

## Doomsday 1221

### Chapter 1221: Jiaolong Steel Cable Binding Python

This meeting ended in this way. Chu Dingbang showed the majesty of his commander of the base. One sentence determined the assignment of tasks. Judging from Chu Dingbang's face, no one wanted to touch him, and there was no longer a fight. significance.

At this time, no one can afford the consequences of disobedience. No one knows whether what Hu Jun said is true or not. Of course no one dares to try.

When Liu Zhenya returned home, he saw Yun Kuohai and Ava, with apologetic expressions, and said: "Director Yun, things have changed a little bit, and the formal handover may take two days!"

"General Liu, what has happened? I don't know how long it will take, but the city lord is still waiting for our news!"

Yun Kuohai's face condensed upon hearing this, and asked suspiciously.

Liu Zhenya did not conceal that he had told Yun Kuohai about what happened today. Yun Kuohai only then realized that these things had happened. He also shook his head with a helpless smile and said, "There is no way to deal with this. I saw it!"

"In the past few days, Director Yun is getting better and better in Bianzhou. I will try my best to make this happen!"

Liu Zhenya nodded and said.

When Di Ping received the message from Yun Kuohai through his wristwatch, he also secretly gave a bad breath, and no one expected to encounter this incident.

But at the same time, he wondered how this person from Kyoto actually appeared in Zhongzhou, two thousand miles away, how they came, and what happened here.

And he also wants to know the information from the outside world. Now his eyes are dark in Zhongzhou, even the close Bianzhou internal affairs are not so much for him.

So he told Yun Kuohai not to be idle, and take advantage of Bianzhou activities these days to see if he can find important information.

Not to mention the Bianzhou side, we will return to the sanctuary city!

Liu Zhenya's departure did not have any impact on the Sanctuary City. Everything was proceeding in an orderly manner. After two days of concentrated awakening, it stopped later. A total of 28 people successfully awakened in two days. Only one person failed, even though he was escorted by the priesthood, but one person failed to awaken successfully.

But because of this, the success rate has been quite high. Now that the base awakened officially exceeds forty people, the strength of the Sanctuary City has greatly increased. While everyone is envious, they are more happy in their hearts and the Sanctuary City is safer.

After two days of excitement, the people of Sanctuary City suddenly noticed that some changes had taken place in the city. The market that had been closed suddenly opened. When people went in with curiosity to take a look, they were suddenly surprised. Many shops in the market have already been displayed. In addition to commodities, there are not only daily necessities, grains, all kinds of meat, but also clothes, small commodities, etc., and there is a dazzling array of commodities, which is no different from a department store market.

Everyone began to pass the news out with excitement. Countless people poured into the market. They found that they wanted to buy goods without money, but they had to use points to buy and sell.

What are points?

Many people don't know, they are all guessing and asking. Who knows that they will know at night. After the end of the night, they found out that the distribution of points is not food but score cards. The points issued are different according to the workload, there are 20. There are also thirty or forty points.

The city guards also received their wages today. This time it was not food. Each city guard was paid 80 points a day.

Of course, their loyalty card is not the kind of card that Han Zhongguo got, but a specially made cardboard of the size of a business card, with a denomination of one point, five points, ten points and fifty points. Four denominations.

Di Ping is rich, but he is reluctant to use crystal coins to buy crystal cards for them. The cost is too high. After the arrival of scientific and technological talents, he will make points cards like bank cards and distribute them to the citizens.

Now everyone knows what the points are, and they happily take the points card to the market to buy what they need.

In fact, everyone has long been complaining about the previous food distribution method, because you may be distributed to you who you don't like. Now the sanctuary city does not lack food. Everyone in the base can eat. That's how everyone is. Then I want to start eating well, or eat what I like.

This is just like the old saying: "Fate with thoughtful thoughts", many people understand that they start thinking about women when they are full, but I think that this "refers to people's desire, taste better food is also a desire; in modern terms : It means that if you are materially rich, you must pursue spiritual enjoyment.

Of course this is just a digression!

Chapter 1222: Zhenlongzhu fell from the sky

Knowing the usefulness of the points, the family members of the Death Soldiers who had previously received 10,000 points almost fainted with excitement. At first they didn't know what the points were for. They only found out today. They have seen the market. Product prices, knowing that these 10,000 points are a huge sum of money, one after another rushed to the market to buy what they wanted.

If a big market, the upper and lower floors are crowded with people, everyone is excited to watch shopping, even if they don't buy things, they are also happy. It turns out that shopping is such a beautiful thing, but I haven't found it before. People feel that they haven't been shopping for a long time. Although this last days has only been more than a month, it feels like years of age that make people feel a lot of emotion.

Even Di Ping had a slight emotion in his heart at this time, and he was also shopping among the crowd.

Except for the treasure building, the whole market is still quiet. Ordinary people can't enter here. They don't have crystal coins. Here is the world of the awakened. A group of awakened people enter here and look around excitedly, like Grandma Liu entered the Grand View Garden.

The first floor is the general merchandise area, which is rich in materials. As long as there are crystal coins, they can buy them. They don't need to squeeze in the market to buy. The second floor is the material area, which they can't use now. The third floor sells exercises, medicines, etc. When the awakeners saw the above prices, their heads suddenly widened, and they couldn't afford them.

A weak weapon of the lowest rank costs fifty or sixty coins, and a weapon like a strong weapon of the first rank actually costs two hundred coins.

The price they saw was different from the price Di Ping saw.

Di Ping looked at the amazement of the crowd, he secretly laughed, he increased the prices of the second and third floors by five times.

Want to know what he was born?

He is a businessman. Of course, the businessman is profiting. He wants to open the market to the outside world. Then he does not make a difference. That is not a waste of work. Originally, he only wanted to increase the price by three times, but Doro suggested to increase the price because He thinks the price itself is too cheap.

And this is scorpion shit-the only one. How can a monopoly business like this be worthy of the system without making a huge profit? The most important thing is that he is poor?

The landlord's family has no surplus!

The awakeners who had come here in a hurry and saw a lot of good things are almost ready to cry when looking at the prices above. The points in their pockets are not enough to buy anything, and they all walk away dejected.

However, there was a flame in their hearts, and the things inside were so attractive to them, they had already decided in their hearts to earn points to buy their favorite things.

Di Ping walked towards the tavern after watching the market. The tavern was officially opened today. He wants to see the situation!

Compared with the bustling market, the pub is quieter. Few people can come here to drink. Who is willing to spend a lot of money to drink without having enough food and clothing? It may be Di Ping and other managements. The awakened people start to consume!

Di Ping was happy when he arrived. There were a lot of people in the tavern, such as Han Zhongguo, Lu Guoliang, Cheng Chao, Fatty, Tang Zhandong, Liu Han, Owen, Buji, Mok, and Daniel.

These people are genuinely drinking, smiling and laughing as if they are saying something happy.

"City Lord!"

"the host!"

Seeing Di Ping push the door and enter, everyone laughed and stood up and shouted respectfully.

Di Ping pushed the door and looked at the nervous expressions of the crowd with some smiles, and said, "You guys are so leisurely, you actually ran here to drink! No one told me, should I be punished!"

"Haha! Should be fined, should be fined, should be fined absolutely!"

Han Zhongguo laughed and stood up, greeted Di Ping, and shouted at Cheng Chao, "Commander Cheng! Look at you, your drink is wrong! The city lord dare not invite it. It is indeed punished. Drinking wine!"

Cheng Chao helplessly touched Han Zhongguo with his hand and smiled bitterly: "Old Han, if you don't give me this point, you won't let me go!"

"Haha! We congratulate you on becoming the awakened, and from then on to the pinnacle of life, let you buy a drink, you are still squeaky!" Han Zhongguo mocked Cheng Chao with a malicious look, then turned his head to Batai The direction shouted: "Waiter, give the lord a glass of your best wine, and the commander of the army will treat you!"

"Yes! Now the points are all over!"

Cheng Chao took out his crystal card with a helpless smile on his face.

Haha!

The people in the tavern all laughed when they saw Cheng Chao's appearance. Cheng Chao was inspired by Han Zhongguo to buy a drink just now, and now he has directly spent his points.

Chapter 1223: Armor-piercing bullets are hard to break

Only now did Di Ping realize that this meal was for Chengchao. Looking at the people in this room, the points for Chengchao might have been spent. Seeing him look helpless, it made him feel a bit funny. .

So he also looked at Cheng Chao with a ridiculous expression on his face: "Commander Cheng has to drink wine! I think everyone is running out of wine, and Commander Cheng doesn't give everyone another drink!"

"it is good!"

Everyone laughed and responded in unison.

"Wu is in charge, can you owe the account first!"

Cheng Chao was crying, and raised the card in his hand to look at the tavern master Wu Andao.

"Haha!"

Everyone laughed again, and Liu Han's tears were about to come out. This Cheng Chao had just been smashed by Han Zhongguo, and now the city lord also pushed it, okay! Cheng Chao is now not only a pauper, but also starts to owe debts.

Di Ping's wine was brought up by Wu An. It was his favorite Yuluchun. Now he still has a few bottles in his room. Seeing Yuluchuncheng Chao's face is almost green. The price of this wine costs 200 points. Han Looking at Cheng Chao, Zhongguo burst into laughter again.

"I said being a military commander, how does drinking your wine look like cutting meat!"

Di Ping looked at Cheng Chao and asked jokingly.

"Haha! City Lord, don't you know that this old man is a big smoker, and he is going to buy all the cigarettes with his points, and it was blocked by us!"

Han Zhongguo haha lit Cheng Chao and laughed.

"I'm penniless now, I'll be looking for you this month!"

Cheng Chao stared at Han Zhong Guodao anger.

"Uh!"

Han Zhongguo's laughter was immediately swallowed, and he waved his hands in horror: "Don't even think about it, I don't have enough cigarettes!"

Everyone looked at Han Zhongguo's appearance and laughed again, thinking that taking cigarettes from his big smoker would not kill him.

Only then did Di Ping know why Cheng Chao had such heartache points. These people were all old smokers. They were provided by Di Ping before, but now they have to buy them all by themselves. He set cigarettes and alcohol as luxury goods at prices. That is extremely high. The worst cigarettes also cost 20 points a box. They really can't buy many boxes with their 1,000 points. It's not enough for their smokers. On average, they get two or three packs a day, okay. !

This point is not enough for them to buy cigarettes without having to eat. No wonder they are being deducted one by one.

"Okay! Don't be heartache, I'll buy today's wine, let go and drink!"

Di Ping knew the reason and shook his head secretly. These people's points were not enough for them to smoke, and it was really difficult for them, so he smiled.

"Long live the city lord!"

Everyone immediately jumped up with excitement when they heard this, Shanhu Long live.

"Serve wine! Serve wine!"

Han Zhongguo even slapped the table and yelled, a pose that is not finished without drinking.

Di Ping did not mess with this group of people and drank a glass of wine and left. Behind him, the sound of people fighting for wine was extremely lively. He had a hunch that the tavern would become the most lively place in the asylum city. The number of awakeners increases, and the status of the tavern will become higher and higher. In the future, it will become a place like a professional trade union or a mercenary guild, and the excitement will be inevitable.

After a round, things are basically like the direction that he designed to make him satisfied. This is a vibrant city.

In the past two days, all parts of the asylum city have not been idle, and the structure has been set up in a short time. The market layout is reasonable, the materials are abundant, and the points are distributed in place, including the post-war pensions.

From this point, it is sufficient to show that the current management work of Sanctuary City is in place and benign, which makes him very satisfied!

Di Ping suddenly felt the vicissitudes of life that seemed to be a world away. A month ago he was still working hard to make money, but one month later, he became the lord of a city. There are countless capable soldiers, so he has to make him dreamlike. feel.

Chapter 1224: Trap failure

During a stroll in the idle courtyard, Di Ping came to the workshop. As the number of awakened people increased, he was ready to open it. Not only the Forging Building, but also the Rune Building and the Pharmacist Building would be opened. There were more than 40 people. He didn't believe that few of the Awakeners had talent in this area.

Ding Ding Ding

As soon as he walked to the forging building, he heard the tinkling of iron from inside, with a smile on his face, turned the hall into the back hall, and came to the forging room where the sound came from.

As soon as he entered the door, he saw two figures, one was Luo Hongyuan, the other was a strange man with brown-red skin, short but strong body.

This person is none other than the S-rank potential hero bronze hammer recruited by Di Ping this time.

When Di Ping saw Bronze Hammer almost out of madness, he felt that this recruitment was a profit. The Bronze Hammer not only reached the first level and fifth level, but also had an extraordinary strength stronger than Owen. He was also proficient in forging. The first-tier blacksmith is now available, and the blank problem of the blacksmith in the sanctuary city is now filled.

When Di Ping took him to the forging building and saw the forging room, this guy was even more mad and asked to live here. He had no sexual interest in anything other than forging weapons, so Di Ping arranged him. When he lived in the forging building, he started to work before Di Ping left.

After Luo Hongyuan awakened, he rushed over and carried on the forge inheritance. In a sense, he and the copper hammer are the same kind of people, both obsessed with forging. When the two met, it was dry ice meeting water and reacting quickly.

The two of them were hammering hard at a piece of iron ingots, and they didn't react to Di Ping who came in. They were already addicted to their own world.

Di Ping has also inherited the forging technique now, and of course it is also a rise to watch. After watching for a while, without disturbing the two of them, he found a room by himself and began to practice his nine-hammer forging technique.

An hour later, Di Ping, with his extraordinary talent, finally trained the first hammer of the Nine Hammers. He entered the door. Looking at the 10% purity iron ingot in his hand, he finally stepped forward. The first step, if he learns the nine hammers, he can forge iron spirits with a purity of more than 90%. This is the first step in building weapons.

With the help of thousands of tempered irons and some special materials, you can forge high-quality weapons. If you want to be a good forger, there is no such weapon. It is not a polishing process that

starts with a piece of metal. Only by wiping out the properties of the material clearly can you build a good weapon.

Therefore, even if many equipment can extract high-purity metal, few forgers will use it, they are all made by themselves.

Two hours later, he mastered the second hammer again!

Three hours later, he mastered the third hammer again!

If this speed let Luo Hongyuan know that he would be surprised, because he has slept for less than two hours from yesterday to now, but it was only the second hammer, and now Dipin is faster than him.

After the third hammer, Di Ping felt that the difficulty in the back was increasing, and did not find the feeling after practicing for a long time, so he had to put down the hammer, and sometimes it was too late.

At this time, he was sweating all over his body. I didn't feel it before. Now I feel uncomfortable when I come up. It's not too early to see the time. It's already past ten o'clock, and he forgot to eat dinner.

When he came out, he found that Luo Hongyuan and Bronze Hammer were still there. Although sweat was dripping on his copper-colored skin, he seemed to be completely immersed in his own world. Di Ping looked at him and shook his head. Xindao can't go on like this, and both of them will collapse.

When he left the house, he specifically confessed to Liu Anhe and let the two rest on time at ten o'clock, otherwise they would stop the energy supply directly. He didn't want the two of them to just die, and they would not rest for so long. The body can't stand it either.

Although he is very much looking forward to the two men being able to build Tier 1 weapons as soon as possible, he does not want to rush for quick success and make them exhausted.

Chapter 1225: Longhushan has a pill

"Hold it fast, you can't let it break free!"

Hu Jun was standing on a small hill at this time, shouting loudly at the bottom of the mountain, his solemn expression finally revealed a hint of joy.

I saw a huge dragon-like giant python under the hillside. At this moment, it was being \*\*\*\*\* by nine small-finger-thin steel cables. It was struggling violently. The giant tail slapped and the air seemed to be pumped. It exploded, and the surrounding huge trees shattered like bubbles instantly under the sweep of the giant tail.

This giant python is extremely terrifying, its whole body is as black as ink, and its body length is more than fifty meters. The thick body needs two people to hug it to circle around. Pieces of palm-sized dense pitch-black scales shine with cold metal in the sun. luster.

This is what Hu Jun wants to deal with. This time Hu Jun brought a dragon lock specially designed and manufactured for the giant python from Kyoto. Through the trap, he finally lured the giant python over. At this time, nine awakened people are pulling tightly. Holding one end of the steel cable, tightly locked its huge body.

The last time he came to deal with the giant python, he was not fully prepared. He was killed by the giant python and lost his helmet and unarmed, and fled back to Kyoto embarrassedly. This time he came prepared.

The python not only has super defensive power but also extremely fast. Guns can hardly hit it at all. Before the shells have fallen, the python has rushed tens of meters away. The real wind power comes and goes, and the action is like wind.

The dragon locks researched and produced by the Ministry of Science and Technology are specifically used to restrict the movement of the giant python so that he has the opportunity to launch artillery attacks.

The power of the giant python is so great that the huge body is constantly twisting and winding, which puts a lot of pressure on the awakening of the nine people. Their hands are trembling while pulling the steel cable, but no one dares to let go. At this time, someone let go. The python broke free of the dragon lock, it was a disaster.

They did not expect that what Hu Jun wanted them to deal with was such a terrible python. Even Zhou Keming, who had seen a big battle in the city of refuge, was shocked in his eyes. He felt that this python was no worse than King Kong, maybe To a certain extent, it is more terrifying than King Kong. Human beings are inherently afraid of snakes.

"Crunch!"

There was a sharp sound that made the teeth sour, like the sound of an iron scraping across the steel plate.

Every time the giant python twists, the sharp steel thorns of the steel rope tied to the body cut through the giant python's scales and sparks appear as if they are on steel. It is even more horrifying that such a powerful stroke is only left. The next scratches.

The defense of the giant python scale armor is really amazing, and the hardness of the steel thorns can't hurt it.

"They can't hold on anymore!"

Qing Feng, who was standing next to Hu Jun, suddenly spoke.

"Full fire!"

Hu Jun knew that it was too late to fire at this time. Seeing the nine people slipped on their feet pulled by the powerful force of the giant python, they kicked deep marks on the ground, which seemed extremely laborious, and they might get rid of them at any time.

Boom boom boom...

As soon as Hu Jun's voice fell, nearly a hundred rockets shot at the python with a long flame. At the same time, fifty machine guns and two Vulcan cannons all roared at the same time, forming a line in the sky. Dao Fire Snake jets away at the giant python.

Boom boom boom...

Hundreds of rockets exploded beside the giant python, bursting into a huge flame, soaring into the sky, surrounding the giant python, everything within a radius of fifty meters vaporized instantly, and then a strong shock wave swept around.

The nine awakened people who were 50 meters away from the strong explosion wave went behind their backs, letting the rocks and wood hit them.

The crackling sound is constant, which shows the great power, this is the awakened person, if ordinary people may have been blown away by the air wave, let alone such a powerful blow.

None of the nine people retreated. They were all soldiers and they were most heavily ordered. They clung to one end of the steel cable tightly, letting the wind and waves beat them.

Chapter 1226: Swallow the golden core and wait for the result

At this time, the barrage formed by the countless rain of bullets from the machine cannon and the Vulcan cannon poured in from the hillside towards the center of the battlefield.

Although the smoke on the battlefield was covered by the tip of the smoke, it was impossible to see the situation inside, but at this time no one dared to care, just shooting wildly.

The violent rain of bullets formed a bullet storm like fire snakes, twisting the smoke and dust like broken clouds, and faintly visible the body of the python that was constantly twisting in the flames and smoke.

"Wow!"

At this time, a roar rose from the flame, and the anger contained in it shocked everyone.

Boom!

A bowstring crash sounded, and the steel cables pulled by the nine awakened people suddenly straightened, and then the bodies of the nine people began to move toward the center, and a deep trace was drawn on the ground like a plow, deep within reach. Half a foot.

"Hold it!"

The faces of the nine people changed drastically, and Hu Jun stood on the hillside and yelled anxiously. The joy on his face had disappeared, and it was panic that brought him.

"Pull!"

The nine people roared in unison, their faces flushed, and a few blood had spilled from the corners of their mouths. It was obvious that the nine people had already suffered internal injuries during the powerful pairing.

"Xiazhen Longzhu!"

Hu Jun shouted loudly with a face of Shen Rushui.

"Xiazhen Longzhu!"

At this time, a soldier next to him picked up the communication microphone in his hand and shouted.

"Om!"

Just five or six seconds after his voice fell, there was a buzzing sound in the sky, and then a huge black plane cut through the sky instantly, appeared above the crowd, and stopped two or three hundred meters in the sky. .

This is exactly the sci-fi-like fighter plane that Hu Jun took before. I saw it stopped in the air, a dark hole was slowly opened at the bottom of the plane, and the nine sea bowls were more than two meters thick. The pointed metal steel pillar with its long lower head suddenly slipped from the entrance of the hole.

Boom boom boom...

The nine steel pillars fell from an altitude of two to three hundred meters. The weight acceleration force was so powerful that they made a whining sound in the air, and then crashed on the ground. The nine steel pillars formed nine points, which happened to turn the python Surrounded by the middle, straight into the ground, only exposed a half-meter head outside.

Then the steel column shook again, and the steel column deep underground suddenly rang. If you can see it, you will find that the steel column has more than ten steel cables spread out like tree roots. After rotating into the underground more than ten meters deep, The drill bit suddenly stretched and tightened in the ground.

In this way, every steel pillar firmly grasps the land nearly 20 meters deep and more than ten meters in radius, like a big tree and tree tightly grasping the ground.

Click!

A steel hook was opened on the flat roof above, and seeing the appearance of the steel hook, the nine awakened people quickly wrapped the steel cable around the steel hook, wound it several times, and used the steel pillar to disperse the power to the ground. The previous nine grounds The lock was obviously unable to support such a strong struggle.

This is also a weapon specially designed by the scientific research institute called Zhenlongzhu. Once it hits the ground, more than a dozen steel cables will be separated into the ground and then held tightly, so as to ensure that it will not be easily pulled out.

To say that this country is powerful, it is amazing to be able to research and manufacture such sophisticated weapons in a short time under such simple conditions in the last days!

"Boom!"

The steel cable was pulled by the huge force of the giant python, immediately stretched straight and hummed. The nine steel pillars vibrated, and the ground was trembling, but the steel pillars resisted the pulling force and remained motionless. Pull it out.

Seeing the steel hook column withstand the python's pulling force, this made Hu Jun's expression of tension finally reveal a trace of relaxation!

This time they were so prepared so well that it could be said that they had exhausted all the means. If they still couldn't get the python, then he wouldn't need to be a military assassin.

With the help of Zhenlongzhu, the pressure on the nine awakened persons was greatly reduced, and finally they had a chance to recover some strength.

Chapter 1227: Golden Elixir is as powerful as a tiger

Looking at the giant python, which is tightly fixed by the nine steel cables in the middle of the dragon pillars of Jiugen Town, although struggling, it can no longer escape the turbulent fire of the machine cannon and the Vulcan cannon.

But at this time, everyone's mood was sinking, and the powerful organ cannon projected on the scale armor, unexpectedly sparks appeared, and they bounced off, and they couldn't break the python's defense.

A sharp look flashed in Hu Jun's eyes, and he shouted in a deep voice: "Put the armor-piercing bullet!"

Click!

With a loud noise, ten rocket launchers were assembled by the soldiers and aimed at the python.

This is an armor-piercing projectile designed to break tanks. This armor-piercing projectile does not divide the distance and its power has nothing to do with the initial speed. It is most useful in close combat. The armor-piercing projectile is very powerful. It relies on the cone-shaped explosive to detonate the metal inner village to produce jet destruction. Armor, here is only a hundred meters away. This weapon is the best. It can even be worn with a steel plate more than ten centimeters thick. It is powerful.

"emission!"

With a blast, ten armor-piercing bullets were fired out, with a long flame tail, shooting towards the python.

"Wow!"

As if feeling the crisis, the giant python roared and then struggled more violently. It was only designed specifically to target snakes at the tightly dense steel thorns on the steel cable at the interface of his scales. The more it struggles, the more it gets stuck. Tight, it simply can't get rid of it.

boom.....

The armor-piercing projectile hit the giant python, and then exploded together. The strong explosive force blasted the giant body of the giant python and rushed to one side. The steel cable was pulled

and creaked, as if it were about to break, and the steel pillar was even more bursting. Shaking, the ground was cracked by the huge force.

Ouch! The python let out a terrible roar! A pair of scarlet eyes like lanterns suddenly shot out two crazy rays of light, and the giant tail swept his body suddenly straightened.

boom! A steel cable could no longer withstand the instant increase in tension and it broke.

This wire rope was pulled by Chu He, and the wire rope suddenly broke. He lost his balance and fell to the ground, looking very ugly at the half of the wire rope in his hand.

At this time, Hu Jun's expression turned pale and the steel cable broke, and it was broken!

Although the giant python looked miserable, there were six injuries on the right side of the body. The high temperature and impact from the explosion actually blasted a few pieces of the hard scale armor on its body, and bright red blood flowed out along the wound.

But anyone can see that this injury is not fatal to the python. Now it is only the scales broken, and even the flesh is not exposed. This bit of blood is basically nine for such a huge python. One of the cows.

"One more round! Set fire to the waist wound... shoot!"

Hu Jun shouted in a deep voice.

No matter what, the armor-piercing bullet is still useful, and it can already hurt the python. This is progress. If it doesn't work once, it will be twice, and if it fails twice, it will be three times. He can't kill the python if he doesn't believe it.

boom.....

Ten rockets fired again, but this time the rockets ran toward the waist. Ten armor-piercing projectiles carried everyone's expectations, drawn long tails, and shot at the python's waist wound.

Ow.....

The giant python had already been injured once. At this time, it was completely violent. It roared in anger, and then twisted abruptly, but its body was pulled by the steel cable again, and it couldn't break free. It could only watch ten. An armor-piercing bullet fell on the body.

Boom boom boom

Ten armor-piercing bullets landed on the python's waist, violently making a strong explosion. The huge flame instantly surrounded the python, and the terrifying explosive force pushed the python's body to one side again.

Ouch! The python hissed.

With the explosion, pieces of broken armor scattered all over the sky, and dozens of pieces were blown away by the powerful impact force of the armor-piercing bullets, and the exposed skin was burned by the high temperature generated by the armor-piercing bullets. Burning into darkness, the air suddenly smelled of burning flesh.

Chapter 1228: Dragon Tiger Golden Elixir does not return

At this time, the entire battlefield was quiet. Everyone saw this scene. There was a glimmer of hope in everyone's eyes. Even Hu Jun, who had been straining his face, finally showed a hint of joy.

If another shelling attack should be able to solve the giant python, the armor-piercing bullet is really useful, the instant concentrated super impact force, even if the giant python's defense is so powerful, it can't prevent this concentrated destructive power.

Ouch! The giant python was hit hard by this, and became completely violent, roaring wildly, its eyes were filled with scarlet light, and the giant tail swept to the front of its head suddenly, and then hugged its head.

Then the sturdy body suddenly swelled, and it grew bigger. The tightened steel cable made a creaking sound, and made eight deep scars on its body, as if it were sunk in the flesh.

Ouch! The giant python roared again, his whole body stretched suddenly, and then his heart was violently twisted and twisted, and his body was like a dry vine with terrible power.

Hum!

The steel cable was tight and straight with a buzzing sound, and the ground where the Dragon Pillar of Bagen Town was agitated, and it seemed to be pulled out at any time.

"Armor-breaking ejection!"

When everyone saw this scene, their expressions changed a little. Hu Jun's expression of joy disappeared, showing horror, and hurriedly shouted.

As soon as his voice fell, his face turned pale!

Bang bang bang!

There were five consecutive scalp-numbing steel cables breaking and breaking, and everyone's heart beat every time. After a few sounds, it seemed that they were about to jump to the throat and jump out of their mouths.

Sadness appeared in Hu Jun's face and eyes, and he felt that he might fail again today!

He was so fully prepared that he would fail. The Light Awakener put in nine people, and brought a weapon set specifically for giant pythons developed by the scientific research institute, the dragon cable and the dragon pillar, and even the most powerful damage. Armor bullets.

Although it succeeded in trapping the giant python, it was indeed difficult to kill it. Only after two rounds of shooting, the wire rope was broken.

The powerful anesthetic scaly spines on the dragon lock can't penetrate the giant python's scales at all. You know, this is made of the hardest chrome alloy, and it only leaves a white mark on the body. Such a strong metal was broken by him, and he felt that he couldn't help it anymore.

This is the second time they have failed. The last time they lost five Awakeners, Hu Jun was heartbroken, even if it was a high-level in Kyoto, how many Awakeners were there?

But they do need this giant python. In the end, the Science and Technology Institute designed the dragon lock and agreed to act again. However, the dragon lock requires nine awakened persons to

use it together, and Kyoto can only send three people, which can force the nearest Bian. Chau has contributed a lot.

If he failed this time, Hu Jun really didn't know how to confess to it.

Ten rockets fired at the python, but this time there was no previous record. The violently struggling python armor-piercing projectiles did not hit a few, and the shots did not have much effect, but even more aroused the python. The frenzy.

"Aw..."

Another roar came from the flames, and with the roar, three consecutive "bang-bang-bang" steel cables crumbled, and Hu Jun's last glimmer of hope disappeared from his eyes, and he was desperate.

The next moment, a huge snake head protruded from the flames, a pair of blood-red eyes with cold and merciless killing intent, staring coldly at Hu Jun and his party, the monstrous flame seemed to have no effect on him, Ren Burning its body by the fire.

The whole world was quiet, and the gaze of the snake made everyone tremble with fear, even Hu Jun, who had faced the giant python twice, was also horrified.

Whoosh!

The giant python moved and shot towards the place of the army, as fast as a sharp arrow leaving the string, only a black shadow was seen.

Chapter 1229: Retreat after second failure

Someone must ask, why did Hu Jun travel all the way to Zhongzhou to deal with a giant python, and he failed once, yet he didn't give up?

This should start from Qingfeng Daochang!

The world is coming to anomalies in the last days, animals mutate and evolve, and humans fall behind in these last days. Although there are human awakeners from time to time, the probability is very low. It is really one in a million.

Major bases are capable of studying this secret. As the emperor of the country, Kyoto not only has a strong military strength, but also has an extremely powerful scientific research force. Of course, it will not let go of this research.

Because with the increase of mutant beasts and the emergence of various powerful mutant beasts, people find that it is more and more difficult for thermal weapons to deal with various mutant beasts.

Many people realize that the increasingly powerful awakened will be the true support of human beings. With this understanding, the visually awakened will be more important.

Almost all those in power are aware that only by getting the awakening method, humans will have a large number of awakened people, and then can they resist the menacing momentum of mutant beasts.

In this situation, all parties attach great importance to the study of awakening, and it can be said that they can do everything to the extreme, and Qingfeng's master Feng Lingzi walked into the sight of Kyoto under this situation.

Feng Lingzi is the contemporary mountain lord of Longhu Mountain. In today's era when Taoism is declining and Buddha is flourishing, Longhu Mountain has also been affected. The thousand-year-old sect is also declining to the west. There are only 30 or 50 Taoists in the mountain. The mountain gate has also been developed locally. After the Taoist tourist sacred place, the incense is prosperous, and Longhu Mountain has also benefited as the inheritor. With the resources, he will practice the Taoism and spread the merits at the real mountain temple in Houshan, regardless of foreign affairs.

After the end of the world came, Feng Lingzi of course also discovered that mutant animals in the mountain attacked the mountain gate, causing the death of a large number of Longhushan staff.

Fortunately, one of the disciples "Qing Ming" awakened, and his strength greatly increased, and the disciples of Longhushan were all Taoist martial arts practitioners, and all of them were extraordinary. Only then did a few mutant beasts be killed, and everyone fortunately survived.

The awakening of Qingming not only surprised and envied all the brothers and sisters, but also made Feng Lingzi very curious that human beings could awaken like animals and become powerful.

Moreover, that night, when Feng Lingzi was practicing, he suddenly discovered that the Dragon Tiger Mountain exercise "Dragon and Tiger True Pill", which had only a little physical fitness before, had some changes. Feng Lingzi was also successful in quiet cultivation. The spiritual power is far beyond ordinary people, and it has reached the level of introspection.

He could feel a certain substance in the air slowly entering his body while practicing, and after practicing overnight, he felt that his strength had changed, his muscles and bones had become stronger, his strength had become stronger, and his physique had become better.

This change made him happy, and he hurriedly summoned his disciples to inquire about his practice. The disciples did not feel the change in their practice. They just awakened and practiced for a night, refreshed and his body became more energetic.

After listening to Feng Lingzi, he knew that his feelings were right. After the world has changed, the practice is really useful, which makes him very excited.

Because he remembered what the master told him when he was evolving, there is a treasure in Longhu Mountain that has been passed down from generation to generation, that is, there is a hidden grid under the seated statue of Zhang Tianshi in the ancestor hall, and there is a dragon and tiger gold pill hidden in it. This is the real dragon and tiger mountain. Treasure.

The master warned him that if one day he feels that his practice is different, he can feel the spirit of heaven and earth and let him take this dragon and tiger pill.

If not, when he emerges that day, he will also pass it on to the next mountain owner, which is the unforgettable heritage of each generation of Dragon Tiger Mountain!

Feng Lingzi grew up in Longhu Mountain. He was only thirty-five years old when he took over as the lord of the mountain. It had been ten years since the master left, and he had forgotten about it a long time ago.

Today, he felt the change in the technique. He suddenly remembered the master's confession. He was still sitting and rushed to the ancestor hall with his apprentices, burned incense to worship the ancestor, and then worked together to remove the statue of the ancestor. A hidden grid was revealed, and there was a dark wooden box in the hidden grid, and the box was covered with dust, and it was many years old.

Seeing this wooden box, Feng Lingzi's heart jumped wildly. He had long learned from ancient books that there is a pill called Dragon and Tiger Golden Pill in Dragon Tiger Mountain. After eating, mortals can escape from the mortal womb and achieve the foundation of supreme Dao.

When the master said, he didn't care, nor took it seriously. He didn't expect it to be true. There really is a secret path under the ancestor's portrait. Could it be that there is really a legendary pill.

Chapter 1230: Breeze leads the python

This is a thousand-year-old nanmu box with exquisite carvings. This box is absolutely worth hundreds of millions of dollars in modern times. Collectors may be crazy about it.

Feng Lingzi tremblingly cut open the wax seal of the wooden box, opened the wooden box, which was filled with a thick yellow cloth, and a fist-sized porcelain bottle was placed on it. The wooden box was extremely clean, without traces of dust and moths, visible How well protected!

The porcelain bottle is extremely delicate and moist when held in the hand. It is a piece of exquisite porcelain. The mouth of the bottle is also sealed with wax. The mouth is opened again, and a longan-sized wax pill is poured from it.

Feng Lingzi was really excited. For 30 years of cultivation, he really wanted to see the legendary Dragon and Tiger Golden Pill. This made him extremely excited. The disciples around him looked at the excitement of the master, and they didn't understand how to respond. What happened, they were even more curious as to how there was a hidden grid under the Patriarch's portrait and a wooden box.

Could it be the treasure hidden by the master, or something hidden in the original Taoism? But when I opened it and saw a porcelain bottle and wax pellets, the apprentices were a little disappointed, and they didn't understand why the master was so excited.

Feng Lingzi carefully removed the wax seal, revealing a page of gold foil again.

At this time, a strange scent had come out of the gold foil paper, and when he smelled the strange scent, Feng Lingzi only felt Fuqing and refreshing, and the surrounding disciples also stretched their heads, wanting to see what was in the master's hand. So fragrant.

Peeling off the gold foil paper, a golden pill was exposed inside, and the scent suddenly became stronger, and the whole room was filled with fragrance. All the disciples looked at the pill with surprise on their faces.

Lingfengzi's hands trembled a little. He didn't expect that what the master said was true. There really is a dragon and tiger pill. No wonder the master confessed so solemnly. No matter what, this secret must be passed on.

And what surprised him was that this golden core did not know how many years it had been hidden, yet it still maintained such a complete medicinal properties, with an amazingly strong fragrance.

"Master, what kind of medicine is this?"

When Qingfeng was close to the master, he could see the most clearly. He asked curiously, and the brothers around him were also curious.

"This is Dragon Tiger Gold Core!"

Feng Lingzi trembled.

"Dragon Tiger Golden Pill?" everyone cried out in shock, and then someone said with surprise on their faces: "Master, is this true? Isn't it in the legend?"

"Try it for real or fake!"

Feng Lingzi finally stabilized his mind, and he looked at the golden core in his hand with a firm expression.

"Master, this won't work, what if it is fake, it will cause problems?"

When Qingfeng heard this, his expression changed and hurriedly stopped him.

"Yeah! Master, this can't be tried randomly. How long has this medicine been used? If it expires, it will eat bad people!"

All the disciples all opposed.

"Well don't say it!"

Feng Lingzi waved his hand resolutely, and glanced at the golden core in his hand and said: "I believe your master will not lie to me, you protect the law for me, I take golden core, no one can not enter without calling anyone!"

The position between Taoist masters and disciples was absolutely strict. Seeing Feng Lingzi's attitude, the disciples didn't dare to speak too much, so they had to retreat to protect the Fa.

Feng Lingzi's thinking is very simple. The statue of Patriarch has not moved for nearly a hundred years, so this pill has only been hidden for a hundred years, and the master can be so solemn to the emergence of the emergence of other things but specifically confessed this time, It seems that this matter is absolutely important, and it is a secret passed by word of mouth from the Lord Longhushan.

He believes that the master will not lie to him, because the master can say that he feels that the spiritual change of the world is very similar to his current situation. He does not believe that the master is counted as today. There must be a reason, and it may be passed down from the ancestors. .

So no matter from which aspect, he must give it a try!

Feng Lingzi looked solemn, like a master of Taoism. He solemnly sent the golden pill in his hand into the entrance and slowly swallowed it into his belly. Then he closed his eyes and meditated, meditating on the true power of Taoism, thinking of Taoism mantra, and waiting quietly. .

At this moment, his mind was extremely quiet, without thinking or thinking, as if he had entered the Taoist state of purity and powerlessness, and his state of mind was improved again without life or interest.
