

Doomsday 871

Chapter 871: Escape to the heavens and return home

Di Ping didn't know the idea of the mutant King Kong. At this time, he was fighting between heaven and man, whether he stayed and found a chance to grab the fruit, or just left.

In the end, he gritted his teeth and looked at the red and purple fruit on the island with a trace in his eyes, determined to grab this fruit in his hand.

Talent determines his future achievements, and he is only an A-level talent now. I don't know when he can save enough to buy an S-level potential boosting potion, which is full of 30,000 crystal coins. Now he is tired of 10,000 and he can get it. He was willing to give up the opportunity in front of him.

In other words, the courageous will starve to death and the timid will die. It is also said that people have no night for wealth or wealth, horses have no night and grass and are not fat, or in other words, people who are dead and birds will not die for thousands of years.

Life still has to work hard, there will never be a chance if he doesn't fight, and he is confident that as long as the design is done, there will be no problems at all.

Seeing the two giant monsters entangled together, he pondered for a moment, then turned around and went downstairs. He couldn't wait any longer. If the two giant beasts died or both were injured, King Kong would definitely take action. No.

And from his point of view, the two monsters were exhausted now, and they were about to hang. He didn't know what was going on with this King Kong, and he was still waiting.

He didn't understand that this King Kong had been injured before, and now he was afraid of going into the water, not sure that the two monster monsters died, he would not be easy to get into the water.

King Kong couldn't get down, then his opportunity came, now it's a fight, hope King Kong didn't find him.

Di Ping quietly went downstairs, and under the cover of weeds, he quietly walked down the river from a huge willow tree that had been cut off.

The two giant beasts were not fighting, and they started to confront each other. The river quickly returned, and the water level rose again to a position less than one meter from the shore, and he pulled a tree section covered with leaves and branches to block his body and followed. The water slowly diverged towards the island.

The huge bodies of the two monsters floated on the water like two hills, shaking from time to time, as if they didn't notice Di Ping's small movements.

Through the leaves, he also saw King Kong who was still sitting on the top of the building looking at this side gnawing his legs, and he didn't seem to notice him.

Ten meters, twenty meters, and fifty meters, he sneaked silently, blocking King Kong's sight under the cover of branches, and the two giant beasts that had been lingering and panting didn't seem to notice anyone sneaking over.

If it weren't for seeing the giant python's body wiggling from time to time, Di Ping would have thought they were already dead.

The river bank where he went into the water was only two hundred meters away from the island. If it were not for his physical strength, he would have to be tired to swim at his swimming level for two hundred meters. But now he has not felt tired after half of the swim, and he still leaned on his feet. Treading underwater, he didn't dare to swim with his hands at all, it was too much movement.

With his eyes fixed on the flaming red fruit on the island, Di Ping was a little smug when he smelled the fragrant smell.

But in the next second, his face changed drastically, because he saw that King Kong on the top of the building had stood up, and it was staring at this side closely, as if it had discovered something.

Could it be that he found me?

Di Ping glanced, his face was a little ugly, and he thought to himself.

King Kong stood on the top of the building, with a ***** animal leg in his hand. His small eyes were half-opened and half-closed. At this time, they opened round, staring at the river, and his mouth was chewing slowly. Not moving.

"Fuck it, this King Kong is really like a monkey!"

Di Ping cursed secretly, didn't dare to look more, and started to slow down his movements more slowly, trying to let the water take him away.

Chapter 872: Hard life in the last days

There are still fifty meters away from the island, just a little time. Then he can get close to the island, pick the fruit by himself, and leave. Thinking about him, he feels that the arrangement is seamless, and King Kong can't help it no matter how smart it is.

Only at this time, he was beating a drum in his heart, and King Kong stared at this place, his eyes shining brightly when he opened and closed.

King Kong looked at the water with doubts. A small branch in the water was slowly heading towards the island. This made King Kong who was nervous about everything on the island instantly alert.

Although it is not as smart as humans, the natural breath perception and judgment of animals is far from being achieved by humans.

Fifteen or six minutes later, Di Ping finally slowly approached the island under the gaze of Mutant King Kong.

But as soon as he hit the island, King Kong suddenly stood up straight, his half-squinted eyes suddenly opened, and the whole body was full of energy, and the fleshy legs in his hands had fallen to the ground.

"Wow!"

It roared angrily, jumped down from the small building, and rushed straight here.

It was 100% sure that there was a problem in it. Someone grabbed the fruit from under its nose, even if he was afraid of the giant pythons and monsters in the water, he would have to rush down to grab the fruit.

Luo Guoguo exuded an aura of temptation to him at this moment, and he couldn't bear it anymore.

There was a roar, and Di Ping was shocked. He looked up. When he saw King Kong's huge body leaping from the top of the building, he knew it was broken.

He quickly glanced at the python and the monster, and found that they were not moving, he bit! Now that the arrow was on the string, he had to send his hand, slammed his hands on the ground, and rushed directly from the water towards the small tree on the island.

"Om!"

As soon as Di Ping went ashore, a terrifying coercion pressed him, slowing down his rushing action. This coercion was like the substance, and the whole person seemed to hit a wall of air and flew backwards abruptly. Go out and plunge into the water again.

"puff!"

Di Ping spouted blood, looked at the island in horror, and did not believe what happened to him.

"What is going on, why is there such a powerful pressure?"

Di Ping looked at the island in a daze.

At this time, King Kong had already crashed to the ground, falling from the sky like a big mountain, and the ground shook violently. As soon as it landed with its hands and feet, it rushed toward this side quickly. The distance of a few hundred meters was no more than tens of seconds. That's it.

"No way!"

Di Ping had some hesitation in his eyes and looked at Xiaodao with some fear. He was a little afraid of the terrifying pressure that suddenly appeared just now.

Suddenly his eyes moved, and he remembered seeing the waves hitting this small island just now, as if it was hindered by an invisible force, and the waves immediately became calm. Could it be said that this pressure caused it?

It is very possible that after experiencing the horror of coercion, Di Ping couldn't help but believe that all this was caused by the coercion that suddenly appeared just now. Where did the coercion come from?

The existence of this coercion is really hard to rush up, it is simply too strong, stronger than the feeling that the mutant Komodo gave him, and even more terrifying.

"what happened?"

While Di Ping was puzzled, the island changed again. He was surprised to find that the huge white jade skeleton surrounding the diluo fruit was rapidly turning gray, and energy was gushing from it, rushing towards the diluo fruit. , An energy vortex was formed around the fruit, and the skeleton quickly went from crystal clear to gray, and then it seemed to lose its support and instantly decayed and disintegrated, turned into dust, and drifted away with the wind.

Suddenly, "Diluo Fruit" seemed to have absorbed enough energy and light, and a colorful halo lit up from the ground Luo fruit, lingering the entire Earth Luo fruit tree, as if there was a world flashing in it; originally purple The red Diluo fruit began to change color, rapidly changing from purple to gray, then black, and as the color turned black, the light gradually disappeared, the leaves fell in pieces, the branches began to wither, and the original overflowing aroma seemed to be Suddenly shrinking, and disappearing without a trace can not be smelled.

The ground Luo fruit is ripe?

Di Ping watched this scene in surprise, and the next moment was even more surprising. At the moment when the skeleton changed color, he felt the pressure on his body lightened. The previous feeling of being suppressed disappeared.

"The pressure is gone? Is it related to this skeleton?"

With surprise on Di Ping's face, he glanced at the dust scattered on the ground, and suddenly thought in his heart.

"try again!"

The mutant King Kong is like a giant beast rushing in the wild, rolling over here, the speed is amazing, he knows that he has no time to delay, he casually glanced hard, and the whole person rushed to the island again.

"It really disappeared!"

Biting his head and rushing ashore, Di Ping didn't feel the terrifying pressure before. At this moment, he knew that the pressure just now

At a distance of more than 30 meters, he directly activated the collision skill as soon as he landed ashore, and his body appeared ten meters in front of the small tree in a flash, and then he moved his body away, snaked and started, and his body shot past like an arrow.

When King Kong rushed to the river, Di Ping had already rushed to the "Diluo Fruit", and he stretched out excitedly to grab the fruit on the tree.

"Oh oh..."

King Kong had already reached the shore and saw Di Ping stretch out his hand to grab the fruit. It roared in anger, then his body suddenly rose into the air, jumped several tens of meters, and jumped towards the river.

Chapter 873: Safe return to see the beauty

boom.....

King Kong leaped over thirty to forty meters in a huge space, smashing straight into the water, like a heavy artillery roar, stirring up a huge water column ten meters high, and then layers of huge waves swept all around.

Di Ping's face changed drastically, and he looked back at the King Kong smashed into the water in horror. It was no more than a hundred meters away from here. How could his speed in the water be faster than King Kong, this was dangerous.

How to do? Can the fruit be taken, or should I run?

Di Ping's thoughts turned a hundred times, his face was cloudy and sunny, watching the King Kong who stood up from the water and pounced here, and the four or five meters high wave, he suddenly gritted his teeth and looked at the darkening earth fruit. Shot.

"Wow..."

King Kong watched Di Ping grabbing Di Luo Guo, it roared in anger, and the whole world trembled with the roar. Di Ping also shook his hand. The distance was too close, and he felt a little bit of ears. Ma, but he just had a meal and stretched out his hand to Di Luoguo again.

When Di Ping grabbed the real thing, a jujube-sized thing as cold as a bead of ice, he knew it was successful. There was a burst of excitement in his heart and joy on his face.

It's just that when he succeeded, a huge wave had already come, swept him over the island and rushed into the river.

A stench of river water rushed into his nose and mouth, causing Di Ping, who was originally excited, to instantly calm down. Just now, just staring at the fruit nervously, the excitement paused for a while, and the giant wave rushed over.

However, it was just what he thought. This wave did a good job for him. Di Ping put Di Luo Guo into his backpack, and dived towards the river bank with his hands and feet, with full strength, and he did not dare to paddle desperately under the water. Show your head, for fear of being discovered by King Kong.

boom.....

Suddenly there was a loud noise in the water, and the sound spread through the water. It was even more violent. Di Ping's ears buzzed, his head was hit by a heavy hammer, and his chest became stuffy and almost fainted.

The intense dizziness caused Di Ping to open his mouth to breathe. A mouthful of fishy river water poured into his mouth, causing him to cough violently, and he had to rush out from the bottom of the river.

boom.....

As soon as he was exposed, a huge wave rushed over and beat him two or three meters away.

Di Ping hurriedly wiped the river water on his face. Only then did he see that he had already dived thirty or forty meters away. He hurriedly looked back to see if King Kong had caught up.

It's just that he was stunned when he turned his head!

King Kong is fighting with a giant python at this time. This giant python is the one who fought with the monster just now. At this time, the giant python seems to be crazy, fighting with the King Kong firmly, and the King Kong brandishing. Holding his hands, he kept blocking the python's entanglement.

The giant python is very miserable now. There are wounds from fighting with monsters all over the body. The most terrifying thing is that the waist is half exposed, and the two huge wounds are deep and bones. It is about to bite off its waist. The cracked muscles turned pale under the river water washing, looking seeps.

what happened?

Isn't the giant python stalemate with the monster and weak?

Why did you suddenly come back to life and fight with King Kong?

What about that monster?

Di Ping looked around and saw the body of a huge monster undulating in the water, being swept up by a huge wave and drifting towards him, seeing that he was only ten or twenty meters away from him.

Suddenly he looked at the huge monster body with a fire burst out of his eyes. He saw that the monster was already motionless, the big eyes of the fists were white, and the huge mouth was staggered at a twisted angle, like The bone broke.

He can miss such an opportunity. He doesn't know what level of monster this is, but it is definitely at the same level as King Kong. It's a pity not to take a treasure?

At this time Di Ping had forgotten to run, and his heart moved again!

Sometimes people's desires are really endless. Just after getting the fruit, Di Ping greedily stares at this unknown monster.

Chapter 874: Thoughts triggered by blood

King Kong was also mad, the fruit was gone, and the human was taken away. It wanted to rush over and slap this human to death, but the giant python usually wrestled with himself when he was crazy, making him inseparable.

If it is on the bank, he uses both hands and feet, this giant python is not its opponent at all, and standing in the water of the shoulder at this time, it can't provide strength at all, and the mud at the bottom of the river will sink when it moves, and it can't support him. Power, the reaction fell in the fight.

The giant python's eyes were bloodshot, and the original dark yellow eyes were blood-red at this time. It opened its huge mouth like lightning and threw at King Kong from time to time, while King Kong's fists waved like a wheel, blocking its biting again and again. It was stirred and boiled, and there were waves after another.

Di Ping looked at the giant python that was about to die, but suddenly broke out with amazing fighting power. He said that snakes have hard temperaments, even if their heads are broken, they can live for a long time, especially pythons, sometimes their heads fall away. It can also live and entangle prey, which shows how strong its vitality is.

He had seen snakes cut in half from the waist before, and with the head half broken, he could still swim in the water. It looked terrifying. Since then, he was very afraid of snakes and never caught snakes again.

King Kong is also relatively depressed now, being entangled by the giant python and can't get out of it. The reason why the giant python attacks King Kong is that it has completely fallen into the final madness on the verge of death. It is more sensitive to the breath of King Kong because King Kong came to ***** it before. The fruit was repelled by it, and now the Di Luo fruit breath disappeared and the King Kong appeared. It thought that King Kong had snatched the fruit, so it let

go of the monster and rose up to attack King Kong, but instead let go of Di Ping, who had actually got the fruit.

However, Di Ping also understands that this is the last struggle of the giant python. Now its lower body can no longer be used, unable to entangle the King Kong, and can not use the powerful strike power of the snake tail. It will only be a matter of time before the biggest weapon is lost. .

Di Ping didn't dare to neglect. Once King Kong got away, he was in danger. Without seeing King Kong roaring again and again, the angry flames in those golden eyes could burn Di Ping to death.

He waved his arm and swam toward the monster, and just one wave after another pushed the monster's body in this direction, just a few meters away.

Di Ping checked the space inside the backpack. There were still a lot of mutated animal carcasses inside. There was not enough space. He threw three giant mutated wild horses and moved towards the monster. The monster disappeared on the water.

It's done!

He was overjoyed. He immediately turned and swam towards the river bank without daring to delay for a moment. He has a powerful body. His arms are waving like wheels. His speed is aroused, like a swimming fish, rowing on the small surface, arousing one. Dao Langhua, if he is asked to participate in a swimming competition now, he will be the first to take the first place.

"Wow!"

Seeing Di Ping, who was swimming far away fast, King Kong let out an angry roar, smashed the head of the mutant giant python that was coming up with a punch, then jumped out of the water, leaped forward five or six meters away, towards Di Ping pounced.

However, in the next moment, the python body turned over in the water and entangled it again, pressing it in the water so that it could not jump.

"Wow!"

Di Ping was only thirty meters away from the shore. King Kong was like a cat with exploded fur. He roared in anger. Suddenly he jumped high, raised two huge palms above his head, and then suddenly fell down. Smash, that huge door-like palm slammed straight down like a mountain, hitting the water.

boom.....

There was a loud noise, the entire space seemed to stagnate, and then half of the river within 30 meters suddenly collapsed, revealing the dark mud of the river bottom, and then it seemed to be attacked by a nuclear bomb and exploded, provoking a terrifying giant. Lang, this huge wave is like a fierce beast from the wild and pounces towards Di Ping.

He was about to dock, and Di Ping, who was swimming desperately, suddenly felt a strong pressure coming from behind him. He suddenly looked back, only one glance at his face pale in fright, a monster with boundless might. The giant wave rushed towards him. The giant wave seemed to be independent and apart from the river. It actually plowed the surface of the water into a five-meter-wide deep ditch. It was too terrifying. Di Ping could feel the powerful energy in it, if it was hit He is either dead or injured.

"Fight!"

There is no rush to run anymore, Di Ping's face changed drastically, but he knew that he had no chance to go ashore, and that the waves would not give him time. He had nowhere to focus and could not activate the collision skills in the water, and now he had to fight hard.

"Crazy Wave Knife Technique·Wind Surge"

Di Ping suddenly took out the sword, and swung his strongest knife technique, the third style of the Kuang-wave knife, towards the giant waves. Although he learned this third style, he could cut a hundred knives in an instant, but he hadn't learned the third style. Layers of strength, but now he can only use this trick, because this is his strongest one.

"cut!"

With a violent shout, he chopped out a hundred knives in an instant, and the knives were in the air. The entire front was enveloped by mountains of knives, and the boundless wave of knives slashed towards the behemoth that came.

Boom boom boom

The blade light collided with the giant beast and let out a huge roar. Pieces of sword light slashed at the giant beast, and masses of cold mist erupted, like the pace of the giant beast that was stopped by the sword light. Di Ping's eyes burst with surprise, but his face turned pale in the next instant. .

The boundless blades shattered between the sky and the earth, and the giant beast's advancing pace was just a roar and rushed towards him again. He only came to protect the important parts after anxious pair, and then felt his body shake, a powerful impact. Hit him hard.

boom!

Di Ping was hit face-to-face by the giant beast, just like being hit by a high-speed train. The whole person flew out of the water, knocked out more than 20 meters and hit the water lightly.

puff!

A mouthful of blood spurted out, and he felt as if his whole body fell apart, his arms were about to break, and his chest was stuffy.

"It's terrifying! I wound myself with just one blow. If it wasn't for the wave of blades to slow down the momentum, then I wouldn't have survived so easily now!"

Di Ping looked at King Kong in horror, he almost died here.

However, when he saw his location clearly, he suddenly showed a hint of joy. It turned out that King Kong's blow directly sent him to the bank, and he could reach the river bank as long as he stretched out his hand.

Di Ping could feel the anger of King Kong. He didn't dare to neglect, and resisted the pain. He grabbed the river bank with both hands, and rushed out of the water directly onto the shore, then looked back at King Kong with a mocking face, and stretched out. One finger, then turned and ran.

It's just that he completely angered King Kong, as if he was humiliated. It slapped its chest fiercely, raised its head and screamed, its body suddenly grew in circles, and its head was two meters high, originally reaching the water level of its shoulders. This time it was only below his chest.

I saw that its pair of telephone pole-thin arms became thick and thick. It grabbed the lower jaw of the giant python that was leaping over, and suddenly grabbed the upper jaw with the other hand. Then, with its strong arms, the giant python was vigorously swept away. It was torn in half from its mouth, and blood spurted, spraying it all over its face.

Ooh...

Holding the softened giant python, King Kong screamed wildly, and his voice shook the sky with a sonorous voice. For a time, a wild and domineering aura soared to the sky. A fierce murderous aura rushed towards Di Ping, who was shaken back three times. After four steps to stand still, he pressed the tingling ears, his eyes flashed with horror and a trace of fear.

This King Kong is too strong!

Chapter 875: Who knows what a woman thinks

King Kong is too terrible. At this time, Di Ping felt that it was even more violent and terrifying than the King Kong shown in the movie. Although the size may not be as exaggerated as in the movie, the power is really like a grumpy temper.

King Kong gasped hard, with pride and anger in his eyes, and looked at Di Ping with a pair of golden eyes, which meant that it was a challenge to Di Ping to stop him from running.

Now the giant python is also dead, and there is no block, Di Ping will face King Kong directly, he dare to stay longer, and turn around without any spine.

He won't fight this violent King Kong stupidly, he still hasn't lived enough?

King Kong was first taken aback when he saw Di Ping who had turned and fled, and then a crazy killing intent appeared in his eyes. It slapped the water with anger, splashing splashes, and then threw the python abruptly, and his body jumped suddenly. Got up and rushed towards this side.

It's just that the bottom of the pond is full of silt. Although King Kong has great strength, it can't jump very high. It jumps only one meter high from the surface of the water, and falls in the water only five or six meters away, causing layers of waves.

At this time, Di Ping's figure had disappeared on the river bank. King Kong seemed to know that it was useless, and it began to swim its arms towards the other bank of the river, very fast, faster than Di Ping.

Fortunately, Di Ping was not waiting in the water just now, otherwise he would have to catch him up.

However, after waiting for ten seconds, King Kong jumped onto the river bank, and Di Ping had already disappeared from the trail. As soon as he got ashore, he forcibly endured the pain of his body, fully energized, and ran the snake to its limit. It was enough for him to run a few hundred meters, and he turned around the building and ran north.

Ooh...

To say that a beast is a beast, although King Kong is very smart, it loses its mind as soon as it becomes angry. It starts to smash everything around in anger. For a time, the big tree flies across, the street lamp breaks, and it grabs a street lamp pole. Crazy sweeping everything in front of me.

Di Ping listened to the rumbling sound behind him as he ran, his face changed, and his steps accelerated. The more angry the King Kong, the better, the longer he hits, the better, and he can run farther.

At this moment, he still has a period of fear in his heart. Today is really lucky. All the opportunities are on his side. If you miss a link today, then you may not want to run out so easily. If you are not greedy in the end, you too Will not be so badly injured.

King Kong smashed angrily for a while, seeming to think of something, and suddenly jumped towards the building across the street, jumped five or six meters high, climbed on the building, and then climbed up to the top of the building with his hands and feet.

The gorilla showed a natural climbing ability at this time, and the speed was extremely fast. The building was so easy to climb under it, and it would climb to the top in a short while, knowing that this is a thirty-story building.

As soon as it climbed to the top of the building, it stood on the top of the building and began to look around, as if it wanted to find the human who stole the earth fruit. At this time, the wisdom displayed by the King Kong was not low.

But everything will work!

Di Ping is not stupid! He did not run in the middle of the road, but leaned on the side of the street. His body was blocked by the floor on the side of the street and the tall trees without the street. King Kong couldn't see it even when he stood twenty stories higher. Di Ping.

The golden eyes of King Kong opened and closed, and their eyes scanned everything in the city sharply, as if they were a king, blowing by the wind, raising its thick hair high, unspeakably chic, but at this time there is no Seen by the same kind or by humans.

After watching it for two minutes, King Kong was disappointed. It suddenly fisted a ten-meter-high condensation tower next to it and flew out, and then let out a loud roar.

The roar shook the wild, surging over the entire silent city. At this moment, the birds were silent, the thousands of insects were silent, and the beasts fell on the ground, as if the whole world was surrendered under its violent momentum.

And Di Ping had already run three or four kilometers away. Hearing the roar, he stood still and glanced in the direction where the sound came from. There was a burst of fire in his eyes, and then he turned and headed north.

At this time, he was not afraid, but in agitated mood. Today's embarrassed escape did not make him discouraged. He secretly swears in his heart that I will come back soon. When you come again, when you bow your head, he has this confidence.

Chapter 876: All the crystal nuclei are ready to build a city

Liu Zhenya has never been so aggrieved in his life. From when he was a small soldier to now the Chief of Staff of the Military Region, he has never seen what kind of commander, but in the past two days he really feels that he has opened his eyes and his own knowledge is too shallow.

He led the team to go to Zhongzhou to negotiate with the sanctuary. According to Chu Dingbang's request, he could not lose the dignity and face of the Bianzhou Military Region. He took more than 500 people and more than 10 tanks to set off for Zhongzhou, which can be described as a strong soldier.

But this time, they were not as lucky as Liu Minsheng, they were only caught by the mutant golden eagle who made Di Ping blind.

The current mutant golden eagle can't see a car on the road, and will attack as soon as it sees it. It is very strong against Di Ping who hurt it. Now Liu Zhenya directly hit the muzzle.

The first attack of the mutant golden eagle resulted in more than a dozen casualties. Fortunately, the tank reacted quickly and the machine gun repelled it, otherwise the casualties would be even greater.

Then the mutant golden eagle got on the bar with Liu Zhenya, and made sneak attacks from time to time. Its speed was as fast as the wind, and its rush was as electric. The machine gunner couldn't catch its movement at all, let alone shooting, just a burst of random shooting.

Each impact of the mutant golden eagle will cause casualties. A golden eagle's wind knife attack took away more than a dozen soldiers, leaving Liu Zhenya heartbroken.

In the end, Liu Zhenya negotiated with several officers to set up a trap and set up numerous ambushes to lure the golden eagle to attack.

The golden eagle was really fooled, but the result did not make him happy. The golden eagle's desperate counterattack brought a catastrophe to the army. The golden eagle went on rampage. A pair of powerful steel-like wings looked like a pair of swords. The trap rushed to and fro, even four tanks were lost, and the soldiers suffered countless casualties.

Fortunately, the golden eagle was shot a lot, and suffered two shots. The injury was not light, and he finally broke out of the encirclement and flew away.

Liu Zhenya looked at the five hundred soldiers who had suffered heavy casualties, and his face was gloomy for a while. He hadn't paid attention to the announcement before, but now he really knew that the outside world was so dangerous that a golden eagle almost wiped out his army.

"Chief of Staff, what shall we do? Are we going back?"

Commander Liang Chengdong wiped the beads of sweat from his face, and his voice trembled slightly as he watched the lingering fear on his face in the messy battlefield.

"Clean up the battlefield, rescue the wounded, count the number of casualties, separate a group of people to find a place for the wounded to be placed, we will connect it again when we turn back!"

Liu Zhenya was stunned and looked at the battlefield for a long time, then said in a deep voice.

His voice was hoarse, low, and seemed to suppress great anger. Liu Zhenya couldn't help but be angry. These fighters were all elites, but this time he came out and lost so many people. How could he not feel sad.

"Yes!"

Liang Chengdong moved his lips and finally didn't speak. He made a military salute and turned away.

According to the statistics, Liu Zhenya closed her eyes sadly and leaned on the car. In this battle, 500 soldiers died and injured more than 150 people and lost one third of the manpower.

This abominable golden eagle!

Liu Zhenya cursed bitterly in his heart. These people are the strength of his Liu family. This time, the Liu family paid too much for his grandson Liu Minsheng.

The army suffered too many casualties and was no longer suitable for marching. Liu Zhenya arranged for the soldiers to find a place to rest overnight and set off again the next day.

There were 70 or 80 wounded soldiers this time. He was placed in a small town. A dozen soldiers guarded him and set off again with the army.

Now that the road is halfway down, he can't turn back. He must have something to gain this time, otherwise he is sorry for his dead comrades.

This time he came out, he really experienced the danger of the future, and he felt that the safety of the Bianzhou base was worrying. It was not as solid as he and many people thought. If the base also encountered such three or more powerful mutant animals. attack!

Thinking of this, he shuddered, and he didn't dare to think further.

Chapter 877: During the day the wall is a shock

Without the restraint of the convoy, Di Ping was much faster alone. He walked all the way north along the Garden Route. In less than two hours, he rushed to the base. That's the reason he was cautious. He also packed a few mutations on the road. Dog, if he rushes for more than ten kilometers with all his strength, he will be able to get there in an hour.

By the time he arrived at the base, the team had arrived long ago, and the arrangements had been made to take over, with advance arrangements, and the formal base management responded quickly. When he arrived, the base had completed registration and accommodation arrangements.

However, a big problem has also been exposed now. With the addition of Denton Base, the population has exceeded 7,000, making the housing problem stand out.

The two small high-rise buildings are fully occupied, each room is fully arranged, and the remaining villas are also fully arranged.

Because there are still some buildings to be built behind Di Ping, starting from the small high-rise buildings, all the houses in the second half of the whole community are not allowed to be occupied by people, so the place where the base is located is tense.

Most importantly, the Lvyuan community is a high-end villa area, taking the elite route. If before the death, according to the normal family of five people, all the houses would only be full of more than two thousand people.

Now more than 7,000 people have poured in. It is conceivable how crowded it is. As soon as Di Ping came back, Han Zhongguo dragged him to complain. Even the group of people who happily surrounded the city lord and cheered for their return were crowded by Han China. Go to the side.

In fact, Di Ping had also noticed this problem, but he hadn't released his hands to solve it, so he had to comfort Han Zhongguo to arrange these people first.

He remembers major events. Today is the last day of the castle's protection period. If the city wall is not built today, then the base will be completely exposed between the heavens and the earth tomorrow. What should we do if mutated animals come to attack? The base will have these protective forces. Can't fully take care of.

Moreover, the mutant golden eagle that Di Ping has always worried about, once the protection period here is over, once exposed, the golden eagle can be easily seen in the sky. Once it strikes, he can't help it. He doesn't know that the golden eagle is already there. Was injured by Liu Zhenya.

The people from Denton Base arrived at the base, and under the quick arrangement of the base, they all had a place to live. They were extremely excited, especially after communicating with a healthy city citizen with a smile on their faces. Almost jumped up, no one regretted moving to this place at this time.

They are even more grateful for their choice. This is where people stay. Not only do they have water and food, but they can also sleep safely. There is no need to worry about fear. Everyone who hasn't seen the base looks ruddy, like refugees. The hungry face is yellow and thin.

He returned to the castle in a hurry, took a shower and changed his clothes. He had been soaked in the river, and his whole body still smelled bad, and he didn't know how he endured it.

Then he went to the warehouse to deliver the mutant beast meat collected this time to the warehouse.

The supplies are now under the management of Yu Shujie. At this time, her logistics office is also strong and strong, with a dozen subordinates sending a large amount of supplies to the warehouse every day.

The sorrow on Yu Shujie's face is much less, unlike the image of Di Ping who was always depressed when I saw Di Ping before, maybe work really makes people forget their troubles, right?

With the busy work of the logistics department, she is not as idle as the previous vacant job in the agricultural department. With the busy work, she is no longer thinking about things. Apart from being a little shy when seeing Di Ping alone again, she has no more demeanor.

The whole person reveals a kind of professional female ability, she is not complaining about herself, nor full of sorrow, she always has a gentle smile on her face, intellectual, confident, full of the temptation of a mature woman.

Chapter 878: Tianwei is like a god

When seeing the pile of mutated animal carcasses thrown out by Di Ping, Yu Shujie couldn't help showing a shocked expression. It was not a surprise that Di Ping suddenly changed things. This was no secret, and the senior officials knew it.

Rather, seeing the huge corpse of a monster on the ground, the hideous and terrifying monster is like a hill, and people are shocked to see it.

"dead?"

"You see your mouth is crooked, and it won't move, it must be dead!"

"Oh my God! What kind of monster is this, so scary!"

"You see the mouth is so big, the teeth are like jagged teeth, if you bite it, it will definitely be fatal!"

"Oh! My heart is about to jump out, how can there be such a scary monster, the lord is so powerful, even such a monster can be killed!"

"Yes! Yes! The lord is too powerful!"

As soon as the corpse of the monster came out, it was more than ten meters long on the ground. The interlaced fangs looked at the people, not to mention Yu Shujie's horror. At this time, the logistics staff standing around changed color in shock. Dare to talk in a low voice.

"Mutated crocodile gar: bloodline level: a, talent skills: extreme speed, enhanced level: Tier 1-9, skills: bite, giant tail flick; body with ancient bloodline, irritable personality, very aggressive, once annoying Anger will attack all creatures around him!"

Di Ping threw a detection skill at the monster, and the monster's information was displayed. Then he knew that this thing is called a crocodile gar, not to mention that it is really long like a crocodile, and its long mouth is especially like a long kiss. The crocodile, whose teeth are as serrated, looked terrifying.

He hadn't seen this crocodile gar before, which was considered a scarce species, but this did not prevent him from knowing the power of this creature.

The body is about ten meters long, the body is strong and the muscles are strong. At a glance, you can see that the strength is amazing, the scales are dark, the light is glowing in the sun, the defense is amazing, and the whole body is very streamlined, and it should be resistance when the water is small. It is extremely small, and the speed must be extremely fast, the wide and powerful tail fin, and a pair of huge forearm fins under the chest, one can imagine how powerful this creature is in the water.

Di Ping had some doubts before. From the roar, he could feel that the aura of this crocodile gar was not as good as that of the giant python, which was obviously a lot worse. However, he fought so fiercely with the giant python in the water that he almost killed it. Also worn to death.

Although it finally died under the entanglement of the giant python's death, the giant python was already exhausted, otherwise it would not be torn by the raw hands of the king of the same level. If the giant python did not fight to this degree, then It is hard to say whether King Kong can go ashore alive.

King Kong is very powerful, but in the water, it is powerful and cannot be used. Just like fishing, you look at the fish not big, but the power in the water is really strong. A fish weighing a dozen catties can compete with an adult. Compared to the upper half of the day, let alone a powerful mutant like the crocodile gar that is more than ten meters in size.

I didn't see it, King Kong had been refusing to come down from the top of the building. If it hadn't seen the fruit being picked by Di Ping, it might still dare not start.

Looking at the huge monster lying on the ground, he suddenly noticed a detail, which was the ancient bloodline problem revealed by the exploration skills.

He has come across three mutant animals with ancient bloodlines, such as Komodo, the mutant emperor scorpion, and this strange fish. He found that as long as they have ancient bloodlines or bloodlines, all of them are extremely powerful. General mutant animals are much stronger.

It's like the black bear he encountered in the Blacksmith's Village is Tier 1 and Tier 9, and the steel armored tooth beast that came out of the void chrysalis, but he feels inferior to this strange fish, not to mention the python and the science. More than that.

Could it be said that with the ancient bloodline, it will become stronger?

Does that mean that King Kong and Monty Python should also have ancient bloodlines. Does this have anything to do with talent? Do humans also have this bloodline problem?

For a while, Di Ping was a little confused, but at the same time he felt that he might find a little bit of different information, but this had to be verified by him.

Chapter 879: Wonderland shows miracles

More than a dozen logistics staff surrounded the mutant crocodile gar with a little bit of fear on their faces, and talked in surprise, when they had seen such a terrible monster, so they were all very surprised, even Yu Shujie was also circling around the crocodile gar. After two laps, there was still a look of horror on his face.

"Brother Di, you killed the monster! This thing is terrible!"

Yu Shujie patted her full chest and said with a frightened expression.

She still prefers to be called Di Pingdi, she always feels a little alienated from the lord.

Maybe after this period of time, she also slowly let go of her mind, not like the people who always wanted to avoid Di Ping before, it became a lot more natural, and even Di Ge was also called cordial.

Di Ping smiled slightly and said, "I picked it up!"

He felt that Yu Shujie's tone was somewhat close again, which made him feel a lot more comfortable and his tone relaxed. .

"Pick it up?"

Yu Shujie exclaimed, with surprise on her face, but then she smiled in disbelief, "Brother Di, are you kidding me again! Go pick such a terrible monster?"

"Look! No one believes me to tell the truth! I picked it up!"

Di Ping shook his head with a wry smile, and said with a wry smile.

"Really pick it up?"

It seemed that Di Ping was not joking, and Yu Shujie asked cautiously.

"Of course it is true! Such a strong guy, I dare not go into the water to catch it!"

Di Ping shrugged with a smile on his face.

"Well, okay! Even if you didn't lie to me!"

Yu Shujie also shrugged Di Ping's shoulders, and then laughed sweetly. For a moment, the pear blossoms trembled, the lotus shook gently, and the whole body was tender and plump, exuding the fatal temptation of a woman, looking at her peach-like pink face, Di Ping unexpectedly beat violently in his viscera, and a strong desire rose sharply in his heart.

However, when thinking of Yu Shujie's name unconsciously shouted, his heart quickly cooled, and the heat in his eyes quickly subsided.

How sensitive a woman is, Yu Shujie immediately felt the change in Di Ping's breathing and the aggressive look in her eyes, which made her feel fiery in her heart for a while, and her heart beat faster. What made her shy was that I have a slight feeling of liking this, and it seems to arouse Di Ping's ambiguity and make her feel very fulfilled.

But she didn't wait for Di Ping's movements. When she felt Di Ping's rapid and steady breathing and gradually calming eyes, her face darkened. She knew that Di Ping still hadn't forgotten what happened before, which made her feel. Sadly.

But in an instant, she adjusted her mentality again. She had figured it out. She is also very good now. She can eat and wear. She and her daughter can live in the base safely. What else does she think?

The only thing I think about now is to do things well, live a good life, and try my best to help this lovely man manage the base well, do her part, she can't think of anything else.

From Liu Bingyu's fascination with Di Ping to the strong intention shown by Yun Mengsi to the base, she had no hope.

She is a little bit self-sorrowful. She is not as beautiful as these two people, nor is they young, and most importantly, she is already the mother of a child. She feels that no matter from that aspect, she cannot be as beautiful and extremely beautiful as these two. A woman with the skills and ability to compete, and she has also lost the qualification for equal competition.

Not to mention the change in Yu Shujie's mind during this meeting, although Di Ping had an impulse in his heart, since he was able to control his state of mind, he no longer paid much attention to matters with men and women. In these last days, who is not struggling, he To live well, you must have strength.

Therefore, all his thoughts are on the rapid improvement of strength. He has put the matter of men and women behind him, and the occasional impulse can no longer shake his mind.

Chapter 880: The towering giant city appears in the world

"Sister Yu, these mutated animals are handed over to your logistics office. The old rules are that all crystal nuclei are taken out and handed over to me!"

Di Ping calmed down, pointing to the mutant animal on the ground and said.

"Okay! Dige, I will deal with it as soon as possible!"

Yu Shujie forcibly endured the sadness in her heart and said with a smile.

"By the way, this monster will be stored separately after handling it, and it cannot be withdrawn at will without my consent!"

Di Ping pointed to the crocodile gar on the ground and solemnly confessed to Yu Shujie.

"Ok!"

Although Yu Shujie didn't know why Di Ping ordered this, she was clever without asking but nodded and obeyed Di Ping's order.

This is not Di Ping's stingy, putting good mutant meat to enjoy alone, but this monster of rank one and nine, it can be said that it contains powerful energy, and most people can't enjoy it at all.

Just like the mutant black bear meat before, Di Ping can eat a pound of bear meat, but he dare not eat more. The combat team members can eat one or two at most. Even such powerful energy makes many people indigestion and powerful. They simply can't bear the energy.

Therefore, the more powerful the flesh of creatures, the more powerful people are needed to eat it. Di Ping will only provide this type of meat to the awakened.

The awakened people are very useful to eat. They can absorb the energy contained in the flesh as quickly as possible. It is almost no different from the practice method. The most important thing is that it doesn't take much effort. It can increase their strength by eating every day.

The logistics office moved quickly, and it was not the first time that they had dealt with this kind of thing. As soon as Di Ping finished giving orders, they began to take tools to deal with a lot of mutant animals.

The intestines are broken, the skin is peeled and the bones are removed, and the meat is divided into pieces, which is convenient for storage and easy withdrawal. The static space in the warehouse can be stored for a long time to ensure that the meat quality remains unchanged.

Di Ping and Yu Shujie watched the logistics staff clean up the mutant animals and chatted quietly. The two hadn't chatted together for a long time. Yu Shujie enjoyed this process very much, and they chatted very happily.

However, the processing work had to be interrupted. After processing the mutant crocodile fins, they found that their swords couldn't move its scales at all, and the progress was very slow even with the saw.

Although the fins of the alligator were dead, the defense of the scale armor was weak, but it was still not able to move with ordinary weapons. In the end, Di Ping helped to break the scale armor so that they could proceed smoothly.

There are a total of 15 crystal nuclei, and with the previous harvest, Di Ping feels that there should be almost enough for the construction of the base wall.

Although it was enough before, the area to be built is small, and the city wall cannot be moved once it is built.

There are already 7,000 people in the base now, and as people continue to join in, there must be more and more people. By then, the space is too small and it will be troublesome. There is only a lot of space now, so he doesn't want to be small if the city wall is big.

At least we have to encircle the entire current community, so that there are also 5,000 mu of land. As long as the planning is reasonable, it will be enough for the time being.

Therefore, he only needs more than 10,000 crystal coins based on this calculation, otherwise he would not risk going to the zoo.

However, this trip was considered a worthwhile trip. The mission was almost completed, and more than a thousand people were collected. The most important thing was to take down Zhang Hengcheng, the awakened one. The base strength will be further enhanced. He believes that if Zhang Hengcheng is transferred, It will be a great power, even stronger than Tang Zhandong.

After receiving the crystal core, Di Ping bid farewell to Yu Shujie and went directly to the market. Today is the last day of the protection period for system novices, and he is going to build the city wall.

Moreover, he has a big plan. For the development of the base, he will even more shocking everyone. He is ready to do a big thing.
