

Doomsday 1041

Chapter 1041: I used to know Donkey Kong

Although there are a large number of mutant beasts, not all mutant beasts can climb to the top of the city. After all, there are only a few who can rush to the top of the city, otherwise the city head would have been lost.

But now the joining of the army has broken this round, and the powerful firepower poured out, and the mutant beasts under the city were beaten up.

Liu Zhenya also lost his blood, grenade, and rocket bombs without money. The ***** flowers bloom outside the city, piles of mutant beasts, mutilated limbs, severe casualties, and nearly died in just one minute. Two or three thousand, and the results of the ***** battle in the previous few hours are not much different.

The mutant beasts under the city were stunned, and the offensive slowed down. The strong explosion and flame mutant beasts were still scared, and they screamed and ran to avoid them, chaos, and there were a lot of casualties under mutual attack and squeeze. The entire battlefield was in chaos, and the gunfire at the head of the city didn't stop. The mutant beasts there flooded the mutant beasts and scattered them.

It seems that these fighters have fought with mutant beasts. They are extremely experienced in defending the city. They do not need to command at all. They are already fighting together. The effect is believed to be obvious. The mutant beasts cannot gather at all. There is a mess under the city, and there are mutant beasts. Thinking of siege.

Boom boom boom

At this moment, the energy cannon on the city wall suddenly roared, and blue energy ***** shot into the mutant beast group, and a terrifying explosion would surely explode, blowing the mutant beast into the air.

How powerful it is to have hundreds of energy cannons fired together, and the energy cannons on the city's head are activated very quickly, with an average of one shot per second, which is no different from a thousand cannons. What cannons can be so fast.

The entire battlefield was shrouded in flames that exploded for a while, and countless mutant beasts were blown into fragments by a strong explosion.

This seemed to be the last straw to overwhelm the camel, the mutant beast could no longer withstand the pressure and collapsed.

A beast is a beast, even if it has mutated its nature, it still won't change. Before, when I saw human beings with red eyes, I screamed and rushed to bite. Now once I get beaten, I don't know what to do. Running around the field, it was even more bombarded by energy cannons. This time, I forgot to attack the base anymore, and began to flee desperately, colliding, squeezing, tearing each other, and fleeing into the cluster desperately.

The soldiers in the sanctuary city were stunned by the sudden change of battle, but they reacted in an instant. The head of the city burst into cheers, and then they shot more desperately, their guns, bows and arrows moved together. Cooperate with the sergeants to kill groups of mutant beasts.

"Wow!"

There was an angry roar from the jungle at this time, but at this time the mutant beast group was completely frightened. No matter how the hidden mutant beast roared, these mutant beasts never listened to it anymore. Run desperately.

The rags were everywhere outside the city, and the roar continued. In a short while, a mess was left outside the city, with broken limbs and broken legs everywhere, and corpses of mutant beasts everywhere, and no more living creatures moving outside the city. This sudden change made Everyone is dumbfounded.

Is this too simple?

Di Ping also watched this scene blankly, secretly saying that these mutant beasts were too casual, right?

He has a sense of emptiness with a punch to the empty space, and a sense of play for children.

Could it be said that it was co-acted in a play with these soldiers, or how could they be so cooperative? With the sound of gunfire, within a quarter of an hour, the army of mutant beasts outside the city had run out. How could this make people believe that this was true?

Okay now!

The favors owed to Liu Zhenya are owed, and the crisis of the base is resolved when people come up. Isn't that good enough?

Although the energy cannon has played a big role, everyone has seen that it was the joining of the army that disrupted the mutant beasts. The energy cannon can only be regarded as a supplement. Of course, the main credit should go to these soldiers.

Di Ping secretly had a headache. This Liu Zhenya was really lucky. The timing was so good. The mutant beasts had already suffered a small number of casualties. After fighting for so long, these mutant beasts are almost unable to hold up. Even if the army does not join, the energy cannon blasts. The mutant beast also had to fight back, but now it was said that it was useless.

Everyone watched this scene weirdly. Even Liu Zhenya looked at the empty space outside the city in a daze. For a while, he didn't know what to say, and the whole battlefield was suddenly quiet.

Roar!

Chapter 1042: One punch to destroy a million

Suddenly a terrifying roar came from the jungle, the voice was full of anger, and an overwhelming coercion pressed towards the sanctuary. Everyone felt their heart palpitations and their chests were stuffy, as if a disaster was imminent. a feeling of.

Everyone did not expect that the mysterious mutant beast that had never appeared in the jungle for remote control command also did not expect that the commands that were useful before are now useless. The mutant beast ran away like crazy, not following its command at all, waiting for it to react. The mutant beast group had run away, and it made a long roar to vent its anger.

Everyone in the city saw the direction from which the roar came from, and felt the mighty power suddenly rising there. A lot of worries appeared on everyone's faces. This mighty power was too strong. Can the base stop it?

Di Ping half-squinted his eyes to the place where the power was rising. He knew that the real crisis was coming. Before, these animal herds were just side dishes for him, and this was the real main dish.

Kakaka

It moved. One kilometer away in the jungle, the trees began to sway violently. Trees continued to collapse, and the sound of breaking was endless, and the movement was getting faster and faster, coming towards this side.

Originally, the mutant beasts retreated and the whole city should cheer, but at this time the entire sanctuary city was still like stagnant water. Everyone was staring nervously at the direction the movement was coming from.

So fast and fast!

Di Ping watched the approaching movement in the jungle, and his eyes burst into shock. This mutant beast was so fast, it was simply a tornado that was pulling the trees and rolling over here.

Roar!

The huge roar again, this time closer, the whole world seemed to tremble with the huge roar, everyone's ears shook, and the fright on everyone's face became more intense.

Di Ping silently took out the armor that he hadn't worn much from the back of his bag, and began to put it on his body. Feeling the terrifying aura of this mutant beast, he knew that this strength was absolutely powerful, and he had to deal with it with all his strength.

Such a mutant beast must not let him get close to the city wall. He is afraid that the city wall will not be able to stop this terrible mutant beast. Once the mutant beast enters the city, it will be a disaster for the city, so he must block this mutant beast anyway. But he was not arrogant, and he was sure to get rid of this mutant beast, so he also put on the armor he hadn't worn.

Dark gray helmet, dark gray armor, carrying a wave chaser, the whole person is like a warrior walking across the time corridor from Medieval Western Europe, ancient and mysterious, standing still there will be a murderous aura.

It's not accustomed to people like him to dress up asylum, because people like Owen usually wander around in battle armor. Although Di Ping rarely wears it, he also wears it once or two. These city guards have long been used to it. , And his ability to change things out of thin air is no longer a secret.

But Liu Zhenya was not. He looked at Di Ping in shock with a look of nothingness, as if by magic, he wore pieces of fantasy equipment on him. The shock in his heart was conceivable, and he didn't even care about the danger of an immediate attack outside the city. .

"Om!"

Just before Di Ping moved, a buzzing sound suddenly came from behind him.

The buzzing sound was not loud, but it was extremely abrupt in this quiet battlefield. Everyone was attracted by the sound and looked behind.

I saw Di Ping's tall city main tower suddenly rose up a black cannon that was larger than that on the castle tower. This is a larger energy cannon. The long barrel is dark and mysterious, flashing in the sun. With a hideous light.

Everyone knows what this is. The surrounding walls and the energy cannons were still watching the energy cannons fired just now. No one didn't know what it was.

I have seen the power of the energy cannons on the front of the city and the four towers of the castle before Di Ping. This larger cannon is definitely not bad.

After the energy cannon was raised, it quickly adjusted its direction and aimed at the approaching movement in the jungle. The dense sound of clicks made people feel restless.

Chapter 1043: Despair at the end of the method

This terrifying giant cannon suddenly raised, so that the people's already somewhat scared mood was a little calmer. Do you want such a terrifying cannon to solve this monster?

This thought came into everyone's mind, including Di Ping also hoped that this mutant beast could be solved by the energy cannon.

boom!

The cannon rang!

The huge gun body shook, and a deep blue energy ball the size of a bowl shot out from the pitch black muzzle. The speed was amazing, even faster than the four shells on the castle tower.

The energy ball instantly crossed nearly five or six hundred meters into the jungle and shot at the unknown mutant beast that came quickly.

Everyone stared tightly at the place where the energy ball was shot, looking forward to the next result, whether the cannon could kill this powerful mutant beast.

boom

There was a loud noise, the earth roared, and the city was shaking.

A group of dazzling light suddenly lit up in the jungle, like the sun, and a mushroom cloud rose immediately, a strong shock wave swept around like a violent wind, countless trees were instantly twisted into pieces, and the shock wave was like a storm of rolling sand. Running towards the sanctuary city, there was a sound of rolling thunder.

Looking at the dust storm that swept across the sky, everyone's face changed color, without reminding them, they quickly hid behind the crenel, fearing being swept away by the wind.

Bang bang bang...

The violent wind engulfed the broken branches and broken wood, hitting the city wall with a huge sound, and the violent wind swept across the city, and even screamed, like the sea whistling and the mountains, the momentum is astonishing.

It took more than ten seconds for the wind to stop. Everyone slowly got up with a look of horror. They watched a lot of broken branches and leaves fall on the top of the city. What surprised everyone was that the original lush forest, at this time, unexpectedly. There is a huge open space of more than 100 meters, exposing patches of loess, and only broken tree roots remain on the ground.

Liu Zhenya was even more shocked. The explosion range produced by this explosion definitely exceeded the power of a howitzer with a caliber of more than one hundred and sixty.

This type of artillery is not equipped with the Bianzhou Military Region. This type of weapon is a real killer on the battlefield. A single shot goes down within a radius of 100 meters and no grass grows. For soldiers, it is a disaster or massacre.

This type of gun has long since disappeared from soldiers, replaced by missiles, and is now generally mounted on ships or aircraft carriers.

How can such a small asylum city have such powerful weapons? There are not many guns with such powerful weapons in all major military regions in the country. When missiles and nuclear bombs cannot be released, such powerful weapons can definitely be used. Call it a big killer.

Liu Zhenya couldn't imagine, what kind of gun is such a strange weapon that looks so powerful in its shape and structure?

What exactly is this blue ball of light?

Why is it so powerful?

At this time, he was full of doubts, and his back was a little cold. If the previous self did not know the details, and really conflicted with the sanctuary, this shot?

He complained a bit about Liu Minsheng at this time, and he didn't report such an important matter to him. If he really dared to come up with force to suppress him, once the two sides went to war?

He has not dared to think about the consequences! The heart is trembling, it's so dangerous!

There was a wave of waves in Liu Zhenya's heart again, the previous pride and pride fell to the bottom in an instant!

At this time, Liu Minsheng's shock was no less than that of Liu Zhenya. He felt that he already knew some of the details of the sanctuary, and now he discovered that there is still a bigger secret waiting for him. It turns out that all he knows is the fur, and he has not touched it. The core, the bottom of this sanctuary city is as deep as a river, and I never know where his real secret is!

This shot not only knocked out Liu Zhenya's newly born pride, but also knocked out the last trace of Liu Minsheng's luck.

Chapter 1044: There is no retreat but war

It's not that Liu Zhenya and Liu Minsheng have never seen such a powerful cannon. This type of cannon is no longer a powerful weapon today.

Nuclear bombs, hydrogen bombs, electromagnetic cannons, pulse cannons, air cannons, etc., in front of weapons with thousands of equivalents, this kind of power is simply negligible, and the two are of course not shocked by this.

The Bianzhou Military Region also has a 150mm caliber gun, not one or two, but where is the refuge city, a small base established by ordinary people, it has such weapons, and it is a mystery that he has never seen before. arms.

This was different from the artillery they had seen. It was not a cannonball, but a blue energy body. He didn't understand what kind of weapon it was. He hadn't even heard it from the knowledge of the two of them. Looking at the black cannon bodies on the city wall, he suddenly became very interested, and he was very curious about the origin of these cannons.

Suddenly Liu Zhenya remembered the giant city that had fallen from the sky, and had a strong thought in his heart. Maybe this weapon has something to do with the sky, right?

Di Ping was also taken aback by the power of this cannon. The jungle in front of him was in a mess. The giant trees surrounded by countless adults were uprooted, and some of them had been twisted into pieces. The center of the explosion was enveloped in smoke and dust. , But it must be more serious than the surrounding scenes.

He couldn't help but slap his tongue secretly. The four cannons on the castle tower in the past were enough for him to be astonishing, but the main cannon on the main tower of the city surprised him even more, thinking that this mutant beast should be destroyed. Right?

All the people watching the battle on the front of the city were taken aback by the power of this gun, but soon everyone started to care about the performance of this gun and whether the mutant beast was killed.

Everyone's eyes widened, waiting for the smoke and dust to fall, so as to see the tragic condition of the mutant beast, the scene quietly dropped a needle to hear, only the sound of heavy breathing one after another.

A gust of wind blew, and the dust dissipated, revealing a huge pit with a radius of nearly forty to fifty meters in the center of an empty yellow ground with a radius of nearly 100 meters, but there was nothing except the pit, let alone a mutant beast.

"Where is the monster?"

Seeing the scene at the scene, everyone was taken aback for a moment, and then they looked for something with a look of confusion?

Di Ping was also dumbfounded. The dust was gone, and it was clear on the battlefield that there would be no mutant beasts on the scene. Could it be that it was blown up?

Everyone had such doubts in their hearts. Di Ping also had doubts on his face. However, he felt that something was wrong. This mutant beast would definitely not be bombed with no bones left, only a remnant would remain. The energy cannon is very powerful. , But it is not strong enough to gasify the mutant beast, right?

However, many fighters were already excited, thinking that the mutant beasts should have been bombarded to pieces, and all of them showed excitement, but Di Ping frowned, and his eyes scanned the battlefield sharply. A detail.

Suddenly the trees in the jungle moved, and a huge black shadow jumped out of the jungle and fell to the ground with a bang, and the earth shook like an earthquake.

"what!"

When they were about to cheer, people were startled by the giant beast that suddenly jumped out. Someone couldn't help but let out an exclamation, looking at the terrifying monster that suddenly jumped out in horror.

This is a huge monster, six or seven meters high, standing on the open ground like a small tall. It is gasping for breath and seems to be extremely angry. Its huge fist-like eyes are red with blood, staring at the wall. Everyone showed their stalky fangs.

Chapter 1045: Shelling is useless and finally shot

"King Kong!"

Di Ping screamed when he saw the boss whose eyes were staring at this monster, and he was no longer calm as before.

Yes, in front of him was the exact same gorilla he had seen in the zoo before, the same coat color and the same tall, he couldn't tell if this was the one before.

If it was the zoo!

Di Ping's eyes dazzled, and his heart was not good. Looking at the familiar appearance and the same powerful aura, he was 100% sure that this was the mutant King Kong before.

King Kong's condition was not very good. The black hair all over his body was charred at this time, as if he had just emerged from the fire. The hair was curled in many places, and the hair had disappeared in some places, revealing pieces of flesh.

Di Ping's heart sank as he looked at King Kong, who was embarrassed but still powerful. He knew the strength of this King Kong.

It absolutely surpassed the first level, and has entered the second level, but it is impossible to determine whether it is the second-level elementary or advanced.

You don't need to think about it to know its terrible strength, because the horrific blow of the main artillery just now did not cause much damage to it. Although it looked very embarrassed, its breath was not messy, and there were not many serious wounds on its body.

King Kong was obviously very angry at this time, it was breathing heavily, like thunder, and its eyes breathed fire.

"Oooooo"

Suddenly it roared in anger, like thunder, and the people in the shaking city were muffled, their brains buzzed, their eardrums were about to crack, and painful expressions appeared on their faces.

King Kong frantically waved its two giant arms and slapped its chest to make a huge sound, coupled with its hideous fangs, huge body, violent momentum, and chilling, the timid already had

legs trembling, even the body At this time, Liu Zhenya, who had experienced many battles, also had a look of fear on his face.

He had fought the mutant golden eagle before, and the golden eagle had already put too much pressure on him, and looking at this mutant gorilla, he felt more terrifying than the mutant golden eagle before, and his aura was too powerful.

boom!

Just as everyone was panicking, suddenly there was a roar again, the energy cannon on the main tower of the city rang again, a blue light flashed from the city, a blue trace was drawn in the sky, and a blue cone shot with a storm. To the mutation King Kong.

Di Ping's eyes condensed, and he stared at the mutant King Kong closely. He wanted to see how the result of this shot, whether it could hurt the mutant King Kong, the King Kong put too much pressure on him, if the energy cannon could not damage the mutant King Kong, the city of refuge It's really dangerous, he doesn't think he can beat Mutant King Kong.

There are two forms of energy cannons. One is a group attack, which is like the previous energy balls. Once the power of igniting an explosion is comparable to a large number of bombs, the energy cannon stimulated this type of energy bomb before dealing with birds.

And the other form is like this kind of cone, a single attack, special defense, amazing lethality, fast speed and strong attack power, it is a sharp weapon against powerful mutant beasts.

He didn't know whether this energy cannon could achieve the results he wanted, as long as the mutant King Kong was injured, he would definitely take it down today.

The last time he was chased by the mutant King Kong, he had already made up his mind. Once he got stronger, he would meet the gorilla again, but he never thought that he would meet again in just two days.

The energy cannon is too fast, the blue cone has arrived before everyone can react!

Feeling the powerful pressure of the energy cannon, a fierce glow burst into the blood-red eyes of the mutant King Kong, and it suddenly raised its stone-grinding fist to greet the blue cone.

Hope burst out in everyone's eyes. This gorilla is a little stupid. He dares to pick up such a terrifying energy cannon, as long as he picks it up, he will die.

Who is present now, who doesn't know how powerful this strange cone is!

Chapter 1046: Fighting second-tier is not easy

The speed of the blue energy cone has broken through the sound barrier, just like a blue meteor, instantly reaching the mutant King Kong.

And King Kong's fist was also shot at the same time, and its fist was flashing with a little light, like steel, with a metallic luster.

call!

A fist the size of Shi Yun was shot out, the fist wind howled, and the strong fist strength compressed the air and deformed.

The shells and fists were about to meet together, and everyone was staring nervously, afraid of missing a trace of the plot.

When Di Ping saw the dim light flashing, his eyes condensed, the pressure on the diamond fist was too strong, as thick as a mountain, he was a little worried about the result of this shot.

boom!

The blue cone collided with King Kong's fist, making a huge roar.

The sky roared and the earth shook, like thunder blowing in the ears, and the ears buzzed for an instant, almost deaf, and everyone's faces were filled with pain, even Di Ping frowned, but he didn't move and his eyes were tight. Staring closely at the battlefield.

Countless blue energies exploded instantly, and the white light suddenly rose, like a blazing sun suddenly rising into the sky, the eyes of the person shining with the scorching light were sour, and could not help crying, even Di Ping's eyes were dazzling for a short time blindness.

In just a second, his eyes suddenly recovered. When he saw the battlefield, his eyes burst with horror, and he couldn't believe the facts before him.

The mutant King Kong was standing on the spot intact. Its fists were still stretched out. Although it was **** and bloody, anyone could tell that the gun did not hurt its roots. It did not even reveal its bones. Such a powerful one. The gun was blocked by its punch.

broken!

Seeing this scene, everyone present had a scalp and felt bad in their hearts.

Di Ping also had a chill in his heart. He knew that this King Kong was very strong, but it was so powerful that it could kill the Tier 1 and Tier 9 main guns without being able to damage it. This was troublesome.

Mutant King Kong's huge body was motionless at this time, letting the blood drip from its fist, its eyes were already blood red, staring at the city head firmly, even Di Ping felt the anger and madness in it. Chills.

Ouch!

King Kong screamed in anger and shook the mountains and rivers, like a predatory beast, with an extremely powerful aura. A violent aura came directly toward the city head like a tsunami. Everyone at the city head felt frightened and their courage quickly faded , Unexpectedly a little unstable.

They have experienced the most tragic battle, and they have fought the mutant beasts for a long time, but although the mutant beasts are strong, they can only do it, and the huge mutant orangutan in front of them can't afford to fight. Courage, this cannot be overcome by manpower.

Liu Zhenya's face was also pale at this time, and her heart was terrified. This monster was much stronger than the golden eagle he encountered. With that violent aura, he could not have any thoughts of resistance. If it had been encountered last time It was King Kong, he really didn't know if he could escape.

After King Kong roared wildly, he jumped up suddenly, jumped out more than 20 meters, and rushed towards the sanctuary city. It was just a mutant beast, which was even more terrifying than

the previous ten thousand beasts galloping. A dark cloud with boundless darkness is pressing towards the city of refuge, and the dark cloud is pressing down on the city, as if the last days, making people feel bored, breathless, and fearful.

Even the elite soldiers of the Bianzhou base did not perform much better than the defenders of the refuge city at this time. The hands they were holding were already shaking and their faces turned pale. If it were not for the support of the soldiers, they would immediately want to escape. .

Chapter 1047: The fierce battle started so hard

"Why don't you shoot?"

Di Ping looked at the mutant King Kong rushing with boundless might, his forehead was sweating, and he shouted anxiously.

"Master, it takes ten seconds for the main energy cannon to cool down!"

Zero's voice sounded.

"what?"

Di Ping's color suddenly changed, and he almost jumped up, he even forgot that the energy cannon had a cooling time.

What can I do now?

Although King Kong has a huge body, his speed is not slow at all. He ran on all fours, like crazy, regardless of all obstacles on the road, the trees were crushed by it, and an open area was ploughed out in a blink of an eye. It has rushed nearly a hundred meters away.

At its speed, it can rush to the bottom of the city in ten seconds. With its jumping power, it can jump to the top of the city with one jump. Then it will be a disaster for the sanctuary. No one can stop it, even Di Ping. .

"Can't let it come near!"

Seeing King Kong turning around, Di Ping forced himself into a calm state, his eyes returned to coldness, and he commanded to Zero Shen: "Blam with a2 energy cannon to slow it down!"

"Yes!"

"boom....."

Before the sound of zero fell, the four energy cannons on the castle roared, and the four blue cones of energy lased towards the mutant King Kong.

The four energies went in parallel at an amazing speed. They arrived in front of King Kong in the blink of an eye. King Kong didn't seem to hide at all, and it suddenly slapped it over.

boom.....

With four loud noises in a row, the four energy cannons were slammed by King Kong's palm. The powerful explosion shook the body of King Kong, and banged back three or four steps to the side.

It seemed that the loud sound made it dizzy, King Kong shook its huge head suddenly, trying to throw away the dizziness.

But soon, in the next second, King Kong's eyes regained clarity. It seemed to be even more angry. It roared and rushed again. Its eyes were blood red, and it was staring at the city head closely, as if it was in its eyes at this time. There is nothing, I just want to dismantle and look at this city.

Seeing that the energy cannon only repelled King Kong a few steps away, Di Ping's expression remained unchanged, but his pupils shrank, useless! The a2 level energy cannon is of no use to the mutant King Kong, and cannot break its powerful defense at all.

Only the main gun is useful, but the charging time is too long. At the speed of the mutant King Kong, these several hundred meters can leap in less than ten seconds.

However, although the energy cannon can't hurt it, it can stop its speed somewhat.

Boom boom boom

The A1 energy cannon on the head of the city also suddenly sounded. More than fifty energy cannons on the southern city wall were fired at the same time, and the dense energy **** fired at the mutant King Kong at the same time.

Seeing so many energy balls, King Kong did not hide, but suddenly turned sideways and used his back to catch the shells.

boom.....

Energy **** exploded on its back, bursting into flames, flooding the huge body of Mutant King Kong.

However, Di Ping didn't have a trace of joy on his face. He knew that it would not hurt King Kong at all. The A2 type energy cannon just now could not cause much damage to King Kong, let alone the a1 type energy cannon.

Sure enough, a huge figure shot out from the fire, and fell on the ground and the earth roared. At this time, King Kong's body became charred black, and many hairs were already curled.

It became even more angry, and Yang Tian roared wildly before rushing towards the city wall again.

Seeing this, everyone on the top of the city's face was pale, and even the most powerful weapon in the city of refuge could not help but this King Kong, and the city of refuge was about to end.

Even if it was Liu Zhenya's mind at this time, he did not have such a thought. He suddenly felt a sense of sadness. The city of refuge was so powerful that it could not stop the terrible mutant beast attack. What about the Bianzhou base?

Is it true that if I really want to ruin here today, there is no way for human beings to survive?

At this time, not only him, but Di Ping, everyone in the city had a sense of despair. This mutant beast is no longer a human being.

The angry King Kong breathed heavily and breathed like a dragon. It suddenly picked up a huge bare tree trunk that was more than ten meters long and nearly two meters in diameter on the ground, and threw it towards the sanctuary.

Chapter 1048: Lost on the battlefield and in crisis

With a whistling wind and whistling, the giant tree leaped two to three hundred meters and smashed into the city wall with great momentum. If it was hit, even Di Ping would not feel good.

"Hurry up!"

Di Ping looked at the people who were still dazed, and hurriedly shouted.

The crowd at the top of the city woke up like a dream and hurriedly dodged. The huge tree trunk slammed on the wall with a "boom". The wall shook violently.

"One percent of the city wall defense loss! Eighty-seven percent of the city wall defense is left!"

A zero beep sounded in Di Ping's ears.

King Kong knocked down one percent of the city's defense with just one blow. After two or three hours, the ten thousand beasts attacked the city's defense but only knocked out more than ten points. I can imagine how strong King Kong's attack is.

boom!

After throwing out the trunk, King Kong jumped up again and rushed towards the city wall. Every time the huge footsteps fell to the ground, the earth shook, and the sound of roaring sounded endlessly, like the drum of death, which scorched people's hearts.

"So powerful!"

Di Ping's eyes shrank rapidly, and the power of this King Kong was beyond its imagination. Two rounds of energy cannons only blocked it for less than ten seconds. A strong explosion can crack mountains and rocks, but it is useless. King Kong is like steel. , A strong explosion, there was not much damage on its body, it is really impossible to imagine how its fur would have such a strong defense.

Dong dong dong

King Kong is getting closer and closer, as if every time he lands on people's hearts, the strong sense of oppression makes people suffocate.

"City... Lord, what should I do?"

Cheng Chao was also panicked at this time, his eyes were full of panic, his throat was a little dry, and he looked at Di Pingdao in panic.

"I'll go down and block it!"

Di Ping looked at the rushing King Kong, his eyes showed determination.

Now only he is on the board, and no one in the sanctuary is the opponent of this King Kong. After taking diluo fruit, his strength has increased again. He feels much stronger than when he saw King Kong last time, and he has a new weapon. Chaulangdao, facing King Kong, he is not at all confident.

"How can this work, this can't work! City Lord, this is too dangerous, or let's retreat first, and we will come back when it retreats?"

When Cheng Chao heard this, his face changed, and his expression was excited.

"Retreat? We have no way to retreat. If we can't hold on here, we will have no room for survival!"

Di Ping's eyes burst into flames, and he shook his head resolutely.

Cheng Chao doesn't know the role of the refuge city. This city is not a simple city. He is the root of Di Ping. It is impossible to retreat. He will not pass the castle until the final desperate situation. There are so many buildings in the system, no matter what. He couldn't give up on one. Once it was damaged, it would be difficult to rebuild it. That would cost a lot of money, and he couldn't afford to lose it, so he couldn't retreat anyway. He could only stop the King Kong outside the city.

Cheng Chao felt Di Ping's unwavering attitude, knowing that persuasion was useless, and he also knew that he was upset just now, and now there is nowhere to retreat. So many people in the city, what should I do! Is it possible to stop King Kong's attack by retreating to the castle?

Near!

King Kong rushed towards the sanctuary city like a mountain, 300 meters, 200 meters, 100 meters, the closer you get, the more you feel the horror of King Kong. The huge pressure is like a torrent and it is overwhelming. Many people have not dared to deal with it. King Kong's **** eyes met each other.

boom!

The main gun on the main tower of the city finally rang again, and a blue cone-shaped cannonball came from across the air. Everyone only felt a strong wind hitting the top of their heads, and the cannonball jumped over the city wall and shot towards the mutation.

Chapter 1049: Careless injury missed the opportunity

King Kong felt the threat of the blue cone-shaped energy body to it, but it still did not hide. Instead, it let out a roar of anger, blood rushed all over, and the hairs all over the body stood up like steel needles. Suddenly inflated in a circle, the body was raised more than one meter, the muscles of the whole body were like cast of fine iron, and the powerful force contained in it could be sensed at a glance. The cold and desolate metallic luster swimming on the body surface, as if indestructible.

The violent momentum made people feel heart palpitations, and they didn't dare to meet its blood-red eyes.

King Kong roared and punched again. This punch was stronger and stronger than the previous one. The air seemed to be torn apart, making a sharp violent sound, and a thin layer of air wave appeared in front of his fist.

Although this fist is facing the cone-shaped energy body, it makes everyone in the city feel that they are facing themselves. At this moment, the fist is huge in the eyes of everyone, like a mountain, carrying the might of the world, and pressing it unstoppably towards the city. At this moment, The body feels abnormally heavy, and it seems to be unable to move under pressure.

boom.....

With a loud noise again, the cone-shaped energy body exploded at the diamond fist, and a violent air wave shot in all directions. All the trees within more than ten meters were instantly crushed by this violent energy.

The huge body of King Kong just slid back five or six meters away by the powerful explosion, and stood still as if it were a mountain. Apart from the previous injuries, its huge fist had no scars. It seems that this shot Not touching it at all.

It slowly retracted its fist the size of a crushing plate, and its chest was violently ups and downs. The murderous intent in its eyes was so strong that it could not be removed. Its hideous face was extremely terrifying, like a monster.

There was a sigh of loss on the city head, this shot still failed to injure the mutant King Kong, it was not as effective as the previous one, and the hearts of everyone at the city head began to sink into the abyss.

King Kong rushed towards the city wall again. Its speed was a little worse than the mutant black panther, but it was not slower. For a distance of about 100 meters, at its speed of almost 30 meters per second, the mutant King Kong could only take three seconds. Rush to the head of the city.

It's time to do it yourself!

Di Ping took a step forward and stepped on the top of the city. By this time, he calmed down instead, with a strong will to fight in his eyes. This battle is related to the survival of the sanctuary city and his life and death. He can only win but not defeat in a battle.

"City Lord!"

As soon as he stepped on the top of the city, everyone at the top of the city saw it, and a ball of fire suddenly burst in his eyes, and they all exclaimed, the city master took action, but can the city master beat this terrible mutant gorilla?

Looking at the back of the city lord standing still like a mountain soldier, the sentiment in the city was agitated, but there was more worry.

Di Ping calmly looked at the mutant King Kong that was running, he also moved suddenly, his legs suddenly kicked hard, and his whole body leaped out of the city, nearly ten meters away, and then Go down to the city like a wild goose.

boom!

As soon as the person fell to the ground, like a huge boulder, there was a roar, and the ground was splashed by the gravel he smashed.

"kill!"

Di Ping roared when he touched his foot, his muscles agitated, blood gushing like a torrent of blood, and his feet kicked on the ground again. The whole person seemed to be ejected from a bow, and the gravel and soil under his feet were broken and broken by him. Shoot, you are not a car roaring and rushing out at high speed.

King Kong looked at Di Ping who was rushing over with a roar, and a tyrannical killing intent appeared in its eyes. It was also a roar, and he suddenly jumped high and rushed towards Di Ping.

Chapter 1050: Strength crushes helplessness

King Kong's huge body fell from the sky like Mount Tai. Its two palms the size of a millstone were pressed down directly. The palms were heavy and vigorous, and the dust was flying with strong aura, and Di Ping's hair flew backwards.

Feeling the terrifying power of this palm, the surrounding air became full of pressure, squeezing him tightly, even breathing a little bit.

Di Ping's expression was extremely calm, with ice rocks in his heart and cold light in his eyes. He didn't retreat, and his whole body suddenly gushed with energy and vigor. He broke free from the squeezing feeling with all his strength, and his speed surged again, rushing towards King Kong, holding his body. The saber on the side was already trembling softly, as if eager to drink blood.

boom!

King Kong's huge palms fell behind Di Ping and smashed on the ground. This palm was more than ten thousand kilograms. It was really like a mountain and the ground cracked. The earth wailed, trembled, splashed with rocks, and emptied with energy, arousing a strong energy. , Blasting away with billowing dust and smoke.

Di Ping felt the violent energy coming from behind, and only felt a cold sweat on his back. If he took a step slower, he would be smashed into meatloaf by King Kong.

However, the gravel and soil stirred up by the violent anger suddenly slammed into his back, and he felt a shock in his back, and it clanged on the armor.

With this momentum, he plunged his head under King Kong at a faster speed. Now is the moment for him to perform. The wave chaser in his hand is already unbearable, humming with joy, with unmatched Lidao cut towards King Kong's calf.

King Kong's eyes were covered by the smoke and dust on his face, but it was a mirror in its heart, knowing that it must have missed this blow.

It seemed to feel Di Ping's biting sword energy slashing towards its calf, and it suddenly lifted its leg, and its big foot like a boat suddenly lifted its head and stepped on Di Ping.

Di Ping thought that such a huge King Kong could be so flexible that he was evacuated by it with a knife that was about to be cut, and he stepped on himself like a small bug, his eyes filled with anger.

When the sky darkened, the huge soles of feet pressed down like a mountain. If they were stepped on, they had to be stomped into meatloaf. Dipinnaken let it step on and snaked, and the body flashed out of the vajra soles. Range.

Then he slammed his foot on the ground, his body suddenly jumped back and slashed straight to the heel of the mutant King Kong. Di Ping had no choice. Fighting King Kong was too embarrassing. King Kong was nearly seven meters tall, and now he was eight meters under the swelling. High, and Di Ping is only 1.78 meters, which is far from two meters!

Standing under King Kong is not much different from a dwarf. He can only reach King Kong's knees now with his arms outstretched. Therefore, he can only attack the bottom plate. How can he attack the top plate? He can't keep jumping like a monkey. ?

If you jump up in battle with King Kong, it's no different from hunting for death. He has nowhere to work in the air and it is difficult to dodge. He is not a mutant black panther with such a flexible body. Once in the air, King Kong can shoot cannonballs with one palm. His speed can be as fast as a cannonball, he has to be slapped to death with a palm, he is not stupid.

This time he turned around and used what can be described as a **** to use a sword. This is all the skills honed on the battlefield. He originally thought that it was a certain sword, but it did not make a contribution.

"boom"

King Kong landed with one foot, the earth cracked and the mountains shook. A violent vigor suddenly erupted and rushed towards Di Ping with a whistling. Di Ping, who had just turned around, was hit by Qi Jin and felt his body shake. , As if hitting a wall, the whole person flew upside down five or six meters away, and his chest hurt a little.

Di Ping was shocked in his heart, and he couldn't carelessly fight the second-order mutant beast. This time he turned around and made a sharp cut, but he didn't expect how strong King Kong's kick was, and he retreated.
