## Doomsday 44

"Di...Discover the soul energy and gain 10 points of soul energy!"

At this time, the heart of the wild boar, whose head was broken in half, stopped beating, and a group of dark green table tennis-sized soul energy rose from the wild boar's carcass, and then turned into a stream of light and rushed into Di Ping's body. The system prompt sounded again, but this This time is different from the past, energy does not strengthen itself, but is stored.

At this time, Di Ping didn't check it carefully. The other two were injured and fell to the ground. They haven't received soul energy yet. Obviously the two wild boars are not dead yet. Di Ping also felt very tired during this battle. When is the time to rest?

From the two halves of the wild boar's head, I found a nail-sized crystal nucleus, and then walked towards the other two wild boars. Sure enough, the hearts of these two wild boars were still beating. Di Ping was not polite. The two crystal nuclei got in hand again, and after two beeps, he harvested 20 points of energy again, now he has 30 points of soul energy, but he still doesn't know how to use it, wait for a safe place to take a look!

After a fight just now, this big movement might have mutant animals coming over. This place is not a long-term place. Di Ping hurried away after tidying up. He was right. Waiting for him to leave for five or six minutes, he was bloody. Several mutant dogs from here unexpectedly gathered.

After walking in for another kilometer, Di Ping found a van parked on the side of the road, took a taxi and hid in the door of the car, ready to take a rest. Although he didn't suffer much damage from the battle just now, his mind was not so bad. It consumes a lot of energy, and also consumes a lot of physical strength. If you don't find a place to rest, it will be difficult to deal with danger again.

I took out the water I brought from my small backpack, drank a few sips, and lay halfway in the car to rest, thinking about the gains and losses of this battle. This is a habit that Di Ping has cultivated for many years. Every night before going to bed, he will summarize the day. Gains and losses, so that he can grow faster, today's battle makes him feel that he is still a lot less aware of fighting, both in strength and speed, far surpass these wild boars, but he was embarrassed by the three wild boars. It took a lot of energy to be able to kill, which is abnormal.

During the battle, he realized the power of the skills, and the combined skills were so effective when applied. The wild boar, which could not be cut by the sword, had a hard scalp, but it was divided into two halves with the next sword. It can be seen that the skill is used properly and the effect will be greater. Combat effectiveness.

The collision skill in the battle just now was very powerful, and I didn't use it well. After the first contribution, a pause made him lose the initiative. If he didn't froze, then the collision skill would definitely damage a wild boar, the last one. Yu Yi can easily solve it by himself. It seems that his own experience is still too little, and his reaction is obviously unable to keep up; and he is not enough in the use of strength. A lot of time is unable to be freely retractable, and a lot of strength is wasted, resulting in physical loss.

The summary of this meeting allowed Di Ping to understand more of his mistakes, and slowly improved his combat awareness. With more and more combat experience and continuous summary and learning, he believed that he would definitely perform better next time. Better, it must get better.

The outside of the car was very quiet, it seemed that there were no insect calls. I took a rest for half an hour, drank half a bottle of water, and ate two hams and a hillbilly marinated egg. I felt that my strength was almost restored, and I got out of the car. Continue to walk towards the city.

Tomorrow he is going to the small gathering place to rescue more than a thousand people trapped in the underground shopping mall. If he wants to go down the road, he has to go to the city first, and to the east along the outer ring of the city, so explore more The road will be easier tomorrow.

I walked another kilometer. I don't know if it's good luck or bad luck. I didn't encounter a mutant animal. The whole world was quiet and terrifying. Di Ping felt more irritable as he walked. It seemed that he was the only one walking in the whole world. In the dense grassy forest.

The sun has already shifted to the west, and the time is almost four o'clock. Di Ping thought about it and prepared to go back. Today, he has walked three or four kilometers. After walking for a while, the sky may be dark. In the world of beasts, although he is already a professional warrior, he still has to be careful before he is invincible.
