

## Doomsday 1051

Chapter 1051: A close battle is bitter

"Mutated Ironback Ape, Bloodline Level: A Level, Talent Skills: Iron Armor, Strengthening Level: Tier Two Level One, Skills: Iron Arm Hammering, Trample, Rage, with a trace of ancient Ironback Ape bloodline, strong defense and great strength Infinite and extremely dangerous!"

The moment King Kong appeared, Di Ping used his exploration skills. As he thought, King Kong was a second-order mutant, and it was not an ordinary mutant. It had the blood of the ancient ferocious beast Ironback Ape. It was not only powerful, but also defensive. Surprisingly, the system reminds itself of danger.

This kind of mutant beast is extremely powerful, and the previous mutant emperor scorpion has made him suffer enough.

Fortunately, this King Kong has only entered the second tier, and it is not unmatched. If it reaches the mutant Komodo behemoth of the second tier and the ninth rank, Di Ping will only have to run away, which is not at all invincible.

Now his talent has risen to S-level, his strength has been further enhanced, and he has won the second-tier strong sword. It is the time when he is advancing. Facing the King Kong is also boiling and fighting for the first battle, not to mention the last time he was scared by King Kong. Running away from him made him feel very depressed, and he decided to take revenge a long time ago.

Now it can be said that the old and new hatreds have gathered together, no matter from which aspect, today Di Ping will fight King Kong to death.

Half of Di Ping's body was numb, but fortunately, this qi was not enough to hurt him. As soon as the qi and blood rushed, the tingling sensation disappeared, and then did not dare to stay at all, and rushed out as soon as he was short.

Sure enough, as soon as the cloud burst out, there was a loud "bang" behind him. King Kong's huge palm was slapped on the ground behind him. If he was a step late, he would be slapped by King Kong's palm.

"what!"

There was a scream from the city. Everyone watched Di Ping's battle with King Kong eagerly. When Di Ping was almost shot, his face paled in shock, and he exclaimed and saw him hiding behind. Take another long breath.

The people in Chengtou were no more relaxed than Di Ping. They saw sweat on their foreheads, their hands were tightly clenched, and the palms of their hands were full of sweat. They pressed their mouths tightly, not daring to make a sound, for fear that it would affect Di. level.

Di Pianyan looked cold, without a trace of fluctuation in his eyes, like a cold stone. Hearing the roar from behind him, his forward body suddenly stopped, his feet stepped on the ground, and his body reflected back.

His unreasonable sudden shift caused King Kong to slap another giant palm in the direction he was heading to the ground again, and Di Ping had already come under King Kong again at this time.

Although the Vajra body is also very flexible, its huge body still limits its speed.

Di Ping understands this very well. He can only hope for victory by taking advantage of King Kong's huge physical weakness and exerting his speed and flexibility. Therefore, he has been rushing left and right under King Kong's feet to create opportunities for attack.

"Om!"

The sword buzzed, the sharp blade slashed through the air, and the sound of dragon ling was born, and the speed was fast to the extreme, and it slashed at King Kong's calf.

"when"

With a crisp sound of gold and stone, Di Ping's battle sword was bounced up and down. The pitch-black flesh cast like steel, comparable to steel, was cut with a single cut, leaving only a half-foot-long shallow knife mark, which was no more than an inch deep. Xu, for King Kong's huge legs as thick as a stone pillar, this is not a wound at all.

Astonishment flashed in Di Ping's eyes, King Kong's defense was terrible?

Chapter 1052: Falling from the sky to the void

Di Ping lowered his head and glanced at the Wave Chaser, and his eyes filled with disappointment. This is the second-tier powerful sword. How could it not even be able to break the defense of King Kong?

Originally, his excitement of getting this second-order weapon was poured over his body by this basin of cold water, and even the second-order weapon could not hurt King Kong. What else did he use to fight King Kong, he felt a little frustrated in his heart.

"Town Lord, be careful!"

Suddenly, a shout came from the top of the city, awakening Di Ping, and he suddenly remembered that he was in a fighting state.

In the battle time, the carelessness and carelessness, the slightest negligence may be the loss of life. He has a trace of distraction, but King Kong does not. Although Di Ping's knife did not cause much damage to it, it was bleeding after all. It was extremely angry, clenched both hands and raised it above its head, then slammed it down towards Di Ping.

This blow King Kong used his full strength, and his fists hung in the wind, like a meteorite falling from the sky, the strength was vertical and horizontal, and even the air vibrated under the strength of the fist.

As soon as Di Ping regained his consciousness, he saw the top of his head fall like mountains, with an unstoppable punch, his face changed. If this blow was hit, with the violent power of King Kong, it would be difficult for him to not die.

Before the fist arrived, the fierce wind had already been suppressed, and the wind was hunting. His hair and clothes were flying in the strong wind, and the surrounding air became thick and weak at this moment, and was squeezing him from all around. Compressed, as if in the deep sea, his chest was uncomfortable, and his breathing was not smooth.

At this moment, in Di Ping's eyes, this was a punch. This was the whole world attacking him. The punch was overbearing and unstoppable. He had no confidence in blocking this punch.

But it was too late for him to escape at his normal speed. This punch had already sealed all his paths, and his punch was tightly squeezing him, forcing him to resist.

Looking at the iron fist already near the top of his head, Di Ping's heart was calm with the surface of Jinghu Lake, and his mind quickly turned. He gave up the idea of hard resistance in an instant, and all that was left was to run away.

But how to run, he felt as if his body was weighed down by a tens of thousands of catties, which affected his speed, and it was too late to run.

"Crash!"

Di Ping decided to use the collision skill in an instant. This skill is extremely useful in battle. It can burst out all the strength and vitality of the body in an instant, pushing the speed to the extreme. Only this skill can get rid of the coercion of the powerful fist. .

Di Ping's face flushed, with a violent drink, his muscles agitated, blood gushing like a tide, his feet slammed on the ground, the earth collapsed, his people disappeared in the same place in an instant, and moved forward more than ten meters away. .

"boom!"

There was a loud noise, the sky shook, and the earth roared, as if the earth broke and the sky collapsed, and everyone who shook their feet.

Di Ping felt a gust of wind swept across his back, and his back was hurt when it was split. King Kong's fingers were no more than a minute away from Di Ping's back. It was really rubbing his back and hitting it, but the strong wind already had this. Terrible power, fortunately, it has armor, otherwise the back will definitely be cut by strength.

He dared to stop and rushed forward again as soon as he landed, and drove the snake to the limit. This time, at the critical moment, he escaped the attack of King Kong, but he was not really safe. He had to avoid King Kong. The attack distance of the blow should first be changed from passive to active, otherwise it would be too awkward to be beaten under the pressure of King Kong. If you are not careful, you may lose your life.

It's just that Di Ping rushed too fast and didn't look back, but didn't know that the danger had arrived.

Chapter 1053: Trample and shock

As soon as Di Ping rushed out more than ten meters, he heard constant roars behind him, and the earth was trembling, as if the ground was cracked and the mountains collapsed. He thought it was the movement caused by King Kong's blow, but he couldn't feel it right away. A strong wind hits, and the back of the strong oppressive thorn hurts.

With just a sneak glance, Di Ping stared at the boss, as if he had seen a ghost, his face turned pale, and then he ran desperately.

I saw behind, where King Kong's fists hit, a strong shock wave rushed towards him, the ground cracked wherever it passed, and countless pieces of gravel and mud flew away, like a terrifying behemoth was charging, carrying nothing. Comparable momentum.

"boom"

Di Ping only felt like he was hit by a fast-moving train from behind. A powerful impact hit him. The impact was amazing. He could no longer hold back his figure, and he flew out.

"Crack! Poof!"

With a click, the armor on his back shattered, and later generations spouted blood in the air.

"Ah! The lord is injured!"

Everyone in the city suddenly exclaimed when they saw Di Ping's whole body being shot into flight.

"How is it possible? Can the city lord be unable to defeat this monster?"

There was fear on the faces of the city guard soldiers who watched the battle. The strength of the city lord is beyond doubt. How could he fail to defeat this monster?

And the beaten are losing out, what can we do now?

Di Ping only felt that his back was hit by a hammer, his chest was stuffy, and his five internal organs seemed to have moved out of place. He felt that if it hadn't been for the armor to block it,

plus the previous Tiger Spirit Art's breakthrough defense power rose again, He may have been seriously injured just now, but even so, he also felt a little bit of breathing.

He has counted a thousand fortunes. He didn't count that King Kong had another blow. He had already suffered a loss in the river before, but he had been tricked just now. He thought he had avoided King Kong's attack range and didn't want to miscalculate.

Come to think of it, this should be King Kong's "Iron Arm Hammering" skill. This move can produce such a powerful seismic wave, and a miss is actually injured.

As soon as Di Ping landed, he quickly wiped off the blood from the corners of his mouth and exhaled slowly to calm the pain in his back. However, with the force of the impact, he rushed out more than ten meters again. This time he could always leave King Kong. attack range.

"I wipe it!"

Only the next moment, Di Ping's face changed and gritted his teeth and cursed.

King Kong was already in extreme fury at this time. It missed a hit and rushed forward again. At this time, its huge body was extremely flexible. It caught up with Di Ping as soon as it crossed, and stepped on Di Ping with a big sole. After it came down, Di Ping may be similar to the little bug in his eyes, but it was angry that it had not been able to kill the little bug until now.

Di Pingna dared to stay, he launched a collision again, and his body slid out more than 20 meters forward, avoiding King Kong's slap, and a roar from behind came in his ears. He completely ignored him, and again changed direction and ran out. .

King Kong roared angrily, jumped up suddenly, and chased Di Ping. Although Di Ping was fast, King Kong's speed was not slow. When he fled there, King Kong chased after him, either with his fists or his hands. Or step on it with your foot.

But Di Ping can dodge it every time with his strong mental power, but the situation is extremely dangerous. He is almost dancing on the tip of a knife. Every dodge is extremely thrilling, and King Kong seems to be unaware of fatigue, tightly bound Staying in Di Ping did not relax at all.

Chapter 1054: War is boiling and angry

Boom boom boom...

I saw a large and a small figure fleeing and chasing, running around, and King Kong was like a crazy saboteur, a pair of huge arms smashed at Di Ping from time to time, and every blow was a huge roar. The ground shook, smoke splashed, and the entire battlefield was covered with smoke and dust everywhere.

At this time, Di Ping's mental power was highly concentrated, and he ran the snake with all his strength. He did not dare to relax for a moment. The King Kong was pressing harder and he did not give him a chance to relax. He wanted to break into King Kong, attack him closely, and use King Kong's body. Huge shortcomings of inflexibility, but King Kong seemed to have known his thoughts and did not give him a chance to get close.

Every time he took the opportunity to approach, he was slapped back by King Kong's huge palm. Its big hands were like two doors, preventing him from entering.

Di Ping was forced to do nothing, so he had to take the risk and attack King Kong's palms, but what made him desperate was that although the sword was good, but it could not cut King Kong's cast iron body, let's flee in desperation! He couldn't help that King Kong could continue to be so violent.

Di Ping did not dare to approach the city wall, so he had to sprint through the jungle. The forest outside the city suffered a lot. The big trees were smashed by King Kong. Sometimes they pulled out a huge tree and used it as a weapon. Attacking Di Ping, countless trees collapsed in this sweep, it was like a terrifying shredder, where it passed was a mess, and pieces of trees were moved to the ground.

And Di Ping is not a fluke again and again. He has been swept by trees several times. Fortunately, he has an armor and didn't suffer much damage. It's just that the armor has been broken into pieces. I can't see the iron sheet anymore, he has turned into a beggar pretend, and now he is very miserable when he goes to the streets to beg for food without makeup.

This made Di Ping very aggrieved. Facing the King Kong with his powerful strength, he couldn't show it. If it weren't for avoiding King Kong's sight from time to time through the dense woods, he might have been shot to death. He already felt it. exhausted.

But this King Kong looked like a perpetual motion machine. He didn't know he was tired. He had been chasing him for five or six minutes. Even the mighty Di Ping felt tired, not only physically, but also spiritually.

The people watching the battle on the front of the city were pale and nervous, their eyes closely following the big and small figures on the battlefield, and their eyes were full of worry.

Liu Zhenya can no longer use shock to describe his mood at this time. The power of King Kong is beyond his imagination. How can such an animal exist on earth, it is as cruel and terrible as the beast in the myth. The tree couldn't stop its punch, and it collapsed into thousands of pieces like a bubble under one blow, which was shocking.

He finally knew why many military bases were destroyed. Even the Bianzhou base would not be able to stop it when encountering such a beast. Unless a large-yield weapon was used, it would also destroy the base. arms.

And what shocked him even more was that Di Ping, a young man, was able to fight such a terrifying behemoth until now. Although he was very embarrassed, he was still alive. Can human beings really be so powerful?

He didn't believe his eyes, he really doubted whether he was on earth now!

Compared to Liu Zhenya's shock, everyone in the Sanctuary City was more worried. The mutant beasts retreated, and there was no war in the city. A group of high-level and awakened people gathered in Nancheng, paying attention to the battle between Di Ping and King Kong.

Yue Lie and the others wanted to rush down to help Di Ping fight many times, but they were all blocked by Owen. Owen knew that besides himself and Ava, he could fight a battle, and the rest of the people would definitely die.

Irving is not one of these people. He was a professional mercenary in the previous world. He knows the rules of battle most. At this time, they will not help but affect Di Ping's performance.

Chapter 1055: Seven layers of sword strength to the limit

Although Di Ping was dodging, his mind was running fast. He didn't always dodge meaninglessly. He had already observed King Kong's state with exploration.

It turned out that King Kong was in a violent state, and the skill Iron Armor was also being activated. At this time, King Kong was at its strongest combat power, and he hardly knew how to write the death word, so he had been trying his best to dodge.

He wants to consume King Kong's violent state and iron armor skills. He doesn't believe that King Kong can stay raging without retreating.

In order to resist the bombardment of the energy cannon, King Kong had to go into a violent state, and even the iron armor skills were activated together. Otherwise, although the energy cannon could not kill it, it could also be scarred. At that time, how is it in the residual blood state? Di Ping's opponent.

This King Kong is very cunning and shrewd, but it is a beast after all!

Di Ping had been provoking it all the time. He focused his attention on himself. He didn't even let the energy cannon be reinvigorated. He was afraid that it would attract King Kong's attention again. It would be troublesome if it turned its head to attack the wall.

With the strength of King Kong, once entering the city, no one can stop it, and in a short time, the energy cannon can not cause damage to it. It really makes him smash it like this, and his sanctuary city is possible. Sweepest.

He didn't dare. The city of asylum was now the basis for his survival. If it were destroyed, he would have to repent and die, so in any case, he had to attract King Kong outside the city.

King Kong was teased by Di Ping's taunting skills continuously. It was panting hard, with red eyes, waving a huge tree trunk in his hand, chasing Di Ping crazy.

The tall and lush trees outside the city were partly destroyed by the main gun, but now they were smashed by King Kong. They are all turned into broken branches and leaves, as if a super tornado passes by. Few trees are intact. Of course, Di Ping also contributed a bit to this.

In several times of crisis, he had to use the mad wave knife technique. Although his war sword could not help the King Kong, it was devastating to these trees, and there was nothing left in the blade passing by. The big trees were forced to wave by the knife. Wrung to pieces, even the hands of King Kong were swept by his blade, cutting out a series of wounds, criss-crossed, blood flowing, this is even more angry King Kong is angry, and roars and kills Di Ping. .

One person and one beast are like the ultimate \*\*\*\* of destruction. Wherever they go, the trees are broken and the earth is shattered. It is really flying sand and rocks, and the sky is full of wild sand. Even the ground is scraped off a layer, let alone trees.

The crowd was stunned. If it weren't for fear and worry about the safety of the city lord, they might really have to sigh in shock. The monster blockbuster shown in the movie has the immersive hearty and shock of this live broadcast. Every voice of King Kong The roar is shaking the earth, the terrifying power that people can really feel with every blow, and the light of the sword that is waving in the sky is as dazzling as a fantasy blockbuster, and the blooming light of the sword is intoxicating, caused by The terrifying power of trees being shattered is even more exciting.

Di Ping used the violent wave knife technique again to chop the huge tree in King Kong's hand into pieces. The thick and long trunk in King Kong's hand posed too much threat to him. He had to erupt faster to escape. The giant tree was swung by King Kong. When he got up more than tens of thousands of kilograms, the sound of the whirring wind knew its power, and with one blow, he would vomit blood even if he spit out blood.

Before, he wanted to fight hard, but he was swept away by a stick for several tens of meters, and his bones almost fell apart. If he hadn't used his back for a hard connection at a critical moment, then he might have been unable to get up now.

After that, he didn't dare to be big, he kept trying his best to avoid, and if he couldn't avoid, he would use a war knife to chop the huge wood.

Chapter 1056: Smashed a giant palm

Di Ping smashed the huge wood with one knife, and was about to pull away and throw it away. At this moment, King Kong suddenly threw the remaining five-meter-long tree trunk forward Di Ping.

"Woo!"

The trunk rolled with an astonishing whistling sound and smashed towards Di Ping.

With such a strong force, Di Ping dared to take it hard. He could hide and hide, if he could not exert any effort, he could not exert any effort, otherwise the King Kong rage was not exhausted, but he was out of strength, then he would have fun.

He stepped on a snake and slid more than three meters to the side of the stop. The huge tree trunk slid past his side and fell to the ground. A big pit was smashed on the ground with a bang. Numerous soils collapsed and flew everywhere. Its power was as powerful as a grenade explosion. .

The corner of Di Ping's mouth twitched, revealing a trace of sarcasm. He has been hiding three times. Every time King Kong throws the broken wood in his hand and smashes himself. This trick is no longer useful to him. He keeps walking and turning to the west again. Wash away where there are many trees.

It's just that he felt wrong as soon as he rushed out a few steps, because there was no sound of King Kong's hammering behind him. Generally, every time after he turned, King Kong slapped it with a palm, as if it had become a promise. Normally, but this time he has rushed more than ten meters, and no sound was heard.

"Master, hide!"

At this time, there was a roar from a distance from the city. Although it was a few hundred meters away, the voice was still very loud. He heard that it was Owen's voice, and his voice was full of anxiety.

Hearing the sound, Di Ping knew it was broken. Under normal circumstances, Irving would not make any announcements. He must only make a sound when there is danger, otherwise his voice would not be so frightened.

He didn't have time to think about it, and he didn't have to rush to see what happened. His adrenal glands burst in an instant, his blood pulsed like thunder, and his muscles tightened suddenly. He stopped the momentum abruptly and wanted to turn and run.

At this time, his mind is extremely clear. He doesn't need to think about it and know that the danger must come from King Kong, and this danger must also be King Kong intercepting him, then he can no longer run forward, of course he dare not back, so he has to turn to the left Rush.

Just as he moved, he felt that his eyes were dark, as if the sun was covered!

Seeing the sky dark, Di Ping's head was about to explode on the spot, and his scalp was numb. He knew the danger. King Kong actually judged his moving direction and jumped directly. Fortunately, Owen yelled, otherwise he would still Running in the original direction, it happened to hit King Kong.

Although Owen's roar was a bit late, it finally gave him time to react. The collision skill was activated instantly, and his body was directly translated more than ten meters away. Originally, he was snaking and walking to the left. In emergency, he had to use collision. skill.

In a rush, he couldn't start with all his strength. The collision skill was simply the use of his whole body strength. He used the instant burst of power to push his identity out, and dashed out a certain distance. With Di Ping's full burst, he could rush 30 meters. Just when he suddenly started turning to the left, his body strength did not get the maximum burst, and he rushed more than ten meters away.

However, even if it was ten meters, he also avoided the coverage area of King Kong falling from the sky.

"boom"

King Kong slammed to the ground, his huge body hit the ground like a comet hitting the earth, the big earthquake trembled like a volcanic eruption, thousands of crushed rocks and silt flew in all directions, and a strong impulsive wave swept around, within a radius of 50 meters. The violent energy surged wantonly, as if to shatter everything.

Chapter 1057: Human mold is always right and wrong

Di Ping hadn't waited for Xingxi to escape King Kong's calculations again. In the next second, his face changed wildly. After King Kong landed, it was different from the past. In the past, it was just a "boom" and then stepped on two deep big footprints. This time, it was like a meteorite falling to the ground, and the earth roared with shocking momentum.

Seeing the engulfing energy, he just wanted to hide, but immediately he was shocked like a cat. The hair all over his body suddenly opened up. A strong feeling of extreme danger made his heart palpitations, his face turned pale, and he didn't even think about it. Immediately rushed out frantically.

It was just late, and a strong energy wave hit, this wave was very strange and weird, silent, and the strong wind that was rolling in hasn't arrived, but this wave has arrived.

Di Ping only felt his body sink. The blood in his whole body seemed to freeze instantly, and his mind was even more buzzing, as if someone was hitting him hard in the back of the head. The whole person was dumbfounded, and his brain stopped moving at this moment. In the same place, there is no movement, and no sound, as if time has stopped

"trample!"

When the last trace of consciousness stagnated, Di Ping's heart sounded these two words eloquently, and then he plunged into darkness.

He lost consciousness for an instant, but King Kong didn't. As soon as it landed, it suddenly took a step toward Di Ping, and the huge palm patted Di Ping.

"City Lord!"

"City Lord!"

Everyone in the city saw Di Ping suddenly stopped in place, and King Kong's giant hand had already been grabbed. The soul frightened away at that time, and they screamed.

Especially Gina, his feelings for Di Ping are the most complicated. Seeing that Di Ping was about to be smashed into meatloaf, she collapsed at that time, and she was about to jump down the city with a heart-piercing scream, and wanted to save Di Ping. , Was just caught by Yun Mengsi's eager eyes.

They were too far away from Di Ping, which was more than 300 meters away from their magical attacks. It was too late to rush past, and everyone looked at the imminent disaster with horror.

All the people in the city who saw this scene were stupid. They couldn't imagine what would happen to them if the city lord died. They didn't dare to think about it.

It's too late to say, then soon!

They screamed in horror, and King Kong's palm was already close to Di Ping's head.

Di Ping felt like a traveler in the darkness, walking and walking aimlessly. He couldn't see the light, couldn't find the direction, and the whole person was lost in the darkness, like a lonely ghost.

This feeling is what Di Ping hates most. He doesn't like the feeling of not being in control. He wants to break the darkness, find the light, and find the way out.

The intense desire caused a fierce struggle in his spiritual consciousness. Suddenly, the darkness was like a black glass that suddenly shattered. Huawei was nothing, and he appeared in the bright world again.

Di Ping's powerful mental power makes him break free from this maddening state every time. Although the time is only a short moment, it may not even be a second, but in such a battle, a second has been decided. life and death.

He opened his eyes and immediately realized that it was broken. The huge palm of King Kong on his head had already covered the sky and the sun was under strong pressure, and the strong wind stirred his hair to fly, and his breath pierced his heart like a needle. Pain, the majestic coercion as solid as the substance and weight as the weight of everything, unexpectedly gave Di Ping an irresistible sense of fear.

Chapter 1058: Get worse

At this time, he had no time to dodge, and the fearful aura pressed him tightly, seeming to block all his retreats, and it seemed that no matter how he dodges, he would suffer a thunderous blow.

Through the smoke and dust, he saw the madness and strong killing intent surging in the blood-red eyes of King Kong, which made him burst.

Di Ping's eyes suddenly burst into a cloud of brilliant light, this monster really wants to kill itself, okay!

He couldn't avoid it. There was only hard resistance. At this critical moment, there was no fear in his heart but a blazing flame was ignited, and his fighting spirit rose to the sky.

Want me to die?

It is so easy, even if I die, I have to let you be buried!

Di Ping's heart was full of anger, his eyes erupted, and the sky screamed "kill." His muscles were soaring, his veins burst like a rooted angry dragon, strong and ferocious, and the vigorous blood suddenly erupted like a volcano, unstoppable. , There was a slight roar, and the bones clicked and cracked, as if they were about to break. With the sound of clicking, his whole body grew up in a circle, reaching nearly two meters high. A normal person suddenly turned into a sturdy man with a sturdy back and a waist, with thick arms that can be used to fight, and the effect of forging the body to easily strengthen the bones and bones is shown. As if transforming into a giant, the whole person

burst out with a violent force. The vigorous momentum is like an ancient war beast full of disobedience and resistance, vowing to fight against the sky and the earth.

Hum!

Zhulangdao emits an unprecedented strong buzzing, seeming to be infected by Di Ping's evil aura, and it emits a pleasant tremor. It is eager to fight and eager for blood. The blade exudes fierce sword aura. The gas is split.

"boom!"

Suddenly there was a roar of flames on the wave-breaking knife, and the entire knife body seemed to be burning. It turned red in an instant, and the raging flame emitted a hot temperature. It would ignite the surrounding air, and the air was distorted. Tremor.

Di Ping stomped on the ground like a big mountain, holding the trembling wave-chaser in both hands, a pair of scarlet eyes tightly looking at the giant palm falling above his head, he roared wildly, and the sword slashed from the bottom up. And up.

Thousands of fires rose from the ground, like a volcanic eruption. The fiery blades filled Di Ping's surroundings, like fireworks in full bloom, like iron flowers bursting, like a dream, although it is a flame spewing, but it is against common sense. The cold air was pressing, and the sharp knife light actually gave people endless cold under the bright sun, and the coldness was about to freeze the soul. Everyone looking at the knife light shuddered.

As soon as he shot, Di Ping used his full strength, violently waved the sword technique, the wind surged, and he cut out a hundred knives in an instant, and the sword was full of strength.

The flame blade light seemed to burn all the air. Di Ping was surrounded by flames, forming a fireball. The fireball was like a slowly rising sun, greeted by the giant hand that covered the sky, although it was slow and fast. It seems that the pressure of the whole world can't stop it from rising, firm, fierce, brave, and never flinching.

Although it is far away, at this time the dazzling red light actually shines on everyone's face in the city, and it shines on everyone's face like a red cloud, and this light shines on everyone with warmth. In his eyes, everything turned into a little spark, burning hard.

boom!

The pressing giant palm finally collided with the rising red sun, and suddenly the flame burst like a volcanic eruption. How can the hot and fiery magma be suppressed? It is so awkward and so public, Ning For the jade to be broken and not for the complete, the most brilliant life burst out in an instant.

Chapter 1059: Everyone rushed to Zhan King Kong

The red sun rose up into the sky with sorrow and determination, and hit the giant palm of King Kong like a mountain, but no matter how it fought, even the Heavenly Sage, who stood up to the sky and could fight the sky, was also in Tathagata. Suppressed instantly under the giant palm.

The red sun composed of thousands of swords and awns lasted only a moment before it collapsed into fragments under the giant palm. Thousands of fire snakes shot out, flying around, blooming like fireworks, dazzling and dazzling.

Dangdang...

The sound of gold and stone resounded throughout the battlefield like dragons and tigers.

Di Ping's full-strength slash of hundreds of swordsmen made the sound of gold and stone on the giant palm of King Kong, and the fire exploded. What was left was patches of cold light swordsmanship, which collapsed under the giant palm and turned into little cold stars.

Di Ping's face turned pale, and he launched the violent wave sword technique with all his strength. The wind surging only caused the giant palm to bounce less than one meter, and then it collapsed. King Kong roared and crushed the giant palm again.

King Kong is too strong. One such strong knife made only a hundred shallow marks on its giant palm. The depth is no more than an inch. Although the upper part is charred, but with the thickness of King Kong's palm, this is not even an injury. Flame enhancement also failed to break through the physical defense of King Kong.

Looking at the giant palm pressed down like Mount Tai, Di Ping's eyes flashed absolutely. At this time, he could only fight one way. If he didn't fight, he would die. At this moment, he seemed to have completely let go, and his state of mind was not knowing. Juezhong improved again, but at this time he didn't have the mind to think about it.

"Fold it for me!"

Di Ping let out a wild roar, and waved the wave-breaking knife again. He had no other way now, and now he could only use his strongest attack and superimposed knife strength.

It has been successfully folded into Knife Jin, this second use, the knife Jin instantly pushed to the fifth layer, but this is not enough, not enough to damage King Kong.

His middle and fierce glow flashed, his arms pulsed, his blood rushed like a cow, and he yelled "Six layers of sword strength for me!", and he superimposed the sword strength to the sixth layer. Trembling, it seemed that he could not hold up the strong sword strength, letting the sword energy leak out, and the sharp sword energy burst out and screamed.

"not enough!"

Di Ping hissed and roared again, his eyes were red, as if he was about to spurt blood, his skin was flushed with red tide, and his veins bulged like an angry dragon.

"Fold me seven layers of sword strength!"

No one can see how many knives Di Ping has taken out, and Zhulang Dao even disappears from his arm, and there is only a blade of light in the entire space.

Di Ping's body trembled slightly. He originally thought that he could stack five layers of sword strength in the second position, but it didn't take much effort to add seven layers of sword strength in the third position. He only knew that he was thinking more.

The seven-layer sword strength is so terrifying, although it is only one layer more than the sixth layer, he is already a bit unable to control the sword. How terrifying it is to cut hundreds of swords instantly, the accumulated sword strength is actually destroyed. The sword seemed to become a dragon, trying to break free from his palm.

He felt a tearing pain in his body muscles, and his blood was boiling as if he was about to rush into his body in the next moment. He knew that this had reached its limit, and the seven-layer sword strength was already his limit.

He felt the power of the seven layers of sword strength. He didn't know whether the sword could block the palm of King Kong. He wanted to condense the eight layers of sword strength, but at this time, the skin all over his body was cracked, and the bones made a clicking sound, as if it were Can't bear the powerful sword strength at this time.

Chapter 1060: Rescue the city owner to do the task

"My God! What kind of knife is this, so terrifying!"

Zhang Hengcheng felt the skyrocketing sword momentum on the battlefield, and a flame of horror burst into his eyes, both horrified and envious.

As a martial artist, isn't it because of the dazzling world of martial arts in movies or novels. I hope that one day I will also be able to break through the mountains and the mysterious realm of mountains and rivers. The realistic fantasies were shattered, but I never wanted to see it again today.

Isn't the scene of the city lord's swordsman emptying and the sword spirit being exactly what he dreamed of before?

At this time in the city, some people were shocked, some were afraid, and some were worried. When most people felt Di Ping's horrible soaring power, they would definitely be pleased with the strength of the city lord; outsiders watch the excitement and experts watch the doorway, but Owen is His face was calm, his hands clasped the handle of the sword tightly, and there was a creak, and there was a deep worry in his eyes.

He felt that Di Ping's sword was very powerful, but King Kong was even stronger. This sword might not have any effect. He wished to rush up to take the blow for the master, but he knew that he would not be able to help at all. King Kong is too much different from the previous one.

Dippin knew this point better than Owen. Although he looked embarrassed now, his mind was extremely calm, and everything on the battlefield was under his judgment.

It was too late at this time, the giant palm had been photographed, Di Ping just wanted to take the risk of condensing the eighth sword strength, there is no time, he can only rely on luck to fight, he knows that this attack can not stop King Kong, he must die hurt.

"cut!"

Seven layers of sword strength suddenly broke out, and it was cut out with one blow, and the shadow of thousands of swords suddenly turned into one sword.

What kind of a knife is this, the three-foot blue front of the wave-breaking knife unexpectedly condensed into a giant blade that is more than two meters long and half a foot wide, and it soars into the sky. It is sharp, heavy, and indefinite. Facing the giant palm falling on the top of the head, the sword light shot up to the sky, as if the space was cut under the blade.

"boom!"

Dao Mang slammed into the giant palm, and there was a muffled thunder sound. The thunder sound was like a thunder in a spring, everything revived, and everyone was awakened by the sound.

People only saw a dazzling cold light flashing, a blade of light soaring into the sky, and the edge filled the entire world, like a moonlight flashing and shattering, and the blade of the wave in the blade shadow reappeared, and then a \*\*\*\* light shot. Come out, dye the moonlight into blood.

"Wow!"

At this moment, a stern roar came from King Kong's mouth, as if it had been burned by a fire, suddenly raised its giant hand, and everyone saw that a huge wound appeared on King Kong's huge palm. , The ferocious thing was like a canyon, cracked open, flesh and blood turned out, reaching a depth of five or six inches, blood from the wound was sprayed out like money, and King Kong let out a stern roar.

At this time, all the people of the city owner knew that the city owner had injured King Kong with this knife. King Kong held his palm, roared, and frantically destroyed everything around him, seeming to relieve its pain and anger.

The crowd was still not in a hurry and excited, they saw Di Ping also collapsed.

But Di Ping looked terribly miserable at this time. He was lying on his back in a pit that was half a meter deep and two meters square. His clothes were torn to pieces, and his orifices were bleeding. The person was like a soft snake, and the blood flowed out quickly. Stain one piece red.

"City Lord!"

Seeing this scene, everyone's expressions changed drastically and exclaimed in panic.

"the host....."

Owen and the others were suddenly frightened. If the owner died, they could only apologize with death, and now they are not only followers, but they have formed a strong relationship with this owner. How can they let the owner die , Even if you trade your own life, you can't let the master die.
