

## Devil World 821

### Chapter 821: Cracked Tooth Gorge!

Yue Zhong's eyes brightened up at those words, "Energy Shields and Converters!"

Yue Zhong had a few equipment that utilized the same concept, such as the Shield of Light from the system, and the Bronze Spiritual Bell. Both were examples.

However, with the passing of time, enemies grew stronger, and the effectiveness of the Shield of Light and Bronze Spiritual Bell diminished. Even so, they were precious defensive treasures.

If he could mass produce such equipment, the casualty rate of Yue Zhong's soldiers would be brought down a lot, increasing their combat power to a whole new level.

Yue Zhong asked curiously, "Since the Storm Valley has such advanced technology, how come I don't see your people equipping them?"

Liu Mei'er replied, "Although the Storm Valley possesses the resources and blueprints, we lack the ability to produce them. After all, there are various components required, and only Phinea of the Storm 8 Greats can produce some from Mutant Beast bones. As of now, there are only 40 such shields that could utilize the technology. Those 40 Storm Battle Shields have been brought by Phinea to guard at the Cracked Tooth Gorge, defending against the Dino-General Ku Ken!"

Yue Zhong's brows arched as he asked curiously, "Defend against the Dino-General Ku Ken? You guys can hold your own against the Dino-people?"

The Dino-people had terrifying strength, which Yue Zhong had seen for himself in Temron Prison. They could summon a dozen Type 4 Low-Grade Dino-Generals and even a single Type 5 Mid-Grade Dino-General at the snap of a finger. With such forces, Yue Zhong could not fathom how the Storm Valley could possibly defend against them.

Liu Mei'er chuckled, "In terms of a frontal clash, of course, we aren't their match. A single mid-grade Dino-General could lead 4 of his subordinates to wipe out entire forces over at Cracked Tooth Gorge out. However, the peaks of the Gorge are truly high, each peak towering at about 3,000 meters. The cliff walls are steep and hard to climb as well. The valley is narrow and hard to traverse, only allowing a single person through. Phinea had led a thousand of Storm Valley's finest to stand guard there. Even a Mid-Grade Dino-General would find it hard to pass. Other than that, we also have an alliance with the Winged Race over there. With their help, there is no way that the dino-people can get through the Gorge."

She turned serious, "In fact, Yue Zhong, if it hadn't been for my overlooking of Zheng Zhen and Dao Ge, with just their own strength, it's impossible for them to enter Storm Valley. Even for someone as strong as you, you wouldn't be able to go against the entire Storm Valley. While every single one of the Storm 8 Greats is below you in strength, with their unique abilities, as long as all of them work together, together with the Storm Battle Armor, even a Type 5 Mid-Grade Dino-General would not be able to beat them."

Yue Zhong nodded quietly as he listened. He knew that there were many strange abilities out here. Some sick, overpowered individuals could even kill Type 4 experts when they were just Type 3. After all, combat did not rely on just the level of strength they had. There were so many factors involved.

Yue Zhong had come across his fair share of experts stronger than him. Every single one of the Storm 8 Greats was talented geniuses, having strange abilities was not something unexpected. Instead, if they did not have them, they would have been torn apart by the Dino-race long ago.

Yue Zhong suddenly asked, "Can the forces over at Cracked Tooth Gorge defend against High-Grade Dino-Generals?"

That was an existence of the Type 6 realm, Yue Zhong did not expect the Storm Warriors to be able to fend one off just with the power of the Storm Armor alone.

Liu Mei'er laughed bitterly and shook her head, "A High-Grade Dino-General is a demon-like existence. If they were to attack, it would only take a single day for them to crush Cracked Tooth Gorge. Other than fleeing, there's nothing else we can do."

Yue Zhong's heart sank when he heard that, as expected, a Type 6 Divine Warrior was still a terrifying disaster.

Liu Mei'er continued softly, "However, there are not many in the Dino-Race that have reached that level. I think there are only about 20 or 30 of them. They are all overlords and have their own countries or territories. Unless the Dino-King commands them, they would not act easily. Because of that, our Green Region is able to exist. If they were to act, even if all of Green Region banded together, it would not amount to much."

He sighed before asking, "With Dino-General Ku Ken's strength, rate the rest of the factions."

Yue Zhong had a very bad feeling. In this world which was dominated by the Dino-Race, every single faction was a terrifying existence.

Liu Mei'er replied, "Dino-General Ku Ken is a Low-Grade one, he stands guard at Cracked Tooth Gorge, having tried a few times to invade Green Region, but failing each time, thanks to Phinea and her troops. He belongs to the Stegosaurus King's Kingdom. The Dino-people of the Stegosaurus Kingdom follows the evolution path of the Stegosaurus, each of them possessing a dangerous close-combat ability. Their bodies are usually covered in spikes formed from bones. The King, Ku Raiken is a Type 6 Divine Warrior."

Yue Zhong frowned, and asked a few more questions, before dismissing her to rest.

The Cracked Teeth Gorge was a crevasse of towering mountains and steep peaks, one of the few natural paths reaching Green Region within the Dolan Mountains, as well as the only path connecting the Stegosaurus Kingdom to Green Region.

At a particular narrow path with cliffs on either side, there was a huge wall of over 200m cast in greenrock.

There was no entrance in the wall, only a number of small bullet holes, with numerous Storm Warrior elites hidden behind, using their electromagnetic guns and battle spears to keep watch.

From time to time, a patrol troop formed out of a dozen winged people would fly one round from above the wall, checking on any potential attacks from the dino-people.

The 3,000m mountain peaks were an insurmountable wall to normal people, but to those of the dino-race, as long as they spent enough time and energy, they could traverse up the 3,000m-tall peaks. Without the Winged Race helping to scout, Cracked Tooth Gorge would have long since fallen.

A pretty lady with her long, blond hair tied up in a ponytail and wearing a Green Storm Armor came to the wall, asking one of her subordinates, "Jenny, how's it?"

Jenny swiftly replied with respect, "Lady Phinea, there's nothing out of the ordinary!"

Phinea's gaze traveled to the dark, distant horizon.

Suddenly, from the skies, there was a blaring sound of an alarm.

Phinea's face fell as she ordered loudly, "Enemy attack!! Everyone, prepare for battle!"

At the same time, a number of warriors charged into the interior parts of the wall, leaving only a few dozen Storm Warriors with shields.

Soon, from the skies, over 300 of the Winged Race came flying towards the Gorge, their expressions one of shock and fear as they flew over. Right behind them, there were huge swarms of Blood-Sucking Bees chasing after them.

"Ah!! Help!!"

"AH!!"

"..."

A number of the weaker Winged people were slower and were immediately pounced on by the Blood-Sucking Bees. They struggled in agony for moments before turning into dried corpses, plunging to the ground.

When the rest of the Winged people saw this, they flapped their wings furiously, fleeing as fast as they could. There were only a few hundred of them, if they were caught, it would spell their doom.

When Phinea caught sight of the Blood-Sucking Bees, her eyes turned to one of shock, as she barked, "Prepare your fires!!"

The eyes of one particular pretty Storm Warrior narrowed, as her Type 3 Nucleus glowed. She opened her mouth and spat out a blazing trail of flames towards the skies, enveloping a huge patch of the bees.

As the flames licked around them, their wings were burnt off, and many of them fell towards the ground like rain.

Some of them twisted their bodies, transforming into a cloud of bugs that shot downwards.

Phinea followed up, "Winds!"

Another Storm Warrior waved her hands, sending powerful tornados up into the skies, clashing with the incoming bees. Together with the flames, both skills combined to form a powerful fiery tornado that seemed to blow everywhere, incinerating huge numbers of the bees.

The number of bees was too many, and they came from all directions. One of the Storm Warriors immediately stepped forward and readied her huge shield.

With a light flash, the energy shot out from the shield, forming a large barrier in front of the dozens of warriors at the city wall.

However, while it could protect them, it likewise prevented the fiery tornado from blowing out.

From the holes in the wall, a number of electromagnetic beams shot out at the skies, tearing apart the bees that were in the way.

Many of the bees managed to slip into these gun holes, and soon, there were miserable screams of the countless Storm Warriors from within.

Phinea looked at the cloud of bees and her eyes flashed with anxiety, "Shit! What do we do?"

The number of bees was simply too many, under such circumstances, the threat of these bugs was even higher than a Type 5 Divine Warrior.

## Chapter 822: Mutual Destruction!

Out here in this pitch-black gorge, where there were bugs everywhere, a number of bright lights radiated out, as large patches of the bees were being shot down, shredded into pieces. However, at the same time, human screams filled the air.

The cloud of Blood-sucking Bees was like a calamity, swallowing everything in their path. No holes could escape their attention, as they got through the various crevices and cracks, pouncing on the Storm Warriors.

The various openings for guns turned out to be their downfall, as the bees made use of those to enter the city wall. However, while they were able to cause a widespread panic as well as some painful screams, they were unable to wipe them out quickly as the numbers flying in were still too little. It was not enough to cause a widespread pandemonium yet.

So far, 6 or 7 unfortunate Storm Warriors had been sucked dry, while the rest had been stung and were in agony, but not dead yet.

Many smart Storm Warriors made use of their belongings to stuff the holes, preventing more bees from entering.

As they were fending off the bees with all their might and will, behind the swarm of bees, a number of dino-people wielding long and sharp bone blades came marching through the narrow valley.

There was something that they had done, which caused the Blood-sucking Bees to ignore them entirely.

At the same time, borrowing the cover of the night, a number of them began to crawl up the face of the cliff, towards the city wall.

The peaks on either side of Cracked Tooth Gorge were truly exceptional and tall, impregnable to most humans. However, to these dino-people, it was not something that they could not handle.

In the past, with the alliance and help of the Winged Race, they could easily kill those Dino-people who attempted to scale the mountains. That was why they had not utilized such a method to attack last time.

Currently, due to the threat of the Blood-sucking Bees, the Winged Race people were actually fleeing, allowing the Dino-people to seize the opportunity and quickly climb.

On the wall, Phinea and the dozen Storm Warriors were being forced into a corner, as the flames continued to fire into the skies, burning many of the bees.

As the flames blazed red and the black swarms of bees clashed together, it created a furious mesh of colors.

All around Phinea, there were countless Blood-sucking Bees trying to get close, however, they were blown away by the tornados, unable to reach her.

Right at this time, a huge bone blade came swinging from the side of the wall, and with a slash, the flame-spitting Storm Warrior was decapitated.

Phinea howled in anguish when she saw it, "Sun Li!!!"

A number of bone spikes appeared from both sides of the wall, making their way towards Phinea and the rest.

3 of the Storm Warriors activated their shields, the Type 3 Nuclei on them glowing brightly, as huge energy shields were generated.

The sharp bone spikes landed on the shields, causing loud clangs, but were ultimately deflected off, while the shields trembled slightly.

Right at this moment, a figure of over 3m, wrapped in thick scales, his body full of bone plates and his claws long and sharp came over slowly. In his hands, there was a long and sharp blade made out of a tailbone. He spoke, "You are the Storm Valley's Lady Phinea? Truly capable. I have not gotten my hands on such a cute pet before. Come be my pet, I will let you have a good life! If you don't agree, I will capture you to feed my Red Tooth!"

Seeing that savage Dino-General whose body was emitting a thick blood scent, Phinea was immediately overwhelmed by his aura. She had already utilized the Storm Battle Armor to reach the Type 4 Divine Warrior realm, yet it was not enough to dispel the oppressive feeling.

A number of Dino-Generals came leaping over the wall, wielding bone blades, standing quietly behind this leader. Their gazes were full of bloodlust as they stared at the ladies. The thick pressure and bloodlust caused them to feel suffocated.

Phinea suppressed the fear as she asked, "You're a Mid-Grade Dino-General from the Stegosaurus Kingdom?"

The Dino-General looked at Phinea with a condescending gaze as though he was staring at a dead person, "That's right! I'm Ku Hazan, a Mid-Grade Dino-General from the Stegosaurus Kingdom! Do you choose to be my pet, or to die with your people here?"

Phinea revealed a smile as she pressed a button on her Battle Spear, "I choose... mutual destruction!! Let's perish together!!"

Hong!!

At that instant, a bright light flashed out on top of the city wall, enveloping everything within its radius. The various Storm Warriors were swallowed up and blown apart in pieces, as the earthshaking shockwave traveled outwards. Under the detonation, the entire Cracked Tooth Gorge was forced wider, as rocks and boulders came tumbling down.

By the time the explosion ended, the city wall had been obliterated, leaving behind masses of broken boulders.

A large number of the dino-people on the wall and around it had also been consumed, leaving only about 20 Type 3 Dino-people who had been far away, thus, escaping the area of effect.

These 20 Dino-people began to dig into the rubble and debris right after they recovered from the shock.

"This is General Ku Hazan's tail!!"

"This is his finger!!"

"..."

The 20 of them managed to find a variety of broken limbs and body parts. They stared at them while exchanging looks.

One of them asked, "What now?"

Another quipped, "I think, we can only go back to report this to the Commander!"

The operation this time had cost all the Dino-Generals to be killed, as small fries, they had no choice but to retreat and report.

Soon the 20 Type 3 Dino-people swiftly left in the darkness.

At the moment when the huge explosion occurred, the bright light radiated through the skies, a dirge sounded through the Storm Imperial City.

Luo Qing Qing was currently handling some affairs when she heard the sounds, and her body trembled, her eyes filled with anguish, "Phinea!! You actually chose to die together with those beasts!"

The pain faded quickly, as she summoned a beauty with short, grey hair, "Anina, go delegate your troops, prepare to evacuate Green Region!!"

Anina's eyes flashed with a solemn look as she nodded, "Understood!"

After she left, Luo Qing Qing swiftly summoned Yue Zhong.

"Yue Zhong, this is the prehistoric tech that our Storm Valley has." Luo Qing Qing spoke as she shot Liu Mei'er a look, frowning. With a wave of her hands, a Storm Warrior stepped up to hand a golden box to Yue Zhong.

Yue Zhong opened it up and took a look, noticing that there were indeed many resources and blueprints on the energy converters and shields. His eyes flashed with delight, before looking at Liu Mei'er.

Liu Mei'er spoke softly, "Luo Qing Qing might be overbearing, but her personality is truly trustworthy. Since she has already promised this to you, she wouldn't go back on her words."

"Yue Zhong, since you want control over the Imperial City, come with me!"

Luo Qing Qing then stood up and walked off suavely.

Yue Zhong chuckled lightly and followed after.

After passing through a number of corridors, he finally came to a control room with countless monitors, connected by various thick cables, linked to one main central computer.

The computer was supporting over hundreds of displays. However, every single monitor was black, evidently, the computer was not in use.

Luo Qing Qing pointed to it and said, "This here is the central computer of Storm Imperial City. As long as you can control this, you gain control over the entire Imperial City. However, it has already stopped working for over hundreds of years. As to how the Imperial City can stay afloat, and what the technology behind is, I am not sure myself. We can only stay here, but in order to truly control it, you will have to work it out yourself. I'm handing it to you."

Yue Zhong looked at the central computer and frowned, pulling out his handheld display, revealing Bai Yi.

He asked, "How can I activate this central computer?"

A small radar appeared and began to emit waves, scanning the computer in front of her, as Bai Yi's eyes turned to flashes of data.

Bai Yi then pointed to one corner of it and said, "Open that small door! After that, place a Type 3 nucleus in and press this button, you should be able to kickstart it."

Luo Qing Qing looked at Bai Yi with a gaze of wonder.

Yue Zhong followed Bai Yi's instructions and opened up the small hatch, inserting a Type 3 nucleus, before pressing a button.

At that moment, following a loud whirl of gears and power, a number of bulbs started to glow, as the displays all turned on.

## Chapter 823: Controlling the Storm Battleship!

After 20 seconds, the main display shone with a box as a metallic voice sounded, "Please enter the password!"

Luo Qing Qing watched quietly. The Storm Imperial City was a high-tech weapon, she naturally had tried to work it before. She had found the hatch to insert the nucleus before and was stuck at the password stage. She did not have it after all.

Yue Zhong pulled out a cable, intending to connect Bai Yi to the main computer, however, he discovered that both ends were incompatible, "The cables are of different ends, I can't connect you."

"There's no need. At such close proximity, the radar waves are enough! Please wait a moment!"

After that, the handheld tablet began to emit waves outwards again, as Bai Yi's eyes turned to data and numerals.

The main display of the central computer suddenly flashed, as a password was keyed in automatically. The voice message was canceled, and they were in.

"Welcome, Controller with 'S' Class access!"

A metallic voice sounded its congratulations from the central computer.

Behind, Luo Qing Qing and Liu Mei'er saw this and their eyes were wide with shock, "What! He actually managed to gain control!"

"Running self-diagnostics!"

"Currently, the Battleship only has 10% energy left, data connection damage at 23%, the power system is intact, weapon system damage at 32%, energy shield converters intact, shield systems intact. Please insert a Type 7 nucleus to operate the Battleship!"

After a series of tests, the results were displayed for Yue Zhong to see.

Yue Zhong laughed bitterly when he saw this, "Type 7 Mutant Beast nucleus?"

Not to mention a Type 7 Mutant Beast nucleus, Yue Zhong did not even have a Type 6 one. The Type 5 Nuclei in his hands were not many, only 3, of which one had been given to Greenie. Of the other 2, 1 was fuel for the light-gold Sun Battle Armor, which left him with only 1.

There was no way for Yue Zhong to obtain a Type 7 Nucleus at this point. Those monsters were creatures that could cause disasters with just their movements.

The Type 7 Sea Snake Emperor had stirred up a storm out in the middle of the sea, causing tsunamis every few seconds. Few intelligent life forms would stay out there because each time there was a war between the overlords, the terrifying storms that ensued would consume any weaker life forms.

Yue Zhong asked, "I only have Type 4 and Type 3 Nuclei! How many would the Battleship need?"

"In order to fully exhibit the capabilities of the Battleship, it would require 1 Type 7 Nucleus, 40 Type 6 Nuclei, 800 Type 5 Nuclei, 8,000 Type 4 Nuclei, or 80,000 Type 3 Nuclei."

When he heard that terrifying figure, his scalp went numb. The battleship might be truly terrifying in terms of combat strength, but its energy consumption was likewise fearsome.

Although he had the means to hunt Type 3 Mutant Beasts, who knew how long it would take to hunt 80,000.

Even the Storm Valley with its long history would not be able to take out 80,000 Type 3 Nuclei just like that.

Luo Qing Qing saw the list and heaved a sigh of relief. If Yue Zhong had no means of taking out so many nuclei, then the Imperial City was going to stay.

Yue Zhong's eyes flashed as he asked, "The Power System! If just that, how many Type 3 Nuclei would it require?"

"If using the Power System, without the Energy Shields, it would require 5,000 Type 3 Nuclei."

"What about a single trip of about 10,000 km, how many then?"

"500. However, if using too little of them, it would not be a reusable source. After 10,000 km, the 500 Type 3 Nuclei would crumble into dust due to over-expenditure."

Yue Zhong's heart eased slightly and smiled, "That's enough!"

Yue Zhong had obtained a mountain of nuclei from the stomach of the Type 6 Mutant Beast inside the Sea of Mutant Beasts. The majority of it had been Type 3 Nuclei, with over 3,000 of them, it would be enough to support the Storm Battleship for a flight of 60km.

The only downside was that all the combat features would be locked out, and the powerful energy shields could not be utilized due to the shortage of energy.

Even so, a floating city was able to give Yue Zhong a slight sense of security in this dark and cruel world.

"Please insert the nuclei!"

An alloy door opened up in front of Yue Zhong.

With a wave of his hands, he pulled out 500 of the Type 3 Nuclei inside his storage ring and dumped them into the hatch.

Luo Qing Qing and Liu Mei'er were truly speechless this time. Storm Valley was a huge faction with hundreds of years in history, even they would find it tough to muster 500 Type 3 nuclei at a moment's notice. Yue Zhong had simply waved them out of thin air.

The Storm Valley's wealth and inheritance grew by dozens of Type 3 Nuclei every year, but in these hundreds of years, through the endless combat, there would likewise be consumption as well. Hence, their Type 3 Nuclei were not a lot.

In terms of resources, the faction that had the most nuclei would be the Dino-people. The Stegosaurus Kingdom alone would already have more than Yue Zhong. While Storm Valley might be a hegemon among the human factions, compared to the Dino-people, it was barely a small-size group.

Yue Zhong looked at the brightened central computer, his eyes flashing with satisfaction, before turning to speak to Luo Qing Qing, "Let's talk about our forces working together to destroy the Pterosaur Mountain."

Luo Qing Qing shook her head, "I'm afraid that'll have to wait."

Yue Zhong's gaze turned sharp, as his smile disappeared, "Why?"

After this short period of communication, Yue Zhong was sure that Luo Qing Qing would not go back on her words. For her to turn down his request, there must be some reason.

Her face turned sullen as she replied, "We just suffered a devastating attack on Cracked Tooth Gorge. Our Green Region has now lost its defense, the Stegosaurus Kingdom would definitely make use of that to invade Green Region and hunt. None of our factions can stand up against them. We have no choice but to evacuate now."

Luo Qing Qing had governed Storm Valley for a number of years and had clashed against the Stegosaurus Kingdom plenty of times. She was clear on their ability to deal with Low-grade Dino-Generals, but against the Mid-grade ones, unless she suddenly broke through to the Type 5 Divine Warrior realm, it would not mean much. Even if she relied on the Storm Armor, in a frontal clash, she was not a match for a Mid-grade Dino-General yet.

Once the Stegosaurus Kingdom got through the Cracked Tooth Gorge, the entire Green Region would become their hunting grounds. Other than fleeing and hiding, the humans could only pray they would not be found.

Yue Zhong's heart sank when he heard this. The Dino-people were in control over a large part of this world. He was not overconfident to think that he could defend against their invasion.

Luo Qing Qing suddenly said, "Yue Zhong, although it's a bit sudden, I hope that you'll allow our Storm Valley people to stay in the Imperial City. If we work together, we can escape from them!"

Now that the Storm Valley belonged to Yue Zhong, Luo Qing Qing could only ask Yue Zhong for help. If they did not have this airborne castle, the hundreds of thousands of people in Storm Valley would perish out in the world filled with Mutant Beasts, prehistoric beasts, ferocious dinosaurs and Mutant Bugs. They would not even make it past a hundred kilometers if they fled on foot.

It was possible that even before the Dino-people made their move, the hundreds of thousands of people might die along the way, after all, they were at the bottom of the food chain. There were plenty of predators out there.

The Storm Valley, Pterosaur Mountain, and Sun Alliance had all built cities to gather the strength of people and their intelligence, hanging on in Green Region. Only then they could survive in this world, those factions that were chased away or banished would sooner or later perish at the hands and jaws of various beasts.

Yue Zhong looked at Luo Qing Qing and replied, "Luo Qing Qing, you should know that my people need this Battleship as well! By being on this ship, your people will take up living space. If you want to stay, you'll have to fork out the right price!"

Luo Qing Qing gritted her teeth, "100 Type 3 Mutant Beast nuclei and a single Type 4 Nucleus!"

Yue Zhong responded, "Not enough! I want you guys to listen to my orders at the necessary time to fight the Dino-people. If you can agree to this, on top of the Mutant Beast nuclei you just promised, I can let you guys come on board."

Luo Qing Qing gritted her teeth to reply, "Alright! But, our Storm Valley would not accept suicide mission."

Yue Zhong agreed, "Sure!"

After hesitating a while, Yue Zhong retrieved a glass vial with a drop of golden blood in it, handing it to her, "This should be able to absolve you of the poison."

Luo Qing Qing took it, her heart shaking with emotions. However, she did not consume it straight away, instead, looking at Yue Zhong warily, "What do you want?"

## Chapter 824: Ambush!

Yue Zhong looked at Luo Qing Qing seriously, "I hope that we can be allies, and you will help us out during my fight against the Dino-people."

A Mid-Grade Dino-General had the strength of a Type 5 Divine Warrior. Their body physique also far exceeded humans, thus, boosting their combat prowess.

Even if Yue Zhong wore the light-gold Sun Armor with the Type 5 nucleus, he had no confidence of defeating a Mid-Grade Dino-General, he needed all the help he could get.

Luo Qing Qing was a genius among her fellow women. In terms of qualifications, she was even higher than Yue Zhong who had the God and Devil Imprint. Her combat prowess was strong, if Yue Zhong could gain her help, he would have the hope of fighting against Mid-Grade Dino-General.

The Stegosaurus Kingdom was preparing to invade the Green Region. Under such circumstances, if he could enlist the help of this expert, Yue Zhong would be able to survive even longer.

Yue Zhong had truly considered swallowing Storm Valley, but he quickly gave up the idea. This was because if he captured or killed Luo Qing Qing, it would not mean that the whole Storm Valley would follow him. Furthermore, due to the current situation, it was imperative to have an ally.

Luo Qing Qing was upright and stayed true to words. She was a rare heroine, if she agreed to become Yue Zhong's ally, he would gain a powerful friend and support.

Luo Qing Qing's eyes flashed with a resolute gaze, "Ok! I promise you! As long as I'm alive, and Yue Zhong you do not betray our Storm Valley, our Storm Valley will be your most trusted ally."

Hearing her promise, Yue Zhong's face revealed a satisfied smile.

On the other side, Liu Mei'er watched this with envy. She had hoped to be able to negotiate with Yue Zhong as an equal, not his subordinate.

After the matters were settled, Luo Qing Qing began to gather her people to evacuate into the Storm Battleship.

Although it was termed as a battleship, it was more like a floating city, squeezing a few hundred thousand people was not an issue.

In the past, only the upper echelons of the Storm Valley could reside within this floating city. Now, in order to flee the invasion of the Stegosaurus Kingdom, many of them began to move onto it.

As they were evacuating, a bright light shot towards the skies, as a number of dirges sounded from the Battleship.

Luo Qing Qing found Yue Zhong and spoke solemnly, "Yue Zhong, this cannot go on. The Stegosaurus Kingdom has already acted, their target our Storm Valley. Obviously, Zheng Zhen and Dao Ge had revealed our location to them. I'm afraid that before our people had finished evacuating, they would reach. I'm going to bring my troops to attack them, I'll leave things here to you!"

Luo Qing Qing had sent various units to guard the numerous paths towards the Storm Valley, that single beam of light represented one of the units being annihilated by the Stegosaurus Kingdom forces. The Storm Warriors at that location had already set off the bombs in order to deal with them.

Suicide bombers were one of the methods to deal with those powerful Dino-people. After all, the weakest dino-person would still be at least at the Type 2 Divine Warrior threshold, and the majority of their troops were already at the Type 3 realm.

Yue Zhong grinned, "I'll go with you. I want to have a good gauge of their capabilities."

While hunting the Dino-race, Yue Zhong could absorb their life force and nourish himself through the God and Devil Imprint, further evolving himself.

Inside the Storm Valley, a large number of Storm Warriors were facilitating the evacuation, Yue Zhong's presence would not add much help.

"Many thanks! Let's go!"

Luo Qing Qing cast a deep glance at Yue Zhong. With a swish of her cape, she turned around, and under the escort of 4 of her Storm 8 Greats, 36 Storm Warriors, they made their way out.

Yue Zhong glanced at Liu Mei'er beside him and spoke mildly, "Let's go!"

"Yes!" Liu Mei'er replied and followed after him.

After they left Storm Valley, the group quickly traversed through the lush forest.

All of a sudden, another beam of light shot into the skies.

"Beasts!!"

Luo Qing Qing saw and cursed under her breath, intending to charge over.

At this moment, Yue Zhong suddenly barked out, "Wait a minute!"

Luo Qing Qing swiveled around furiously and glared with flames of anger, "Yue Zhong, if you're afraid, you can go back! Don't get in my way!!"

The various elite Storm Warriors also shot him glares.

Yue Zhong remained impassive as he replied, "That area had been overwhelmed by them already, even if we go there, there's nothing we can do. Why not set an ambush here, and take care of them once and for all?"

Luo Qing Qing's eyes regained their clarity, as she observed the surroundings. She discovered that they were at a narrow gorge, and it was the perfect location for an ambush.

Once they sealed both ends of the gorge, they could deal with the enemies in one fell swoop.

Luo Qing Qing swiftly gave the order, "Prepare an ambush!"

With her words, the hundreds of Storm Warriors quickly got into action, laying in wait on either side.

They were all experienced warriors, once they laid in wait, they retracted their auras and disappeared into the greenery.

Yue Zhong also leaped up the gorge, finding a decent hiding spot for himself. He then prepared his Electromagnetic Gun, and retracted his aura, eyeing the valley.

Not long after, 400 Dino-Warriors from the Stegosaurus Kingdom came riding upon velociraptors, approaching their location.

They were covered in fresh blood and were emitting a thick bloodlust, evidently having just finished their slaughter earlier.

Most of them were at the Type 3 Divine Warrior state, with strong Stamina, and had no need to worry being overly exhausted. As long as the battles were not too strenuous, they could continue for a long time. Furthermore, with their velociraptor mounts, they could cover a lot of ground in a night.

The hundreds of Dino-Warriors rode quickly and noisily through the valley.

"Kill!!!"

Luo Qing Qing watched as they all entered the gorge before ordering coldly.

The Storm Warriors on both sides immediately pulled out their electromagnetic guns inserted with Type 3 nuclei and began firing.

The beams shot down and tore through the Dino-Warriors who were caught unprepared, reaping dozens of lives.

"Go! Go!!"

The leading Low-Grade Dino-General barked out while holding his 3m-long saber up high, urging his Velociraptor further forward.

Hong! Hong!!

At this moment, Luo Qing Qing pushed with all her might, causing a large boulder of over dozens of tonnes to roll down the cliff, towards the leading Low-Grade Dino-General.

Facing that incoming stone, the face of the Low-Grade Dino-General also fell. His body flashed, and he leaped off his velociraptor, dashing out the gorge in a breath.

Any beast of Type 4 and below would also suffer grave injuries when faced with an incoming boulder of more than a hundred tonnes, not to mention these Low-Grade Dino-Generals.

One single boulder came rolling down, directly crushing the unfortunate velociraptor.

A number of large boulders came rolling down, flattening many of the Dino-Warriors, forming a large stone wall of over dozen meters tall, impeding their advance.

The Dino-Warriors were thus stuck, not able to proceed any further.

Many electromagnetic beams shot out, knocking the dino-warriors off their mounts, piercing through their bodies and causing blood to flow. In such a narrow space, they had no way of evading. Their screams reverberated through the air.

If a normal human army was to be caught in such an ambush, they would have been slaughtered cleanly. However, these Dino-people were fearsome, immediately thinking of ways to overcome it.

"Climb! Kill them!!" One of the dino-warriors roared in fury and got down from his mount. He began to scale the cliff, swiftly making his way up the treacherous walls. With each grab, his claws dug into the cliff.

The Dino-Warriors began to get down from their mounts and made their way up the sides of the cliff agilely.

They were not proficient in mountain climbing, after all, hence their speed was slower as compared to ground movement. The Storm Warriors continued to rain shots on them, causing many to fall. Even so, the numbers crawling up were high.

The Low-Grade Dino-General who had been forced out of the gorge roared out and leaped his way up the gorge.

However, just as he reached up, he was immediately accosted by Storm Queen Luo Qing Qing, her Battle Spear shooting for his forehead.

With her Strength and the enhancement from the Battle Armor, as well as her innate Tornado Manipulation ability, her speed was pushed to the maximum.

The Low-Grade Dino-General had just made his way up and had to face such a powerful force. He was taken aback and brought up his own spear in an attempt to deflect it while twisting his body slightly to the other side.

Luo Qing Qing's terrifying thrust caught the shoulder of the Dino-General, and her strength burst forth, blasting it into pieces, causing him to soar through the air.

In mid-air, a single Electromagnetic Beam shot out from some corner, piercing his head, blasting it apart.

## Chapter 825: The Army Enters the Fray!

At that moment the Dino-General's head was blown off, a single Dino-Warrior swiftly made his way up the gorge, appearing in front of a Storm Warrior with an electromagnetic gun. He swiped out at her head, decapitating her in one blow, as fresh blood sprayed from her neck.

The dino-warriors climbed up quickly and pounced towards the Storm Warriors.

The Storm Warriors had already made their mental preparations to be fodder here as they raised their Battle Spears and charged forth to meet the dino-warriors in an all-out clash.

A single Dino-warrior would require 4 Storm Warriors in their Storm Armor to battle with a formation. If they were caught alone, then in a few breaths, they would be annihilated.

The combat strength of those Dino-warriors was truly fearsome. Earlier, the Storm Warriors held the advantage, but with the increasing number of Dino-warriors crossing the gorge, they were starting to get suppressed.

"Go to hell!"

Luo Qing Qing charged right into the battle like a war goddess, with a single thrust of her spear, a Dino-warrior's head was blasted apart. She dashed right into their midst, attacking every side as though invincible, and none of the dino-warriors seemed to be able to handle a single move.

"Long live Her Majesty!!"

"..."

The female Storm Warriors let out excited cheers, seeing their own Queen crushing their enemies like it was nothing, and their morale instantly skyrocketed. They threw all fear of death to the wind, and their combat abilities were raised to the maximum.

"She truly is powerful!"

Yue Zhong continued to fire his Electromagnetic Gun at the Dino-warriors while observing Luo Qing Qing slaughtering the enemy.

Not only was her display of strength intimidating while she culled her enemies, but everywhere she went, the morale of the Storm Warriors would soar, and the battle got even more intense. Not many men could even perform half as well as her.

Liu Mei'er, who had been standing beside Yue Zhong, bit her lips as she gazed at Luo Qing Qing with a complicated expression. She could not help but admit that on the battlefield, she could not compare to Luo Qing Qing. In terms of a life-and-death battle, Luo Qing Qing could absolutely crush her in a single move.

Although Liu Mei'er was also a Type 4 Divine Warrior, she had relied on her heaven-defying talents and some resources to raise her strength to that level. In terms of fighting and killing, she was way behind Luo Qing Qing. Therefore, while she had the strength, some peak-Type 3 Divine Warriors might be able to deal with her.

The dino-warriors were being slaughtered one by one, and although they were naturally fearless, under the overbearing and violent torrential storm that was Luo Qing Qing, many of them started to feel fear.

When the remaining dino-warriors made it up the gorge, they quickly tried to flee.

Yue Zhong killed 3 Dino-warriors, while Luo Qing Qing chased after 4 and killed them mercilessly. The remaining ones managed to flee through the forest and disappeared.

This time, the ambush could be considered a huge success that turned the tides.

Yue Zhong came to one of the cliffs, looking at the dozens of Storm Warrior corpses, his expression solemn, "These dino-warriors are truly a force to behold!"

Of the ambush party, there were Yue Zhong and Luo Qing Qing, 2 Type 4 Divine Warriors, and another 100 Storm Warriors.

Such a formidable force, together with the advantage of an ambush, had it been against any other human forces, it would have been enough to annihilate the enemy entirely. Furthermore, their own casualties would not have reached such a frightening number. However, the Dino-warriors had truly reacted in a manner that had cost them dozens of their elites.

At the same time, the strength of the Dino-warriors exceeded the strategies and tactics of how humans fought. In such a terrain, they did not seem to suffer any disadvantages, instead, it was more like a minor setback. The terrains that humans could utilize were lesser and lesser.

Luo Qing Qing came up to Yue Zhong and suggested, "We were able to kill so many Dino-warriors, paying such a price is already considered a huge victory for us. Let us scatter!"

"Fine!" Yue Zhong replied.

One of the Storm 8 Greats, Han Zi Xuan, a pretty lady with a heroic aura and an extremely attractive body, pointed to the distance and said, "Your Majesty, look!!"

Yue Zhong and Luo Qing Qing came to her side and followed her fingers to look. What they saw, was enough to send these 2 confident and self-assured experts to almost feel despair.

Far off in the distance, a cloud of dust and smoke was rising, as a huge horde of Mutant Beasts, dinosaurs and prehistoric life forms were fleeing in a huge group.

Behind them, there was a dense troop formed entirely out of dino-warriors. They were mounted on their velociraptors, charging forward with only killing intent, their battle spears culling the various beasts in front of them.

In the skies, there were over hundreds of Pterosaurs, ridden by bow-wielding Dino-warriors.

Other than that huge army, there was a single behemoth in the middle of the troops. It was a mountain-like Type 5 Triceratops.

Seeing such a terrifying force approaching, no matter how strong Yue Zhong and Luo Qing Qing were, they could not help but feel despair.

Even without mentioning the rest, the size of the approaching army was enough to cause despair in the hearts of anyone. There were over tens of thousands of them, even the best Type 4 Divine Warrior expert would perish when facing such a force.

Also, the Type 5 Triceratops was almost an invincible existence itself already. With all the combined efforts and personnel of Storm Valley, they still would not be able to injure it at all.

As strong as Yue Zhong was, if he were to face an uninjured Type 5 Mutant Beast, he would likely be killed within seconds.

Luo Qing Qing looked at the approaching army with its intimidating aerial display as well as the inclusion of a Type 5 Mutant Beast and slowly spoke, "We can only retreat!"

In the earlier ambush of the vanguard party, Luo Qing Qing had to sacrifice a dozen of her warriors, these were elite Storm Warriors after all.

Even if they were to activate all their forces against this approaching army, it would barely cause a ripple/

No matter how strong she was, and how she could crush her individual enemies, when faced with pure military might, there was only retreat.

Yue Zhong frowned and eyed the army before he looked at the surroundings.

He suddenly asked Luo Qing Qing, "Luo Qing Qing, do you have any Type 3 Divine Warrior subordinate with Ice-related abilities?"

She pointed to the valiant Han Zi Xuan and said, "She is one."

Yue Zhong was slightly surprised as he looked at her. This warrior seemed even more heroic, even her pose and posture seemed to surpass Luo Qing Qing slightly. Yue Zhong had assumed that she was a close-combat specialist, instead of an ice-control expert.

Han Zi Xuan seemed to have felt Yue Zhong's gaze, as she turned to shoot him an icy glare.

Yue Zhong spoke, "3 days, I need 3 days' time. In this 3 days, I hope you can try your best to delay the advance of this large army."

Luo Qing Qing frowned and asked, "3 days? What're you intending?"

An icy look flashed across Yue Zhong's face, "I want to give them a harsh lesson. On the consequences of pushing us humans too far."

Luo Qing Qing stared at him for a good moment before sighing, "Alright! I'll promise you this. However, 3 days will be the max I can do. After that, the Storm Battleship has to leave!"

Yue Zhong replied, "Let me borrow Han Zi Xuan!"

"Fine!"

"See you!"

After gaining her approval, Yue Zhong immediately brought Han Zi Xuan and Liu Mei'er with him towards the distance.

One other Storm 8 Greats, Hai Xi, stepped forward and asked Luo Qing Qing, "Your Majesty, aren't you going to ask him what he's planning to do? To delay the huge army of the Stegosaurus Kingdom, we will have to pay a terrible price."

Luo Qing Qing had already seen through Yue Zhong's intentions, "I know without asking. He's intending to use the Green River to drown the Dino army by directing the water flow. It is likely that only such a method could possibly deal a huge blow to their forces. What he needs now is most likely to freeze the entire river."

When Hai Xi heard that, her face revealed a hint of joy, "Making use of the Green River to drown those beasts, truly a good method!"

Luo Qing Qing replied softly, "While it is a good idea, there are too many variables. Powerful Mutant Beasts exist within the River, just the creation of a bank there would be tough. At the same time, to direct the water flow requires a huge undertaking of construction and work. This would be another large obstacle to overcome in employing this tactic. Hai Xi, don't get your hopes high. The probability of success is very likely small."

Luo Qing Qing had considered it before, but the various problems seemed too impossible to overcome, without the certainty of success, she had no choice but to give it up.

Hai Xi could not help but ask, "In that case, Your Majesty, why did you agree to impede the Stegosaurus Army for 3 days?"

Luo Qing Qing's eyes flashed with a wise look, "Our Storm Valley people need time to board the Storm Battleship. Furthermore, it would require 2 more days to transport the necessary resources to support these many survivors. No matter what, we have to endure another 2 might days, we might as well go out on a leg and do some more. Just treat it as repayment for Yue Zhong's allowance of our people to board the Storm Battleship."

## Chapter 826: Building a Dam!

As the party ran through the forest, Liu Mei'er quipped, "You're intending to use the Green River to drown the dino army?"

Yue Zhong did not intend to hide anything, "That's right!"

Liu Mei'er looked at Yue Zhong and immediately listed out the problems, "It's useless! There're too many strong Mutant Beasts within, over 200 of them residing inside! Not to mention the Type 3 Mutant Beasts. It's impossible to form a dam with just us! Even if we sacrifice ourselves to do it, how are we going to redirect the water flow?"

Han Zi Xuan did not say anything, but her eyes flashed with agreement. She too did not reckon that the tactic was going to work.

Yue Zhong suddenly said, "Han Zi Xuan, what are your thoughts?"

She replied coolly, "I'll obey Her Majesty, and listen to your commands!"

In the Storm Valley, Luo Qing Qing's words were the law, even if Han Zi Xuan did not understand it, as long as it was Luo Qing Qing's orders, she would carry it out.

"That's good enough for me! I have my ways!"

Yue Zhong replied indifferently before continuing to run towards the direction of the huge Green River.

Liu Mei'er pouted helplessly before following him.

The party of 3 were powerful experts, and managed to dispose of the low-level Mutant Beasts along the way, finally arriving in front of the huge, gushing river.

He discovered that the Green River was very different from any he had seen on Earth. The width of the river from bank to bank was already over 100 or 200 km, as though one could not see the other side.

With just a look, he could already see many huge Type 4 Mutant Beasts frolicking and having fun in the water.

Other than these enormous beasts, a few Water-type crocodile-like creatures were also swimming within the waters. From time to time, one would observe the water Mutant Beasts engaging in slaughter, causing waves in their struggles.

Yue Zhong could not help but suck in a breath of cold air. If it wasn't for the trump card in his hands, he would have decided to give the idea up.

Mutant Beasts were hard to deal with, engaging with water-based ones in their own terrain was 10 times hard than those on land. In this Green River, there were numerous gigantic beasts, even if all the top elites of Storm Valley were to come, it would only be suicide to take on these monsters.

Liu Mei'er stood one side and eyed Yue Zhong, her look one of gloating. Although she dare not go against him on the surface, she had long since viewed this plan of his with contempt.

With a thought, Yue Zhong channeled his Summon Tamed Beast Technique, and a void appeared in mid-air, before Greenie came flying out.

Seeing the sudden appearance of the beast, Liu Mei'er and Han Zi Xuan could not help but turn pale, "What the hell is that?!"

Greenie's wingspan was already more than a hundred wingspan, its body huge and it looked like a mythical beast, exuding a powerful pressure.

At the same time, airborne Mutant Beast might not be the strongest or the sturdiest in defense, but their speed was undeniably the hardest to deal with.

Looking at Greenie, Liu Mei'er immediately turned to run.

Han Zi Xuan, on the other hand, turned pale while she ignited her Storm Armor and its Type 3 nucleus, wielding her Battle Spear to leap forward in front of Yue Zhong, shouting loudly, "Quick, run! This is a Type 4 aerial Mutant Beast, we are not its match!"

Yue Zhong looked at her appreciatively, before saying, "No need to be afraid, it's my Tamed Beast."

He took a good look at this suave and brave yet beautiful girl and felt envious. Luo Qing Qing actually had such a powerful and loyal subordinate.

While Yue Zhong had his fair share of loyal youths who would die for him, they were all hot-blooded males. A beauty like Han Zi Xuan who was also an expert in her own right was rare amongst his ranks.

As to the beautiful Liu Mei'er, to Yue Zhong, she was just a pawn to be used. In times of trouble, he would not hesitate to abandon her.

Han Zi Xuan's mouth was agape with disbelief, "Your Tamed Beast?"

This was a Type 4 Mutant Beast, an aerial one at that. They were hard to subdue, much less a Type 4 one.

The Storm Valley had their own Tamed Beasts as well, but they were mostly Type 2 and below, not comparable with Greenie.

With a powerful gust, Greenie descended from the skies, landing on the ground. Right in front of Han Zi Xuan's look of disbelief, it lowered its head towards Yue Zhong.

Yue Zhong reached out to pat it, before saying, "I'll go and observe the river and terrain, stay guarded."

She nodded silently, before watching him soar to the skies on Greenie's back.

Her heart was filled with complicated emotions as she thought silently, "This man truly still has so much to show, no wonder Her Majesty is willing to befriend him!"

An aerial Mutant Beast was difficult to deal with, just a Type 4 Greenie was enough to cause the whole Storm Valley to have a headache. If they went against Yue Zhong, they would have to be prepared against this mighty beast, which will wear their energy down. Any single person who dared try to take it on would definitely perish.

She had not understood why Luo Qing Qing would be so courteous to such a man, but now, she was finally convinced.

Liu Mei'er also stepped out from one side, looking up at the skies, her expression one of embarrassment.

"This is it!" Yue Zhong sat on Greenie's back, looking below. His eyes lit up as he was searching for a perfect spot for a dam, and urged Greenie down.

The location was a small tributary that flowed into Green River, it was fast flowing and less than a hundred meters in width. It was the best location to build a dam.

He got off and observed the surroundings a little, before channeling his Summon Tamed Beast technique again. This time, the gigantic Turtle came out of it.

After Yue Zhong had returned from the Sea of Mutant Beasts, he had fed his Tamed Beasts many Type 4 nuclei, causing most of them to reach the Type 4 Stage.

As Turtle crawled out, it nodded slightly at Yue Zhong, before entering the water. The moment it entered, it swung its tail and caused a huge wave, before it turned around and spat out a frosty air, immediately freezing the huge chunk of water into a block of ice.

As a Type 4 Mutant Beast with an incredible innate power, it was not long before a huge icy wall appeared, forming the rough shape of a dam.

Yue Zhong sat on Greenie and quickly brought the 2 ladies over.

When they got off Greenie's back, Han Zi Xuan saw the ice dam that had appeared out of nowhere, her eyes full of shock, "The dam was actually done!!"

Liu Mei'er herself stared at the Type 4 Turtle with shock as well.

Yue Zhong replied, "Not yet! This is just the rough shape, the other details require you to fine-tune!"

Turtle had just created these huge blocks as per Yue Zhong's instructions, but there were plenty of areas that needed more specific and careful adjustments with Han Zi Xuan's ability. With her, Turtle could quickly create more blocks, and save its energy.

"Understood! I will adjust it now!" She nodded and flashed forwards, immediately beginning work on the huge chunk of ice.

As they were working on the dam, a Type 4 Anatosaurus was attracted and it swam over quickly.

Back on Earth, the Anatosaurus had been known to be land-based. Yet, the Type 4 ones of this world had evolved to be amphibian. In truth, after the various evolutions, many of the dinosaurs on this world were vastly different from those on Earth. The only similarities left would be their looks and names.

Most other Type 3 Mutant Beasts were fearful of Type 4 ones, hence, Turtle's aura had been enough to scare off most others. However, Type 4 Mutant Beasts were different, each of them highly territorial. Since Turtle had appeared, it was regarded to have intruded on the Type 4 Anatosauruses area. As an overlord, it would not sit and watch idly.

Yue Zhong caught sight of it swimming over and ordered, "Damn! Greenie, take care of it!"

Greenie was soaring above them, and with a flap of its wings, countless hurricanes were generated, before it shot down like an arrow with a Mach-2 speed, its claws stretching out for the head of the Type 4 Anatosaurus.

Aerial Mutant Beasts tend to excel in speed, and while the Type 4 Anatosaurus had an advantage in strength, it was not able to react in time. In an instant, the claws of Greenie pierced through the head of the enormous beast.

Greenie then flapped its wings furiously, channeling its innate ability, causing powerful tornadoes to be generated. It forcefully tugged at the Type 4 Anatosaurus, pulling it out of the water and upwards into the sky. If it had not used its innate ability, it would definitely not have been able to lift such a heavy beast.

The life force of the Type 4 Anatosaurus was pretty strong, and although its skull had been pierced by Greenie's claws, it continued to struggle and twist, its huge tail swinging up in an attempt to slap Greenie.

#### Chapter 827: The Intense Battle at the Gorge!

However, the struggles of the Type 4 Anatosaurus was futile. Due to its body structure, there was no way its tail could reach its head. With its short front limbs, there was no way it could claw above its head as well.

Greenie continued to use its ability to flap up high into the skies, before letting go. The gigantic Anatosaurus started to plunge down towards the ground like a cannonball, smashing into the earth and its body was destroyed.

With a forceful peck, Greenie bore into the skull of the Type 4 Anatosaurus, before gobbling up the nucleus as well as flesh inside.

The other Type 4 Mutant Beasts throughout the river saw this and sank back into the water.

The moment they submerged themselves, Greenie would be helpless against them as well. If it tried, those beasts would definitely drag it down underwater.

Yue Zhong continued to stare warily into the distance, after discovering that there were no other strange movements from the Type 4 Mutant Beasts, he heaved a sigh of relief.

On the other side, the seemingly endless army of Dino-warriors was charging without stop towards the direction of Storm Valley.

"Go to hell! Go to hell!!"

In a narrow gorge, 30 Storm Warriors were hidden within the tall grass, each wielding an electromagnetic gun. They fired shots at the passing Dino-warriors.

Blanketed by the countless beams, 2 of the dino-warriors were instantly blown full of holes.

The rest of them leaped up from their mounts, some climbing up the cliff sides, while some others ducked behind cover.

A number of the dino-warriors weaved in and out of the fire, and in a few breaths, one managed to dash in front of a Storm Warrior, opening his huge jaws to clamp down viciously. With a loud snap, the female Storm Warrior's head was crushed in two, with blood flowing out the Dino-warrior's jaws.

"Xiao Li!! Beast!!"

Another Storm Warrior besides the unfortunate lady saw her comrade being killed, and let out a scream of anguish, whipping up her Electromagnetic Gun to aim at the Dino-warrior.

To her horror, by the time she brought up the gun, she discovered the dino-warrior in front of her.

With a single swipe, and a flash of a shadow, the head of the pretty warrior was in the claws of the dino-person. There was still an expression of shock and fear on the just-deceased Storm Warrior, her spine still connected to her head. It was a truly gruesome scene.

4 other Dino-warriors also charged into the midst of the Storm Warriors, causing screams to ring out in a manner of seconds.

Soon, the 30 Storm Warriors who had been stationed to defend this post were all wiped out, leaving only one Dino-warrior corpse whose head had been blown apart by an electromagnetic gun.

While the other one had been shot full of holes, his heart and brain had been missed, thus, relying on its regenerative abilities, in just a short matter of time, it was able to return to the battlefield.

When this outpost was destroyed, the dino-warriors continued to surge onward to the next one like a tidal wave.

Their forces were numerous, and there was no faction in Green Region that could stand in their way.

Luo Qing Qing had organized her troops to continue sniping and firing at the Dino-warriors.

Other than leading the elite troop herself, the rest of the units had been deployed out to various areas to impede the dino-warriors, unfortunately, they were quickly obliterated.

The combat strength of these Dino-warriors was truly too powerful. Every one of them had at least a peak Type 3 Divine Warrior strength, even higher than when Yue Zhong first entered the 2nd World. Such monsters could easily become the head of a faction anywhere on Earth. And yet, here, they were just ordinary rank-and-file soldiers.

With such a fearsome army, even though the Storm Warriors were experienced hunters and warriors, there was no way they could fend them off for long.

A number of bright white lights shot to the skies in beams, displaying the last resort that most of them had taken when they failed to fight back the Dino-warriors. These Storm Warriors were not any weaker than any men, yet, when the dino army marched through, they would leave no lives behind.

When the large dino army invaded Green Region, they separated into 4 large units, 3 of them making their way towards the Sun Alliance, Pterosaur Mountain as well as Storm Valley separately, while the last one stayed to hunt any other vagabond factions.

A large swarm of Blood-sucking Bees soared through the skies, ravaging through countless human villages as well as small herds of low-level Mutant Beasts.

A unit of Dino-warriors continued to march beneath these bees, especially to kill any enemy that was able to deal with the bees.

In the forest, the Blood-sucking Bees had their natural enemies, for example, the thick-hide Mutant Titan Beetles, the Type 3 Mutant Rhinoceros Beetle, the Mutant Hummingbirds and various other life forms.

Once any of these appeared, the Dino-warriors below would act out to slaughter them.

The majority of the dino-warriors continued to spread out in various directions, some of the Type 5 experts specially deployed to deal with the tough Type 4 Mutant Beasts.

Under such circumstances, Luo Qing Qing and her subordinates fought hard for 2 whole days, managing to deal with 400 Dino-warriors.

Unfortunately, in the midst of the resistance, their scope of operations was reducing every day, before finally being forced to take a last stand at the entrance of Storm Valley.

The death of 400 dino-warriors had caused the upper levels of the dino-army to take an interest.

At a certain location in Green Region, within a large stone house, over 40 Dino-Generals from the Stegosaurus Kingdom were gathered. They all had impressive physiques and were covered in bone plates. These were Mid-grade Dino-Generals and were at the Type 5 realm.

The commander of them all barked out with a sharp light in his eyes, "In these 2 days, we lost 800 of our subordinates, first was the vanguard wave, then it was those sent to the Storm Valley. What's going on? We even lost 2 Dino-Generals!"

When the rest of the Mid-Grade Dino-Generals heard this, their faces were one of shock as well. Due to their connections with Zheng Zhen and Dao Ge, they were clear that there had only been Type 4 experts among the humans.

Any Low-grade Dino-General would be able to compare with a human Type 4 Divine Warrior, yet within 2 days, they had lost over 800 subordinates. It was an unbelievable loss.

One of the Mid-Grade Dino-General spoke, "I think we have underestimated the humans. Ku Hazan had lost his life because he had underestimated these humans. They might be weak and can be slapped to death anytime, but their intelligence is not to be taken lightly. They know how to use traps. Because of our oversight, we did not even send a Mid-Grade Dino-General, that was why we failed to suppress them. Based on the intel that Zheng Zhen sent us, the Storm Queen Luo Qing Qing should only be at the

peak of Type 4 Divine Warrior. Furthermore, with the enhancement of their Storm Armor, she could reach the Type 5 realm. Without anyone stopping her, our troops would naturally not be able to stand up to her."

The rest of the Mid-Grade Dino-Generals nodded at those words.

A Type 5 Divine Warrior was truly no joke. A person could easily wipe out hundreds of their ordinary Type 3 Divine Warriors. Without a proper general to suppress such a character, it was impossible for the Dino-army to not suffer losses.

Ku Kinken's eyes flashed dangerously and ordered, "Since this is the case, Ku Ichimine, Ku Mitsuo, go lead the 3rd Battalion, in these 2 days, I want the Storm Valley's defense destroyed!"

"Understood! For the glory of His Majesty!" The 2 appointed Mid-Grade Dino-Generals stood up and exclaimed loudly.

Riding 2 Type 3 Pterosaurs, Ku Ichimine and Ku Mitsuo quickly arrived in front of the 3rd Battalion. Not long after, they immediately launched an attack on the entrance of Storm Valley.

The warriors began to get on the long iron chains between the 2 cliffs, crawling over like ants.

The Storm Warriors had long since been prepared and began their own assault on the Dino-warriors on the chains.

One of them had the ability to manipulate the lightning and thunder. Her body glowed with the help of the Type 3 Nucleus behind her, and she grabbed onto one of the chains, allowing a bolt of electricity to flow through the chain.

In the ensuing screams, the dino-warriors began to plunge towards the bottom of the cliff.

The precipice was extremely deep, over 1300m, even with their Type 3 Divine Warrior strength, these dino-warriors would still die from such a fall.

Another Storm Warrior made use of her ability to control wind blades and fired a particularly strong one towards another metal chain.

The wind blade sliced through, causing many of the warriors to have no choice but to leap to avoid it. The moment they leaped up, they were quickly blown apart or ripped to shreds by the raging tornados between the cliffs.

Another dozen warriors on their Pterosaur mounts tried to fly over but were quickly caught in the tornados, flinging them to the bottom of the cliff, their bodies bursting apart upon impact.

Chapter 828: The Brink of Collapse!

Among the elites of Storm Valley, those who had other abilities numbered little. Most of them were versed in wind-related skills. At the same time, the Storm Battle Armor helped enhance those abilities. Therefore, when those powerful wind blades slashed at the Dino-warriors, many of them would be dismembered or lifted high into the air before plunging down to their deaths.

Luo Qing Qing had not given the order to cut the iron chains precisely because she wanted to utilize them to deal with the Dino-people.

Many of them had powerful jumping abilities, and they attempted to leap over the chasm with their pure might. However, the moment they got too close to the tornado, they would be blown away and smashed to bits.

Borrowing the natural forces of the tornadoes and cliffs of the Storm Valley, within a short time of the battle, over 200 Dino-warriors had been killed without even putting up any resistance.

Ku Ichimine frowned as he watched his subordinates being slaughtered helplessly and ordered, "Suppressing fire!!"

With his order, a number of bow-wielding dino-warriors stepped out and readied their bows and arrows, firing at the opposite side.

The sharp bone arrows shot towards the other side of the cliff like shooting stars, made out of Type 3 and Type 4 Mutant Beasts. Their sharpness was unparalleled, and with the immense strength of the dino-warriors, they could easily pierce through tanks which even heavy machine guns could not.

If there were any downsides to the bone arrows, it would be that they could not be fired out as quickly as heavy machine guns.

With the rain of arrows, a number of Storm Valley warriors were nailed to the ground.

In response, the rest were forced to duck behind cover.

The other dino-warriors took the opportunity to attempt another scaling over the iron chains.

Not long after they started to crawl, the Storm Warriors again came up to the iron chains, unleashing their different abilities.

The Dino-warriors suffered another bout of casualties, with many of them dropping to the bottom of the cliff.

The Dino-warrior archers began to fire a flurry of arrows once more.

On the Storm Warriors' end, there were a few of them who could utilize the energy shield, and they raised them up, powered by the Type 3 Nuclei. A huge shield appeared, blocking the salvo of arrows.

Protected by the shields, the Storm Warriors quickly came out and launched their attacks once more.

When Ku Ichimine saw this, his expression turned dark.

The terrain of Storm Valley was too dangerous, even harder to navigate than Cracked Tooth Gorge. The natural tornados made it hard for them to traverse.

After a short moment of silence, he gave a cool order, "Build the bone bridge!!"

Many dino-warriors came to the cliff-edge, and from their bodies, a number of bone spikes exploded out as they extended towards the other side.

Over a hundred dino-people had bones bursting out of their bodies that stretched to the other side.

In a few seconds, the bone bridges were formed.

Dozens of them would hug and encircle one another, forming large bone nets.

The other dino-warriors quickly made use of this to clamor over to the other side.

With the appearance of the bone bridge, dozens of Low-Grade Dino-Generals quickly got up, leading 400 Dino-warriors over to the other side, stepping on the blood-filled bones.

At this moment, a few electromagnetic guns that had been hidden fired out continuously, blasting the bone bridges into pieces, shattering them.

Just like this, they found out that the Storm Valley had many of hidden weapons and mechanisms, powerful technology that was powered by the Mutant Beast nuclei.

However, the consumption was large, and based on the terrain of the Storm Valley, once these weapons were used, they were hard to repair and maintain. Therefore, it was under the most extreme of circumstances before these were employed. However, since it was already at such a critical juncture, they had no choice.

With the mass bone bridges being destroyed, even more dino-warriors plunged to their deaths.

One of the Low-Grade Dino-Generals was unfortunate, his movements restricted by the powerful tornado. He was then pierced by 2 electromagnetic shots, forcing him off the bone bridge and he plummeted to his death.

The battlefield was cruel, and luck played an important part. While the Low-Grade Dino-General might have strength similar to Yue Zhong or Luo Qing Qing, he still died under such circumstances.

After all, a single Low-Grade Dino-General could possibly kill Zheng Zhen or Dao Ge on his own, but who would have expected that before he had even seen the other side of the cliff, he would have died?

The remaining Low-Grade Dino-Generals managed to lead some of their warriors successfully to the other side.

Right at this time, with a loud explosion, a number of energy bombs planted at the entrance went off, as a huge beam of light shot up to the skies.

With the explosion going off, many of the Dino-Warriors, together with some Dino-Generals were ripped to shreds.

Ku Ichimine watched this and sucked in a breath of cold air. Had it been him who had led the frontal charge, he might have been the one to be killed.

Before the dust settled, 2 Low-Grade Dino-Generals and 20 Dino-Warriors leaped out from the dust, charging into the midst of the Storm Warriors.

The 2 Low-Grade Dino-Generals were incredibly savage, dashing into the group of Storm Warriors, and quickly tore at their hearts and heads.

Their 20 subordinates were no different, acting like tigers among a flock of sheep. They had suffered earlier due to the Storm Valley's defenses, but now, with the opportunity to display their might, they quickly made short work of many Storm Warriors.

As they were unleashing carnage, Luo Qing Qing readied her Battle Spear, her entire being exuding a raging storm, as she appeared in front of one of the Low-Grade Dino-Generals in a flash, and sent a thrust into his head.

The Low-Grade Dino-General was prepared for Luo Qing Qing's attack, as it waved its right hand and sharp claws, slashing at the incoming spear.

A number of sharp wind blades exploded forth from the Battle Spear, tearing the right claw of the Dino-General up. He borrowed the recoil to leap backward.

With a tap of Luo Qing Qing's foot, she came right after him once more relentlessly. She needed to deal with him as soon as she could.

There were plenty of experts among the Dino-army. If Luo Qing Qing was about to kill this Low-Grade Dino-General soon, there would be 3 others that could easily catch up and defeat her.

The Dino-General raised his right elbow, a sharp bone blade striking at her Battle Spear. The powerful tail of the Dino-General swung towards Luo Qing Qing in response.

If she was struck by that sharp tail, Luo Qing Qing would also be impaled by countless blades, turning into a corpse.

With a wave of her Battle Spear, Luo Qing Qing slammed the bone blade away, pulling her spear back, before thrusting out at the tail of the Dino-General. The wind blades surfaced once more, tearing the tail apart in a shower of flesh and blood.

Having been blocked, the other Low-Grade Dino-General caught up, his own elbow striking towards her face.

Luo Qing Qing had to use her Battle Spear to deflect, with the power of the wind blades, causing the Dino-General attempting to route her to be sent flying.

At this time, the other one who had been forced back slightly, dashed back into the battle to engage Luo Qing Qing.

With 2 opponents now, Luo Qing Qing would not be able to defeat them quickly.

On the other side, the 20 Dino-warriors were being surrounded by the various Storm 8 Greats and their subordinates.

Just when it seemed that the tides of the battle were in favor, a horrifying scene that caused Luo Qing Qing and her subordinates to despair, happened. Over hundreds of dino-warriors had come to the cliff's edge once more, their bodies exploding, creating large bone nets that extended through the chasm. The dino-warriors started to cross, eyeing the opposite cliff with a savage glint.

This time, Storm Valley had extinguished all means that they could use, once the Dino-warriors got over, they would definitely be defeated.

Luo Qing Qing eyed them, a sense of despair overcoming her as she prepared to shout for retreat.

Ku Ichimine eyed them with a look of excitement, roaring loudly, "Conquer Storm Valley, ransack and slaughter them for 3 days!!"

Hearing Ku Ichimine's order, the Dino-warriors became frenzied with excitement, their morale surging.

As Ku Ichimine was celebrating, a Dino-warrior ran up to him in panic and shouted, "General! Not good! Water!! There's water rushing here!!"

## Chapter 829: Huge Flood! Turn the Tides!

A huge flood was flowing out in all directions of Green Region, the moment they brushed past the dino-warriors, the dino-warriors were submerged and swept away.

It was like a disaster that struck, and as the waters churned towards the direction of Storm Valley, the dino-warriors caught up along the way were swept along as well.

At the same time, there were some powerful water-based Mutant Beasts that appeared and swallowed some of the dino-warriors.

Ku Ichimine quickly rode his Pterosaur and flew up in the air. With a glance, he could see the large water body inching closer towards their position, countless dino-warriors struggling under the water, before being swallowed up by Mutant Beasts.

Once the overlords of the land were submerged, they could not even best the water-based Mutant Beasts and were easily swallowed up.

He saw the incoming flood and his face fell, "Shit!! Quick!! Quick!! Everyone attack!! Get into Storm Valley!!"

If they were submerged by the water, then the entire army would perish at the jaws of those water Mutant Beasts or swept down to the chasm below. While a few might survive on their Pterosaur, the losses would be unimaginable.

With the threat of imminent death, the thousand-plus Dino warriors quickly charged to the edge of the cliff, their bodies splitting as huge bone nets stretched over towards the other side.

A large number of Dino-warriors began to get on the bone nets in a scramble to crawl over. It was the only way of survival, as what was awaiting them if they stayed was the flood.

The Storm Warriors on the other side also stepped up the ferocity of their defenses, many of them ignoring all forms of danger to activate their abilities, destroying the bone nets and sending the dino-warriors to their deaths.

The dino-archers continued to fire their arrows at the Storm Warriors, piercing them and nailing them to the ground.

Hundreds of Storm Warriors charged out from various ambush points, destroying the bone nets as best as they could, sending the Dino-warriors to their death.

From time to time, a number of Dino-warriors would make it through successfully and began to clash with the Storm Warriors.

Both sides continued to fight it out with every fiber of their being, and there were casualties every second.

By this time, Luo Qing Qing's eyes were bloodshot from the countless slain enemies. The Storm Battle Armor helped push her strength to the Type 5 realm, and she could dispose of any Low-Grade Dino-General in a single blow. She had fended off 6 Low-Grade Dino-Generals that had just crossed. However, under the enhancement of the Storm Armor, her Stamina and Spirit consumption was high, and she could not hold on for long.

On one side, the dino-army was invading crazily, while the other consisted of the elites of the Storm Valley employing all techniques they had to defend.

In terms of strength, the Storm Warriors were not a match for the Dino-warriors, but with the help of Storm Valley's terrain, it helped balance the conditions, causing both sides to be evenly matched.

The cruel battle continued for a long while, as the flood got closer and closer. Huge troops of dino-warriors would be enveloped by the water and could not even put up a resistance.

With a powerful tidal wave, the thousands of dino-warriors who were gathered at the edge of the cliff were swept by the flood, falling to the bottom of the cliff.

In the skies, Ku Ichimine watched as the numerous dino-warriors struggled, his eyes flashing with pain as he announced bitterly, "The 3rd Battalion is over!"

Many of the other generals also wore expressions of pain and fury, they had almost made it to Storm Valley. If only they had another 3 hours, they could have invaded successfully. Even if the flood came then, they would have been safe on the other side. Falling from the feeling of heaven to the depths of hell, such a huge change was enough to make them throw up blood.

"Damn it!! Damn it!!"

Ku Ichimine roared to the skies in helplessness and fury.

"Long live!!"

"We're victorious!!"

"Long live Her Majesty!!"

"..."

On the other side, the Storm Warriors who were covered in blood saw the flood washing away the dino-warriors and immediately erupted in cheers.

These Storm Warriors knew the difficulty in fending off the naturally-stronger Dino-warriors. Even if they had the upper hand in the terrain, facing their relentless assault, they still suffered greatly. Had it been dragged on any longer, they would have surely lost.

With the flood breaking off any possible reinforcements of the dino-warriors, the majority of the dino-army had been stuck at the edge of the cliff, thus being washed away. Those that managed to cross, other than the 6 held back by Luo Qing Qing, there were only 40 others, and they were currently engaged in battle with the Storm Warriors.

However, even without their reinforcements, the 40 dino warriors were as ferocious as ever, tearing apart a few of the Storm Warriors. Under the leadership of the Storm 8 Greats, and the combined efforts of over a hundred warriors, they managed to finally take down the 40 dino-warriors.

After killing the 40 warriors, the Storm 8 Greats continued to lead their subordinates to take down the Low-Grade Dino-Generals one by one.

With their combined efforts, the Dino-General held out for merely 10 seconds and his head was destroyed by a spear thrust from Luo Qing Qing,

The remaining Dino-Generals increased the ferocity of their attacks, killing another 40 Storm Warriors, before finally being killed by Luo Qing Qing.

"Long live Her Majesty!!"

"Her Majesty is always victorious!!"

"Her Majesty is always victorious!!"

"...."

When all the dino-warriors were dealt with, the Storm Warriors erupted in loud cheers once again. They had seen the terrifying strength of the Dino-warriors themselves, if it wasn't for Luo Qing Qing holding them at bay, they would have been annihilated.

"He actually succeeded!!" In the midst of cheers, Luo Qing Qing looked out towards the chasm, eyeing the countless corpses of dino-warriors, her eyes flashing with a look of surprise.

If it was not for this sudden flood, Storm Valley would definitely have fallen to the invasion of the Dino-army. At that time, Luo Qing Qing and her subordinates could only choose to quickly get up the Storm Battleship and abandon everything in retreat. This area of abundant resources and natural defenses would then fall into the hands of the Dino-race. Without it, the population on the Storm Battleship would not be able to survive for long.

Hai Xi looked at the remnants of the battlefield, and could not help but sigh, "He actually succeeded! What a person! How did they do it?"

Yue Zhong had actually directed such an amount of water from the Green River in these 2 days, rocking Hai Xi's beliefs. She had not thought it possible.

Luo Qing Qing nodded, her eyes flashing with curiosity as well.

The flood continued to flow unhindered throughout Green Region, causing a number of dino-warriors, Mutant Beasts and dinosaurs to be enveloped and swept along, turning the entire place into a submerged region.

In the waters, a Type 5 Diplodocus was currently swimming lazily, looking like a floating mountain. Beside it, a Type 4 Crocodile Snapping Turtle, and in the air, a mythical and enormous green bird was soaring.

On the back of the Type 5 Diplodocus, there were 2 women and a man, precisely Yue Zhong's gang.

Yue Zhong sat on top of Type 5 Mount Tai's back and looked down, discovering many of the dino-warriors struggling in the water, while water-based Mutant Beasts swam up and consumed them.

Behind Yue Zhong, Liu Mei'er and Han Zi Xuan were looking at him with complicated gazes, their hearts in turmoil. They had not expected Yue Zhong to be successful in routing the water flow.

Initially, with the ice blocks, the collected water had been little. However, with Type 5 Mount Tai's strength, Yue Zhong forcefully destroyed the natural dam of Green River, causing that heaven-calamity flood.

A Type 5 Diplodocus was truly a dangerous weapon, with the ability to destroy an entire faction. When the 2 ladies had seen Yue Zhong summoned Mount Tai out, their eyes almost fell out their sockets.

Mount Tai continued to traverse through the submerged lands leisurely. From time to time, it would open its huge mouth to draw in a deep gulp, absorbing dozens of Dino-warriors into its mouth. With a forceful crunch, the unfortunate dino-warriors would be crushed into meat and blood.

Even Type 4 Turtle was also enjoying itself by gobbling a number of dino-warriors.

Inside the Green River, there were many ferocious Mutant Beasts, once they were unleashed out in Green Region, they immediately went for the dino-warriors. These were Type 3 Divine Warriors, their energy raw and pure. To these Mutant Beasts, they were a delicious source of nutrients, and way to evolve. Hence, the beasts aimed for the dino-warriors to consume them.

## Chapter 830: Clash of the Titans!

Other than those dino-people, many other land-based Mutant Beasts also became targets for the water-based Mutant Beasts.

Within the waters, one would see various Type 2 Sabertooth Tigers, Type 2 Direwolves, Type 2 Mutant Tigers and other creatures being assaulted by various Mutant Lobsters, Mutant Prawns, Mutant Crabs, even Mutant Piranhas. These overlords on land could only struggle futilely in the water, exhibiting only about 10% or 20% of their prowess. Unfortunately, they were consumed helplessly.

The entire Green Region had become some form of hunting ground, except that this time, the hunters were not the Dino-race, but the aquatic Mutant Beasts, while the prey was everything else, including humans.

Yue Zhong broke the dam of Green River to flood the dino-army, but it also caused countless humans to suffer due to the catastrophic scope of the flood.

As Yue Zhong sat atop the head of Mount Tai, he looked towards the distance coldly.

He could see the equally large Type 5 Triceratops atop the water standing firmly as well, walking slowly but steadily towards the direction of the Stegosaurus Kingdom. On it, there were the upper echelons deployed for the mission this time - 36 Type 5 Divine Warriors. Other than them, there were also hundreds of Low-Grade Dino-Generals, and over 3,000 Dino-warriors.

Just the forces crawling on this Type 5 Triceratops was enough to deal devastating damage to the Saint Clan of the Second World.

Around the Type 5 Triceratops, there were hundreds of Pterosaurs, each of them with a Low-Grade Dino-General riding on top that was keeping a wary eye on their surroundings. There were even 2 other Type 5 Divine Warriors on their own Pterosaur.

The frame of the Type 5 Triceratops was massive, thus the flood was only able to reach its knees, but it was enough to make it hard to move smoothly.

A few Type 4 aquatic Mutant Beasts swam close to the Type 5 Triceratops, eyeing it with wild looks, but not daring to make any moves.

The might of a Type 5 Mutant Beast was too terrifying, especially such gigantic ones. While the flood was enough to affect their combat powers, it was not enough to submerge them fully, thus not causing any major life-threatening conditions.

They continued to stare at the Type 5 Triceratops while circling it constantly, seeking for an opportunity to strike.

While a Type 5 Mutant Beast had terrifying strength, the flood had diminished its combat prowess slightly, causing some of these water-based Type 4 Mutant Beasts to be bolder.

If they could consume it, these Type 4 Mutant Beasts would take a huge leap in their evolution.

Yue Zhong stared at the Type 5 Triceratops and pointed at it while ordering Mount Tai, "Go kill it!"

Type 5 Mount Tai immediately began dashing towards the Type 5 Triceratops.

The various Mutant Beasts circling the Type 5 Triceratops quickly got away, not daring to get in the conflict between 2 Type 5 behemoths.

The various Pterosaurs and their Dino-warriors quickly discovered Mount Tai's strange actions. Under the lead of their 2 Type 5 Divine Warriors, they swooped over swiftly.

The 2 Type 5 Divine Warriors had already prepared their bows at the maximum tension, in a flash, 2 sharp bone arrows shot down towards Mount Tai, causing 2 bloody holes in its head.

Their attack was enough to break through even the new scale that Mount Tai had recently grown. At the same time, those arrows were covered with a powerful toxin, called the Gods Annihilation Poison, once injured, it would affect the recovery abilities of the Type 5 Mutant Beasts. After all, the toxin was concocted from various poison-attribute Type 5 Mutant Beasts, and it was incredibly lethal.

On the back of a Pterosaur, many Low-Grade Dino-Generals had also nocked their bows, firing sharp bone arrows towards Mount Tai.

The majority were easily deflected by the new scales on Mount Tai's body, however, some were accurate enough to pierce the wounds of Mount Tai, aggravating the injuries.

Mount Tai stared up at the skies and roared out in fury. Although it possessed immense strength and could level an entire building with ease, it could not do anything about those aerial Mutant Beasts. Its innate ability was its Strength, not wind nor ice, or other elements.

The Type 3 Pterosaurs, together with Mid-Grade Dino Generals, were a powerful combination, hunting various preys. However, they could not do anything to Type 5 Mutant Beasts with elemental attributes.

Intelligent life forms tend to be weaker in terms of strength and abilities but their gap in strength could be covered by their wits and other abilities. This was the terrifying feature of intelligent life forms.

At this time, a powerful tornado blew past, which was the effect of Greenie in the skies activating its innate ability. With the roaring winds, Greenie's speed was pushed to 2.5 Mach, even faster than the Type 4 Flame Bird.

The speedy Greenie instantly swooped down on one of the Type 3 Pterosaur that was carrying a Type 5 Divine Warrior, flapping its wings. Powerful wind blades shot out, slicing the Type 3 Pterosaur in two.

The Type 5 Divine Warrior could only fall helplessly down to the ground.

Greenie did not chase after the plunging Type 5 Divine Warrior, instead, tearing through the flock of Pterosaurs. Each time it pecked, a Type 3 Pterosaur would be killed, and the Dino-warrior on top of it would plunge together with the corpse.

After consuming a Type 5 Nucleus, although it had not yet reached the Type 5 realm, Greenie had already evolved to a stage where it was more powerful than most Type 4 Mutant Beasts. Those Type 3 Pterosaurs could not do anything to it.

In the skies, the Pterosaurs dropped like rain.

The Pterosaurs that the Type 5 Divine Warriors were riding on were easily killed by Greenie, and they plunged down from the skies.

However, the physique of the 2 Mid-Grade Dino-Generals was truly perverse, not dying even from falling from such a height.

At this moment, a huge tail over a hundred tonnes came slapping down towards the 2 Mid-Grade Dino-Generals.

The moment they plunged into the water, their movement speed was slowed to a crawl. Eyeing the incoming tail, their bodies radiated with their Radiance of Life, reaching out with their hands to try and block the blow.

Type 5 Mount Tai's tail swung down viciously, instantly destroying the Radiance of Life, slapping the 2 into minced meat. Type 4 Turtle immediately drew a deep breath, sucking in both corpses.

Had they been on normal land, Mount Tai would not be able to do anything to them, because its speed was too slow. However, in water, they were lambs awaiting slaughter. A single slap of its tail was enough to crush the both of them. To a Type 5 human, these Type 5 Dino-Generals were tough, but compared to a Type 5 Mutant Beast, they were truly weak.

Liu Mei'er's eyes flashed with disbelief as she cried out, "Those 2 Mid-Grade Dino-Generals just died like that? For real? Did my eyes go blind?"

Han Zi Xuan continued to mutter with part-joy and part-disbelief, "It's real! It's real!! 2 Mid-Grade Dino-Generals were killed!! They're dead!!"

Those Mid-Grade Dino-Generals were Type 5 existences, even Luo Qing Qing with her Storm Armor might not be able to handle them.

And yet, 2 of them had died just like that, causing Liu Mei'er and Han Zi Xuan to be thoroughly shocked. These Type 5 existences were top figures among the Dino-race and were invincible existences.

Yue Zhong did not seem to mind their shock, as he pulled out his Electromagnetic Gun to fire at the Triceratops.

A number of beams shot out, blasting above the body of the Triceratops, killing the Dino-warriors gathered on top. At the same time, some of the shots managed to pierce the scales of the Triceratops, causing some bloody holes. However, the recovery of the Type 5 Mutant Beast was terrifying, quickly regenerating at a speed visible to the naked eye.

Yue Zhong continued to kill the Dino-warriors in an unbridled fashion while absorbing their life force through his God and Devil Imprint.

Faced with such an assault, the Type 5 Triceratops was enraged and quickly turned, stomping on the submerged ground, and dashed towards Mount Tai.

Mount Tai also began to launch its own charge towards the Triceratops.

2 island-sized behemoths charging at each other, the tremors and motions caused the water to billow out in waves as the 2 beasts got closer to each other.

Right as they were about to get close, Mount Tai suddenly swung its massive tail, sending out a big wave as it smashed towards the head of the Triceratops viciously.
