

Devil World 801

Chapter 801: Emissary!

Yue Zhong looked at the excited Ma Lei and asked with a frown, "Blood-Sucking Bees? What's special about them?"

Ma Lei replied excitedly, "They are a special variation of bees found only in the Green Region. They suck blood to survive and can make blood honey from their prey. This blood honey is extremely precious to any biological life form, helping to nourish and can even help evolve. If one consumes it over a long period, he or she can even reach the Type 4 Divine Warrior realm. While their corpses might not be as precious as the blood honey, they still have energy and is helpful to us humans in terms of evolution. With so many corpses here, we can definitely produce more strong warriors."

Yue Zhong frowned and asked deeply, "With such enticing features, has anyone tried to rear them before?"

Ma Lei continued, "It's rumored that one particular clan of the Dino-race does rear it, treating humans as the source of blood to be fed to these bees. Each time, there would be over tens of thousands of humans sacrificed to these bees, and the produced blood honey is used to nourish the Dino-Generals."

"Tens of thousands?!"

Yue Zhong finally understood why those dino-people would send their units to capture humans. It was likely to farm them and to rear the blood-sucking bees.

A sense of danger suddenly arose in his heart. With the Green Region spanning such a huge area, there should be more than a million humans around here. To those dino-people, they were a good source of bait. Since they ruled the land, there would be no reason for them to let off any human.

Yue Zhong spoke, "Gather some people to keep these bees in storage. Give them out as per rewards for merits or contributions."

Sun Lan Lan was standing beside Yue Zhong, decked in a black uniform and her entire look clean and fresh, her huge chest threatening to burst out of her clothes, giving off an extremely irresistible charm.

When she heard Yue Zhong's order, she replied with confidence, "Yes!"

After this period of training, she had successfully transitioned from being a self-entitled idol to a government official, handling every affair Yue Zhong delegated to her with ease and confidence. She had thus regained her natural pride and dignity as well.

Yue Zhong looked at the corpses of the blood-sucking bees and felt regret, "What a pity! If I had known their use, I would chase after them to find their nest and harvest some blood honey."

When the swarm of bees receded, Yue Zhong's energy consumption had been huge, thus he did not think of chasing them. Had he known that they were capable of such an ability, he would definitely find the nest and gather the blood honey.

Within the Sun Alliance quarters, inside the palace.

Shinya Takahiko slapped the edge of his throne, causing a huge part of it to be destroyed, as he roared in rage, "WHAT?! The Sun Warriors have all perished, even Kisame Shinji is dead? Are you certain that this information is real, Kuma Hikaruni!!"

A skinny man was kneeling and trembled as he replied, "Yes! Chief, your subordinate has gone there to verify it personally. General Kisame Shinji is truly dead, and the 100 Sun Warriors have perished as well!"

Hearing this, all the generals within the palace had ugly expressions.

The Sun Warriors were the trump cards of the Sun Alliance, in the past, when they were at a disadvantage in any battles, the entrance of the Sun Warriors could change the tide almost instantly.

Any of the Sun Warriors in their Sun Armor could become a peak expert out there. When a hundred of them worked together, as well as Kisame Shinji acting as the center of operations, even Type 4 Divine Warriors were no match for them.

Based on their intelligence, Yue Zhong had single-handedly taken down the Vulture Tribe as well as the surrounding tribes. Based on that, Kisame Shinji had acted accordingly with the confidence that their forces could take him down.

Now that they received the report of their troops being lost in the battle, everyone was shocked beyond belief.

After his outburst, Shinya Takahiko forcefully suppressed his rage and asked coolly, "Shinji and the hundred Sun Warriors have been lost, seems like Yue Zhong has some other trump cards. Now he has some prehistoric technology as well, as well as a Type 4 Mutant Beast?"

He fell into a silence, contemplating deeply. If he were to send all his forces, there was an 80% confidence that he could annihilate Yue Zhong.

However, within the Green Region, there were still the Storm Valley and Pterosaur Mountain. If the Sun Alliance were forced back by Yue Zhong, then they would be left open for the Storm Valley and Pterosaur Mountain to launch an attack and conquer them.

As he contemplated, his eyes flashed coldly, "Nishigakete, go tell Yue Zhong, I'm willing to pass him some technology, however, in exchange, I want him to help me hunt a Type 5 Mutant Beast. As long as he agrees to this condition, not only will I pass him the tech, I can even offer a friendship, and conquer the whole Green Region together."

Nishigakete kneeled and kowtowed his respects, "Yes! Your subordinate understands!"

After that, he rose and left the mountain gorge for the distance.

In the Vulture Valley.

Inside a hall, Nishigakete was smiling at Yue Zhong, "Sir Yue Zhong! I'm glad to see you again."

"Glad? More like disappointed, aren't you?" Yue Zhong laughed out sarcastically, leaning back on his sofa that was covered in a Mutant Beast pelt, as he shot coldly, "Nishigakete, you don't think that the matter of your Sun Alliance sending troops to attack my army will be forgotten just like that, do you?"

"That? That was a misunderstanding! General Kisame Shinji had acted out of line and gone ahead without approval from the higher-ups. If he and the velociraptor troops had offended and cost you, let me extend my sincerest apologies now." Nishigakete put on an apologetic expression, as though he really did not know that it had happened. Such thick skin was required when matters of diplomacy and politics were involved.

Nishigakete continued unabashedly, "Sir Yue Zhong, our Sun Alliance had made preparations to discipline General Kisame Shinji, however, we heard that you had already wiped them out. His selfish actions have really caused us to be extremely sorry since they have offended you, and were killed by you, that's only right. However, their armor belongs to our Sun Alliance, and we hope that you can return them to us."

Yue Zhong looked at him incredulously and laughed coldly, "And what if I don't?"

The Sun Armor was a precious treasure, Yue Zhong was naturally not willing to return it.

Nishigakete chuckled and threatened, "Then I'm afraid that it will affect our friendship, and our Sun Alliance will view you as an enemy, sparing no means to wipe you out. Sir Yue Zhong, you might have a few Type 4 Divine Warriors here, but if we were to go all out, we have the ability to deal with a Type 5 Divine Warrior even, I don't think you want to see that, do you?"

Yue Zhong narrowed his eyes, a chilly light in them, and he was about to declare war on them.

However, Nishigakete was astute, and caught the change in Yue Zhong's temperament, as he quickly continued, "Sir Yue Zhong, since you hope to obtain some technology, our Alliance Chief has already agreed to sell them to you, on a condition, after you have helped us with it, not only will we forgo the issue of the Sun Armors, we can even give half our tech stash to you, and recognize you as an ally, sharing Green Region between the both of us."

Yue Zhong's heart was stirred, "What is it?"

If it did not have to come down to fighting to obtain the technology of this world, Yue Zhong did not mind helping out. After all, the roots of the Sun Alliance were deep and unfathomable.

Nishigakete chuckled and replied, "We hope that Sir Yue Zhong can extend a helping hand with hunting a Type 5 Mutant Beast."

Yue Zhong looked at him and snorted coldly, "Hunting a Type 5 Mutant Beast? He truly dares to dream! Don't you guys know the terror of a Type 5 Mutant Beast? Even if a Type 5 Divine Warrior were to lend a hand, it would be hard to kill one in a hit. If you guys want to kill yourselves, please do. I'm not interested."

A Type 5 Mutant Beast could easily capsize a battleship, if they used their innate abilities, they were capable of causing a disaster.

Even Type 5 Divine Warriors would be extra careful when dealing with Type 5 Mutant Beasts, almost 80 or 90% of those who challenged them alone would usually perish.

Even Yue Zhong had to expend all his strength to kill the heavily injured Type 5 Crocodile-Head Beast, trying to hunt a normal, live one was equivalent to committing suicide.

Yue Zhong felt that it would take all of the human experts of the Green Region to work together to hunt a Type 5 Mutant Beast successfully, but even so, it would cost them thousands of lives.

Nishigakete grinned, "Sir Yue Zhong, we're more than clear on the horrors of a Type 5 Mutant Beast at optimal conditions. We will naturally not antagonize one. What we want to deal with is, is a heavily injured one. However, even so, our ordinary Type 4 Divine Warriors aren't its match. If you were to join us, we would succeed. There might be risks, but we feel that it's worth it."

Yue Zhong sunk in deep thoughts, "Alright, I can help, however, if it's not heavily injured, I will not do anything."

Nishigakete smiled, "Fine!"

Chapter 802: Trap!

Yue Zhong traversed through the forest quietly, walking towards a certain predetermined destination. He had arranged to hunt a Type 5 Mutant Beast together, all he required was the location and time to gather, before making his move alone.

Nishigakete tried to mention the alliance with Yue Zhong but was rejected immediately. Yue Zhong did not yet know what the prehistoric technology was capable of, he was not overconfident to the point where he thought he could saunter into their base and leave easily.

Yue Zhong continued quietly through the forest, avoiding a few herds of dinosaurs, before arriving at the location where an injured Type 5 Mutant Beast was rumored to be.

It was a large and vast lake, in the middle, a number of long necks stuck out the water, munching on the various plants around the lake, it was apparently a resting grounds for a herd of diplodocuses.

Their bodies measured more than 100 meters in length, and they were like little moving mountains. In front of them, Yue Zhong was like a grain of rice.

All around the lake, other than the diplodocuses, there were a number of stegosauruses as well. A few Microraptors were gathered at another area, while Anatosauruses and ferocious velociraptors had their own corners. It was as though the dinosaurs were gathered together for a party.

Other than the various dinosaurs, there were even huge prehistoric mosquitoes that were larger than humans, giant dragonflies with wingspans longer than 10m, and many other Mutant bugs.

Seeing this, Yue Zhong could not help but suck in a cold breath. The dinosaurs and Mutant Beasts and bugs here were on another level. Each of the seemingly harmless diplodocuses was actually Type 4 existences, even the Stegosauruses as well.

The Microraptors were smaller and weaker, only at the Type 2 level, however, when gathered together, with over hundreds or thousands in numbers, they were not easy targets to provoke as well.

With the various species lording over their individual territories, even a Type 5 Divine Warrior might be ravaged if he or she entered casually.

After all, Mutant Beasts were stronger than other lifeforms, a Type 4 Mutant Beast would already possess more strength than a Type 5 Divine Warrior. Their only weak point was their speed, and perception senses and intelligence being lower. That was why it was possible for a Type 5 Divine Warrior to kill them, or even some weaker Type 4 Divine Warriors. However, in terms of pure power, it was definitely higher than a Type 5 Divine Warrior.

Yue Zhong came to the lake and saw a man in silver Sun Armor about 2 kilometers away. The person also saw him locked in his position immediately with a strange glint in his eyes.

The man pointed to Yue Zhong's position and muttered, "He's here! Over there!"

The man beside Nishigakete had a disdainful look as he ordered coldly, "He's actually on time, do it!"

In the skies, a warrior with a Sun Armor rode on a pterosaur as they flew across the lake at a high speed. As he shot past, he released a number of red powder.

When the powder descended on the dinosaurs, all of them began to get agitated. Pandemonium ensued as they started to charge in various directions in a mad frenzy.

The warrior on the pterosaur continued to fly towards Yue Zhong.

Yue Zhong's heart turned cold as he retreated explosively, "Not good! This was a trap!!"

The Pterosaur was only a Type 3 Mutant Beast, however, its speed was even faster than Yue Zhong at his peak Type 4 speed.

The Sun Warrior atop its back closed in on Yue Zhong, with a wave, he sent a large amount of powder towards Yue Zhong.

Yue Zhong's eyes narrowed as he waved his hands, sending a blazing tower of Devil Flames soaring into the skies. The flames ate away at the powder, burning them into nothing.

All of a sudden, Yue Zhong felt an intense sense of danger. He activated his Shadow Steps and dodged to one side.

At that instant, a terrifying electromagnetic beam shot from afar, slamming into his right shoulder, blasting it apart in a shower of blood. His entire right arm was gone.

"Sniper! A top-level sniper!!"

Yue Zhong felt a sense of dread as he suppressed the pain, waving his left hand. The spider ring on it spurned out silk that covered his wound, while he leaped through the woods.

At a distance, a man with an insignificant appearance and a mustache laid on the ground, wearing a silver Sun Armor and holding an Electromagnetic Sniper in his hands. He eyed Yue Zhong coldly while aiming. It was this man who had caused Yue Zhong such a grievous injury.

The Sun Alliance was a gathering place for many experts. There were countless talents, and while the human physique was weak and most peaked at a limit of Type 3 Divine Warrior, with the right equipment and weapons, not to mention Type 4 Divine Warriors, even Type 5 Divine Warriors would suffer.

Without the proper weapons, humans were weak, whereas those with the right gear were difficult warriors to contend with.

Shinya Takahiko asked through a voice transmitter, "Fujiki, is it done?"

The short man was called Fujiki Ichiro, the most feared sniper of the Sun Alliance. He had assassinated countless enemies for Shinya Takahiko. In fact, few knew that Fujiki Ichiro had actually assassinated a Type 4 Divine Warrior before.

Fujiki Ichiro continued to aim at Yue Zhong, ascertaining his possible location, while coldly saying, "Not yet. His danger perception is truly outstanding. I only managed to hit his shoulder."

Shinya Takahiko laughed coldly, "That's enough then. Even if he could deal with the Dinosaur Separation Powder, his blood scent would attract those greedy bugs. He's definitely dead this time."

He then turned to the man beside him, whose eyes were filled with a strange glow, "Shenmu, are the large bugs all attracted away?"

Shenmu Xiongnan replied, "Yes, they've been led away."

Shinya Takahiko's eyes lit up as he ordered, "Good! Do it now! Kill that fat bug right now!"

This time, Shinya Takahiko had plotted against Yue Zhong, on one hand, it was to eradicate this enemy, while the other, was to target the injured Type 5 Mutant Beast within the lake.

Once they managed to kill this Type 5 Mutant Beast, they would obtain a huge, rich resource, and train up a new batch of warriors. If the nucleus could be used together with the tech on Shinya Takahiko's hands, then the combat might of the Sun Alliance would go through a huge change, and they could even take down Storm Valley and Pterosaur Mountain at one go.

Under his orders, 10 Silver Sun Armor warriors led 400 white Sun Armor warriors towards the lake. They were about $\frac{3}{5}$ of the current Sun Alliance forces, in order to take down the Type 5 Mutant Beast, Shinya Takahiko was ready to go almost all in.

A distance away, Yue Zhong continued to sprint through the forest, behind him, a large number of dinosaurs and Mutant Beasts, as well as bugs, were chasing after him, one part agitated by the powder, the other, by the scent of his blood.

"Damn it!!"

Yue Zhong continued to flee while pulling out his Stinger to fire at the sky.

In the skies, the Sun Alliance warrior was sticking close on his Pterosaur. At the same time, the flight pattern was unpredictable, causing Yue Zhong to have no way of hitting even with his Second Order Firearms Manipulation.

The rider was extremely crafty, knowing the terror of a Type 4 Divine Warrior. He only followed Yue Zhong from afar, not intending to get close, nor come to blows.

At the same time, due to the mixture of blood and powder, many Type 3 Pterosaurs were flying over.

Eying the warrior in the sky, Yue Zhong's eyes flashed coldly, and he activated his Summon Tamed Beast technique.

A void appeared in the sky, and Greenie, which had evolved to its Type 4 realm, flapped its wings and descended.

Its wingspan was now over 100m and was like a huge beast from legends. The Type 3 pterosaur was merely like a child in front of it.

Seeing the monstrous Greenie suddenly appear over him and his steed, the Sun Warrior felt despair and fear, hitting the pterosaur to flee quickly.

With a single flap of its wings, Greenie's speed reached Mach 2 and appeared above the rider, its sharp beak pecking down at the pterosaur, causing a large hole in its brain. The Sun Warrior was also pecked in two.

After dealing with that Type 3 Pterosaur, Greenie charged into the midst of the other Type 3 pterosaurs, attacking them wildly, causing them to drop dead from the skies.

Chapter 803: Type 5 Diplodocus!

On the ground, the terrifying horde of dinosaurs was charging over at Yue Zhong. All the trees and vegetation in the way were directly crushed and flattened.

Of their numbers, the diplodocuses were the most, while they were Type 4 Mutant Beasts, their speed was relatively slow. It was about half the speed of sound, comparable to 20 times that of a normal person. Such monstrous sizes usually equated to a dangerous strength, as well as innate abilities. However, their speed was sacrificed as a form of balance.

Even so, there were those Type 2 Microraptors which were even speedier. When they ran at their fastest, they were even 30% faster than Yue Zhong.

They continued to pounce on Yue Zhong from the back, using those claws that could rip little tears in the hide of Type 4 Mutant Beasts as they attacked him.

Behind them were the larger Megaraptors, and Velociraptors. As long as Yue Zhong slowed down slightly, he would end up in their midst and be torn apart.

He could almost smell their putrid breath right on his tail, and he took in a deep breath, pushing his Devil Flame to shoot up and at the horde of dinosaurs.

When those Microraptors were caught in the flames, they were instantly cooked like ants licked by fire, giving out crispy, crackling sounds as they fell to the ground, charred.

As a whole bunch of them were burnt to death, the larger Velociraptors and Megaraptors pounced on those bodies, consuming them. Some even fought among themselves, kicking off a domino effect of slaughter.

Still, many of the dinosaurs had been affected by the powder and were latched onto the scent of Yue Zhong's blood. Thus, they continued to chase after him wildly.

Yue Zhong gazed at Greenie which was slaughtering those in the air and commanded in his mind, "Come down!"

Greenie gave up on chasing after those scattered Pterosaurs and flapped its wings to swoop down towards Yue Zhong.

Yue Zhong leaped up onto its back, and Greenie soared back towards the skies with a flap of its wings.

When the dinosaurs on the ground lost their target, they became even wilder and more violent, slaughtering one another under the effects of the powder.

A large number of prehistoric Mutant bugs formed a terrifying cloud that continued to chase after Yue Zhong.

There were Mutant Mosquitoes with wingspans of 3m, Mutant Dragonflies with wingspans of over 10m, as well as Mutant Cockroaches with wingspans of over 6m. Each of them was fearsome, if released on Earth, they could cause a calamity. The most fearsome thing was, these bugs did not go around individually, but an entire swarm. They were chasing after Yue Zhong with numbers.

A single Mutant Bug's strength might not exceed a Type 2 Mutant Beast, but a cloud of them could even swallow and devour an entire Type 4 Mutant Beast.

Yue Zhong gazed at the cloud of insects behind him, sending a powerful blast of Devil Flame towards them.

While controlling the Devil Flame, he chose not to condense the output, instead, allowing it to spread out. The area of effect was larger, reaching almost 10 times the original space. When he was dealing with those blood-sucking bees, he had used the same method.

When those bugs were torched by the cloud of fire, their wings began to burn and they fell from the skies.

These bugs had tenacious vitality, even after their wings were burned, and they slammed to the ground harshly, while many of them died upon impact, there were many others which survived. Especially the Mutant Cockroaches, they were the hardest, only a few were burned to death.

As the cloud of bugs was dealt with, Yue Zhong sat on Greenie and charged straight into the clouds.

The bugs also had a limit to their altitude, after reaching a certain height, they could only give up and fly back down.

In the skies, Yue Zhong had a dark expression as the killing intent in his eyes burned, "Damn bastards, Sun Alliance! I'll remember this!"

He had been cautious but was still plotted against by the Sun Alliance, almost becoming prey for a horde of Mutant Beasts and Bugs that had lost their rationality.

Yue Zhong then took the broken arm and placed it by his shoulder wound. As the Dark Dou Qi circulated, the tendrils and flesh began to reconnect. After an entire five minutes, the wound finished healing, although the expenditure of his Stamina and Spirit was not light.

"Looks like I need to give them a good taste of their medicine."

After recovering, he got Greenie to fly back down.

In the lake, a number of Sun Warriors were treading on the water, supported by abilities. Each step they took caused more ripples out, while they continued to float above.

The elite troops soon came to a huge, meat mountain at the center of the lake, of about 100 meters in height, covering a span of over a kilometer.

Near the mountain, there was a huge hole of about 30m in diameter, its depths unclear, with a thick stench wafting out. There was disgusting black discharge oozing out from the hole, a truly revolting sight.

Shinya Takahiko ordered, "Do it!!"

With his order, the hundreds of soldiers aimed at the hole and fired out countless beams of white light.

As the light beams shot down the hole with unknown depths, huge chunks of flesh and blood blasted outwards.

With such a critical hit, the huge meat mountain shuddered, causing the water to churn and spread out like waves.

The Sun Warriors quickly leaped out of the way, dodging the towering waves.

A long and thick neck came out of the lake, extending towards the sky. This mountain was actually a Type 5 Diplodocus, its body over 2km long. Its neck itself was already a kilometer, and its eyes flashed with a ferocious light. All along its neck, there were many claw marks, bite marks to be seen, the injuries not healing entirely, giving off a putrid stench.

The regenerative abilities of a Type 5 Mutant Beast were no joke, however, on this world, many dinosaurs and beasts had lethal venom and viruses in their claws and teeth. Once injured, it was easy for infection to occur, slowing down the healing process.

With his Regeneration skill, Yue Zhong's recovery abilities were faster than most Type 3 Mutant Beasts. However, when he was bitten by the Velociraptor upon arriving at this planet, he had almost died as well. It was simply due to the bacteria in the Mutant Beast's mouth.

The 400 Sun Warriors were like ants in front of the Type 5 Diplodocus, when they saw it rise up, they could not help but shudder in fear. However, because they were the elites of the Sun Alliance, they did not allow it to affect their mindset. Instead, they readied their spears, pushing their attacks and concentrating them on the wounds of the Type 5 Diplodocus.

The various attacks slammed into the body of the Type 5 Diplodocus.

When the white radiance hit the scales of the Diplodocus, the scales were dented, but the beast was not affected greatly. However, when the attacks hit the huge wounds, the flesh and blood of the Diplodocus would be blasted apart, aggravating them.

Had the Type 5 Diplodocus been at its peak condition, these humans would not even stand a chance. However, it was riddled with injuries, thus, it could only suffer from the opportune attack by them.

As it was assaulted at such a critical stage, the behemoth became infuriated, swinging its massive tail and slamming it on the numerous Sun Warriors.

Without any warning, those who were struck by that tail were turned into meat paste instantly, the Sun Armor on them that was made out of special alloys also dented beyond recognition.

The Type 5 Diplodocus's strength was truly not weaker than most Type 7 Divine Warriors of the various species. It did not matter how strong the Sun Armor was, there was no way of defending against that attack.

With a single slap, over 40 Sun Warriors were killed. The rest of them suppressed their fear and continued to channel their attacks, firing their beams of light at the injured Type 5 Diplodocus.

Faced with an onslaught of over hundreds of attacks, even the Type 5 Diplodocus felt the impending sense of doom. Its eyes flashed and it swung its tail left and right.

Large parts of the lake water were churned up into towering waves that roared towards the Sun Warriors.

As the waves slammed into them, the Sun Warriors were swept away like ants and scattered, many of them forced down under the surface.

All the remaining soldiers were sent flying back, suffering heavy injuries.

The Type 5 Diplodocus then turned around and sucked up large amounts of the lake water, causing hundreds of Sun Warriors to enter its body along with the water.

Chapter 804: Monstrous Threat!

Even in its injured state, the Type 5 Diplodocus was no pushover, as it easily consumed over a hundred Sun Warriors.

At this time, an electromagnetic beam shot from afar, slamming into the eye of the Type 5 Diplodocus.

The right eye of the Diplodocus was already injured before this. That single electromagnetic beam blasted the entire area, causing mucus and eye matter to leak.

As expected, such an accurate shot was carried out by the top sniper of the Sun Alliance, Fujiki Ichiro.

Its right eye heavily injured, the Type 5 Diplodocus began to thrash about in pain.

The lake began to churn as though a hurricane had appeared above it, causing devastating tsunami waves to spread out in all directions.

A number of the Sun Warriors saw the waves and their faces fell, quickly retreating backward.

Shinya Takahiko looked at the struggling Type 5 Diplodocus, his expression ugly, "Damn it, why is it still not dead?!"

By this time, the Sun Alliance had already lost 200 soldiers, and yet, while the Type 5 Diplodocus was heavily injured, it did not show any signs of dying yet.

He looked at the monstrous beast before barking at 10 Sun Warriors in silver Sun Armor, "Go! Attack! Make sure that you attack its injuries! It must die today! Otherwise, we'll fall to the bottom of the 3 overlords of this Green Region!!"

The silver Sun Armor of these generals all lit up, as the runes expanded and covered them, enhancing them to reach the realm of Type 4.

They then blasted forward, charging towards the Type 5 Diplodocus.

As the Type 5 Diplodocus was still focused on its eye wound and was struggling about in pain, the 10 Sun Warrior generals managed to get close to it.

They leaped up nimbly onto its back and charged towards its neck in a few steps.

When they were all located near a wound on the long neck of the Diplodocus, they began using the battle spear to thrust wildly and viciously, tearing more meat and blood from the wounds, chipping away at the life force of the behemoth.

Under the efforts of the 10 Type 4 experts, the wounds on the neck of the Diplodocus became even more serious as time passed.

The beast could not help but unleash an earthshaking roar of pain, causing a powerful shockwave to spread throughout the lake.

Over a hundred ordinary Sun Warriors immediately suffered burst eardrums, blood flowing out of their orifices, as they doubled over on the floor in pain.

The 10 Sun Warriors continued to dig deep into the body of the Type 5 Diplodocus and did not suffer the effects of the shockwave. They continued to unleash blow after blow, nourished by the Sun Armor on them. Without the armor, these soldiers would not have been able to burrow into the body of the beast, after all, they were just human.

Facing the humans who were burrowing into its body like a virus, the Type 5 Diplodocus roared out in rage and pain, slamming its tail on its own neck.

When the huge tail slammed into the wounds, its muscles tightened, directly crushing 2 of the Sun Warriors into meat paste.

Seeing this, the remaining 8 Sun Warriors felt fear, and quickly dashed out from the wounds, fleeing.

Noticing that the humans were finally forced out, the Type 5 Diplodocus's eyes flashed fiercely, and it swung its tail again, smacking into 3 more Sun Warriors with the entire force of its monstrous weight, turning them into meat paste, mixed together with the alloy of their armor.

After killing another 3 of them, the behemoth swept its tail once more, bringing with it a frightening force towards another 2 Sun Warrior generals, crushing the 2 of them.

The huge tail of more than a hundred meters in length was the strongest weapon of this Type 5 Beast. It could even injure a Type 5 Tyrannosaurus Rex. If a Type 6 Divine Warrior were to be slammed with this tail, he or she would likewise be crushed. With the enhancement powers of the Sun Armor, the various generals were already at the Type 4 Divine Warrior realm, but in front of the Type 5 Diplodocus, it was nothing.

"Fucking strong! This beast is truly too frightening!!"

Up in the clouds, Yue Zhong was riding Greenie's back as he looked down. Seeing the Sun Warrior generals being smashed into meat paste, he could not help but feel a chill down his back. His own fate would not be any different if he went down now. The fact that he had managed to kill the heavily injured Type 5 Crocodile-head Beast was because the beast was heavily injured. Had it still been moving, he would have been squashed.

10 Sun Warrior generals had acted, but only 2 managed to make it out alive, escaping to Shinya Takahiko's side.

The Type 5 Diplodocus was truly enraged, its bloodshot eyes staring straight at the Sun Alliance, and it began to charge towards them.

While the beast had monstrous strength, it had a single weakness, which was its speed was the lowest of the Type 5 realm. However, due to its length easily exceeding 2km, each step it took exceeded a hundred steps of a human, hence, when it moved at its maximum speed, its speed was still nearing that of sound, equivalent to a Type 4 Divine Warrior.

Seeing the movements of the Type 5 Diplodocus, the 2 Sun Warrior generals who were thoroughly frightened screamed out and ran towards the city.

The eyes of the Shinya Takahiko flashed coldly, as he roared out coldly into the voice transmitter, "Fools!! Don't lead that monster to the city!! Run elsewhere!!"

The Type 5 Diplodocus had exceeded his expectations, having never fought with a Type 5 Mutant Beast before. He had not expected it to be so terrifying even when injured.

He was an intelligent man and as he eyed his fleeing men, he barked into the voice transmitter, "Storm Valley! Run towards the Storm Valley!"

The 2 Sun Warrior generals adjusted their route when they heard Shinya Takahiko's voice, and quickly dashed towards the direction of Storm Valley.

The Type 5 Diplodocus continued to chase with bloodshot eyes, its entire frame like a mountain. Along its path, all the trees and vegetation were either knocked away or crushed.

The difference between Mutant Beasts and intelligent evolved life forms were that Mutant Beasts had lower intelligence. That was why, a Type 4 Mutant Beast had a strength that could frighten a Type 5 Divine Warrior, but likewise, it could be hunted by a Type 3 Divine Warrior. Furthermore, Type 5 Divine Warriors were intelligent beings and given enough time, they would be able to find the weaknesses of such beasts.

Yue Zhong patted Greenie's back and ordered, "Greenie, go kill those 2 men!" He thought silently, "You want to head to the Storm Valley? Impossible! Today will be your Sun Alliance's demise!!"

Greenie shot towards them instantly.

With its Mach speed, the 2 Sun Warrior generals were instantly grabbed after 2 breaths and Greenie's claws pierced through their heads before it charged back into the skies.

"Yue Zhong!! Damn it!! It really is him, he has a flying Type 4 Beast!! Fuck!!" Shinya Takahiko caught sight of Yue Zhong on Greenie's back, and he was instantly enraged. As he cursed, he had a terrifying thought, as to why Yue Zhong would choose this time to appear.

Quickly, his deepest fears came through, Yue Zhong made use of the spider silk to hand the bodies of the 2 Sun Warrior generals, dragging them in front of the Type 5 Diplodocus as they flew forwards, leading the beast towards the city of the Sun Alliance.

"Shit!! Shit!!"

Shinya Takahiko flew into a rage, the Sun Armor on his body glowing. He was enveloped by a powerful strength, and he immediately charged after them with a peak Type 4 strength.

At this moment, Yue Zhong was still on Greenie's back, constantly activating his Shadow Steps, preventing the sniper Fujiki Ichiro from hitting him. Shinya Takahiko had no choice but to act personally.

With his enhanced speed, he quickly caught up to them.

"You're here? Even if you're here personally, it's useless!"

Yue Zhong saw Shinya Takahiko and his eyes flashed coldly, tapping Greenie's back, and it slowed down slightly, pulling the distance between them and the Type 5 Diplodocus closer.

Seeing this, Shinya Takahiko had no choice but to slow down and run on the outskirts, not daring to get close to the Type 5 beast.

Chapter 805: The Sun Alliance City is destroyed!

Shinya Takahiko did not dare to get close, only shouting at the top of his lungs, "Yue Zhong, I'm willing to hand all the tech to you, and send you 100 Sun Armor. As long as you lead the Type 5 Diplodocus away,

and lure it to the Storm Valley, I will also send you 5 absolute beauties, and work together with you to control the entire Green Region!!"

Yue Zhong watched him and laughed coldly, "Can your words be fucking trusted, you slimy bastard? Today will be the date your Sun Alliance falls."

Since the Type 5 Diplodocus had been injured so heavily, it was sure to bring forth a calamity. When it reached the Sun Alliance City, it would definitely destroy everything in its path.

Shinya Takahiko's face turned pale as he tried another tactic to convince Yue Zhong, "Yue Zhong, this time, it's my fault. However, the 100,000 people in the city are innocent! If you were to lure this beast over, are you going to sentence those people to their deaths? Their homes would be destroyed because of you!! And their future will become bleak because of your actions!!"

He continued hastily, "Yue Zhong, lure this beast away. I know where another Type 5 Beast is residing, as long as the 2 of them clash against each other, we have a chance of killing them. With their nuclei and meat, we can become the overlords of the Green Region!"

Yue Zhong laughed coldly, "Fine! You commit suicide, I can still consider letting Sun Alliance City off. For the sake of the 100,000 people there, you can go ahead and kill yourself!! Otherwise, they will die because of your actions, and their future will become bleak because of you!"

When Shinya Takahiko heard that, his expression turned ugly, as he gritted his teeth and said, "Yue Zhong!! You'll regret this!! I will use all I have to annihilate everything you hold dear!! Your subordinates, your women, and your people!! I will kill them all!!"

After that, with a tap of his foot, he made his way crazily towards Sun Alliance City.

"Trying to flee?"

With a thought, he channeled his Summon Tamed Beast technique, and Type 4 Lightning appeared out of a void, pouncing towards Shinya Takahiko.

The speed of Type 4 Lightning was incredibly fast, exceeding even some Type 5 Divine Warriors. In a flash, it had caught up to Shinya Takahiko and slashed at its head.

"Another Type 4 Mutant Beast!! You can actually command 2!!" Shinya Takahiko stared in horror at the approaching beast and a huge sense of danger arose. The Type 4 nucleus in his Sun Armor glowed brightly, pushing his strength to the realm of a Type 5 Divine Warrior.

He then made use of his surge in strength to slam a fist at Lightning's claws. His power exploded out, sending Lightning soaring back.

As an Agility-based Mutant Beast, its speed exceeded that of a Type 5 Divine Warrior. However, its Strength was at most comparable to a Type 3 Mutant Beast.

Lightning was sent flying backward by a single blow. It tumbled in mid-air, the moment it landed, it disappeared from its location and appeared right behind Shinya Takahiko in a bid to slash at his head.

He was prepared for it, sending another fist out at Lightning.

Both parties became tangled, in a short span of time, it was unclear who would emerge victorious.

Lightning's speed made it hard to kill, while Shinya Takahiko held the advantage with the help of his Sun Armor, he could not do anything about Lightning.

With its harassment, Shinya Takahiko's speed of retreat was reduced drastically and was only able to maintain momentum alongside the Type 5 Diplodocus.

Just like that, the group made their way closer to the Sun Alliance City.

"What the hell is that?"

"Shit!!

"Monster!!"

"..."

When the people in Sun Alliance City saw the massive Type 5 Diplodocus appearing in the horizon, their faces turned to one of horror and fear. Many began to scream and the city was plunged in chaos.

In front of such a behemoth, even Ultraman would seem like a dwarf in front of it.

Many started to lose their shit as they ran around frantically within the city walls. The entire city fell into chaos, as some took the opportunity to rob and rape, giving into their desires before they died.

"Fire arrows!! Fire arrows!!"

In such a critical time, the warriors stationed at the top of the city wall maintained their calm and listened to orders barked by their captain, a man with a huge beard, wielding a large curved blade.

With his orders, the soldiers of the Sun Alliance City released their arrows at the approaching Type 5 Diplodocus.

Most of those on top of the city wall were Type 2 Divine Warriors, their arrows could pierce even armored vehicles. However, as these arrows met the flesh of the Type 5 Diplodocus, they bounced off without doing much. Some of the arrows managed to pierce through the injuries, but they did not cause much harm.

To the Type 5 Diplodocus, these arrows were not even like toothpicks.

The commander saw that their attacks were ineffective, his face turning pale, yet he continued to grit teeth to order, "Load up the God-Breaking Crossbow!!"

A hundred soldiers quickly came up to a huge crossbow made out of the bones of a huge mutant beast, it was about 10m in length, loading up an arrow, also a mutant beast bone sharpened. They pulled the crossbow before releasing it at the maximum tautness.

The bone arrows soared through the air with a loud swish, slamming into the body of the Type 5 Diplodocus.

The might of God-Breaking Crossbow was truly terrifying, penetrating the scales of the Type 5 Diplodocus and blasting out a bloody wound.

However, with a slight shake, the large bone arrows would be squeezed out by its muscles, and the large bloody holes began healing at a visible rate.

This was the true terror of the regenerative ability of a Type 5 Mutant Beast, if it wasn't for the many festering wounds on its body, injuring this behemoth through human means were unimaginable.

Seeing this scene, all the soldiers felt despair. There was nothing they could do to cause any noticeable damage to the Type 5 Diplodocus.

The God-Breaking Crossbow was indeed enough to hurt the Type 5 Diplodocus, and the enraged beast was even more furious now. It increased its pace, and charged towards Sun Alliance City. With every step, the earth seemed to shake.

Within 3 seconds, the behemoth had arrived at the city wall. It swung its huge tail and slammed it against the wall.

Hong!

The entire wall that was sturdy and resilient enough to fend off attackers came crumbling down in multiple chunks.

The hundreds of soldiers stationed on top the wall became buried beneath the rubble.

Inside the city, a hundred Sun Warriors in white Sun Armor came charging out, led by 5 silver Sun Warriors. These were the final guards stationed in the city.

On top of that, a thousand more soldiers came rushing out with large bows.

They clamored up to high vantage points situated throughout the city and began to fire at the Type 5 Diplodocus.

As the Sun Battle Spears fired out light beams, arrows flew through the air as well, together with a few electromagnetic beams, assaulting the Type 5 Diplodocus on all fronts.

Faced with such an onslaught of attacks, the injuries of the Type 5 Mutant Beast worsened, as fresh blood sprayed everywhere.

The massive beast bellowed in rage and pain, charging further into the city.

Due to its weight, each step caused the ground to tremble, and its footprints were etched deep into the ground. Its tail swung towards the palace, turning it into a mountain of debris, as countless soldiers perished.

There did not seem to be anything that could impede its rage and carnage. Over 2,000 soldiers fought with their lives on the line, yet were like ants, not doing anything to the monstrous beast.

Shinya Takahiko watched his city crumble to the ground, the efforts of his predecessors before him going to waste. He felt his chest stifled, and spat out a mouthful of blood, before roaring like an enraged demon, "Beast! Yue Zhong you fucking beast!! I will kill you!! I will kill all those close to you!!"

Yue Zhong disposed of the 2 Sun Warrior generals with a swing, causing their corpses to land in the center of the city.

The Type 5 Diplodocus charged forth, stomping all over the corpses, causing the ground to be filled with blood, unleashing its anger at being injured by those measly ants beneath it.

Chapter 806: Treasury!

The Type 5 Diplodocus continued to rampage throughout Sun Alliance City, its tail swinging across multiple buildings. Everything was being destroyed, and the casualties count was rising.

The elite soldiers were easily crushed like ants beneath the Type 5 Diplodocus. Many people were crying and screaming as they tried to flee in various directions.

Yue Zhong rode on Greenie's back, appearing within the luxurious palace in a breath.

He had just leaped down from Greenie's back when 8 elite soldiers wielding long spears charged out suddenly, thrusting towards Yue Zhong.

He flashed about and evaded their strikes, dashing through their midst.

The 8 soldiers felt their eyes vision go blurry, and their bodies were instantly sliced in countless pieces, as blood splattered everywhere.

After casually killing 8 Sun Alliance soldiers, Yue Zhong pulled out a small handheld computer with a radar component attached.

He looked towards the display and asked Bai Yi, "Within this region, are there any signs or traces of any computers?"

The tablet with the radar component was able to send out radio waves, as long as there were any computer or electronics in usage, it would be picked up by the computer.

Bai Yi's eyes flashed with data lines, in the end shaking her head, "No, there're no traces of any computers."

"Seems like I can only use the other method."

He caught sight of 4 Sun Alliance soldiers running towards him in a frenzy. With a tap of his foot, he disappeared from his position, and immediately smacked the back of the heads of the 4 soldiers, knocking them unconscious.

He then pointed at their foreheads, sending out 4 Puppet Runes into their foreheads.

Their bodies shuddered momentarily before standing up, their eyes blank and vacant.

"Which of you know where the prehistoric tech is being kept?"

The 4 soldiers shook their heads, obviously, their ranks were not high enough to know classified secrets.

Yue Zhong then ordered, "Take me to your original captain!"

"Yes!"

They replied respectfully, turning around, and began weaving through the palace.

Inside the palace, every few seconds, there were soldiers coming at them, and they were easily sliced in two by Yue Zhong.

While these soldiers were strong existences to normal humans, to Yue Zhong, with his peak Type 4 Divine Warrior status, they were just measly ants.

Under their guidance, Yue Zhong came to a secret basement and sliced it open with a single slash.

The moment the door was cut open, 6 elderly men looked towards Yue Zhong in fear, each of them flanked by 2 Type 3 Divine Warriors. They were the 6 leaders of the major clans within the Sun Alliance.

Shinya Takahiko was the strongest expert within Sun City and was the clan leader of the Shinya Clan. In order to control the entire Sun Alliance, the clan required the support of the other clans.

One burly Type 3 Divine Warrior tapped his feet and dashed towards Yue Zhong with a terrifying speed.

With a casual wave of his sword, the Type 3 Divine Warrior was immediately sliced in two, fresh blood spraying everywhere.

"All together!!"

One of the soldiers roared and with a tap of his feet, he charged towards Yue Zhong by summoning multiple clones.

Another soldier waved his hands, firing darts at Yue Zhong.

Yet another narrowed his eyes, channeling a powerful gravitational force to envelop Yue Zhong.

The 11 Type 3 Divine Warriors all revealed their strongest abilities, doing their best to bury Yue Zhong at where they were.

Facing such a fearsome attack, Yue Zhong simply took a step, his blade flashing through the air, and the 11 Type 3 Divine Warriors were turned into slabs of meat that fell to the ground.

One of the old men squeaked out in fear, "Don't kill me!! Spare me!! I will lead the Sakata Clan to submit to you!!"

One old man trembled with fear as he pleaded, "Don't kill me!! I'm willing to exchange gold for my life! I can also take out a Type 4 Nucleus as well as 200 beautiful girls in exchange!!"

These powerful old men within the Sun Alliance were all rich, yet fearful of death. They already lost their courage and vigor of youth. The moment they saw Yue Zhong turning their guards into minced meat, they threw all dignity and pride out the window.

"I can spare you guys, but as my puppets!"

Yue Zhong laughed coldly, and slapped at their necks, knocking them out, before shooting Puppet Runes into their foreheads.

After gaining control of these 6 clan heads, he asked them solemnly, "Where are the prehistoric tech being kept?"

The Fujita Clan head, Fujita Shiki, spoke up, "In the center of the palace, there's a treasury about 3 levels underground. In order to go there, there has to be Shinya Takahiko's written consent as well as the agreement between us 6 leaders."

Yue Zhong directly ordered, "Take me there!"

"Yes!"

Since he gave the order, the puppets led him quickly through the center of the palace. Along the way, more soldiers appeared to obstruct them but were easily taken care of by Yue Zhong.

In front of a huge alloy door, with 2 headless corpses lying beside it, Fujita Shiki pointed at it and remarked, "This is it, in order to get through, you'll need Shinya Takahiko's authorization!"

"Break for me!!"

Yue Zhong pulled out his Flame Blade and slashed down once, causing the door to break into multiple pieces.

He stepped through and immediately noticed a bunch of Electromagnetic Guns, Sun Battle Spears, as well as Sun Armors laid out neatly within.

The total number of equipment could easily equip 2,000 soldiers. However, the concave sphere shapes within each equipment were all empty. Without Mutant Beast nuclei, it was impossible to utilize them.

Within this treasury, the silver Sun Armor numbered the least, only 20 sets were laid out. It was obvious that this particular equipment was rare.

At the center of the treasure, there were 2 light-gold Sun Armor, on them, there were numerous mysterious runes engraved on them. At the same time, the armor was covered with small sharp spikes, giving off a threatening feel.

Chapter 807: Killing Shinya Takahiko!

Underneath the two light-gold Sun Armor, there was a gold box, as well as a golden canister.

Seeing the equipment within the treasury, Yue Zhong's eyes lit up. With a single wave of his hands, the Storage Ring on his finger was activated and sucked everything in, from the Electromagnetic Guns to the sniper rifles, to the Sun Battle Spears and even all the Sun Armors.

After the Storage Ring was upgraded to a Level 10 Treasure, its space was incredibly huge, accommodating everything within the treasury easily. If it had been the Level 6 Treasure still, then he could only keep a portion of it.

Yue Zhong came up to the 2 light-gold Sun Armor, taking them into his ring with a single wave.

He then opened up the golden box, revealing a 30 cm-thick stack of documents, as well as something that was 70% similar to a disc.

Yue Zhong took out the documents and looked through them carefully, revealing a number of blueprints and diagrams for the Electromagnetic Guns and the Sun Battle Armor.

Looking at them, he finally heaved a sigh of relief, "This is great, with these, we finally have some means to defend against the Saint Clan."

After a few months, the Gates of Hell would be opened fully, and the Second World would converge with Earth, allowing the Saint Clan to invade.

The strength of the Saint Clan was truly terrifying, far surpassing the human race. Even with the strength of the humans prior to the apocalypse, it was impossible to contend with the Saint Clan. Under the current conditions where the human race was almost crippled, there was almost no chance that they could defend at all.

With the blueprints of the Electromagnetic Guns and Sun Battle Armor, Yue Zhong could then utilize the research facilities on Earth to manufacture them and empower the human race.

"What is this?"

After retrieving the gold box into his ring, he opened up the golden canister, as a sweet and bloody scent wafted out from it.

He looked carefully, before smiling, "This is the blood honey of the Blood-Sucking Bees!!"

Yue Zhong had obtained information from his subordinates of this world, that this blood honey was an extremely precious resource, allowing humans to evolve. However, it was hard to produce, requiring over a million people to be sacrificed, or hundreds of thousands of Mutant Beasts. At the same time, a single canister could allow an ordinary human to immediately leap into the realm of a Type 4 Divine Warrior.

The Shinya Clan could support the Sun Alliance was not only because of their control over the prehistoric tech but also because they had this valuable blood honey.

Hong!

Suddenly, there was a loud explosion at the entrance of the treasury. Yue Zhong turned around, noticing Shinya Takahiko with his silver Sun Armor. All around him, there were many corpses and blood.

Shinya Takahiko saw the empty treasury, his expression turning savage as he laughed maniacally, "Good! Good! Good! Yue Zhong you bastard, you actually destroyed all that my Shinya Clan has built up. Today, I will make sure to dismember you, and hunt all those that are linked to you!!"

Without the treasury, especially the precious canister of blood honey, the Shinya Clan would become nothing. The moment Shinya Takahiko fell from his position, there was no way the Shinya Clan could continue to maintain their supremacy and dominance over the Sun Alliance.

The Type 4 Nucleus behind his back radiated brightly, filling his body with energy, as his muscles became taut. His aura rose constantly until he reached the peak of Type 4 Divine Warrior realm.

With his Strength raised, he tapped his foot and his entire body appeared right in front of Yue Zhong like a specter, thrusting his spear out at the speed of sound.

Yue Zhong's eyes narrowed, and enveloped his body instantly with his Dark Dou Qi, raising his own constitution. He pulled out his Flame Blade and slashed at the Silver Battle Spear in Shinya Takahiko's hands.

Hong!

The blade and spear clashed in a loud sonic boom, causing shockwaves to spread out with them as the center. Yue Zhong was sent soaring back a few meters by the enhanced Shinya Takahiko, his hands feeling numb and his blood flow turning awry.

Upon landing on the ground, the ground beneath him cracked, forcefully dissipating the residual strength. He had just gotten his bearings when he felt an immense gravitational force pressing down on him, preventing his legs from lifting.

"Gravity Manipulation! He actually has this annoying ability!"

Yue Zhong frowned, and activated his own Second Order Gravity Manipulation, negating a part of the force Shinya Takahiko was applying on him.

Shinya Takahiko disappeared from his location and within that instant, 8 shadows appeared, as 8 of him sent spears thrusting out at Yue Zhong.

This Phantom 8-hit technique of Shinya Takahiko was a secret technique of the Shinya Clan, the moment they utilized it, even a Type 5 Divine Warrior would be heavily injured or killed. Shinya Takahiko's natural talent was high and had awakened the Gravity Manipulation ability, together with this Phantom 8-hit technique, few were his match.

Yue Zhong's eyes glinted, as a void appeared in mid-air, and 10 bone spears struck out at the 8 Shinya Takahikos.

7 of them immediately dissipated when struck by the 7 bone spikes.

As for the real body, the bone spike splintered upon contact, while he continued to charge at Yue Zhong without any reduction in speed. His spear sliced through the air at the speed of sound, aiming for Yue Zhong's heart.

Yue Zhong's Flame Blade turned into a flash of light that met the Sun Battle Spear, and following the powerful sonic boom and knockback, Yue Zhong was once again sent flying back, right out of the Treasury.

Shinya Takahiko became a shadow again, appearing in front of Yue Zhong and sending another thrust out.

Dang! Dang! Dang!

Facing the continuous blows, Yue Zhong was suppressed by Shinya Takahiko, being sent flying back constantly. His inner organs were also shocked over and over, his hands turning numb. The Flame Blade in his hands was almost sent out of his hands a few times.

Shinya Takahiko was also shocked, Yue Zhong was not wearing the silver Sun Armor and was barely below him in terms of advantage. If he were to wear it, he knew he would not be Yue Zhong's match.

"I need to kill him here! Otherwise, the entire Sun Alliance will be swallowed by him!!"

The killing intent in Shinya Takahiko's eyes soared, as he raised his Battle Spear and charged right for Yue Zhong without care for anything else, raising his prowess by another 30%.

Dang!!

After forcefully blocking another dozen strikes, Yue Zhong's right hand finally went numb, and the Flame Blade in his hands was knocked away.

Shinya Takahiko's eyes flashed with joy as he struck out once more for Yue Zhong's heart.

With a cold light, Yue Zhong summoned a powerful pillar of Devil Flame to blast towards Shinya Takahiko.

Shinya Takahiko's face discolored, he could sense that this Devil Flame was incredibly dangerous. He dodged to one side, evading the blast of flames.

By that time, a silver battle spear shot out from the flames together with a shroud of Dark Dou Qi, thrusting towards Shinya Takahiko.

Taken aback with shock and fear, the spear slammed into his silver Sun Armor.

With a loud explosion, the collision forced Shinya Takahiko to fly back dozens of meters. His Silver Battle Spear was also knocked away, while his entire body slammed into a wall, causing it to crack.

In front of him, Yue Zhong had already put on the Silver Sun Armor, behind him, a Type 4 Nucleus was radiating brightly.

Shinya Takahiko's expression turned venomous as he muttered out of despair, "Type 5! Indeed, once you equip that, your strength can reach the Type 5 realm!!"

"However, even if I die, I will not let you off easily!! I want you to be buried with me!! All that you hold dear will suffer!! I will drag them down with me!! Hahaha!!" With a savage laugh, his body suddenly blew up, a light shooting out from his body, directly penetrating the city, soaring into the skies.

As it had happened so suddenly, Yue Zhong had not expected such a strange change. He had not enough time to react when the bright light already disappeared into the skies.

Yue Zhong frowned, a bad premonition arising in his heart. However, he had no idea what Shinya Takahiko had just done, and was unclear about what it held for the future.

Yue Zhong swiftly left the underground basement, appearing back at the ground level.

He caught sight of the Type 5 Diplodocus still rampaging in the city, and all the structures had been demolished, while many people were fleeing from this invincible existence.

Yue Zhong eyed the beast and pulled out his Electromagnetic Gun, firing at the wounds of the behemoth, blasting the wounds wide open in a shower of blood and flesh.

The might of the Electromagnetic Gun was terrifying, with every hit, the wounds of the Type 5 Diplodocus burst open, causing fresh blood to flow.

Chapter 808: Battling the Type 5 Diplodocus!

Facing such an onslaught, the Type 5 Diplodocus was once infuriated, charging towards Yue Zhong's direction in a frenzy.

By now, Yue Zhong was extremely clear on the attacking style and weaknesses. He dodged to one side, while continually firing at the Type 5 Diplodocus.

The Type 5 Diplodocus has a wide surface area and monstrous strength. Its regenerative abilities were overpowered and it had tough scales. However, there was a weak point, which was, its speed. It was barely at the level of a Type 4 Divine Warrior, and according to Yue Zhong's observation, the Type 5 Diplodocus did not seem to possess any innate skills.

A chase ensued, one chasing the other fleeing, as they quickly left the city. Under Yue Zhong's continuous assault, every single wound of the Type 5 Diplodocus continued to bleed badly.

The recovery rate of the Type 5 Diplodocus was insanely strong, however, although it was injured, it quickly healed from its wounds, chasing after Yue Zhong with renewed vigor.

Yue Zhong frowned, "This can't go on, otherwise, even after one more day, I won't do much more to this fellow. In fact, it's likely I'll suffer."

Although the body of the Type 5 Diplodocus was riddled with wounds, looking extremely pathetic, in truth, it still had plenty of vitality, and it could destroy another 2 cities if given the chance.

With a flip of his hands, Yue Zhong whipped out the light-gold Sun Armor, inserting a Type 5 Nucleus into the slot.

The gold Sun Armor immediately radiated, releasing a powerful aura, giving off a threatening feel.

He quickly put it on and felt the immense energy powering his body. Under its enhancement, his strength was rising rapidly.

"Type 5 initial realm, Type 5 mid realm!! No! This is my limit, any further and my body would not be able to take it."

Yue Zhong's strength was pushed to the middle realm of Type 5 and he chose to stop the strengthening. Under the support of the Type 5 Nucleus, the light-gold Sun Armor could push a person to reach the Type 6 Divine Warrior level, however, Yue Zhong's body could not endure such force. It would cause his body to explode.

After having his body reached the mid-stage of Type 5, with a tap of his foot, his entire body shot towards the Type 5 Diplodocus.

In a few breaths of time, Yue Zhong had reached the Type 5 Diplodocus, his entire body turning blurry, before splitting into 3 that shot in different directions.

The Type 5 Diplodocus swung its massive tail, bringing along a number of trees and boulders as it struck one of the Yue Zhongs, turning him into dust.

Although the speed of the Type 5 Diplodocus was considered slow, as long as anything entered its range, its tail could turn even a Type 6 Divine Warrior into meat paste.

The Type 5 Diplodocus slapped its tail against the ground 3 times, causing countless trees and boulders to be uprooted and flew around in a powerful hurricane, and all 3 Yue Zhongs were smashed into bits.

As the last Yue Zhong was smacked apart, from the various debris, Yue Zhong shot towards the skies, running up the body of the behemoth, reaching one of the wounds in a flash.

When he reached his destination, the light-gold Sun Armor on him glowed brightly, allowing the Type 5 Nucleus to fill him with energy. He readied the spear in his hands and thrust it viciously into the wound.

A powerful golden beam shot out, piercing through the body, causing a large amount of flesh and blood to be churned out.

This single strike from Yue Zhong was more powerful than the combined efforts of the 10 Sun Warrior generals, almost penetrating through the entire neck of the Type 5 Diplodocus.

The Type 5 Diplodocus let out a painful roar, swinging its powerful tail towards the wound that Yue Zhong was on.

Hong!

Following a powerful impact, the muscles of the massive dinosaur went taut, forcing Yue Zhong out.

Yue Zhong seemed to have anticipated such a strike, quickly placing the gold Sun Battle Spear horizontally, forcing the power of the Sun Armor into the spear, causing it to fire out a golden beam through both ends.

The tightening muscles of the Type 5 Diplodocus was instant shredded causing more blood to flow.

The Type 5 Diplodocus immediately roared with pain and started to charge in some random direction, continually using its tail to smack its neck, hoping to cause enough shock to Yue Zhong to kill him.

Had Yue Zhong only been at Type 4 Stage, he would definitely have been struck dead by the continuous powerful slaps. However, while hiding in its flesh with his newfound Type 5 strength, he forcefully bore the impact and continued to tear his way around the body. Countless blood arrows were forced out of the neck of the Type 5 Diplodocus, splattering on the ground.

The body of the Type 5 Diplodocus was regenerating at a terrifying pace, however, with the constant blows by Yue Zhong at his Type 5 Divine Warrior stage, it could not recover fast enough.

After running for a long time, the Type 5 Diplodocus let out one last moan of agony, before slumping to the ground.

Feeling it falling, he continued to stay within its body, not daring to make any sudden moves, instead, continuing to destroy the body from within.

Another 3 minutes passed, he felt that the behemoth was no longer moving, he carefully climbed out from the large wounds of the Type 5 Diplodocus.

Yue Zhong ran another lap around the wound, ascertaining that the Type 5 Diplodocus was immobile, before running towards its head.

Chapter 809: Taming the Type 5 Diplodocus!

As Yue Zhong ran up towards the head of the Type 5 Diplodocus, he looked towards its eyes and noticed that the huge eyes were blank, the life force within ebbing away. There was no sign of the previous rage and rampage.

Yue Zhong looked at it and knew that although the beast was still not yet dead, it wasn't far from it.

If it died, a large amount of life force would be absorbed into his God and Devil Imprint, strengthening his body and soul.

As he looked at the feeble Type 5 Diplodocus, he suddenly had a thought, "Tame it! If I can tame it, then I gain another powerful trump card in my arsenal!!"

With its powerful combat strength, the moment it acted, it was even more terrifying than an entire fleet of tanks.

In its charge, even a horde of zombies would be flattened like ants.

With a flash of green in his hands, the Tamer Technique landed on the forehead of the Type 5 Diplodocus.

When the Tamer Technique landed on the forehead of the beast, it congealed into a rune for barely one second before it dispersed. It seemed like it would take more for the Second Order Tamer Technique to control the Type 5 Mutant Beast.

However, the Type 5 Diplodocus was already close to death and did not possess any strength to resist. After 5 seconds, the rune that seemed to be dispersed managed to enter the forehead, forming a connection between Yue Zhong and it.

The connection was extremely weak, as though it would be extinguished any moment. Through the connection, Yue Zhong could tell that the beast was not far from death, and it was unable to heal with its own strength.

Without a moment of hesitation, he flipped his hand, pulling out a jade bottle. He pried open the mouth of the beast and poured a single golden colored blood into its mouth.

The golden blood was of the unknown Type 9 expert from some unknown world and was the strongest tonic to help breakthrough and recovery.

The moment the blood entered its mouth, the mental connection between it and Yue Zhong strengthened a lot. Its originally dull eyes regained some color and revealed a pleading look to Yue Zhong.

The blood of the Type 9 expert was truly a powerful nourishment. It possessed frightening recovery abilities, however, the amount was too little. Since the body of the Type 5 Diplodocus was over 2 km long, a single drop was insufficient.

Yue Zhong looked at it, gritting his teeth, and poured more drops into its mouth.

When he poured the 15th drop, the life force of the Type 5 Diplodocus began to stir, and he could feel the beast starting to regenerate with its own strength. He then heaved a sigh of relief.

Just as he was prepared to keep the jade bottle into his ring, the Type 5 Diplodocus suddenly opened its mouth and uncurled its tongue, licking up the jade bottle and swallowing it.

Yue Zhong stared in horror and kicked out at the beast, "Damn it you stupid beast!! I shouldn't have saved you!!"

The blood of the Type 9 expert was incredibly precious, Yue Zhong only possessed 3 of them. He had kept it purely in preparation for the worst-case scenario. Regardless of the severity of his wounds, as long as he did not die, the blood was enough to pull him back from the clutches of death. Now that the Type 5 Diplodocus actually swallowed one entire bottle, he could not help but feel sour.

The Type 5 Diplodocus swallowed the blood of the Type 9 expert and its body began to undergo a heaven and earth change, the various injuries throughout its body healing at a rapid pace. Its lost and damaged flesh was growing quickly, and the wounds that were festering due to bacteria were cleansed and repairing themselves.

At the same time, the dark scales of the Type 5 Diplodocus began to split and fall off its body, as its tail continued to rub against itself. The old scales fell off, revealing a new layer of slightly silver scales, obviously, its defense had evolved.

After molting, the Type 5 Diplodocus used the mental connection with Yue Zhong to express its joy, lowering its head to pay respect to him.

Yue Zhong looked at it and commented, "You shall be called Mount Tai from now on!"

If the Type 5 Diplodocus did not move, it truly looked like a little mountain.

Type 5 Mount Tai let out a loud trumpet of joy, expressing its pleasure at the name.

The main difference between Mutant Beasts and intelligent life forms was their intelligence, such a simple name was enough to make it happy.

Yue Zhong gazed at the Type 5 Mount Tai before quickly keeping the molted scales into his storage ring.

These were all Type 5 Mutant Beast scales, in terms of defense, they were comparable to the light-gold Sun Armor. The only disadvantage was that they did not have the enhancing abilities of the light-gold Sun Armor.

However, just the defense was extremely useful. With the scales, a large number of defense suits can be manufactured.

After keeping the scales, Yue Zhong then patted Mount Tai's head, allowing it to leave and roam on its own.

Since the beast was more than 2km long, and over a 100m tall, its food consumption was sure to be a huge figure. Keeping it by his side would just add to his burdens.

Furthermore, such a large beast would only be able to survive in this world where there were plenty of other Mutant Beasts and dinosaurs. Otherwise, even without enemies, they will starve to death themselves.

"What is this place?"

After leaving Mount Tai, Yue Zhong assessed his surroundings, noticing a dense, lush forest in front of him. As for his current location, he was unsure.

He looked all around, his scalp turning numb. He was really lost, "Shit, I'm in trouble if I can't find my way back!"

The Sun City had been pointed out by Ma Lei, and Yue Zhong knew the way there after secretly scouting the location. As for his current place, he had no idea where it was.

"Ah, forget it, I'll just follow the road!"

As Mount Tai lumbered off, its huge frame caused its feet to sink deep. As long as he followed the tracks, he should be able to head back to Sun City, from there, he would find his way to the Vulture Valley.

"Who are you?!"

All of a sudden, there were rustling in the bushes nearby, as 2 beautiful women with valiant temperaments jumped out, with bows in their hands. Their skin was dark but full of health, they had short hair, and over their chests, they had some layer of Mutant Beast scales. These were obviously warriors.

Yue Zhong looked at them and smiled, "I'm Yue Zhong."

One of them with blue hair and grey eyes barked, "What are you doing in our Storm Valley?"

Yue Zhong replied honestly, "Truthfully, I ended up here by accident and now I'm lost."

The other beautiful warrior, with a pair of beautiful legs, laughed coldly, "Lost? What a lousy excuse. I think you must be a spy sent here to infiltrate our Storm Valley! No men are good! Full of lies!"

Yue Zhong was shocked, "This is Storm Valley?"

The warrior with beautiful legs laughed coldly with sarcasm, "Continue your act! When I capture you and interrogate you, you'll spill everything!"

Yue Zhong's brows furrowed, just as he was about to retort, he swept a sudden glance to his sides.

More robust, healthy-looking women stepped out from the forest, each of them with bows, aiming at Yue Zhong, their gazes cold. The moment the order was given, they would not hesitate to use the bow, shooting at him on the spot.

The other female warriors had burly builds, and their muscles were powerful, looking even more masculine than men, and were not as beautiful as the first two.

One particular petite young girl went down on one knee in front of the blue-haired beauty, speaking coldly but with respect, "Willianna, the 7th Combat Unit is here! The Queen's orders have been given, please execute the cleaning quickly!"

Willianna's eyes flashed with shock, "Luo Xin, the Queen had been alerted? Seems like the Type 5 Mutant Beast heading to our Storm Valley is for real!"

Willianna then turned to Yue Zhong with an icy gaze, barking, "Yue Zhong. Stop your meaningless resistance. Surrender now, otherwise I can only choose to kill you."

Yue Zhong's eyes flashed with a glint as he raised his hands, "Alright! Come catch me."

Her muscles went taut, as she inched closer with wariness. Her intuition told her that Yue Zhong was a truly dangerous being. When she came up to him, she used a rope made out of a Type 3 Mutant Beast tendon, tying him up securely. Most Type 3 Divine Warriors would not be able to break out of this.

Chapter 810: Storm Valley Queen Luo Qing Qing!

Willianna got close to Yue Zhong and grabbed his clothes, coldly saying, "I'm warning you, don't try anything funny. You'd better be obedient; if you dare disturb Her Majesty, even if you die 10 times, it will be insufficient to cleanse your offense!"

She saw that Yue Zhong was being so compliant and felt suspicious. However, the Queen was already prepared to deal with the huge matter at hand, thus she had no choice but to bring Yue Zhong along and guard against him.

Yue Zhong glanced at the alluring Willianna and chuckled, "Relax, I won't try anything funny. Furthermore, isn't it good to have me beside you? If I am harboring any thoughts, the first unlucky one will be you."

She looked at him, and snorted condescendingly, "Hmph! Just you? I can easily subdue you. Although your innate physique might be stronger than us women, under proper training and combat, women are not necessarily worse than men! We might even be stronger!!"

Obviously, this Willianna was quite an opinionated feminist.

Yue Zhong did not even attempt to discuss this topic with her, instead, observing his surroundings carefully.

Soon after, from the forest, 200 beautiful female warriors equipped with green battle armor that had runes engraved on it, as well as longbows on their backs came trekking out. Their faces were cold and impassive, their gaits steady and containing a certain hidden strength.

They continued to weave through the forest, maintaining their vigilance, taking up posts and positions. The moment anything were to go wrong, they would be able to react at the first notice.

Under the protection of 8 fair-skinned beauties equipped with the same green battle armor, an exceptional woman with an incomparable grace and allure came walking over. She had a beautiful white cape attached to her battle armor, her thick lush hair flowing down. Her legs were long and beautiful, her figure voluptuous and perfect, and her aura was both icy and oppressive.

Yue Zhong caught sight of that beautiful leader, her entire bearing was enough for him to sigh inwardly, "Beautiful! What a powerful woman!"

This controller of the Storm Valley, Luo Qing Qing was definitely the most self-confident and beautiful woman that Yue Zhong had seen. Even Qi Qing'er was slightly inferior.

Every single one of her guards was also top beauties, their demeanor and attitude the same, and they would not lose to Chen Yao or Ji Qing Wu in terms of looks. However, when walking beside Luo Qing Qing, they were reduced to the leaves of a rose.

It was the first time Yue Zhong had seen such a woman who was exuding overbearingness, as though there was nothing she could not do, and no enemy she could not defeat.

Such arrogance and confidence could only come from countless victorious battles, maintaining authority for more than a number of years. It was apparent that this woman did not just rely on her looks alone, but was a capable and powerful leader, a Type 4 Divine Warrior in her own right.

Even without the proper battle experience, a person could rely on the Blood Honey to reach the Type 4 Divine Warrior stage. However, such a person would not be able to best another Type 4 Divine Warrior who managed to climb their way up. The aura would definitely be different.

"Greetings, Your Majesty!"

In an orderly fashion, every single female warrior got down on their knees, calling out their greetings with reverence. They held a deep respect for this woman in front of them. Because of her, they were able to lead a life of dignity and pride.

Even the icy Willianna was on her knees, a look of reverence on her face as she gazed at Luo Qing Qing.

In this area, among all the kneeling female warriors, only Yue Zhong was standing, sticking out like a sore thumb.

Willianna saw Yue Zhong standing out by her side, and her heart was shocked. However, she was afraid of offending the Queen, so she did not make any noise or actions, instead, gritting her teeth through it.

"Rise! Make preparations for battle!"

Luo Qing Qing did not seem to spare a glance over, just ordering indifferently as she continued towards the direction of the Type 5 Diplodocus.

"Thank you, Your Majesty!"

As she left, the female warriors stood up.

Willianna immediately grabbed Yue Zhong's clothes and barked viciously, "Damn bastard, why didn't you kneel?"

Yue Zhong took in her fragrance, shrugging nonchalantly, "She's your Queen, not mine. I don't have to kneel."

In response, Willianna stared coldly at Yue Zhong, "Wait till we get back to Storm Valley, you'll get it!"

Yue Zhong laughed and did not argue with her.

Seeing that Yue Zhong was still so carefree, Willianna got even more furious. She was used to men trying to get her attention or agreeing with her, but seeing this indifferent person in front of her made her feel like whipping him. However, in front of the Queen, she did not dare do anything. Hence, she just suppressed her annoyance.

"Kyoko, how is it?"

Luo Qing Qing came up to one of the footprints left by Mount Tai and asked a young, pretty girl beside her with short hair, a petite build, and an impressive pair of breasts.

This big-boobed beauty was called Ao Kyoko, one of the 8 personal guards of the Storm Valley Queen. She had a powerful analytical ability.

Luo Qing Qing was able to expand and consolidate her control and authority within the Green Region alongside two other male overlords was also due to her 8 personal guards.

A powerful faction could not just rely on a single leader, there had to be many other talented delegated positions as well.

Kyoko grabbed a handful of mud that was dyed with blood and took a whiff, before looking around. She frowned and said, "This Type 5 Diplodocus seemed to have been gravely injured, and laid here. However, it suddenly recovered for some strange reason and left."

Luo Qing Qing arched her brows, and came to a scarily accurate guess, "Type 5 Diplodocus? The Sun Alliance actually dared set their sights on it. They truly do not know the vastness of the heavens and earth. Even if a Type 5 Mutant Beast was heavily injured, it would be able to destroy any one of our headquarters."
