

Doomsday 48

Chapter 48: Surprised by visitors from outside

"I was called by the master, and after agreeing to the contract, I fainted, and came to the master when I woke up. I don't know how I came here!"

What disappointed Di Ping was that Gina also shook her head in confusion, as if she didn't know the process of coming here.

"but!"

At this moment, Gina seemed to suddenly remember something.

"But what?"

Di Ping Yixi thought Gina would think of something and hurriedly asked.

"However, I seem to have learned a lot in the faint, including the language of the master, and some skills, which I haven't learned when I was in the academy!"

Gina was confused and seemed to think about something at first, then suddenly said excitedly.

Di Ping slapped his head with black lines. It seems that it is impossible to get too much information from Gina, but one thing can be proved, that is, these people are indeed living humans, but humans on this different planet. I don't know how the system brought these people to the earth, and then became their own recruiting heroes, but there is no need to know this, as long as these people can help themselves.

In the subsequent exchanges, Di Ping knew what kind of planet Thaad is like. This planet also has technology like the earth. There are cars and trains on the ground, planes in the sky, and satellites in

the sky. It seems that technology is stronger than the earth. A lot of things have been produced, and preliminary development of near-Earth planets has begun, but the earth believes that it will develop into near-Earth planets in a few decades, so the difference is not too far away. The only difference is that this planet has magic And martial arts, and has become an indispensable part of people.

The Magic Martial Arts Academy is almost the same as the ordinary schools on the earth. The cultural subjects are no longer the main subjects. The main subjects are the professors of various magic and martial arts. The subjects such as culture can only be regarded as minor subjects, and advanced magicians or A martial artist is even more powerful to the point of flying away, so technology is only an auxiliary means, and the continuous development of human potential is what everyone pursues.

On this planet, magicians and martial artists are even more distinguished and superior, and the supreme power of the planet is in the hands of these people. Everyone wants to become a great magician or martial artist, and Gina has just developed his potential. , Became a magician respected by everyone.

She was originally an orphan, but once confirmed that she had unlocked the potential of a D-level mage, she entered the college to learn magic knowledge.

Although D-level is not high, it is also very extraordinary. It is extremely difficult to know that the unlocking of potential can be extremely difficult. That is to say, only one person in 10,000 people may reach the unlocking of potential. It is conceivable how rare it is to be a D-level. It's very common for the envious object to appear.

Just one year after entering school, Gina learned the most basic knowledge of magic, learned elementary meditation, and inherited her first skill, fireball, happily went into the mountains to try out hunting animals, but the team didn't know. The tall and thick little boy, ventured deep into the place where mutant beasts were rampant, encountered a high-level alien beast, and fled dead, and she was lucky enough to hide in a cave and escaped, but she was left alone in this mountain. There are countless powerful mutant beasts inside, and there are countless powerful mutant beasts outside.

Suddenly, a voice told her that as long as she was a follower of a person, she could not only survive but also learn more advanced knowledge and enter a higher level of cultivator.

She immediately became happy, knowing that being a follower of some strong people on this planet is not only a shame, but a very glorious thing, because many advanced things cannot be learned in the academy, and the powerful skills of good meditation are all in the hands of some big families, ordinary people don't even want to learn it. Wouldn't she be happy to be a follower of some powerful families and have the opportunity to learn this knowledge?

So she happily agreed. After agreeing, she suddenly fell into a coma and came here again when she woke up. At the same time, she did learn some skills and some unlearned knowledge.

What she didn't know was that the system was sleeping while injecting some knowledge into her. At the same time, she also subtly joined Di Ping's absolute service. Although their planets are the same, once they become followers of others, they cannot betray them in their lifetime. It is also miserable. Following the contract itself has a soul mark to prevent betrayal. It is just that the system has injected more domineering. Once it violates the waiting, there is only death.

I learned from the chat that Gina was just nineteen years old, just like many girls on the planet who just went to college.

It's just that Di Ping rolled his eyes when he heard Gina's age, and said in his heart that this is too early to develop, right? Looking at Gina's chest, straight legs and mature and charming face, she looks like a 19-year-old. It's simple and deceptive. If you think it's possible for a Sad star woman to mature early! It can only be explained in this way.

The two chatted for nearly two hours before Di Ping told Barton to arrange Gina to live on the third floor. There is only one tenant on the third floor and one new female mage Gina, and one is the barbarian Boogie.

On the third floor, Di Ping decided to only arrange professionals or senior management of the base. Now there are few people in the base and there is no clear division of labor. Therefore, he asked Li Sheng and Fatty to live on the second floor as well. With clear responsibilities, the third floor has to be open, which is also a kind of welfare!
