful tail, smashing into the head of one other Enhancer, separating it from his body.

The Type 3 Liger Beast was like a tiger among sheep as it smacked a number of Enhancers to the ground, before biting into their throats, killing them in showers of blood.

As the Type 3 Liger Beast was massacring the elite Enhancers, 4 men stood a distance away observing the situation.

A young man with a 2.5m huge sword on his back looked at the Type 3 Liger Beast with a hint of greed in his eyes: "Powerful! It truly is a Type 3 Mutant Beast. I wonder what will drop out once I kill it?"

A middle-aged man frowned slightly: "Ogawa-kun! That beast is not something you can handle alone! Only by working together, we can take it down. Plus, whatever that drops doesn't belong to you alone, it belongs to Emperor Amaterasu, the whole of Takama-ga-hara!"

Ogawa stared at the Type 3 Liger Beast and licked his lips: "Yes! Yes! Goto-senpai! Let us join hands and deal with this beast then!"

Chapter 540: Killing The Liger Beast!

When the Type 3 Liger Beast decimated those 20 Enhancers, Ogawa's eyes flashed with a chilly light. He waved his hands, and a number of translucent spider silk shot towards the Type 3 Liger Beast noiselessly.

The Type 3 Liger Beast had just slapped a high-level Enhancer in two, when the spider silk stuck themselves to its body.

However, the Type 3 Liger Beast didn't seem to notice the spider silk hanging from its body.

As the Type 3 Liger Beast continued to rampage and tear 6 other Enhancers apart, Ogawa shouted: "Kawada-senpai!"

A burly man who was about 2m tall with rippling muscles shot forwards. His name was Kawada Kotaro. He activated his Second Order Explosive Strength, and his Strength index shot to a whopping 28 times. He grabbed onto the spider silk released by Ogawa and bellowed in rage, before activating his Level 3 Might, causing his Strength to further increase to 56 times. He then pulled savagely, and the 3m tall Type 3 Liger Beast with a body length of over 15m was instantly shackled down.

Kawada Kotaro was a Strength-based Evolver, and the Second Order Explosive Strength could cause him to increase his Strength by 10 times that of a person.

The Level 3 Might would also double his strength as long as it go beyond 400 points. This allowed him to drag the body of the Type 3 Liger Beast down.

When the Type 3 Liger Beast was forcefully suppressed onto the ground, the Enhancers all around immediately launched all their skills on it, causing the entire body of the Liger Beast to be covered in wounds.

"Divine Spear Break!" Komauma Ichiro, an expert wielding a 2m-long Black Spear, roared out. His Spirit was pushed to its maximum, and his entire body seemed to become one with the Black Spear as they turned into a flash of light that shot towards the Type 3 Liger Beast viciously.

Divine Spear Break was a powerful Second Order skill, and when Komauma Ichiro transformed into a shooting star, he managed to pierce the scales of the Type 3 Liger Beast, and even tore a huge wound in its body.

"Seems like Japan has its experts too."

Yue Zhong watched as Komauma Ichiro exhibited his powerful spear move, and he thought silently to himself. If it was him who was faced with that strike, even he would be severely injured.

The Type 3 Liger Beast released an earthshaking roar as its claw swung down like a clap of thunder. Komauma Ichiro's head was instantly separated from his body, and blood splattered everywhere. This was a Level 58 Evolver, and he was just killed in an instant by the Type 3 Liger Beast.

The Type 3 Liger Beast then tugged on the spider silk, as a powerful strength traveled along the silk to reach Kawada Kotaro. He was immediately sent flying through the air towards the direction of the Type 3 Liger Beast, which seized the chance to lift itself up and bite Kawada Kotaro into two. The scene was gory.

Ogawa's reaction was fast, the moment he saw Komauma Ichiro's head being slapped away, he quickly cut off the connection between the silk and himself. That was how he avoided being sent into the mouth of the Type 3 Liger Beast as well.

The Type 3 Liger Beast's muscles became taut as its eyes turned bloodshot. It drew a ragged breath, and leaped forwards while still under the effects of the Gravity Manipulation. In a flash, it appeared in front of a middle-aged man that looked like the leader of the troops and with a swipe of its paws, that man's head was sent flying.

"Baka!!" Ogawa's body's turned cold, and he immediately activated his Level 4 life-saving ability: Flicker, causing his body to disappear from his spot, and appearing about 10m away.

His voice then resounded as he ordered the rest of the Enhancers: "Kill it! All of you, attack!"

Ice Picks, Fireballs, Ground Spikes, Lightning Orbs, all sorts of abilities were launched at the Type 3 Liger Beast. They served to injure it further, causing new wounds to open on top of the already serious old ones.

A battle that uses mass numbers was truly useful, as the Type 3 Liger Beast was slowly being whittled down by the constant barrage of attacks from the Enhancers. There were multiple fist-sized wounds all over its body, and there was an especially large one at its chest. The precious blood was flowing profusely.

The Type 3 Liger Beast was nearing the end of its line, yet it was still not dead. It continued to leap about in the battlefield, causing mayhem and deaths everywhere it went. Heads would pop out from their bodies and their headless corpses dropping to the ground.

As the death toll climbed, the attacks and skills being casted at it were beginning to drop, and it allowed the Type 3 Liger Beast to be more ruthless and savage in its attacks.

Under the slaughter, the remaining 100 Enhancers begin to lose their fighting spirit, and they started to escape in different directions. Humans were after all different from zombies, and they would fear death when facing an indomitable existence.

Ogawa eyed the Type 3 Liger Beast hatefully and gritted his teeth: "Shit!! This time, it's a failure!"

All of a sudden, there was a sniper gunshot, and Ogawa's head exploded in a shower of blood like a watermelon.

From the grass, Yue Zhong's cold eyes looked on as he kept the Falcon Sniper in his hands.

Although he did not know the background of Ogawa and the rest, their strength was not a joke. To him, they were a threat. Therefore, he resolved to take the strongest one out in an assassination the moment he could.

Even after hearing the sniper shot, the rest of the Enhancers did not turn back. They just continued to run for their lives. There was a terrifying beast behind them, and the moment they slowed down, death would fall upon their heads.

After Yue Zhong took out Ogawa, his right hand blazed with flames and a Devil Flame Spear appeared. His eyes flashed with a cold look, and he locked on the Type 3 Liger Beast's position. Taking a few breaths, he then threw it towards the Type 3 Liger Beast as the spear turned into a flash of light and exploded on the body of the Type 3 Liger Beast.

With a large explosion, the Devil Flame Spear penetrated the front leg of the Type 3 Liger Beast, causing the leg to be blasted into bits and pieces. The Type 3 Liger Beast immediately came to a halt as it kneeled down.

Yue Zhong shot forwards with both his hands blazing with Devil Flame, and he fired 2 more Devil Flame Spears without wasting a beat.

At this time, the Type 3 Liger Beast recognized Yue Zhong as its greatest threat. It forced itself to evade one of the Devil Flame Spears, but was unfortunately besieged by the other. The Devil Flame Spear combusted on its body, causing a large wound with blood flowing out.

Waving his hands, Yue Zhong brought out his Stinger and fired 6 consecutive shots at the Liger Beast. All 6 bullets found their target, causing the wounds on the beast to worsen.

Even after suffering such extensive damage, the Type 3 Liger Beast still did not die. Its eyes flashed fiercely, and it tensed its body, leaping towards Yue Zhong with a speed that was just slightly slower than a Type 3 Lightning. It slashed out with its claw, intending to take Yue Zhong's head off.

Yue Zhong was expecting that move and before the Liger Beast had appeared in front of it, he had already activated his Shadow Steps and pulled out his Black Tooth Blade to block in front of him.

The remaining front paw slapped onto Yue Zhong's Black Tooth Blade, and a tank-like force traveled through the blade, causing Yue Zhong to be sent flying backwards.

As the Type 3 Liger Beast launched its assault, Yue Zhong's left hand also conjured out a Devil Flame Spear that expended 80 Spirit and 20 Stamina to strike at the face of the Type 3 Liger Beast.

With a loud blast, a huge bloody hole appeared in the head of the Type 3 Liger Beast, as flames still burned around the wound, causing the brain to be fried.

On the other side, as Yue Zhong was about to smash into a huge rock, a white shield appeared behind him. He crashed into the boulder, but the resulting force caused the shield to disintegrate, before he slid to the ground, his face pale.

"Congratulations on achieving Level 79, you've gained 2 attribute points to be allocated."

A large experience orb flew into Yue Zhong's body, causing him to level up.

A blue treasure box also dropped beside the corpse of the Type 3 Liger Beast.

Seeing the dead Type 3 Liger Beast, a few of the escaping Enhancers immediately turned back, their eyes red as they charged towards the blue treasure box.

A blue treasure box definitely meant something valuable. Even if it was a blueprint, it would be a technologically advanced blueprint. If they could bring it back to Takama-ga-hara, they would instantly leap up the ranks to become important personnel.

A rope suddenly shot down from a nearby large tree, as it coiled towards the blue box, seemingly alive.

"You're seeking death!!" Yue Zhong roared out with anger as he fired a Devil Flame ball towards the tree, causing it to combust and burn. The Japanese Enhancer fell out of the tree, wailing in agony as he was burned alive.

Yue Zhong didn't spare a glance for the burning Japanese Enhancer and in a flash, he appeared beside the blue treasure box and grabbed it.

"Damn Chinese dog! Put that down! That's ours!!" One Enhancer who was Agility-based and Level 46 wielded an odachi as he charged towards Yue Zhong with bloodshot eyes.

"Go to hell!" Yue Zhong shot forwards, and the Black Tooth Blade in his hand swung down, slashing the Level 46 Enhancer in two.
