

DOOMSDAY SANCTUARY

Chapter 13: Turn on the system

In fact, Di Ping didn't intend to drive everyone away, but when he saw that these people didn't even have a hint of guilt or repentance, he was also cold. Such people are not worth saving, not worth paying for; Under the same roof, who knows if there will be any moths, so he drove away cruelly, and he was a little worried about this Wang Delin, this man had to have methods and methods, and had to plan and plan. The most important thing was that his heart was bad. , He didn't dare to keep such a person by his side. After killing him, he felt unable to do anything, so he had to get rid of the matter.

"Go and see if they have gone. After leaving, re-seal the cave, and then go up to the eighth floor to find me!" Di Ping turned around and ordered the four people behind him, then stepped out of the room and went upstairs. He stopped and said, "The corpse of the mutant dog will also be dealt with, so I don't need to call in other mutant animals. After your hard work, I am indeed a little tired."

At this time, Di Ping was a little disappointed, and in the fight this morning, he was already exhausted physically and mentally after killing 13 mutant dogs; at this time, he just wanted to go back and take a good bath and eat something to sleep.

"Brother Di, don't worry! Let us take care of these little things!" The fat man promised to pat his chest.

Back to the room, he got some water and simply took a shower. He was pleasantly surprised to find that the injuries on his body were all healed. The

skin on the injured area was slightly red. It seems that the energy is very strong in repairing the injuries!

After taking a bath, Di Ping found a piece of bread and gotten a bottle of water. He lay half on the sofa while eating and drinking. He didn't know what to think in his head, and his thoughts were a little messy. There was too much happening today, starting in the morning and meeting mutation The dogs dispersed and killed the mutant dogs behind. They were betrayed by their comrades and almost died on the spot. In the end, they cruelly drove these people away and cut Wang Delin's hand. Suddenly he felt a little discouraged. Shouldn't it be saved?

I took out a cigarette and lit it, took a few deep breaths, and my mood calmed down; I suddenly felt relieved that a man gave up his life for his wife and daughter. This is also a kind of greatness, and there is also a fat man Chen Gangfei. Save, Li Sheng and Lao Luo desperately guard the door, these are lovely people. There are always good people and bad people in this world, and there are still people who are worth saving by themselves.

Thinking of this, Di Ping's heart suddenly opened up, his heart regained direction, goals, and courage to fight; he figured it out, he can't control the world, he can only control his relatives, his friends, and his like-minded people. People, do others have anything to do with him?

"By the way, you can turn on the system!" Di Ping, who had figured it out, suddenly remembered that he had collected enough crystal nuclei, and he had exceeded the amount. Isn't it a good time to turn it on! Throwing away the cigarette butt, he suddenly sat up.

"Di...find the crystal nucleus, whether the system is turned on if the system opening conditions are met!" When Di Ping took the total of 14 crystal nuclei he had obtained, the unique voice of the system immediately rang in his mind.

"Turn on!" Di Ping muttered in excitement.

"Di...The system is turning on, 1%...2%...100%, the system is successfully turned on." The system made a beep, Di Ping only saw the sudden disappearance of five crystal nuclei in his hand, and then started thinking about it. Read the article.

"Di...The system is successfully activated, and a legendary recruiting ticket will be rewarded. Please the host will start hero recruitment as soon as possible."

"It's over?" Di Ping was a little speechless, just read a note and opened it, and there was no flash of light, and there was no golden light. It was not domineering at all, so low-key, was it totally different from movie novels?

Di Ping complained a bit, but since the system said it was turned on, he also said that he would grow up as soon as possible.

"System!" Di Ping's heart moved, and a virtual interface panel appeared in front of him. He had tried this before. This system call can open the system operation interface whether he thought it in his heart or said it.

Sure enough, there has been a change in the system interface. Everything that was originally gloomy now has two lights up, and it keeps flickering. These two are a Western-style castle and the other is a manor. The entire operation interface is exactly the same as in the game, but the functions are different. Know the difference.

Click to open the castle, an aperture on the castle icon surging, a few seconds later the icon is displayed in bright color, it seems that the opening is successful.

"The castle was opened successfully, and the title of the host was changed to the lord of the castle"

The sound of the system sounded again at the right time, Di Ping didn't care about the title change, but wanted to go in as soon as possible to see what the castle was like, so he clicked on the icon and was ready to go in and see what.

Di Ping only felt that his eyes had changed. A 3D model of a western castle was presented in front of him. The castle was fully functional, with walls, squares, halls, towers, accommodation buildings, and meeting rooms. There is a study room, a kitchen, and stables. He is so happy that this is the residence of people with status and status. The so-called villas in China are compared to the grass chicken and the phoenix. There is no comparison at all.

It would be great to live in such a castle! Di Ping thought this way.

"Choose a suitable place to present the castle. The castle is the main hub of the status symbol of the Lord of Asylum." Di Ping saw a line under the three-dimensional picture, so he read it carefully.

After reading this sentence, Di Ping suddenly stayed for a while and then was ecstatic. It turns out that this villa can still show the real thing, and the desire to live in the castle can be realized. Press the excited mood, study the castle carefully, and find There is nothing special about this castle, and the specific function is not explained. There is only this text, and I don't know what it means. Maybe everything has to be realized and explored one by one.

After watching the castle, Di Ping shifted his gaze to another icon that kept flashing, which was the manor. This manor is a place to collect resources in the game. I don't know what function it is here, so he clicked with excitement. The icon, the icon also flashed in a halo immediately, a few seconds later, the icon became brighter and the flashing stopped.

"Di...The manor is opened, and the initial resources are rewarded one hundred each. Please specify a place to realize the manor or bind it to the real building as soon as possible."

A little icon, a flash of light, and an operation box immediately appeared in front of Di Pian, with several items displayed on it, and idle workers: 0 on the top, with a bar of content on it.

Food: Storage: 1001000 Production: 0 Upgrade

Timber: Storage: 1001000 Production: 0 Upgrade

Iron: Storage: 1001000 Production: 0 Upgrade

Crystal: Storage: 1001000 Production: 0 Upgrade

Mithril: Storage: 1001000 Output: 0 Upgrade

There are 100 copies of the initial resources in the manor, and it seems that there is still a 1000-capacity space, but I don't know where this space is, and I have no binding and realization, then this space can only be inside the system, this mysterious The system may have more functions waiting to be discovered.

At this time, Di Ping noticed that there was a craftsman recruitment button at the bottom. He carefully clicked it to see if it could be recruited. Now, when he clicked Kaili, two options were displayed, one is system craftsman recruitment, the other is real craftsman recruitment; Di I think that this system does not completely use the game content, it may be combined with reality according to the most advantageous things.

I don't know where this system came from, but he has no way of knowing it, and can only accept it. Now he can only use this system to grow; besides, this thing has been beneficial to him so far, regardless of what he will do in the future. How?

Shaking his head to clear up the messy thoughts, Di Ping looked at the third icon, which is the icon of the tavern. He knew that this feature in the game was turned on before the game was really started. The main function of the tavern was hero recruitment and promotion, so What he is looking forward to most is the opening of this function.

But after the castle and the manor were opened, the tavern still had a gray icon, and the tavern could be opened after the game started these two items. Why can't it be opened now that the conditions are met? Di Ping was extremely disappointed and stamped on the icon. Down.

"Di... the tavern failed to open, the opening conditions are required, the castle manor must be realized before the tavern can be opened!"

At this time, the system's voice suddenly sounded in Di Ping's mind.

"Originally want to manifest the castle and the manor?" Di Ping knew why at this time, but it is not suitable for the realization now. It seems that he has to determine his goal. The building in the system must be manifested to show the ability, and it must be established in Where to build a base is very important.

"Beep..." Suddenly knocking on the door interrupted Di Ping's thoughts.

Di Ping heard the knock on the door and knew that it was the fat guy who had come up, so he quit the system. Anyway, it was useless to be greedy now.

Looking out from the cat's eye, it turned out that they were a group of fat people, all sweaty and exhausted, and they seemed to be very tired.

"Come in! Everyone has worked hard!" Di Ping smiled and opened the door, welcoming everyone in.

"God Die said that it's hard work, you have a life-saving grace for us, what is it to do this job? It's okay to have my life?" The fat man looked grateful, his eyes were small, and his happy eyes are almost out of sight. .

"Yeah! What are we doing little things!" The man Di Ping finally rescued with the middle-aged woman seemed to have recovered at this time, and looked at Di Ping gratefully while wiping his sweat.

Di Ping also has a good view of this middle-aged man. It is really rare for people to reach out to you in times of crisis. They blocked themselves and others at the door without seeing those people in danger.

Looking at the people in a room of life and death, especially these people looking at themselves with almost respectful eyes, Di Ping suddenly felt that all the efforts were worthwhile, and his injuries were not in vain, and his heart was moved for a while. Lightly punched the fat man's shoulders, "Okay, you are all good brothers, you are welcome in the future." After saying that, his face sank and said, "Then you guys don't want to put your life-saving grace on your lips anyway, you really don't treat me as a brother Up"

After finishing talking, Di Ping laughed first, and the fat man also touched his head and laughed, nodding his head again and again.

"Hey! Good! It's all about Di Ge!"

Standing behind the fat man Chen Gang, Li Sheng also mentioned the corner of his mouth. He looked at Di Ping more eagerly, and Lao Luo also burst into tears.

"Okay! Okay! Let's not be sensational, we are all fellow travellers seeking survival in the last days! Come and sit down!" Di Ping laughed and let everyone sit down. He liked the atmosphere very much.
