

## Doomsday 1071

Chapter 1071: Fly into the air

After Di Ping was overjoyed, thinking of his physical injury, his heart sank, and his heart palpitated when he saw King Kong's hateful eyes. He felt that things were a bit tricky.

King Kong was designed by himself to attack his left leg with all his strength. Although it seemed that the injury was not light, and the violent and iron armor skills had disappeared, Di Ping knew clearly that King Kong still had the power to fight. If it rushed forward desperately, he But there was no more power to fight. Although he was being healed by three people, his injuries did not heal even half.

It seems that he can only use upgrades. After the battle just now, all the scattered energy has melted into his body, and his power control is almost perfect. He originally wanted to wait for the injury to heal before upgrading, but now it seems that he can't wait.

"Wow!"

Suddenly King Kong gave a long, sorrowful roar towards Di Ping and the Sanctuary City. Di Ping's expression changed and thought he was going to attack the Sanctuary City. Then he showed an unbelievable expression. King Kong turned around and jumped towards the jungle. go with.

"No, it wants to escape!"

Di Ping looked at King Kong who turned and leaped away, and then reacted, and cried out.

"No, you can't let him escape!"

Di Ping's eyes were condensed. In any case, he could not let King Kong escape. With King Kong's hatred of himself and the city of refuge, he would not destroy it today. Once it slowed down, it attacked again, how to resist it then.

Moreover, with such a huge threat, the base cannot function normally. With King Kong's wisdom, if it focuses on the Sanctuary City, it will be a disaster. Sometimes it is not afraid of the enemy's madness, but it is afraid that the enemy is calm. King Kong is so angry. Under the circumstances, as soon as the violent and iron armor disappeared, he chose to escape, which had to make Di Ping

afraid, so that the clever terrifying mutant would not kill it, that would be the nightmare of the entire sanctuary city.

Thinking of this, Di Ping's eyes were cold, and he shouted in a deep voice: "Zero, the energy cannon fired with all its strength, leave it to me!"

"boom!"

As soon as Di Ping's voice fell, the main artillery on the main tower of the city that had been ready to fire at any time slammed. This sound was extremely sudden and shocked the entire shelter city.

"How to shoot! Isn't this monster going to run?"

The crowd watching the battle on the city's head looked at the sudden roar of the main gun with doubts.

A blue energy ball drew a blue ribbon in the sky and instantly hit King Kong.

King Kong, who had just turned around and ran for a few steps, suddenly shook, and his whole body's hair suddenly opened, as if it had blown up the cat, and it felt a strong threat.

King Kong didn't look back at all, but rushed to the front with a sudden move, being alert to danger and allowing it to react the fastest.

"boom!"

The energy shells hit the place where King Kong was standing, and there was a loud noise, like a mountain collapse and the ground was cracked. The void was distorted under a powerful explosion. Although King Kong was fast, it could not escape the explosion range. The powerful shock wave generated instantly caused it. The huge body was lifted up, hitting more than ten meters away like a cannonball.

"Upgrade for me!"

Di Ping didn't dare to think about it anymore. After ordering to fire, he directly ordered the upgrade.

In an instant, a powerful energy seemed to rush from the void instantly. This energy came fiercely and rushed to him everywhere. This energy was different from the healing techniques of Mok and others. This energy was more powerful and domineering. The injury was getting better quickly, and all the cells seemed to have been in the ground for a long time, and they made a sucking sound.

The bones are creaking, as if they are growing, and they make a happy call. The blood is agitated like thunder, roaring, like spring thunder rolling, and like a river, rushing and turbulent!

"Hurry up!"

The injury on his body is recovering quickly, the skin cracks disappear, the five internal organs are repairing, and the bones are growing and repairing. Almost every blink of an eye, the injury is 10% better, and the injury can be cured after a few minutes, but Di Ping Still feeling slow, urging anxiously.

Chapter 1072: Shift the target and stare at the wall

The upgrade energy from the void repaired Di Ping's body that was on the verge of collapse in just a few breaths, and these energy began to strengthen his body.

The energy suddenly changed from warm and moist to fiery, and then became scorching hot, getting hotter and hotter, like a raging flame, burning everything in the body, from the flesh to the bones, strengthened in the fire, the muscle density is higher, and the bones It is also harder. If you can break Di Ping's bones at this time, you will find that the bones are as dense as jade, glowing with bright and bright light.

"Quickly!"

Di Ping clenched his teeth at this time, staring tightly at King Kong who had risen from the ground again, urging him anxiously, not even caring about the pain in his body.

Although King Kong was very embarrassed and had a lot of wounds on his body, all his movements did not suffer much. If it weren't for the left leg and the movement was affected, it might have burst out of the explosion range of the energy cannon.

Although this main gun is very strong, even if the King Kong did not launch the rage and iron armor, it can only be wounded, but cannot be killed. Moreover, this King Kong has the blood of the

ancient beast ironback ape because of its strength and defense. Prominent, this makes the destructive power of the Sanctuary City's Fangcheng Cannon weakened a lot.

Seeing that King Kong had been blasted and rolled a few times, but there was no serious injury, he got up and fled into the jungle again. Once let it escape into the jungle, it would be difficult to catch it.

"Boom boom boom boom!"

When Di Ping was anxious, there were four more roars, the four energy cannons on the castle also rang, and four blue lightnings instantly caught up with King Kong.

Although King Kong ran wildly, it was extremely sensitive to danger, and suddenly dodged to the right, but this time it miscalculated and received Di Ping's instructions not to kill it, but to block it. This level of energy cannon Not enough to kill King Kong.

So the four blue energy \*\*\*\* did not hit it, but blocked its forward direction. The four energy \*\*\*\* were hitting in front of King Kong, "Boom!" The four fire lights exploded, and the roar sounded and aroused. With the bigger shock wave, King Kong just hit it.

Although the power of the a2 type energy cannon is not enough to compare with the main gun, the four explosions exploded together, and the power they ignited was also quite strong. Everything within 30 ranges was shattered.

King Kong let out a scream, and his huge body was instantly overturned, flying backwards five or six meters away, and hit the ground with a bang.

This time the explosion point was too close. The powerful sound wave of the explosion hurt King Kong's eardrums and brain. King Kong tried to get up when he hit the ground, but his body didn't stand as if he was drunk, and he fell down again. , Arouse a dust.

He climbed up from the ground with strong support again, shaking his head violently, trying to get rid of the dizziness. This is King Kong. If Di Ping was at such a close distance, he would definitely be seriously injured!

With sharp eyes, Di Ping had seen two strands of blood flowing out of King Kong's ears. Although King Kong was strong, it could not withstand the terrifying sound waves at such a close explosion.

"boom....."

This sound was another roaring sound. Hundreds of cannons blasted on the city wall, and hundreds of blue energy \*\*\*\* drew out blue light bands in the sky, rendering the sky as beautiful as a realm.

"Boom boom boom..."

Hundreds of explosive flames exploded continuously in King Kong Zhou, and were enveloped by blue flames and white lightning within a range of tens of meters, and King Kong's huge body was instantly submerged by it.

As the huge fireworks rose, the entire sanctuary city was silent, all staring at the flame-shrouded place, and they were expecting the result.

Chapter 1073: Rescue in times of crisis

Di Ping and the awakened people do not have such a beautiful idea. They all know the power of King Kong. The power of the main gun is not enough to damage King Kong, let alone the ordinary energy cannon on the wall. Look at the power. Great, it's okay to deal with general mutant beasts. If you want to deal with King Kong, then don't expect too much.

"Roar!"

Sure enough, there was a terrifying beast roar in the raging flames, and the flame seemed to be instantly shattered by a powerful storm, and shot towards the surroundings.

The flames dissipated, and King Kong's huge body was exposed.

"Ah! Not dead!"

There was an exclamation from the top of the city.

Although King Kong was not dead, it was in a terrible state. Although the volley of a hundred guns was not enough to kill it, the shock it received was also quite terrifying. Blood was shed from King Kong's five views, and the hair on his body It was burned by the high-temperature flames like a pig with shaved hair.

"Haha! Everyone sees this guy has turned into a smooth pig!"

"Haha! Really, so ugly!"

The people on the city were first startled by the terrifying roar of King Kong, but when they saw King Kong's tragic situation, they immediately burst into laughter.

King Kong is very scary, but such a terrifying behemoth now flees like a bereaved dog. Once the pressure is gone, everyone has no longer the horror and fear before, but with a trace of pride and pride. When they relax, they see the ugly King Kong. A burst of laughter broke out.

Even Di Ping showed a knowing smile when he saw this scene!

The reason for the laugh was that once it was established that King Kong looked funny now, and the second was that he finally completed the upgrade. Feeling the surging power in his body, the fighting spirit in his heart rose again.

First order and eight levels!

His strength has nearly doubled, and his strength has increased to more than 50,000 jin again. He feels that the power of King Kong should be almost the same. He tried it before, and the power of King Kong is at most about 70,000 jin.

The most amazing thing is that the strange energy in his body grew from the original three threads to twelve threads.

This energy is now mutated and more active, swimming like a fish in the body at will. Although he can't use this energy, he can feel its terrifying power.

"Huh!"

King Kong looked at the direction of the sanctuary, his eyes were blood red, and he was breathing heavily, even Di Ping felt the palpitations of the extreme anger in his eyes.

"Wow!"

King Kong stood up suddenly, hammered his chest with his fists, Yang Tian roared, then jumped up suddenly, and rushed towards the sanctuary again.

Di Ping was stunned when he saw King Kong rushing back again, but his eyes also burst with surprises. The feverish excitement could be felt by Mok and others who were not far from him.

Di Ping could understand why King Kong would do this. King Kong was originally irritable and extremely angry. It was injured just now, and there was a trace of reason that wanted to escape, and it would come back to revenge after training. However, it did not expect to be hit by a series of bombardments. It hurt its body and even its hair was burned out.

It is now a giant beast, one overlord, the king of beasts, it has its own pride and dignity, although it is a beast, it also has the dignity of being a beast.

Now King Kong can no longer suppress the anger. It is not ready to flee. The flames of anger have extinguished its sanity, and the last trace of fear has disappeared. It vowed to kill all the people in this city to wash it away. humiliation.

"Boom boom boom!"

King Kong's four-legged ground is as fast as a bull, and every time it falls to the ground, it shakes and the momentum is amazing.

Di Ping looked at the figure of King Kong rushing, his eyes condensed. King Kong's injury recovered so quickly. Although his left foot was injured by himself, it was still a bit unfavorable, but it did not affect its speed.

Chapter 1074: Flame Strike creates opportunities

It was already the time when the arrow was on the string and I had to send the arrow. I took pains to keep the King Kong behind. Now that it is left, I can't let it run back alive and come back to harm the base later.

"You go back and you must not order that you are not allowed to go forward again!"

Di Ping turned his head to treat himself with severe exhaustion, sweaty and weak Mok, and then the others moved, kicked his feet on the ground and shot the whole person, equally fast, if you say Before 30 meters in one second, now it can reach forty meters in one second.

"the Lord....."

Standing in the distance, Gina opened her mouth, and finally swallowed the words. She knew that her master would not listen to her, so she could only watch Di Ping, who had rushed towards King Kong, with a worried look.

Boom boom boom...

A beast ran on all fours, like a bull, with great momentum, and the earth moved and the mountains shook. Every time it fell, the earth would make a roar.

咚咚咚...

A person stepped on the ground with both feet, like a tyrannosaurus running wildly, as fast as a horse, and the dust aroused by the rapid running speed formed a straight line of smoke behind him.

All the spectators were staring at the battlefield closely, watching the terrifying speed and momentum of this man and beast, and couldn't help but feel shocked. Even when Liu Zhenya looked at Di Ping running wild at this time, his eyes flashed with horror. Secretly said: So scary!

"Wow!"

King Kong stared at the oncoming Di Ping, with a crazy killing intent flashing in his eyes. It roared, and its speed increased again. It seemed that it was trying to kill Di Ping.

Di Pingyuan was cold, his eyes condensed, and suddenly he immediately activated his "Collision" skill. The speed of his whole body exploded again, and a bolt of lightning shot at King Kong, as if breaking through the space limit, and instantly appeared in front of King Kong.

King Kong didn't expect Di Ping's speed to increase so much, his body disappeared from his eyes when he shook, and then he appeared in front of him. It hurriedly wanted to stop, but its speed was not slow, and the momentum slowed down.

King Kong felt a sudden pain in his left leg, as if it had been kicked on a steel pillar. A huge force came, and its body was shocked, and then an uncontrollable somersault volleyed over.

It flew for more than ten meters and hit the ground with a "bang!" The huge body fell like a mountain, and the ground was shocked.

Di Ping stood still on the ground like a clock, maintaining the motion of an iron backer, his body leaning to the left, his right shoulder in front, and the whole body in a small lunge leaning forward, as if welded to the ground, while his feet were deep into the soil. Inside, a ditch more than one meter long and half a foot deep appeared in front of his feet, which he had ploughed out forcibly.

It was motionless, its face was flushed, as if it had just come out of a steamer, and its blood was rising like wolf smoke. The muscles on its body were trembling violently, like a wave, its blood was rushing like a river, and its bones were even more transmitted. There was a clicking sound.

He blocked this blow, and using the power of the iron mountain to take roots and the power of the earth to shock, he knocked the King Kong down by just over a meter away. Although it was a trick, the power of King Kong did not have a concentrated leg. It was in the upper body, but he did knock King Kong out. This was victory.

This time, his strength increased by almost ten thousand catties. Although he couldn't directly fight King Kong with his full burst, he still achieved the desired results by using the martial arts skills of leveraging attacks.

Just now, the strong counter-shock force was transmitted into his body. His body actually resisted it. There was no vomiting of blood, and no internal injuries. The violent shock power oscillated in the body, unexpectedly quickly surging the remaining strength after the upgrade. Digested and absorbed by the body, the surge of power brought about by his rapid upgrade is also quickly adapted and mastered.

The King Kong fell really hard. It took a full two seconds before it got up from the ground, and then slapped the ground angrily, like an angry child, picking up a piece of reinforced concrete the size of a stone roller. Chunk smashed towards Di Ping.

Chapter 1075: Seize the opportunity to box

"call!"

The huge cement block smashed towards Di Ping with strong winds. Di Ping dared to resist, but he didn't reach the state of unbreakable, he hurriedly stepped on snakes and dodged the blow of King Kong.

"call!"

The other was a huge tree root, turned over and smashed over, Di Ping hurriedly stepped on the chain and hid.

"Snapped!"

There were too many root tips. A long root tip swept across Di Ping's side like a long whip. His right chest was aching. The roots rubbed his side and hit the ground with a "bang", smashing a big hole.

"call!"

The whip of Di Ping cracked his mouth, and then there were a few more noises in his ears, and he felt that his eyes were dark, as if the sky was covered.

"I wipe it!"

Di Ping glanced at it, and it turned out that King Kong Lian threw out two things, and while he was dodging, he jumped over. It was its huge palm that swept over with strong wind.

Seeing a powerful palm, he didn't want to be swept up, and before he could think about it, Di Ping jumped directly, plucking green onions on the dry land, and leaped more than three meters high on the flat ground.

"Woo!" The strong wind whizzed across his leg, Di Ping could feel a tingling pain in his calf, just thinking how hard the palm wind was.

However, Di Ping made a big mistake. He shouldn't have jumped up. As soon as he dodges the swept palm of King Kong, Di Ping's heart tightened, as if he was being watched by a wild beast.

Then he saw King Kong's other palm covering the sky and avoiding the sun, but how he would hide in the air at this time? In an emergency, his mind was like a wit, and the mental power he had never used before opened up. , Three-meter space suddenly appeared in its consciousness. At this moment, it seemed that time was slowly changing, and everything in it was so clear.

He could see the giant palms slowly sweeping over, and even King Kong's huge red eye pupils with brutal killing intent, and the big mouth of the blood basin that was already excitedly waiting to swallow him, the \*\*\*\* yellow It looked so hideous and terrifying.

At this moment, Di Pingyuan looked cold and handsome, but his heart was running at high speed. His heart-like body was on the side of the air, and then his feet slammed into King Kong's giant palm.

"boom!"

Di Ping felt that his legs were riding on a fast train, and a strong impact came from his legs. He hurriedly retracted his legs to dissolve the impact, but that's it, that crazy The fierce force still rushed to the pain of his broken leg bone.

Then, his body shook, and he flew out in an instant. As his body curled up, it turned and flew far away like a round ball.

King Kong's attack was meant to catch Di Ping, and then swallow it in one bite. Its wide open mouth was already waiting, but he didn't expect Di Ping to use this sideways volley to kick off his power and take it away. Escaped in the palm of his hand.

"boom!"

The speed was too fast, and Di Ping was too fast to react before hitting the ground. His body rolled more than ten meters, and then hit a root of a one-meter-high tree, which stopped the momentum.

"puff!"

Di Ping only felt that his body was falling apart, his chest was stuffy, and his blood was gushing out. In the end, he couldn't help but a mouthful of blood spurted out, which made him feel more comfortable.

"Ah! City Lord...Master..."

At this time, the crowd had reacted and shouted in panic, Gina couldn't help but rushed over with a panic expression, but was caught by Ava next to her.

When everyone in the city saw Di Ping being shot into flight, they were also panicked and didn't know what to do. The city lord was injured again.

Chapter 1076: The withdrawal of troops is under siege

King Kong, who drove Di Ping flying, suddenly stood up, slapped his chest with excitement and roared like a victorious king swearing his power in heaven and earth.

"Pooh!"

Di Ping spit out, spit out the blood and sand from his mouth and nose, his eyes also ignited raging anger, and the lord of his own dignified city would be swept out by King Kong like playing golf, but his face was lost.

In any case, he couldn't find it back, his eyes were full of killing intent when he looked at King Kong.

"not good!"

Suddenly, Di Ping's color changed. After King Kong finished roaring, he didn't even rush over, but turned and rushed towards the sanctuary.

Di Ping didn't care about the falling apart pain on his body or adjusting his breath. He jumped up from the ground and chased after the King Kong figure.

However, he was 40 meters away from the distance, and although his speed is a bit faster than King Kong now, but not much, his current full burst out, the speed should be 40 meters per second, but what about King Kong? It is also thirty meters.

King Kong started again, and he must have reached the city wall before himself. If King Kong were to go to the city, it would have been unimaginable, and all the awakened people were under the city, which was exactly the attack route of King Kong.

"Hurry up and run away!"

Di Ping's face changed drastically, and he roared at the head of the city while running, and then commanded "Zero":

"Zero, shoot to block it!"

"Master, at this time, firing a gun will hurt you more than 50%!"

"Don't talk nonsense, fire a gun!" Di Ping shouted sharply, taking care of this.

"Yes!"

As soon as the sound of "zero" fell, the energy cannons on the city's head rang. The energy cannons on the city walls have a short charging time, and can fire one blow every second. The energy ball instantly crossed half of the city and shot towards King Kong.

"Wow!"

Facing the collected energy bombs, King Kong suddenly blasted, and there was a wave of energy fluctuations on his body. The dark skin suddenly swelled, as if it was inflated, turning into violent lumps, which flashed in the sun. The cold metallic luster seemed to have become steel.

"armor!"

When he saw this scene, Di Ping screamed in surprise. Only then did he realize that King Kong's original iron armor skill could not only be used once, but could also be used multiple times.

"boom....."

Hundreds of blue energy \*\*\*\*\* hit King Kong's body and exploded suddenly, and King Kong's huge body was drowned in flames.

But at this time, everyone didn't have a surprised expression. They knew that this root was not enough to hurt King Kong, and they had tried it before.

Di Ping knew even more that the defensive power of King Kong that had activated the skill was stronger, and that the hundred guns might not even be able to burn off their hairs, so the speed of the feet was faster.

"boom!"

Sure enough, King Kong rushed out of the flames. It didn't even have any sparks on its body. The root of the blow didn't stop its momentum much. It just shook its body and rushed towards the city wall without reducing its speed.

One hundred meters, fifty meters, thirty meters.

King Kong was as fast as a galloping horse. There were only two shelling attacks on the city, and King Kong came under the wall.

Looking at King Kong, who flew up with a terrifying aura, the soldiers on the front of the city were so frightened that they had forgotten to shoot at them, but they couldn't stop them.

And the awakened people under the city were also pale. They were all injured and uninjured Daniel, Gina, Ava and Yun Mengsi who could not stop King Kong at all.

The sanctuary city has fallen into the biggest crisis since its establishment, and the city may soon be broken. With the destructive power of King Kong, it is a catastrophe for the city group.

Chapter 1077: Advance and retreat together

Gina and Yunmengsi only came and ignited a fireball, and Daniel only fired two shots, King Kong arrived, and its huge mountain-like feet stepped on to everyone, like a mountain descending from the sky. The person lying on the floor has the power to move, but you, Gina, who can still stand, have no time to take people away.

"Hurry up!"

Seeing that he was stepped on by the King Kong, Di Ping's heart suddenly jerked, and the corners of his eyes were almost cracked. This is over. These people have no resistance to the current violent King Kong, and they drink together and desperately stimulate. speed.

At this moment, there was silence on the battlefield, and everyone showed sorrow. Watching the big foot of King Kong stepped on, the expressions on the faces of the awakened people were clearly reflected in Di Ping's eyes, and they showed a trace of despair. Gina seemed to look at Di Ping, but Di Ping's heart was broken by the reluctance and attachment in her eyes.

"Wow!"

Just as everyone was desperate, a tiger roar suddenly sounded, and a huge white figure leaped towards King Kong from the top of the city.

This is a huge white tiger that is more than two meters high. It rushed down from the city with a roar. King Kong didn't react for a while. It was bit by the giant tiger in the neck. The powerful impact of the giant tiger threw King Kong to the ground. , The giant tiger was madly hissing at King Kong's throat.

"big cat!"

Di Ping was taken aback when he saw the white figure, and when he saw that it was a big cat, his eyes burst with surprise.

"big cat!"

And the awakened people who were waiting to die, saw that King Kong suddenly fell backwards and their desperate kick was also lost. Everyone burst into the joy of the rest of their lives. When they saw the big cat, they shouted in excitement. Up.

"Ah! Then come such a big tiger!"

A group of soldiers from the Bianzhou Military Region on the front of the city screamed when they saw such a big tiger.

"Haha! Don't be afraid, this is our city lord's pet!"

The sergeants of Sanctuary City laughed proudly at the horrified group of soldiers.

Di Ping didn't expect that the big cat who stayed in the castle guard would suddenly come over, but it came at the right time, and now it was saving a lot of awakened people.

Gina and others also reacted from the initial surprise, and quickly helped their companions around them to hide away.

"Woohoo!"

King Kong was stunned by the sudden blow of the mutant tiger, but when he reacted, he slapped it with a palm, and the big cat let out a miserable cry and was shot and flew out.

The big cat can't even beat Di Ping, let alone the so powerful King Kong, but the big cat is also very strong. Although there is blood on the mouth, it still madly rushes on again and bites the King Kong.

King Kong swept away the mutant tiger again, touched his neck, and saw the blood on his hand. It was also angry. It grabbed the mutant tiger that was rushing up, and the mutant tiger with a powerful force hooped let out a horrible roar, nose and mouth corners. There was blood flowing out, and the paws stomped desperately to break free from King Kong's palm.

Suddenly, a fierce light flashed in King Kong's eyes, and he opened his mouth wide and bit towards the head of the mutant tiger. This bite would definitely kill the big cat.

"big cat"

When Di Ping saw this scene, his face suddenly changed wildly, and he roared, then his aura suddenly broke out, his body instantly accelerated, turning into a phantom and rushing towards King Kong.

The big cat is Di Ping's first pet. He is usually very well-behaved. Di Ping has treated it as his own companion. Seeing it will be killed by King Kong, how can he treat it calmly.

## Chapter 1078: Encounter and fight to be ascertained

Di Ping had already rushed to a place less than 20 meters in front of King Kong. As soon as the collision skill was activated, his whole person disappeared instantly. When he appeared again, he had reached King Kong's side, and his body slammed into King Kong's lower abdomen.

As long as King Kong fell to the ground, it would have no chance to bite the mutant tiger. This was Di Ping's strategy.

"boom!"

With a muffled sound, the sooner Di Ping went, the faster he came back. He felt like he had hit a big mountain. A powerful counter-shock force shook his body and flew backwards five or six meters away at extreme speed. Deng stopped, his face flushed, his blood churning, and depressed, he was about to vomit blood.

"Wow!"

King Kong let out a roar, and its huge body was hit by Di Ping's full strength and retreated three steps "boom boom boom" before hitting the city wall with a "bang", and the city wall trembled.

With subconscious force in his hand, the mutant tiger let out a roar, bright red blood leaked from the corner of his mouth, King Kong leaned against the city wall, a pair of cold eyes swept Di Ping, his eyes showed a trace of cruel killing intent, and he had given up the struggle. The mutant tiger put it in his mouth again.

"No!"

Di Ping forcefully endured the tossing blood, screamed anxiously, and rushed to King Kong again.

"boom!"

At this moment, seeing the mutant tiger who was about to be put into his mouth by King Kong, suddenly opened his big mouth, bursting out a ball of flame, slamming into King Kong's mouth, and then exploding suddenly, King Kong was like a fire breathing beast. Flames are generally sprayed outward.

King Kong let out a terrible roar, his body fell backward, his body fell backward with a "bang", and he threw the mutant tiger in his hand out in a panic.

The mutant tiger was smashed onto the face and let out a horrible grunt, blood was bleeding from his nose and mouth, and he struggled a few times but couldn't get up, lying on the ground and motionless.

"big cat!"

Di Ping saw the mutant tiger smashed on the ground as weak as a puddle of mud, his eyes were red, and he stared at King Kong angrily, and shouted: "The system will upgrade it!" Then his whole body suddenly exploded with vitality and power. Then he rose, his feet shook the ground, and the whole person rushed out in an instant, leaping five or six meters high like a big bird, and thumping his iron fist against King Kong's chest like a landslide.

Di Ping discovered that the "flame blow" of the mutant tiger burst into the mouth of King Kong and exploded, but its explosive power caused King Kong to suffer. The strong explosive power blasted its mouth in an instant, and King Kong's iron armor skills were also Disappeared.

Di Ping was stupid if he didn't understand it. It could be said that this opportunity was obtained by the mutant tiger with his life.

With this blow, he exerted his full strength. King Kong was stunned by the sudden blow of the mutant tiger. The intense flame burned his mouth, and the intense pain made it scream continuously. It could also prevent Di Ping. Sudden attack.

The fist was powerful and domineering, even the air blasted, and the roar was like the sound of a fighter plane passing by, rumbling, and the fist hit the King Kong, and the terrifying power went straight through the inner palace.

This time, there was no iron armor blocking, the mysterious energy was also weak at this time, and there was no strong resistance before, and the sturdy energy instantly penetrated, "Bang..." five sounds in everyone's ears. The sound is muffled.

This punch contains five strengths, how terrible the lethality of the inner strength is, the King Kong does not have the rage and the iron armor, and the mysterious energy does not show its power, this punch is extremely strong.

But the power of this dark energy instantly penetrated its body through the skin to explode, and the violent power shook its heart and cracked the wounds, and the King Kong let out a stern roar.

"boom"

Di Ping was also shocked by the force of King Kong's counter-shock and flew back five or six meters, and then fell to the ground with a bang. It took five or six steps in a row to stand firmly.

Chapter 1079: Strange sound in the cave

Di Ping looked at King Kong's terrible roar with joy in his heart. King Kong was finally injured, and his fist was effective for him!

At this time, he had no mind to care about the severity of his physical injuries. He took advantage of his illness to kill him. Since the collapse of the fist was effective, he had to take advantage of the victory to pursue the attack, and could not give King Kong time to react.

With his eyes condensed, Di Ping kicked his feet on the ground again, and the whole person turned into a phantom and rushed towards King Kong again, moving as fast as lightning, and there was no injury at all.

King Kong is indeed too strong. Di Ping's punch is not enough to kill it. Seeing Di Ping's long angry roar, everyone is afraid of the anger and killing intent. It is obvious that this King Kong has already attacked Di. Ping's killing intent has accumulated to the extreme.

It also moved. Suddenly he slapped the city wall in anger, and his huge body suddenly stood up. Di Ping, who was leaping at him, raised his fists and slammed it down suddenly.

"boom!"

Two fists descended from the sky until a comet hit the earth, and the violent force broke out in an instant, and the earth broke apart like a volcanic eruption. A strong shock wave smashed the big earthquake and rushed towards Di Ping with the might of an invincible giant.

"Get me up!"

Di Ping watched the strong shock wave shattering the ground and rushed towards him. He dared to catch it, and hurriedly shook his feet, exerting force on his legs, and his whole body jumped into the air, jumping more than five meters high, making a sharp turn in the air. Avoid the shock wave.

Then his back foot hit the ground, and it bounced like a strong spring, and his fist blasted towards King Kong's chest again with strong wind.

"Snapped!"

Fist like a whip, there was a blast in the air, and the fist slammed on King Kong's chest again. With a muffled sound, the force penetrated directly into the body, and the violent dark energy broke out again in its body. Five thunder-like noises came from the King Kong body.

"Wow!"

King Kong's body stiffened suddenly and let out a painful roar.

Take advantage of your illness to kill you! Seeing King Kong leaning back, the empty door opened wide, his eyes condensed and a fierce light shot out!

Di Ping has never been a soft-hearted person. Once he succeeds, he will give King Kong a chance to fight back.

As soon as he fell to the ground, he bounced up again, ignoring the numb fist and the qi and blood that were shaken, and still thunderously punched toward the same position of King Kong.

"boom!"

The violent fist broke out, and another punch was punched on King Kong's chest. The sound was like a suffocating drum, banging, King Kong let out a horrible roar again, and his body hit the city wall again with a bang, one of the tall walls that shook. trembling.

Di Ping gained power and did not forgive anyone. He bounced back to the ground and bounced out his punches again. Everyone at the scene only saw an image of an angry war bear, rising up into the sky again and again, with terrifying fist pumping on King Kong's chest.

"Boom, boom..."

Everyone in the upper and lower parts of the city was stunned. Di Ping was like a crazy elephant, smashing to the ground again and again, and rising into the air like a sky cannon again and again, his fists moved like the wind, and every punch went down. King Kong just let out a terrible roar, and the walls trembling with the powerful fists.

After five or six punches, King Kong's state was extremely tragic, blood gushing out of his hideous huge mouth, and a piece of blood in his yellow pupils filled his eyes.

This is because Di Ping is about to jump up and punch, otherwise he will not be able to hit King Kong's chest. This makes the power not strong enough. If Di Ping is standing on the ground and punching with ground force, his punching power can still exceed only three levels. , King Kong will be more unbearable.

"Give me... die!"

Di Ping's eyes were red, and he rose into the sky again like crazy. A trace of blood gushed out from the corner of his mouth, his fist was already bloody, and his skin exploded with cracks, but he still stared sharply at King Kong. It seems that everything in front of me has disappeared, only King Kong.

Chapter 1080: Savage Lynx Chasing Soldiers

"Boom boom boom... boom boom boom..."

Han Ming led Lu Fang and his party on the top of a small hill listening to the fierce gunfire coming from the front, looking nervously in the direction from which the gunfire came.

At this moment, when the leaves moved, Yu Yuanhua sprang out of the dense forest like a fish.

"I know the situation of Brother Han!"

As soon as Yu Yuanhua rushed to everyone, he hurriedly whispered to Han Ming.

Han Ming did not speak, but his eyes motioned to Yu Yuanhua to continue saying that Yu Yuanhua and Han Ming had been together for a few days, and already knew that he didn't talk much, and he liked to do things cleanly, so he was not trying to sell things off, so he hurriedly lowered his voice and said, "Ahead The besieged forces should be the retreat of the Jincheng base. They were caught up by the white spiders. They are now trapped in a temple and are blocking the attack of the mutant spiders!"

Yu Yuanhua didn't have much to say, and in just a few words he explained what he saw and judged.

"These \*\*\*\* spiders are really lingering, why there are them everywhere, we still can't get around after a big circle!"

Liu Changhe scolded bitterly.

He has been healed a lot after Han Ming's herbal medicine treatment. Although he still can't walk, his complexion is much better. His hatred of mutant spiders can be said to be like the Yellow River overflowing with endless waves, and the water from Jiujiang River can't be washed clean. .

"The number of these mutant spiders is too large, the amount of food they need is very scary, and the hunting range is relatively large. The people at the Jincheng base may give up if they look at them!"

Han Ming said solemnly.

He is not in a very good mood. He has the most experience of the horror of mutant spiders. Once these people in Jincheng base are targeted, the results are probably not very good. The number of mutant spiders is terrible, and he has already determined these people. The next ending, that is, buried in the belly of the spider.

And is the city owner's parents also in these large forces? If they are here, the problem is serious. These mutant spiders are around, it is difficult for him to save people. This allows him to complete the task of the city owner.

Therefore, when he thought of this, he looked solemn.

"Yuanhua, how many mutant spiders are there, and how is the offensive, can Jincheng be able to stop it?"

After pondering for a while, Han Ming looked at Yu Yuanhua and asked.

Yu Yuanhua's brows condensed, and after thinking about it, he said softly, "I didn't dare to get too close, because I was afraid of being spotted by mutant spiders. I roughly counted them. The number should be around 500. At present, it should be able to block it. The temple where the Jincheng base is located is in the valley. It is surrounded by water on three sides and only one side can be attacked. It is a good defensive location. The firepower of the Jincheng base is still relatively fierce, and the mutant spiders can't attack it!"

"Huh! That's good!"

Han Mingchang exhaled.

"Brother Han, are there any of you in this large army?"

Lu Fang hesitated for a moment or asked in a low voice.

Han Ming was stunned when he heard this. He didn't expect his expression for a moment to be discovered by the careful Lu Fang. He was silent for a moment, and nodded with a heavy expression: "Yes, there may be someone I'm looking for!"

"Brother Han, is it your family? You look very nervous!"

Liu Changhe asked with concern.

Han Ming shook his head and said, "No!" Before everyone asked, he went on to say, "Is it an elder!"

He was right. The city lord's parents were not his elders, and he was not a lie. He didn't know how to say it for a while, and he was afraid of having to explain it for a long time. He was afraid of trouble.
